Mellon project

- What are our content strengths?
- What do scholars want to access?
- Encourage scholarly use of media archives

Scholarly use of video

- Access to raw materials
- Quick access to time-based media
- Annotations on segments of video
- Citing archival materials on the web
- Starting point for further research

Barriers to media archives for research

- Obsolete formats and playback technology
- Access costs
- Time constraints
- Copyright, privacy, and rights barriers
- Attitudes surrounding media as a reliable source
- Incomplete cataloguing and standard description methods

Digital solutions for scholars

- Rich metadata and explicit context
- Navigation and scanning of time-based media
- Quick access to ancillary and related items
- Ability to download, copy, reuse, share

Digital Asset Management + Finding Aids

Digital Asset Management + Finding Aids

newTelevisionWORKSHOP
COLLECTOR COLLECTION

NEW TELEVISION WORKSHOP COLLECTION I PROGRAM MATERIALS I

Program Materials, 1968 - 1993

Extent:
1,230 videocassettes
11.25 linear feet (9 boxes)

Organization and Arrangement:
Organized by programming series: I. [Rochefeller Artists-in-Television](#); II. [Artist's Showcase](#); III. [Music Image Workshop](#); IV. [Dance for Camera](#); V. [Frames of Reference](#); VI. [Visions](#); VII. [The CAT Fund](#); VIII. [Alive From Off Center](#); VIII. [Soundings](#); X. [Poetry Breaks](#); XI. [New Television](#); XII. [Special, Pilots, and Fills](#); XIII. [Unbroadcast/Unfinished Works](#).

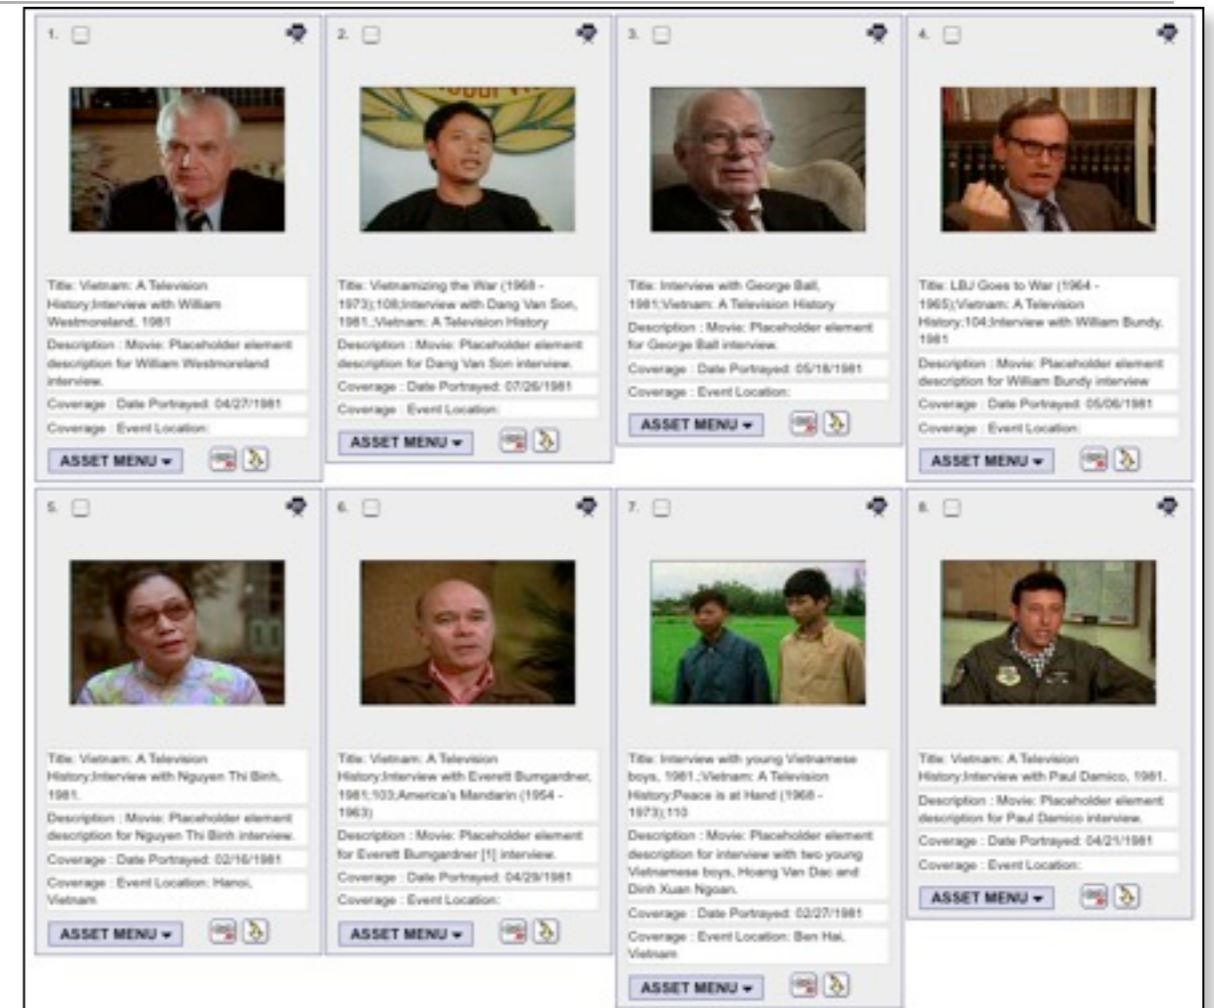

Provenance:
Program master videotapes relating to New Television Workshop programming were sent to the WGBH Archives following their original broadcast dates. Preservation masters and VHS screening tapes were created in 1998 and 1999. The majority of non-master tapes were archived by Susan Dowling ca. 1993 when the Workshop ceased production at WGBH. Photographs and other paper-based documentation relating to specific programs were found with the Subject Files and removed to the Program Materials files.

Scope:
Contains both paper-based documentation and moving image materials relating to specific programs produced or presented with the assistance of the New Television Workshop. These include programs affiliated with specific broadcast series, special presentations, and a handful of unfinished or unbroadcast works.

The moving image materials (which are mainly video) include program master tapes, preservation masters, screening copies, original footage, and promotional reels. Many of these works exist in various formats, including 1/2" open reel, 3/4", VHS, 1", 2", Betacam SP, and D3. The majority of these materials have been reformatted for preservation purposes and screening copies have been created. A handful of 16 mm and 35 mm film rolls exist, mostly containing mix elements. Documentation is incomplete and varies greatly from program to program. It includes logs, copies of contracts, planning documents, correspondence with artists, budgets, and memoranda. A few photographs exist of either the production in progress or stills used for promotional purposes. These include black-and-white and color slides, prints, and negatives.

I believe the characterization of Ronald Reagan as superficial is the leading myth.

He did focus on important things but he focused on them in enormous depth -- take Russia and--

-- before the Geneva Summit. I've never seen a President -- Nixon, Ford, Carter, absorb -- digest -- and master such a depth of information about the agenda and the other party, Gorbachev. Reagan was the master of that material and of that Summit.

Hoyt: What do you think the source of his appeal was to the American people?

McFarlane: I think the source of Ronald Reagan's appeal to Americans was his ability to inspire confidence, optimism, a sense that life is going to get better and that you can achieve great things if you work at it.
