## ALUMNI BULLETIN

Vol. 1

MAY, 1927

No. 8

Issued by the Executive Committee of the Alumni Association through the Committee on Publicity. Address all communications to the Editor, Dr. Edward Weiss, 1923 Spruce Street, Philadelphia.

### The John Chalmers DaCosta Memorial Alumni Fund

**D**URING the last several years the Alumni Association through subscriptions from its members has built up a fund now totaling with accrued interest about \$90,000. For some time the executive committee of the Alumni Association has been perplexed by the question, just what specific recommendation should be made for the use of this fund. Indeed, it has been felt that the impetus for a larger fund has been lacking in our inability to denote just what this purpose should be.

In the back of the minds of those responsible there has been the thought that with the expansion of the school some very worthy purpose for the fund would be found. It is with great pleasure, therefore, that we announce to the Alumni Association the very admirable plan just adopted by the executive committee, the further details of which will be worked out by a committee for that purpose.

The resolution as adopted reads:

**RESOLVED:** That the Alumni Association undertake to add to the \$90,000 already in the Alumni Fund, the additional sum of \$200,000. That it desires this fund to be known as the "John Chalmers DaCosta Memorial Alumni Fund." That it suggests that all sums so contributed should be used for the following purposes. That 50% be used for building construction cost of a department or floor in the proposed new building, the same to be suitably marked with a tablet setting forth the fact that the Alumni has contributed the cost of such floor or department as an evidence of the loyalty and pride and good will of the graduates for their Alma Mater. That 25% be set aside as a permanent separate endowment fund to be known as the Alumni Endowment Fund, the income from which shall be applied to the payment of salaries of full time laboratory teachers or research workers, preference being given to graduates of Jefferson. That the remaining 25% is to be used by the trustees at their discretion for either of the preceding purposes.

It is sincerely hoped that this plan will meet with the enthusiastic approval of the members of the Alumni Association and that they will give evidence of their loyalty to Jefferson by generous subscriptions to the fund. Already among the small circle of Alumni members aware of the Memorial fund and its purposes, substantial contributions have been made and there is no hesitancy in stating that the goal of \$200,000 will be oversubscribed.

Provisions for the great public drive are well under way, and an oversubscription by the members of the Alumni Association will prove a great stimulus to the Board of Trustees, all of whom are laboring mightily to make this campaign a tremendous success. A new and greater Jefferson is in the making—Let Every Alumnus Do His Part.

**FELLOW ALUMNI OF THE JEFFERSON MEDICAL COLLEGE:**

I am profoundly gratified to learn of the comprehensive plans of the Board of Trustees for the development of the school. These plans are carefully thought out, are of detailed character, and will inevitably be put into execution.

I believe in them thoroughly, and approve of them without qualification.

They will permit the expansion of the teaching resources of the *College itself*.

Such expansion is imperative, and includes an increase in lecture rooms, laboratories, apparatus, rooms for research, and the teaching staff.

The College is the mother of the institution. In it students learn anatomy, physiology, chemistry, pathology, bacteriology, hygiene, the principles, and all of the laboratory manipulations, of the art and science of medicine.

Nothing is so essential to our welfare as the success of this movement.

A great success will make confidence in our future as emphatic as pride in our past achievements, and satisfaction with our present status.

The success must be not only signal but mighty.

Let all of us claim to have a part in sustaining and advancing the dignity, influence and usefulness of this fine old independent medical school.

JOHN CHALMERS DaCOSTA.

## A Greater Jefferson

**F**OLLOWING shortly upon this bulletin, each Jefferson alumnus will receive a beautifully illustrated booklet setting forth the building program of a greater Jefferson. It includes a drawing of the new twelve story college building to be erected at Walnut and Clifton Streets on property recently acquired by the institution, immediately adjoining the present college building at 10th and Walnut Streets. In addition there will be mentioned a plan of remodeling the old college building for out-patient departments and class-rooms for the nurses training school.

A new college building and especially increased laboratory facilities, permitting increased opportunities for teaching and research, a new and larger out-patient department, and class rooms for the instruction of nurses, are crying needs, and this booklet, which will be used in the great public campaign shortly to be launched, is recommended to the earnest consideration of every alumnus in the hope that he may be able to use the information there contained in Jefferson's behalf.

## The Annual Alumni Dinner

**T**HE annual dinner of the Alumni Association will be held on Thursday evening, June 2nd, at the Penn Athletic Club. Preparation is being made for an unusual affair and a large attendance. Those members of the Alumni Association who attended last year's dinner will recall with pleasure how admirably suited to our needs was the ball-room of the Penn Athletic Club. The list of speakers for this year's dinner will have a particular appeal. Mr. Van Horn Ely, chairman of the college committee of the Board of Trustees, will respond for the board and no doubt will have consider-

able to say about Jefferson's new building program and the campaign for raising funds. Every loyal Jefferson Alumnus will be eager to hear the intimate details of Jefferson's most ambitious building program.

Other speakers so far announced are Dr. Edward A. Strecker, '11, Professor of Nervous and Mental diseases, who will respond for the Faculty; Dr. Thurman D. Kitchin, '08, Dean, Wake Forest College School of Medicine, North Carolina; Dr. Philip H. Moore, '02, Philadelphia; and Dr. Vaughn C. Garner, '20, New Britain, Conn.

## Tenth Reunion Class of 1917

**T**HE class of 1917 will have their 10th reunion on Thursday, June 2, 1927 and at the annual Alumni Dinner that evening. Members of the class will shortly receive a notice of the plans for that day, which at present are under consideration by the president, Dr. H. W. Jones and the Philadelphia members of the class. It is hoped to have several clinics and a luncheon, and a large attendance at the dinner in the evening.

## Portrait of Professor Hobart Amory Hare

PRESENTED TO JEFFERSON MEDICAL COLLEGE  
BY THE CLASS OF 1927

**O**N April 26, 1927, in the upper amphitheater of the College and in the presence of members of the Board of Trustees and the Faculty, the president of the senior class presented to the college a splendid portrait of Dr. H. A. Hare. It was accepted for the college by Mr. Alba Johnson, president of the Board of Trustees and to complete the ceremonies a stirring address was delivered by Dr. E. Quin Thornton. Dr. Hare responded with reminiscences of his early days at Jefferson.

### Resignation of Professor Solomon Solis-Cohen

**D**R. SOLOMON SOLIS-COHEN was born in Philadelphia, September 1, 1857, and received his early education in the public schools, being graduated with the degree A.B. from Central High School in 1872, and receiving the degree A.M. in 1877. He entered Jefferson Medical College in 1880 and was graduated in 1883. During his student years he "walked the hospitals" with his brother and preceptor, Prof. J. Solis-Cohen, who had the medical ward of the Jefferson and the German Hospitals.

In 1883 and 1884 he was Demonstrator in the Philadelphia Polyclinic. In 1887 he became Professor of Clinical Medicine and Therapeutics in that institution, continuing in this position until he resigned in 1902. He was successively Secretary, Vice-President and President of the Polyclinic Faculty and from 1895 to 1898 Editor of the publication known as the Philadelphia Polyclinic.

In 1884 Dr. Cohen became Chief Clinical Assistant in the Out-patient Medical Department of Jefferson Hospital under Prof. J. M. DaCosta and Prof. Roberts Bartholow and continued in this capacity for three years. From 1887 to 1890 he was Lecturer on Special Therapeutics in Jefferson Medical College, delivering the first systematic course of lectures on "Therapeutic Measures Other than Drugs" given in a medical college in the United States. In 1890 he was appointed Clinical Lecturer on Medicine, and took a prominent and active part in organizing ward-class instruction for students of Jefferson College in the Philadelphia Hospital. In 1902 he was elected Senior Assistant Professor of Clinical Medicine in Jefferson Medical College and Physician to Jefferson Hospital. In 1904 upon the reorganization of the Faculty he was made Professor of Clinical Medicine, a new chair being established of which Dr. Cohen became the first incumbent.

Dr. Cohen has been an attending and consulting physician to the Jewish Hospital since 1887 and attending physician to the Philadelphia Hospital since 1889.

Dr. Cohen has been a prolific writer and has contributed generously to general as well as to medical literature. He has published a number of essays and poems and has made translations from the Hebrew poets of Moorish Spain.

His political and economic papers of note deal with "Imperialism" and the "Single Tax." Numerous popular papers on hygienic subjects have been contributed by him to leading publications. His books, published clinical lectures, addresses to medical societies and contributions to medical journals have been numerous.

Medical problems in which he has been chiefly interested and to which he has made notable contributions have been "Vasomotor Ataxia" or as sometimes termed "Autonomic Imbalance" concerning which he published a preliminary paper in 1892 and numerous papers dealing with the main subject and related subjects since that time.

The problem of thyroid disease also attracted his early attention and in 1898 he published a paper dealing with the treatment of this condition with suprarenal extract.

The question of pneumonia and its treatment was intensively studied by him and a group of associates and "The Definite Treatment of Pneumonia" as opposed to the expectant methods so widely prevalent during the last quarter of a century and only a little less evident now,

has formed the subject of many vigorous addresses and publications.

His most ambitious work is "The System of Physiologic Therapeutics" in eleven volumes, of which he was editor, published from 1901 to 1905. The concluding volume contained an elaboration of Dr. Cohen's ideas on the principles of therapeutics. Perhaps his most valuable contribution to medical philosophy is an address delivered in 1896 before the Medical and Chirurgical Faculty of Maryland, entitled "Some Thoughts on Disease and Recovery in Their Relation to Therapeutics."

Dr. Cohen is an active member in many societies—medical, social, political, literary, educational. Among these may be mentioned the Association of American Physicians, College of Physicians of Philadelphia, the Franklin Institute, the Pegasus Club, the Contemporary Club, and the Franklin Inn Club.

He is a trustee of Gratz College of Philadelphia and a member of the Board of Education.

Dr. Cohen belongs to that school of great clinicians distinguished for deep learning, a rich culture and a remarkable breadth of interests. An eloquent speaker, a scholarly and graceful writer and a teacher of unusual ability, Jefferson students and alumni regret the resignation to which his years of faithful service to the institution entitle him. We express to Dr. Cohen our very sincere wishes for many years of health and activity in his practice and civic duties.

### Death of Emeritus Professor E. E. Montgomery

ON April 17, 1927, Dr. Edward Emmet Montgomery passed away at the home of his daughter, Mrs. Pascal Brooke Bland, 17 Saint Asaph Road, Bala, Pa.

Dr. Montgomery was born in Newark, Ohio, May 15, 1849, the son of Henry A. and Mary E. Lemert Montgomery. His family was of Scotch Irish descent on the paternal side and of French Scotch descent on the maternal.

His early life was spent on his father's farm in Ohio and in attending the district school. At sixteen he entered Denison University and was graduated in 1871. After leaving Denison he studied under Dr. J. J. Hamill at Newark for several months and in the following year entered Jefferson Medical College. On being graduated he served his internship in the Philadelphia General Hospital and also taught private classes in physiology and anatomy. In 1886 Dr. Montgomery became professor of gynecology at Medico Chi and resigned from that institution in 1892 to become professor of the same subject at Jefferson.

Dr. Montgomery served uninterruptedly at Jefferson for 25 years and resigned May 3, 1921. He was president of the staff at St. Joseph's Hospital from 1890 to 1923, when he retired from active practice.

He held the presidency of the Philadelphia Obstetrical Society, the Philadelphia Clinical Society, the American Association of Obstetricians, the Alumni Association of Jefferson Medical College, the Pennsylvania State Medical Association and the Philadelphia County Medical Society.

Following his retirement from active practice and his resignation from Jefferson, Dr. Montgomery made a trip around the world and published during the last two years illustrated accounts of his travels.

Dr. Montgomery's first wife was Miss Helen Buckley. They were married in 1876 and she died in 1913. After his retirement from the teaching staff of Jefferson he married Miss Alice Jayne, of Yonkers, N. Y., a physician's daughter.

He is survived by his wife, a daughter, the

wife of Dr. P. B. Bland, professor of obstetrics at Jefferson Medical College; two sisters, Mrs. Edward Johnson of Newark, Ohio, and Mrs. Alice Bradfield, Emporia, Kan., and two brothers, John Montgomery of Dexter Mo., and Thad L. Montgomery of Coshocton, Ohio.

During his years of activity in medical practice, Dr. Montgomery gained world renown as a surgeon and teacher of surgery.

It was not simply for his great ability in this respect however, that he was known and admired by the thousands of students whom he inspired. As expressed in a recent letter by one who loved him "All who came in touch with him must feel a sense of irreparable loss in his going. He stood out, a man of unquestioned integrity, stanch moral principle. He was hope-

ful, optimistic, independent and possessed a fine simplicity and serenity. I doubt if he ever quarreled with any one, no matter what the provocation, though he could make his disapproval felt. He was a highly religious man and would let nothing turn him from his conception of his duty to God and man. His attitude to his patient was that of an understanding sympathy, great consideration and self-sacrificing devotion to rich and poor alike.

He had rather an austere manner and once told me that with the greatest desire to be friendly it was difficult for him to come out of his shell among strangers. He made it one of the rules of his well-ordered life not to interfere in the affairs of others, but was ever ready to help those in trouble with his sympathetic, wise, impartial judgment."

## Death of Prominent Alumnus, Dr. Joseph Yates Porter

DR. JOSEPH Y. PORTER, SR., of Key West, Florida, a graduate of Jefferson 1870, died March 16, 1927.

Dr. Porter was prominently identified with relief measures against Yellow Fever. An editorial in the Public Ledger had the following to say: "The death of Dr. Joseph Yates Porter, retired officer of the United States Medical Corps, recalls the long fight of government agencies against the yellow fever plague. After graduating from Jefferson Medical College in 1870, Dr. Porter joined the Medical Corps and passed through yellow fever epidemics at Dry Tortugas and Key West and in cities along the Florida mainland. As a result of his study of the disease, he is said to have made the first demonstration in the United States of the mosquito law of yellow fever transmission. This he

did at Tampa in 1905 with a case of yellow fever imported from New Orleans.

Dr. Porter served for twenty-nine years as State Health Officer of Florida, part of the time in addition to his army duties. He retired from the Medical Corps in 1907, but was recalled to the service during the World War and later was connected with the Federal Health Service. He also had an important part in the development of Key West. But his greatest service was as director of government relief, which aided in making yellow fever, once a ravaging plague, now almost unknown."

Dr. Porter was formerly quarantine inspector of United States Public Health Service, for many years State Health Officer of Florida and past president of the Florida Medical Association.

## FACULTY APPOINTMENTS

### Consolidation of the Departments of Medicine and Clinical Medicine

**F**OLLOWING a meeting of the Board of Trustees on April 25, 1927, announcement was made of the consolidation of the departments of medicine and clinical medicine which it seemed would work to the advantage of the teaching, administration, and care of patients in the hospital.

Professor Thomas McCrae remains the head of the Department of Medicine.

Doctors Fred J. Kalteyer, '99, and Ross V. Patterson, '04, were appointed Professors of Medicine.

Dr. Patterson in addition to the didactic course will take over the clinical work formerly conducted by Dr. S. Solis-Cohen, including the ward service and dispensary.

Drs. E. J. G. Beardsley, '02, and Elmer H. Funk, '08, have been appointed Clinical Professors of Medicine.

**J. Earle Thomas, B.S., M.S., M.D.**

**D**R. J. EARLE THOMAS, recently associate professor of Physiology at St. Louis University, has been appointed professor of Physiology at Jefferson Medical College.

Dr. Thomas was born in 1891. He was educated at the University of Washington and St. Louis University.

He has been identified with the teaching of physiology since his graduation, beginning his

teaching career at St. Louis University, later transferring to the University of West Virginia and since 1922 again at St. Louis University.

Dr. Thomas has been active in research since 1916. The problems to which he has devoted himself have had to do with the pharmacology of certain drugs and the physiology of the gastrointestinal tract. We extend to Dr. Thomas our cordial greetings.

Dr. Charles E. G. Shannon  
'02, Appointed Professor of  
Ophthalmology

Dr. Ross V. Patterson  
Appointed Professor of Medicine

**Dr. E. J. G. Beardsley**

Appointed Clinical  
Professor of Medicine

**Dr. E. H. Funk**

Appointed Clinical  
Professor of Medicine

## Virgil Holland Moon, A.B., M.S., M.D.

**D**R. V. H. MOON, professor of Pathology at the University of Indiana School of Medicine, has been appointed professor of Pathology at Jefferson Medical College.

Dr. Moon was born in 1879 and is a graduate of Rush Medical College, 1913. He has devoted himself since his graduation to the teaching of Pathology. His researches have

been chiefly in the fields of Bacteriology and Immunology. He has been much interested in the heredity of neoplasms.

Dr. Moon comes recommended to the student body of Jefferson as a man of much personal charm and a forceful teacher. We extend to him our greetings and best wishes for success and happiness in his new home.

## The Mid-Winter Smoker

**T**HE annual Mid-Winter Smoker of the alumni association was held at the Penn Athletic Club on February 17, 1927. The entertainment committee under the chairmanship of Dr. W. H. Kinney provided an unusual program of high class entertainment. Over four hundred alumni members were present. The auditorium of the Penn Athletic Club served admirably for the purposes of the meeting.

At the business meeting which preceded the smoker a vote of thanks from the Association

was inscribed upon the minutes to Dr. E. J. Klopp, who has served as recording secretary for many years, to Dr. W. B. Davis, the treasurer of the organization, and to Dr. W. H. Kinney, chairman of the entertainment committee.

The resignation of these gentlemen was accepted, the association harkening to the plea that they had done their duty. After consideration, however, Dr. Kinney was prevailed upon to continue his position for the ensuing year.

## Professor Chevalier Jackson Receives Philadelphia Award

**D**R. CHEVALIER JACKSON, professor of bronchoscopy and esophagoscopy, Jefferson Medical College, received the 1926 Philadelphia Award at a formal presentation in the Academy of Music, February 9, 1927. The award comprises a check for \$10,000, a diploma and a medal; it was founded by Edward W. Bok in 1921, in recognition of the resident who, during

the preceding year, renders a service which advances the best and largest interest of Philadelphia. Addresses were made by Senator George Wharton Pepper and Vice-President Charles G. Dawes. Dr. Jackson presented the check to his wife, to whom he also gave much of the credit for his achievements.

Attend the A. M. A.  
Convention  
Then Come to  
Philadelphia  
for the Annual Alumni Dinner

Hear about

## Executive Committee and Officers

1927-1928

PRESIDENT—Dr. William J. Carrington, 905 Pacific Avenue, Atlantic City, N. J.

VICE-CHAIRMAN—Dr. Ross V. Patterson, Jefferson Medical College.

## VICE-PRESIDENTS—

Dr. E. J. J. Beardsley, 1919 Spruce St., Phila.

Dr. Elmer H. Funk, 1318 Spruce St., Phila.

Dr. Willard H. Kinney, 315 S. 17th St., Phila.

CORRESPONDING SECRETARY—James L. Richards, 1427 Spruce St., Phila.

RECORDING SECRETARY—Dr. Ralph M. Tyson, 1527 Pine St., Phila.

TREASURER—Dr. Harold W. Jones, 1426 Spruce St., Phila.

EDITOR OF THE ALUMNI BULLETIN—Dr. Edward Weiss, 1923 Spruce St., Phila.

## Executive Committee

Dr. Fielding O. Lewis, 250 South 17th St., Phila.

Dr. I. P. Strittmatter, 999 North 6th St., Phila.

Dr. J. Torrance Rugb, Medical Arts Bldg.

Dr. Henry B. Decker, 622 Cooper St., Camden, N. J.

Dr. Edward L. Bauer, 345 South 19th St., Phila.

Dr. Clifford B. Lull, 1731 Pine St., Phila.

Dr. Charles R. Heed, 1205 Spruce St., Phila.

Dr. Robert Regester, 255 South 16th St., Phila.

Dr. Lynn M. Rankin, 200 Long Lane, Upper Darby, Pa.

Dr. Louis H. Clerf, Jefferson Hospital, Phila.

Dr. John B. Flick, 1608 Spruce St., Phila.

Dr. Edward A. Strecker, 345 South 19th St., Phila.

Dr. H. K. Seelaus, 3015 North Broad St., Phila.

Dr. Clarence A. Patten, 2037 Delancey St., Phila.

Dr. Louis C. Scheffey, Lansdowne and Plumstead Ave. Lansdowne, Pa.

Dr. Bruce L. Fleming, N. E. Corner 20th and Chestnut Sts., Phila.

Dr. H. K. Mohler, Jefferson Hospital, Phila.

Dr. Roy Mohler, 1731 Pine St., Phila.

Dr. D. M. Sidlick, 927 Spruce St., Phila.

Dr. R. S. Griffith, 1310 Pine St., Phila.

Dr. Creighton H. Turner, 1731 Pine St., Phila.

Dr. Thomas B. Lee, 622 Cooper St., Camden, N. J.

Dr. Warren B. Davis, 135 South 18th St., Phila.

Dr. Edward J. Klopp, 1611 Spruce St., Phila.

Dr. Adolph Walking, 2808 Girard Ave., Phila.

Dr. Robert M. Lukens, 1923 Spruce St., Phila.

Dr. Randle C. Rosenberger, Jefferson Medical College
