Key words : grassland animal husbandry , growth way , sustainable development , ecology economy

Introduction The thesis looks at the intrinsic link between economic growth and sustainable development , revealing opportunities , challenges and difficulties facing grassland animal husbandry . ; Systematic analysis of the grassland ecological and economic issues and its basic cruxes ; Clarifying the ecological economic theories about the green marketing , the famous brand strategy , the industrialization of animal husbandry and the organic integration of agriculture and animal husbandry in typical grassland areas ; Probing into the management model of intensive grassland animal husbandry in typical steppe zone ; Proposing the Sustainable development strategy of ecological economic coordination of Grassland animal husbandry .

Methods Taking the Inner Mongolian Xilingol Prairie as representative , explores the intensive business model of prairie animal husbandry in Inner Mongolian typical prairie area ; and proposes the prairie animal husbandry sustainable development plan . Concrete research techniques : Consulting literature material ; Visiting the related department ; Typical survey and sampling inquiry ; The case analyzes , empirical analysis and the theoretical analysis .

Results The project research aimed at providing new ideas and a demonstration pattern for the development of modern intensive animal husbandry ; providing the theory instruction for establishing the high level prairie ecology economic equilibrium ; providing the scientific basis for to transforming the traditional animal husbandry management to modern ecology economy management ; The achievement application is advantageous in the promotion prairie pastoral area transforms by the tradition developmental strategy to the sustainable development , and causes the animal husbandry breakthrough bottleneck , deals with the challenge , steps onto the high production stably , high quality , the highly effective sustainable development track .

Conclutions First , the prairie ecology economic problem's origin , is the multi-stratification planes , the multi-factors (shallow layer factor , in-depth factor and basic factor) superimposes , the coupling result ; Second , the system factors (management system , the economic growth way , the animal husbandry tradition taxation way) are the bottleneck's basic cruxes of the prairie animal husbandry sustainable development ; Third , the prairie takes the ecological equilibrium very frail marginal land , farming and animal husbandry contradictory coordinated does not permit the neglect ; The prairie area not only has the problem of combining agriculture and animal husbandry , and should be high-level , cost-effective combination ; Fourth , the modern intensification sustainable animal husbandry is the prairie animal husbandry sustainable development way that must be taken ; Fifth , prairie animal husbandry sustainable development and tactic pattern .
