Political Announcement

TO THE VOTERS OF ROWAN COUNTY:

I respectfully take this opportunity and means to announce to the voters of Rowan County that I am a candidate for Sheriff, subject to the action of the Democratic primary, Saturday, August 2. In announcing for this office, I realize the importance and the grave responsibilities that it incurs. I am well aware of the fact that the Sheriff's office is the chief executive branch of government within the county and I am sure that every voter needs to consider carefully in making his selection for this important office. If nominated and elected as your Sheriff, I intend to carry out the duties of the office as they are with all the citizens of the county in a fair and just manner. It is my intention to make you a courteous and fair-minded public official, and I feel that I am qualified to conduct the affairs of the county and of its citizens, insofar as the duties of the Sheriff's office, in an efficient and commendable manner.

I am thirty-eight years of age. I was born and reared on a farm in Rowan County and know that I am well aware of the problems of the farmers of this county. I have always been a resident of Rowan County and am happy to say that I know most of you people in the public schools of this county. My family consists of some of the pioneer citizens of Rowan County. This is the first time I have ever sought public office. I have, however, been privileged at times in the past to serve the public and I am sure that I have always attempted to deal fairly with all the people and to secure for the citizens of this county wherever there was an available opportunity.

Between now and the August primary I intend to visit each section of the county several times. I want to see and talk with each of you personally.

I am running for the office I want to say to the voters that I have no personal obligations or promise to fulfill. If I am honored by your voting me for this important position for the next four years, I want to make the best possible public official for all the people.

Your consideration of my ability to make you a conscientious and qualified Sheriff will be most deeply appreciated.

Respectfully Submitted, BILL CARTER

Sheriff's Sale of Real Estate

By virtue of Execution No. 984, issued from the Clerk's office of the Rowan Circuit Court, in favor of Foster Thornburgh Hardware Company vs. Bessie Myrtle Caudill, et al., in the amount of \$181.72, with interest from February 4, 1936, and \$700.00 cost of the action, and Execution No. 993, issued from the Clerk's office of the Rowan Circuit Court, in favor of the Standard Sanitary Manufacturing Company vs. Bessie Myrtle Caudill, et al., in the amount of \$323.06, with interest from September 17, 1935, and \$15.00 cost of the action, and Execution No. 1041 issued from the Clerk's office of the Rowan Circuit Court in favor of the Belknap Hardware Company vs. Bessie Myrtle Caudill, et al., for the sum of \$291.06, with interest from August 1, 1936, and \$24.10 cost of the action, and Execution No. 985, issued from the Clerk's office of the Rowan Circuit Court, in favor of Munn Bros. vs. Bessie Myrtle Caudill, et al., in the amount of \$72.46, and with interest from August 16, 1936, and \$8.80 cost of the action, and Execution No. 986, issued from the Clerk's office of the Rowan Circuit Court, in favor of H. T. Hogge vs. Bessie Myrtle Caudill, et al., in the amount of \$208.00, with interest from July 6, 1935, and \$39.05 cost of said action, said executions having been levied upon the land hereinafter described, on the 1st day of June, 1941, between the hours of 1:00 o'clock p. m. and 2:00 o'clock p. m., at the front door of the Court-house in Morehead, Rowan County, Kentucky, expose at public sale, to the highest and best bidder, the following described property:

"A certain tract or parcel of land lying and being in Rowan County, Kentucky, on the Mitchell Trail Highway about one fourth mile east of the City of Morehead, Kentucky, and consisting of approximately three (3) acres."

Or as much thereof as may be necessary to satisfy the defendant's debts, interest and costs, and the homestead exemption right of the defendant, Bessie Myrtle Caudill.

McBRAUER, Sheriff of Rowan County

BOOK NOTES

By SITH M. CAIN Assistant Librarian, MSTC

Social Science Books Acquired By Our College Library Recently (Continued)

We will continue our discussion in this article on the Social Science books, that have been recently acquired by our college library. They are as follows:

1. Ybarra, R. T. (America Faces South) Dodd, Mead Publishing Company, \$2.00. The author's father was a Venezuelan and his mother was a New Englander. The author himself has spoken both Spanish and English fluently from early childhood; so he is psychologically and culturally equipped to discuss with authority such ticklish questions as: which Latin American countries like or dislike us and why, the truth about Hitler's Nazi penetration in South America, popular American misconceptions of the general run of South American governments, the Panama Canal as a vital link in our intensive system, and many other important questions.

2. Laaki, Harold J. (The American Presidency) Harper Publishing Company, \$2.50.

The author is the professor of Political Science in the University of London. (The American Presidency) is informal, alive, stimulating, and to anyone conversed with American ways, it will evoke a great deal of the fascination of our history.

3. Brooke, Iris. (English Costume from the 14th Through the 19th Century) The MacMillan Publishing Company, \$3.95. Here in one volume have been brought together Miss Brooke's fine charming and informative books on English costume from the 14th through the 19th century. It is one of special value as a picture of the changing ways in England, enlivened by entertaining notes on social habits and customs of the times.

New Books On Democracy Acquired By Our College Library (Continued)

Some of the new books recently acquired by our college library on the subject of democracy will be discussed in this week's article. They are as follows:

1. Laaki, Harold J. (Democracy in Crisis) University of North Carolina Press, \$1.50.

"The failure of social justice in the western world under democracy and capitalism inevitably brings threats of serious social conflict, of bloody revolution, and of complete chaos or dictatorship. Can democracy reform and purge itself without revolution? Can revolution be accomplished without bloodshed? Are there any signs that the owners of wealth will ever see and meet the needs of the time before farmers and workers turn the corner toward armed revolution and possible dictatorship?"

Mr. Laaki attempts to answer these questions, and weighs the chances for recovery, for more successful democracy, and for a greater measure of social justice.

2. Benes, Edward. (Democracy Today And Tomorrow) MacMillan Publishing Company, \$3.00. Dr. Benes is the former president of Czechoslovakia. An exile in America as the result of the Munich Pact, Dr. Benes recently delivered at the University of Chicago a series of stirring lectures on the history and future of democracy. Now in this book he states with exceptional clarity and objectively the case for a democratic philosophy of government and for the institutions common to his fatherland and ours. If a final chapter he predicts the eventual victory of democracy. Coming from a statesman of high intellectual calibre and long experience, this fine restatement of the democratic credo carries unusual weight. It is an inspiring document.

Neutrality Patrol Presents Problems Confusing To Many

Points Outlined Here May Clear Up Confusion

Since the President has announced that our Navy is to extend the neutrality patrol further out into the Atlantic, there has been considerable confusion concerning the effectiveness of this step as a protection of the Atlantic lifeline and its relationship to convoying. This confusion may perhaps be loosened by outlining some general points on the patrol system.

This system may be regarded as covering roughly that part of the Atlantic sea lanes where "ocean convoys" have been in operation. It will be effective primarily against surface raiders, which may be discovered and followed by American warships, able to report their location in open code for British as well as American forces. In such circumstances, any surface raider which is found in

liable to be tracked down and sunk by the British Navy. Hence it is expected that the patrol system will provide a valuable deterrent against raider operations.

Against submarines or aircraft it cannot be equally effective, in view of the speed of aircraft and the ability of submarines to submerge and escape. Its usefulness against submarines appears to lie principally in providing information as to their whereabouts on the sea lanes.

The main contributions of the patrol system to the safety of British convoys appear to be two. First, it will reduce the likelihood of surface attacks on ocean convoys; second, it will relieve the area of the burden of patrolling the sea lanes the patrol covers, thereby releasing many British units for convoy protection.

The patrol system, as at present constituted, cannot be regarded as an effective substitute for convoying. In the area where most ships are sunk, the approaches to the British Isles, it can contribute little to their protection. It seems clear that if the patrol system is to be an adequate means of guarding the Atlantic lifeline, it must be developed considerably beyond its

present form. Mounting ship losses and the growing threat of a German drive to Morocco and Dakar indicate that this development is necessary now.

The German official spokesman has just made a threat to the United States which is unparalleled in its far-reaching implications. Referring to the President's statement that American warships could be sent as far as may be necessary to protect this hemisphere, he declared that they would be torpedoed if they entered the "war zone" which Germany has marked on the map.

This threat denies the use of the high seas to American warships in more than half the North Atlantic area between Canada and the British Isles, in an area reaching more than 500 miles inside the Western Hemisphere and within three miles of Greenland, now a temporary American protectorate. It is entirely without justification by either international law or historic precedent, and goes far beyond any threats made to us by Germany in 1917.

The principle of protective jurisdiction, upon which the neutrality zone set up in the Declaration of Panama and the present extension of this zone by patrolling the sea lanes are based, has long been recognized in international law. For many purposes, such as protection of fisheries, prevention of smuggling, enforcement of neutrality and protection of a nation's laws and security, it has been recognized that national jurisdiction may extend over waters adjacent to the customary three mile limit. Such recognition was accorded by the Institute of Droit International, by the Committee of Experts for the Progressive Codification of International Law of the League of Nations, and by numerous bodies in the Americas.

In strong contrast has been the condemnation of international law of the unrestricted submarine warfare Germany is now waging on merchant shipping. The United States, Great Britain, France, Italy and Japan agreed that a "submarine may not sink or render incapable of navigation a merchant vessel without having first placed passengers, crew and ship's papers in a place of safety" in the London Naval Treaty of 1930. Hitler himself agreed to these provisions in the Anglo-German Treaty of 1935.

This contract indicates on whose side law and right will be if a U. S. Boat should attack one of our patrolling warships.

Agriculture Tips

By H. C. HAGGAN
Morehead State College

The war in Europe has created a demand for an increase in tomato production in this country. Kentucky is sharing in this increase and farmers over the state have indicated that they will produce something like 5,000 acres. The British desire the tomato because of the high vitamin "C" content and have placed orders for 15,000,000 cases. The tonnage will be greater in price than ever received before since the last war. Drew Pearson cited in his column "The Washington-Merry-Go-Round" recently that the British desire food of high vitamin content and weight. An exception because the product is packed in the juice which is high in vitamin.

The farmers of eastern Kentucky have recently organized co-operatives for the growing of vegetables to meet the defense demand. Many have asked the college to give a few suggestions on growing and care of tomatoes. This article will deal with only one phase of tomato growth. Tomatoes may be affected by

several diseases and insect pests. It is not necessary that the farmer know all these and identify same. But a few are easily identified. If the leaves are being punched by little insects that are black in color and leave pin hole effects in the leaf, it is probably the flea beetle. Often tobacco worms and potato beetles chew the leaves. Then too, a coloring of the leaf may be due to rust or blight of some kind. It is not necessary to identify these. The remedy, if handled in time, is easily mixed and applied.

The tomato is sprayed with a mixture of a 4-4-50 mixture of bordeaux to which is added 1-2 pounds of lead arsenate. The 4-4-50 means—4 pounds of copper sulphate, four pounds of hydrated lime, and fifty gallons of water. It can be made at home or purchased at any business house selling spray materials. If mixed at home, use a barrel in which to do the mixing. The bordeaux will help control the blight and at the same time assist in the control of the flea beetles. The lead arsenate added to the bordeaux and sprayed on at the same time controls the chewing insects. The lead arsenate is under control omit the lead arsenate and continue to

use the bordeaux mixture. Blossom drop often hits tomatoes with high temperature and accompanied with a high humidity. There is little that can be done about this.

Registrar Lists MC Graduates Earning Degrees In June

One Of Longest Classes To Graduate From Morehead

Miss Mary Page Milton, registrar, has released the list of names of students who have applied for degrees in June and in August. The June students graduating class is expected to be one of the largest in the history of the college, but the entire number of persons who will graduate with the June group is still incomplete, though failure of the Seniors to apply for degrees at the Registrar's office.

The June applicants, who will receive degree of Bachelor of Arts or Bachelor of Science in Education, are registered as follows: Christine Howerton Adams, Ar-

vel Arnett, Clifton Basye, Bernice Byrd, Ralph Cassity, Pauline Cornwell, Bernice McClain Craft, Burgess Ray Davis, Wanda Frazier, Roxie Glass, Emory Lee, Green, William Edward Hogge, John Holbrook, Ralph Holbrook, Gilbert Laycock, Byron Lewis, Edna Manning, Carol Patrick, Frances Peratt, James Poppleton, Bruce Rawlings, Henry Schuffelbarker,

Victor Stamper, Jewell Stephenson, Verner Tackett, Crawford Venn, Edmund Weichers, Bernard Weinfurter, Catherine Wellman, Tom Williamson, Sallie Williams Summers, Mary Taylor, Beverly Varney, Samuel Johnson, Bessie Mae Birchfield, Nellie G. Piggman, Mary Clay Rose.

Fifth Division To March 500 Miles To Tenn. 'War-Games'

Two Columns Plan Trek From Fort Custer, Mich., To Tennessee Maneuvers

Modern warfare as understood by the developments overseas, has been turned into a high-speed business wherein victory comes only in the army which moves fastest and strikes hardest.

The planning of this march has required weeks of study and advance preparation by staff officers, all of whom realize that to actual warfare they might have to plan a march of comparable magnitude in a few hours' notice.

The division will move in two columns along southward routes which are roughly parallel and will take it through Indiana and Kentucky enroute to Tennessee.

TVA Dam At Gilbertsville, Ky., Is Largest Federal Project East Of The Mississippi

KENTUCKY DAM FROM THE AIR This aerial view of the Tennessee Valley Authority's Kentucky Dam at Gilbertsville, Ky., shows the massive concrete structure rising from the river. The dam is the largest Federal project east of the Mississippi.

The dam is being built on a bed of solid limestone. Approximately 500,000 yards of overburden will be removed so that the concrete structure can be built directly on the rock.

The dam will be 850 feet in length, 160 feet in height, about 160 feet in width at the base and about 50 at the top. Across the top will be a railroad and perhaps a highway.

UNTIL LAST NOVEMBER the area where this damline is working was a part of the Tennessee river led at the TVA's Kentucky Dam site. One of the greatest flood dams ever erected in man construction encloses this area, which covers 40 acres. This great damline removes six cubic yards of material at a time.

Sportsmen-- (Continued from Page 1.)

Addressing the assemblage, Watersfield said that "the Director of the Game and Fish Commission must have the help and co-operation of the sportsmen regardless of who the director at Frankfort might be."

He said that the State was hampered in enforcement of game and fish laws because it now has funds for only forty wardens, each of whom must handle three counties.

He added, however, that three Federal agencies, the Fish and Wildlife Service, the Division of Forestry and the Soil Conservation unit were working in Kentucky for the conservation of game and fish.

Dr. Ira N. Gabrielson, Director of Fish and Wildlife Service, in Washington, D. C., said that feeding ground and restocking were of equal importance in the conservation of migratory water fowl and fish.

The population of migratory waterfowl, he said, is beginning to show "a substantial increase."

The 1942 convention was voted to Frankfort with no other bid being submitted. Either Paduch or Owensboro or both are expected to bid next year.

Three "request" resolutions were adopted by the delegates: 1. For a substantial increase in the appropriation for the State Division of Forestry...

2. For the consideration of recreational possibilities in all matters of water-use in Kentucky...

3. For the use of the entire funds available for Federal Aid to Wildlife Projects which came under the provisions of the Pittman-Robertson Act.

Five matters were referred to the legislative committee for disposal: 1. A spawning season close on the taking of frogs...

2. A closed season on fishing in navigable streams...

3. Restriction on the possession of ferrets...

4. More adequate protection for squirrels...

5. A provision that the men in the United States Armed services stationed in Kentucky be allowed to fish and hunt with resident licenses.

Three endorsement resolutions were passed: 1. For the pure water bills pending in Congress...

2. For the Buck bill also pending in Congress, which would set up Federal aid for fish restoration...

3. For the co-operation of Governor Keen Johnson and the

agencies in the state government with the league.

"This is the best and most constructive convention Kentucky Sportsmen have ever had for the conservation and development of the natural resources," all delegates expressed in one way or another as they were preparing to leave as convention headquarters for their respective homes.

And in bidding farewell to each other there was a common expression of co-operation between League and the Kentucky Division of Game and Fish organizations and to stimulate more interest in the convention program during the next twelve months.

The list of forty directors for the state will not be complete for several weeks.

Delegates to the convention represented the 15,000 members of 123 clubs in ninety-seven of Kentucky's 120 counties. It was resolved that the next meeting of the convention of the League is assembled in Frankfort next May the remaining twenty-three counties will have Game and Fish organizations within their boundaries and the entire state will be organized behind the program of the Division of Game and Fish.

Cast Of Comic Operetta

The nine Morehead College students whose pictures appear above are the principal singer-actors in the comic-operetta, *The Mikado*, to be produced at the College Auditorium on Thursday night, April 22, at 7:30 p. m. The cast as shown above, and in order, follows: Lavina Waters, Kitish; Horace Owens, Nanki-Poo; Mary Turley Rawlings, Pitti-Sing; Richard Coffett, Pish-Tush; Louise Antonini, Yum-Yum; Keith Huffman, Pooh-Bah; Ollie M. Lyon, Mikado; Marian Louise Oppenheimer, Peep-Bo; and Billie Black, Ko-Ko.

The production is directed by Lewis Henry Horton, head of the Department of Music, and is the most pretentious as well as the most humorous musical production as yet attempted on the Morehead campus. The patronage of the public is solicited.

Political Announcement

I take this method of formally announcing as a candidate for nomination on the Democratic ticket to the office of County Judge of Rowan County.

It is my pleasure to know a majority of the voters of the county, having lived here all my life. I have been honored by the voters of this county, having been elected to the offices of both Sheriff and County Judge, and my experience as such has been very valuable to me.

While I was County Judge I was very much interested in good roads. The first modern road that was ever built in Rowan County was during my term of office as County Judge. This modern road was built from Morehead to Farmers, and Rowan County paid approximately the sum of \$19,000 toward the cost of the construction of this road. On assuming my duties of County Judge, we found that the County's general road system had run down, and several new roads were built and reconstructed in communities that had never before had roads. I also found that the County owed approximately \$14,000 when I assumed office, and with the help of the magistrates and County Attorney, when our four year term expired the County did not owe anything. Every dollar of indebtedness had been paid, and we left in the County Treasury \$3,300.00.

I am very interested in good roads and promise, if elected, to improve the roads in every part of the county. I am not unmindful of the magistrates and County Attorney, when our four year term expired the County did not owe anything. Every dollar of indebtedness had been paid, and we left in the County Treasury \$3,300.00.

ARTHUR HOGGE

Morehead High To Hold Commencement Exercises, May 22

Morehead High School will graduate thirty-three seniors, one of the largest classes to receive diplomas from that institution, at the Commencement Exercises to be held in the High School Auditorium, May 22, at 7:30 p. m.

The program for the exercises is as follows:

Professional Seniors
Song Glee Club
Valedictory Address Fyrl Black
Salutatory Address Eugene Martin

Trombone Solo Glenn Gilkinson
Address Supt. Roy E. Cornette
Song Glee Club
Presentation of School Awards
Presentation of Diplomas Bill Layne, Chmn., School Board

Recessional Seniors
The following seniors will receive diplomas: Louise Adams, Hobart Barbour, Jr., Fyrl Black, Margaret Carter, Theodore Carter, Wanda Conner, Bonnie Cooper, Lorene Crosthwaite, Bessie E. Christian, Ruth Egan, Hildreth E. Addison, Fouch, Geneva Gee, George Hill, Bobby Holbrook, Alvin Hunt, Ruby Johnson, Tesla Johnson, Dovie Kidd, Mary Lewis, Odessa Luster, Eugene Martin, Mildred McClurg, Adrain McKinney, Gwendolyn McKinney, Junior Mutters, Homer Pettit, Billy Turner, Lavant Utterback, Maude Ward, Meredith Wallen, Warren Flannery, Jr., and Elwood Warren.

MSTC Eagles To Meet Marshall's "Herd" Saturday

Morehead College's Eagle Nine will meet Marshall's Thundering Herd this Saturday with more than an even chance of beating them. At least that is the opinion of Morehead's Coach, Ellis Johnson who pointed to last Saturday's 41-0 setback and stated: "If it hadn't been for poor fielding on our part Marshall wouldn't have scored a run."

It will be the final game of the season for the Eagles who have registered six wins against one loss to date.

"We consider this a good record in light of the fact that we haven't had a nine at Morehead in several years," Johnson stated. "Next year," the Morehead mentor opined, "Morehead will step up into a heavier schedule with leading college teams from this section of the country."

This Saturday's game is scheduled to get underway at (J.S. Stadium here at 2:00 p. m., C.S.T.)

Class Day And Open House At Breekinridge

The Senior Class of the Breekinridge Training School will hold its Class Day exercises in the Training School Auditorium on Wednesday afternoon, May 20th, at one-thirty. The program will be in charge of the Senior Class, and following their program all the grades in the school will hold an open house for visiting parents and friends. At this time much of the work done by each grade during the year will be on display in the various home rooms and it is hoped that many parents will avail themselves of this opportunity to visit freely throughout the school.

From three to five o'clock light refreshments will be served in the Home Economics department on the third floor of the Training School.

All parents and friends of the Training School are urged to be present on this day not only to attend the Class Day program but to see some of the work of the school for the past year.

FARM NEWS

Members of homemakers' clubs in Jefferson County attended demonstrations in making butter and cheese.

Sales of potato seed in Mont-gomery County were thirty-five percent larger than in 1940.

Madison County farmers planted approximately 4,000 acres of hybrid corn, compared to 1,800 acres last year.

GOLDE'S DEPARTMENT STORE

Food Production--

(Continued from Page 1.)

buy butter whenever there is a tendency for it to drop below an equivalent of thirty-one cents for ninety-two score butter in Chicago, until June 30, 1943. This market support should be in no way prevent butter from exceeding this figure. Farmers and those giving advice to farmers should not be confused by the fact that the market support is given in terms of Chicago butter. Actually the price of butter determines a large measure the value of milk sold by the farmer which is manufactured into other concentrated foods such as dried milk, evaporated milk, cheese, etc., which are actually more in demand for export than butter.

Release Of Stored Corn
"The Secretary also proposes to release stored corn which is expected to modify the feed-butter-fat ratio, thus offering more feed in the form of lower feed costs. There exists some likelihood, however, that this may not directly benefit Kentucky dairy producers because the state is a corn deficient area. Undoubtedly, corn at a figure which may actually constitute a loss to the government may affect other feed prices by thereby affecting the feed-butter-fat ratio.

"Farmers should be advised to take advantage of the seasonal increase in production and to accomplish the required six to eight percent increase in production through better feeding and management practices rather than through expenditures for cows and equipment. The tremendous seasonal increase in production when Kentucky cows go on range is sufficient evidence that improved feeding practices can bring about the continuance of this heavy production for a prolonged period. Special emphasis should be placed on:

1. Care and more effective utilization of pastures.
2. Earlier cutting and more careful curing of hay.
3. The feeding of grain to the better cows even though the pastures are good.
4. Supplement the pasture with grain rations containing more protein as the season progresses and the pastures become dry.
5. In case the season is especially dry, still more reliance must be placed on grain supplements.

"Dairying suddenly finds itself in an advantageous position. One must constantly keep the thought in mind, however, that a healthy nation is a strong nation, and that health is a reflection of good habits and especially is dependent on the national habit of using milk and its products in the farm home. Here is where our national health begins and nothing should be done to induce farmers to sell milk for cash which can and should be advantageously utilized at home. This thought is very important."

TELL 'EM YOU SAW IT IN
The Independent

Complete Close Out Of All Merchandise Left From Shady Rest Service Station

Just a few items left . . . but what prices . . . for instance 600 x 16 inner tubes 85c. They regularly sold for \$2.40 . . . Batts that sold for 50c and 15c. Lastic patching 12c. I have sold thousands of cans for 25c . . . Batteries that sold for \$9.95 now \$3.50. I am like the old man who had seven holes cut in his door and seven cats. When he said "Seat," he meant it. I am saying "Seat" to my merchandise and I mean it. Top dressing, polish, cleaner, valves and cores. A big battery charger going for a song. Many other items . . . the new Maytag Washers are worth coming and seeing. By the way, just repossessed a dandy this morning. It's not a Maytag but its in good shape, \$26.00 balance. Name your own terms. In leaving a place that I have been with for approximately ten years and have come in contact with most all of you, I want to cry for those who have paid me and cuss those who have not. I feel that after these years I owe something to my family. My presence at home may not be much. Neither is Lester Lambert's or Len Johnson's. But our families are due some consideration and for the first time in ten years I can go home at night and sit and listen to the wife gripe about something. I can get up and go to Sunday School without changing clothes in my car. If any of you guys or you gals need a washing machine, think of Woody and his Maytags over from the bus station in the little white building. Easy terms financed by our local bank . . . no finance company connected with it. Buy your own way on a quality product. Much obliged for all past business and if you owe me anything come up and tell me why you can't pay it. In the meantime buy her a Maytag.

Thanks A Million,
WOODY

The Woody Hinton Maytag Company

I fix them all, but you should have gotten a Maytag in the first place.

THIS WEEK IN DEFENSE

Major General Hersey, Selective Service Director, speaking in Lafayette, Indiana, said that misguided patriotism of employers was allowing many men to be drafted who are more useful in industry.

All of us should carefully consider where we are best fitted to serve, General Hersey said. It is certainly neither desirable or necessary that each man dedicate himself to a future in the armed forces.

Selective Service Headquarters directed immediate classification of the 10,000,000 remaining registrants in order to obtain complete

data on skilled workers and potential soldiers, and amended its regulations to permit induction of some of the registrants previously barred because of comparatively minor criminal records.

General Hersey proposed amendment of the Selective Service Act to Congress to allow those by age groups so that those selected are of an age that will permit them to serve effectively in the reserve forces for ten years, as now required. He said only eleven percent of the men induced before March 1 were from thirty-one to thirty-six years and the greatest number were from eighteen to twenty-two.

Defense Training President Roosevelt asked Congress for \$158,000,000 to train 3,000,000 additional defense workers, of which 268,000 would be trained in engineering, 10,000 in chemistry, physics, and production supervision, and 2,600,000 in teaching rural youths industrial skills.

1937 Packard, 1 1-2 Ton Pickup

MIDLAND TRAIL GARAGE MOREHEAD, KY.

partment announced the first two units—one of a larger number of "flying fortresses" had flown to Hawaii to strengthen the island defenses.

The Navy asked Congress to enact legislation permitting transfer of Reserve enlisted men as pilots. The President asked Congress for \$61,800,000 to expand the Civil Aeronautics Administration land field program from 250 to 399 projects.

The Army announced that it has selected the location of camp sites needed for "possible expansion of the Army" and is ready to start work on the new camps immediately if necessary.

The Army announced it will construct five new recreational camps in the South Atlantic States. WPA announced nearly 1,000 WPA library employees are assisting in the operation of libraries serving the Army.

The Navy commissioned the 35,000 ton battleship "Washington." The Navy announced it acquired 26 auxiliary vessels during April at a total cost of \$11,740,000.

The Department directed that men enlisting in the Naval Reserve be released from active duty after the emergency regulations of the length of their enlistments.

Ships Maritime Commission launched 53 new cargo ships and asked operators of American inter-coastal vessels for forty of their one hundred-eight ships for the 2,000,000-ton shipping pool for national defense and aid to Britain.

The Senate passed and returned to the House for concurrence in amendments a bill authorizing the President to take over foreign ships in United States ports.

Foreign Relations President Roosevelt, notified of voluntary French collaboration with Germany, issued a statement "it is inconceivable" the French people would collaborate with a power seeking "utter destruction of liberty, freedom and popular institutions everywhere."

The President told a press conference that Germany's proclamation of a combat area in the Red Sea presents a question of German ability to make a blockade effective there. He recalled the United States has fought two undeclared wars to maintain freedom of the seas—against Barbary pirates in the Mediterranean and against British, French and Spanish privateers in the West Indies.

Housing Defense Housing Coordinator Palmer announced contracts were awarded for 2,800 new defense housing units, bringing to a total 63,200 the number ordered. He

also reported completion of 325 units, making a total of nearly 10,000 now available.

"This Week in Defense" summarizes information on the important developments of the week made available by official sources through and including Friday.

Vacancies Exist In Unemployment, Old-Age Divisions

Glasgow Announces Competitive Examinations

J. P. Glasgow, supervisor of the state merit system committee, announced today that another series of state-wide, open competitive examinations for certain positions within the Unemployment Compensation Commission and the Old Age Assistance divisions would be established in the near future.

Glasgow explained that due to the present shortage of employment in private industry, especially with reference to such positions as machine operators and clerk stenographers, the present eligible list is being rapidly depleted and that it is desirable to augment the registration established by a previous examination.

Applications for participation in the examination will be accepted until midnight, May 24, Glasgow said. Application blanks may be obtained by writing the Merit System Supervisor, Division of Personnel, Frankfort, Kentucky, or from any office of the Kentucky Unemployment Commission at 1010 Lexington.

The examinations will be held simultaneously in Ashland, Bowling Green, Covington, Frankfort, Harlan, Hazard, Henderson, Hopkinsville, Lexington, Maysville, Midletown, Newport, Paducah, Pikeville, Somerset, and Winchester.

The positions for which examinations will be held, with the annual salary range for each are as follows:

Addressing Equipment operator \$1,080-\$1,320; Senior Addressing Equipment operator \$1,320-\$1,440; Duplicating Equipment operator \$1,200-\$1,440; Senior Duplicating Equipment \$1,440-\$1,740; Clerk-Stenographer \$1,200-\$1,440; Senior clerk-stenographer \$1,500-\$1,740.

Supervisor of Tabulating Equipment \$2,400-\$3,000; Junior field auditor \$1,500-\$1,860; Field auditor \$1,920-\$2,160; Field worker \$1,080-\$1,320; Senior field worker \$1,380-\$1,740; Departmental Health Nurse \$1,620-\$1,980.

What purpose? That someone might sit in the wisest judgment of these things ever given by any man. "It is vanity and vexation of spirit. Fear God and keep His commandments; for this is the whole duty of man."

"China Sunday" To Be Observed In Kentucky, May 25

Gov. Proclaims Special Day For China Relief Work

"China Sunday" proclaimed by Governor Keen Johnson for May 25, marks the combined appeal of the Kentucky and Federal Government for the \$0,000,000 aid for the \$0,000,000 refugees who have been driven into the interior of the country by armed aggression. In its campaign to raise \$5,000,000 between now and July 31, United States Relief seeks to supply food, shelter, medicine and rehabilitation to the one-ninth of the entire Chinese population made homeless.

Over ninety percent of China's pre-war industry has been immobilized, if not destroyed. Of her 121 universities and colleges, seventy-seven have been forced to leave their campuses to flee—sometimes 1,500 miles or more. Medical and surgical supplies, hospitals and doctors, are tragically scarce for the needs of this suffering race of 450,000,000 people in country as large as the whole United States and Eastern Canada.

Donations may be handled through local church committees or be sent to Mrs. E. J. Weeks, Beres, Kentucky, Field Representative for China Relief in Kentucky and the Southern States.

Because American money has more than ten-fold purchasing power there, China in a "bargain relief" Three cents a day will feed and shelter one Chinese for a day. One dollar will provide anesthetics for fifteen surgical cases. One social worker, recently returned from the East, says, "I don't think there has ever been any place in the world where even a little money could do the amazing amount of good it can do in China today."

Vetch Ranks High As Fertilizer

Vetch is one of the newer cover and green manure crops successfully tried in several Kentucky counties. W. S. Anderson of Bath county reports turning under vetch

and rye forty inches high. The job was performed with a tractor. Hugh Hurst, Letcher county farmer, says farmers prefer a combination of vetch and rye grass—prefer it two to one over crimson clover. In Ballard county, vetch sowed late last fall made a good spring growth and a good green manure crop, according to County Agent, S. C. Bohanan.

Pests destroyed in a Madison County contest included 2,323 mice, 971 rats, 308 moles, 192 sparrows and about one hundred crows. Four banks gave flags to winning clubs, and the Richmond Chamber of Commerce gave a watch to Jimmie Masters, tobacco champion.

NEWS AND FACTS . . . of Statowide Interest

They're Saying No!

Beer retailers are frequently asked to violate the law. But they're saying "No"—because they realize that a clean, law-abiding establishment is the best "insurance policy" their business can have.

That is why most beer retailers want to, and do, co-operate with the Kentucky brewing industry's self-regulation program. They want to be among the great majority of reputable retailers who know that good conduct is good business.

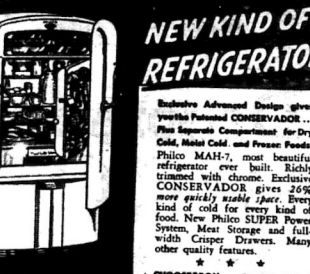

You can help us—by patronizing only the reputable places where beer is sold and by reporting to us any objectionable conditions you may observe.

Features include: 'Now this 1941 QUEEN SPEL' with further improvements, 'REGULAR PRICE DURING 1940—\$79.95', 'Now Sells For \$69.95', 'All during 1940 this big, oversize Speed Queen... This year, in spite of added refinements, the price is being reduced \$10.00.', 'In other words, you save \$10.00! This saving is possible because it has always been the Speed Queen factory's policy to pass on to the consumer the benefit of lower costs resulting from increased sales. This model was one of the best sellers during 1940.', 'Come in and see the biggest dollar-for-dollar value in America today!', 'McBrayer's Morehead's Complete Furniture Store', 'Features: OVERSIZE BOWL-SHAPED TUB for fast washings, DOUBLE WHEELS to keep water hot, ALL ALUMINUM SUPER DUTY WINGERS, SPEED DRAIN, FAMOUS ARC-CHUTE DRIVE TRANSMISSION, STEEL CHASSIS CONSTRUCTION for added strength and long life, TANGLE-FREE ALUMINUM CIGARATOR, ALL-WHITE PAINT.

Advertisement for a book 'THINK ON THESE THINGS' by Rev. B. H. Kazee. 'A little girl friend of mine said to me one day, "Would you like to ask you a question. The other day at school my teacher said: "The unspoken word never hurts." And I told her that I disagreed with her; that I believed that it was the unspoken word that often hurts most. What do you think of this? This gives me cause for serious reflection. Perhaps it will do the same for you. Incidentally, the little lady gave evidence of unmeaning profanity in one so young, and after reflection I agreed with her. Children have more need of more than of critics—Joseph Joubert. The Bible tells us that Solomon was the wisest man that ever lived. I never doubt the wisdom of anything. It has long outworn all its critics. Solomon knew every delight that this world can offer. He had all the wisdom necessary to make him outstanding in every phase of life and thought. He had wealth, from which he could command every delightful thing the world could offer. He was flattered and praised by all the world, even by the beautiful Queen of Sheba. And he declared that all the glowing reports of his glory were not hardly sufficient to describe it. He had every desire of the flesh satisfied. His appetites were sated by the most delicious foods and drinks known to the world. His lust was answered by the flatterer court of the most beautiful creatures living. His every command was obeyed to the letter, and with a pride of obedience known only to the servants and worshippers of one so great as Solomon. He was God's chosen example of a man who was permitted to know all the delights, powers and pleas-

Morehead Branch is outstanding in the United States.

The Rowan County Creative Art Project started as a result of the Educational Exhibit at the College Library two years ago and funds have been raised to supply paper, crayons, and paints for the children by means of white elephant parties.

AAUW in cooperation with the Rowan County PTA Council and the rural teachers of the County.

Mrs. W. T. Caudill is chairman of the Rowan County PTA Council, Mrs. W. H. Rice is Creative Art Chairman for the Morehead Branch, and Mrs. Naomi Clapp has supervised the art work carried out by the Rural Teachers.

St. Alban's Mission (Episcopal) Society, F. C. Lighthour, S. J. B. Mount Sterling, Thursday, May 22nd (Ascension Day): Holy Communion and Sermon at 11:00 A. M. Sunday, May 23rd (Ascension Day) after Ascension: Choral Communion and Sermon at 8:30 A. M.

Morehead Declaration Attends Institute On Wednesday of this week the local Christian Church was represented at the Annual Leadership Training Institute for Kentucky Christian Churches, held in Lexington by a group of Missionary Society members, headed by the Pastor. A large attendance enjoyed the program led by outstanding speakers. Luncheon was held in the Woodland Christian Church.

Dr. Dudley To Address Young People Next Sunday evening at 6:15. Dr. Fred Dudley of the College, will address the Young Peoples Guild of the Christian Church, on the subject, "Building a Christian Home." The first Sunday night in June the regular monthly super-meeting will be held during the 6:15 hour.

Interesting Sunday Evening Services Planned The second in a series of "lay-speakers" will be heard at the Christian Church next Sunday evening, when Mr. Harlan Powers, will occupy the pulpit at the seven-thirty service. Mr. Powers will speak on the subject: "What the Church Should Mean to the Community."

The first Sunday in June at seven-thirty the pastor will preach at the worship service, and in June eighth in the evening, the moving picture, "The Story of Rome" will be shown. On a later Sunday evening of June a group of children will present a missionary program.

Christian Sunday School Adds New Teachers A further step in the steady growth of the Sunday School of the Christian Church was taken recently when three new teachers were added to the various departments. Mrs. Fred Brandon has assumed the leadership of the Intermediate - Senior Girls class; Edwaid Yaus the Intermediate Boys; and Mrs. E. E. Blair the adult women's class.

The Sacrament of the Lord's Supper will be administered on Sunday morning, at 10:45, at the Methodist Church. All Christian friends, irrespective of Church membership, are invited to partake in this Sacrament with the Methodists. The choir, under the direction of Professor M. E. George, will sing the Communion Response. The subject of the Communion Meditation, by the Pastor, will be "A Belated Discovery." The public is cordially invited to this service.

Special Vesper Service On Sunday afternoon, at 5:00, the Vesper service at the Morehead Church will be conducted by students. The guest speaker will be Mr. Fred Pfisterer, of New York, Kentucky. Mr. Pfisterer is a former President of the Kentucky Methodist Student Movement and a popular student at Kentucky Wesleyan College. His subject for the Vesper message will be "He is Able." Mr. Edwin Case, President of the Wesleyan Foundation, will preside over the service, and the following officers of the Foundation will participate in the service: Miss Avis Prime, Mr. Ted Tite, Miss Johnny B. Miller, and Mr. Phil Bradley. Special music will be rendered by Mrs. Edna Case, the organ and by students. The church is invited.

Children's Exhibits An exhibit of Rowan County Children's Creative Art work is open to the public at the College Library this week and next. This exhibit is one which was mentioned second in a group of ten exhibits which were given honorable mention at the National Convention of the American Association of University Women in Cincinnati two weeks ago.

Laura Beaman, National Associate in Art stated that the Creative Art Project carried out by the

college may serve the district other than teaching in the class room. Many agricultural problems. A large number came to the office for information. The following are some of the questions asked and the answers given. Again, specimens of identification, photographs and personal visits made to homes in the community were problems were had.

"My apple trees are full of yellow growth, what is all that yellow I get rid of?" The yellow growths are the result of cedar rust which lives part time on the evergreen and then passes on to the trees. There is no known spray remedy. Pull off and burn as soon as they appear. Use sanitation methods wherever possible.

"My apple trees do not seem to be doing well, what could I do to stimulate them?" In making periodic visits to the homes borers were found making their way into the bark of the damaged trees. Clean away the affected parts with a small oil can filled with carbolic acid. Insert a small amount into each opening and fill the mouth of the openings with clay made moist. The carbon bisulphide gases from the strips of burlap and if the bark has been considerably damaged paint the trunk with the bark has been removed with water proofing compound that can be had from many spray dealers.

"Ants are all over my chrysanthemums, what can be done to clear the plants of them?" If there are no plants are full of aphids or plant lice. Spray the plants with nicotine sulphate one teaspoonful per gallon of water of old lace. I can't get the ants out of my soap dissolved in it. Usually one application is sufficient if done effectively.

"My roses are being eaten by insects, what can I do to protect them?" There are a large number of insects that may damage roses. Without discussing the insects most of these can be controlled by spraying with a lead arsenate three teaspoonful to the gallon of water. If you have powdered hebeleser, use this as it is less likely to burn the foliage. When using lead arsenate always dilute it five times as much as you would to help counteract the burning of the lead arsenate.

"Last year my grapes shriveled to the masses and the ripening period, what causes this and how can it be controlled?" This is Black Rot, a fungous disease. It is caused by a fungus which enters most of these can be controlled by spraying with a lead arsenate three teaspoonful to the gallon of water. If you have powdered hebeleser, use this as it is less likely to burn the foliage. When using lead arsenate always dilute it five times as much as you would to help counteract the burning of the lead arsenate.

Sealed bids, in duplicate, will be received at the office of the Postmaster, Morehead, Kentucky, until 2:00 o'clock p. m. (Central Standard Time, June 10, and then publicly opened, by furnishing the following supplies for delivery into the bins of the Post Office building, Morehead, Kentucky. Thirty (30) tons of bituminous run of mine coal, for the fiscal year, 1942.

Blank bids may be procured upon application at the Postmaster's office.

W. E. Crutcher, Postmaster

Crackerbarrel-- (Continued from Page 1.) suffering from head colds and sneezing. Investigation at this writing. "Gentlemen, don't anyone have any honor anymore?" It is rumored about that a large chain store is bickering with a restaurateur man here in town about a certain building that is under construction. The topic of local conversation: "Will 'Mike' or will he won't." Jim Rigby showed me through his house the other morning. To see him would think he slept on an iron bedstead with a shuck tick. Fact is Jim sleeps in a birdseye maple on a beautif' mattress. He has a scuttle hole where they can deliver his milk and go down stairs and get it in his shirt-tail without getting out of the house. He can have his meals cooked on a kerosene stove and eat in his rustic basement or he can sit upstairs with food from his electric range set on a table with a liver of old lace. I can't get the ants out of my soap dissolved in it. Usually one application is sufficient if done effectively.

"My roses are being eaten by insects, what can I do to protect them?" There are a large number of insects that may damage roses. Without discussing the insects most of these can be controlled by spraying with a lead arsenate three teaspoonful to the gallon of water. Morehead Branch is outstanding in the United States.

The Rowan County Creative Art Project started as a result of the Education Exhibit at the College Library two years ago and funds have been raised to supply paper, crayons, and paints for the children by means of white elephant sales, which were put on by the AAUW in cooperation with the Rowan County PTA Council. They next secured the County Mrs. W. T. Caudill is chairman of the Rowan County PTA Council, Mrs. H. Rice is Creative Art Chairman, Mrs. Morehead Branch and Mrs. Naomi Claypool has supervised the art work carried out by the Rural Teachers.

CHURCH NEWS

St. Alban's Mission (Episcopal) Reverend F. C. Lighthow, S. T. B., Mount Sterling, Thursday, May 22nd (Ascension Day): Holy Communion and Sermon at 10 A. M. Sunday, May 25th (Sunday after Ascension): Choral Communion and Sermon at 8:30 A. M.

Morehead Delegation Attends Institute On Wednesday of this week the Christian Church was represented at the Annual League of Ship Training Institute for Kentucky Christian Churches, held in Lexington to groups of ministers and lay society members and by the Pastor. A large attendance enjoyed the program led by outstanding speakers. Luncheon was held in the Woodland Christian Church.

Dr. Dudley E. Cole, Address Young People Next Sunday evening at 6:15. Dr. Fred Dudley of the College, will address the Young Peoples Guild of the Christian Church, on the subject, "Building a Christian Home." The first Sunday night in June the regular monthly supper-meeting will be held during the 6:15 hour.

Interesting Sunday Evening Services Planned The second in a series of "lay-speakers" will be heard at the Christian Church, next Sunday evening, when Mr. Harlan Powers, will occupy the pulpit at the seven-thirty service. Mr. Powers will speak on the subject: "What the Church Should Mean to the Community."

Christian Sunday School Adds New Teachers Further step in the steady growth of the Sunday School of the Christian Church was taken recently when three new teachers were added to the various departments. Mrs. Fred Brandt has assumed the leadership of the Intermediate - Senior Girls class; Mrs. Yvonne Johnson, of the Junior Department; and Mrs. E. Blair the boys' class.

The Sacrament of the Lord's Supper will be administered on Sunday morning, at 10:45, at the Methodist Church. All Christian members of the church in good membership, are invited to participate of this Sacrament with the Methodists. The choir, under the direction of Professor M. E. George, will sing the Communion Responses. The subject of the Communion Meditation, by the Pastor, will be "Believe and Discover." The public is cordially invited to this service.

Special Vesper Service On Sunday afternoon, at 5:00, the Vesper service at the Morehead Church will be conducted by students. The guest preacher will be Mr. Fred Pfisterer, of Louisville, Kentucky. Mr. Pfisterer is a former President of the Kentucky Methodist Student Movement and a popular student at Kentucky Wesleyan College. His subject for the Vesper message will be "He is Able." Mr. Edwin Case, President of the Wesleyan Foundation, will preside over the service, and the special officers of the Foundation will participate in the service. Miss Avis Prime, Mr. Ted Tate, Miss Johnny B. Miller, and Mr. Phil Bradley, Speakers will be rendered by Mrs. George at the organ and by students. The public is invited.

Children's Exhibits An exhibit of Rowan County Children's Creative Art work is open to the public at the College Library this week and next. This exhibit is one which was mounted second in a group of nine exhibits which were given honorable mention at the National Convention of the American Association of University Women, held in Cincinnati two weeks ago. Miss Lura Beam, National Associate in Art stated that the Creative Art Project carried out by the

college may serve the district other than teaching in the classroom. Many agricultural products were large number came to the office for information. The following are some of the questions asked and the answers given. Again, specimens were sent in for identification and personal visits made to homes in the community where problems were had.

"My evergreens are full of yellow growth, what is this and how can I get rid of it?" The yellow growths are the result of cedar rust which lives part time on the evergreen and then passes to apple trees by means of white elephant spray remedy. Pull off and burn as soon as they appear. Use sanitation methods wherever possible.

"My apple trees do not seem to be doing well, what could I do to stimulate them?" In making personal visits to the homes where we were found making their way into the trunks damaging the bark, we found that the insects with a small amount of carbon bisulphide inside a small amount into each opening and fill the trunk with the openings. The bark made moist. The carbon bisulphide gasses the borers. Protect the trunks by wrapping with small strips of burlap and if the bark has been considerably damaged paint the trunk. After the bark has been removed with a water proofing compound that can be had from many spray dealers.

"Ants are all over my chrysalis, what can be done to clear the plants of them?" We found that the ants are there the plants are full of aphids or plant lice. Spray the plants with nicotine sulphate, one teaspoonful per gallon of water to which is added a small amount of soap dissolved in it. Usually one application is sufficient if done effectively.

"My roses are being eaten by insects, what can I do to protect them?" There are a large number of insects that may damage rose foliage. Without discussing the insects most of these can be controlled by spraying with a lead arsenate, three teaspoonful to the gallon of water. If you have powdered hellebore, use this as it is less likely to burn the foliage. When using lead arsenate always add about four times as much hydrated lime to help counteract the burning of the lead arsenate.

"Last year my grapes thrived to black masses near the ripening period, what causes this and how can I get rid of it?" This is Black Rot, a fungous disease. Spray the grapes with a 4-4-50 bordeaux mixture. Do this about three times during the season and about two weeks apart.

"Last year I planted phlox in my flower garden. These were destroyed by a caterpillar on the foliage. I want to plant again this year but do not want to lose the plants. Will you tell me how to control them?" The caterpillar is known as rust and can be easily controlled by using a special dust. The best dust on the market is wettable sulphur. Spray the plants from the time they are a few inches high until flowering.

suffering from head colds and Sucker Investigation at this writing. "Gentlemen, don't anyone have any honor anymore?" It is rumored about that a large chain

10c store is bickering with a restaurant here in town about a certain building that is under construction. The topic of local conversation: "Will 'Mike' or will he work?" Jim Bigsby showed me through his house the other morning. "To see him going around in his overalls you would think he is slept on an iron bedstead with a shuck tick. Fact is Jim sleeps in a birdseye maple bed on a beautyrest mattress. He has a scuttle hole where they can deliver his milk and go down stairs and get it in his shirt-tail without getting out of the house. He can have his meals cooked on a kerosene stove and eat in his modernized basement or he can eat upstairs with food from his electric range set on a table with a kiver of old lace. I can't picture Jim going into that elaborate bathroom of his, taking off those overalls and climbing into that spotless built-in-tub of his with all those rollers around. The only thing around his house that is not modern is Jim and that old Maytag washer that he has had for twelve years and not spent anything on it. (No adv. Bill.)

"My apple trees do not seem to be doing well, what could I do to stimulate them?" In making personal visits to the homes where we were found making their way into the trunks damaging the bark, we found that the insects with a small amount of carbon bisulphide inside a small amount into each opening and fill the trunk with the openings. The bark made moist. The carbon bisulphide gasses the borers. Protect the trunks by wrapping with small strips of burlap and if the bark has been considerably damaged paint the trunk. After the bark has been removed with a water proofing compound that can be had from many spray dealers.

"Ants are all over my chrysalis, what can be done to clear the plants of them?" We found that the ants are there the plants are full of aphids or plant lice. Spray the plants with nicotine sulphate, one teaspoonful per gallon of water to which is added a small amount of soap dissolved in it. Usually one application is sufficient if done effectively.

"My roses are being eaten by insects, what can I do to protect them?" There are a large number of insects that may damage rose foliage. Without discussing the insects most of these can be controlled by spraying with a lead arsenate, three teaspoonful to the gallon of water. If you have powdered hellebore, use this as it is less likely to burn the foliage. When using lead arsenate always add about four times as much hydrated lime to help counteract the burning of the lead arsenate.

"Last year my grapes thrived to black masses near the ripening period, what causes this and how can I get rid of it?" This is Black Rot, a fungous disease. Spray the grapes with a 4-4-50 bordeaux mixture. Do this about three times during the season and about two weeks apart.

"Last year I planted phlox in my flower garden. These were destroyed by a caterpillar on the foliage. I want to plant again this year but do not want to lose the plants. Will you tell me how to control them?" The caterpillar is known as rust and can be easily controlled by using a special dust. The best dust on the market is wettable sulphur. Spray the plants from the time they are a few inches high until flowering.
