**The President's Message**

Dear Fellow Alumni,

It has been my pleasure to have served another year as your president. I have earnestly tried to fulfill my commitment.

This year, the annual meeting was held the morning of the luncheon. Coffee and danish were served to all the early birds, before and after the meeting — this met with many favorable comments. The meeting was conducted as a regular business meeting, with presentation of annual reports. Election results were announced and the new officers assumed their responsibilities after the close of the luncheon. The short film on "Jefferson, A Tradition" was a plus! The meeting was rather well attended (for a first) but we missed YOU!

It was nice to hear so many positive comments about the luncheon itself. We owe a special thanks to our Social Co-Chairpersons for the souvenirs we received. The pens and pads with the Jefferson name or logo added a special touch as did the theme "We, the Nurses".

Both the Scholarship and Relief Fund Committees have been active. If you need assistance, please use the applications in the back of your bulletin to apply. Our Satellite Committee has taken off — first stop — New Jersey. We'll keep you updated.

To those of you who could/did not attend, announcement was made in reference to the new program at Jefferson for nurses out of practice for the past ten years or more. These pool nurses can name their own hours, day shift, Monday thru Friday, areas of interest and to boot — Top Dollar. The program has already been well received — if you live in the area — think about it — Jefferson needs your special touch in delivering quality patient care.

I wish to extend my gratitude to your Board of Directors, Committee Chairpersons, Committee Members and all the active members of the Alumni who have supported and encouraged me these past few years. I shall endeavor to do my best for the ensuing year.

Thanks for the Memories!

Flossie Roche, RN, CNOR — *Class of '56*  
President

## NURSES' RELIEF FUND

The Nurses' Relief Fund is available to all Diploma and White Haven graduates. The purpose of the Relief Fund is to provide financial assistance annually toward hospital bills and/or bills incurred at home due to an extended illness and requiring the services of a physician.

The fund is also available for use in cases of adversity. Nursing Home cases will be given special consideration. All things being equal, first consideration will be given to Life and Active members. However, all applications received will be reviewed and given consideration.

All or a portion of the amount distributed to a recipient from the Relief Fund may have to be reported to the Internal Revenue Service as taxable income. Each recipient will receive a statement at the end of the year showing what portion of the distribution to her/him should be reported.

During 1986 we have been able to assist nine of our graduates from the Relief Fund. IF YOU KNOW OF ANY JEFFERSON OR WHITE HAVEN GRADUATE IN NEED OF ASSISTANCE, PLEASE LET US KNOW AS SOON AS POSSIBLE.

An application for Relief Fund benefits can be found in the back of the bulletin.

## NURSES' SCHOLARSHIP FUND

The Clara Melville-Adele Lewis Scholarship Fund continues to provide scholarships to Diploma and White Haven graduates.

May 1985, the Scholarship Committee took action to grant scholarships to part time, as well as full time applicants. Provided the applicant is enrolled in a program leading to a degree in nursing and enrolled for a minimum of six (6) credits.

Scholarships will be available for summer, fall and spring semesters.

Each application received will be reviewed by the Scholarship Committee; preference will be given to the applicant who has been a member, who is most active in the Alumni Association, and who has most nearly completed requirements for a degree.

A Scholarship application can be found in the back of the bulletin.

# SCHOOL NURSES AHEAD OF THEIR TIME

"So you're a school nurse! How do you like it? You don't give pills do you? How do you take care of the kids?" How often have these same questions been asked of school nurses through the years?! Even nurses in other fields until recently, questioned the role of the school nurse. After all, one of the main duties of nurses is to give medicine. All well and good for the hospital environment which is—sickness. But schools are healthy environments for the most part, and "dishing out" pills isn't the answer to most problems found among our students. Nurses in schools do not wear uniforms so that they promote a feeling of wellness in the health office.

In the past some doctors gave out antibiotics to many people who came to them with viral illnesses; people expected something for their money! Today many of our sick children see a doctor and unless a secondary bacterial infection is suspected, antibiotic therapy usually is not prescribed.

Through the years school nurses have been making children feel better without dispensing drugs—sometimes just by being a good listener or by being a good talker, sometimes a few caring words and a few minutes on the health office cot are all that is needed to make a student feel better.

We have become a drug oriented society. We drink drugs at parties, known as alcohol. We smoke drugs known as cigarettes or pot. We have even developed new ways to use the "more fashionable" drugs such as crack and cocaine. We take pills to stay young, to keep colds away, and to keep our skin wrinkle free. We fill ourselves with all kinds of vitamins. They can't keep our vision from fading when we read at the age of 40, or our hair from turning gray at the same time, or our bodies from growing old; but a nice life style and common sense can help.

School nurses were put down for years for not giving medicine—just for *not* adding to our drug society. We are finally teaching our kids to say "no" to drugs, yet school nurses have said "no" all along. Even today more information is coming to light about the relationship of fevers to illness, that aspirin is not always indicated for use with fevers.

We are just now getting the courage to speak out against the morals that Hollywood and television have set for our youth. Now that the AIDS virus has struck, we are finally telling our children once again to say "no" to pre-marital sex, (still hoping of course, to find the "magic pill" that will cure AIDS.)

The quiet little girl who stops by a busy health office who has been sexually abused is helped not by the nurse who rushes her back to the classroom after a pill, but by the one who takes time to talk to her to discover the tragedy.

The boy who comes in with a black eye after a beating isn't helped by the nurse who gives an unnecessary aspirin to relieve physical pain, but by the nurse who takes the time to relieve the psychological pain.

For years school nurses have been ahead of their time by attempting to resolve problems without dispensing pills. Nurses first came into schools because of communicable diseases. They have turned their nursing and college skills to other areas now that vaccines help control communicable diseases. They do everything in their power to keep children in school, rather than exclude them from it.

School nurses were instrumental in changing the laws in New Jersey about medication in school, realizing that the unnecessary use of aspirin and home remedies were wrong and only added to our drug dependent society. Today the school nurse is the only person who can administer medicine in school in accordance with the law.

Even though not all school nurses are able to do formal classroom teaching, they are constantly teaching in the health office. Reminding the teenager with pink eye to throw away her mascara, and buy new make-up every six months, is certainly teaching.

The words of the late Christa McAuliffe are stimulating and thought provoking for everyone in education "I touch the future . . . I teach." Governor Kean proclaimed the 4th Wednesday of January as "New Jersey School Nurse Day," to recognize the work of the school nurse. This year on January 28th many nurses had a day off from school due to the snow.

Cumberland County School Nurses are proud of the schools they serve, they are proud to be part of the team that shapes the future of our youth, and they are proud of the stand they have taken against drugs in school, unless prescribed by a doctor.

Celebrating National Nurses Day at Jefferson

The above article appeared in the Millville Daily Newspaper on March 7, 1987, and was written by June Reginak Dupnock who is a nurse at Mt. Pleasant and Wood Schools in Millville, New Jersey, where she teaches family life and health education. She is a 1957 graduate of Jefferson's Diploma School of Nursing, and is a member of the Nurses' Alumni Association. June is a member of the New Jersey State School Nurse Association, and the Cumberland County School Nurse Association, having served as its president. She is currently chairman of the Cumberland County Board of Health.

# REMEMBER?

I am replying to the plea from Alice Boehret for someone else to write her memories of her days at Jeff. It seems so long ago that my memories are very hazy. Alice has done her duty so now I will try to remember some things that happened when I was a student.

I'll never forget 1033 Walnut Street. I think we, the class of 1949, were the last ones to occupy those palatial quarters. Mrs. Deck was the housemother. There were at least ten girls in my room. We each had a cot, and a foot-locker that we brought from home, and not much else. There were two showers for about 60 girls and loads of roaches. Can you imagine how a small town girl who was sheltered from the world felt in an environment like this? I had never seen a roach before. Later when we looked back on our probie period spent here, we realized that some of the best times we had were spent in the soon to be condemned building.

After our first six months we moved to 1012 Spruce Street. It was like a palace after Walnut Street. I remember passing Horn and Hardart's bakery going to breakfast at the hospital. The delicious odor from the bakery was a sharp contrast to the slimy eggs, cold toast and that awful Philadelphia scrap-ple. We would have ended up with deficiency diseases if it hadn't been for Pop Keesal's restaurant. Remember those enormous fresh fruit salads sundaes? Our bodies slurped up those good vitamins in the fruit.

I was now in a room with three other roommates. Our room was near the phone, and it was our job to answer it. And answer it we did! City zoo—Mr. Lion speaking. City laundry—which bag do you want?

One of my first assignments was Sixth Floor with Miss Lewis. I was scared to death of her and tried so hard to do everything just right. I remember Jean Beard was assigned there when I was. Two things stand out in my memory from Sixth Floor, and I don't remember which one of us committed the crimes. Miss Lewis wanted the office desks cleaned with alcohol. One of us (I think it was me) got the wrong bottle, and cleaned them with acriflavin, and they turned yellow. Did I get it! Narcotics were kept in a locked hall closet. At that time the liquid codeine was strongly flavored with peppermint. One of us (I think it was Beard) slammed the door, and a full bottle of codeine fell off the shelf, and the entire floor smelled of peppermint. I don't remember and don't care to know how it was resolved.

No matter what time of day or night, if we heard the Star Spangled Banner on the radio we aroused everyone and one and all were required to stand up and salute. Salt and crackers in a short sheeted bed was standard procedure. It sure didn't take much to make us happy! Our hours were long and humor was much needed therapy.

We had a nutrition teacher whose name was Miss Martha Walker, I think. Our entire class cracked up inside (because she was strict, and wouldn't tolerate laughter.) When she called on me for an answer and called me "Miss Diets." My name was Miss Louise Dietz. After a course in communicable diseases, and we had gained a little more knowledge, my classmates called me "Lues Diets." Lues being another word for syphilis. Such clever, clever girls.

One evening we dared Jean Beard to chew some tobacco. She took up the challenge and after chewing awhile she asked what she should do with the juice. We told her to

swallow it. Oh what a lovely shade of green appeared on her face.

Night duty was special because we slept in Curtis Clinic and had a good bed for a change. Back in the forties the TB patients were housed at Barton Memorial, and we were taken to work in a taxi.

In our senior year we spent three months at a psychiatric hospital. I went to Shepherd Pratt in Towson, MD. I must have been there in January, February, and March, because I remember the wonderful sledding on the snow covered hills and the beautiful magnolias in March.

Back on Spruce Street we now had a room with only one person in it. Well, only one person slept in it. We were together in our off duty hours. We were so used to being together. I had the good fortune of having the room beside Annie Shafer, the night supervisor, who didn't laugh very much. Believe me—the girls did not congregate in my room until after 10 P.M. when Miss Shafer left her room for the night shift.

It was soon time for our graduation but I had one more exciting time left. Six weeks before graduation I got sick, and started to vomit. Mary Louise Bell, alert and good nurse that she was, suspected that I had appendicitis. She took me to the emergency room, and she sure was accurate in her diagnosis. The next morning I had an appendectomy by Dr. Kenneth Fry.

We had our senior banquet at the Latin Casino. I was looking through our yearbook at the notes my classmates wrote to get ideas for this article. And that is why I mentioned the senior banquet. There were many references to a rhumba I did there. Ah! But my mind's eye is now getting foggy, and that person doing the rhumba is fading away.

Sincerely,  
Louise Marie Dietz Strayer, class of 1949

## SUNSHINE AND MUSIC

A laugh is just like sunshine.  
It freshens all the day,  
It tips the peak of life with light,  
And drives the clouds away.  
The soul grows glad that hears it  
And feels its courage strong.  
A laugh is just like sunshine  
For cheering folks along.

A laugh is just like music.  
It lingers in the heart,  
And where its melody is heard  
The ills of life depart;  
And happy thoughts come crowding  
Its joyous notes to greet;  
A laugh is just like music  
For making living sweet.

## "HAPPY ENDING"

It could be said that I was made or came into being sometime in the fall of 1935. I am dressed as a Jefferson "probie" of that era, and now reside in the display cabinet in the Nurses' Alumni Office. I like being here, it feels like I'm really home at last.

To get back to my story, it is so easy to ramble. During the fall of 1935, the graduating class of 1937, confusing, isn't it!, was trying to raise money for their year book expenses. The class decided to have three dolls dressed to chance off. One was dressed as a Nun, one as Miss Philadelphia, and me as Miss Jefferson. My clothes were made by C.D. Williams, located on 11th Street between Locust and Spruce. At that time C.D. Williams made all the student nurses uniforms; I even have a nurse's cape, which I really cherish.

Many chances were sold on "us dolls". I was so lucky, because I was won by Dr. Lewis C. Scheffey, a world renowned obstetrician and gynecologist. Dr. Scheffey was thrilled, because he wanted to give me, Miss Jefferson, to his little daughter Judy for a Christmas present.

Judy took very good care of me. After being packed away for many years, I again came to the light. Judy who is married and living near Reading, PA came

across me one day as she was house cleaning. Feeling that I did not belong packed away in a drawer, Judy called her mother for suggestions. Mrs. Scheffey said "We will take her in to the Medical College Alumni Office; they will know what to do."

So, the fall of 1986 I went to the Alumni Office. Of course, me being a nurse, they were not in the least interested in me or my history. The natural thing to do was call the Nursing Alumni Office; they were thrilled to have me.

A letter was with me that had been written to Dr. Scheffey by a student nurse from the class of 1937. The letter was to congratulate Dr. Scheffey for winning me, the doll of his choice. The student's name was Helyn Long, she is now Mrs. Marvin Romberg, and resides in Texas. Mrs. Romberg remembered about me being won by Dr. Scheffey, and was willing to share her information with the author of my story.

I would be most happy to have any of you stop by the Nurses' Alumni Office, M-6, Jefferson Alumni Hall, and visit with me.

# FLORENCE NIGHTINGALE

Florence Nightingale was born in 1820 to wealthy, cultured, English parents, who at that time were residing in Florence, Italy. The Nightingale Family traveled extensively throughout Europe. Florence had a sickly childhood, the climate of England did not suit her, and contributed to her ill health.

Florence and her sister had a governess, who was very strict. When she was 10 her father took over her education, teaching her Latin, Greek, and mathematics, and all that he knew. She had a desire for music, but was unable to sing due to constant sore throats. At an early age she was interested in cultivating her intellect, even as a child she had a keen desire to nurse the sick; she dreamed of hospitals and visited them whenever she could.

According to Florence, her life was totally impractical, never having to do anything for herself, not even taking care of her own hair. When she was 17 there was a severe influenza epidemic in London, all her family had it. She nursed 15 servants who were in bed, her mother, and two children of her brother. The only assistant she had was the cook, who was not ill. This same year Florence was introduced in London, was presented at court, and her life of society began. This life did not appeal to her, she preferred to take care of the sick.

November 5th, 1854, she entered the Barrack Hospital at Scutari with 38 other women,—nurses and Anglican sisters. The difficulties found there laid the foundation of her system of modern nursing, thus making 1854 a landmark in the history of nursing.

She was an eminent sanitarian and statistician, with a passion for hygiene and the conservation of health. The intellectual gifts and insight for affairs, which would have sufficed to equip a great statesman, enabled her to confer in public matters with men in government, always as their equal, often as their superior. At every opportunity she would visit hospitals and inspect them. Many times her plans were changed due to illness.

Actually Miss Nightingale was self-taught. Her probation at Kaiserwerth was the only real training she had. Later she claimed the nursing was very crude at Kaiserwerth. Her own standards and tests were so much more thorough and exacting than any others of her day. The Crimean War broke out in 1854, and Miss Nightingale's great opportunity came.

Sidney Herbert, then Secretary at War, was her personal friend. He was an active reformer and earnest humanitarian, and was able to dare to do things not routinely in his line of work. When the party led by Miss Nightingale landed at Scutari and was established in the large Barrack hospital they were horrified at the terrible conditions,—a vast hospital with no sewage system, no supplies, no laundry, and no fit food. The men were devoured by vermin and were in a most pitiable state of neglect. The death rate was 50-60%.

During the time she was in charge, Miss Nightingale organized all the hospitals throughout the Crimea, and about 200 women nurses passed under her control. All this was accomplished in the face of every obstacle that official jealousy, red tape, and bureaucratic inefficiency could present.

The most amazing achievement of Miss Nightingale in the

Florence Nightingale

Crimea was that she practically overthrew the whole method of managing the British army which up to that time was regarded as sacrosanct by the bureaucrats. The death rate fell to twenty-two per thousand from over forty percent.

During her stay in the Crimea she established, besides the nursing service, laundries, and diet kitchens, and brought about the installation of extensive sanitary engineering works; provided every kind of supplies,—clothing, food, equipment, and surgical dressings for the patients and nurses, whenever the army system failed to do so. Interested in the medical department, she procured equipment for a laboratory, and was instrumental in bringing about an army medical school.

She was the first Red Cross and the first War Camp Community Service. Started a post office and a savings fund for the men, provided rest and recreation rooms for them, fitted up convalescent camps, supplied opportunity for study, investigated every detail of their health, dietary, and routine, and organized systemic care for their families.

While in the Crimea she had an acute illness, and this, with her exhausting labors, left her a semi-invalid for life.

For many years she was absorbed in the work of influencing the administrations in India on health saving, and sanitation. She remained interested in India during her whole life.

To show their gratitude the British nation gave her a large sum of money which she used to found the training school for nurses of which she always had a vision. Due to her poor health she was unable to direct it in person. June, 1860 the training school was established in St. Thomas hospital, and she became personally acquainted with every probationer.

Miss Nightingale was responsible for the control of the nursing staff, as to discipline and teaching being taken out of the hands of men, and lodged in those of a woman, who must herself be a trained and competent nurse.

During the Civil War she was closely associated with the United States Sanitary Commission and the many women who took charge of the army relief work. In 1865 began the transformation of infirmaries in Liverpool and London, England from places of horror to well managed, model hospitals. The International Committee of the Red Cross was organized in Miss Nightingale's day and owed much to her example and suggestions.

Though in her youth she might properly have been called a revolutionary, she showed in her later life, that at a given point the old cannot go on with the young, who then pass beyond to further stages of activity, either by evolution, or revolution, or both.

Miss Nightingale's personality was so fascinating that she was literally adored by men and women as if she had been a semi-deity. Her mental brilliancy and her wide learning made her conversation and letters absorbingly interesting. Although she was an invalid, confined to her room, for so many years, she was always in close touch, through her correspondence and her visitors, with groups and individuals the world over who were intent on hospitals, nursing, sanitary, or social betterment.

The Crimean experience cast over her a glamour that never faded. The effects of her years of intense and unremitting intellectual and inspirational labors were traceable in the far corners of the earth. From 1894—1908 Susan C. Hearle, a graduate of the Training School of the Philadelphia General Hospital, was Director of Jefferson's School of Nursing. Miss Hearle was an English Woman and had received her first training under Florence Nightingale. The Jefferson Nurses' Alumni Association was organized in 1895 by Miss Hearle, so we, even now, have an indirect or maybe a direct tie with Florence Nightingale.

## THE FLORENCE NIGHTINGALE PLEDGE

"I solemnly pledge myself before God, and in the presence of this assembly, to pass my life in purity and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievous, and will not take or knowingly administer any harmful drug. I will do all in my power to maintain and elevate the standard of my profession and will hold in confidence all personal matters committed to my keeping and all family affairs coming to my knowledge in the practice of my calling. With loyalty will I endeavor to aid the physician in his work and devote myself to the welfare of those committed to my care."

(The Nightingale pledge is a modified Hippocratic oath arranged by Mrs. Lystra Gretter for the nurses of the Farrant Training School, Detroit, and was called the Florence Nightingale Pledge as a token of esteem for Miss Nightingale. It is sometimes ascribed wrongly to Miss Nightingale's authorship).

September 2, 1986 Jean Lockwood Wagner, '41, and her husband Frederick B. Wagner, Jr., M.D., University Historian, attended a conference at Stuttgart, West Germany. While there, they spent some time at Kaiserwerth, West Germany and were most impressed by their visit to the Institution of Kaiserwerth on the Rhine, where Florence Nightingale received her training. As a result of Jean's enthusiasm, I have attempted to refresh your memories about the "Lady With The Lamp."

## "END OF AN ERA"

How many of you remember Minnie and Eddie Fine, also known as "mom" and "doc?" For fifty years plus, the Fines ran the Clinton pharmacy and luncheonette located on the S.W. corner of 10th and Spruce Streets.

This year the Fines have retired, but they are very sure they will miss all the many friends they made over the 54 years they were in business. Many, many of their friends have been Jefferson nurses, medical students, and doctors.

The Clinton pharmacy/luncheonette is an institution that will long be remembered. The luncheonette was known for its famous "best" milk shakes, and a really good cup of coffee. Mom Fine was always willing to listen to your problems, and if asked would offer advice.

"Sugar," as the Fines' son Sigmund was nicknamed by his aunt the minute he was born, has worked beside his parents all his life. Sugar could have been a pharmacist himself, but many years ago he decided against the 12 years of school and apprenticeship that would

have been required. Now, for the first time in his life he will have to go out and look for a job.

There are few stores left that really care about their customers. Many in the neighborhood have learned that when hard times left their pockets empty, they could always turn to the Fines for a hot meal or get a badly needed prescription filled on credit, with no questions asked.

High rents and a decline in business due to competition from the big drug store chains left them with little choice but to close. Not only will they be missed; they will miss the daily activity of running a pharmacy/luncheonette.

Several times this summer I have met Min Fine on the street, she looked well and said she keeps busy doing volunteer work, and helping to care for a sick aunt. Eddie keeps busy watching T.V., which he enjoys doing. Minnie is 76 this year, and Eddie is 78.

And so it is farewell to a living legend.

## As I Remember It

Fifty five years is a long time to remember anything. And the remembrances may not always be accurate since we have a tendency to remember things as we wanted them to be. I will try to be as accurate as possible, but if my memory plays tricks on me, forgive this old lady.

The caste system did not prevail at Pine Street. We were one big, happy family. Everyone worked together to make life as pleasant as possible for patients and staff. The patients were our prime concern.<sup>(7)</sup> It was a young population, approximately ages 15 to 45. The girls tended to be somewhat younger than the men. All with tuberculosis, and they knew they were in for a long siege of treatments. Many were from upstate Pennsylvania or New Jersey, so they were quite far from home, and we were the nearest thing to family they had.

Sunday was the main visiting day. I think we had two a week.<sup>(8)</sup> Some of the patients had very few visitors.<sup>(6)</sup> Then the students would spend extra time with the patients who had no visitors, and help them to feel less lonely.<sup>(7)</sup> I think this was one of the things that led patients to remark that they remembered the nurses always had time to listen to problems, and were there when a patient needed to talk to someone.

I shall begin with my student days. About 1930. It is odd that the only thing I remember is night duty.

The nights were long, dark, cold. Then the only treatment for tuberculosis was fresh air, good food, and rest. And those things they got in abundance. At night, and during rest periods (from 1 to 2 P.M.), windows were opened wide. I must have been there in the winter for I remember it as being very cold. The heat was turned down, khaki blankets were put on the beds, and hot water bottles and bed socks to the feet. The nurses' stations were outside the wards, and with the door closed to the ward and wearing sweaters, we kept reasonably warm.

Nights were very quiet. No patients ventured out of the depths of his/her blankets except for a dire emergency! (An intractable cough that needed some E.T.H.C., or to ask for a hot water bottle or an ice cap to be filled.)

So what to do to keep occupied from 10 P.M. until 4 A.M.?

There was a fire escape that joined the nurses' home and the nurses' stations in the hospital. Each of us had our speciality. Some liked to set hair. Others manicured nails. So after all patients were settled and everything was quiet, stealthily across the fire escape would creep a freshly shampooed head. A student on duty would promptly set it. Next, a scrubbed hand would present itself for a manicure. No harm was done. There were two students for the three floors, and 36 patients. The bells were loud, and could easily be heard on all these floors. No patient suffered from lack of attention.

After midnight and all students off duty were snoozing in their blanketed beds, what to do? A small circle of light illu-

"Little Jeff" Getting fresh air and sunshine.

minated the darkness of the nurses' station. A bare light bulb illuminated the stairwell. This is when the flying roaches descended upon us. We would take a round sputum cup — punch a hole in the lid — clamp it down upon an unsuspecting 3-inch roach, and pour ether in. I don't remember what we did with the carcasses, but the hoards never seemed to diminish.

In between these lethal carnages, we dutifully made our hourly rounds with our little flashlights, and extra sweaters. We checked each patient, and carefully recorded in our night books: "Patient sleeping well." "Ice cap filled."

<sup>(1)</sup>Betty Ent and I will always remember a special night. As students, we learned all our procedures in the classroom, and were expected to remember them and apply them at the proper times. No one stood over us and supervised. We were on our own.

The procedures, of course, included "Care of the Body After Death." And in those days it was a complicated procedure, not the simple process it is today. The instructions included "pack all body orifices."

Well, Mr. "F" died about 2 A.M. Back in the quiet room after the doctor left, we were alone. We remember our instructions. There was no such thing as a procedure book on the ward.

We did alright above the waist. There was no problem. Cotton in all the proper places, tissue paper under the eyelids, and the chin tied up with gauze bandage. Then we came down to the waist. Neither of us had ever seen a nude male below the waist. What to do? The instructions had said there were two orifices there. We panicked. We went out and sat on the stairs between second and third floor. We cogitated.

Soon, from the first floor a voice floated up. Miss Cushen:

"Little Jeff" Picnic on the patio.

"Girls, don't you have that body ready yet? The ambulance is on its way down from the big house for it." "Yes, Miss Cushen. Right away."

Back we went to the dark, quiet cell. One of us held up the covers. Under the eerie light, the other took a hairpin from her long tresses, and blindly attempted to pack those unknown orifices. We wrapped him in his shroud, put him on the stretcher, and took him to first floor. As we opened the door for the ambulance driver, the wind lifted the shroud from his face. It was almost as though he spoke to us: "You are O.K. girls!"

Approximately ten years later, I returned as a supervisor. Some things had changed. As a student, friends would ask me: "What surgery are you doing for tuberculosis?" It was the heyday for surgery.

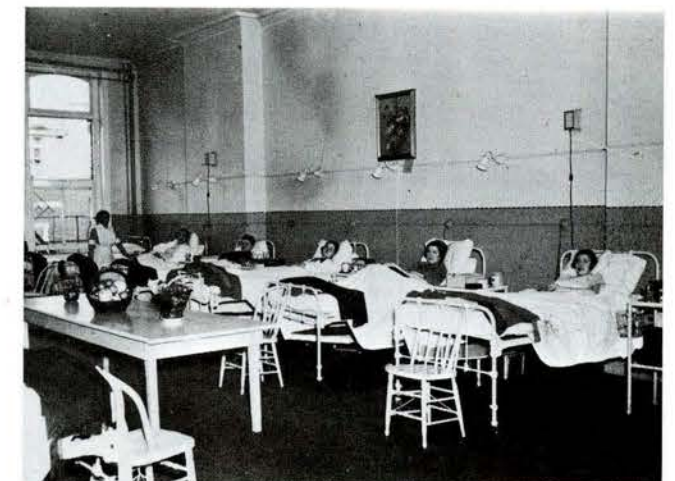

I stuck my nose up in the air, and in a superior manner, replied that there was no surgery for tuberculosis. Only fresh air, good food and rest. Now, it was a different story.

Ultimately, the days of myriad new drugs came upon us. Friends now said: "What drugs are you giving?" My nose again went up in the air as I replied that now "Collapse Therapy" (surgery) was the treatment of choice. My poor nose! By the time I left in 1947, the age of anti-tuberculosis drugs had arisen, so that nose could lift no more.

Another question I frequently was asked was about the dangers of getting tuberculosis from taking care of the patients. Really, I felt more secure in the hospital than I did when I went to the theatre. I remember coming home from the Forrest Theatre, and taking a complete bath and shampoo because people were coughing and sneezing down my back and beside me. In the hospital we knew what the patients had — they knew they had a communicable disease and were anxious to protect themselves, their families and us. Just as the staff was caring, the patients were caring, and were anxious to use all protective measures.

Food played a large part in our lives. That was one of the things that everyone seems to remember. We had dietitians that planned nourishing, attractive meals for everyone.<sup>(6)</sup> As I recall, the staff dining room and patients had approximately the same menu. Except sometimes on days when Dr. Willauer was operating, we would have steak — his favorite.

<sup>(4)</sup>I remember Laura, one of the cooks, and Ella, one of the dining room waitresses. Yes, we ate off a white tablecloth, and were served. Quite a change from the cafeteria at Big Jeff. All the dietary people took great pride in their tasks. The

"Little Jeff" Straighten that bed line girls!

dietitians not only planned and supervised, but pitched in with the cooking and baking.

Holidays were special times with special baking. One time someone gave Laura a bottle of Spiritus Frumenti for the Thanksgiving mince pies. She added a generous helping. I'm sure whoever furnished the extra must have been well pleased. None of that pie got to the wards!<sup>(6)</sup> At Christmas there were fruit cakes, cookies, and pies. One time Keppy found out a patient was having a birthday. She baked a cake with all the decorations. Thereafter, every patient let it be known when he/she was having a birthday. And Keppy obliged, and I think the dietitians that followed her kept up the tradition. I'm sure many extra birthdays were made known if the patients felt it was about time for another cake. The cakes were complete with candles and singing.

In between meals the patients were given chocolate milk, eggnogs, jello, orange album, etc. And on weigh-in days (Tuesdays I think it was), any patient who had lost weight had an extra egg tossed into his/her nog.

Romance occasionally entered those sacred halls. Although the boys were on fourth floor and the girls on second and third, as from time immemorial, boys and girls find ways to fraternize. Of course, there was the sun deck. Every nice day patients with those privileges had access to the fresh air. Also I suspect student nurses or medical students carried notes from one floor to another.

I remember one special couple. Ray and Rose struck up quite a friendship. It brightened everyone's days. If "You Are My Sunshine" came over our Musak system that was quite an event because that was their song. I still think of them the infrequent times I hear it. Eventually they both went back to their original sanatoria, and that was the end of that.

<sup>(10)</sup>In addition to the wooden pins, lamps, tatting and crocheting the patients did, we went through a phase of making ceramic objects. We had our own kiln, supplies and an instructor — supplied, I have a suspicion, by our Women's Board. Our Women's Board was very good to us. As I look back, it seems as though anything that we wanted, if the hospital wouldn't get it for us, they did.<sup>(6)</sup> They were faithful in providing the plants for the sundeck, and parties for special events. I remember some of those marvelous people were Bessie Dobson Altemus, and Miss Bland, daughter of Dr. P. Brook Bland. There were many others.

<sup>(9)</sup>To go back to the ceramics, one of our staff nurses became so intrigued with ceramics that she eventually got her

"Little Jeff" Dr. Sokoloff with his bevy of beauties.

mother involved who made a successful business out of it. I, too, have kept an interest in it.

Patients were also instructors in various activities. When I admired their ability to tat, I was told that I, too, could do it. I demurred, but they insisted. So when I made ward rounds, I stuck my shuttle and thread in my uniform pocket. In between checking the ice caps, and seeing that the sand bags were properly in place on the patient with a new thoracoplasty, I would pull out my shuttle so patients could see how much I had done since the last time, and be chided for being so slow and inept. Eventually, I succeeded, although now I have neither the patience nor the dexterity.

<sup>(9)</sup>All the patients remember the days as pleasant and cheerful. One even characterized the experience as compared to a finishing school:—"the only entrance requirement was having tuberculosis."

One might wonder, how 12 women, or men for that matter, could function with one bathroom and only two showers. It seems that they worked out a system that worked very well. <sup>(10)</sup>Of course, all patients did not have bathroom privileges at the same time. In those days post surgical patients were on complete bed rest for—10 to 14 days?—so some had basins brought to the bed, and I think, baths given to them (Help!—some of you, fill me in.) Two early risers would go in first and shower. And then the next two, brush teeth, etc. There never seemed to be any friction.

<sup>(11)</sup>Dr. Savacool in his article mentioned the sun deck, as I have, too. It was the hub of our existence in retrospect. Doctors made rounds there. Nurses took temps and blood pressures. Dietary provided picnics. The guppies were guppying. Petunias and pansies flourished. Even rose bushes and tomato plants grew, although I don't think we ever grew enough tomatoes for a salad. I also suspect that on extremely hot days, I bent the rules a bit, and allowed the boys on fourth to take their rest period on the deck. Fourth floor, under a tin roof in Philadelphia 100 degree weather was unbearable. And we certainly knew nothing about air conditioning. (If I didn't do this, I ask forgiveness.) <sup>(12)</sup>In addition, the women brought their sewing kits and mended the men's pajamas, and sewed on buttons. Again, I suspect students interceded with communications.

Although the food was adequate, still it was always fun to send out for something not provided. Bill, the night maintenance man, went out for the patients on Saturday nights.

Sandwiches, cokes, ice cream, etc. <sup>(13)</sup>In the meantime nurses who were off duty and not otherwise engaged, (and financially solvent) went around the corner to Old Bookbinders at Second and Chestnut Streets for a basket of steamed clams, or to Arthur's Steak House for mouthwatering steak.

In those days, all doctors were assumed to be great tin Gods. Not so at Pine Street. They earned the appellation. They treated nurses, students, and patients as human beings so they earned the title. They were indeed special, and taken by today's standards, were worthy.

Many of them had had bouts of tuberculosis themselves. They had walked in the patients' shoes. I'm sure that it was their caring that rubbed off on the nursing staff. No way can I remember all of them to give them credit. I will focus in on two while thinking of all of the rest so very fondly.

Dr. Woodrow Savacool and Dr. George Willauer . . . Dr. Savacool was staff physician, and Dr. Willauer, chief surgeon. Both were adored by the patients, and certainly esteemed, if not adored, by all their coworkers. Dr. Savacool seemed to be always available for consultation, for advice, for caring for patients, and to help his coworkers.

Dr. George Willauer—what can I say? He was a showman, as well as an A + + + surgeon. I always said he could have cut off my head and sewed it on to my great toe, and that would have been O.K. His patients also felt the same way about him.

On the day of surgery Dr. "Georgie" sailed into the building in his long black cape, tossed it down, and strode masterfully back the corridor to the O.R. And then, boy, did things pop! Ann remembers (as do we all) that he "swore like a trooper." We knew he was not swearing at us. He was swearing at the perversity of a blood vessel that would not obey him and stop bleeding. Or at an instrument that wouldn't behave as it was supposed to. Some nurses couldn't understand him. We could. To us, his super ability transcended all that.

While we're talking about "Georgie", and ultimately about food, we should remember the lobster parties. Once a year he had barrels of lobsters flown from Maine, and invited all those who had worked with him during the year. All the lobster you could eat—coleslaw—beer and nothing else. What else could you possibly want? He never forgot anyone.

Someone always had to stay at the department to cover. Ann reminds me of the time when the rest of us went, and she stayed home. Dr. Willauer sent two lobsters back with us, complete with seaweed, and EXPLICIT instructions for the preparation.

There we are, Ann and I, in the kitchen at midnight. . . . We plopped those two fellows in boiling water, headfirst. We sat in the dining room. We chatted, and she shared. Since Ann couldn't eat two lobsters, naturally I helped her. I paid for it that night! But can you imagine the luxury of being sick from eating too much lobster? Never before OR since.

Again with Dr. Willauer. I remember the first dose of penicillin I ever helped administer. The thoracoplasty incisions curved from the neck to the waist, so there was always likelihood of infections no matter how careful surgeon or O.R. staff. One patient I remember was unlucky enough to come down with a wound infection. It was during the war. Although penicillin was available, it was all conscripted for the war effort. On the day "Joe" developed a wound infection, Dr. Willauer came in and said: "By golly, I am going to get some of the 'witches' brew for Joe." And, by golly, he did just that. How, we never did know. No longer is it such a rare magic brew. It worked for Joe.

Getting fresh air at Pine Street "Little Jeff."

Another wartime remembrance is the blackouts. We had black curtains draped over all the windows at night. The blackness and the unearthly wailing of the air raid sirens from the fire engine house down the street was enough to curdle our blood. The nurses, doctors and students spent more time in the evenings with the patients. I don't know whether we were with the patients to allay *their* fears or *our own*.

To take our minds off the situation, we devised all kinds of activities. We allowed the fourth floor boys to come to third and second floor to play cards with the girls, or just talk (very circumspectly chaperoned by nurses and medical students.)

<sup>(14)</sup>I am reminded (although I had forgotten it) that I sometimes read poetry to keep us occupied. I do know that my favorite was Robert Service's "The Ice Worm Cocktail." I went from floor to floor with it. I'm sure I didn't inspire a love of poetry in any heart.

Dr. Willauer wouldn't operate on a girl if she were menstruating. The patients were on a schedule. If you were scheduled for surgery today, and your period started, you would be recycled. <sup>(15)</sup>So no way would you admit you were indisposed. In the day when tampons were not as common as today, everyone was not adept at inserting same. If a bedmate were knowledgeable in such matters, she would help her friend insert one so that no one would know of her plight.

<sup>(16)</sup>Another of Grace's remembrances was the time that she "vomited blood." Everyone got all excited. Including Grace. It seems someone (me?) had given her blueberries to eat. Everyone drew a sight of relief when it was known the berries were the culprit.

Do any of you remember the ferries that ran between Philadelphia and Camden? Five cents a ride. A good way to cool off on a hot July evening. Many of us took advantage of those rides.

All was not sweetness and light. My first few months had some miserable moments. Kay was queen of the ward. She was a special patient, and had been there for many months. When Miss Cushen was supervisor. Kay had made up her mind that she was not going to like me, or anyone who came to take Miss Cushen's place. As I would go on my rounds, Kay would be sitting up in her bed ready to pounce on me.

"If Miss Cushen were here, the bedside tables would not be in such a mess."

"If Miss Cushen were here, the chairs and bedline would be straight."

"If Miss Cushen were here, the lockers wouldn't be so messy."

"If Miss Cushen were here" . . . and more and more. And so it went. How I hated to go into that room. I would stay in the nurses' station, and read the charts and day book diligently. Finally, after 4 or 5 deep breaths, I would push open the door and hear Kay's tirade.

Eventually, Kay accepted me. In fact the night she died she called for me to sit with her and hold her hand. She looked at me and said: "I'm dying." This was in the days before we knew about the four (or is it five?) stages of dying, and I wasn't supposed to say, as I did: "No, Kay. You'll feel much better in the morning."

"You're lying, Miss Showers, and you know it."

I was. And I did. . . .

She held tightly to my hand, closed her eyes, and was gone before the sun rose.

Of such sadnesses and happinesses was life at Little Jeff.

## HAPPY RETIREMENT PEG

Peg holding bronzed nurses cap, presented to her by the N.C.C.'s

Twenty five years ago Margaret M. (Peg) Cossman, '47 returned to work at Jefferson, and Jefferson has not been the same since her return. Peg worked most of that time from the Nursing Office. She was in charge of the nursing assistant program, the nursing clerical staff, and the summer nursing assistant program, this was in addition to the many other projects she was involved with.

Peg retired in June 1987 with the title of assistant to the director of nursing, she held this position for several years prior to retirement.

Many who work or have worked in the past at Jefferson came under Peg's influence; she was a hard task master, but at the same time very fair and just in her dealings with people, demanding the best from everyone, and would think nothing of sending someone home if they came on duty with dirty shoes, shoe lacers, uniform, etc.

For the twenty five years Peg was at Jefferson she was constantly after the nurses to wear their caps, and to wear them proudly. When Peg was on duty and in uniform she was never without her cap.

Peg was also recognized for her mechanical abilities, and was rarely seen without her tools, a real "Miss Fixit." Peg had a wonderful working relationship with all maintenance personnel, she respected them, and they respected her and because of this she was often able to accomplish the impossible.

Any major move within the hospital was always made smoother because of Peg's ability to coordinate all aspects of the move. Her main concern was always the comfort of the patient.

As a friend and fellow worker Peg was loyal, thorough, strict and trustworthy, she always insisted if a thing was worth doing it was worth doing right, and this she did to the best of her ability. She will miss Jefferson, but Jefferson will find her irreplaceable.

Good luck Peg, we hope your retirement is happy and rewarding for you.

This was read at Peg's retirement dinner by Maryanne Werner, Assistant Nursing Director for Cardiopulmonary Nursing at Jefferson.

*In the beginning God created the heavens and the earth and the New Hospital Building. Now the New Hospital was a formless void and God's spirit hovered over it.*

*God said, "Let there be light" and there was light. God saw that the light was good and God divided light from darkness. God called light "emergency power" and darkness he called "a flashlight." Evening came and morning came: the first day.*

*God said, "Let there be a way to divide the New Hospital Building in two." And so it was. God made the atrium. Evening came and morning came: the second day.*

*God said, "Let the New Hospital building produce different technologies. And so it was. The New Building produced technologies: dialysis units, operating rooms, critical care units of different kinds. God saw that it was good. Evening came and morning came: the third day.*

*God said, "Let there be authorities in the New Building to govern it and take charge both by day and night. And so it was. God made a great power: Nursing, to govern over all and to take charge of the day and night. God saw that it was good. Evening came and morning came: the fourth day.*

*God said, "Let the New Building teem with departments. And so it was. God created every kind of creature: doctors, administrators, electricians and plumbers. God saw that it was good. Evening came and morning came: the fifth day.*

*God said, "Let us make someone in our own image, in the likeness of ourselves and let her be master of the doctors, the electricians, the nurses, the administrators, the students and all the maintenance department.*

*God created Miss Cossman and he blessed her and said, "See I give you all the plumbers and all the carpenters and all the painters. And so it was. God saw all that he had made, and indeed it was all good. Evening came and morning: the sixth day.*

*Thus the New Hospital Building was completed in all its array. On the seventh day God completed the work he had been doing and he rested.*

*For on the seventh day God blessed Miss Cossman and placed her in charge to see that all the creatures he created did their work and that all their equipment was in order.*

*God blessed the seventh day because on that day he was able to rest knowing that all his work in the New Building was under the care of Miss Cossman.*

## DISTINGUISHED CAREER ENDS

A distinguished nursing career came to an end on December 26, 1986, when Barbara G. Schutt, charter member of the American Academy of Nursing, recipient of ANA's Honorary Recognition Award, and former editor of the American Journal of Nursing, died after a prolonged and gallant struggle against cancer.

Barbara's professional career began with her graduation from the Jefferson Medical College Hospital School of Nursing in 1939. Later she earned the BA degree at Bethany College (W.VA.) and the MS in Education from the University of Pennsylvania. In 1973 Bethany awarded her an honorary Doctor of Science degree.

After some time as staff nurse and instructor at Jefferson, Barbara joined the USNAC, seeing service mainly in Okinawa during World War II. Upon separation from the military, she joined the staff of the Pennsylvania Nurses Association, becoming executive secretary in 1957.

She was probably best known to the nursing community during her tenure as American Journal of Nursing editor, 1958-71, where her perceptive and forceful editorials made a lasting impression. Several years after leaving AJN (1968) she moved to be closer to her beloved pre-Revolutionary home in Connecticut. In 1974 she was appointed director of the Division of Nursing at Mohegan Community College, Norwich, CT. Upon her retirement from that position in 1979, she received the Presidential Citation. She received many

other honors during her career: from both the Pennsylvania and Connecticut Nurses Associations, as well as from other institutions and agencies with which she had been associated.

A committed believer in collective bargaining for nurses, Barbara was a member and, later, chairperson of ANA's Economic and General Welfare Committee from 1952-58. Equally committed to organized nursing, she was an eloquent and influential voice at many ANA conventions, president of the Connecticut Nurses Association, 1977-79, and chairperson of ANA's Nominations Committee, 1972-74.

Barbara was also active in community affairs, serving in various capacities with Eastern Connecticut's Health Systems Agency and Southeastern Connecticut's Commission on Aging. A former participant in Senator Weicker's Senior Intern Program in Washington, D.C., she served as volunteer at Mystic Seaport, with the Literacy program, and at the Women's Center of Southeastern Connecticut.

September 3, 1980, Thomas Jefferson University, College of Allied Health Sciences Alumni presented the Special Achievement Award to Barbara Gordon Schutt in recognition of her contribution to the profession of nursing in the areas of leadership, education and service.

She is survived by one sister, Bettina Schutt Jennings of Ithaca, New York, and by her long-time friend and companion Donna E. Haney, with whom she shared her home.

## SPECIAL ACHIEVEMENT AWARD

Deidre accepting the CAHS Special Achievement Award from Dean Abrams

September 9, 1987, Deidre Watkins Blank, R.N., D.S.N., a 1967 graduate of the Thomas Jefferson University Diploma Program, was honored with the College of Allied Health Sciences Alumni Special Achievement Award for her contribution to the nursing profession. Her current position, she says, is to represent nursing at the federal level, as an administrator at the National Center for Nursing Research, established in 1986.

The purpose of the center is to fund research and prepare trainees to be independent investigators. She awards and monitors grants supporting basic and applied nursing research, studies which will have an impact on the future of nursing care.

In September 1971, Deidre was in the Scott Memorial Library doing research when she met her future husband Michael Blank, Ph.D. (CGS '76) who was also in the library doing research. Michael is a senior staff scientist for Hazleton Biotechnologies Company. He develops immunoassays and bioassays for the pharmaceutical industry and for government and university clients.

The Blanks, who now live in suburban Washington, D.C., are involved in a new joint endeavor—the parenting of their daughter, Avery Morgan, who is almost two.

Congratulations! Deidre, on your many accomplishments.

## Scholarship Committee Report 1986-1987

We are pleased to report that interest in scholarships seems to be increasing among our graduates. Hopefully, this trend will continue. From letters received, it appears that graduates not only appreciate the financial help they are given but have become even more aware and appreciative of the foundation given them at Jefferson. We value these affirmations and have attached a few as received.

Awards granted were as follows:

### Fall 1986

Anne (Spohrer) Woods, 1975  
Susan Nufrio, 1976  
Maria Longworth, 1969  
Patricia Pryor, 1977

Linda Critzer, 1976

### Spring 1987

Catherine (Glavey) Dowhy, 1975  
Karen (Chilandese) D'Alonzo, 1977  
Kathryn (VanDyke) Hayes, 1971

### Fall 1987

Nancy (Nevin) McClees, 1969  
Kathleen (Suber) Carlson, 1968  
Dorothy (Widney) Lucas, 1955

Doris E. Bowman  
Chairman

The following excerpts are from letters received by Miss Doris E. Bowman, chairman of the Scholarship committee. We hope by publishing these comments it will encourage other Jefferson graduates to apply for a scholarship.

**Nancy McClees, R.N., E.T. writes: I have attended Franklin University since the fall of 1983 and currently carry a 3.8 GPA. Being self employed I do not qualify for any tuition refund. Since I graduated from Jeff in 1969 I did not receive any credit for my three years in the diploma program. Over the last three years I have challenged all my lower division nursing courses and scored for a total of 14 exams. It was stressful, but the fastest way for me. Even today I will holdup my diploma education at Jefferson to anyone's education. I have worked in a wide variety of fields and have always been able to feel competent and secure in my knowledge. Thank you for considering my application for a scholarship. Nancy McClees, '69**

**Thank you Miss Bowman, and the Scholarship Committee for awarding me the Clara Melville-Adelle Lewis Scholarship. This most generous award will enable me to continue my education in the field of cardiac rehabilitation. After 12 years, it is very exciting for me to be back at Jefferson. There is no doubt that my commitment to nursing stems from the strong foundation of knowledge which I received in the diploma program. Thank you for giving me this great opportunity to further my education. Cathy Glavey Dowhy, '75**

**I just wanted to write and thank you and the other members of the Scholarship Committee of the Alumni Association for your generous scholarship award. This will be a big help in meeting my tuition expenses this coming year at the University of Pennsylvania. I am very proud to call myself a "Jeff grad." Karen D'Alonzo, '77**

**Just a note to express my sincere thanks and appreciation to the Scholarship Committee for granting me a scholarship. This greatly eases the financial situation associated with completing my nursing education goals. Although I recognize the need to further my education I will always cherish the nursing education and training I received at Jefferson. It is my Jefferson education that has guided my professional growth and advancement over the years. Patricia A. Pryor, '77**

## Alumni Office News

Well! we did it again, November 26, 1986 the Alumni Office moved to the rear of M-6, Jefferson Alumni Hall. We hope this will be the last move for a long while.

Our new office is very nice, bright and cheerful, there is a beautiful big tree right outside the window. The window covers the entire south wall of the office.

We continue to keep busy with address changes, marriages and deaths which are reported to us. It is a challenge keeping the records straight, and we appreciate it so much when you do send in your address change. It is sad when we have to remove an address because mail has been returned marked, "moved, no forwarding address."

As in past years, we sent our older graduates, 80 and over, whose birthdays we know, a card and a floral arrangement from the Alumni Association. If you know of anyone having a birthday, let us know the birth year, day, month, address and telephone number.

A big thank you to the volunteers, who so faithfully help us with stuffing envelopes and putting on labels, for the luncheon and annual giving letters. Without your willing assistance it would be nearly impossible to get the mailings out on time.

Our office continues to work closely with the CAHS Alumni Office. Elisa Lang and Gale Dryden have been a great help to us, we value their friendship, and the good working relations between the two offices.

The address of the Nurses Alumni Office is: Thomas Jefferson University, 11th and Walnut Streets, Philadelphia, Pennsylvania 19107, M-6 Jefferson Alumni Hall. The telephone number is 215-928-8981. We are usually in the office every Tuesday, from 9:30 A.M. to 4:30 P.M., and occasionally on Wednesday. All phone calls will be answered (when we are not in the office) by the CAHS Alumni Office, room M-6, Jefferson Alumni Hall, 1020 Locust Street, Philadelphia, Pennsylvania 19107.

If you happen to be in the vicinity on a Tuesday, you are most welcome to stop and see us, it might be wise to call first, to be sure we are in the office.

Betty Piersol and Peg Summers  
Alumni Office Coordinators

## The Satellite Committee

For a variety of reasons, representation at our regularly established Alumni Meetings has been rather poor, with only the same 20-25 members present at most meetings. In order to increase our active membership, the idea of establishing satellite alumni groups in other geographical areas was born. Since there is a large concentration of Jefferson diploma graduates living in southern New Jersey, this was the area selected for the initial program.

Accordingly, 142 questionnaires were mailed to graduates who live in this area. Thirty-seven questionnaires were returned over a period of several weeks, most indicating an interest in alumni meetings nearer home. A Satellite Committee report given at the Annual Meeting elicited further interest and, shortly thereafter, a member of the Class of 1950 called to say that she had arranged a meeting to take place at the Garden State Hospital, Marlton, New Jersey and invited the Committee to attend.

Members of the Satellite Committee and the President, Florence Roche, then met with the group which assembled at the Garden State Hospital, and were pleased at their enthusiasm. After much discussion, they expressed interest in setting up a new Alumni branch. It was decided that since the next parent Alumni Meeting would be held on **Tuesday, September 8, 1987**, the satellite group would schedule its first meeting 2 weeks later, at 7:00 P.M. on **Tuesday, September 22** and send invitations to the meeting using the Satellite Committee's mailing list.

We hope that anyone who is interested in learning more about her or his nurses' Alumni Association and would like to keep in touch will contact the Satellite Committee, Alumni Office, M-6 Jefferson Hall, 11th & Locust Streets, Philadelphia, PA 19107. Learn the benefits of being a member and help our Association grow!

Mabel C. Prevost

## Bequests

We have received a number of questions concerning bequests to the Nurses Alumni Association. If you are thinking about such a bequest, we would suggest the following *sample* paragraph for your consideration:

I give to the Nurses Alumni Association of the School of Nursing, Diploma Program, College of Allied Health Sciences, Thomas Jefferson University, located in Philadelphia, Pennsylvania, or its successors, the sum of \_\_\_\_\_ dollars (or identify the property, such as stock, or indicate a percentage of the estate, if appropriate), to be used for its general purposes.

This suggested clause is exclusively for the information of our alumni and friends. You should, of course, consult your own attorney as to the applicability of any item to your own situation.

## Class of 1916

**Frances Butler Pangburn**, 39 South 4th Street, Lewisburg, PA 17837. I had a very good winter with my daughter in New Jersey. The first of May I went home to Lewisburg. Sorry I could not attend the luncheon. The honor you gave me last year for my 70th anniversary was quite overwhelming. It was a day that I won't soon forget. Thanks again to all.

**Bonnie F.J. Browning**, 2531 S.W. Spring Garden, Portland, OR 97219. I am well and happy living here in the beautiful Great North West. This is my 95th year.

## Class of 1921

**Verna M. Keller Roberts**, 11½ Main Street, Drifton, PA 18221. January 20th 1987 I was 88 years old. Thanks for the 1986 picture you sent to me.

## Class of 1927

**Filomena Tiracchia Doherty**, 36 Regent Circle, Bricktown, NJ 08723. I'm growing old more or less gracefully. I keep busy growing roses.

**Martha E. Riland**, Logan Square East, #802, 2 Franklin Town Blvd., Philadelphia, PA 19103. We, the class of 1927 have made our 60th anniversary. My best wishes to all the anniversary classes.

**Margaret A. Carey**, P.O. Box 974, Poulsboro, WA 98370. I have had many medical problems the end of 1986 and the beginning of 1987. I can't believe this was our 60th anniversary, where does the time go! Best wishes to all.

**Myrtle Stickler Clough-Lee** (Robert), 301 McMechen Street, Baltimore, MD 21217. In September 1986 we attended an Elderhostel Session at Santa Fe, NM. We are very enthusiastic about Elder hostel courses.

## Class of 1928

**S. Elizabeth Neely Joy**, 786 Hope Street, Mountain View, CA 94040. I spent two months in Pennsylvania. Sorry I couldn't get to Philadelphia.

**Grace Breunig Meikle**, 9 West Street, Galeton, PA 16922. I live alone, but spend time in Florida with my son and family, and in New Hampshire with my daughter and her husband.

**Margaret E. Martin Lauchle**, 5909 Grand Avenue, Downers Grove, IL 60516. I'm having a better year so far, than 1986! Gall bladder surgery in March following acute pancreatitis, and a lens transplant in August pretty well kept me at home in 1986. Early in 1987 I spent two weeks in Florida, and felt fine on my return home. Looking forward to attending the 65th reunion of my high school class in Williamsport, PA this year. Best wishes.

**Mary Stauffer Malick**, R.D. #2, Box 372, Sunbury, PA 17801. My husband died April 14, 1987, just one month short of our 55th wedding anniversary. I am living in my own home and active in church, D.A.R. and senior center activities. I keep in touch with Grace Ellis Nauman and Laura Carleton Short, class of '28. My niece is Mary Ann Stauffer, class of 1954.

## Class of 1929

**Hazel Besecker Beach** (Justice H.), 750-C Menno Village, Chambersburg, PA 17201. This is a nice retirement village. I met another "Jeff" nurse who lives here, Zelda Mencer, class of 1929.

**Ann Williams Candler**, 2218 Anniels Drive, Dallas, TX 75211. I had a very nice 80th birthday on March 1st, 1987.

**Joyce Frantz**, 17 Maple Place, Hicksville, NY 11801. I became an ordained minister in 1974. I aim to heal the mind and help find a way of life that is satisfactory to the individuals who are searching.

## Class of 1930

**Hazel V. Oberdorf**, 139 North 2nd Street, Lewisburg, PA 17837. Best wishes to all. I enjoy the Alumni Bulletin, my thanks to the publication committee. Love to all.

**Virginia Miller Bruner** (Ed. C.), P.O. Box 458, Alamo, TX 78516. We have had a pleasant time traveling and seeing the birds, rabbits, bear and deer in Western Pennsylvania State Forest Park this summer. We will return to Texas in the fall. I hope to get to the 1990 Alumni Luncheon.

## Class of 1931

**Mary Taylor Lawley** (William B.), Rt. 1, Box 736, Lacombe, LA 70445. Nothing new. Bill and I are still enjoying life in the slow lane. Always glad to hear from our friends and family and to see them when we can.

**Mary R. Crowe Murtha** (Joseph), 25 Grandview Avenue, Pleasantville, NY 10570. Nothing new this year. I am active and in good health, and enjoying the life of a "senior citizen."

**Emma M. Bahner**, Ridgecrest Apartment 617, 3720 Knollridge Road, Salem, VA 24153. I'm enjoying the Richfield Community in Salem, VA. Best wishes to all the alumni members.

**Mildred Schoch McGee**, 4114 Voorne Street, Sarasota, FL 33580. I have been living in Sarasota, FL for the past 3 years. Visited Edith Hoover Frizell, we are both suffering with arthritis. I enjoy the climate and bridge, and best of all, God's gift of being alive.

**Marion R. Horner Brady** (Ellwood C.), 807 Goucher Street, C-108, Johnstown, PA 15905. WE are celebrating our 50th anniversary in August.

**Marie Hosage DeStefano**, 78 South Welles Street, Wilkes-Barre, PA 18702. Need I say I miss living in New Jersey.

**Virginia Emmert Leo**, 1749 Edgewood Hill Circle, Apt. 101, Hagerstown, MD 21740. Each year I keep hoping I'll be able to make it to the alumni luncheon, but it seems that week end is always a busy one, so I'll just say "Hello" to all my classmates. I'll never forget those wonderful years at Jefferson.

**Evelyn Reeser Arnold** (Walter), 23287 Blue Water Circle 502-A, Boca Raton, FL 33433. We finally have settled in a lovely life care retirement center called Edgewater Estates, and are very contented and busy attending many activities every day. Both of us are very healthy for our ages. I can use my nursing experience as a volunteer to help others who need it.

**Mildred English Hively** (J. Paul H.), 10824 Caron Drive, Sun City, AZ 85351. I am still traveling. I belong to the Travelers Century Club having visited 107 countries and islands, and if I am able will go to China this year.

**Blanche Ford**, Box 13, Periwinkle Trailer Park, 1119 Periwinkle Way, Sanibel, FL 33957. I'm still very active in church and shell club work and I enjoy it very much.

**Helen Walp Hubbard**, 126 Montgomery Street, 1-C, Highland Park, NJ 08904. I'm so sorry Betty Youngblood and I were not able to greet you at our 55th anniversary in 1986. Time brings about many changes. My best wishes to you and yours.

**Agnes M. Kevel Henry**, 1933 Center Street, Ashland, PA 17921. March 26th 1987 I moved to live with my sister at the above address.

## Class of 1932

**Mildred V. Garman Jeffers** (Arthur W.), 306 West 19th Street, Ship Bottom, NJ 08008. Everything is going well. I'm glad this winter is over. We have been very fortunate. Looking forward to the luncheon on May 2nd. Best wishes to all my classmates.

**Dorothy Bates Young**, 2714 Broad Street, Easton, PA 18042. I retired in 1972 after 20 years as a School Nurse (B.S. Kutztown University). I'm widowed for 6 years, have 5 grandchildren (one just finished medical school in Charleston, SC) and 1 great grandchild. I'm doing OK for an old gal of 77 years.

**Erma Coup Painter**, Pine Street, Box 1544, Milton, PA R.D. #3 17847. My kindest regards to my classmates and Jefferson friends. I am active in church and hospital activities, and in good health. I am so happy for my many blessings.

**Adeline Roth Miller** (Benjamin), 6704 Glen Avenue, Glenn Dale, MD 20769. As the years fly by, it is great having contact with good friends. Plus, the acknowledgement of our renowned nursing school education becomes more meaningful every year. I'm eager to participate during the 55th anniversary year of our class.

**Norma Sickler Bond**, 10 Beaver Lane, Easton, PA 18042. I am recovering from cataract surgery. There surely is a great advancement in the treatment of cataracts.

**Emma H. Phoebe Kelly** (Warren), 1110 Burmont Road, Drexel Hill, PA 19026. Nothing new. I'm still breathing, and enjoying my home in Maryland on the Manokin River. Looking forward to our 55th reunion.

**Marie Scherer Maxwell**, 440 West River Drive, Pennsauken, NJ 08110. I'm still enjoying retirement. I took 2 very interesting trips this year. Haley Comet trip to Brazil, and a trip to Australia and New Zealand. I do volunteer work to keep me busy.

#### Class of 1933

**Marion Pollitt Carey** (James T.), 2513 Kings Drive, Lewes, DE 19958. Health problems have started as of the first of the year. I enjoy reading the Alumni Bulletin. A warm hello to my classmates.

**Martha M. Long Garver** (Charles K.), 228 North Narberth Avenue, Narberth, PA 19072. All seems well with us except the years, they have traveled by too fast. Hello to all my classmates, and I hope you continue to keep well. Best wishes to everyone. "Mickey Garver."

**Anna M. Woodring Crofford** (James H.), 45 Sullivan Road, Wayne, PA 19087. I am going to request membership in Quarry Workers Union, I had surgery for kidney stones in August 1986, and gallbladder and stones in February. We are proud of Bonnies accomplishments at Bryn Mawr Rehabilitation Hospital, where she is a clinical nurse specialist in neurogerontology.

**Elizabeth Romich Cobb**, 12 High Street, Carbondale, PA 18407. I always appreciate hearing from classmates Key West Magin, Marion Pollitt Carey and Peg Coon Lecklitner at Christmas time. Peg Lecklitner deserves a lot of credit for the faithfulness she showed in taking care of her husband Dr. Lecklitner during such a prolonged illness. I always appreciate the Alumni Bulletin.

#### Class of 1934

**Betty Piersol**, 2601 Pennsylvania Avenue Apt. C-852, Philadelphia, PA 19130. Another year has "rolled" around. I continue to be active in alumni activities. I like to travel, and we plan to go to Ireland and Scotland in August of 1987.
