Table of Contents

Summary Information about PGIs

Introduction of Polygenic Indexes

Add Health Study

Add Health Genetic Data and Genotyping

- Participant Inclusion Criteria

- SNP Inclusion Criteria

- Imputation and Linkage Disequilibrium

- Genetic Relatedness

Polygenic Index Construction

- LDPred

- Single Trait PGIs

- Multi Trait PGIs

- Principal Components

Phenotypes

Considerations for the Interpretation of PGIs

- Limitation to European Ancestry

- Confounding to GWAS and Weights

- Confounding to Causation

- Relevance of Confounds to Application

- Single vs Multi Trait PGIs

Identifying the Causal Effects of a PGI

Genetic effects can operate through environmental mechanisms

Source Description

Add Health is directed by Robert A. Hummer and funded by the National Institute on Aging cooperative agreements U01 AG071448 (Hummer) and U01AG071450 (Aiello and Hummer) at the University of North Carolina at Chapel Hill. Waves 1-V data are from the Add Health Program Project, grant P01 HD31921 (Harris) from Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), with cooperative funding from 23 other federal agencies and foundations. Add Health was designed by J. Richard Udry, Peter S. Bearman, and Kathleen Mullan Harris at the University of North Carolina at Chapel Hill (<http://www.cpc.unc.edu/addhealth>).
