The main content area shows the title of the paper: 'WEBINAR LEARNING METHODS IN SERVING STUDENTS OF DISTANCE UNIVERSITY: BRIEFING CASE STUDY ON THE PRACTICE EXPERIENCE LAW COURSE (PPB), FHSIP BACHELOR LAW STUDENT AT UPBJJ-UT SEMARANG'. The authors listed are D. Ratu Ayu Uswatun Khasanah, L. Rachmiazasi Masduki, and M. Dzakiyyah Chairunnisa from Universitas Terbuka (INDONESIA). The abstract discusses the implementation of a distance learning system at UPBJJ-UT Semarang, highlighting the challenges of providing services and improving education quality through practice law courses in state courts. It notes that while webinars are used, they are not always effective due to the need for students to sacrifice work, time, and money. The authors conclude that students respond well to learning webinars, with 90% of respondents agreeing to use them.

Open University as the first state university to implement a distance learning system has students spread throughout Indonesia and abroad. In facilitating management, there are units called the Distance Learning Program Unit (UPBJJ). UPBJJ-UT Semarang is one of the state universities covering 13 districts or cities in Central Java that provides innovations to provide services and improve the quality of education. Students are directed to practice law courses in state courts, so that they will have a general perception and knowledge provision. Open University as the first state university to implement a distance learning system has students spread throughout Indonesia and abroad. In facilitating management, there are units called the Distance Learning Program Unit (UPBJJ). UPBJJ-UT Semarang is one of the state universities covering 13 districts or cities in Central Java that provides innovations to provide services and improve the quality of education. Students are directed to practice law courses in state courts, so that they will have a general perception and knowledge provision. During this time the debriefing was carried out at UPBJJ-UT Semarang. It is not effective, because students from various regions must come to Semarang to sacrifice work, time, money, and energy. Debriefing is a pre-activity so students know the steps that must be taken during PBB implementation, so that students will be understood delivery of information. Webinar is an effort to provide cheaper, easier and faster services. Students do not have to leave the activity in group discussions and do the same perception in learning. Webinar can be used from there an experiment was held on the PPB course (HKUM4410) and webinar evaluation is immediately carried out. The authors use a questionnaire media as name google form. Then the authors analyze and describe the results. From the analysis is known that students who express strongly agree and agree to use learning webinars are in the range of 90%. From the evaluation, the authors conclude that students respond very well to the existence of activities using webinar.
