A Message From The Dean

My Dear Friends:

As graduation time approaches, with its attendant activities, I find myself anticipating with great pleasure three particular phases of Commencement week. The first of these is the opportunity I have at luncheon on Alumni Day to greet and talk with our returning graduates; the second is being able to report personally to all of you at the Alumni banquet as to progress and events at the College during the past year; the third occasion is, of course, when I sit on the platform at Commencement and view with great pride our newest group of Alumni.

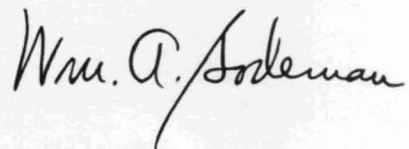

You, of course, are Jefferson. Though the affairs of the College are under the direction of the Board and the administrative officers, and though the faculty is responsible for the teaching of our students, you, as Alumni throughout the World, active in all phases of medicine, are our tie-line to the World. This is one of the many reasons we welcome you back, for it is possible to become insular in our outlook and we need the new and stimulating ideas you bring to us.

I like to hope, too, that after each such meeting and reunion you go back to your particular situations stimulated in turn by the academic and scientific progress you have seen evidenced here. It is, indeed, my deepest hope that you return to your homes with an increased sense of pride in Jefferson. I want you to know that throughout each year our plans and their execution are conceived with the desire to achieve an even greater Jefferson.

With each year of my Deanship I feel closer to the College and its Alumni and look forward with keen anticipation to seeing you all again. I have had many opportunities to visit your Chapters this past year and each visit has been a pleasant one. You have been most gracious and kind to me and, on the occasions on which she accompanied me, to my wife as well. You have made both of us feel very welcome and a part of your close-knit "Jefferson family". For this we are sincerely grateful.

I hope that many of you are planning to return to the College in June and that you will take time from your busy schedules of reunion activities to visit the College and stop in to say "hello". It is a very real pleasure to me to meet and talk with all of you.

Sincerely,

W. A. SODEMAN, M.D.
Dean

A Letter From The President

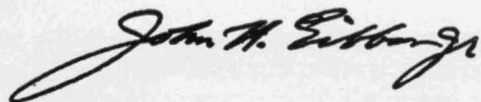

Dear Fellow Alumni:

It is customary at this time every year for your new President to send you a message by way of the May issue of the Alumni Bulletin. It is with genuine pleasure that I do so again this year.

I hope that all of you are planning to attend the Alumni and Commencement exercises this June. Nothing is more heartening to the Faculty, Students and Trustees than to have old graduates return on this occasion. It lifts our spirits up to know that so many of you are interested in what we are doing, and what we are trying to do, here at Jefferson. I think it is safe to say that this grand old institution is in better shape than it has been for many years with particular regard to physical plant, faculty and morale. There are also exciting plans for future expansion which I am sure the President of Jefferson, Mr. Bodine, will divulge to you at Commencement time.

Never forget that you are, and always will be, an integral and important part of this great medical college. Let us make the turnout of alumni this year better than it ever has been before. Put the dates, June 15 and 16, 1960, in red letters on your calendar. The Alumni Day Clinics will be held on these days and the Annual Alumni Dinner will be Thursday evening, June 16. Commencement exercises will be held the following morning, Friday, June 17, in the Forrest Theatre.

Looking forward to seeing and greeting as many of you as I possibly can on those days, I am

President, The Alumni Association

THE DEPARTMENT OF

HISTORY OF THE DEPARTMENT

The evolution of Orthopedic Surgery as it is known today has been relatively slow; however, it has received great impetus over the past few decades. Following the great Wars, and with the advent of heavy industrialization, the role of the orthopedic surgeon has been expanded and clarified, especially along the lines of traumatology and reconstructive surgery. The trends in these directions were definitely evolving during the latter part of the 19th Century.

The Jefferson Medical College can boast of being one of the first institutions to establish an autonomous department in orthopedic surgery. Dr. Oscar H. Allis, of the class of 1866, was the first lecturer in orthopedic surgery. Under the auspices of the General Surgical Department, which at that time was headed by the Grosses, he began to teach orthopedic surgery as a special field of general surgery. He was made Clinical Lecturer of Orthopedic Surgery in 1883 and continued in this capacity until his resignation in 1891. Dr. Allis was succeeded by Dr. H. Augustus Wilson, of the class of 1879, who was given the position of Clinical Lecturer of Orthopedic Surgery and made Clinical Professor in 1892. In 1904 Dr. Wilson was made Professor of Orthopedic Surgery and continued as such until 1918.

During his tenure as Head of the Department, Dr. Allis organized the out-patient clinic which today has grown to become an important facet in the teaching program of both students and residents. The first clinic of this nature was held in the amphitheatre of the old hospital. Associated with Professor Wilson, was Dr. James Mann, of the Class of 1887, who was also Chief of Clinic until 1896 when he resigned to become Professor of Orthopedic Surgery in the Medico-Chirurgical College.

During the years of Professor Wilson's service, many surgical techniques were developed which have become standard procedures and are still utilized today. These techniques were primarily concerned with the prevention and correction of deformities and the management of chronic bone diseases.

Dr. James Torrance Rugh succeeded Professor Wilson in 1918, and he headed the Department until 1939. Dr. Rugh had been graduated from Jefferson in 1892, and had continued in the capacity of an Associate in Orthopedic Sur-

gery at Jefferson Hospital in the Department of Professor Wilson. Dr. Rugh was a national figure and a leader in his field. He served in the Orthopedic Department of the Army, in the Surgeon-General's Office. While at Jefferson, Dr. Davidson and Dr. James R. Martin were associated with Dr. Rugh, and Dr. Martin succeeded him in 1939.

In 1930 the Chair of Orthopedic Surgery was endowed by a large sum of money donated in memory of James Edwards, a manufacturer in this city. The chair was now designated the "James Edwards' Chair of Orthopedic Surgery." From 1938 to 1950 the Chair was held by Dr. James R. Martin.

During this period the clinical facilities were greatly expanded in order to meet the demand of the growing Out-patient Clinic. The first resident in orthopedic surgery, Dr. Thomas Armstrong, started his training in 1946. As will be noted subsequently, this phase of the Department has made tremendous strides and has established a nationally recognized resident-training program. Dr. Martin was succeeded by Dr. Anthony F. DePalma in 1950 and under his dynamic leadership the Department has risen to national prominence in the field of clinical and investigative Orthopedics.

PERSONNEL IN THE ORTHOPEDIC DEPARTMENT

Within the past decade the Orthopedic staff has been considerably augmented with young, well-trained men most of whom received their residency training at this institution. The increased size of this staff has greatly facilitated the vast teaching program at the College in which greater stress has been placed on the role of orthopedics in every-day medicine.

Many members of the staff are actively engaged in the clinical and scientific work of the Department along with their teaching responsibilities.

The combined effort of this group is largely responsible for the ever-increasing reputation of this Department in respect to a strong student teaching unit, as well as an excellent interne and resident training program.

The active teaching staff is comprised of Professor Anthony F. DePalma; Associates, Ralph C. Hand and Abraham Myers; Instructors John J. Gartland, Gerald E. Callery, Joseph J. Toland, III, and John J. Dowling, and Assistants Jerome M. Cotler, James M. Hunter, Richard V. Kubiak, Peter W. Romanow and Sanford Sternlieb.

ORTHOPEDIC SURGERY

(above) Dr. DePALMA Questions a Student Regarding X-Ray Findings During a Teaching Session.

FACILITIES OF THE DEPARTMENT

Over the past decade considerable expansion of the Department has been evident. In addition to the spacious Out-Patient Department on the 6th floor of the Curtis Clinic, large general and administrative offices (including a complete Orthopedic library), there has been added a modern and complete X-ray unit which functions as a part of the fracture clinic and facilitates the care of these semi-ambulant and non-ambulatory patients.

There is a modern, completely equipped plaster room on the third floor of the old hospital. The close proximity of this room to the orthopedic wards greatly facilitates the management of patients needing application of plaster casts. The plaster room is so designed that it can accommodate readily small groups of students for regularly scheduled instruction in plaster techniques. In addition, a larger adjoining conference room has been made available for the con-

(left) DR. J. HUBERT CONNER Supervises Removal of a Cast in the Outpatient Plaster Room as MR. GRAHAM Does the Actual Cutting and MISS FLORENCE HAWKE, R.N., Assists.

(below) DR. J. DAVID HOFFMAN Discusses a Case with Staff Members and Fellow Residents at a Weekly Staff Conference.

duct of clinical conferences on a student, interne, resident and staff level.

With the construction of the new hospital Pavilion, important additional facilities were placed at the disposal of the Department of Orthopedics for the conduct of clinical work. There is a spacious, fully air-conditioned, modern suite, with facilities for plaster work. This increase in operating space has greatly reduced the large number of surgical cases awaiting admission to the hospital and has doubled the number of orthopedic operations performed as compared with only five year ago.

WARD AND PRIVATE SERVICE

Over the past five years the In-Patient Ward service has been markedly augmented. The goal of creating male and female fracture and orthopedic wards has been realized and, as will be noted subsequently, there has been the recent addition of a modern, fully equipped, twelve bed Children's Orthopedic Unit solely for the management of our private and ward orthopedic-pediatric patients. All of these ward facilities are conveniently located on the third floor of the old hospital building and were made possible by the aid and encouragement of the hospital and college administration and the tireless efforts of Dr. DePalma to achieve

a conveniently planned and well organized autonomous orthopedic unit at Jefferson. This enables our students, internes and residents alike to care for the ward patients under the most ideal circumstances.

The total number of available ward beds is 40, of which 28 are for adults, divided equally between male and female patients. The ward census is nearly always 100% with a long waiting list.

The census of the private orthopedic service fluctuates between 50 and 60 patients, which is a vast increase over what it was only five years ago, and has been made possible by the addition of the hospital Pavilion.

The total of the ward and private services not only provides ample material to satisfy the demands of our teaching program but has also made possible the expanded resident teaching program now instituted at Jefferson. During the year of 1959, there were over 1,000 admissions to the Orthopedic In-Patient Department of which 60% were private and 40% were ward cases. The Pediatric Division accounted for 15% of these totals. Included in the overall census were over 350 fracture cases and 450 general orthopedic operative procedures; a total of over 800 operative orthopedic cases.

(above) DR. MICHAEL F. JOYCE Examines a Patient in the Out-patient Clinic as Student Nurses Study the Patient's Case History.

OUT-PATIENT DEPARTMENTS

The Out-Patient is a very important facet of the Orthopedic Department and is truly the backbone of the In-Patient division. For this reason, great emphasis is placed on a well-staffed and efficiently operated Out-Patient Clinic. It is interesting to note that the patient load in the last five years has increased markedly. In 1959 there were 4,717 orthopedic out-patient visits. The out-patient visiting days are arranged to facilitate the teaching program; the Adult Orthopedic Clinics are conducted on Wednesday and Friday mornings from 9 a.m. to 12 noon; the Fracture Clinic is held on Thursdays from 12:30 p.m. to 3:30 p.m.; a separate Childrens' Clinic is conducted on Saturday mornings from 9 a.m. to 12 noon except during July and August when it is held concomitantly with the Friday morning Adult Clinic. The patients are processed by the resident staff; however, there are always three and sometimes four staff members present who function as consultants and instructors. In addition, patients are assigned to students in groups of three and four who, together with an instructor, examine and discuss the orthopedic problems on hand.

The great variety of the orthopedic material which flows into the Out-Patient Department has permitted the establishment of several special clinics. Among these are a

(right) MRS. BEATRICE SAVAGE, Receptionist in the Outpatient Clinic, Interviews a Patient.

(above) DR. JAMES M. HUNTER and DR. RICHARD CAUTILLI Examine Patients in the Hand Clinic.

Shoulder and Knee Clinic conducted on Friday mornings, a Hemophilic-Anthropathy Clinic Friday mornings and a Scoliotic and Club Foot Clinic conducted during Childrens' Clinic hours.

During the past year a Hand Clinic has been established in the Department. This Clinic meets once weekly with resident testing rotation on a Junior and Senior level. This Clinic is supervised by Dr. James M. Hunter, recently returned from a fellowship in hand surgery at Columbia Presbyterian Medical Center, New York.

The aim of the Clinic is to study and test the many aspects of the diseased or injured hand in the child or adult through planned surgical reconstruction and rehabilitation.

The scope of the Clinic has recently been expanded to include diseases of the shoulder and to give a more comprehensive appreciation of reconstruction of the upper extremity.

TEACHING PROGRAM

An ever-increasing effort is made in the Department to teach our students the basic principles of orthopedics and their practical application. This has been achieved by increasing the hours of instruction, by greater emphasis on bedside teaching and by making instruction to small groups more readily accessible. The institution of this plan has been made possible by the addition to the teaching staff of three young, enthusiastic instructors.

Orthopedic instruction begins in the Sophomore year when, with the cooperation of the Department of Medicine, the students in small groups are taught the methods employed to examine the musculo-skeletal system and are acquainted with the normal anatomy of this system. In the Junior year, didactic lectures in orthopedics and in the diagnosis and management of fractures are given by Pro-

(above) DR. JOSEPH J. TOLAND, III, Discusses a Patient's X-rays with Two Students During One of the Small Group Teaching Sessions in the Outpatient Clinic.

(right) DR. JOHN J. GARTLAND, JR., Instructs a Group of Students in Examination of a Patient During a Teaching Session.

fessor DePalma. In addition, the third year students in small groups are given individual instruction in the Out-Patient Department and Fracture Clinics. This course of instruction continues for three weeks; special emphasis is laid on methods of examination of the patients, differential diagnosis and methods of treatment of the orthopedic lesions and fractures most frequently encountered.

In the Senior year the teaching program is intensified still further. An attempt is made to correlate and augment the information stressed in the Sophomore and Junior years. This is achieved by individual instruction at the bedside and by clinical conferences for small groups of students. The students in the surgical block are assigned to the Orthopedic wards for a three week period; it is during this period that bedside instruction and clinical conferences are given.

The rapid turnover on the orthopedic wards provides ample teaching material and all private cases are available

for teaching purposes. The student is required to follow his case to the operating room, where he works as a surgical assistant at the operating table. Here time is taken by the surgeon to demonstrate the pathology found and to elaborate on the surgical technique and methods employed. Finally, during this period of clerkship, the student is shown all the acute fractures that are admitted to the hospital both on the ward and private services. The immediate pathology and deformity of the fracture are discussed, the methods of reduction are explained (frequently they are performed by the student under supervision) and finally the methods of fixation, such as plaster casts or traction are demonstrated. It is the general feeling of the Department that the Jefferson graduate is well grounded in the basic principles of orthopedics and traumatology and fully prepared to manage intelligently and adequately the entities most frequently encountered.

RESIDENCY TRAINING PROGRAM

The residency training program in Orthopedic Surgery began at Jefferson in 1946 with one resident. It has developed until at the present time there are ten residents enrolled in the program. The period of training has been extended to five years, exceeding the requirements of the American Board of Orthopedic Surgeons by one year. This year is devoted to research in the Orthopedic Laboratory, the activities of which are described in another section.

The training program is organized to coincide with the requirements of the American Board of Orthopedic Surgery and includes separate periods devoted to Adult Reconstructive Orthopedics, Fracture Surgery and Children's Orthopedics. In 1959 the Children's Orthopedic Unit was inaugurated and has rapidly developed into one of the most important parts of the Department. For the past six months beds in this unit have been at a premium and a most interesting variety of children's problems have been concentrated in one area, allowing us to train one resident annually in Children's Orthopedics. Two other residents each year are sent to the State Hospital for Crippled Children in Elizabethtown for special training in Children's Orthopedics. At the present time Doctors Henry Sherk and Vernon L. Smythe are assigned to this Hospital and for this reason will not be seen in any of the photographs.

(below) DR. MICHAEL F. JOYCE and DR. BRUCE GOODMAN Tell a Happy Young Patient That He Will Soon Be Going Home.

(right) Two Little Patients Hold a "Telephone Conversation."

The Basic Science orientation is provided for each resident by a session of prosecting with the Freshmen students in the Daniel Baugh Institute Laboratories of Anatomy and supplemented every other year by special courses given in the evenings on Surgical Anatomy, as well as a three-month period spent exclusively in the study of general pathology, with special attention on pathology of the musculo-skeletal system.

Special meetings particularly held for resident training are a weekly Orthopedic-Radiologic-Pathologic Conference held on Monday afternoons, Pre-operative Conferences held every other week and Jefferson Orthopedic Journal Club meetings held once a month or more, as attention to current literature necessitates. In addition, various members of the staff, periodically and electively, instruct the residents in subjects of concern that are not covered in the ordinary run of conferences.

Resident participation in their own training program consists of presentations weekly at the above named conferences, as well as participation by the Senior residents in the teaching of both Junior and Senior medical students.

Many of our residents at the present time are working toward Master of Surgery Degrees by taking extra courses and working on theses to be presented for consideration to the Post-Graduate Department of the College. The co-ordinator of resident training and activities is Dr. John J. Dowling.

The residents are Dr. J. Hubert Conner (1960), Dr. Bruce Goodman (1960), Dr. Michael F. Joyce (1960), all of whom will have completed a four-year training program this July. Dr. J. David Hoffman (1962), Dr. Henry Sherk (1962), Dr. Philip J. Marone (1963), Dr. Vernon L. Smythe (1963), Dr. Richard Cautilli (1964), Dr. William Coyle (1964) and Dr. John S. Kruper (1964), all of whom are in a five-year program.

In July five additional residents will be absorbed into the program: Dr. Joseph Danyo (1965), Dr. Lawrence Gigliotti (1965), Dr. Albert Kong (1965), Dr. Charles McDowell (1965), and Dr. Charles Silberstein (1964). Dr. Blackwell Sawyer, Jr., is on military leave until July of 1961.

RESEARCH ACTIVITIES

During the past several years the research program of the Department of Orthopedics has been greatly expanded. Our laboratory facilities now include a complete operating room, a room used exclusively for the handling of radioisotopes in animals, a photographic dark room, a micro-technique laboratory and a general chemistry-bacteriology laboratory area.

The resident training schedule now provides that each year two orthopedic residents spend full time in the research laboratory. During this time, in addition to assisting

Dr. DePalma and the various other staff men in their projects, the resident develops research projects of his own. These projects, when successfully completed and accepted by the graduate school of The Jefferson Medical College, will earn for the resident the degree of Master of Science in Orthopedic Surgery.

At present Dr. Cautilli and Dr. Kruper are the full time residents. Dr. Cautilli is investigating the S^{35} uptake of transplanted cartilage and Dr. Kruper is working with the problem of developing scoliosis in laboratory animals.

At present Dr. DePalma is working with the S^{35} uptake of autogenous and homogenous femoral cap transplants, utilizing the technique of autoradiography, and the immunological effect of papain on cartilage in rabbits.

We of the Orthopedic Department are very grateful to Dr. Billingham, of the Wistar Institute, for giving us two strains of isogenic rats. These rats have been inbred for about 40 generations and when our colony becomes large

enough we hope to study the immunological aspects of bone transplantation with them.

Dr. Sherk and Dr. Smythe have just finished their year in the Research Laboratory. Dr. Sherk worked on the immunological aspects of bone grafting, and he presented a paper on this topic to the American Association of Orthopedic Surgeons. Dr. Smythe explored the innervation of the talo-vascular joint with regard to peroneal spastic flat foot.

Dr. Hoffman and Dr. Sawyer, during their year in the Research Laboratory, assisted Dr. DePalma in his original work on femoral cap transplants, on the effect of trauma on the femoral condyles of young dogs, in his work on the function of the patella in the normal knee joint, and the changes that occur following the removal of the patella. Much of this work has been published and scientifically exhibited at the American Academy of Orthopedic Surgeons and the American Medical Association Convention.

(below) DR. JOHN S. KRUPER, DR. RICHARD CAUTILLI, MRS. TERRY DiCARLI and MR. FRED SEAGREAVES Work with Isogenic Rats in the Laboratory.

(above) Secretaries MOLLY GREER and SHARON RAMMER Chat with a Medical Student in the Orthopedic Department Office in Curtis Clinic.

In addition to two full-time orthopedic residents, the Laboratory also employs a full-time technician, Mrs. Terry DiCarli, who prepares our histological slides and Mr. Fred Seagraves who is in charge of the care of the experimental animals and general maintenance of the Laboratory.

DEPARTMENTAL PUBLICATIONS

Much of the aforementioned basic scientific research, as pursued by Dr. DePalma and the resident staff, has been the stimulus for numerous publications. It is noteworthy that

there have been four major publications by members of the Department in recent years: SURGERY OF THE SHOULDER, J. B. Lippincott Company; DISEASES OF THE KNEE JOINT, J. B. Lippincott Company; DEGENERATIVE CHANGES IN STERNOCLAVICULAR AND ACROMIOCLAVICULAR JOINTS IN VARIOUS DECADES, Arthur H. Thomas, Publisher (in American Lect. in Orthopedic Surgery); THE MANAGEMENT OF FRACTURES AND DISLOCATIONS, an Atlas, 2 Volumes; W. B. Saunders Company.

New Army Hospital Named in Memory of Brigadier General Charles M. Walson, '06

On March 15, 1960, a new Army hospital at Fort Dix, New Jersey, was dedicated in honor of Brigadier General Charles Moore Walson and has been named The Walson Army Hospital in his memory.

Dr. Walson was graduated from The Jefferson Medical College in 1906 and began his Army career in 1912. Following graduation from the Army Medical School, Washington, D. C., General Walson served in Utah, Hawaii, Washington, Arkansas and Vera Cruz, Mexico.

In World War I, General Walson served in France as Assistant Surgeon, Office of The Surgeon General, American Expeditionary Forces, and in Germany with the Army of Occupation.

During the post War years, his assignments included that of Executive Officer, Walter Reed General Hospital, Washington, D. C.; Post Surgeon, Fort Benjamin Harrison, Indiana; Chief, Hospital Construction Division, Office of The Surgeon General and Surgeon's Office, Second Corps Area.

During World War II, General Walson served as Surgeon, Second Corps Area and Service Command Surgeon. During this period of duty, General Walson supervised the reception and evacuation of over one hundred forty-five

thousand American, and seven thousand prisoner of war patients. He planned the mass procurement of physicians and nurses and secured the use of important, adjunct medical facilities. For this outstanding achievement, General Walson was awarded the Legion of Merit.

During the post War years, General Walson served as Surgeon, First Army Area until his retirement in 1947.

During his retirement, General Walson served as the Administrator of the American Red Cross Blood Program in the Greater New York Area. He died May 14, 1959.

The hospital named in his honor has a capacity of 500 beds and can be expanded to a capacity of 1,000 beds with additional ward construction. It features centralized clinics, modern communications, oxygen and vacuum distribution systems, air conditioning and many other innovations. Its cost, including equipment, was approximately \$12,000,000.00.

Present at the dedication ceremonies were Dr. and Mrs. Francis F. Borzell, Dr. Borzell having been a classmate of Dr. Walson.

Dr. Milton J. Freiwald, Assistant in Ophthalmology, recently addressed the members of the medical and surgical staff of this hospital on the subject: "Epi-bulbar Tumors and the Surgical Management of Malignant Melanoma."

30th Black and Blue Assembly Honors Percival E. Foerderer, Chairman of the Board of Trustees

The 30th annual BLACK AND BLUE BALL was held on March 18, 1960 in the Ballroom of the Sheraton Hotel, and honored Mr. Percival E. Foerderer, member of Jefferson Medical College and Medical Center Board of Trustees for over 31 years and Chairman of the Board for ten years. This All-College dance is called BLACK AND BLUE after the adopted "Jefferson" colors. From all reports and letters received, the whole affair was a huge success and enjoyed by all those in attendance.

At the cocktail party and dinner before the dance, we had all the Officers of Kappa Beta Phi and the chief Executive Officers of the Hospital and the College. In addition to Mr. and Mrs. Foerderer, three other Board members

and their wives, Mr. and Mrs. Wear, Mr. and Mrs. Brown and Mr. and Mrs. Rincliffe, as well as the Acting Secretary, Mr. Brock, and his wife, were present. Other guests were President Bodine and his wife, Dean Sodeman and his wife, Dr. and Mrs. Nye and Dr. and Mrs. Browneller. Also present were the President of the Alumni Association, Dr. Gibbon, and his wife, and President of the Medical Staff, Dr. Fetter, and his wife. All paid tribute to Mr. Foerderer for his devotion and long service to Jefferson. Mr. Foerderer then was inducted on sight as a member of Kappa Beta Phi and was presented with a beer mug bearing its insignia.

It is interesting to note that the dinner party was at-

tended by students, all of the Executive Officers of the College and Hospital, the President of the Alumni Association and the President of the Medical Staff. It promoted sociability and acquaintanceship among the three groups and all of them were pleased and enthusiastic about the accomplishments of Kappa Beta Phi and its future aims. The enthusiasm and appreciation of some of those present were expressed by their sending an anonymous contribution of \$500 to the Student Benefit Fund. We are grateful for having received it and assure the donors that it will be wisely used.

After dinner the party adjourned to the Ballroom where they witnessed the "greatest show on earth"—about 400 carefree young people dancing to the excellent music.

About 10:30 p.m. the members of the Board of Trustees, President Bodine, Dean Sodeman and Doctors Gibbon and Fetter were presented from the stage to those in attendance.

Before the presentation of the honored guests, letters of congratulations and commendation to Mr. Foerderer were read. The letter from the White House, by Major General Howard M. Snyder, personal physician to the President and one of our graduates, was read by our newest Trustee, Mr. Rincliffe. The letter from Senator Hugh Scott was read by Dr. Gibbon, President of the Alumni Association and the third letter from Vice President of the United States, Richard M. Nixon, was read by Mr. William Potter Wear, third generation Trustee of Jefferson. I had the honor of making the final presentation to Mr. Foerderer on behalf of the student body, Kappa Beta Phi and Alumni. This was a framed, illuminated, engrossed scroll, expressing our appreciation to him for his devotion and long service to Jefferson, to medical and nursing education and to humanity.

The Board of Trustees appreciates the contributions

made by the Alumni and others to Jefferson. On the other hand it is doubtful if there is complete realization of the time and energy that Board members spend in keeping the Corporation a going concern. Their love and devotion to Jefferson have kept the College and Hospital in the forefront in medical and nursing education. The present Board of Trustees has rendered over 250 years of service to Jefferson. Teamwork of all those interested in Jefferson's future is essential now, since the cost of education has gone up and the philanthropic dollar is harder to get.

Last year the Trustees elected two fine young executive officers: Dr. Sodeman as Dean and Mr. Bodine as President. Both are dynamic individuals, full of energy and interested in the welfare of the students and the promotion

of Jefferson. The institution is fortunate to have them as leaders.

By honoring Mr. Foerderer we hoped to show our appreciation of the Trustees' interest and work on behalf of Jefferson.

The letters of commendation to Mr. Foerderer which came, through the writer, from Dr. Snyder, Senator Scott and Vice President Nixon, marked the first such tribute in Jefferson's 135 year history. The scroll and these letters are on display in the College Library.

Psychiatric Departments of Jefferson and University of Pennsylvania Medical Schools Sponsor Educational Program

The Psychiatric Departments of The Jefferson Medical College and the University of Pennsylvania School of Medicine are sponsoring an educational program entitled "Psychiatry in General Practice" to provide informal psychiatric training for the general practitioner.

Dr. Robert A. Matthews, Professor of Psychiatry and Head of the Department at Jefferson, and Dr. Kenneth E. Appel, Professor of Psychiatry and Chairman of the De-

partment, University of Pennsylvania School of Medicine, are co-directors of the program, which will be made up of six to twelve sessions at weekly or other convenient intervals for groups of not less than six nor more than fifteen general practitioners who desire such training. Dr. Harry R. Draper, Associate in Clinical Psychiatry, is Co-ordinator of the program.

Three Alumni Are Among Founders of Delaware Academy of Medicine

A short history of the Delaware Academy of Medicine, written by Dr. William H. Kraemer, Class of 1906, has recently been published in the Delaware State Medical Journal. It is interesting to note that three of its sixteen founders were Jefferson Alumni: Dr. Joseph M. Barsky, Sr., '14, Dr. William H. Kraemer and Dr. William R. Mayerburg, '16.

The Delaware Academy of Medicine was founded only thirty years ago although the Medical Society of Delaware had been incorporated in 1789, thus being the second oldest medical society in the United States. Never during these years, however, had a satisfactory center been made available as a meeting place for this and other societies, nor had a medical library been established. Therefore, after its incorporation in 1930, the Delaware Academy of Medicine undertook to provide quarters for this purpose. They were successful in doing this, and the present building, which was made possible through an ambitious campaign, contains an auditorium, conference room, lounge, kitchens and dining room and office space.

Faculty Members and Alumnus Participate In "Grand Rounds" Films

Seven films of "Grand Rounds" have been prepared by the Upjohn Company. These are 16 mm. sound films, made directly from closed-circuit telecasts, and are made available to physicians, medical students and nurses.

Dr. Henry L. Bockus, '17, participated in two of these telecasts; one on "The Borderlines of Cancer" and the other "Pre-Malignant and Malignant Lesions of the Breast and Colon." Dr. Philip J. Hodes, Professor of Radiology and Head of the Department, was also a participant in these same two films while Dr. W. Paul Havens, Jr., Professor of Clinical Microbiology and Professor of Medicine, was a participant in the film on "Diagnostic and Therapeutic Advances in Liver Disease."

Dr. Aponte Selected as Markle Scholar

Dr. Gonzalo E. Aponte, Assistant Professor of Pathology, has been highly honored in having been selected as one of the twenty-five Markle Scholars in Medical Science. These twenty-five Scholars are selected from the faculties of the American and Canadian medical colleges.

The John and Mark R. Markle Foundation appointment carries a \$30,000.00 grant to be used by the medical college where the Scholar will teach and do research. It will be paid at the rate of \$6,000.00 a year to supplement the Scholar's support and to aid his research for five years. Dr. Aponte will research in a phase of cancer.

Dr. Aponte was graduated from Jefferson in 1952, and after his internship here he served a four year residency in Pathology here.

Dr. Aponte also served in the Navy as Chief of Laboratories at the United States Naval Hospital in Guam, as Pathologist at Guam Memorial Hospital and as Deputy Medical Examiner for the Government of Guam. Following this, he was appointed to the Jefferson Faculty and has been on leave of absence for several months, during which time he has been a Research Fellow at the Brookhaven National Laboratory, Long Island, New York.

SENIOR CLASS PRESENTS PORTRAIT OF DR. ABRAHAM CANTAROW TO THE COLLEGE

Another fine portrait was added to Jefferson's already impressive collection of paintings of outstanding faculty members when the portrait of Dr. Abraham Cantarow was presented to the College by the Class of 1960 on Wednesday, March 30.

The portrait was painted by Mr. Alden Wicks, of New Hope, and captures the personality and character of Dr. Cantarow most effectively.

Mr. William F. Hushion, President of the Senior Class, opened the ceremonies, which were held in the Amphitheatre of the Hospital, by explaining briefly the reasons which prompted the Senior Class to select Dr. Cantarow as the Professor to be so honored.

"It does not seem three years ago," Mr. Hushion said, "that as Freshmen we left the confines of D.B.I. to begin with eager anticipation our work at the College. This was our first meeting with the man whose portrait we present today. Dr. Cantarow guided us through a maze of circles, rectangles and squares, explaining fluid and acid-base balance, mechanisms of diabetes mellitus, renal function and many other intricacies of body metabolism from a biochemical standpoint.

"His thoroughgoing and excellently written textbook, probably the finest in the field, was invaluable as a reference source and lecture supplement. At that time I do not think we fully realized how important a role this knowledge would play in our future years in the practice of medicine; but we are constantly faced with problems

requiring a good, basic knowledge of the subject so well taught by our Professor of Biochemistry. It was an association that would leave its imprint throughout our future years. However, his relationship with the students went beyond that of lecturer and course-planner. Dr. Cantarow was someone to whom we could go for advice and assistance, even outside the realm of medicine. His influence indeed played an important role in that early formative year of our medical training.

"And so, it is with sincere pleasure that the Class of 1960 honors this teacher, scholar, gentleman and friend for all that he has done, not only for our Class but also for the many classes who have benefited from his thirty-three years of teaching. The Senior Class, I know, echoes my thanks to Dr. Cantarow for his efforts in helping to provide us with a solid foundation on which to build our careers as physicians. His distinguished work and outstanding character will form both a significant and a lasting portion of our memories of Jefferson."

Dr. Benjamin F. Haskell, Clinical Professor of Proctology, and long-time friend of Dr. Cantarow's, then gave the highlights of Dr. Cantarow's distinguished career.

"Almost forty years ago," Dr. Haskell began, "the distinguished Professor of Biochemistry whom you honor today entered Jefferson in the class following my own. In fairly rapid succession, it now seems, he became a member of the same fraternity,

fellow intern, roommate, collaborator and close friend. It is, therefore, an unusual privilege for me to participate in this occasion and to tell you something about him.

"It has been rumored that when Dr. Cantarow was approached to sit for the artist he was told what Lady Churchill said to her famous husband under similar circumstances: 'It won't take long and it won't hurt.' He acquiesced, and the artist, Mr. Alden Wicks, saw to it that the time was well spent. For Dr. Cantarow, by his own admission, became thoroughly confused and then absorbed with the brush-stroke techniques; and it may well be that the Class of 1964 will have to master some of these techniques along with the usual laboratory procedures.

"Abraham Cantarow appeared on the Philadelphia scene in 1920 as a very slim and very quiet youth coming from that great insurance center, Hartford, Connecticut. It is pleasant to note that while Connecticut paid the premiums for his early education, Jefferson has been collecting the endowment."

Dr. Haskell told of Dr. Cantarow's interest in music, having taken advanced training as a student of the violin at the Boston Conservatory of Music while attending Tufts University, and also of his strong interest and proficiency in tennis, since he was a top-ranking player in the area and competed in several state championships.

(above) Left to right— MISS ELLEN CANTAROW, JUSTICE STERN (Mrs. Cantarow's Uncle), DR. CANTAROW, DR. HASKELL, DR. SODEMAN and MRS. CANTAROW Grouped About DR. CANTAROW'S Portrait.

"It is our good fortune," Dr. Haskell said, "that the laboratory took precedence over the concert stage and that he developed an interest in metabolism rather than in the perfection of his backhand strokes. That this young man should go into medicine, however, was almost foreordained—his father, paternal grandfather, three uncles and an aunt were all in medicine.

"As a first year student Abraham Cantarow's unusual ability was recognized early and before the end of that year he was made an assistant in the laboratory of Dr. Philip B. Hawk, then Professor of Biochemistry. His first summer vacation was spent in the same laboratory and it was here that he met

Dr. Max Trumper, biochemist to the hospital. That association committed him firmly to biochemistry.

"The ease with which this young student completed his day's assignment was often a source of frustration to his roommates. Finishing his studies early, he would retire to another part of the house and the strains of violin music would be heard. More often than not it would be the music of Bach. Perhaps the influence of the great composer has carried over into the later years of the biochemist. It has been said of Bach that he, more than most of his contemporaries, 'expressed the spirit of his age.' Today it may be said of Biochemistry that it expresses best the spirit of modern

medicine. And one of the great exponents of that science is our respected Professor of Biochemistry."

Dr. Haskell told of Dr. Cantarow's having been a member of a dance orchestra composed of Jefferson students during his undergraduate days, but said that his hobbies today are less strenuous. He listens to good music and reads a great deal of biography and history, devoting any spare time to photography.

"Following graduation with honors," Dr. Haskell continued, "Dr. Cantarow elected the biochemical internship at Jefferson. In those days, the Jefferson internship was of the rotating type for 27 months. Two of the internships included a preliminary first year in bio-

chemistry or pathology. One of these appointees became the chemical intern while his counterpart soon became known as the pathologic intern. As the intern on chemistry, young Cantarow began his first research and before completion of the full internship six original papers appeared under his

a monograph on 'Calcium Metabolism,' the first work of its kind to appear and one that remained popular for many years.

"In 1932 he was appointed Biochemist to the hospital in charge of the laboratories of clinical biochemistry. 1932 also dated the publication of the

one of Philadelphia's fine old homes on Delancey Street.

"About this time also, he became associated with Dr. Harold W. Jones in the teaching of clinical laboratory methods. After Dr. Jones left the laboratory, Dr. Cantarow remained in

(right) DR. CANTAROW
expresses His Appreciation
of the Honor Given Him.

name. It was as an intern, too, that Dr. Cantarow began his first teaching at the request of Dr. Thomas McCrae, then the Magee Professor of Medicine. The assignment was in physical diagnosis, the phase of medical teaching which Dr. McCrae regarded as the most important.

"Busy years followed. The discovery of the parathyroid hormone in 1925 by Collip stimulated Dr. Cantarow's interest in the metabolism of calcium, and he continued this research while a Fellow in the Department of Chest Diseases under Dr. Elmer Funk. The result was the publication in 1930 of

first edition of his 'Clinical Biochemistry,' one of the most widely used works of its kind. Now in its fifth edition, it has been translated into five languages—the most recent Japanese.

"In that eventful year, however, he was not so preoccupied with biochemistry that he failed to find time—and plenty of it—to court and marry Elizabeth Stern, a charming member of an old Philadelphia family and a talented graduate in Psychology from the University of Pennsylvania. With their attractive daughter, Ellen, they have long been gracious occupants of

charge until 1944. In that year a monograph on 'Lead Poisoning' was published. Throughout these years he maintained close contact with the Department of Medicine both as a teacher and as a research worker in inorganic metabolism. His ability in this field was recognized by his appointment as an Associate Professor of Medicine in 1939. During that period Dr. Hobart A. Hare, the brilliant Professor of Therapeutics, was his closest adviser, and the stimulating association and close friendship have remained among Dr. Cantarow's fondest memories of his earlier years at Jefferson.

"In 1945 he became Professor of Biochemistry. One of Dr. Cantarow's great qualities has been his intense loyalty to Jefferson and we have reason to be grateful for it. Several leading medical schools made attractive offers but he refused all of them. There followed years of devoted teaching and intensive research, for the professorial chair has always been his laboratory stool. His research includes studies in liver function, in the intermediary metabolism of steroid hormones, and in experimental carcinogenesis. This work is represented in more than 200 original publications. In 1954 the first edition of his widely used textbook 'Biochemistry' appeared. Published that same year was 'Endocrinology,' of which Dr. Cantarow was co-author with Doctors Paschkis and Rakoff. In 1957 he was one of six Americans, among an international group, selected to be delegates to the African Congress on Liver Cancer. He has since been named to the Board of Directors of the American Association for Cancer Research.

"It is unlikely, however, that Dr. Cantarow is honored by this class today because of his distinguished position as a biochemist or his reputation as a brilliant investigator. Rather, as casual questioning quickly suggests, this honor is done him because of what he is as a man, as a teacher, and as a friend. On two occasions graduating classes dedicated their yearbook to him—in 1943 when he was an Associate Professor of Medicine and again in 1959 as Head of the Department of Biochemistry. This is unique in our school history. There is another little known and unpublicized activity which tells even more about the man. Dr. Cantarow has spent much time and effort in helping a number of young men get a proper start in research. The value of this stimulus and aid at a critical time in young careers cannot be over-estimated.

"Dr. Cantarow is a friendly man and a warm one. He has humility and a sense of humor. His colleagues, as well as his students, like and respect

him. More than this, he has that great quality mankind needs so much today—integrity. The Class of 1960 has chosen to honor a rare individual and I congratulate you."

Mr. Hushion and Mr. Howard E. Hock, Chairman of the Portrait Committee, then unveiled the portrait and Dr. William A. Sodeman, Dean, accepted it on behalf of the Board of Trustees, the Administration and the Alumni.

Doctor Sodeman said, "It gives me the greatest of pleasure to accept this portrait of Dr. Cantarow. I think you can see, as you look at it, the fine work the artist has done. This is not just another portrait for our halls, for it brings out the personality and feeling of Dr. Cantarow, and is a real addition to our collection of portraits of Jefferson 'greats.'

"Dr. Haskell, as he said, is an old friend of Dr. Cantarow's. I am a new friend, having known him only during the two and one-half years since I have been at Jefferson, and I believe Dr. Haskell's remarks reflect very well

(left) Left to right—MR. ALDEN WICKS, the Artist; MR. HOCK, Chairman of the Portrait Committee, and MR. HUSHION, President of the Senior Class.

what one who has known Dr. Cantarow for many years has developed in his knowledge and close friendship. But it isn't necessary to have known him for many years to appreciate him and recognize his fine character. Dr. Cantarow is a stalwart on our faculty and we look to him for guidance in our progress and problems, for his sound judgment, firmness and tenacity represent the qualities we need to maintain the high standards we demand here at Jefferson. In Dr. Cantarow these qualities are tempered by a kind approach and the subtle sense of humor Dr. Haskell mentioned."

Dr. Sodeman thanked the Senior Class and said that the portrait would take a prominent place at Jefferson . . . "to record the magnificent job Dr. Cantarow has done in research and teaching in the past, what he is doing now and will continue to do in the future."

Dr. Cantarow expressed his deep and sincere gratitude to the Senior Class for having chosen him for this great honor, though he said he had not recognized himself as the person Dr. Haskell was describing and had been afraid that when the portrait was unveiled he would find that it was all a mistake and that he would be exposed as an imposter!

In his typical quiet and modest manner, Dr. Cantarow said, "It does not seem right that one should be re-

warded in this wonderful way for something that has given one so much pleasure, but right or wrong, nothing is so gratifying to a teacher as the appreciation and respect of his students."

Mr. Hock, Chairman of the Portrait Committee, introduced the artist, Mr. Alden Wicks, who had also painted the portrait of Dr. Bernard J. Alpers which was presented to the College last year by the Class of 1959.

(above) DR. HASKELL Tells the Audience of DR. CANTAROW'S Distinguished Career.

Mr. Wicks said that it had been a great pleasure to paint Dr. Cantarow and that everything he felt for his distinguished model is reflected in the picture. He said that . . . "as a painter whose real delight is in painting nudes, whales and angels, not necessarily in that order, I have to add doctors to this list, because the two associations I have had at Jefferson have been most pleasant and rewarding."

Jefferson Receives Cancer Grant

The American Cancer Society has allocated the sum of \$1,161,189.00 for cancer research in Philadelphia and Montgomery Counties (Pennsylvania). The Jefferson Medical College has been given a grant of \$24,490.00 by the Society.

CLASS REUNIONS

50th REUNION — 1910

DR. NORMAN B. SHEPLER
510 N. Second Street
Harrisburg, Pennsylvania

The class of 1910 will hold a luncheon at the John Bartram Hotel, Broad and Locust Streets, on Wednesday, June 15, 1960.

45th REUNION — 1915

DR. RALPH M. TYSON
255 S. 17th Street
Philadelphia, Pennsylvania
DR. CHARLES A. PRYOR
255 S. 17th Street
Philadelphia, Pennsylvania

The Class Reunion will be held on June 16 at one of the central city hotels. Definite arrangements will be announced in the near future.

Dr. Harold L. Goldburgh will be the Class speaker at Class Reunion Day Clinics.

40th REUNION — 1920

DR. HENRY B. DECKER
527 Penn Street
Camden, New Jersey
DR. LEWIS C. SCHEFFEY
255 S. 17th Street
Philadelphia 3, Pennsylvania
DR. MARTIN J. SOKOLOFF
255 S. 17th Street
Philadelphia 3, Pennsylvania

Tentative plans include a dinner for Class members and their wives on Wednesday, June 15, at one of the center city hotels. Announcements as to the exact time and place will be sent to Class members at a later date.

35th REUNION — 1925

DR. CLYDE M. SPANGLER
255 S. 17th Street, Philadelphia 3, Pa.
DR. I. CHARLES LINTGEN
1930 Chestnut Street, Philadelphia, Pa.

The Class of 1925 will have a Luncheon for Class members on Wednesday, June 15, 1960.

30th REUNION — 1930

DR. LEIB GOLUB
338 S. 21st Street
Philadelphia, Pennsylvania

DR. PATRICK J. KENNEDY
32 Hampden Road
Upper Darby, Pennsylvania

The class of 1930 is planning to have a dinner at one of the center city hotels on Wednesday, June 15. Class members will be advised of the place and exact hour of the dinner at a later date.

25th REUNION — 1935

DR. JOHN A. MCCORMICK
632 Manor Road
Penn Valley, Narberth, Pennsylvania
DR. EDMUND L. HOUSEL
255 S. 17th Street
Philadelphia 3, Pennsylvania

There was a very enthusiastic meeting of the Philadelphia group—12 in all—and everyone is working to make this the greatest reunion ever.

The Reunion Luncheon for Class members will be on Wednesday, June 15, at the Union League. There will be a dinner-dance that evening in the Mirage Room of the Barclay Hotel and a cocktail party on June 16 at the Benjamin Franklin preceding the Alumni dinner.

A very interesting and attractive program is being arranged by the Committee for the ladies and final details will be announced later.

The Committee hopes to have 100 attend the Reunion.

20th REUNION — 1940

DR. THOMAS B. MERVINE
133 S. 36th Street
Philadelphia 4, Pennsylvania

There will be a dinner-dance on Wednesday, June 15, in the Mirror Room of the Warwick Hotel, and on Thursday, June 16, there will be a cocktail party at the Benjamin Franklin Hotel preceding the Alumni Banquet.

15th REUNION — 1945

DR. FRANCIS J. MURPHY
2515 Garrett Road
Drexel Hill, Pennsylvania

Reunion plans for this Class include golf on Wednesday afternoon, June 15, and a dinner-dance that evening at the John Bartram Hotel. There will also

be golf on Thursday afternoon, following the Dean's Luncheon, and cocktails preceding the Alumni Dinner at the Benjamin Franklin.

5th REUNION — 1955

DR. ROBERT J. SENIOR
Lennox Building
Chapel Hill, North Carolina

DR. MICHAEL G. CHRISTY
124 W. Park Avenue
Haddonfield, New Jersey

The Class of 1950 will have a dinner for Class members and their wives at Bookbinders' Restaurant, 125 Walnut Street, on Wednesday, June 15, with cocktails at 6 P.M. followed by dinner at 8 P.M.

10th REUNION — 1950

DR. WILLIAM B. MCNAMEE
4501 Marvine Avenue
Drexel Hill, Pennsylvania

This class will hold a dinner-dance on Wednesday, June 15, at the Drake Hotel.

JEFFERSON MEMORABILIA

THE MIDWINTER KNEIPE

of the
ALUMNI *of* JEFFERSON MEDICAL COLLEGE

Will be held at Kugler's, Chestnut Street above Broad, on Friday evening, February 23d, 1912, at 8.30 P. M.

Last year 151 husky sons of old Jeff went to her party.

There will be tables large and tables small. Come!!! Sit where you please—add to the noise—and marvel at the Jeff talent not yet in Vaudeville.

Come early if you can, and if you can't come early, come anyhow.

If you can't come, you will be missed, and you will be sorry when you learn what you *have* missed.

Send in your name and the subscription at once and bring your friends.

STOP — LOOK — LISTEN

KNEIPE — Friday, February 23d

Enclosed find one dollar, my subscription for the Kneipe to be held February 23d, 1912, and.....dollars, for..... guests.

Name

Address

Dr. Ezell Delivers Annual Alpha Omega Alpha Lecture

DR. STILES D. EZELL, Class of 1932, and Secretary of the New York State Board of Medical Examiners, delivered the Annual Alpha Omega Alpha lecture during the "Dean's Hour" on Wednesday, April 20, 1960, in the Amphitheatre.

Mr. Marvin E. Jaffe, President of the fraternity, introduced Dr. Ezell, pointing out that in Dr. Ezell's position with the Board of Examiners he is interested in bringing about a unity of examination procedures in licensure, as well as a close integration with changes in Medical education. He expressed the pleasure of his fellow fraternity members in having Dr. Ezell as a guest speaker and their gratitude to Dr. Sode-man for arranging to have him address the students at the "Dean's Hour."

"Unusual Challenges"

"When Dean Sodeman's invitation came to speak to you at this special time, I was delighted for several reasons. In attempting to find a suitable title for the paper, several things came to mind at once. As you may well imagine, for one who has been away from the college now for more than a quarter of a century, a sentimental urge came to say something about the college as it was about the time of your infancy. For most of these twenty-five years I have been trying to find enough suitable biographical material to write a worthy paper on Dr. Thomas McCrae. This is the twenty-fifth anniversary of his death, and I was one of the last three residents on his service. One other idea intrigued me. Just one hundred years ago Dr. Oliver Wendell Holmes listed the existing weapons of life for his day—'Opium, a few specifics which our doctor's art did not discover, wine (which is a food) and the vapors which produce the miracle

of anaesthesia.' Speaking before the Massachusetts Medical Society he went on to say—I firmly believe that if the whole materia medica, as now used, could be sunk to the bottom of the sea, it would be all the better for mankind, and all the worse for the fishes.' It would, of course, take more than an hour to follow up this idea comparatively. I hope their reference will stimulate some of you to write down some of your own impressions of the present era.

"It is from another area of comparative points of view that I decided would perhaps be of more interest to you. There are many reasons today why the total education of the physician is so widely discussed, and there are four special factors which I should like to offer as propositions with which you will have to deal in the future. In the position I have occupied for the past eight years, it has been most interesting to get educational, cultural, and professional points of view from grad-

uates in medicine all along the scale from Oxford and Cambridge to Malta, Iceland, Quito and Suva in the Fijis. The four topics I shall refer to briefly do, I think, concern you personally.

On Remaining Educated

"If you will agree with my assumption that you will be reasonably well educated when you receive your degree, I will propose that the matter of remaining educated is something which will impose greater problems than becoming educated. It has been said that one can become uneducated in five years, and, from the practical point of your present involvement with highly specialized study, you are already in jeopardy in respect to your general education. How complex is this problem? Does one want to be more of a scientist than a humanitarian? Are you now the victim of a jet powered thrust toward science? There are some alarming answers here. Ashley Montagu, the noted social biologist, says that the

(above) DR. STILES D. EZELL Addresses the "Dean's Hour"

(above) MR. JAFFE, President of Alpha Omega Alpha Introduces DR. EZELL.

more mechanized we become, the more stupid we are apt to become; the more clever one becomes, the less intelligent one is apt to become. In a different way Montagu said that some of the concepts a man has about his education actually threaten him with extinction. The atomic physicist sees this in a different light, but his fear is one of physical annihilation such as might happen with the hydrogen bomb.

This challenge does force us to re-define what we mean by remaining educated, at least every five years. The action one takes as a result determines the meaning of the word education. The struggle for intelligence is something which must go on. The danger is that we may not recognize that our present level of knowledge is only sufficient to give us a basis for misrepresenting ourselves. The scholar is said to be humble enough to get out of his own way—intellectually. The nature of this challenge is one which involves the massive total complex of

society against the natural tendency for inertia in the individual.

“What will we need to know in the next twenty years? It must be enough to maintain our directions and traits for self-improvement. This is, basically, a personal challenge. Remaining educated means one will have to restudy what he ought to do as the times change; what he ought to re-read as the times change; and for the physician, this may mean a restudy of how he is to redistribute his time in an era when fragmentation of knowledge and practice seems to be increasing. Certainly, one should strive not to allow the original incentives and motivations for medicine to die. Rather, one ought to expect them to become more clearly defined and usable. Perhaps, the greatest danger is that pointed out by M. E. Prior (J.A.M.A., Vol. 170, No. 3)—‘the excessive development of any single facet can have a deforming effect on the person (as a whole).’

Interpretation of Behavioral Patterns

“The second great challenge is that of interpreting for yourself and for your patients the significance of the multiple forces in human behavior now striving for recognition. I suggest to you that as yet there are no true social sciences. There are numerous groups in the so-called ancillary field who have both an active and an aggressive interest in health matters, and many of them have progressed to active stages of participation in practice under circumstances where direct supervision is increasingly absent. Dr. William B. Bean of Iowa has written a brilliant essay on ‘The Natural History of Error’ in the February 1960 Archives of Internal Medicine in which he identifies the patterns followed by many of these groups as well as those we all are subject to.

“The thing one has to remember is that the average human being is apt to be biased against the intelligent arts, that he is apt to use the post hoc approach in thinking and drawing conclusions, and that he has a natural inclination for curiosity about certain intellectual phenomena. The present activities over hypnosis illustrate this most vividly. If one attempts to determine how dangerous or how beneficial hypnosis is, most of the answers will be quite unscientific. Strangely, science and technology have influenced much of our thinking, and everywhere we meet those who, without much scientific education, have a catastrophic feeling about scientific and technological progress. It is interesting, from a comparative point of view, to talk with people whose backgrounds are more deeply involved with the classics and languages than most of ours at the present time to find that there is more stability and hope for a better life than there is fear and dread about it. The grave danger is that we shall discount too greatly the belief of some that more

than knowledge and psychology are involved in the development and maintenance of moral courage. Equally as grave is the danger that we may create artificial barriers to excellence by attempting to evaluate some elements of excellence such as motivation and potential. The problem which remains is that of evaluating our interpretations, and managing levels of talent.

"The challenge here is that of keeping within the profession the problems and confidences which have a relation to personal and emotional health, and at the same time that of promoting the development and advancement of procedures which will lead to the most effective use of talent resources.

The Identification of Talent

"We can trust the present accounts that medicine is no longer the sole attraction for the superior students. The historic assumption that the medical profession will continue to have enough students of the best type must now be supplemented with personal efforts on the part of every physician at his community level to arouse and preserve an

interest in the study of medicine. It suffices to say that other professions are doing this actively now. Despite active experimentation at present in the area of identification of motivation, and studies on the selection of students, there are no accurate ways to tell whether one's interest and desire are deep, average, or shallow. The best illustration of how deeply concerned the medical schools are over this problem is to recall that at their annual meeting here in Philadelphia two years ago, they had Dr. James B. Conant report on his survey of high schools, with the obvious interest in the quality of education, the early challenge needed for scientific study, and the grave concern which needs to be exercised over guidance.

"The challenge for the individual is to be on the lookout for good prospective students, to give time and advice to high school groups, and to work unceasingly for the closing of the wide gap between preprofessional and professional study. Since the professional groups in our present society make up the largest group of people who are well oriented to the habit of work, and

since this is such an essential part of respect for discipline, the physician can emphasize the need for this more strongly than anyone else concerned with present educational systems. In talking with hundreds of students who have gone abroad to study medicine since the war, I find the most constant reaction is that the student awoke too late to what is really required for professional study—generally this meant the decision to go into medicine was made in college and not in high school. Perhaps the greatest challenge here is to discover the earliest interest in medicine and work on it. Can we any longer use the old American philosophy of hoping that the best man wins?

The Foreign Trained Physician

"The last challenge I should like to mention is the role of the individual in meeting one of the professional problems of the explosive postwar period. The facts are simple. We have now over 8,000 foreign trained physicians from all parts of the world serving in hospitals throughout this nation who, with rather extreme variations in education and prior hospital training, are

(right) DR. ROBERT B. NYE, left, and DR. KENNETH E. FRY, right, Chat with DR. EZELL Before the Address.

expected to perform at fixed levels in a system of medical care which gives to the intern and resident definite responsibilities and which expects him to perform at the level at which he is admitted. In this setup there is often little regard for language ability, experience in history taking and physical diagnosis, and orientation to the American manner at the bedside. We almost have to have these people to meet our quotas for interns and residents. We often encourage them to stay on. We often do not accord them the fellowship of colleagues.

"It is inevitable that each of you will encounter foreign graduates in hospitals in the future. The challenge is as simple as the facts. You won't find much background material on this, and you may be led to believe, in the future, that the passing of an examination (E.C.F.M.G.) is reasonable assurance of certain educational experience. However, the problem of dealing with the individual is as elemental as the process of orienting a third-year student to clinical approach. Foreign physicians come here for two reasons, primarily—to improve themselves for a better po-

sition at home, or to seek a license to practice in the United States. In either case, the reputation of the profession is at stake. Theoretically, it would be best to have most of these people go through an evaluation by teachers such as yours, but this has now become an impossibility except for certain types of programs. Practically, the hospitals and the profession must now do for the foreign students what they automatically do for American graduates in the hospital programs. Thus, the challenge is that, in your own hospital, you look critically at the level of education and experience of the foreign graduate, and be prepared to cooperate in bringing his standard up to a satisfactory performance level before he is given much responsibility. There are great possibilities for this in the internships and residencies by the interns and residents themselves, and there are a few instances where this problem has been met very well. It may well be possible that even when we have twenty-five more medical schools and graduate ten thousand new Doctors each year, we shall still need foreign graduates. It is

certain our potential for providing opportunity will not be equaled in our time anywhere in the world.

"Finally, in closing, may I attempt to bring together these four challenges into one central idea of having you as individuals be perpetually concerned with the development of your own talents, those of your community, and those of your profession. In a very broad sense your job tomorrow will be a combination of healing and an attack on mediocrity. If it is true that 'a society only produces great men in fields in which it understands greatness,' the heritage of your profession is one which impels you to seek talent and pursue excellence."

The members of Alpha Omega Alpha entertained Dr. Ezell and Dr. Andrew J. Ramsay, Professor of Anatomy and Head of the Department, at a dinner at the John Bartram Hotel on the evening of April 20. Dr. Ezell was initiated as an Alumnus Member of the Fraternity and Dr. Ramsay was made an Honorary Member. Nine members of the Junior Class were also initiated into the Fraternity.

ALUMNI PLACEMENT BUREAU

Positions Available

Wanted: Medical Group located in Nassau County, L. I., New York, is in need of a Board certified or Board eligible Internist as a full-time associate, to be eligible for partnership in twelve to twenty-four months.

Wanted: Opening for two General Practitioners interested in rural practice. One interested in obstetrics would be particularly well fitted.

A small 18-bed hospital is available, well equipped and attended by competent surgeons from neighboring town.

Wanted: Philadelphia office of Veterans' Administration has an opening for a Medical Officer (Civil Service grade GS 12).

Duties entail evaluation of veterans' disabilities from injuries or disease and, with Legal and Occupational Rating Specialist, determining entitlement to compensation, pension or other benefits.

The position is sedentary in nature and provides advantages of Civil Service such as retirement, annual leave, sick leave, group life insurance, health insurance and a 40 hour work week.

EDWIN KING DALY

Jefferson Medical College and Hospital has suffered a great loss in the death, on March 28, 1960, of Edwin King Daly, who has been a loyal and active member of the Board of Trustees for fourteen years.

Mr. Daly held many significant positions of trust and honor in the business and banking world of Philadelphia, where he made his home for the greater part of his adult life. He was President of Horn & Hardart Baking Co. of Philadelphia and The Horn & Hardart Company of New York for almost a quarter century, a member of the Board of Directors of the Provident Tradesmens Bank and Trust Company, the Beneficial Mutual Savings Bank and the Philadelphia Electric Company.

While these positions are a measure of his acumen, his sound judgment, his reputation for integrity, sagacity, up-

rightness and perceptiveness, they reveal in part only the spiritual qualities of Edwin K. Daly, the man. It is the intensity and depth of his interest in education, charity and the betterment of man that display his character in its full brilliance.

Edwin K. Daly was a Trustee of St. Joseph's College, Drexel Institute of Technology, the Advisory Council of Chestnut Hill College, a Director Emeritus of the Children's Heart Hospital.

He was elected a Life Trustee of Jefferson Medical College and Hospital in 1946 and gave to our institution of his time without stint to the day of his death, serving as a member and Chairman of both our Hospital Committee and our Expansion and Development Committee. He also served from time to time on many of our ad hoc committees ap-

pointed in connection with important College matters. His was a most effective voice among the Trustees in shaping policy on all phases of College and Hospital problems, and his advice and counsel were constantly sought and freely given in all facets of the work of the Institution. During his Chairmanship, the Whitehaven Sanitarium for Tuberculosis was merged into Jefferson Medical College. The Barton Division for the treatment of tuberculosis and chest diseases was established. The Pavilion Addition to the Hospital and the nurses' residence were erected, making for an enlarged Jefferson and giving us the largest voluntary hospital in the Commonwealth with the greatest number of beds.

Edwin K. Daly was respected and admired by those who knew him even slightly. By those whose life he touched daily, the employees of the Horn & Hardart Companies of Philadelphia and New York, he was genuinely loved and each employee accounted him a friend and knew that his

door stood open for any reason when they chose to see him.

Obedient to the discipline of the Catholic Faith, the late Pope Pius XII, in recognition of his religiosity and piety, had conferred upon him the honor of the Knight of Malta and Knight Commander of the Equestrian Order of the Holy Sepulcher of Jerusalem. A patriot who offered his life to his country, serving with the 27th Division of New York in World War I, wounded and gassed severely in the battle of Le Cateau, he received a decoration of valor.

In 1955, he was the recipient of an honorary degree of LL.D. from Villanova University, of whose Executive Committee he was a member.

Edwin K. Daly fulfilled reverently by his way of life the duty of many toward God and his fellow man, doing justice, loving kindness, and walking humbly with his God.

He will be remembered in deep affection by all those who came within the circle of his friendship.

D. HAYS SOLIS-COHEN, ESQ.

Promotions, New Appointments, Resignations and Deaths

Promotions

ABRAHAM E. RAKOFF, M.D., from Clinical Professor to Professor of Obstetric and Gynecologic Endocrinology (with no seat on the Executive Faculty).

NATHAN STANLEY SCHLEZINGER, M.D., Sc.D.(Med.), from Clinical Professor of Neurology to Professor of Clinical Neurology.

HYMAN EDWARD YASKIN, M.D., from Associate Professor to Clinical Professor of Neurology.

LEON LOUIS BERNS, M.D., from Assistant Professor of Anatomy to Associate Professor of Clinical Anatomy.

WARREN R. LANG, M.D., from Assistant Professor to Associate Professor of Obstetrics and Gynecology.

THEODORE THEODOSIOS TSALTAS, M.D., from Assistant Professor to Associate Professor of Pathology.

WALTER F. BALLINGER, II, M.D., from Instructor to Associate in Surgery.

GEORGE R. FISHER, M.D., from Instructor to Associate in Clinical Medicine.

SOLOMON KEESAL, M.D., from Assistant in Urology to Associate in Clinical Urology.

ROBERT E. COLCHER, M.D., from Assistant to Instructor in Surgery.

WILLIAM E. KELLY, M.D., from Assistant to Instructor in Clinical Neurology.

HERBERT LIPSHUTZ, M.D., from Assistant to Instructor in Surgery.

New Appointments

LEONARD S. ELLENBOGEN, M.D., as Associate in Radiology.

ROBERT JAMES DICKINSON, M.D., as Instructor in Psychiatry.

IOULIOS IOSSIFIDES, M.D., as Instructor in Pathology (effective 7/1/60).

EMANUEL MICHAEL RENZI, M.D., as Instructor in Radiology.

BARRY JAY SCHWARTZ, M.D., as Instructor in Psychiatry.

STEWART EDWIN FIRST, M.D., as Assistant in Obstetrics and Gynecology (Philadelphia General Hospital).

SIGMUND ROBERT GREENBERG, M.D., as Assistant in Medicine (Philadelphia General Hospital, effective 9/1/60).

CLAUDE R. BROSSAU, M.D., as Research Fellow in Medicine (Hematology).

SHIGERU TSUKAGOSHI, Ph.D., as Research Fellow in Radiology.

EDWARD JACKSON HUMPHREYS, M.D., as Visiting Lecturer in Psychiatry.

Resignations

PATRICIA BORNES, M.D., Assistant Professor of Clinical Radiology (effective 2/1/60).

ROBERT A. GREGG, M.D., Instructor in Medicine (effective 1/26/60).

CLAIBORNE T. SMITH, JR., Instructor in Psychiatry (effective 2/1/60).

LAURENCE J. ADAMS, M.D., Assistant in Neurosurgery (Department of Surgery) (effective 2/1/60).

Deaths

JACOB M. CAHAN, M.D., Instructor in Medicine (January 28, 1960).

Jefferson's Fund Not Among Leaders, According to AAC Survey

CARROLL R. MULLEN, M.D., Chairman

The American Alumni Council has just published the results of its survey of the Annual Giving Funds of 986 Universities and Colleges, and it is disappointing to report that Jefferson did not rank at the top among Medical Schools.

Although Harvard Medical School's fund is not as old as ours, and although it was patterned after ours, their record in the past year, in all of the categories, far surpasses ours.

Harvard's total was \$171,525.00—ours was \$112,782.00. Harvard's percentage of participation was 67.2%—ours was 48.8%. Harvard's average gift was \$44.47—ours was \$35.08.

Among the most improved Funds was that of Loyola University (Illinois) Medical School which went from \$12,000.00 in 1958-1959 to a present total of \$120,000.00.

At the College of Medical Evangelists the 25-year Class, at home-coming in February, presented \$14,315.00 to their Annual Giving Fund.

The average gift to Hahnemann Medical College's Fund during the past year was \$67.87.

With examples such as these cited above before us, we must ask ourselves if our progress in Annual Giving is satisfactory. It would seem to me that the answer is "No," and perhaps we should make a most serious effort to determine why it is not.

Part of the answer certainly lies in the number of Alumni who do not give. Year after year the burden is carried by the faithful contributors, while a large group do not respond to our appeals. To date, of our 6,534 Alumni with known addresses, only 2,646 have sent contributions. This is a participation total of only 40%. Is there some reason why we can't equal or surpass Harvard's percentage of 67.2%? We think not.

If you can afford only a small contribution and have felt that the amount was too insignificant to send, remember that a gift is a token of friendship and friendship is *never* measured by the size of the gift. We cannot believe that our Alumni are less prosperous and successful than those of other Medical Schools. On the other hand, neither can we believe that our Alumni are less generous, yet we are faced with the fact that the average gift to Jefferson was only \$35.08, while other average gifts ranged from \$44.47 to \$130.49.

We believe that none of you can doubt the worthiness of the cause. Good teaching is the first obligation of a Medical College and the quality and character of the faculty determine the status and progress of the School. It is to this end your contributions go and you yourself benefit by the reflection of your Alma Mater's renown.

We do not feel that our goal of \$150,000.00 is unrealistic. We do believe that funds are badly needed and we also believe that our loyal Alumni will recognize this need and respond in kind to the very limit of their financial ability.

When the next AAC survey is published next year and circulated among all the Colleges of the Nation, we hope that Jefferson will again rank among the leaders—in total amount, percentage of participation and average gift. With your help we can do it.

The total of the Fund stands at \$101,849.00 as of April 15, 1960, which is 68% of our goal. With only two months remaining in the Drive, it is apparent that there will have to be much hard work and concentrated effort on the part of our loyal Class Agents and Committee members, coupled with a generous response from you, if we are to attain our goal.

Leading Classes at this date are:

Amount—Class of 1935	\$4,295.00
Number of Givers—Non-Graduate	126
Percentage of Participation—Class of 1956....	57.7%

Florida Chapter Holds Dinner Meeting in Jacksonville

Three well-known Jefferson figures graced the "head-table" at the annual dinner of the Florida Jefferson Alumni, in the Banquet Hall of the George Washington Hotel, Jacksonville, Florida, April 8, 1960. These were William A. Sodeman, M.D., Dean; Martin J. Sokoloff, M.D., Clinical Professor of Medicine, and Louis H. Clerf, M.D., Professor of Laryngology and Broncho-Esophagology, Emeritus.

Thirty-seven other Jeff men, their wives and family members attended the dinner meeting which was preceded by a social hour. The meeting was presided over by Leo M. Wachtel, M.D., Jacksonville, President of the group.

Dr. Sodeman spoke informatively regarding the many changes that have recently taken place in the curriculum, staff, and buildings of the school, as well as the further improvements that are contemplated. The other members of the faculty spoke briefly.

Elected new officers of this state alumni organization were John Cheleden, M.D., '32, Daytona Beach, Florida, President; and Wilton R. Kane, M.D., '56, of Jacksonville, Florida, Secretary-Treasurer. The next meeting will be held in Miami Beach, at the Americana Hotel, May, 1961.

Those in attendance were: Dr. and Mrs. E. J. Clark, Dr. and Mrs. Louis Costanza, Dr. and Mrs. Harry Collins, Dr. and Mrs. Leonard Grunthal, Dr. and Mrs. Sydney Halpern, Dr. and Mrs. Wilton Kane, Dr. and Mrs. Robert McIver, Dr. and Mrs. Richard T. Shaar, Dr. and Mrs. W. McL. Shaw, Dr. and Mrs. John W. Shaw, Dr. and Mrs. L. M. Wachtel, Dr. and Mrs. Albert Wilkinson, Sr., Dr. and Mrs. Albert Wilkinson, Jr., and Dr. and Mrs. R. A. Worsham all of Jacksonville, Dr. John Cheleden, Daytona Beach; Dr. Joseph Lomax, Coral Gables; Dr. and Mrs. James R Reuling, Windermere, and Dr. and Mrs. Henry L. Smith, Tallahassee.

EDMUND L. HOUSEL, M.D., Past Chairman, Committee on Graduate Assembly.

JOHN Y. TEMPLETON, III, M.D., New Chairman, Committee on Graduate Assembly.

GRADUATE ASSEMBLY—PAST AND FUTURE

At a recent meeting of the Executive Committee of the Alumni Association, a motion was adopted commending Dr. Edmund L. Housel, past Chairman of the Committee on Graduate Assembly, and his fellow Committee workers, for the excellent program which they arranged for the meetings which were held in February of 1960.

That those who attended also appreciated the efforts of the Committee was evidenced by the comments on the questionnaires which were circulated at the meetings. Some of the Alumni took time to write Dr. Housel congratulatory letters, excerpts from which follow:

"Please accept my congratulations on the very successful meeting and your excellent chairmanship of the Graduate Assembly Committee."

"The program of lectures and seminars was perfectly arranged and well-executed. Innovations of breakfast and luncheon conferences were exceedingly well received. Above all the quality of food and service lived up to the superior reputation of the Warwick."

"I have been impressed by the favorable comments which have come in from all directions regarding the recent Graduate Assembly. The scientific assembly appeared to satisfy the physicians and the various ancillary social events seemed to be a happy solution of the entertainment of the wives as well as of the doctors."

"If the future meetings are on that level, I am certain that the Graduate Assembly will attract a great deal of attention and become more and more popular."

After two years of service as Chairman of the Graduate Assembly Committee, Dr. Housel has relinquished the task to Dr. John Y. Templeton, III, who held the first meeting of the new Committee on April 28, 1960. At this meeting, initial plans for the next Assembly Program, which will again be held in February, were discussed, but it was also decided that at a later date the entire Alumni body would be polled to determine their wishes as to the time of year during which they would prefer the Assembly to be held. It has long been the feeling of each Graduate Assembly Committee that from an Alumni body as large as ours, the attendance at these sessions has not been adequate, and it has been suggested that perhaps inclement weather, winter vacations and conflicting meetings during the month of February may be responsible for the relatively small number of our Alumni who return to Philadelphia for this scientific program.

The new Chairman and Committee members stated that every effort would be made to maintain the very high quality of the papers, panels and seminars which were features of last year's program, and they further decided that the general format of the 1960 sessions would be adhered to in the coming year.

Any suggestions from Alumni as to specific topics or special features which they would like to see introduced in next year's program will be welcomed by the Graduate Assembly Committee.

DR. BERNARD J. ALPERS, Professor of Neurology and Head of the Department, was given a testimonial dinner February 23, 1960, at the Bellevue-Stratford Hotel, Philadelphia, by the American Jewish Physicians Committee of Hebrew University, in recognition of his work in the neurological field.

DR. J. LAWRENCE ANGEL, Associate Professor of Anatomy and Physical Anthropology, acting in his role as Vice-President of the American Association of Physical Anthropologists, read the citation honoring Dr. William W. Greulich, 1960 Viking Fund Medalist, at the Wenner-Gren Foundation Awards dinner March 4 in New York.

DR. JOHN B. ATKINSON, Associate in Clinical Medicine, has resigned his post as Director of the Department of Internal Medicine at Sacred Heart Hospital in Norristown, Pennsylvania.

On March 10, 1960, DR. PAUL O. BLAKE, Assistant in Surgery, spoke on cancer and showed a film at the meeting of the Delaware County (Pennsylvania) Society of Medical Assistants in Delaware County Memorial Hospital.

DR. C. BRINLEY BLAND, Associate in Clinical Obstetrics and Gynecology, attended the American College of Obstetrics and Gynecology Meeting in Cincinnati, Ohio, early in April.

DR. MARIO A. CASTALLO, Clinical Professor of Obstetrics and Gynecology, and DR. AMOS S. WAINER, Assistant Professor of Obstetrics and Gynecology, have been appointed Consulting Obstetricians and Gynecologists to the Walston Army Hospital at Fort Dix, New Jersey.

Dr. Castallo and Dr. Wainer serve in the same capacity at the Valley Forge Army Hospital.

They will supervise a Residency Training Program which is to be instituted at both Institutions on a reciprocity basis.

DR. SAMUEL S. CONLY, JR., Assistant to the Dean, and DR. GEORGE J. HAUPT, Associate in Surgery, represented Jefferson at the symposium of Medical Education for National Defense (MEND) in San Diego, California, March 16-19, and San Antonio, Texas, March 20-23.

On April 8, 1960, DR. JOHN E. DAVIS, JR., Assistant Professor of Clinical Psychiatry, and Commissioner of Mental Health, Commonwealth of Pennsylvania, participated in

a panel discussion on "The Problems of the Sexual Criminal" which was co-sponsored by the Philadelphia Psychiatric Society, Philadelphia County Medical Society and College of Physicians of Philadelphia.

DR. JOHN H. GIBBON, JR., Samuel D. Gross Professor of Surgery and Head of the Department, addressed the joint meeting of the Philadelphia Academy of Surgery and the New York Academy of Medicine on the subject "Instrumental Perforation of the Esophagus."

On March 17, he acted as Chairman of the Session on Lung Cancer at the Philadelphia meeting of the American College of Chest Physicians and Laennec Society, and on March 18, during the same meeting, he led a Luncheon Round Table Discussion: "Science Writers Interview the Experts."

From March 21 to 24 he served as Visiting Professor, Fifth (Harvard) Surgical Service, Boston City Hospital, and on March 23 he addressed the House Officers Association, Boston City Hospital, on "Cardiorespiratory Functions During Operations Under General Anesthesia."

DR. FRED HARBERT, Professor of Oto-Rhino-Laryngology and Broncho-Esophagology and Head of the Departments, addressed the Ohio Ear, Nose and Throat Society March 15 in Toledo.

DR. J. RUDOLPH JAEGER, Professor of Neurosurgery, was guest speaker at a meeting of the Dauphin County Medical Society, held in the Academy of Medicine Building, Harrisburg, Pennsylvania, February 2, 1960.

DR. ROBERT G. JOHNSON, Associate in Surgery, was guest speaker at a recent meeting of the Lackawanna County (Pennsylvania) Medical Society held in Scranton.

On March 15, 1960, DR. WARREN R. LANG, Associate Professor of Obstetrics and Gynecology, spoke at Hahnemann Medical College Gynecological Society on "Cervical Evaluation and Benign Atypism."

DR. HOWARD C. LEOPOLD, Associate in Medicine and Chief of the Allergy Clinic, presented the subject "Diagnosis of Bronchial Asthma" on a TV program at the meeting of The American Academy of Pediatrics in Atlantic City on April 22, 1960.

Notes

DR. JOHN N. LINDQUIST, Assistant Professor of Clinical Medicine, has been appointed consultant in internal medicine at the Magee Memorial Hospital, Philadelphia.

DR. CARROLL R. MULLEN, Professor of Ophthalmology and Head of the Department, has recently been elected Chairman of the Section of Ophthalmology of the College of Physicians of Philadelphia.

On March 14, 1960, DR. PAUL J. POINSARD, Clinical Professor of Psychiatry, addressed the medical staff of the Delaware County (Pennsylvania) Memorial Hospital. His subject was: "The Current Status of the Tranquilizing Drugs."

DR. F. JOHNSON PUTNEY, Clinical Professor of Laryngology and Broncho-Esophagology, was elected President at the American Broncho-Esophagological Society at its meeting March 14-15. He is also Treasurer of the American Society of Head and Neck Surgery and was the 1959-60 Vice-President of the American Otolological, Rhinological and Laryngological Society. He addressed the American College of Surgeons meeting in Boston in February.

DR. ABRAHAM E. RAKOFF, Clinical Professor of Obstetric and Gynecologic Endocrinology, addressed the 35th Ross Conference on Infertility at Ohio State University on January 28-29, 1960, on "Ovarian Disfunctions."

On February 15 he addressed the Boston Obstetrical Society at the Harvard Club on "Hormonal Cytology."

DR. DANIEL S. ROWE, Instructor in Pediatrics, has received notification that he has passed his examination for the American Board of Pediatrics. He has also been appointed to the staff of Lankenau Hospital, Philadelphia.

DR. HERMAN L. RUDOLPH, Assistant Professor of Physical Medicine and Rehabilitation, was registered in the post-graduate course on below-knee prostheses at the Prosthetics Division of the School of Engineering, New York University, March 16 to 18.

DR. MARTIN J. SOKOLOFF, Clinical Professor of Medicine and Director of Barton Memorial, has been appointed to the Committee of Government Relationships of the Philadelphia Tuberculosis and Health Association.

He also spoke at a meeting of the Alabama Chapter of the American College of Chest Physicians on April 20, 1960

in Mobile, Alabama. His subject was: "Mechanism and Management of Cough."

DR. CHARLES G. STEINMETZ, III, Assistant Professor of Ophthalmology, was guest speaker at the Ophthalmic Pathology Club Meeting held at the Armed Forces Institute on April 4-5 in Washington, D.C. He presented a case of "Persistent Primary Vitreosis," and also attended a meeting on "Recent Advancement in Ophthalmic Pathology" held at the Armed Forces Institute of Pathology on April 6.

At the Annual Meeting of the Missouri Chapter of the American College of Chest Physicians, held in the Hotel Statler, St. Louis, on Sunday, March 13, 1960, DR. PETER A. THEODOS, Assistant Professor of Clinical Medicine, presented a paper entitled: "Lung Biopsy in the Diagnosis of Diffuse Infiltrative Pulmonary Disease."

DR. LEANDRO M. TOCANTINS, The Thomas Drake Martinez Cardeza Professor of Clinical Medicine and Hematology in the Department of Medicine, aided the campaign to have Dr. Carlos Finlay, Class of 1855, placed in the New York University Hall of Fame by appearing on Charles Shaw's program, January 26, 1960, over WCAU-TV.

DR. NICHOLAS R. VARANO, Assistant Professor of Urology, addressed the Luzerne County Medical Society on March 16, 1960, in Wilkes-Barre, Pennsylvania. His subject was: "Present Day Management of Urinary Tract Infection."

DR. C. WILMER WIRTS, JR., Associate Professor of Medicine, presided as Chairman at the Officers' Conference Committee Meeting in Harrisburg, Pennsylvania, on March 3 and 4. The theme that highlighted this meeting during this election year was "The Importance of Public Relations for the Physician."

Dr. Wirts presided as President at the Annual Meeting of the American Gastroscopic Society in New Orleans, Louisiana, March 30, 1960.

Together with DOCTORS FRANZ GOLDSTEIN, Instructor in Medicine, and SIMON KRAMER, Clinical Professor of Radiology, Dr. Wirts presented a paper "The Relationship of Afferent Limb Stasis and Bacterial Flora to the Production of Postgastrectomy Steatorrhea" at the Annual Meeting of the American Gastroenterological Association in New Orleans, April 2, 1960.

Faculty Members on Program of American College of Obstetricians and Gynecologists Meeting

Members of The Jefferson Medical College faculty participated in the program of the Eighth Annual Clinical Meeting of the American College of Obstetricians and Gynecologists from April 3 through April 6 at the Netherland Hilton Hotel in Cincinnati, Ohio.

Dr. Thaddeus L. Montgomery, Professor of Obstetrics and Gynecology and Chairman of the Department, Dr. Paul A. Bowers, Assistant Professor of Obstetrics and Gynecology, and Dr. W. Clark Kittelberger, Instructor in Obstetrics and Gynecology, presented "Diagnosis and Management of Breast Disease." Dr. Montgomery also Moderated a Breakfast Conference on "Perinatal Mortality" with Dr. Leon N. Prince, Assistant Professor of Clinical Obstetrics and Gynecology.

Dr. Alvin F. Goldfarb, Associate in Obstetrics and Gynecology, had an Exhibit on "Pathogenesis and Therapy of Premenstrual Tension."

Dr. George A. Hahn, Associate Professor of Obstetrics and Gynecology, led a Breakfast Conference on "Endometrial Carcinoma" and, with Dr. Edward L. McConnell, Jr., Instructor in Obstetrics and Gynecology, presented "Radiation Hazards in Obstetrics and Gynecology."

Dr. Warren R. Lang, Associate Professor of Obstetrics and Gynecology, headed a Breakfast Conference on "Vulvovaginitis;" with Dr. John B. Montgomery, Professor of Obstetrics and Gynecology and Co-Chairman of the Department, conducted a Clinical Conference on "Office Gynecology" and, with Dr. Elsie R. Carrington, a Clinical Conference on "Hospital Staphylococcus Problems." He also participated with Dr. Joseph P. Long, Assistant Professor of Obstetrics and Gynecology, in a Clinical Conference on "Vulvovaginitis."

Dr. Hammell P. Shipps, Assistant Clinical Professor of Obstetrics and Gynecology, moderated a Breakfast Conference on "Choice of Hysterectomy."

Dr. Amos S. Wainer, Assistant Professor of Obstetrics and Gynecology, led a Breakfast discussion on "Frigidity and the Physiology of the Female Sexual Orgasm."

In addition to the faculty members who were on the program of the Meeting, the following Jefferson doctors attended the Conference—Dr. Gabriel Tatarian, Assistant in Obstetrics and Gynecology; Dr. B. Frank Lovett, Instructor in Obstetrics and Gynecology; Residents, Dr. Jack Fink, Dr. Leon Peris and Dr. Burton Benowitz and Dr. Duong Gong-sakdi, who is an Endocrine Fellow.

Jefferson is Host to Reading Eye, Ear, Nose and Throat Society

A meeting of the Reading Eye, Ear, Nose and Throat Society was held at The Jefferson Medical College on April 20, 1960. Dr. Carroll R. Mullen, Professor of Ophthalmology and Head of the Department, and Dr. Fred Harbert, Professor of Oto-Rhino-Laryngology and Broncho-Esophagology and Head of the Department, were Chairman and Co-Chairman respectively.

Members of the Department of Ophthalmology who participated were: Doctors Charles G. Steinmetz, III, Assistant Professor of Ophthalmology, Gerard M. Shannon, Instructor in Ophthalmology, Turgut N. Hamdi, Instructor in Ophthalmology, Sidney G. Radbill, Assistant Professor of Clinical Ophthalmology.

Dr. Harbert spoke on "Newer Hearing Tests," and Dr. John Reddy, Instructor in Oto-Laryngology, and other members of the Department of Oto-Laryngology held "Open House" and displayed an exhibit.

Research Project Reported at Meeting of Federation of American Societies for Experimental Biology

Dr. Abraham Cantarow, Professor of Biochemistry and Head of the Department, and Dr. Karl E. Paschkis, Clinical Professor of Medicine, attended a meeting in Chicago of the Federation of American Societies for Experimental Biology.

Dr. Cantarow and Dr. Paschkis with Mr. Stanley Hoffman, who was a Research Technician here, did extensive research on the deterrent effect of muscle fatigue on the growth of animal cancer. Mr. Hoffman had prepared the technical report on the research but since he was unable to attend the meeting his co-authors, Dr. Paschkis and Dr. Cantarow, decided it would not be fitting to read the paper in his absence. However, an abstract summarizing the research has been published in the official proceedings of the Federation's 44th Annual Meeting.

This research project has attracted widespread interest since it has been demonstrated that rats allowed to exercise freely proved more resistant to the growth of transplanted cancer than rats kept inactive in small individual cages. Further, the cancer growth was markedly inhibited in animals injected with a by-product of muscle fatigue. This by-product was prepared by suspending strips of rat muscle in a salt water bath, exercising it to the point of fatigue by electric shock, and then isolating the fatigue products from the bath solution.

The specific nature of the active ingredient produced in rat muscle fatigue is still unknown.

Class Notes

1887

(above) HAYWARD G. THOMAS, M.D.

HAYWARD G. THOMAS, M.D., 594 Blair Avenue, Piedmont 11, California, has written to the Alumni Office that he is much better at present after having been feeling the ill effects of bronchial pneumonia for the past year or so.

In his letter enclosing his Annual Giving Fund contribution Dr. Thomas explained in part his very warm feeling for Jefferson. He writes:

"I first studied medicine in Cooper Medical College in San Francisco. This was an independent college started by a famous surgeon, Dr. Lane, whose uncle was a doctor named Cooper. It was a most excellent little college and I enjoyed my short stay there very much. This was the last year of antiseptics.

"A couple of our students had left the year or two before and entered Jefferson and I got the fever. I changed at once and came to Philadelphia and joined Jefferson.

"The first thing I learned at Jefferson was that they had changed to an additional year's program. How well I remember the first story told by the surgeon—I think his name was Morton, but I am not sure. He told us with great satisfaction of a change from antiseptics to asepsis. We had good surgeons in San Francisco, but asepsis was unknown, and how well I remember a certain surgeon having a big case on hands, and his hospital gown was a new Prince Albert suit. What a difference!

"I was born in New Brunswick, Canada, and my father's business was in a sawmill town where the people were mostly lumbermen or sawmill men, and most of them were tobacco chewers. We moved to Boston when I was ten and a half years old. I graduated from the famous old Boston Latin School, and in 1882 we moved to California.

"At Jefferson I arrived just a little late for the opening session and was seated in the high place in the amphitheatre and there I saw tobacco chewing in its heyday. The students came from everywhere in the coun-

try, and the pools of tobacco juice where certain students sat were immense. I never saw so much of it in my life.

"I graduated in 1887 and came to a country place in California and entered General Practice. A little later I moved to Oakland and joined a clinic. Some ladies' society started a free clinic for the poor and I entered at once. I took the eye, ear, nose and throat department, and was soon taken into the office of the best specialist in town. I found that I was far short of being a good specialist, and some medical friends who had been to Vienna urged me to go there for further study. After a year there and, by the way, finishing my eye work at Moorefield's Eye Hospital in London, I came home fully prepared to carry on the specialty, and I made a success of it.

"All this is why I have been friendly to The Jefferson Medical College because it changed my whole life as regards medical treatment and practice, also the reason I have been happy to subscribe to keep Jefferson an independent medical college."

(below) Picture Taken in Old Amphitheatre of the Hospital in 1893 Showing DR. E. E. MONTGOMERY, Professor of Diseases of Women, Operating—left to right DR. JOHN A. MURRAY, DR. MARKS, DR. BLOOMER, DR. MONTGOMERY, DR. BOLD, DR. JOHN M. FISHER, DR. KRUSEN, and DR. JAMES MORGAN. (Photograph Given to DR. THADDEUS L. MONTGOMERY by Daughter of DR. JOHN A. MURRAY.)

1899

HERBERT N. RAFFERTY, M.D., 104 N. Lakeview Drive, Sebring, Florida, writes that he is now an honorary member of the Highlands County Medical Society and the Florida Medical Association.

1907

NATHAN BLUMBERG, M.D., York House, York Road and Somerville Avenue, Philadelphia, Pennsylvania, has been appointed a member of the Governor's White House Conference Committee on Aging.

1909

DR. AND MRS. CLARENCE R. FARMER, 573 W. Lemon Street, Lancaster, Pennsylvania, are on a Mediterranean Cruise at the present time, and are apparently having a delightful trip.

1910

FRANKLIN E. SASS, M.D., 403 Main Street, Boswell, Pennsylvania, writes:

"I hope to see you, if able, on June 15th. I have a young friend and neighbor graduating on June 17.

"I expect to visit Don (Dr. Donald K. Sass, Class of 1950). He's practicing Ob-Gyn. in Salem, New Jersey. Both sons are Diplomates of their respective specialty. Bob (Dr. Robert K. Sass, Class of 1946) is in surgery and has just been made Chief of Thoracic Surgery at the Sharon General Hospital. He has four kids and is very happy with his busy life. It is possible that Don will be in Philadelphia when we have our blow. It is his 10th Anniversary and he is only 32."

1914

KARL B. PACE, M.D., Greenville, North Carolina, represented The Jefferson Medical College at the inauguration of Dr. Leo Warren Jenkins as Sixth President of East Carolina College in Greenville, North Carolina, on May 13, 1960.

1916

LEE W. HUGHES, M.D., 521 Centre Street, South Orange, New Jersey, represented The Jefferson Medical College at the inauguration of Monsignor John J. Dougherty as President of Seton Hall University on April 4, 1960.

1923

HARVEY S. BAUMAN, M.D., Champa, M.P., India, is Medical Superintendent and Business Manager of Christian Hospital in Champa.

Dr. Bauman's wife, daughter, Elizabeth Ruth Shelly, and three sons-in-law are all physicians. One son-in-law, Dr. Stanley S.

Stauffer, Emmaus, Pennsylvania, graduated from Jefferson in 1953. His second son, Albert, heads the Pharmacy Department in Vellore Medical College, S. India, and is Chief Pharmacist in the Hospital there, and his oldest son, Kenneth, is a Professor in Union Biblical Seminary, Yeotmal, India, the largest seminary in India.

Dr. and Mrs. Bauman visited New Delhi in December and saw the reception for President Eisenhower and Amrika Mela (International Agricultural Fair).

The Baumans, who expect to retire from India in June, have 14 grandchildren and expect the number to reach 16 in the very near future.

RALPH F. HIMES, SR., M.D., 340 Central Trust Building, Altoona, Pennsylvania, is practicing E.N.T. in Altoona. His son, Dr. Ralph F. Himes, Jr., '54, is associated with him in Ophthalmology.

ARTHUR H. PERKINS, M.D., 334 Pine Street, S. Weymouth 90, Massachusetts, is Director of South Shore Hospital, South Weymouth.

Dr. and Mrs. Perkins have two daughters and two grandchildren.

HENRY POHL, M.D., 232 Market Street, Johnstown, Pennsylvania, is practicing Medicine and Surgery in Johnstown and is connected with Mercy and Memorial Hospitals.

His son, Dr. Donald R. Pohl, Class of 1955, is practicing Pediatrics in Johnstown.

HILTON S. READ, M.D., F.A.C.P., 5407 Atlantic Avenue, Atlantic City, New Jersey, Director of the Ventnor Foundation since 1951, which has brought 463 carefully selected recent graduates of medicine from Western Germany, Austria and Switzerland medical universities to the United States for one year internship, was recently awarded an honorary degree of Doctor of Medicine

(above) HILTON S. READ, M.D.

by the University of Cologne, with the following citation:

"The Medical Faculty of the University of Cologne during its meeting on February 17, 1960, decided unanimously to confer upon you the honorary degree of Doctor of Medicine.

"This is a high honor very rarely bestowed on anyone by the universities of our country. In making this presentation we express our gratitude to you for your efforts in establishing contacts in the field of medicine and also human bonds between your country and Germany. Your endeavors will never be forgotten. During the period of greatest material and cultural need in Germany you have made it possible for many young doctors to get to know your great country and its excellent medical institutions and to have thorough contact with the progressive ideas of your countrymen. As the present Dean of the Medical Faculty I consider it a privilege to inform you of the honor bestowed on you.

Sincerely yours,

PROF. DR. C. KAUFMANN,
Dean"

On June 18, 1955, Marburg (Germany) University awarded Dr. Read the Phillips Medal and on May 17, 1956, he was the recipient of the Edgar J. III Award of the Academy of Medicine of New Jersey, as an "Educator in Democracy through Medicine."

On April 27, 1960, Dr. and Mrs. Read flew to Warsaw where they were the guests of the Polish Government and explored with the Minister of Health the possibilities of accepting Polish graduates in their program. From there they went to Moscow as "ordinary tourists."

1925

HERBERT T. KELLY, M.D., 1900 Spruce Street, Philadelphia, Pennsylvania.

On Monday, March 21, 1960, Dr. Kelly presented to the afternoon session of the Ottawa Dental Society, Ottawa, Ontario, Canada, the paper "Psychosomatic Aspects of Prosthodontics."

At the joint evening session of the Ottawa Medical and Dental Society he presented the paper "Medical Significance of Equilibration of the Masticating Mechanism," illustrated by lantern slides.

AHBROHM X. ROSSIEN, M.D., 7 Berkshire Court, Huntington Station, Long Island, New York, has been highly honored by having a library in the Jamaica (Long Island) Hospital dedicated to him. The library was established and will be main-

(above) AHBROHM X. ROSSIEN, M.D.

tained by the Rotary Club of Richmond Hill, and the dedication plaque reads as follows:

JAMAICA HOSPITAL
*This Library Is
 A Tribute To*
 AHBROHM X. ROSSIEN, M.D.
*Outstanding Physician
 Philanthropist
 and
 Citizen Extraordinaire*
Established & Maintained
By The
 Rotary Club
 of
 Richmond Hill

1926

PASCAL F. LUCCHESI, M.D., Medical Director of the Albert Einstein Medical Center, York and Tabor Roads, Philadelphia 41, Pennsylvania, was the keynote speaker, March 29, at the third biennial Hospital Institute for Volunteers at Lankenau Hospital. Principal sponsoring agency was the Council on Volunteers of the Philadelphia Health and Welfare Council. Theme of the meeting was "The Role of the Service Volunteer in the Hospital."

1928

JOSEPH M. DE LOS REYES, M.D., 2010 Wilshire Boulevard, Los Angeles 57, California, writes as follows:
 "As Vice-President of the Alumni Association in California, I come in contact with quite a few of the boys. We endeavor to have an annual meeting of our group. I got quite a thrill when, as President of the State Board of Medical Examiners, I signed

quite a few licenses of "Jeff" graduates to practice in California.

I also note that the William R. Lovelace Foundation is associated now with Jeff. Bill and I have been friends for many years and have worked together in the International College of Surgeons. He is an outstanding person and a real humanitarian. There seems to be some doubt, according to the last Bulletin, about Bob Haire's death. It is a fact.

How I would love to attend the June Alumni meeting. I am scheduled to speak in Rome and Bologne in May and I am not sure I can get all these things done. I noted some mention of our classmate, En Shui Tai. I expect to lead a group of surgeons to a Surgical Convention in Japan as guests of Dr. Nakayama, of the Chiba University, where I also expect to see Joe Ono. If time permits, I will see Tai in Hong Kong. My daughter, Kathleen, is the wife of an Ensign, stationed at Atsugi, Japan, U.S. Naval Air Station, which will make the trip doubly enjoyable.

I will speak in Winnipeg in September. I wonder if any of our gang could be in that area.

EN SHUI TAI, M.D., Box #5208, Kowloon, Hong Kong, China, writes that he was very ill in November but is feeling much better now.

The Tais now have four children in the States—Pauline, who works at the United Nations; Bonita, who is a second year student at the Moore Institute of Arts; George Marshall, who attends Haverford College, and Amy, who is at Albright College in Reading.

1929

JOSEPH J. REPA, M.D., Homer Folks Tuberculosis Hospital, Oneonta, New York, represented the College at the inauguration of Frederick Moore Binder as 5th President of Hartwick College, Oneonta, on May 9, 1960.

FRANCIS I. TAYLOR, M.D., 1213 - 13th Avenue, Altoona, Pennsylvania, has resigned as Chief of Staff at the Altoona Hospital to accept a position as full-time thoracic surgeon at Lawrence Flick Hospital, Cresson, Pennsylvania. He assumed his new post April 20, 1960.

On April 10 Dr. Taylor was guest speaker at Mercy Hospital, Pittsburgh, at which time his daughter, Margaret J., was capped. It is the same hospital at which another daughter, Elizabeth Ann, was capped last year.

Dr. Taylor and his family attended the

graduation ceremonies of the Park Aeronautical College of St. Louis University, St. Louis, Missouri, on April 11, at which time his son, David E., received the degree of Bachelor of Science in Aircraft Maintenance Engineering.

Dr. and Mrs. Taylor have nine children; the youngest, Stephen Andrew, is five.

1930

RUSSELL MILTON HARTMAN, M.D., has re-opened offices for the practice of medicine at 28 W. Main Street, Fleetwood, Pennsylvania. A native of the borough, he had been a practitioner for 22 years prior to three years of service with the United States Army Medical Corps during World War II. Dr. Hartman was recalled to active duty with the United States Army Medical Corps in November, 1955, and served 16 months in Korea with the 24th Infantry Division as Division Surgeon. He then served six months at Fort Lewis, Washington, where he was Division Surgeon for the 4th Infantry. From there he went to the Sierra Ordnance Depot in California where he was hospital commander of the United States Army Hospital at the depot and also Post Surgeon. He retired from active duty last September.

Dr. and Mrs. Hartman have four children: Mrs. Herbert Dutt, Fleetwood; Russell, Jr., East Orange, New Jersey, and twins, Jennifer and Jeffrey, both at home.

1934

JOSEPH W. COOCH, M.D., Lieutenant Colonel, United States Army, 1539 - 44th Street, N.W., Washington 7, D. C., visited several Near East countries during March to survey United States Army medical units in these areas and to determine what medical problems face these units.

As a communicable disease authority in the Army Surgeon General's office at Washington, Colonel Cooch surveyed many of the disease conditions present in these countries, observing their affects on native populations, in an effort to determine whether the Army can be of assistance in controlling these diseases.

Colonel Cooch's itinerary included Ethiopia, Saudi Arabia, Pakistan, Iran and Turkey.

As chief of the communicable disease branch in the preventive medicine division of the Army Surgeon General's office, Colonel Cooch is responsible for the planning and supervision of an effective disease control program for the Army.

During World War II, Colonel Cooch served in the European Theatre of Operations as surgeon with the 7th Quarter-

master Battalion, and during the Korean War went to Korea with the 382nd General Hospital, later serving in the Japan Logistical Command.

WILLIAM L. WESTCOTT, M.D., 60 E. Court Street, Doylestown, Pennsylvania, discussed "High Blood Pressure" on the weekly medical talk presented Sunday, February 7, over radio station WBCB, Levittown, Pennsylvania.

The "You and Your Health" program is sponsored by Blue Cross-Blue Shield of Greater Philadelphia and the Bucks County Medical Society, and is presented in the interest of community health and features talks on various health topics by leading Philadelphia and Bucks County physicians.

1939

JAMES J. COLL, M.D., 3102 E. 1st Street, Duluth, Minnesota, was recently named head of the Duluth Clinic.

Dr. Coll is a member of the American College of Internists. He served as Chief of Medicine at St. Mary's Hospital, Duluth, and is former head of the Minnesota Heart Association. Before joining the Duluth Clinic staff 13 years ago, he was affiliated with the Leahy Clinic in Massachusetts for two years. He also served as Associate Professor at Yale University for one year.

WILLIAM L. WHITE, M.D., 237 Morrison Drive, Pittsburgh, Pennsylvania, was guest speaker at a meeting of the Presbyterian Hospital Aid Society, held March 1, 1960, in the United Church of Aspinwall, Aspinwall, Pennsylvania. Dr. White's subject was: "What is Plastic Surgery?"

1941

CHARLES M. GRUBER, JR., M.D., P.O. Box #618, Indianapolis, Indiana, who joined Eli Lilly and Company as a physician in 1953, has been named a senior physician in the Lilly Laboratory for Clinical Research.

An authority in the clinical evaluation of drugs in the field of analgesics and hypnotics, Dr. Gruber was largely responsible for the clinical testing of a new analgesic introduced by Lilly in 1957. He has written or co-authored sixty-three scientific papers.

1943

LOUIS G. KAREHA, M.D., 319 N. Abington Road, Clarks Green, Pennsylvania, writes that he has an even deeper feeling for Jefferson now since he can appreciate how responsible it has been for his present position.

Dr. Kareha extends his regards to all of his classmates.

ROBERT J. SAUL, M.D., P.O. Box No. 476, Mountainair, New Mexico, writes:

"I am still a General Practitioner in a rural area, still single, and have no particular honors or laurels to claim. I am trying to be a good "country doctor" and yet am trying to be an up-to-date doctor. I am learning much every day, especially how much I don't know, which seems to increase constantly, but, in my case, must be remedied by reading.

"I am a member-at-large of my State Medical Society, and find it hard to get to any meetings.

"I usually go home at Christmas to visit my father in Richland, Pennsylvania, for the Holidays, usually arriving on Christmas Day in Philadelphia, and I always walk around Jefferson's locale for a few hours till my train leaves for Reading, but I never see anyone I know.

"Most of my patients are referred to the Lovelace Clinic and Bataan Hospital in Albuquerque, New Mexico, with which Jefferson is now affiliated, I am very pleased to learn."

1944-J

HUBERT K. TURLEY, M.D., 4207 Walnut Grove, Memphis, Tennessee, writes:

"We just had a nice visit with Ben and Jennifer Cole as they were returning from New Orleans. They look good, and we all tried to review some old times. They left here to visit Harry Cooper."

1945

LEONARD APT, M.D., 7934 Montgomery Avenue, Elkins Park 17, Pennsylvania, was recently appointed Section Editor (Pediatric Ophthalmology) of the Survey of Ophthalmology.

1947

ROBERT H. BAKER, M.D., of Greenville, Pennsylvania, has successfully fulfilled requirements of the American Board of Orthopedic Surgery.

He has practiced in Greenville since 1955, and is on the staff of Mercer County Crippled Children's Clinic.

WILLIAM P. COGHLAN, M.D., has opened an office at 819 Lincoln Place, Beaver Falls, Pennsylvania, for the practice of general and thoracic surgery.

A physician in the United States Navy during the Korean War, Dr. Coghlan served as an Instructor in Surgery at Jefferson. At the same time he served on the Staff of Jefferson and worked with Dr. John H. Gibbon, Jr., Samuel D. Gross Professor of Surgery and Head of the Department. He

was Assistant Chief of Surgery at Philadelphia General Hospital and Associate Surgeon at Eagleville Tuberculosis Sanitarium. He has also been engaged in research work in cancer of the breast.

Dr. Coghlan is married to the former Patricia A. Matthews of Philadelphia, and they have four children, Patricia Ann, William Patrick, Jr., Matthew and Kevin. He is making his home with his parents at 3500 Tuscarawas Road, Beaver, until his family joins him following the completion of school in June.

1948

ELLSWORTH R. BROWNELLER, M.D., Medical Director of Jefferson Hospital, has been appointed to the Board of Directors of the Children's Heart Hospital.

1949

GEORGE R. FARRELL, M.D., 1300 Grand Avenue No. B, San Diego 9, California, writes Dr. Gerald Marks, his Class Agent, as follows:

"The school and hospital certainly have had a considerable face lifting. The new hospital entrance and the nurses' residence are certainly beautiful. Fran and I enjoyed our visit to Philadelphia and the convention was also quite good. Our return trip to California was uneventful and I have resumed my practice."

SIMON MARKIND, M.D., 294 Magnolia Drive, Levittown, Pennsylvania—

Health problems of senior citizens was discussed Sunday, March 6, by Dr. Markind in a half-hour medical talk over radio station WBCB.

Dr. Markind is a Fellow of the American Geriatrics Society, and a staff member at Lower Bucks County Hospital.

CHARLES A. MILLER, JR., M.D., who maintains offices at 107 N. 8th Street, Allentown, Pennsylvania, was recently elected a diplomate of the American Board of Surgery. He is a member of the surgical staffs at Sacred Heart and Allentown Hospitals, and in December 1959 was appointed a deputy coroner for Lehigh County.

1951

DOUGLAS F. BRADY, M.D., 365 E. Curtin Street, Bellefonte, Pennsylvania, was recently appointed to the surgical staff of the Bellefonte Hospital. Dr. Brady established his office in Bellefonte after completing a two-year fellowship at the Robert Packer Hospital, Sayre, last year.

He served two years in the United States Air Force as a Flight Surgeon, including a

year in Korea, and was discharged with the rank of Captain.

In December, Dr. Brady passed Part I of the American Board of Surgery examinations. He expects to take Part II later this year, and is a candidate for membership in the American College of Surgery.

WILLIAM E. WALLACE, M.D., Bld. 816-A, Maxwell AFB, Montgomery, Alabama, writes:

"There has been a new addition to the clan, and Robert is now eight months old. Jeffrey is almost eight and well into school. I am leaving the service in the not too distant future and will probably open practice near the Miami, Florida area."

1953

JOHN H. HARRIS, JR., M.D., 1301A 2nd Street, Harrisburg, Pennsylvania—

Members of the Carlisle (Pennsylvania) Junior Chamber of Commerce honored Dr. Harris as the outstanding young man of the year in Carlisle at a dinner meeting of the Chamber of January 14. He was especially cited for his development of new techniques of x-raying the human chest.

Dr. Harris was elected to the Carlisle School Board last November, and is active in the Rotary Club. He is a member of the Board of Directors of the Pennsylvania Radiological Society and editor of the Society's bulletin.

JOHN CLINTON HERRMAN, M.D., has opened an office for the practice of general surgery in the Euclid Medical Arts Building, 21801 Lake Shore Boulevard, Euclid 23, Ohio.

1954

JEROME DERSH, M.D., 525 Amherst Road, South Hadley, Massachusetts, writes:

"I am entering the home stretch of my tour of active duty in the USAF and hope to start practicing Ophthalmology sometime after October, 1960, back in Reading, Pennsylvania."

STANLEY R. KERN, M.D., 2030A Mather Way, Elkins Park 17, Pennsylvania, has recently been appointed Instructor in Psychiatry at Seton Hall College of Medicine, Jersey City, New Jersey.

As of June 1, 1960, Dr. Kern's address will be 23 Brook Place, West Orange, New Jersey.

HARRIS LAVINE, M.D., 22 S. Eastfield Avenue, Trenton, New Jersey, writes that as of

July 1, 1960, his new hospital address will be Highland-Alameda County Hospital, Oakland, California.

Dr. Lavine sends his regards to all his classmates.

ALFRED G. SCOTTOLINI, M.D., Johnson, Vermont, writes:

"My wife and I have been blessed with two wonderful, healthy, children—a boy of 3½ years and a girl of 4 months. A third member of our family is Bruno, our frisky German shepherd, and as you can imagine, ours is an extremely lively household.

"I have been enjoying an extensive General Practice in rural Vermont. It has been hard work but always fascinating and often rewarding in terms of human gratitude and professional satisfaction. Oh, yes, there are the embittering moments, but they are soon forgotten, or, at least, tolerated."

Dr. Scottolini extends an invitation to his classmates to drop in on them when in the "north country."

1955

ROBERT D. EPPLEY, M.D., has been named director-psychiatrist of the Lorain County Guidance Center, Elyria, Ohio. He is currently a staff psychiatrist at the State Hospital in Harrisburg, Pennsylvania.

Dr. Eppley's experience includes a residency in psychiatry at the Boston Veterans' Administration Hospital. He was also a psychiatric consultant for the Massachusetts Department of Legal Medicine and has done work in child psychiatry at the Douglas Thom Clinic in Boston.

Dr. and Mrs. Eppley have two children, Mary Susan, 4, and Robert, 3. He will assume his duties as soon as his family is established in Elyria.

CHARLES F. SCHULTZE, M.D., 4045 N. Warner Road, Lafayette Hill, Pennsylvania, has been accepted by the Philadelphia General Hospital for a residency in Pediatrics, beginning July 1, 1960.

DR. ROBERT J. SENIOR, Lennox Bldg., Chapel Hill, N. C., addressed the North Carolina Laboratory Technicians' Association in April on "Fibrocystic Disease of the Pancreas."

1956

ALFRED D. CHRISTIE, M.D., has announced the opening of his office at 564 Grand Avenue, West Trenton, for the general practice of medicine. He is a staff member of Mercer Hospital.

Dr. Christie recently completed two years

as an Army medical officer at Fort Sam Houston, Texas.

The Christies have three children, Gretchen, A., Douglas and Brian.

RODNEY D. MOYER, M.D., has opened offices for the general practice of medicine at 1558 Daws Road, Center Square Green, Norristown, Pennsylvania.

Dr. Moyer served his internship at the United States Naval Hospital, St. Alban's, Long Island, New York.

He is married to the former Elisa Armao of Philadelphia, and they have two children, Lisa Joanne, aged three, and Rodney Donald, II, 21 months.

1957

CHARLES L. KNECHT, M.D., 136 W. Cliveden Street, Philadelphia 19, Pennsylvania, is presently serving a residency in Radiology at the Germantown Hospital under the direction of Dr. Barton R. Young.

JOHN T. MAGEE, M.D., Bryn Mawr Hospital, Bryn Mawr, Pennsylvania, who is presently acting chief resident at Bryn Mawr Hospital, has been awarded a fellowship for advanced study in renal and metabolic diseases at Georgetown University Hospital, Washington, D.C.

1958

JAY SHELDON COX, M.D., received his Flight Surgeon Wings at Pensacola, Florida, on December 17, 1959. He has received orders to Carrier Air Group 19 at the Naval Air Station at Moffett Field, California.

The 24-week course, which specializes in the medical aspects of Aviation Medicine, also includes familiarization flight training in single and multi-engined aircraft and helicopters.

JEROME L. SANDLER, M.D., is in his first year of a surgical residency at Jefferson Hospital.

1959

WILLIAM JEROME CARROLL, M.D., Orange Memorial Hospital, 1416 S. Kuhl Avenue, Orlando, Florida, writes:

"Orlando is a far distance from Jefferson, but not so far as to not enable its Alumni to have made their mark, i.e., Chief Resident in Obstetrics and Gynecology—Bill Cheslock, Class of 1954; last year's Chief Resident in Orthopedics—Otto Boysen, Class of 1943, plus two staff men in Orthopedics and one in Anesthesia. Dr. Albert Kirk, Class of 1935, runs the county health department.

BIRTHS

1956

DR. AND MRS. EUGENE BONACCI announce the birth of a son on November 16, 1959.

In July Dr. Bonacci will become Chief Surgical Resident at Kings County Hospital, 451 Clarkson Avenue, Brooklyn, New York, after which he will serve two years in the

United States Army as a surgeon.

A son was born to DR. AND MRS. IRWIN R. FISCH, 17155 Hesperian Boulevard, Apartment 44, San Lorenzo, California.

After finishing a tour of duty with the United States Navy, Dr. Fisch will resume Medical Residency at Jefferson Hospital this July.

1959

A daughter, Jan Carol, was born to DR. AND MRS. ALFRED C. SPEIRS on January 22, 1960.

Dr. Speirs is presently serving an internship at the Mary Hitchcock Memorial Hospital, Hanover, New Hampshire.

ENGAGEMENTS AND WEDDINGS

1949

DR. GEORGE B. ULMER, IV, was married to the former Miss Paula Shuan Hooker of Midland, Michigan, on December 29, 1959. Mrs. Ulmer is a graduate of Michigan State University and Johns Hopkins School of Nursing, Baltimore, Maryland. Dr. Ulmer, who was a Captain in the United States Air Force Medical Corps, is Associate Radiologist at Midland Hospital. Dr. and Mrs. Ulmer are making their home at 5714 Leeway, Midland.

1953

The engagement of DR. DEAN C. SHORE, Altamont Ct., Apartment #1, Morristown, New Jersey, to Miss Julianne Mary Maranville of Summit, New Jersey, was recently announced. Miss Maranville is a graduate of the Northampton School for Girls (Massachusetts) and the College of Our Lady of the Elms, Chicopee, Massachusetts. She is presently a teacher with the Florham Park School System. Dr. Shore holds the rank of Captain in the Medical Corps of the United States Air

Force Reserve. A late summer wedding is planned.

1954

DR. GLENN H. HOFFMAN, Maytown, Pennsylvania, was married on February 4, 1960; to the former Miss Faithe Verla Musser of Upland, California. Mrs. Hoffman is a graduate of Upland College and was employed by the Upland Elementary School District. Dr. and Mrs. Hoffman will live at 519 N. Railroad Street, Palmyra, Pennsylvania, where Dr. Hoffman will enter private medical practice. He was a resident physician at the Good Samaritan Hospital, Lebanon.

The engagement of DR. HARRIS LAVINE, 22 S. Eastfield Avenue, Trenton, New Jersey, to Miss Anne Friedman of New York City and Taunton Lake, Connecticut, was recently announced. The wedding is planned for June 4 in Temple Emanuel, New York City. Miss Friedman is a graduate of the University of Bridgeport in Connecticut. She is a candidate for the master's degree at the Bernard Baruch School, New York City.

1955

DR. MICHAEL J. McNALLY, Department of Neurology, Cleveland Clinic, Cleveland, Ohio, was recently married to the former Miss Mary Ellen Popoli of Dunmore, Pennsylvania. Mrs. McNally is an alumna of East Stroudsburg State Teachers College, and was a member of the faculty of South Scranton Junior High School. Dr. McNally is presently serving a Fellowship in general surgery at the Cleveland Clinic.

1957

The engagement of DR. GILBERT S. FARFEL, 1500 Bissonnet—3C, Houston, Texas, to Miss Ursula Beatrice Feer, daughter of Mr. and Mrs. Anton Feer of Zurich, Switzerland, was recently announced. Miss Feer graduated summa cum laude from Ohio University and was elected to Phi Beta Kappa. She received a teaching fellowship at the Rice Institute, Houston, and the following year at the University of North Carolina, where she is now working toward a Ph.D. degree. Dr. Farfel is presently completing a residency in Internal Medicine at Baylor University, Houston, Texas.
