AIM AND SCOPE

Forest Systems is an international peer-reviewed journal. The main aim of **Forest Systems** is to integrate multidisciplinary research with forest management in complex systems with different social and ecological background. To fulfil this integrative approach, **Forest Systems** gives preference to papers that bring together two or more disciplines, organisms, or forest products and services. Studies about all kind of forest systems are welcomed, in particular those that provide a wide variety of wood and non-wood products and ecosystem services such as the forests in regions with a Mediterranean climate.

Forest Systems is indexed in: **Agricola, Agris, CAB Abstracts, Dialnet, FSTA (Food Science and Technology Abstracts), Global Health, ICyT, Pascal, PIRA, Scopus, Science Citation Index Expanded**. It is also included in the following automated directories: **Jake, Latindex Catalogue, Latindex Directory, Ulrich's Periodical Directory**.

Forest Systems is published fourmonthly (April, August, December) by the Spanish National Institute for Agricultural and Food Research and Technology (INIA). Autopista A-6, km 7.5. 28040 Madrid. Spain.

ALERT SERVICE

If you wish to receive via e-mail, whenever a new issue of **Forest Systems** appears, the table of contents with direct links to the respective abstracts, take advantage of our free Alert Service. To register, simply send an e-mail with this message “Subscribe **Forest Systems**” to publinia@inia.es
