A Message From The President

The past twelve months have produced many changes in our Alumni Association, both physically and historically. As you read the Committee reports on the following pages you will see the landmark decisions which were made during the year, with the approval of those present at the annual Luncheon meeting in May. The foundation has been laid. It is up to all of you to help those of us who are still here to build and secure our Alumni Association as we know it today. My fondest wishes to all of you in the coming year.

NURSES' RELIEF FUND

The Nurses' Relief Fund is available to all Diploma and White Haven graduates. The purpose of the Relief Fund is to provide a sum of money annually toward hospital bills and/or bills incurred at home due to an extended illness and requiring the services of a physician. The fund is also available for use in cases of adversity.

Nursing Home cases will be given special consideration.

All things being equal, first consideration will be given to Life, Active and Associate members. However, all applications received will be reviewed and given consideration.

IF YOU KNOW OF ANY JEFFERSON OR WHITE HAVEN GRADUATE IN NEED OF ASSISTANCE, PLEASE LET US KNOW AS SOON AS POSSIBLE.

An application for Relief Fund benefits can be found in the back of this bulletin.

NURSES' SCHOLARSHIP FUND

The Clara Melville-Adele Lewis Scholarship Fund continues to provide four scholarships a year to Diploma and White Haven graduates. Two for the Fall semester and two for the Spring semester.

April 1, is the closing date for application for the fall semester, and September 1 for the spring semester.

Each application received will be reviewed by the Scholarship Committee; preference will be given to the applicant who has been a member, who is most active in the Alumni Association, and who has most nearly completed requirements for a degree.

A Scholarship application can be found in the back of this bulletin.

ARCHIVAL MATERIALS

Miss Sarah Zimmerman of Havertown, Pennsylvania (sister of Ada Zimmerman, class of 1913) recently presented to the library Archives the Jefferson Medical College diploma of her father, Pius Zimmerman, M.D., JMC 1883, his prescription booklet, and his senior thesis on scarlet fever. She also gave the textbooks used by Ada when she was a student at Jefferson Medical College Hospital School of Nursing. Submitted by Robert T. Lentz.

Baccalaureate Nursing at Jefferson

On June 5, 1974, forty students walked across the stage at the Academy of Music to receive their bachelor of science in nursing degree. These individuals were recognized at this ceremony as the first graduating class of the Department of Baccalaureate Nursing at Thomas Jefferson University. On June 8, 1984, approximately 185 students will achieve the distinction of being members of the eleventh class to graduate from this Department. All of the students who have passed through the Department's doors during this period have participated in a decade of planned change in nursing education.

The establishment of the Department of Baccalaureate Nursing at Thomas Jefferson University was approved by the Board of Trustees during their meeting on November 2, 1970. The decision to initiate an upper division collegiate nursing program was a direct result of the University's commitment to assume a leadership role in responding to changing patterns in higher education.

Charlotte E. Voss, R.N., Ed.D., the first chairman of the Department of Baccalaureate Nursing, received Pennsylvania State Board of Nurse Examiners' approval to begin the program in June, 1972. Dr. Voss and five faculty members opened the classroom and clinical doors to forty-six students in September, 1972. The program was accredited for the full eight-year term by the National League for Nursing in April, 1976.

In September, 1978, the first group of registered nurses from diploma or associate degree programs were admitted to the Department. Six of the first class of 11 students completed the requirements for the degree in June, 1979. During the 1982-83 academic year, a total of 39 registered nurses were enrolled in upper division nursing courses. Ten of these students were graduates of Jefferson's School of Nursing. An additional 50 registered nurse students are expected to begin nursing courses in the Fall, 1983.

All of the students admitted to the Department of Baccalaureate Nursing must have earned a total of 57 credits in lower division courses. These include course credits in English (6); Psychology (6); Sociology (3); General Biology (4); General Chemistry (8); Anatomy and Physiology (8); Microbiology (4); Statistics (3); Interpersonal Communications (3) and Electives (12). Registered nurse students may meet these requirements through transfer of previously earned credits, earning a passing score on the College-Level Examination Program (CLEP) or by achieving a grade of "C" or better in the course at an accredited college or university.

While in the program, students will earn 18 credits in upper division supporting courses: Biochemistry (3), Social Organizations (3) and upper division electives (12). Registered nurse students may transfer previously earned credits or challenge all of these courses through CLEP. In addition, these students may earn 20 of the 53 credits in nursing by

successfully passing the advanced placement examinations administered by the Department Baccalaureate Nursing. The vast majority of registered nurse students are successful in passing these examinations during their first try. Two opportunities are provided to pass the advanced placement tests.

The nursing courses for the registered nurse students are designed to capitalize on prior learning and to develop increased knowledge and skills in addressing a variety of patient care situations. Twenty-four of the 33 credits remaining after advanced placement are devoted to clinical nursing courses—Community Nursing, Family Nursing and a clinical nursing elective. Five of the remaining credits are devoted to expanding students' knowledge base in issues related to professional nursing and health care. Two credits are devoted to a study of nursing research; the student can select from a number of nursing electives to earn the remaining two credits.

Full-time students who are pursuing their first course of study in nursing complete our requirements in two academic years. Registered nurse students can complete the nursing major in one academic year of full-time study or two years of part-time study. In January, 1984, the Department will initiate an evening program for registered nurses. When this program is opened, the registered nurse will be able to choose from part-time day or evening options or select this full-time day program.

A tremendous effort has been made by the faculty to offer a professionally enriching and personally satisfying educational experience for registered nurses returning for their degree. Dolores Hilden, R.N., Ph.D., Registered Nurse Counselor, has developed a booklet which describes the course of study for registered nurses and addresses many of the questions commonly asked about the program.

The faculty have been assisted in their efforts to plan an

outstanding course of study for registered nurses by a number of individuals who formerly taught in Jefferson's School of Nursing: Betty Alexy, Joan Amick, Diane Dwinnells and Sharon Renshaw. The faculty have also received excellent suggestions related to the plan for registered nurses from current students and alumnae. The registered nurse course of study and the students in this plan have added considerable dimension and strength to our total program.

In addition to the current program options the Department is currently completing a feasibility study related to graduate education in nursing. Consistent with the plan for nursing education approved by the University Board of Trustees in October, 1980, the Department is very interested in initiating programs for individuals who wish to pursue graduate degrees in nursing in the near future.

The priorities for nursing education in the 1980's at Jefferson as stated in the Report of the Ad Hoc College of Allied Health Sciences Committee on Nursing Education, are as follows:

1. To assure the preparation of clinically knowledgeable and competent professional nurses.
2. To promote the integration of nursing education and nursing practice.

3. To foster collegial, collaborative interactions with medicine and other health professions.
4. To encourage innovation in nursing practice and education systems.
5. To expand and develop resources to support nursing education and service.

These priorities have defined the direction for the next decade. The faculty in the Department of Baccalaureate Nursing look forward to working with all interested in nursing education at Jefferson to meet these challenges.

FROM RN TO BSN

Fifteen years ago I thought I had it made. I was a graduate of a hospital school of nursing that was part of a large teaching medical center. The school had an excellent reputation; its graduates were said to be skilled, moral, and obedient. According to the admission bulletin, students would "become proficient in those skills necessary to care for the patient in a general hospital setting." What was promised was delivered, and I could take my rightful place in nursing.

No reality shock for me! I easily made the transition from student in pink to graduate in white. As a student I had had responsibilities on the units and I felt amazement at being paid for doing much the same work I had done before receiving my diploma!

After graduation, I practiced both as a civilian and a military nurse. I made four lateral moves, each time hoping to find a place where I felt satisfied with the care I was giving. But there were problems everywhere I went. I felt taken advantage of by the hospital system, and I felt I was cheating myself and my patients. There was rarely enough time for inservice programs, and a feeling of stagnation developed. My practice had become too ritualistic, with tasks being dictated by an inflexible system. I hated being "task-oriented," but I also disliked the looks I received from the oncoming shift staff when a task was not completed, even if the reason was valid.

After years of avoiding the truth, the solution became quite clear to me. I needed more formal education. I would pursue a BSN.

What was not clear, however, was how I would do this. Internal conflicts were the first I had to resolve. I recall conjuring up all the reasons why full-time study was impossible. I might have a stroke, my children would resent competing for my time, my savings might run dry, my car might fall apart. I finally decided that I really was afraid — afraid to give up some security and try a new role.

Recognizing, accepting, and dealing with these fears left me free to face the external conflicts. I am a divorced mother of two young children. Continuing to take one course at a time in night school made sense. To plunge into full time day school, resign my job, and seriously apply myself — that was risky. But that was what I decided to do. My decision prompted looks of disbelief from friends and words of caution from family. "How can you?" "That's crazy!" "How will you pay the bills?" Friends pointed out that having a BSN would not increase my salary nor change my hospital job description. "That's probably true," I said. But somehow I was confident that it would make a difference to nursing and to me.

I registered for full time study. I knew finances would be tight, but I applied for and received four scholarships over a three-year period. I was eligible for GI benefits for one year, and I received child support. My savings were there for unexpected expenses, and I continued to work at the hospital on call.

My first real step toward a BSN was taking and passing all six NLN Achievement Exams. I had been out of school for

12 years and facing two days of testing to validate lower division nursing knowledge was intimidating. Like many other nurses, I had not been associated with pediatrics, obstetrics, or psychiatry since my school days. I spent one weekend with a review text and did far better in the exams than I had anticipated.

I thought diploma nurses had an edge on associate degree nurses (based on state boards test results and hospital administration statements) until I went back to school. I was shocked to realize I was being given so little college credit for three years of diploma schooling, while AD nurses received so many! There seemed to be an endless number of prerequisites — courses I felt I had already had. At first, I felt some bitterness, as most diploma nurses do, toward the educators who set the requirements. It did not take long, however, to discover that they were right. The information was new to me and the instruction was on a higher level than my basic program had been.

After a year of such prerequisites as microbiology, chemistry, statistics, psychology, and sociology, I began upper division nursing courses. I had heard that the content of these courses repeated lower division nursing knowledge. I found the opposite to be true. The ideas and theories were brand new to me and initially I was lost in new terminology.

In time, I felt totally comfortable in the student role. The work was demanding and the midnight oil burned a few times, but I, like most other RN students, had no difficulty maintaining a high grade point average. We all brought different experiences to the classroom, and faculty members respected our uniqueness and showed a genuine concern for our futures.

Perhaps the most important discovery I made was that nursing can be anywhere. For me, the expansion of nursing beyond the hospital setting was exciting. Nursing, I found, can be more than a collection of technical skills. Nursing needs all types — researchers, administrators, educators, lawyers, primary care practitioners. It is a large, multi-talented profession. These were my thoughts as my degree was being conferred.

There are many nurses who also have known the thrill of obtaining a BSN. With them I feel a kinship. There must be many nurses who are contemplating taking the step, but who need encouragement. This I freely offer.

The People's Republic of China

In the spring of 1981, I was invited to participate in a trip to China with the People-to-People Mission. This organization was instituted by Eisenhower and the purpose was to exchange knowledge and ideas with countries which were developing or introducing new ways of doing things.

Our delegation met in New York to be briefed and to become acquainted. We would be together for three weeks. The group consisted of thirty-five nurses, one husband, and two sisters. All were from the East Coast with the exception of one from Ohio and one from Oregon. The areas of practice included education and service. The three types of educational programs were represented, and nursing administrators were from three to five hundred bed hospitals. Our mission was to study the health care delivery system and nursing education.

The flight was long; we had a two hour lay-over in San Francisco and flew over Japan on our way to Hong Kong. We left our hotel in New York at 8 AM and arrived in Kowloon at 8:15 PM.

At 6 AM the next morning we were introduced to a Chinese breakfast, and the Chinese version of an American breakfast. Then we left by train for mainland China. Our first stop was Guangzhou (Canton). There we went to a trade fair before a fairly early dinner at the airport. It was the worst meal we had in China. We boarded a plane and arrived in Beijing (Peking) at 10 PM after a very long and exhausting day.

Our first day in China was spent visiting the Great Wall and the Ming Tombs. Both were exciting and almost beyond belief. The Wall was photographed frequently, but the Ming Tombs were a new idea to me. To date, only one tomb has been excavated. The buildings on the grounds are filled with treasures taken from this tomb. Gold, jewels and jade are in abundance. The crowns are jewel encrusted filigreed gold. The light was not adequate for pictures, and the hordes of people would have made it impossible to get a picture.

Our guides told us that it is only recently that people have been able to visit these treasures of their land. The people work six days a week, and there were many buses in the parking area in front of the entrance to the Tombs and at the Great Wall.

The next day we went to the Tumor Research Institute. The Physician-in-Charge spoke excellent English. He told us of the national study recently completed and about the hospital which we would tour. The study has identified the particular cancer found in a region of the country. During the tour it was demonstrated that by knowing the location of the cancer, the staff can identify the area of the country the patient is from.

The patients looked clean and comfortable. The beds were close together and the patients had white gowns on over their own clothes. This pattern we saw in each hospital we visited throughout China.

In the afternoon, we met with the leaders of the China Nursing Council to discuss nursing education. Our three type system rather confused them. Their main interest was in baccalaureate education only. Their rationale was that doctors and nurses do almost the same thing, so the education should be equal.

They do have a system which could be described as a central school diploma program. Although we asked, repeatedly to visit a school of nursing, we did not get to see one until the end of our trip.

Many of the venerable nurses (those over 55, the age of retirement) had advanced education here in the States. Although they spoke excellent English, our guides would translate. This did take additional time. The younger nurses did not appear to speak English.

The China Nurses Council gave us a banquet in the oldest restaurant in Beijing and that was our introduction to Peking Duck. We did not understand why our hosts were not present, nor were our guides. We learned later that the Council could not afford more guests. The food was abundant and could have fed another ten people easily.

The next day we went to the People's Square, The Forbidden City, and the Summer Palace. We stopped first at the Zoo to visit the pandas. There was a three-month old who performed just like a child for his audience.

The Forbidden City is beautiful beyond belief. The designation Forbidden indicates that the people were forbidden to enter on threat of death. Only the royal family and servants lived there. Parts of the palace were used for ceremonial occasions.

At the Summer Palace, I got separated from the group and experienced panic! No one could speak English and I was alone. Finally a Chinese woman asked what was wrong and escorted me toward the gate where our bus waited. When I

found our group, I gave the lady a picture of the Liberty Bell. We had been told to bring pictures of our home towns with us as token gifts. I have often wondered what she thought of that card. I was relieved to meet our group, but I was the only one who had gotten to the top of Longevity Hill. And, I was so upset I never took a picture!

We went back to the Beijing Hotel for a rest before continuing to Tianjin. Some of us took a taxi to the Friendship Store for shopping. The cab waited for us and returned us to the hotel. From there we were taken to the train station for the trip to Tianjin. When we arrived there we were met by a delegation of the nursing organization and escorted to the Tianjin Guest house.

The next day we visited a Children's Hospital and a Home for Retired Workers. The residents receive a pension from which they buy their food, clothing and incidentals. Some of them do have savings. The family structure of the Chinese is very strong; therefore the residents of the home are those who have no children or their children live so far away from the parents they cannot get to them. Families are most important to the Chinese. Small children were usually in the company of the old folks—grandparents who share the home.

On our next train trip, overnight, to Nanjing (Nanking) we passed through many small villages and farm lands. We were four to a compartment with two upper and two lower bunks. The ride was comfortable and pleasant.

In Nanjing, we visited a maternity hospital. It was clean and cheerful, and the newborns were a delight to behold. However, the dictum of one child to a family was made very clear when we saw the women lined up for abortions. In 1980 the hospital had 5000 deliveries and 10,000 abortions. We also learned that women marry at 22 years and men are 24 years old when they marry. So the one child per couple is doubly precious. And, boys are the preferred child. Family planning is carried out by the hospital. The laboratory does genetic diagnosis and long term genetic research.

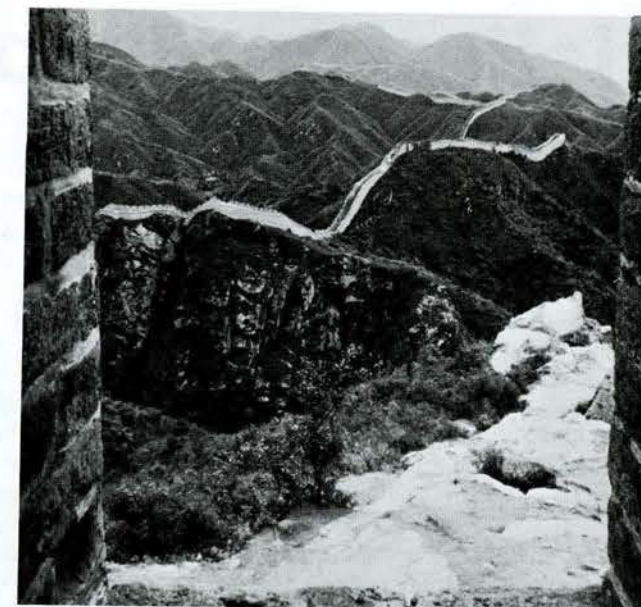

The hospital also sponsored a midwifery course which is three years in length. The midwives do the abortions on women who are less than three months pregnant.

The next day we went to Suzhou, "the Venice of China", so-called because of the many canals. The city is best known for its many gardens and its embroidery, weaving, and silk industries. We did tour the National Embroidery Research Institute which was founded in 1975. The work was beautiful. The young women who did the embroidery have a fifteen minute break every two hours to do eye exercise to relieve the strain.

In the afternoon, we visited the Humble Administrator's Garden. This garden was built in 1513 and the main feature was water. There were tea houses and bridges over the ponds and connecting rills.

The next day was a visit to a commune and typical home of the members. The commune raised fish, pigs, shell, and flowers used in the flavoring of tea. The home was a two story, two bedroom house. We were taken to the bedroom and, there talked with the owner and his wife. They had two daughters. We also visited the hospital and the school of this commune.

The following day found us in Shanghai where we visited a clinic and an elementary school of an urban commune. English was being taught to the fourth grade. Later in the day we visited a Psychiatric hospital which had nearly 1000 patients.

Sunday morning was spent on a boat riding through the harbor. The afternoon was spent at the Shanghai Arts and Crafts Fair. We were all surprised and impressed by the number of people who were studying, or wished to practice English.

We finally visited a Nursing School. We saw the laboratories and the residence. There were seven girls in one very small room. There were eight bunks, one was used for storage space. The educational system is very similar to the hospital programs as we know them.

We also visited the Jade Buddha Temple. It was very beautiful and the vegetarian lunch was excellent. The jade statues (2) of Buddha are of white jade from Burma. Buddhism is the main religion among the Chinese, and the temples receive support from the government because religion is part of the Chinese culture.

In the afternoon we flew to Quilin, a beautiful city amidst jagged mountains. The next day we took a boat excursion down the Li River. It was pure delight. The mountains reflected in the river were breathtakingly beautiful.

Our last stop in China was Quanzhou (Canton). There we visited a traditional Chinese Medicine Hospital. A visit to the herb garden was interesting. We did learn that although they use traditional herb medicines, and acupuncture, they also practice western medicine.

We left China and spent two days in Hong Kong where we met with representatives of the Nurses Association.

Impressions of China abound. Their medical practices, and nursing are mostly western, but they are twenty to thirty years behind us. That will not be true for very long as they are sending physicians and nurses to the U.S. (and probably other countries) to learn and to return to their home land. One physician did tell us that it was a mistake to have followed the Russian pattern because it is not as advanced as American medicine.

It was a Wonderful Trip. People-to-People had planned well. We were a large delegation, but there were no obvious errors made. All went smoothly, and we all have good memories of those twenty-one days.

Jefferson Hospital on the Move

On June 20, 1978, the first patient moved into our beautiful new hospital. One hundred and four patients a day were moved in for four days. That move created four floors of a mini hospital on each floor. Doctors' offices and auxiliary services gradually moved into the remaining five floors.

Two years ago, plans were readied for renovations to start on the Thompson and Pavilion Buildings.

Last year, the floors in the older buildings were re-numbered starting with the sixth floor, for compatibility with the new hospital. As a result, there is no longer a sixth floor in the older buildings. After 5th, there is 7th, 8th, etc. Renovations were begun, and to date the following changes have been made.

The Delivery Room Suite has been beautifully reconstructed and is in full operation on the 7th floor of the Pavilion. Its expansion extends over the entire floor to provide single bed labor rooms, a "birthing room", and a recovery room. The Intensive Care Nursery and Transition Nursery have been re-located to the floor above, on 8th Pavilion. The Pediatric Unit on 10 Main has been relocated to 10 Pavilion and will enjoy "rooming in" space for parents and isolation capabilities not available in the past. The Obstetrical Inpatient Service will be expanded to include both 11 and 12 Pavilion, provide more single rooms, and provide enhanced visibility to the Term Nursery from the Nurses' Station.

Medical/Surgical patients will be located on 9, Star and 14 Pavilion, and a holding area will be relocated to a Thompson Building floor.

In the near future, the Clinical Labs which are now located throughout five different buildings will be consolidated to the first four floors of the Pavilion.

Other changes in the entire Pavilion and which are most noticeable are: complete renovation of the elevators, which will now all open on the Sansom Street side on the ramp; modification of core services including heating, air conditioning, ventilation and plumbing system as well as emergency power capability and fire safety programs.

Patients in the Thompson and Pavilion Buildings are being served meals from newly constructed decentralized pantries located on 3, 9, 10, 11, 12 Thompson and 12 Pavilion.

Upon completion of the renovation project, which is anticipated by Spring of 1984, there will be decentralized pharmacies on 15 Thompson, 9, 10 and Star Pavilion.

The supply system will be an exchange cart system for medical-surgical supplies as is used now throughout the new hospital.

The hospital information system will extend its computer systems to provide terminals on the patient units, in the not too distant future.

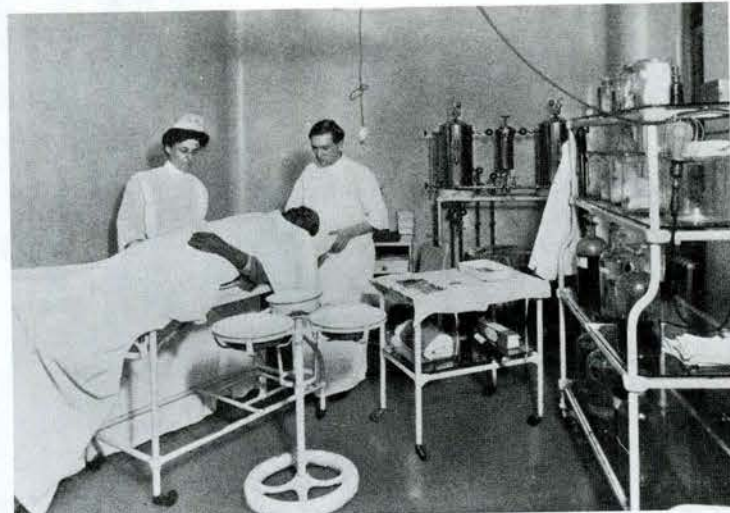

Hopefully, when the next Alumni Bulletin is printed all the renovations will be complete and a final report can be sent to you about our "jet age" hospital in a "jet age" world.

Scholarships Granted from 1948 to 1983

The Alumni of the Thomas Jefferson School of Nursing has offered financial assistance to its graduates as they further their education, for many years.

In 1942 finances were offered as a Loan Fund in Memory of Clara Melville, to be repaid in four years at a 1% interest rate. The amount has increased with the needs of the times and has changed from a loan fund to a scholarship fund.

Working at Jefferson in the early fifties, I recall the increasing emphasis to obtain a Bachelor's Degree for advancement from staff nursing positions. This is what prompted me to further my education. With the help of the Alumni Association, I was able to obtain my BS in Nursing Degree in 1957 and I am sorry I did not continue toward my Master's Degree shortly thereafter.

Following a period in the Air Force, with the GI Bill for assistance, I started to pursue the necessary requirements for a Master's Degree. This was quite difficult since, I had left a number of years lapse from the time I had obtained my BS Degree.

With the present trend in nursing to require a Bachelor's Degree for Professional Nursing, I would encourage you to take advantage of the assistance offered by your Alumni.

I felt that my basic nursing education obtained at Jefferson was the best and it prepared me well for the additional education I have obtained and for a variety of nursing positions I have held over the last thirty years.

The following is a list of alumni who have benefited from the Alumni Scholarship Fund:

In 1977 a new award was given to a Junior student in the Jefferson School of Nursing who had obtained the highest average at the end of the second quarter, in the amount of three hundred dollars. The following is a list of students who received this award:

TJU Announces Decade Fund

To meet the challenges of this decade in education, health care, and research, the Board of Trustees of Thomas Jefferson University has recently established the Jefferson Decade Fund.

Embracing five vital areas, the Decade Fund seeks support for faculty, students, basic and clinical research, health care delivery, and facilities improvements.

Thomas Jefferson University calls on its family and friends to help fund important new programs and people.

"Gifts from alumni, trustees, corporations, foundations, pa-

tients, staff and other friends will strengthen Jefferson's faculty, renew its physical resources, and undergird its financial base," said Lewis S. Bluemle, Jr., M.D., TJU president. "In giving more each year, supporters will enable Jefferson to pursue new opportunities in the context of long cherished values and traditions."

This ten-year program seeks a year-by-year, steady increase in gifts to the University. The Fund will include all gifts to Jefferson in the decade 1980-1990. The goal is 65 million by the end of the decade.

You will be invited to support the Decade Fund through the 1984 annual giving campaign of the Nurses' Alumni Association.

REPORT OF SICK AND WELFARE COMMITTEE

During the past twelve months, "get well" cards were sent, and visits were made to members of our Alumni Association who were hospitalized at Jefferson. Get well cards were also sent to other Alumni members who were ill, if this was made known to us.

Cathleen E. Keating '53

"SATELLITE" COMMITTEE REPORT

A growing concern regarding sparsely attended meetings and its inherent ramifications upon our Alumni Society was expressed by many of our actively participating members during the last year. A "Satellite" committee was formed to research the causative factors, develop a plan of action, and provide a forum not only for an exchange of Business/Social information, but for professional enrichment as well. Our basic goal was to develop a plan for taking the "meetings" to all of you; having first tested your initial response on a local, then regional, and finally national level. While we envision sending alumni to the various areas encompassed by our widely diversified membership, the realistic expectation was to start slowly, evaluate presentations for content and reflected interest, and subsequently tap your own interests rather than offering a "canned" presentation.

To undertake such a task requires enormous coordination and a concerted effort by all of you to provide us with the means to reflect your needs. We need to have current mailing lists. If you are aware of the locations of Alumni who may not have contacted us for any variety of reasons, let us know where we might send them new information. We have been reviewing current mailings to see what regional Alumni distribution patterns might already exist and noting these for early consideration as meeting sites. Our committee looks to all of you for our successful effectiveness.

In accordance with our initial goals, as stated above, we wish to announce a Fall program directed to the membership of the GREATER DELAWARE VALLEY but not to the exclusion of any member who might wish to attend. Our location will hopefully offer an incentive to those of you from Delaware, New Jersey, Pennsylvania, Maryland, etc. Registration will, however, be limited to two hundred twenty-five participants (225).

Respectfully submitted,
Valerie M. O'Donnell, R.N.
Assistant Director/SPD

AGREEMENT COMMITTEE

The Agreement Committee has been meeting with the Nurses' Alumni Association's legal counsel for nearly three years to determine the best way monies in the Relief Fund and in the Scholarship Fund may be used for the benefit and welfare of the graduates of the diploma program in nursing. Both of these funds have been invested in the Jefferson Medical Fund which is handled by the University financial advisors. Accrued interest income is used to provide relief and scholarships.

On May 14, 1983 at the annual business meeting held before the annual luncheon of the Association, our legal counsel outlined the proposed provisions of both funds. She explained that it was necessary to consider Internal Revenue Service requirements in all the planning and in the decisions made.

The Relief Fund established in 1937 provides for medical expenses, support or maintenance for those graduates in need, and who apply for assistance. Under the original plan, the treasurer of the Alumni Association was empowered to supply funds to applicants as directed by the Board of Directors, using the interest income from the Fund.

Looking ahead to the time when Alumni members may not be available to handle such requests, the Agreement Committee proposes to transfer the Relief funds from Thomas Jefferson University to the First Pennsylvania Bank to be known as the Jefferson Diploma Nurses' Relief Fund Trust. The beneficiaries will be graduates of the School of Nursing Diploma Program, College of Allied Health Sciences of Thomas Jefferson University (the former Jefferson Medical College Hospital School of Nursing), and the White Haven School of Nursing. As much of the net income and the principal may be paid to the above-named graduates as the Relief Fund Committee may determine require financial assistance. For the foreseeable future, the Relief Fund Committee should be chaired by the Treasurer of the Alumni Association. She will furnish the Trustees of the Relief Fund all necessary information about applicants for assistance as approved by the Alumni Board of Directors. The Trustees will then issue the relief checks as requested.

In each taxable year of the trust, any income not so distributed shall be paid into the Clara Melville-Adele Lewis Scholarship Fund. This provision is to meet requirements of the Internal Revenue Service.

After much deliberation and on the advice of our counsel, the Committee felt that the Scholarship Fund should operate under the same provisions as has already been established. This Fund will remain invested in the Jefferson Funds with the interest being used to award Scholarships to diploma graduates as approved by the Scholarship Committee of the Nurses' Alumni Association, College of Allied Health Sciences. For the foreseeable future the Scholarship Committee will be chaired by a recent faculty member of the Diploma Program in Nursing.

The amounts to be awarded for any scholarship shall be determined by the Scholarship Committee using as criteria for the awards, the interest available, the cost of the annual tuition and the need of the applicants.

After an in-depth discussion of the proposals submitted

about both funds, there was unanimous approval of the changes among all Alumni members present. Therefore, the officers of the Alumni Association in conjunction with our legal counsel and that of the University are proceeding to act to establish the revised agreements concerning both the Relief and Scholarship Funds.

Mabel C. Prevost, Chairman
Agreement Committee

News from the Alumni Office

On June 10, 1983 the Alumni Office moved from Jefferson Alumni Hall to the Allied Health Sciences Center (Edison Building). The office is situated on the first floor in a large, bright room. All of the furniture, file cabinets and pictures fit in very well, and there is plenty of work space for the mailings that go out at various times of the year.

We appreciate the promptness of our alumni in sending address and name changes which helps to keep our files up-to-date. Because we have a cross file, as well as computerized lists, we can provide you with the latest data on approximately 3100 alumni. If you are seeking classmates for professional or personal reasons, or class reunions, we have lists available at a minimal charge of \$2.50 per list.

In 1982-83 we have seven graduates in their nineties who celebrated their birthdays. Flowers and cards were sent to each of them from the Alumni Association. If you know of any graduate who will have or recently had a ninetieth birthday, please contact the Alumni Office with that information.

In the past year, we have received requests for information about the Nurses' Relief Fund. The Fund can help you to pay for hospital or medical bills, or for special treatments. Our Association wants to assist alumni in regaining their health. If you need financial assistance, or know of anyone who does, please write to the Nurses' Alumni Association. The names of graduates requesting or receiving assistance will be held in strict confidence.

Photos sent by some of you in conjunction with the writing of the history of the School of Nursing are in portfolios in the Alumni Office. Thank you for requesting that they be given to the Alumni Office for safe keeping.

All graduates are invited to visit our new office to see our interesting collection of memorabilia consisting of scrapbooks and photographs. We are located in Room 105, 130 South Ninth Street, Philadelphia, PA 19107 (on Ninth at Sansom, between Chestnut and Walnut). Our phone number is 928-8981. I am usually in the office on Tuesday and Wednesday, 10:00 A.M. to 3:30 P.M. When I am away from the office, calls will be answered by the CAHS Alumni Office, Room M34, Jefferson Alumni Hall, 1020 Locust Street.

the annual luncheon

Class of 1948

Class Notes

Class of 1914

Marguerite G. Barnett, Siemon Lakeview Manor Estate, Lakeview Drive, RD 7, Somerset, PA 15501. Unable to attend luncheon because of poor health.

Class of 1916

Florence Jane (Bonnie) Browning, 29 East Oak St., Oakland, MD 21550. The floral arrangement our association sent to help celebrate my 91st birthday was beautiful and made me so happy to be remembered. Anything associated with Jefferson brings back some of the happiest memories of my life. I continue to go to the west coast in January and return to Oakland, Maryland, in late May.

Frances Butler Pangburn, 39 S. 4th St., Lewisburg, PA 17837. I will not be attending the luncheon this year, but will be thinking of you all. Hope to see you next year.

Class of 1917

Frances M. Grove, R.D. 1, Box J-47, Tionesta, PA 16353. Had hoped to attend the luncheon—it would be so nice to see all of you. Best wishes to every one.

Class of 1919

Class of 1923

Florence Kauffman, Brethren Village, 3001 Lititz Pike, P.O. Box 5093, Lancaster, PA 17601. This is a very nice retirement village, everything is done for our comfort. I had a knee replacement about a year ago. It is very good at present.

Mathilda Knoll Peterson and Ruth Knoll Thompson, Pitman Manor Apt. 44, 535 Oak Ave., Pitman, NJ 08071. My sister Mathilda, and I have moved in to the Manor. It is a Methodist Home where we have an apartment. There is a health unit here with medical care available when needed. We have many happy memories of Jefferson.

Clara M. Brunner, Ridgeview Estates RM 152, Maple Ave., Harleysville, PA 19438.

Class of 1924

Kathryn L. Tash, Southampton Estates, Street Road, #C-119, Southampton, PA 18966.

Genevieve McCloskey Lewis (Arthur K. Lewis, M.D.), 6071 Camelot Drive, Harlingen, TX 78550. I was pleased to have received the copy of "A COMMITMENT TO EXCELLENCE". I wish to express my thanks to the Alumni. I have recaptured events of days gone by and relived many memorable experiences. I, also, wish to thank the Alumni for the Bulletin. I came to Texas a year ago because of my health and to be near my family. I have three daughters—one here, one in San Antonio, and another in Phoenix, Arizona. I have six grandchildren. My husband passed away in 1962.

Class of 1925

Mildred Kroupa Okunishi (Gohei), 4551 Hurley St., Philadelphia, PA 19120. We are both well and happy. We can move around and care for ourselves.

Antoinette Laudano Ronayne (W.H.), 75 Bradley Ave., Meriden, CT 06450.

Marian Robinson Briggs (Dr. Elmer E. Briggs), C104 Concord Arms, 210 W. Montgomery Ave., Haverford, PA 19041. Sorry not to get to the luncheon—do not get into the city—transportation is difficult and I do not drive into center city. Best wishes always!

Class of 1926

C. Eleanor Finn Stewart (Harold P.), 119 S. Adams St., Rockville, MD 20850. We are both just fine. Have 3 grandsons and 2 granddaughters. Dr. Stewart is also 87, goes to the office each day working from 9 to 3. I drive him to his office. He is now Scientist Emeritus.

Laura Carleton Short (J. Walter—deceased), 58 Hub Court, Millsboro, DE 19966. My oldest grandson and his wife will graduate from Penn State University in May with a Master's degree in Law Enforcement. My younger grandson is studying toward a B.S. in Nursing.

Margaret Martin Lauchle (Harry C.), 5909 Grand Ave., Downers Grove, IL 60516. Many thanks for the bulletin and the copy of "A Commitment to Excellence". What nostalgia! I was sorry to learn that several more of my classmates are deceased.

Dorothy Smith Bennett (Eugene—deceased), RR1, 18306 Killian Rd., Spencerville, IN 46788. % L.L. Hart. I moved out to Indiana with my daughter and her family. I like it as I do not need to worry about things getting done and have some one to help me. I have had the new cataract operation and like it very much.

Elizabeth Romich Cobb (Ivan), 12 High St., Carbondale, PA 18407. I'm having a sad time right now. I found my husband dead in bed Sept. 20, 1982. On Feb. 18th we would have celebrated our 47th Anniversary. I was happy to receive a letter from Peg Koon Lecklitner on Feb. 14th. She got my name from the Bulletin.

Mildred Huber Bentz (Francis), Woodmont N. Apt. C19, Downingtown, PA 19335. Since I will not be able to attend our 50th Anniversary Luncheon, here is a small note about my family. We have a son and daughter, five grandchildren (three girls and two boys— one a Bentz III). We are retired, living on pensions—"thank God" and Social Security. Both my husband and I are disabled. We had a "miracle" as my husband had Guillain Barre in 68, told he wouldn't live, but today after 14 years he is doing all the driving, shopping, cleaning, helping with the meals as I have osteoporosis of the spine and cannot do too much. God is good—He gave me back from paralysis a wonderful man. Sounds "dutchy" doesn't it? Love to all! I will be thinking about you on your luncheon day.

Margaret Koon Lecklitner (Myron Lecklitner, M.D.), 8322 Beechnut St., Houston, TX 77036. It has been 50 years since I graduated from

Alan is a Colonel in the Army and will be retiring April 1st, may live in Texas. Our daughter, Hansi, has a position with a great contemporary style business firm. Our younger son, M. Lynn, is a M.D., in nuclear medicine in San Antonio, Texas. You can see we all live in Texas.

*Minerva Peters Bilger passed away in May 1983 at the age of 102 years. She was a nurse in the United States Army in World War I. She served overseas in 1918 and was discharged from active military service on September 16, 1919. On the basis of her Army Service Record, she is believed to be the oldest woman veteran of World War I at the time of her death.

The History of the Jefferson Cap

Jefferson graduated its first class of nurses in 1893. At that time the cap that was worn had a high crown and a wide brim with ruffle around the brim. It was made of a delicate material called "lawn", similar to material used to make handkerchiefs. The cap resembled the Philadelphia General Cap, which at that time was made of a similar material.

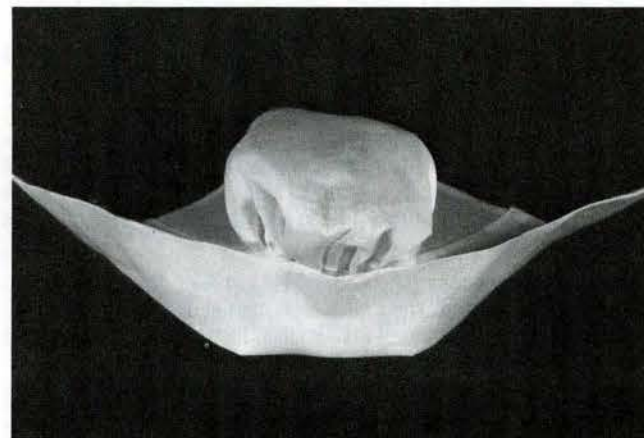

In 1894, Susan Hearle, a graduate of Philadelphia General became Directress of Nurses at Jefferson. When she noticed the similarity between caps, Miss Hearle decided that Jefferson Nurses should have their own distinctive cap.

The crown was lowered, the ruffle was removed and the brim was narrowed, flattened and spread like wing tips, across the front of the cap. The material was changed to organdy which gave the cap more body.

In 1932, the cap was worn with the brim starched and the wings made to stand out—that is the way we wear it today.

Initially, it was traditional to earn the cap by passing the six month probationary period. Now the cap is given to the student to wear as soon as she enters the school.

This was a great responsibility for the student, knowing that the Nurse's Cap originated historically from the veil worn by women who traditionally covered their heads in public, and the cap is a symbol of humility and service to mankind. A responsibility because the Jefferson Cap is recognized and respected the world over, being worn by more than 4500

graduates of the school; many of whom earned their cap and consider it an honor to wear it. (With the closing of the School of Nursing in June of 1982—the total number of graduates will be 5,078).

The student is entrusted with the cap and must wear it with dignity and respect for the tradition that is to be upheld.

(The above article was presented at Capping Exercises for the Class of 1982, by Patricia Zarella '51, R.N., B.S.N., Instructor School of Nursing, September 1958 to July 1980).
