Presents: **Grand Rounds**

“Surgeon-Influenced Variables in Rectal Cancer Surgery”

Given by

Steven D. Wexner, MD

Department Chair
Colorectal Surgery
Cleveland Clinic

At the conclusion of this presentation the participant should be able to:

1. Evaluate the influence of distal and circumferential margins on local recurrence rates.
2. Assess the role of total mesorectal excision in reducing local recurrence rates.
3. Describe the role of laparoscopy in rectal cancer surgery.
4. Analyze methods of reconstruction following total mesorectal excision.
