NUCLEAR SCIENCE DIVISION

The division has a special interest in Nuclear Science and in advanced energy systems such as nuclear, solar, wind, geothermal, and tidal. Its concern in these fields includes, but is not limited to, research, policy and analysis, development and production.

FROM THE CHAIR

CYNTHIA ORTIZ

CONFERENCE PLANS-1992

By the time you read this column, your Chair-Elect, Diane Mirvis, and I will be making our plans to attend the Winter SLA meeting in Clearwater,

Florida, from January 29-31, 1992. It is hard to believe that 1992 is just around the corner. Plans for our Nuclear Science Division activities are fairly well set already. I will let you know what our specific schedule of events will be in the next issue of Sci-Tech News. What I can tell you now is that together with the main theme, "Information Services: Gateway to Competitive Advantage," there will be a subtheme throughout the program of the Pacific Rim to capitalize on the fact that the June meeting is being held in a Pacific city, San Francisco. We trust that everyone who attends the conference will enjoy this Pacific orientation.

CONFERENCE PLANS-1993

In Clearwater, I will be firming up everything for 1992 in San Francisco while Diane will be beginning to gear up for the 94th Annual Conference, which will be held in June 1993 at Cincinnati, Ohio. If you have any topics that really interest you, I am sure that Diane would be happy to hear from you so that she can incorporate some of your ideas in her conference planning.

VOLUNTEERS

Please let me or any of the other officers know if you would be interested in serving as an officer or committee chair next year. For those of you already serving in such a position, I am sure that we would be glad to know also if you would be willing to continue in that position. Also I would encourage all of you to urge your colleagues to join the Nuclear Science Division when they join the Special Libraries Association if the subject area at all relates to the organization for which they work.
