SciTopics

[SciTopics](http://www.library.tmc.edu/services/ask.cfm) is Elsevier's free wiki developed for the scientific community. It is a knowledge-sharing forum where experts can post their findings on the latest in scientific research from a variety of disciplines.

"[SciTopics](#) is designed to be a starting point for researchers to gain an introductory overview of a particular topic, while also identifying sources for a more in-depth analysis and coverage of that topic. Unlike other web services for the scientific community, *SciTopics* does not focus on one specific scientific discipline, but is open to researchers from all scientific areas."

More information on *SciTopics* is available at: <http://www.scitopics.com/about.jsp>

Cancelled Resources Update

Due to budget reductions, the following *BioMedCentral* journals have not been renewed for 2010:

- *Arthritis Research and Therapy*
- *Breast Cancer Research*
- *Genome Biology*
- *ID Drugs*
- *Current Opinion in Drug Discovery and Development*
- *Current Opinion in Investigational Drugs*
- *Current Opinion in Molecular Therapeutics*

The research articles published in *Arthritis Research and Therapy*, *Breast Cancer Research* and *Genome Biology* are open-access content. All articles in the other four titles, which are review journals, are closed to non-subscribers. Full-text articles from these journals for 2010 may be obtained for a fee through the [Interlibrary Loan](#) department.

The following Nature journals have been cancelled:

- Nature Chemical Biology
- Nature Materials
- Nature Photonics
- Nature Physics

For a current list of [journals cancelled](#) for 2010, go to:
