A Message From The President

As your newly elected President, I'm pleased to have the opportunity to represent and serve our Alumni Association.

Many changes have occurred in the nursing profession over these past years. While our program has been discontinued, our organization continues to function, and can be of benefit to you in furthering your education or providing you with other financial needs under our Relief Program. However, your active participation in our organization is essential. I strongly encourage your attendance at our future meetings and welcome your comments and suggestions regarding our organization's endeavors.

I'm looking forward to the challenges and opportunities ahead of me as your President and hope to receive your support in successfully promoting the Alumni Association and the pride we all share as Jefferson graduates.

My fondest wishes to all of you in the coming year.

NURSES' RELIEF FUND

The Nurses' Relief Fund is available to all Diploma and White Haven graduates. The purpose of the Relief Fund is to provide financial assistance annually toward hospital bills and/or bills incurred at home due to an extended illness and requiring the services of a physician. The fund is also available for use in cases of adversity.

Nursing Home cases will be given special consideration. All things being equal, first consideration will be given to Life and Active members. However, all applications received will be reviewed and given consideration.

All or a portion of the amount distributed to a recipient from the Relief Fund may have to be reported to the Internal Revenue Service as taxable income. Each recipient will receive a statement at the end of the year showing what portion of the distribution to her/him should be reported.

IF YOU KNOW OF ANY JEFFERSON OR WHITE HAVEN GRADUATE IN NEED OF ASSISTANCE, PLEASE LET US KNOW AS SOON AS POSSIBLE.

An application for Relief Fund benefits can be found in the back of this bulletin.

NURSES' SCHOLARSHIP FUND

The Clara Melville-Adele Lewis Scholarship Fund continues to provide scholarships to Diploma and White Haven graduates.

Scholarships will be available for summer, fall and spring semesters.

Each application received will be reviewed by the Scholarship Committee; preference will be given to the applicant who has been a member, who is most active in the Alumni Association, and who has most nearly completed requirements for a degree.

A Scholarship application can be found in the back of this bulletin.

August 1, 1984

Dear Alumni:

With the closing of the School of Nursing in June of 1982, it became necessary to have a total revision of our By-laws.

Please read the enclosed By-laws carefully, as there are some significant changes: i.e., we now have two classes of membership—Life and Active; and, starting with September 1984, the regular meetings will be every other month—September, November, January, March, and the annual meeting in May.

Keep these By-laws in a handy place for quick reference.

It was so nice to see so many of you at our annual luncheon on May 5, 1984.

Thank you for your continued interest in and support of the Alumni Association.

I hope you have a good summer.

Sincerely yours,

Florence Roche, '56 President

P.S. A copy of the revised BY-LAWS has been sent to all graduates of the School of Nursing for whom we have current addresses. If you did not receive a copy, please let us know.

We need for our Alumni files—copies of the Constitution and By-Laws that were revised in 1904, 1906, 1919, and 1936.

Computer Education: Teaching Students The New Way

There is an increasing awareness among health professionals of the inevitability of a partnership between nurses and computers within the patient care setting. Nurses are being called on to use computers for such widely varied areas as administration of patient care, quality assurance, staffing, evaluating the impact of nursing care, patient data recording, hospital administrative record keeping and automated patient monitoring. This is happening in hospitals, community health agencies, doctor's offices and all types of health care settings. Nurses have used data processing to develop nursing care plans, make patients' records more complete, decrease medication errors, free nursing time for increased patient care, and to increase job satisfaction.

One of the most exciting opportunities that computers offer nursing is the change to fully document nursing practice. Computer technology, with its ability to track huge amounts of data quickly and efficiently, supports the development of more comprehensive, permanent records of all aspects of the nursing process. Nurses in several institutions such as the National Institutes of Health in Bethesda, Maryland, have demonstrated that computer systems can be used not only to document the administrative tasks that nurses perform for others, but that computer systems can be designed to document total patient care. Systems which document nursing practice are termed Nursing Information Systems, in contrast to those which document the activities of other areas such as admissions, pharmacy, laboratories or medicine.

A high degree of nursing involvement in the development of a total Hospital Information System from the start will help to insure that a useful Nursing Information System becomes a part of any overall Hospital Information System. For example, nurses at NIH were highly involved in the early design of the total computer system. They developed several thousand light pen controlled computer screens that allowed the primary nurse to quickly record an in-depth assessment of each patient's needs, based on Maslow's Hierarchy of Needs. The nurses are then able to create an individualized care plan choosing nursing diagnoses, problems, and nursing actions. Expected outcomes are documented with checkpoints and carefully delineated time frames. The resulting permanent records, in conjunction with similar records from other disciplines, provide excellent data bases for research into nursing care. Thousands of bits of data are available to researchers who are studying such patient care related issues as, the actual use of nursing diagnoses in practice or the relationship of nursing care to cost factors and diagnostic related groups.

Although it is easy to see that nurses must be highly involved in the development and use of nursing documentation systems, nurses are also a key factor in the success or failure of any patient data management system within health care settings, whether it be a lab, pharmacy, admissions, billing or medical order system. Nurses have the longest sustained contact with the patient of any health personnel. Because of their long contact time with patient care technology, nurses

are frequently called on to interface between this technology and other health team members such as physicians, medical students and nursing students who may have only short periods of exposure.

Although nurses are at the hub of the information flow of all of these systems, they are just beginning to understand and effectively use computers in health care. Nurses as a whole have not, to this point, become highly active in searching for ways to harness the power of the computer. There are several possible reasons for this lack of initiative: lack of sufficient background in computer technology and systems; fear of the unknown, particularly related to such issues as security of data, confidentiality of data, and depersonalization of patient care; or possibly exposure to poorly designed systems which have hampered nursing care rather than enhancing it.

The faculty of the Department of Nursing of Thomas Jefferson University realizes that computer technology will have a major impact on nursing in the future and that nurses must be prepared to guide and control this impact. In an attempt to dispel the mystery that surrounds computers the faculty has made a commitment to the education of nurses who will be able to:

1. Define the role of nursing, and their own specific role, in relationship to computer technology.
2. More quickly adapt to new computer technology.
3. Creatively seek ways to adapt electronic data processing for use in meeting patient care needs.
4. Actively participate with other health care professionals and computer specialists to insure maximum utilization of computers for nursing.
5. Provide role models for other nurses and other health care professionals.
6. Generate more complete data bases for future nursing research on patient care.

In order to accomplish these goals, computer technology is being integrated into the curriculum through two methods, instruction about computers and instruction with computers.

Instruction about computers is being given to students and faculty as a means of developing "computer literate" nurses. Courses and programs are being developed to help all students become familiar with the basic concepts of computerized information processing; to understand and be able to use basic hardware and software; and to develop a clear understanding of the major applications of computers in all areas of nursing.

A pilot course, "Computers in Nursing," was developed in the spring of 1984 and was offered as a nursing elective to twenty-five nursing students. By 1985-86 all nursing students will be required to enter the nursing program with a lower division data processing course and will take "Computers in Nursing" as a required upper division course. In this course students study the ways in which computers are used to

Nursing student reviews patient assessment

enhance nursing care of patients, nursing administration, nursing research and nursing education as well as the relationships of Nursing Information Systems to all other parts of Hospital Information Systems. Issues of concern to nursing such as confidentiality of data, legality of data and possible depersonalization of care are studied and discussed. Students also have the opportunity to work at several computer terminals and to view demonstrations of special health care computing projects. Microcomputer facilities in the Department's new Learning Resource Center are utilized for hands-on experience, as well as computers in other departments on campus. The Department of Nursing of Thomas Jefferson University is one of only a very few programs in the country to offer this type of course to its students.

In the very near future students and faculty will also become more familiar with computers through the use of computer assisted instruction. It is hoped through this exposure that computers will be seen as an intellectual tool with great potential for a wide variety of situations. Computer simulations of clinical situations are currently being used with a limited number of students to allow them to make clinical decisions in a risk-free environment. Faculty members are then able to review the students decision making process. In the future these simulations will allow students to make decisions in a wide variety of areas such as ethical and management situations and to study the results of these decisions.

Tutorial programs and drill-and-practice programs will be available for individual study and remedial work in areas such as basic sciences and mathematics or for preparation for challenge examinations. The interaction of computers with

videotapes and videodisc is being explored. This will provide exciting opportunities for students to view and interact with demonstrations of communication skills. Students will also utilize the computer in many clinical courses for a variety of projects. For example, students might choose to carry out an epidemiological study while in a community health experience, to do statistical projects for the nursing research course, or to use the computer to study and plan staffing patterns in leadership courses.

Clearly nursing education at Thomas Jefferson University is not only changing with the times. It is also assuming a leadership role, providing innovative education for today's world.

Life of service

In South Phila. or a Thai camp, a woman helps those in need

Early in the Thai morning, before the sun's rays beat with fierce intensity on the rows of refugee huts in the camp at Khao I Dang, Roseanne Murphy of Bala Cynwyd would stealthily enter a hut that was like any other — except that it had been transformed into a black-market coffee shop.

There, she would sleepily sip freshly brewed French roasted coffee and munch on a baguette fresh from the tin-can-over-wood oven. Flour had been smuggled into camp the night before. Then she would set about the day's tasks: teaching public health, supervising the Khmer community-health program and immunizing children. There were 14,000 of them among the 48,000 refugees who lived behind barbed wire and under the supervision of armed Thai guards.

To an ascetic, it might seem that Ms. Murphy, 43, was pampering herself. But Mrs. Murphy, is not an ascetic. She is a 43-year-old divorced mother who spent years studying to be a nurse practitioner and who is raising an 18-year-old son, now in college.

"Because I'm working with refugees doesn't mean that I live like a refugee. I'm *not* a refugee," Ms. Murphy said a few weeks ago after her six-month tour of duty in Thailand had ended.

Still, it was not as if she had served her six months there for mercenary reasons. The volunteer salary she received as a pediatric nurse practitioner barely covered transportation, some pocket money and lodgings 20 miles away in a Thai house on stilts.

Ms. Murphy does not have a ready answer for why she went. Introspection makes her uncomfortable. "I got a lot out of this, but that's too corny," she said.

To her, there was nothing unusual about leaving home to travel halfway around the world. It does not matter whether children are sick in South Philadelphia or on the border between Cambodia and Thailand: If they are disadvantaged, she wants to help them.

On that day a few weeks ago, Ms. Murphy sat in her temporary South Philadelphia apartment above a vacant medical office dragging deeply on a cigarette. When she left for Thailand in February, she rented out her Bala Cynwyd house.

Since Ms. Murphy's return to the United States, her 5-foot-4 frame has returned to its customary 108 pounds. In Thailand, her weight reached the mid-90s thanks to parasites in the local water. "You die for ice. I'd eat ice with poison in it," she said.

Ms. Murphy thinks her medical career probably began when she was operated on at age 15. She woke up from the anesthesia, promptly disconnected herself from the various tubes, and tried to get out of bed. She then was placed in a private room with restraining straps; her mother and aunt kept continual watch. That did not keep her from biting a nurse.

Ms. Murphy found this perfectly reasonable at the time. "They kept coming in and inflicting pain on me. Where I'm from, if people hurt you, you hurt them back.

Thai children and grass huts.

Despite the storminess of her stay there, she was fascinated with hospitals, and she began working at one after classes at the John W. Hallahan High School for Girls in Philadelphia. On Saturdays, she worked for a pathologist.

She got her registered-nurse degree at Thomas Jefferson University Hospital in 1961, worked at Children's Hospital of Philadelphia for several years, earned a bachelor's degree in psychology from LeMoyne College in Syracuse, N.Y., in 1974, and became a pediatric nurse practitioner in 1976.

Why pediatrics? "Ego stuff," she quipped. "I grew up in an area where everyone had seven kids. I baby-sat a lot because kids used to follow me around."

For all her airy replies, however, Ms. Murphy has never been one to shirk good deeds. She began the pediatric clinic at Casa del Carmen, a North Philadelphia health center sponsored by Catholic Social Service and a grant from the William Penn Foundation.

Basically, she ran the center, helped by phone consultations with Philadelphia pediatrician Mark Sey. She set up a filing system, bought a van, hired the driver and hired Hispanic social workers. Her Audi Fox was vandalized in that neighborhood, but she wholeheartedly said, "I *loved* the people there!"

When the financing ran out, however, so did Ms. Murphy's position. In 1979, she went to the Southeast Health Center, a federally financed health center for low income people at Ninth and South Streets in Philadelphia.

There, she worked with medical assistant Maria Elsie Delgado, 30. "She likes to jump to conclusions right away and speak her mind." Ms. Delgado who works at Booth Maternity Center, said in a telephone interview. "She'd say things, and get into trouble. I'd always try to calm her down.

"She didn't like it when the administration was pushing for more patients, like it was an assembly line. She said 'No way!' She'd spend as much time as she needed with each patient.

Thailand classroom and students.

"She was very much into the patients, especially the adolescent mothers. They weren't sick — they'd use any excuse just to hang around and talk with her. They'd sit there with their babies in their laps and their thumbs in their own mouths."

One Christmas, Ms. Murphy wanted to get some toys for her patients. She collected \$1,000 from friends and went with Ms. Delgado to Kiddie City, returning with enormous bundles.

Another time, she got some old, unclothed, dirty dolls from her two nieces. She and Ms. Delgado bathed the dolls, combed their hair, dressed them and gave them to her patients.

Again, government money ran out and in 1982 Ms. Murphy began working at the Southern Home for children in South Philadelphia, a privately run center for emotionally disturbed children.

"I loved those kids," Ms. Murphy said. "Those kids are surviving, God knows how."

That position also lasted only a few months. "You can get so frustrated with the [medical assistance] system," Ms. Delgado said. "If you want to start movement, get Roseanne. She's always rocking the boat."

An so it was that when she left Southern Home, Roseanne Murphy applied to 31 organizations that did health-care work overseas, received 12 replies and picked the one that promised quickest action: the International Rescue Committee (IRC), an organization founded to get refugees out of Nazi Germany.

Now, the volunteer network functions worldwide in two areas: resettling in the United States, Canada and France refugees who have fled tyranny in some part of the world; and helping refugees. Among its projects, according to Louis Wiesner, administrator of the IRC medical-programs division in Washington are:

- Assisting some of the 350,000 Ethiopian refugees in eastern Sudan and the 700,000 Ethiopian refugees in Somalia.
- Helping 120,000 of the 2.9 million Afghan refugees in Pakistan.
- Working with Palestinians in Sidon, Lebanon.
- Working with some of the 40,000 Guatemalan highland Indian refugees.
- Helping 48,000 Cambodian refugees in the Khao I Dang camp in Thailand. In Thailand, there are about 140,000 legally recognized Indochinese refugees — including 50,000 Cambodians — and 200,000 Cambodians on the border between the two countries.

Farewell party for Roseanne Murphy.

In the Khao I Dang camp, the IRC, one of 20 volunteer agencies active there, is responsible for all public health, preventive medicine, a Khmer health-training center, two clinics, sanitation and a 14,000-student school system. Its camp staff includes two doctors, seven nurses and nurse-practitioners, an epidemiologist, a health educator and a sanitarian, plus 750 Cambodian health workers. In addition, it operates an indoor and outdoor theater, teaches classical ballet, music and sewing and operates a library.

At Khao I Dang, Ms. Murphy supervised community health workers, night-section workers, who were taught to administer rudimentary first aid, and school health workers. Every day, she rode 20 miles to the camp for a shift that lasted 12 hours.

The memories remain.

Back in South Philadelphia, as she spread photos over her kitchen table, she pointed out blossoms bright against the walls of the outpatient department, a long bamboo shed with a mud floor and a straw roof.

Out of all the children she saw, there was one baby that never smiled at her. After months of grim stares from the child, Ms. Murphy bribed her with a doll from Bangkok. Finally, the baby smiled, she said, the way the children had smiled in South Philadelphia.

In the work in Thailand there was an intensity that Ms. Murphy does not want to glorify and often can not describe. Life for the refugees came down to survival and resiliency.

In the camp, she said, it was difficult for her to stifle her emotions and do things the Eastern way. "They should never show anger; they should save face," she said.

At times when her temper flared, Mrs. Murphy would beckon the Cambodian administrator, Han Hok, into a nearby truck and with that modicum of privacy, scream about the current crisis.

"Mr. Hok would say 'No problem,'" she said. "I'm so compulsive, I always thought there was a problem about everything."

She sometimes sought diversion from the problems.

She started a movie club for other camp volunteers, obtaining the films through the IRC. She made up flyers, sold beer, provided free popcorn. She began a cocktail hour, and had parties at her house on stilts, wearing a slinky black silk outfit with a flower tucked behind one ear.

Ms. Murphy is the first to acknowledge that she likes to be surrounded with beautiful things. Back in the United States,

she buys her clothes at Bendel's and Bergdorf's in New York. "I think left, and I live right, and I don't feel defensive about it," she said with a grin.

But she finds it hard to talk about the pain and despair of the nation she has just left. "The stories are too gross, too tragic," she said.

"There are many people with many plights; I've left 100,000 of them."

Last week, Ms. Murphy rocked the boat once more. She

decided to go back to Thailand on Jan. 20 for another tour of duty.

Editor's Note: Roseanne Murphy graduated in 1960 from the School of Nursing, Diploma Program. After Roseanne returned from her second tour of duty in Thailand, she has been doing part-time private duty nursing at Jefferson to "keep in touch with nursing." In September 1984 she began to do a tour of duty in Lebanon with the International Rescue Committee.

Twenty Ways To Kill An Organization

Get sore if you are not appointed on a committee, but if you are do not attend committee meetings.

If you're asked by the chairman to give your opinion regarding some important matters, tell him you have nothing to say. After the meeting, tell everyone how things ought to be.

Do nothing more than is absolutely necessary, but when other members roll up their sleeves and willingly, unselfishly, use their ability to help matters along, howl that the organization is run by a clique.

Hold back your dues as long as possible, or don't pay at all.

Don't bother about getting new members. Let the secretary do it.

When a dinner is given, tell everybody money is being wasted on "blow-outs" which make a big noise and accomplish nothing.

When no dinners are given, say association is dead, and needs a can tied to it.

Don't ask for a dinner ticket until all are sold. Then swear you've been cheated out of yours.

If asked to sit at the speaker's table, modestly refuse.

If you are not asked, resign from the association.

Don't tell the organization how it can help you; but if it doesn't help you, resign.

If you receive service without joining, don't think of joining.

If the association does not correct abuses in your neighbor's business, howl that nothing is done.

If it calls attention to abuses in your own, resign from the association.

Keep your eyes open for something wrong, and when you find it, resign.

At every opportunity threaten to resign and then get your friends to.

When you attend a meeting, vote to do something, and then go home and do the opposite.

Agree with everything said at the meeting and disagree with it outside.

When asked for information, don't give it.

Keeping the "Jeff" Spirit Alive

Did you know that nursing alumni have the benefit of two alumni offices? Coordinating programs for you are the Nurses' Alumni Association Office and the University's CAHS Alumni Office; both strive to keep the "Jeff" spirit alive. Support to alumni is fostered by Thomas Jefferson University and includes all Jefferson graduates from the School of Nursing, College of Allied Health Sciences, College of Graduate Studies, and Jefferson Medical College.

As you probably know the Nursing Alumni Office is currently located in Room 105 of the Edison Building at 130 S. Ninth Street. It is here in this spacious area that your memorabilia is displayed. This office is often the scene of much activity, with alumni volunteers directed by Alumni coordinator Martha Riland, RN'27. A loyal alumna and an indefatigable worker, Martha has staffed the alumni office since January 1969. She is responsible for alumni records, reunion class lists, and can respond to a myriad of questions pertaining to alumni affairs. She is always eager to have alumni visit, and may be reached at (215) 928-8981 on Tuesdays and Wednesdays, from 10:00 a.m. to 3:30 p.m.

Adding to those services and bolstering that successful effort in alumni relations is the University's C.A.H.S. Alumni Office. Established in October 1974, this office is located in Jefferson Alumni Hall, 1020 Locust Street, Room M6. Managed by Janet Waxman, assistant director of development and director of alumni programs for CAHS and CGS, with the assistance of Carolyn Robinson, alumni secretary, it provides services to both the CAHS Alumni Association and the Nurses Alumni Association.

Since alumni records became computerized in 1980, Martha Riland and Carolyn Robinson confer weekly on the updating of records. Both Martha and Carolyn request that you

send address corrections or name changes promptly. Please help us to be efficient!

The Nurses' Alumni Association office now has daily phone coverage through an automated call forward service provided by the University's CAHS Alumni Office. Calls not received by the Association are taken by the CAHS Alumni Office; your request or message is handled immediately.

In keeping with the University's efforts to bring nursing alumni even closer to Jefferson, the CAHS Alumni Office invites special reunion classes to contact the CAHS Alumni Office—whether it's your 5th, 15th or 50th. They will arrange a memorable reunion for you. In 1984, the classes of '34 and '54 had reunions following the annual luncheon in Jefferson Alumni Hall. Refreshments were served and alumni had the opportunity to extend their celebrations.

Perhaps you are unaware of the University services and resources that are available to Jefferson alumni. With a simple identification process, alumni may have the privilege of using the Scott Memorial Library, located at 1020 Walnut Street. Transcripts are available to graduates by writing to the CAHS Registrar's Office, Room M5, Jefferson Alumni Hall. You may wish to join the Jefferson Commons at a modest membership fee for recreational and sports programs. For information on other University services, such as Thomas Jefferson University Hospital, short-term housing, meeting rooms, or parking, please call the CAHS Alumni Office.

If you live in the Delaware Valley, or if you are planning a visit to Philadelphia, we invite you to visit Thomas Jefferson University, its hospital or colleges. Please call 928-7709 to arrange for a personal guided tour of the University. We look forward to seeing you.

DO YOU REMEMBER?

Miss Anna Shafer, night supervisor of nursing at Jefferson for thirty four years, died on December 15, 1956 after a short illness. Miss Shafer was born in Phillipsburg, NJ on November 3, 1873. She entered the School of Nursing April 1, 1907 and graduated December 20, 1910. She is best remembered for many long years of devoted service on night duty which began in 1912. She did private duty for 1 year and 4 months prior to starting night duty. On December 31, 1918, she resigned from night duty and worked in Dr. Carrington's office for 3 years, returning to night duty January 1, 1922. Retired from nursing May 1, 1949, completing 34 years.

During her long night duty career she learned to know 2411 graduates, knew that 1422 got married and that 264 married doctors.

Those of use who remember Miss Shafer will never forget the roll-call at breakfast each morning and how we anxiously awaited the morning when Miss Shafer would tell us of our new assignment.

The Best Medicine

THE "STAPH" OF LIFE

I'm Staphylococcus albus, and although I'm big and stout
And do my share of dirty work, I'm really quite put out.
I get no good publicity; I can't work up a rep;
The fame goes to those stringy guys whose family name is
Strep.

Now I'm just as good a coccus as any in the clan.
What's more I do a perfect job: I cover all of man;
And when I've done a good day's work to build up tissue
debit,
Friend Strep come in a-tonsilling and grabs off all the credit.

I swear that something must be done;
I'll get my share of spoils—
These people who think Streps are smart—
I'll make 'em sit on boils!!—Anon.

Poor Pop, tired from a hard day, was being pestered by a
stream of questions from little Willie.
"Whatcha do down at the office, Pop?" Willie asked.
"Nothing!" shouted Pop, about at the end of his rope.
After a thoughtful pause, Willie then asked, "Howja know
when yer through, Pop?"

Two teen-age girls were discussing their families.
"Why does your grandmother read the Bible so much?
asked one.
"I think," replied the other, "that she is cramming for her
finals."

Mother: "Now, children, don't quarrel.
What's the matter?"
Harold: "We're playing shipwreck, an 'Susie won't go to the
bathroom an' drown herself."

A telephone service girl received a call from an elderly lady:
"My telephone cord," said she, "is too long. Would you
please pull it back at your end?"

She was filling out an application blank and having some
difficulty over the question, "Are you a natural born
citizen of the United States?"

After chewing her pencil for a while she finally wrote:
"No . . . Caesarian."

Patient: "Is the doctor in?"
Maid: "No, sir."
Patient: "Have you any idea when he'll be back?"
Maid: "I don't know, sir. He went out on an eternity case."

"Mother," cried Mary, as she rushed into the house. Henry
wants the Listerine. He's just caught the cutest little
black and white animal, but he thinks it's got halitosis."

This is a fact
That isn't so funny:
When there is too much month
At the end of the money.

A girl bought a ticket in a big Christmas lottery, and insisted
on having the ticket number 51. It turned out to be the
winning number, and she received \$15,000.

A reporter called upon her and asked: "Why did you
especially want ticket 51?"

"Well," she said, "for seven nights I dreamed of number
seven and seven sevens are 51, so I bought the
ticket!"

A little girl was sent to the drug store for something to stop
palpitation. Since it was a long walk to the store, and
the little girl had a short memory, here's what she said
to the druggist: "Mother said she wanted something
that would stop population."

"How old are you?" asked the officious office manager of
an applicant for a job.

"Twenty-seven," answered the young man.
"Well, what do you expect to be in three years?"
"Thirty," the young man replied without hesitation.

As the one eye said to the other eye, "I think there's
something between us that smells."

Celebrating National Nurses Day at Jefferson

On The Lighter Side

It is not diversity that keeps men from reconciliation,
It is the all too common refusal to admit, that, there
might be merit in another's position and flaws in our own.

Middle age is that perplexing time of life when we hear two
voices calling us; one saying, "why not?" and the other,
"Why bother?"

FAMILY PIE

1 handful of forgiveness
1 heaping cupful of love
A full pound of unselfishness
Mix together smoothly with complete faith in God.
Add:
2 tablespoons of wisdom
1 teaspoon of good nature for flavor
Then:
Sprinkle generously with thoughtfulness.
This makes a wonderful family pie.

THE RULE OF THREE

Three things to govern:
temper, tongue, conduct
Three things to love:
courage, gentleness, affection

Three things to hate
cruelty, arrogance, ingratitude
Three things to wish for
health, friends, a cheerful heart
Three things to fight for
honor, country, home

THE CHEMICAL ANALYSIS OF THE HUMAN BODY

Sulphur—enough to rid a dog of fleas.
Lime—enough to whitewash a chicken coop.
Fat—enough for six bars of soap.
Iron—enough for a six-penny nail.
Phosphorus—enough for 20 boxes of matches.
Sugar—enough for 10 cups of coffee.
Potassium—enough to explode a toy cannon.
Total Value—87 cents.
That's all you are worth!

Nature gave man two ends—
One to sit on and one to think with.
Ever since then man's success or failure has been
dependent on,

THE ONE HE USES MOST.

Her telephone number is 1-215-752-7462. Mrs. Osborne enjoys cruising and raising flowers!. She would love to hear from anyone who remembers her.

Pavilion Renovations Are Complete

Reconstruction of the patient floors in the Pavilion Building was completed in May of this year. Jefferson patients are no longer "on the move".

As I reported in last year's Bulletin, the Maternity Department; Delivery Room is occupying the 7th floor. 8th floor houses the Intensive Care Nursery, and the Transitional Nursery. Pediatrics and the Pediatric Intensive Care Unit are on the 10th floor. Since then, the 11th and 12th floors each have Maternity patients and a Newborn Nursery.

Early this year, 14th floor became a Medical floor; Star Pavilion is Cardio-pulmonary; and 9th Pavilion is Surgical. The Adolescent Unit on 10th Thompson will be ready for occupancy in September of this year.

This then, ends the moving of patients for renovations at Jefferson.

ALUMNI OFFICE NEWS

On June 10, 1984, it was one year since the Alumni Office moved to Room 105 (Edison Building.) After the furniture was placed and the pictures hung, it seemed as if we belonged and work progressed as usual. The Alumni Association owes many thanks to Margaret M. Cossman for doing such a great job in coordinating the move.

The Alumni Association continues to send flowers and cards to those graduates who are celebrating their 90th or more birthday. If you know of anyone, we would be most interested in having their names.

Inquiries continue to come regarding the Relief and Scholarship Funds; this pleases us, since the funds are available to be used. Applications for each fund can be found in the back of this bulletin. We encourage you to apply or to let us know of anyone needing assistance. All requests are given careful consideration.

If you know of any graduate who has not received his/her copy of the book "Commitment to Excellence," contact the Alumni Office, we have copies available.

All the graduates who visited the Alumni Office (approximately 25) after the luncheon on May 5, 1984, seemed to like the new office and had an enjoyable time looking at the pictures and our other memorabilia and just reminiscing about the past.

We invite all of you to visit our office. We are located in Room 105, (Edison Building) 130 South Ninth Street, Philadelphia, PA 19107 (on Ninth Street at Sansom, between Chestnut and Walnut.) Our phone number is 215-928-8981. I am usually in the office on Tuesday and Wednesday, 10:00 A.M. to 3:30 P.M. When I am away from the office, calls will be answered by the CAHS Alumni Office, Room M-6, Jefferson Alumni Hall, 1020 Locust Street.

We are missing Graduation Exercises Programs for 1946, 1952 and 1956. If you do not want to part with the original copy, we would be very happy to have a xerox copy.

The History of the Jefferson Cap

Jefferson graduated its first class of nurses in 1893. At that time the cap that was worn had a high crown and a wide brim with ruffle around the brim. It was made of a delicate material called "lawn", similar to material used to make handkerchiefs. The cap resembled the Philadelphia General Cap, which at that time was made of a similar material.

In 1894, Susan Hearle, a graduate of Philadelphia General became Directress of Nurses at Jefferson. When she noticed the similarity between caps, Miss Hearle decided that Jefferson Nurses should have their own distinctive cap.

The crown was lowered, the ruffle was removed and the brim was narrowed, flattened and spread like wing tips, across the front of the cap. The material was changed to organdy which gave the cap more body.

In 1932, the cap was worn with the brim starched and the wings made to stand out—that is the way we wear it today.

Initially, it was traditional to earn the cap by passing the six month probationary period. Now the cap is given to the student to wear as soon as she enters the school.

This was a great responsibility for the student, knowing that the Nurse's Cap originated historically from the veil worn by women who traditionally covered their heads in public, and the cap is a symbol of humility and service to mankind. A responsibility because the Jefferson Cap is recognized and respected the world over, being worn by more than 4500

graduates of the school; many of whom earned their cap and consider it an honor to wear it. (With the closing of the School of Nursing in June of 1982—the total number of graduates will be 5,078).

The student is entrusted with the cap and must wear it with dignity and respect for the tradition that is to be upheld.

(The above article was presented at Capping Exercises for the Class of 1982, by Patricia Zarella '51, R.N., B.S.N., Instructor School of Nursing, September 1958 to July 1980).

Miss Doris Bowman, R.N., M.S., emeritus professor of Nursing, received the C.A.H.S. Alumni Special Achievement Award. Dr. Lawrence Abrams, C.A.H.S. dean, presented the award to Miss Bowman at the University's Opening Exercises ceremonies on September 5, 1984.
