THE CAREER SUPPORT NETWORK (CSN)

Historical Perspective: What led us to the CSN?

Work Support That Works When YOU Need It

NEIGHBORHOOD CENTERS:
The Beginning

- Anchors in their neighborhoods
- Long-term relationships with community members
- Provide wrap-around supportive services

Work Support That Works When YOU Need It

GREEN JOB READINESS PARTNERSHIP (GJRP)

2009:**Living Cities & Job Opportunity Investment Network (JOIN)**
2010: **Pathways Out of Poverty** through **Jobs For the Future** invested in a partnership to:

Develop and implement a model where community centers become points of engagement for marginalized workers to attach to employment and training.

GREEN JOB READINESS PARTNERSHIP
WHO WE ARE

A partnership managed by

The Federation of Neighborhood Centers

And including . . .

The Philadelphia Workforce Investment Board

Jobs for the Future

Job Opportunity Investment Network

Sustainable Business Network

Diversified Community Services & United Communities of SE Philadelphia

Work Support That Works When YOU Need It

GREEN JOB READINESS PARTNERSHIP:
Key Program Components (Phase I)

- Contextualized Literacy Training
- Work Readiness Soft Skills Training
- Individualized Case Management
- Physical Training

Work Support That Works When YOU Need It

WHAT IS THE GREEN JOB READINESS PROGRAM?
Phase I

9 weeks of training & preparation: Monday - Friday 9:00 to 4:30

- Classes in Green Literacy, Math, Workplace Readiness, Hands-on Tool Use
- Preparation for Hard Skills training & transition into the training
- Assistance in removing barriers to work
- Case Management and Career Coaching
- Certificates and Resumes

Work Support That Works When YOU Need It

GREEN JOB READINESS PARTNERSHIP:
Lessons Learned (Phase I)

- Physical and mental health problems – significant barriers to employment
- Getting a job a priority – not addressing health problems
- Average length of time to get jobs: 6 months

Work Support That Works When YOU Need It

HEALTH IMPACT ON WORK

- 50% of low-skilled adults with physical and/or behavioral health problems:
  - Do not keep their jobs within one year of being employed.
  - Most frequent reasons for losing their jobs are physical and behavioral health problems.

- According to the Partnership for Prevention,
  - Reducing just one health risk can increase productivity by 9% and reduce absenteeism by 2%.
  - Absence management leads to a healthier workforce and maximizes a company's productivity and profit.

DIABETES' IMPACT ON WORK

Diabetics - total loss in income due to health-related work impairment has been estimated to be an incremental $57.8 billion dollars/year

- Lost productive time at work
- Poor glucose control = increased absenteeism, decreased earnings, disability, decreased productivity

DIABETES' BURDEN:
Philadelphia Neighborhoods Served by GJRP

- 16.7% of AA and 9.7% Latinos report diabetes
- 69.4% AA and 60% Latinos overweight or obese therefore at greater risk for diabetes or complications from diabetes
- 30% have high blood pressure
- Over half smoke cigarettes
- Almost 30% have diagnosed clinical depression or mental health conditions
- 50% report high levels of stress

New Partner Joins GJRP: Thomas Jefferson University and Hospital

Job Opportunity Investment Network Education On Diabetes In Urban Populations
(*JOINED-UP)*

Funded by Mt. Sinai- Diabetes IMPACT Center

Work Support That Works When YOU Need It

JOINED-UP Goals

- Assess the feasibility of integrating a diabetes prevention and control program into a community-based workforce training program

- Increase healthy lifestyle behaviors related to preventing diabetes in overweight/obese individuals participating in the workforce training program

- Improve diabetes self-management among diabetics participating in the workforce training program

Work Support That Works When YOU Need It

JOINED-UP Training Program

- Introductory healthy lifestyle educational program (*Required*)
- Ascertain current knowledge, attitudes and health behaviors, particularly as they pertain to diabetes prevention
- Baseline assessment:
  - Height, weight, BMI, glucose, blood pressure, health history, TC, HDL, HgbA1c
- 6 Program Sessions:
  - Individualized counseling session (Personal action plan) - *Diabetics: AADE7 Impact curriculum: healthy eating, physical activity, monitoring, problem solving, reducing risks, health coping.*
  - Four interactive, skill-building group sessions
  - Reassessment of the baseline measures, surveys

Work Support That Works When YOU Need It

JOINED-UP
Profile of Participants

- 79%- male;   Average age - 32
- 70% - no health insurance;   45% - no PCP
- 56% were at risk of diabetes or already diagnosed – 44% had pre-diabetic readings (HbA1c 5.7-6.4) and 12.5% were known diabetics.
- 38% smoke
- 53% - obese, 18% - overweight
- 51% had pre-hypertensive blood pressure or high BP readings (30% hypertension)
- 15% had elevated cholesterol (>220)

Work Support That Works When YOU Need It

JOINED-UP
Results (N=41)

- **76% felt that their state of health improved "a lot"**
- **68% felt that their ability to control health improved "a lot"**
- **53% felt that their quality of life improved "a lot"**
  - 73% enrollees achieved at least one Personal Action Plan goal
  - 26% obtained a PCP
  - 61% increased physical activity
  - 76% increased fruits/vegetables in diet
  - 61% decreased salt; 63% reduced fat
  - 61% now read labels
  - 13% stopped smoking; 73% reduced smoking
  - 34% use stress management techniques more often
  - 24% lost weight
  - 34% decreased alcohol use

Work Support That Works When YOU Need It

JOINED-UP
Impact on Families

44% completing the post test reported having children living in their households.

As a result of taking part in this program:

- 72% reported their children are more physically active and eat more servings of fresh fruits/vegetables daily;
- 66% reduced salt in their family's diet and reduced consumptions of soda and other sugar beverages;
- 61% reduced dietary fat in their children's diet and reduced screen time to no more than 2 hours daily.

JOINED-UP
What Did We Learn?

Integrating a diabetes prevention and management program into a workforce development program is feasible and effective

Requiring health component as part of a workforce development program is key to recruiting participants, particularly men, into health promotion/disease management program

Directly linking the management of one's health to attaining and retaining a job, enhances the motivation of clients to better manage their chronic health conditions

Providing healthy lifestyle education in a trusted community center helps build trust between the health educators and other members of the healthcare team

Providing wrap-around centralized services (i.e. job training, transportation, child care, emergency assistance, housing assistance, etc.) in conjunction with providing disease self management helps keep the clients engaged

Work Support That Works When YOU Need It

Traditional Workforce Programming*

Job Retention Tracked at 1/3/6 month intervals by Case Manager

Job Readiness Training – group classes

Program Eligibility maintained via participation reporting in up to 4 separate systems by Case Manager

Program Participant

Job Development (cafeteria-style, 90% entry-level – client ratio as much as 250:1)

Individual Case Manager (client ratio as much as 120:1)

Limited transportation assistance – managed by Case Manager

*based on current Philadelphia TANF programming

Clinical Counselor (client ratio as much as 400:1)

Work Support That Works When YOU Need It

Background

- Work Development Programs help vulnerable, adults succeed in realizing long-term careers by helping them overcome barriers to employment.

- The current workforce system funds training and placement services to get individuals *into* jobs, but does not pay for the empowerment and counseling services to ensure newly-employed individuals *keep and advance* in their jobs.

CAREER SUPPORT NETWORK
Innovative Partnership Model

Work Support That Works When YOU Need It

RWJF Local Funding Partnerships

- Common Places. Common Causes. Uncommon Connections.
- Working together so better health can take root in our communities.
- Robert Wood Johnson Foundation Local Funding Partnerships (LFP) leverages the power of partnership to address community health needs through matching grants programs for innovative projects.

CAREER SUPPORT NETWORK
Goal

The project will increase the number of vulnerable adults who obtain and retain sustainable, competitive employment, with a ***focus on retaining jobs***, through strategically addressing systemic gaps in the workforce development system

Work Support That Works When YOU Need It

Career Support Network
Proposed Outcomes

Move vulnerable adults from short-term, dead-end jobs into long-term careers that pay family-sustaining wages

- Increase the number of vulnerable adults who will be employed in jobs with sustainable wages for a minimum of one year

- Increase the number of vulnerable adults with physical health conditions such as diabetes, hypertension, and obesity who demonstrate improved disease management and self-efficacy

- Increase the number of vulnerable adults with mental and behavioral health conditions such as depression, anxiety, and addiction who demonstrate improved coping skills and understanding of their conditions

- Reduce the recidivism rate

Work Support That Works When YOU Need It

Career Support Network
Key Questions

- **Does the inclusion of a CSN in a workforce development program improve participant health and employment success prior to and during employment?**
- What is the value of the CSN from the perspective of program participants, program staff, employers and training programs?
- What is the impact of the CSN on participants' physical and behavioral health?
- What is the value of the community center in facilitating health improvement/ maintenance among CSN program?
- How do we effectively integrate a behavioral /physical health component into a workforce development program (pre employment through employment)?

Work Support That Works When YOU Need It

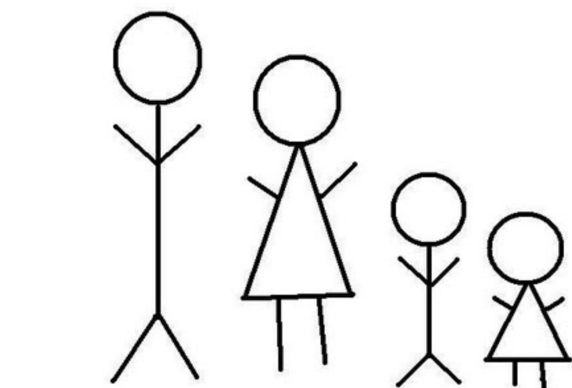
Interdisciplinary CSN Team

- Physician (1)
- PhD, Masters Public Health (1)
- Masters Public Health (1)
- DNP, RN, Certified Diabetes Educator (1)
- Masters prepared Health Educators (2)
- Occupational Therapists (2)
- Physical Therapist (1)
- Peer Counselor

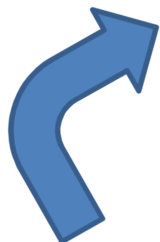
Getting Started

- Creating pre-post evaluation instruments
- Recruitment, hiring and training OT
- Completing/executing contracts with TJU and TJUH
- Completion of TJU IRB
- Integration of R2R (Roots to Re-entry)
- Recruitment and hiring of Research Assistant
- Integration into RISE activities (Mayor's Reentry Program for Ex-offenders)
- Completion of PDPH IRB

Career Support Network



PARTICIPANT & FAMILY



Peer Group & Individual Counseling

Family Health Counseling & Referrals

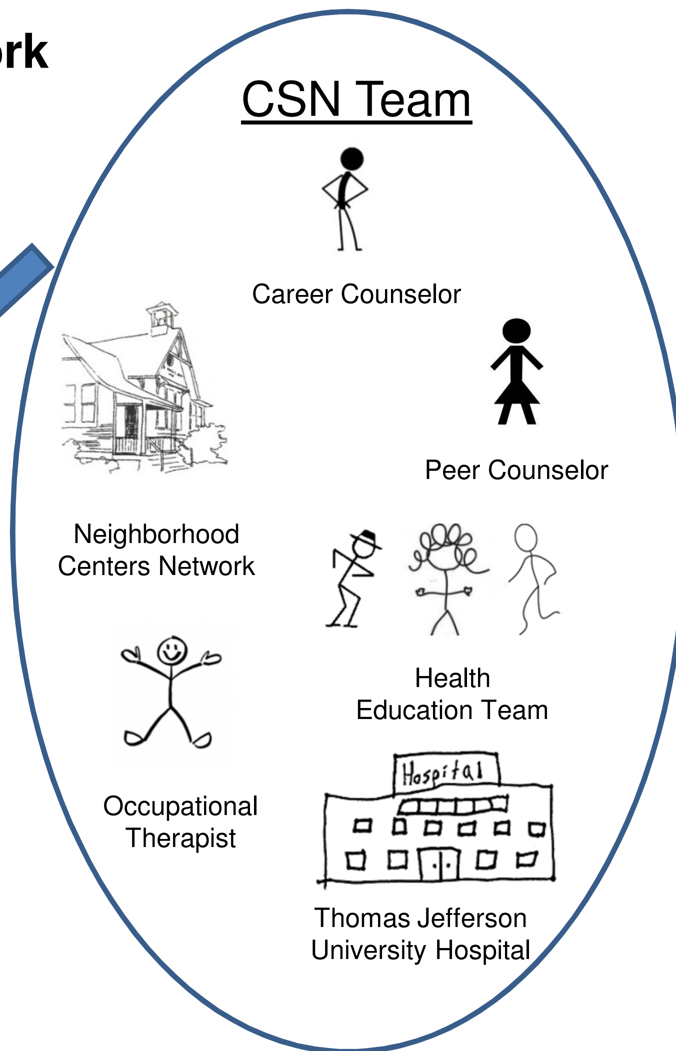
Neighborhood-based food, clothing, housing, utility, youth & children programming

Chronic Disease Testing, Education, Counseling & Referrals

Job Retention Supports for up to 2 years

Job Readiness – Group & Individual Support

Individual Career Counseling & Job Placement



Work Support That Works When YOU Need It

Career Support Network Flow Chart

- **Current components**
- **Expanded Component Based on Pilot Program**
- **New components**

Recruitment:
N=207 eligible
Green Jobs
EARN
Roots to Reentry

→ Informed Consent N=207 → CSN Non-participants = 37

↓ CSN Participants = 170

Career Sense

Dixon House/Houston Center – community center training sites

CSN Team meets weekly to discuss program issues

- Career Sense Training
- **Chronic Disease prevention and management focus** (diabetes, **hypertension, asthma, behavioral health) that includes assessment, 9 weeks of healthy lifestyle education and individual counseling/coaching by the Chronic Disease Management Health Educator and Healthy Lifestyle Educator**
- **Peer-Peer Support/ Coaching/ Mentoring**
- Referrals to Medical Director, primary care providers, **behavioral health as appropriate, community resources**

Hard Skills Training / Internship or Job Seeking

- Job readiness, job search and interview preparation
- **Peer Support/Coaching/Mentoring provided by Peer counselor**
- **CDSM support as needed**
- **Peer Counselor/OT on-going contact with participants; referrals to community resources, behavioral health resources and Medical Director as needed; completion of individually tailored plan of action**
- **OT and Peer Counselor lead monthly CDSM; Peer Counselor with support from OT leads bi-weekly support group sessions on work related self-management skills**
- **Follow-up Health Screening and Assessment**

Work Sense (Employment)

- **Work Sense Peer-Peer Support/Coaching/Mentoring**
- **CDSM support as needed**
- **OT weekly contact with participants for first 6 months of employment and as needed thereafter; on-going contact with workplace supervisors; referrals to community resources, behavioral health resources and Medical Director as needed**
- **OT and Peer Counselor lead monthly CDSM**
- **Peer Counselor with support from OT leads bi-weekly support group sessions on work related self-management skills**
- **Follow-up Health Screening and Assessment**

Outcomes

Improved physical and behavioral health
Reduced absenteeism
Reduced criminal recidivism
Improved job retention

Advisory Group formed consisting of job readiness staff and Jefferson staff:

- Review protocols
- Develop promotional materials (flyer)
- Review curriculum (Literacy Staff and CUH educators)

Promote to work readiness enrollees via flyer and Career Advisors promotion in work readiness classes

Cohort 1: Introduction of program:
- Informed Consent conducted by PI

Participants

Session 1: Baseline Screening and Pretest for research participants
BP, cholesterol, glucose, Hemoglobin A1c, height, weight, BMI provided for research participants only

***Session 2 – 5: Educational Sessions**
All research participants must participate

Session 6: Post Program Screening and Posttest Survey
research participants only

Non- Research Participants

Session 2 – 5: Educational Sessions
All enrollees must participate for GJRP

Celebration/ Graduation

CSN FLOW CHART

CSN Process Evaluation

Process Evaluation 1:

- Discussion Group with participants about program and satisfaction
- Key informant interviews with staff about process and satisfaction

Revise Program process based on findings and repeat program for new cohorts

Celebration/ Graduation

Enter Data into database and analysis

Dissemination of Results Reports to funder

Research Assistant enters data within 2 weeks of screening completion

PRE-HEALTH SCREENINGS/SURVEY

5 HEALTH SEMINAR & ACTION PLANS

HISTORY OF CHRONIC ILLNESS

- ABNORMAL screening
- NORMAL Screening

HEALTH COACH Counseling

- P.C.P.
  - INSURANCE → CONTINUE TO SEE
  - NO INSURANCE → REFER TO MA, FHC, HC, ST. ELIZABETH'S
- NO P.C.P.
  - INSURANCE → 1-800-JEFF-NOW or other Health system referrals
  - NO INSURANCE → REFER TO MA, FHC, HC, ST. ELIZABETH'S

NO HISTORY OF CHRONIC ILLNESS

- ABNORMAL Screening → HEALTH COACH Counseling
- NORMAL Screening

- P.C.P.
  - INSURANCE → CONTINUE TO SEE
  - NO INSURANCE → REFER TO MA, FHC, HC, ST. ELIZABETH'S
- NO P.C.P.
  - INSURANCE → 1-800-JEFF-NOW
  - NO INSURANCE → REFER TO MA, FHC, HC, ST. ELIZABETH'S

Health Coach notifies PCP or Dr. Plumb of abnormal results

Health concerns during Work Sense phase – OT referral to Health coach

Mental Health concerns

Post Screenings:

Survey and BP, Weight, total cholesterol, HDL, glucose at end of class. A1c 12 weeks after pre-screen.

Screening 2 occurs 6 months post class completion; Screening 4 occurs 12-13 months post class.

Preliminary Data through January 2012

Demographics		N=31	%

Self-Efficacy

Indicator		N=31	%
General Self Efficacy Measure Never = 1 Rarely = 2 Often = 3 Always - 4	Scores range from 10-40 Total Score = 959 Mean Score = 30.94 Median Score = 32 Individual Mean Score – 3.09 Median Score = 3.0	*NA*	*NA*

Health Attitudes

Indicator	N=31	%
Want to lose weight	13	**42**
Want to increase activity	22	**71**
Want to eat healthier	25	**80.6**
Importance of health status to work success **(Rate 1-5 with 1=not important to 5 – extremely important)** **Total Score = 122 (n=27)** **Mean = 4.5** **Median = 5**	***NA***	***NA***

Health Knowledge

Indicator		N=31	%
Health Knowledge	Total # questions=18 Pre Range= 9-17 correct Pre Group Mean score =79.2 Pre % scored below 80	16	51.6

Challenges

- Loss of EARN center as referral source
- Multiple IRB submissions
- Training/orientation at Philadelphia Prison System for working with pre-release prisoners
- Service team organization/scheduling
- Coordinating of cohorts at various stages of enrollment
