Graduate standing and completion of all business and accounting foundation core courses. Analysis of business and financial information to develop financial analysis abilities and enhance understanding of the relationships between business strategies, processes, and financial information.

Fall, Spring

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6255 - International and Multinational Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and completion of all business and accounting foundation core courses or equivalent. An examination of the environmental factors affecting international accounting concepts and standards. Cross-country differences in accounting treatments are compared

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6305 - Advanced Managerial Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. Advanced and current techniques for generation and use of accounting information in managerial decision-making.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6415 - Advanced Accounting Information Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. Evaluation of the overall risk to critical accounting and business processes posed by information technology.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6425 - Managerial Accounting Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA Master's Program of Study Foundation Core (not open to Accounting majors).
Accounting as an information measurement system for internal planning and control.

Fall, Spring

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6519 - Governmental and Nonprofit Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. Examination of current issues and advanced topics in governmental and nonprofit accounting with emphasis on public policy issues and governmental budgeting.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6636 - Advanced Auditing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. Advanced topics on independent, external auditing including internal control, evidence, reporting, and operational auditing.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6675 - Operational Auditing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. In depth study of the

standards, principles, practices, and procedures followed in the internal audit function.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6685 - Fraud Auditing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. Theory and techniques relating to fraud auditing and fraud examination.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6805 - Accounting Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. An examination of the evolution of contemporary accounting theory with emphasis on current and future developments.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6835 - Ethics and Professionalism in Accounting and Auditing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and completion of all business and accounting foundation core courses. This course focuses on why and how theories of the professions and theories of individual ethical decision-making are applicable to the practice of accounting.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6841 - Analytics in Managerial Accounting

ACG 6909 - Research Report

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6918 - Directed Research

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 6938 - Special Topics

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7157 - Seminar in Archival Research in Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Approval of instructor and PhD program coordinator.

Extensive coverage of archival literature dealing with auditing, financial accounting, accounting regulation, and related accounting research.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7390 - Seminar in Managerial Accounting Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Instructor and PhD program coordinator consent.

This course provides an in-depth understanding of the management accounting literature and the knowledge and skills needed to undertake scholarly research in this area.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7399 - Seminar in Behavioral Accounting Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to doctoral program, ACG 7157, and C.I.

Extensive study of the theoretical aspects and empirical literature related to accounting-based judgement/decision processes and the behavioral implications of accounting.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7826 - Seminar in the Social and Organizational Context of Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Instructor and PhD program coordinator consent.

This course provides the student with an appreciation for the body of accounting knowledge that investigates accounting as a practice carried out within social and organizational contexts.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7837 - Foundations in Behavioral Accounting Research**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I. and PhD Program Coordinator Consent.

Foundation in behavioral theory development and research design applicable to studying the individual and organizational aspects of accounting.

Odd Fall

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7885 - Research Foundations in Accounting**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Instructor and PhD program coordinator consent.

This course provides doctoral students with an intellectual foundation in research and research methods that are applicable in the study of accounting.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7887 - Accounting Research Forum**1 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to doctoral program.

Research and pedagogical issues in accounting, including research presentations by faculty, doctoral students, and invited scholars. May be taken for 4 hours credit.

Fall, Spring

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7888 - Seminar in Critical Accounting and AIS

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Instructor and PhD program coordinator consent.

This course provides an in-depth understanding of the critical accounting and AIS literature and the knowledge and skills necessary to undertake scholarly research in the area.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7915 - Directed Research in Accounting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): GEB 7910 and C.I.

Advanced study in specialized areas of accounting research. Study designed to lead toward publishable research or student's dissertation. By definition, topical areas will vary.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7917 - Advanced Research Methods in Accounting and Accounting Information Systems Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Approval of instructor and PhD program coordinator.

Advanced study in specialized areas of accounting and AIS research. By definition, topical areas will vary.

Occasional

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7919 - Research

College of Business Administration - Kenneth G. Dixon School of Accounting

ACG 7939 - Special Topics

Advertising

ADV 5917 - Directed Research

Nicholson School of Communication

ADV 5937 - Special Topics

Nicholson School of Communication

ADV 6209 - Advertising and Society

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A study of the social and ethical impact of advertising focusing on the development and presentation of advertising messages.

Occasional

Nicholson School of Communication and Media - Department of Communication

ADV 6918 - Directed Individual Research in Advertising

Nicholson School of Communication

Aerospace Engineering

EAS 5123 - Intermediate Aerodynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4134 Corequisite(s): EML 5060.

Aerodynamic characteristics of airfoils, finite wings, waves, wing-body combinations, viscous flow and flow instabilities. Airfoil design.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5157 - V/Stol Aerodynamics and Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4105 Corequisite(s): EML 5060.

Momentum theory, blade element theory, hover and forward flight, stability, aeroelasticity.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5211 - Aeroelasticity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 3101 or EML 3701 and EML 4225.

Concerned with consequences and trade-offs created by interactions between aerodynamic forces and structural deformation. Static aeroelastic problems; control effectiveness; lift effectiveness; divergence. Dynamic aeroelasticity; flutter and vibration.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5302 - Direct Energy Conversion

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3101 and EML 4142.

Direct methods of energy conversion; particular emphasis on fuel cells, thermoelectrics, thermionics, solar energy, photovoltaics and magnetohydrodynamics. Analysis and systems design.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5315 - Rocket Propulsion

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4134 or EML 4703.

Analysis and performance of rocket motors; selection and thermochemistry of chemical propellants: liquid and solid propellant rockets.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5407C - Mechatronic Systems

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EML 3034C.

Discrete control techniques for aerospace mechatronic systems. Controller design, test and evaluation.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5535 - Engineering Design for Aerospace Vehicles

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4700C, EAS 4710C, EML 4501C, EML 4502C, or equivalent.

Applications of the design process to aerospace vehicles. A system approach will be emphasized. Techniques for optimizing interface requirements will be covered.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 5917 - Directed Research

College of Engineering and Computer Science

EAS 5937 - Special Topics

College of Engineering and Computer Science

EAS 6138 - Advanced Gas Dynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5713. Corequisite(s): EML 5060.

Analysis of steady and unsteady transonic, supersonic and hypersonic flows. Shock waves, nozzles, diffusers, and high speed wind tunnels.

Odd Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6185 - Turbulent Flow

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060 and EML 5713.

Phenomena and methods of characterizing turbulence; spatial and temporal velocity correlation; energy spectra; transition prediction; turbulent boundary layer equations; hot wire and LDV measurement techniques.

Even Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6222 - Non-Destructive Evaluation of Aero-Structures**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4200 or EML 5237.

Overview of methods employed for non-destructive evaluation of structures in the context of damage tolerant analysis.

Odd Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6250 - Structural and Dynamic Stability**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237, EML 5271.

Concepts of and analysis methods for elastic and dynamic stability and associated bifurcations, including for high strain rates and structures with multiple stable equilibria.

Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6403C - Attitude Determination and Control**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

EAS 6507, EML 5060. Spacecraft attitude dynamics and control. Pointing and stabilization methods. Optimal and learning algorithms applied to perturbation analysis.

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6405 - Advanced Flight Dynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EAS 4105 or equivalent. Aerodynamic principles as applied to stability and control of aerospace vehicles. Generalized vehicle performance. Small disturbance dynamic stability and control response.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6414 - Estimation of Dynamical Systems in Aerospace Engineering**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5271, EML 5060 or C.I.

Concepts of parameter estimation, probability concepts in estimation and estimation of dynamical systems relevant to aerospace systems applications.

Odd Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6415 - Guidance, Navigation and Control**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060, EAS 6507.

Inertial and GPS navigation techniques. Explicit and implicit guidance formulations. Robust control applications to aircraft, missile and space vehicles.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6507 - Topics of Astrodynamics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5271 or C.I.

Spacecraft attitude dynamics and control. Orbital mechanics. Optimal control of aerospace vehicles. Emphasis is on recent developments and applications.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6722 - Multidisciplinary Optimization Under Uncertainty

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060 or C.I.

Formulation of design objectives as optimization problems. Application of optimization techniques to design. Surrogate techniques for analytical and experimental optimum engineering design. Applications to project.

Even Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6807C - Aerospace Measurements Instrumentation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EAS 4134, EAS 3800C, EAS 6507, EML 5060, or C.I.; not open to students who have credit for EML 6308C.

Inertial instruments (i.e.; gyros, accelerometers), thermal, fluid, optical sensors and actuators, for space and aerodynamic applications.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EAS 6808 - Space Environment and Payload Instrumentation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EAS 4504, EML 5060 or C.I. Space environment and payload instrumentation. Characterization of space environment and payload instrumentation methods.

Occasional

African History

AFH 5259 - Colloquium in African History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Readings on selected topics in African History. May be used in the degree program a maximum of 3 times.

Odd Fall

College of Arts and Humanities - Department of History

AFH 5806 - The Historiography of Slavery in Africa

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Course covers the central issues and controversies in the historiography of slavery in Africa.

Occasional

American History

AMH 5077 - Colloquium in Twentieth Century Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Examines the historiography and major themes in the history of tourism scholarship.

Occasional

College of Arts and Humanities - Department of History

AMH 5116 - Colloquium in Early American History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Reading and discussion of the literature on selected topics in Early American history. May be used in the degree program a maximum of 3 times.

Occasional

College of Arts and Humanities - Department of History

AMH 5169 - Colloquium in the American Early Republic

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Intensive reading and class discussion on selected topics of the Early American Republic.

Occasional

College of Arts and Humanities - Department of History

AMH 5176 - Colloquium in Civil War and Reconstruction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Intensive reading and class discussion on selected topics of the Civil War and Reconstruction era.

Occasional

College of Arts and Humanities - Department of History

AMH 5296 - Colloquium in 20th Century U.S.

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Reading and class discussion on selected topics in 20th-century U.S. May be used in the degree program a maximum of 4 times.

Occasional

College of Arts and Humanities - Department of History

AMH 5378 - History of Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Introduces the historiography of technology's role in historical events, and society's role in shaping technology.

Even Summer

College of Arts and Humanities - Department of History

AMH 5391 - Colloquium in U.S. Cultural History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Students will read and discuss a common or diverse body of the significant literature in the field.

Occasional

College of Arts and Humanities - Department of History

AMH 5406 - Colloquium in American South

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

Intensive reading and class discussion on selected topics of Southern history from colonial origins to the present.

Occasional

College of Arts and Humanities - Department of History

AMH 5636 - Colloquium in US Environmental History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Evolution of historical texts and methodologies for understanding nature-human interaction and how access to resources shaped human opportunity, from colonization to the present.

Occasional

College of Arts and Humanities - Department of History

AMH 5917 - Directed Research

College of Arts and Humanities

AMH 5925 - Colloquium in US Military History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Readings in selected topics in United States military history. May be used in the degree program a maximum of 3 times only when course content is different.

Occasional

College of Arts and Humanities - Department of History

AMH 6346 - Seminar in the History of American Automobility

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Readings and research in the development of American automobility.
College of Arts and Humanities - Department of History

AMH 6429 - Seminar in Community and Local History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

This seminar will introduce students to historiography, methodology and first hand experience on conducting a community history based on local and church archives.

Occasional

College of Arts and Humanities - Department of History

AMH 6592 - Seminar in Oral History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

This course is designed to expose students to the use of oral history as a research technique and to provide experience in conducting professional oral history interviews.

Anthropology: Graduate

ANG 5094 - Writing in Anthropology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Ph.D. in Integrative Anthropological Sciences or MA in Anthropology programs, or C.I. Develop scholarly writing skills specific to anthropology in terms of engagement with literature, crafting of arguments, as well as the style of expression and quoting.

Fall

College of Sciences - Department of Anthropology

ANG 5128 - Lithic Analysis: The Archaeology of Stone Tools

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Anthropology MA program, Integrative Anthropological Sciences PhD program, or C.I.

Introduces the manufacturing and analysis of flaked stone tools. Students will work with both archaeological and experimental collections, and manufacture stone tools.

Odd Spring

College of Sciences - Department of Anthropology

ANG 5165 - Archaeology of Pre-Columbian South America

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Anthropology M.A. program, Integrative Anthropological Sciences PhD program, or C.I.

Examines South American archaeology over fifteen thousand years, including but going beyond the Andes. Provides context for anthropological research throughout South America.

Even Spring

College of Sciences - Department of Anthropology

ANG 5166 - Problems in Maya Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Maya Studies GC, or C.I.

In-depth study of current methodological, theoretical, and/or topical problems in Maya Studies.

Occasional

College of Sciences - Department of Anthropology

ANG 5188 - Paleoethnobotany**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Anthropology MA program or C.I. Knowledge and understanding of paleoethnobotany sufficient to understand, interpret, and evaluate plant data in archaeological, paleoecological, and contemporary research.

Odd Spring

College of Sciences - Department of Anthropology

ANG 5191 - Mortuary Archaeology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Maya Studies GC, or C.I.

Funerary customs and human remains; basic data collection, skeletal analysis, and comparative study of mortuary ritual-ancient and modern.

Occasional

College of Sciences - Department of Anthropology

ANG 5195C - A Pot for All Seasons: Archaeological Ceramic Analysis**3 Credit Hours**

Class Hours: 1.5

Lab and Field Work Hours: 1.5

Contact Hours: 1.5

Prerequisite(s): Admission to Anthropology MA, Integrative Anthropological Sciences PhD, or C.I.

Provides students with the skills, knowledge and ability to classify, analyze, and interpret ceramic artifacts commonly recovered from archaeological sites.

Odd Fall

College of Sciences - Department of Anthropology

ANG 5228 - Maya Iconography

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Maya Studies GC, or C.I.

Study and interpretation of ancient Maya iconography as reflected in art, artifacts, and constructed features.

Odd Spring

College of Sciences - Department of Anthropology

ANG 5307 - Peoples and Cultures of Latin America

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Maya Studies GC, or C.I.

Latin American culture focusing on indigenous history, colonialism, traditional peoples, social change, and modernization.

Occasional

College of Sciences - Department of Anthropology

ANG 5341 - Caribbean Cultures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Maya Studies GC, or C.I.

Historical and contemporary overview of the societies and cultures of the Caribbean region, including effects of colonization by the Dutch, Spanish, British, and French.

Occasional

College of Sciences - Department of Anthropology

ANG 5441 - Anthropology of Cities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Anthropology MA, Integrative Anthropological Sciences PhD, or C.I.

An anthropological exploration of cities and their social systems in the past and present.

Even Spring

College of Sciences - Department of Anthropology

ANG 5462 - Medical Anthropology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Integrative Anthropological Sciences PhD, or C.I.

Topics in ethnography of medical traditions and anthropological approaches to the study of health and disease.

Occasional

College of Sciences - Department of Anthropology

ANG 5468 - Anthropology of the Body

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Anthropology MA, Integrative Anthropological Sciences PhD, or C.I.

Critically examines the body from the perspective of cultural anthropology.

Even Spring

College of Sciences - Department of Anthropology

ANG 5486 - Quantitative Research in Anthropology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the MA in Anthropology program, admission to Integrative Anthropological Sciences PhD program, or C.I.

Quantitative approaches to problems in anthropology, including multivariate systems, assessment of reliability, and approaches for small samples.

Odd Fall, Even Fall

College of Sciences - Department of Anthropology

ANG 5525C - Human Osteology

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to the Anthropology M.A. program, Integrative Anthropological Sciences PhD or C.I.

The human skeleton and the methodology and techniques involved in the anthropological assessment of skeleton remains.

Odd Fall, Even Fall

College of Sciences - Department of Anthropology

ANG 5531 - Nutritional Anthropology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

The biological, social, cultural, psychological, and environmental influences of food consumption and physiological status. Perspectives are cross-cultural, evolutionary and ecological.

Contact Hours: 3

Prerequisite(s): Graduate standing in Physics or C.I.

Observations and properties of extrasolar planets and circumstellar disks through physics of disk evolution and planet formation and dynamical evolution of planetary systems.

Odd Spring

College of Sciences - Department of Physics

AST 6156 - Current Topics in Planetary Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Planetary Sciences M.S./Ph.D. or C.I.

Review and analyze current advances in planetary science, particularly science results from recent discoveries. The focus of the course will vary depending on current discoveries. May be used in the degree program a maximum of 3 times.

Occasional

College of Sciences - Department of Physics

AST 6165 - Planetary Atmospheres**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): AST 5151 Physics of Planetary Processes, PHY 6246 Classical Mechanics, graduate status or senior standing, or C.I.

This course examines the physical and chemical processes that govern the atmospheres of Earth and other planets.

Even Spring

Athletic Training

ATR 5016 - Foundational Behaviors of Athletic Training Practice I

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to MAT degree program.

The roles responsibilities of an athletic trainer in the evolving healthcare system; including professionalism, information fluency, and healthcare ethics, laws and regulations.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5017 - Foundational Behaviors of Athletic Training Practice II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to MAT degree program.

The roles responsibilities of an athletic trainer in the evolving healthcare system, including patient-centered care, collaborative care, and the influence of culture and other social determinants of health on healthcare.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5106C - Prevention of Injury and Illness in Athletic Training Practice

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Admission to MAT degree program. Physiological, psychological, and sociological aspects of health and wellness and the prevention of injury and illness; includes physical fitness, nutrition/hydration, flexibility and prophylactic taping/bracing.

Material and Supply Fee: \$70 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5117C - Acute Care in Athletic Training Practice I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to MAT degree program.

Emergency preparedness and the evaluation and management of acute conditions and brain injuries.

Material and Supply Fee: \$57 *Occasional*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5206C - Functional Human Anatomy for Athletic Trainers

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Admission to MAT degree program. Anatomical knowledge and clinical skills essential to the practice of athletic training; including knowledge of functional anatomy, manual muscle testing, goniometry, posture and gait analysis.

Material and Supply Fee: \$4 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5217C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice II

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): ATR 5219C.

A regional study of evaluation, diagnosis, and immediate treatment of lower extremity injuries.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5219C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): Admission to MAT degree program.

A regional study of evaluation, diagnosis, and immediate treatment of head, neck, and spine injuries (including brain injuries).

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5306C - Therapeutic Interventions in Athletic Training Practice I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): Admission to MAT degree program.

Therapeutic interventions for head, neck, and spine musculoskeletal dysfunction (including brain injury).

Material and Supply Fee: \$5 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5307C - Therapeutic Interventions in Athletic Training Practice II

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): ATR 5306C.

Therapeutic interventions for lower extremity musculoskeletal dysfunction.

Material and Supply Fee: \$21 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5406C - General Medical Conditions in Athletic Training Practice I

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): Enrolled MAT degree program.

Clinical skills essential to the practice of athletic training. Clinical skills stressed in this course include the evaluation, recognition, treatment, and referral of general medical conditions/illnesses.

Material and Supply Fee: \$4 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5516 - Healthcare Administration in Athletic Training Practice I

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to MAT degree program.

Policy, law, ethics, informatics and information management are explored with regard to the practice of athletic training.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5617 - Athletic Training Research I

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to MAT degree program.

Evidence-based practice as well as research methods, ethics and regulations in an effort to identify a meaningful question and concept for a capstone project.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5815L - Practicum in Athletic Training I

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 10

Contact Hours: 2

Prerequisite(s): ATR 5117C.

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries. Students are supervised by an assigned Preceptor.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 5825L - Practicum in Athletic Training II

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 10

Contact Hours: 2

Prerequisite(s): ATR 5815L.

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries. Students are supervised by an assigned Preceptor.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6118L - Acute Care in Athletic Training Practice II

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 0

Review, update and practice emergency preparedness and the evaluation and management of acute conditions. This course will be entirely scenario based.

Odd Spring, Even Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6218C - Musculoskeletal Evaluation and Diagnosis in Athletic Training Practice III**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): ATR 5217C.

A regional study of evaluation, diagnosis, and immediate treatment of upper extremity injuries.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6308C - Therapeutic Interventions in Athletic Training Practice III**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): ATR 5307C.

Therapeutic interventions for upper extremity musculoskeletal dysfunction.

Material and Supply Fee: \$22 *Occasional*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6309C - Therapeutic Interventions in Athletic Training Practice IV**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): ATR 6308C. Corequisite(s): ATR 6845L.

Psychological aspects of rehabilitation and performance are explored. Rehabilitation protocols and evidence-based practices are employed in the context of actual patient care.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6407C - General Medical Conditions in Athletic Training Practice II

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): ATR 5406C.General Medical Conditions in Athletic Training Practice I.

Clinical skills essential to the practice of athletic training. Clinical skills stressed in this course include the evaluation, recognition, treatment, and referral of general medical conditions/illnesses.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6505 - Athletic Training Seminar

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Corequisite(s): Athletic Training Practicum V (ATR 6XXXXL).

Prepare for the BOC examination, review the Standards of Professional Practice, NATA Code of Ethics, and professional development requirements for the entry-level athletic trainer.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6517 - Healthcare Administration in Athletic Training Practice II

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): ATR 5516

Reimbursement, organizational administration/planning, risk mitigation/management, and emergency preparedness are explored with regard to the practice of athletic training.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6618C - Athletic Training Research II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): ATR 5617

Capstone groups will meet regularly, with guidance from a capstone adviser, to create a proposal for a capstone project.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6619C - Athletic Training Research III

4 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): ATR 6618C

This course requires the student to complete a group capstone project and disseminate the information as a scholarly product (oral or poster presentation).

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6835L - Practicum in Athletic Training III

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 1

Prerequisite(s): ATR 5825L.

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries. Focus is on non-sport population, general medical conditions and/or surgical observation.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6845L - Practicum in Athletic Training IV

9 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 30

Contact Hours: 9

Prerequisite(s): ATR 6835L

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries. Focus is on a fully immersed athletic training experience.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6855L - Practicum in Athletic Training V

4 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 20

Contact Hours: 4

Prerequisite(s): ATR 6845L

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries. Students are supervised by an assigned Preceptor.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6907 - Directed Independent Study

Variable Credit Hours

Class Hours: Variable

Lab and Field Work Hours: Variable

Contact Hours: Variable

This course is designed to enable the graduate student to engage in an independent study experience related to a topic/content area approved by the instructor.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6917 - Directed Research

Variable Credit Hours

Class Hours: Variable

Lab and Field Work Hours: Variable

Contact Hours: Variable

This course is designed to enable the graduate student to engage in a research experience in the Athletic Training Laboratory throughout the semester.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6941 - Optional Internship

Variable Credit Hours

Class Hours: Variable

Lab and Field Work Hours: Variable

Contact Hours: Variable

Prerequisite(s): ATR 5117C.

Develop knowledge, skills, and attitudes by providing direct care of athletic injuries; to understand the medical delivery system in a variety of settings.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

ATR 6957 - Study Abroad

Variable Credit Hours

Class Hours: Variable

Lab and Field Work Hours: Variable

Contact Hours: Variable

Course allows a study abroad experience in the field of athletic training or sports medicine.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

Rosen College of Hospitality Management

AVM 5937 - Special Topics

Rosen College of Hospitality Management

Basic Medical Sciences

BMS 6001 - Cellular Function and Medical Genetics

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Matriculation in the College of Medicine M.D. Program.

Cellular Function and Medical Genetics is an integrated, multidisciplinary, review of the basic sciences of biochemistry, molecular biology; genetic, nutrition, pharmacology and cell biology underpinning modern medicine.

Fall

College of Medicine - M.D. Program

BMS 6002 - Structure and Function

11 Credit Hours

Class Hours: 11

Lab and Field Work Hours: 0

Contact Hours: 11

Prerequisite(s): Matriculation in the College of Medicine M.D. program.

An integrated module with a curriculum that includes Clinical Anatomy, Embryology, Microanatomy, Physiology, and Neurosciences using medical imaging, clinical presentations, lectures, small-group sessions, team-based learning sessions.

Fall, Spring

College of Medicine - M.D. Program

BMS 6006 - Health and Disease

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Matriculation in the College of Medicine M.D. program.

Eight week module of the first year basic-science curriculum that integrates the following disciplines: immunology, microbiology, virology, pharmacology, and pathology.

Spring

College of Medicine - M.D. Program

BMS 6015 - Practice of Medicine I**7 Credit Hours**

Class Hours: 7

Lab and Field Work Hours: 0

Contact Hours: 7

Prerequisite(s): Matriculation in the College of Medicine M.D. program.

Extending throughout the first year of medical school, this module includes skills training in medical interviewing and physical examination while also addressing the context of the medical practice.

Fall, Spring

College of Medicine - M.D. Program

BMS 6016 - Practice of Medicine II**8 Credit Hours**

Class Hours: 8

Lab and Field Work Hours: 0

Contact Hours: 8

Prerequisite(s): Completion of M-1 Term.

P-2: Practice of Medicine is a year long module which teaches advanced clinical examination techniques and clinical reasoning skills integrated with organ systems modules.

Fall, Spring

College of Medicine - M.D. Program

BMS 6050 - Psychosocial Issues in Healthcare**4 Credit Hours**

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): Matriculation in the College of Medicine M.D. program. This module covers the role of psychosocial factors in health and illness, emphasizing communication skills, cultural differences, human sexuality, domestic violence, and alcohol misuse.

Spring

College of Medicine - M.D. Program

BMS 6123 - Human Anatomy and Embryology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An overview of the human body structure and development through lecture, group discussions, problem-solving, self-learning modules, team based learning, and clinical case studies.

Fall

College of Medicine - Department of Clinical Sciences

BMS 6631 - Hematology and Oncology

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): Matriculation in the College of Medicine M.D. Program.

Overview of major hematologic diseases: coagulation, and basic neoplasia. Pathology, pharmacology, laboratory and clinical medicine disciplines, emphasizing disease classification, differential diagnosis, and current treatments.

Spring

College of Medicine - M.D. Program

BMS 6632 - Endocrine and Reproductive Systems

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Completion of M-1 Term.

The S-2 module is an integrated overview of diseases of the endocrine, reproductive, and genital systems. Pathology, pathophysiology, pharmacology, and clinical medicine disciplines are included.

Fall

College of Medicine - M.D. Program

BMS 6633 - Cardiovascular and Pulmonary Systems

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Completion of M-1 Term.

The Cardio/Pulmonary module is an integrated, multidisciplinary, overview of medically-relevant cardiovascular and pulmonary conditions.

Fall

College of Medicine - M.D. Program

BMS 6634 - Gastrointestinal and Renal Systems

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Completion of M-1 Term.

The module is one of six organ-system based modules scheduled for the M2 and end of M1 years. The module provides overview of diseases of the gastro and renal systems.

Fall

College of Medicine - M.D. Program

BMS 6635 - Skin and Musculoskeletal Systems

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): Completion of M-1 Term.

The module is an integrated overview of diseases and disorders affecting the skin, connective tissues, and musculoskeletal systems.

Fall, Spring

College of Medicine - M.D. Program

BMS 6636 - Brain and Behavior

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M-1 Term.

This module integrates foundational principles of basic clinical neuroscience relevant for understanding normal nervous system function and the pathophysiologic basis of nervous system disorders.

Spring

College of Medicine - M.D. Program

BMS 6760 - Introduction to Genetic Counseling 1

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An introduction of the basic principles of genetic counseling.
Fall

College of Medicine - Department of Clinical Sciences

BMS 6761 - Introduction to Genetic Counseling 2

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. This course is a continuation of the basic principles of Genetic Counseling.

Spring

College of Medicine - Department of Clinical Sciences

BMS 6762 - Advanced Genetic Counseling 1

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An overview of the advanced principles of genetic counseling; understanding the importance of pedigree, how to build a rapport with patients, and prepare for interactions with clients.

Fall

College of Medicine - Department of Clinical Sciences

BMS 6763 - Advanced Genetic Counseling 2

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into M.S. Genetic Counseling Program. Overview to continue the advanced principles of genetic counseling 2; the history of genetic counseling, the professional organizations, practice guidelines, and code of ethics.

Spring

College of Medicine - Department of Clinical Sciences

BMS 6764 - Medical Biochemistry and Physiology For Genetic Counselors

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An overview of the fundamentals of medical biochemistry and physiology for genetic counselors.

Spring

College of Medicine - Department of Clinical Sciences

BMS 6765 - Genetic Diseases of Human Organ Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. The Genetic Diseases of Human Organ Systems course provides an overview of genetic disease affecting the human organ systems through lecture, group discussions and problem solving, self-learning modules, team based learning, and clinical case studies.

Spring

College of Medicine - Department of Clinical Sciences

BMS 6766 - Inborn Errors of Metabolism**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. Overview of the fundamentals of genetic diseases associated with inborn errors of metabolism.

Summer

College of Medicine - Department of Clinical Sciences

BMS 6767 - Molecular Diagnostics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An overview of basic laboratory skills used in molecular genetic clinical diagnostic laboratories for detecting genetic diseases.

Fall

College of Medicine - Department of Clinical Sciences

BMS 6821 - Healthcare Ethics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. An overview on the ethical issues in healthcare, and also discuss influences on ethical decisions made by healthcare providers and patients.

Fall

College of Medicine - Department of Clinical Sciences

BMS 6902 - Journal Club**1 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Matriculation into the M.S. Genetic Counseling Program. Students will review and discuss current literature relating to the practice of genetic counseling.

Fall, Spring

College of Medicine - Department of Clinical Sciences

BMS 6910 - Focused Inquiry and Research Experience**5 Credit Hours**

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Matriculation in the College of Medicine M.D. program.

This course provides the training and mentorship enabling medical students to successfully complete rigorous, independent, scholarly research projects in fields of individual passion.

Fall, Spring

College of Medicine - M.D. Program

BMS 6911 - Focused Inquiry and Research Experience II**5 Credit Hours**

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): Focused Inquiry and Research Experience I (BMS 6910). This course provides the training and mentorship enabling medical students to successfully complete rigorous, independent, scholarly research projects in fields of individual passion.

Fall, Spring

College of Medicine - M.D. Program

BMS 6950 - Capstone 1

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Matriculation into the M.S. Genetic Counseling Program. Students will identify a Capstone case and prepare a summary of all clinical presentation, diagnostic testing, and management considerations.

Summer

College of Medicine - Department of Clinical Sciences

BMS 6951 - Capstone 2

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matriculation into the M.S. Genetic Counseling Program. Students will have a Capstone case for presentation; diagnostic testing and management considerations for a Capstone case.

Spring

College of Medicine - Department of Clinical Sciences

GMS 6860 - Statistics for Biomedical Scientists

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Introductory graduate course for Biomedical Sciences or related majors; outlines basic probabilistic and statistical concepts tailored to biomedical scientists. The course will be taught jointly by the Burnett School of Biomedical Sciences and Statistics Department with 50/50 work load split.

Occasional

College of Medicine - Burnett School of Biomedical Sciences

Biochemistry (Biophysics)

BCH 5917 - Directed Research

College of Sciences

BCH 5937 - Special Topics

College of Sciences

BCH 6740 - Advanced Biochemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must meet proficiency requirement as determined by the Chemistry department or C.I. Biochemistry focusing on enzymology, regulation of the activity of enzymes and cellular chemical activity, and biochemical methods to study proteins.

Occasional

College of Sciences - Department of Chemistry

Biological Sciences

BSC 5316 - Marine Conservation Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): BSC 4312C Marine Biology, graduate standing, or C.I. Examine human impacts in marine ecosystems and how humans can become better stewards of these habitats.

Odd Spring

College of Sciences - Department of Biology

BSC 5408L - Advanced Biology Laboratory Techniques

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 9

Contact Hours: 9

Prerequisite(s): BS degree, C.I.

This course will emphasize those biological techniques and resources necessary for students about to begin thesis research. Individual and small group instruction in current laboratory techniques, literature searches, and hands-on practice of techniques will be stressed. May not be repeated for credit.

Occasional

College of Sciences - Department of Biology

BSC 5418 - Tissue Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Introduction to Tissue Engineering with a special emphasis on the current status of the field, on novel methods and on cell biomaterial interactions.

Occasional

College of Medicine - Department of Molecular and Microbiology

BSC 5436 - Biomedical Informatics : Structure Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3522 or equivalent or C.I.

Introduction of bioinformatics tools and resources on RNA and protein structure analysis.

Fall

College of Medicine - Department of Molecular and Microbiology

BSC 5476C - Scientific Diving

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 8

Contact Hours: 4

Prerequisite(s): Graduate standing in the Dept. of Biology, and C.I.

Introduction to scientific diving and satisfies the 100 hours of training required by the American Academy of Underwater Sciences.

Occasional

College of Sciences - Department of Biology

BSC 5665 - Clinical Embryology and Congenital Malformations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ZOO 3733C or equivalent. Functional human embryology in a clinically oriented way to study the human development and congenital malformations as a result of genetic, environmental and toxic conditions.

Spring, Summer

College of Medicine - Burnett School of Biomedical Sciences

BSC 5824 - Biogeography

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate In Conservation Biology, PSM in Conservation Biology, or C.I. Study of geographic variation in nature, ranging from past to present and from genes to ecosystems.

Even Spring

College of Sciences - Department of Biology

BSC 5917 - Directed Research

College of Sciences

BSC 5937 - ST: Sensory Ecology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, or C.I.

Study of how and why animals acquire, process and use information from their environment, and how sensory systems influence evolutionary processes.

Spring

College of Sciences - Department of Biology

BSC 6407C - Laboratory Methods in Molecular Biology

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 6

Contact Hours: 7

Prerequisite(s): Graduate standing, PCB 3522 or C.I.

Description and practice of commonly used methods in molecular biology.

Material and Supply Fee: \$70.00 *Fall*

College of Medicine - Department of Molecular and Microbiology

BSC 6431 - Practice of Biomedical Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Introduces students to the practice of biomolecular science.

Fall

College of Medicine - Department of Molecular and Microbiology

BSC 6432 - Biomedical Sciences I

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): 1) Acceptance in the Molecular Biology and Microbiology master's program, or 2) Biochem I, or Molecular Biology 1 and 2, or Cell Biology, or C.I.

First semester of a multi-disciplinary course. Topics include metabolic reactions, DNA replication and transcription.

Lectures incorporate current scientific findings in the context of biomedical applications.

Fall

College of Medicine - Department of Molecular and Microbiology

BSC 6433 - Biomedical Sciences II

5 Credit Hours

Class Hours: 5

Lab and Field Work Hours: 0

Contact Hours: 5

Prerequisite(s): BSC 6432, graduate standing.

Second semester of a multi-disciplinary course. Topics covered include protein translation, signaling and bioinformatics. Lectures incorporate current scientific findings in the context of biomedical applications.

Spring

College of Medicine - Department of Molecular and Microbiology

BSC 6614 - Advanced Topics in Systematics

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): An evolution course, C.I., admission to graduate program.

Discussion of new cutting edge topics in Systematics and hands on learning of computer data analysis in this field.

Occasional

College of Sciences - Department of Biology

BSC 6909 - Research Report

College of Sciences

BSC 6918 - Directed Research

College of Sciences

BSC 6935 - Seminar in Biology

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Biology M.S. or Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Discussions and presentations addressing current research in the field of Biology. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Sciences - Department of Biology

BSC 6938 - Special Topics

College of Sciences

BSC 6938 - ST: Complex Data in Biology**4 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 5.5

Prerequisite(s): PCB 6466 Methods in Experimental Ecology I or equivalent. A basic understanding of normal statistics (regression, ANOVA, etc.), genetics, and evolutionary biology is required.

Covers advanced statistical and computational methods for handling complex biological data, including spatial autocorrelation, evolutionary datasets, high-dimensional traits, etc., at scales from molecular to ecological.

Fall

College of Sciences - Department of Biology

BSC 7919 - Doctoral Research

College of Sciences

Biomedical Engineering**BME 5140 - Materials Science of Instrumentation for Clinical Applications****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

General graduate standing in Engineering, Biomedical Science, Biotechnology, Chemistry or related disciplines or C.I. Study of engineering and materials concepts behind the clinical diagnostics currently used and under development, as well as technologies utilized in fabrication and characterization of these devices.

Odd Fall

College of Engineering and Computer Science - Department of Mechanical, Materials, and Aerospace Engineering

BME 5216C - Mechanics of Biostructures I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): Graduate standing or C.I.

Part I of a two semester course. Mechanical analysis of hard and soft tissues and prosection lab on human anatomy and physiology.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 5217C - Mechanics of Biostructures II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): 5216C or C.I.

Part II of a two semester course. Cell physiology and engineering principles applied to analysis of cellular processes and prosection anatomy lab on human anatomy and physiology.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 5267 - Biofluid Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3701 and EGM 3601 or C.I.

This course will cover the physical and mathematical principals of fluid mechanics and its application and relevance to human physiology and pathology.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 5572 - Biomedical Nanotechnology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3123C with a "C" (2.0) or better grade.

Human Physiology, Bioelectric Phenomena and Neurons, Nanoelectronics for fabrication of biochips for human biomedical applications, self-assembly, bioelectronics, moral and ethical issues.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

BME 5742C - Modeling Techniques and Methodologies in Bioengineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): EGN 3034, PHY 2048C, or C.I.

Model identification and simulation implementation for physiological systems (e.g., cardiovascular, respiratory, neural, and muscular systems)

Odd Fall, Even Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6215 - Advanced Biomechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

BME 5216C or C.I. The objectives of this course are to understand the basic concepts and biomedical applications of medical robotics, human motion mechanics and neuro-mechanics.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6231 - Continuum Biomechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGM 3601.

Material laws for biological tissues, with / without microstructure and/or an incompressibility constraint. Models of damage, growth, remodeling, and electro-mechanical coupling. Introduction to multiscale modeling.

Odd Spring, Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6268C - Applied and Computational Biofluids

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EML 3701, EGM 3601, BME 5267, or C.I.

Principles and foundations of applied fluid mechanics and computational methods to the human circulation.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6500C - Bioinstrumentation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

BME 5587C or C.I An introduction to the fundamental theory and experimental techniques needed for performing bioengineering measurements, designing related experiments, and analyzing experimental results.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6525 - Methods in Neural-Machine Interfaces

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 2048C and EML 4225, or C.I.

Signal processing techniques for interpreting human intention from electromyography (EMG) and Electroencephalography (EEG) signals and human-safe control algorithms will be discussed and practiced.

Odd Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6908 - Independent Study

VAR Credit Hours

Class Hours: 1-99

Lab and Field Work Hours: 0

Contact Hours: 1-99

Graduate standing. Independent study on a topic taken to supplement current coursework.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6918 - Directed Research

VAR Credit Hours

Class Hours: 1-99

Lab and Field Work Hours: 0

Contact Hours: 1-99

Graduate standing. Student research under the direction of a BME faculty member.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6935 - Topics in Biomedical Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EML 3701 and EGM 3601 and graduate standing or C.I. In this course students will explore research topics in biomedical engineering (BME) guided by BME faculty. This team-taught course will involve seminars and presentations of research and case studies by faculty engaged in BME research as well as regional medical professionals.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6938 - ST: Continuum Biomechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGM 3601 and EML 5237.

Material laws for biological tissues, with / without microstructure and/or an incompressibility constraint. Models of damage, growth, remodeling, and electro-mechanical coupling. Introduction to multiscale modeling.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

BME 6971 - Thesis

VAR Credit Hours

Class Hours: 1-99

Lab and Field Work Hours: 0

Contact Hours: 1-99

Graduate standing. Thesis course for students in Biomedical Engineering program.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

Botany

BOT 5285L - Plant Microtechniques

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 2

Prerequisite(s):

BOT 4223C or C.I.

Introduction to techniques used in the preparation of microscope slides/specimens of vascular plants, including infecting organisms.

Even Spring

College of Sciences - Department of Biology

BOT 5505C - Advanced Plant Physiology**4 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): Permission of course instructor.

Core aspects of plant physiology, with a hands-on research-driven focus on traits and processes that govern interaction with the environment.

Even Fall

College of Sciences - Department of Biology

BOT 5917 - Directed Research

College of Sciences

BOT 5937 - Special Topics

College of Sciences

BOT 6623C - Plant Ecology**4 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

The study of the abiotic and biotic processes that control the distribution of terrestrial flora at local, landscape, and global scales.

Material and Supply Fee: \$15.00 *Occasional*

Business Law

BUL 5332 - Advanced Business Law Topics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate program, or Management major or minor in term of graduation, BUL 3130. Advanced business law topics including coverage of the Uniform Commercial Code, torts, commercial paper, and secured transactions.

Fall, Spring

College of Business Administration - Kenneth G. Dixon School of Accounting

BUL 5917 - Directed Research

College of Business Administration

BUL 5937 - Special Topics

College of Business Administration

BUL 6444 - Law and Ethics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Accepted for graduate study in College of Business Administration.

Legal and ethical issues inherent in business decision making, including the effects of legislation, regulation, diversity, harassment, and other workplace issues on business activity.

Fall, Spring

College of Business Administration - Kenneth G. Dixon School of Accounting

BUL 6909 - Research Report

College of Community Innovation and Education

BTE 6935 - Seminar in Business Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

A survey of current problems, issues, and trends in business education.

Odd Summer, Even Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

BTE 6938 - Special Topics

Chemistry

CHM 5225 - Advanced Organic Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 2211, graduate status or senior standing, or C.I.

Theoretical and physical organic concepts of organic systems from the perspective of modern structural theory, thermodynamics, and kinetics.

Odd Fall

College of Sciences - Department of Chemistry

CHM 5235 - Applied Molecular Spectroscopy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 3120 and CHM 2211, and graduate status or senior standing or C.I.

Determination of chemical structure through interpretation of UV, IR, NMR and Mass Spectra.

Occasional

College of Sciences - Department of Chemistry

CHM 5305 - Bioconjugate Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): BCH 4053 Biochemistry, and graduate status or senior standing or C.I.

Reactivity of biological molecules, synthesis and properties of modified carbohydrates, proteins, lipids and nucleic acids, principles of bioconjugation.

Occasional

College of Sciences - Department of Chemistry

CHM 5450 - Polymer Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 2211, and graduate status or senior standing or C.I.

An introduction to the chemistry of synthetic polymers. Synthetic methods, polymerization mechanisms, characterization techniques, and polymer properties will be considered.

Even Fall

College of Sciences - Department of Chemistry

CHM 5451C - Techniques in Polymer Science

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 5

Contact Hours: 6

Prerequisite(s): CHM 2211 and CHM 3410, graduate status or senior standing, or C.I.

A laboratory and lecture course designed to introduce students to the major polymerization mechanisms along with polymer characterization and processing methods using modern instrumentation.

Material and Supply Fee: \$63.00 *Odd Spring*

College of Sciences - Department of Chemistry

CHM 5580 - Advanced Physical Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): CHM 3411 and PR: MAC 2313, and graduate standing or senior standing or C.I.

Selected topics of thermodynamics, kinetics, quantum mechanics, and structure.

Occasional

College of Sciences - Department of Chemistry

CHM 5675 - Bioinorganic Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): BCH 4053. Corequisite(s): CHM 4610.

Overview of the role of metals in biology. Emphasis on structure-function relationships of metalloenzymes, metalloenzyme mechanism, and spectroscopies and techniques commonly used for these structures.

Odd Spring

College of Sciences - Department of Chemistry

CHM 5917 - Directed Research

College of Sciences

CHM 5937 - ST: Bioinorganic Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Prerequisite(s): BCH 4053, or C.I.

The role of metals in biology. Emphasis on structure-function relationships of metalloenzymes, metalloenzyme mechanism, and spectroscopies and techniques commonly used for these studies.

Spring

College of Sciences - Department of Chemistry

CHM 6134 - Advanced Instrumental Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 6710.

Advanced instrumental techniques related to luminescence spectroscopy and applications to chemical analysis.

Occasional

College of Sciences - Department of Chemistry

CHM 6440 - Kinetics and Catalysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must meet proficiency requirement as determined by the Chemistry Department or C.I.

Classical kinetics with an emphasis on industrial applications and current catalysis methodologies.

Spring

College of Sciences - Department of Chemistry

CHM 6492 - Atomic Spectroscopy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 3120 or C.I.

Theory and instrumentation for atomic absorption and emission spectroscopy with focus on their applications in various fields including forensic science.

Even Spring

College of Sciences - Department of Chemistry

CHM 6620 - Solid State Inorganic Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 4610, or C.I.

Structure and chemistry of novel solid-state inorganic materials and their emerging applications.

Occasional

College of Sciences - Department of Chemistry

CHM 6710 - Applied Analytical Chemistry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must meet proficiency requirement as determined by the Chemistry department or C.I.

Concepts in molecular structure that integrate structural, physical, and chemical properties with aspects of industrial and analytical chemistry.

Fall

College of Sciences - Department of Chemistry

CHM 6711 - Chemistry of Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 2211, CHM 4130C, and CHM 3411, or C.I.

Structure and properties of chemical products, with an emphasis on the correlation between molecular form and the functional properties deemed desirable for the product.

College of Sciences - Department of Chemistry

CHM 6909 - Research Report

College of Sciences

CHM 6918 - Research Report

College of Sciences

CHM 6936 - Graduate Chemistry Seminar

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): C.I.

Students attend faculty-level seminars for multiple semesters dictated by their program. Students will need to complete CITI during first semester.

Fall, Spring

College of Sciences - Department of Chemistry

CHM 6938 - ST: Electrochemistry**3 Credit Hours**

Class Hours: 3

Contact Hours: 3

Prerequisite(s): Bachelor degree in Chemistry or consent of instructor.

Electrochemistry course is design to study the fundamentals of electrochemical reactions with focus on electrode reaction mechanisms. It will include theory/practice of advanced electrochemical-analytical methods.

College of Sciences - Department of Chemistry

CHM 6949 - Cooperative Education in Chemistry

Chemistry: Specialized**CHS 5110 - Radiochemistry****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 4610 Inorganic Chemistry, or equivalent, or C.I.

Basic principles of radiochemistry and radioanalytical techniques, environmental radiochemistry, radiotracers in

medicine, material science and geology, nuclear fuel, reactors and energy production, radiation protection.

Fall

College of Sciences - Department of Chemistry

CHS 5502 - Principles of Forensic Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Forensic Science MS program or C.I.

Principles of forensic science crime scene investigation, concepts in physical and biological evidence, evidence collection and transport, discrimination and individualization of evidence.

Even Spring

College of Sciences - Department of Chemistry

CHS 5504 - Topics in Forensic Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Digital Forensics M.S. or Computer Forensics graduate certificate or C.I.

History and current topics in Forensic Science.

Fall

College of Sciences - Department of Chemistry

CHS 5507 - Chemometric Applications in Forensic Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHS 5504, or C.I.

Modern methods of evaluating the evidential value of forensic data from physical evidence, including fibers, glass, ignitable liquids and others.

Even Spring

College of Sciences - Department of Chemistry

CHS 5518 - The Forensic Collection and Examination of Digital Evidence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Adv topics in Forensic Science, graduate status, or C.I.

This course will cover the nature of Digital Evidence collection and examination under the constraints of Law and courtroom procedures.

Summer

College of Sciences - Department of Chemistry

CHS 5596 - The Forensic Expert in the Courtroom

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into M.S. Forensic Science program, the Digital Forensics M.S. or the Computer Forensics graduate certificate or C.I.

Uses of technically and scientifically trained expert witnesses at trial.

Odd Spring, Even Spring

College of Sciences - Department of Chemistry

CHS 5917 - Directed Research

College of Sciences

CHS 5937 - Special Topics

College of Sciences

CHS 6240 - Chemical Thermodynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must meet proficiency requirement as determined by the Chemistry department or C.I.

Classical and statistical thermodynamics with emphasis on industrial applications and estimation methods.

Fall

College of Sciences - Department of Chemistry

CHS 6251 - Applied Organic Synthesis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must meet proficiency requirement as determined by the Chemistry department or C.I.

A survey of chemical syntheses from both a product-oriented standpoint and a process-oriented standpoint. Relevant examples from the pharmaceutical and agricultural chemical industries.

Spring

College of Sciences - Department of Chemistry

CHS 6260 - Chemical Unit Operations and Separations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 3411.

A study of the elements and dynamics that are fundamental to industrial separation methods and transport processes.

Even Fall

College of Sciences - Department of Chemistry

CHS 6509 - Advanced Forensic Microscopy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. In-depth description of microscopic techniques (from stereoscope to PLM to SEM), micro-spectroscopy (from polarization to absorption, emission, vibrational spectroscopy to EDS) and sample analysis.

Odd Spring

College of Sciences - Department of Chemistry

CHS 6513 - Quality Assurance for Forensic Scientists

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into M.S. Forensic Science program or C.I.

Principles and concepts of quality assurance for forensic scientists. Includes a study of national analytical and accreditation standards.

Odd Fall, Even Fall

College of Sciences - Department of Chemistry

CHS 6535 - Forensic Molecular Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 4524, graduate standing of C.I.; and must have successfully completed undergraduate courses in statistics and biology

Procedures for recovering and typing DNA from evidentiary materials and the interpretation of data.

Odd Fall

College of Sciences - Department of Chemistry

CHS 6535L - Forensic Analysis of Biological Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHS 6535, PCB 4524, or C.I. and satisfaction of biology requirements.

A laboratory course for forensic molecular biologists covering the procedures for recovering and typing DNA from evidentiary materials.

Even Spring

College of Sciences - Department of Chemistry

CHS 6536 - Population Genetics and Genetic Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I. and must have successfully completed undergraduate courses in statistics and biology.

Analysis of laboratory derived DNA data and how they can be applied in an occupational context.

Even Fall

College of Sciences - Department of Chemistry

CHS 6545 - Forensic Analysis of Explosives

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into Forensic Science M.S. program or C.I. Modern analytical methods and protocols for the forensic analysis of low and high explosives. Analysis of pure materials and post-blast residues will be covered along with scene search and recovery protocols.

Odd Spring

College of Sciences - Department of Chemistry

CHS 6546 - Forensic Analysis of Ignitable Liquids

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into Forensic Science M.S. or C.I. Modern analytical methods and protocols for the forensic analysis of ignitable liquids. Ignitable liquid production as relates to ASTM classification, sampling methods, databases and modern methods of data analysis.

Even Spring

College of Sciences - Department of Chemistry

CHS 6613 - Current Topics in Environmental Chemistry**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CHM 2045C, CHM 2046, or the equivalent of a BS in biological, molecular, chemical or engineering sciences, or C.I.

Advanced principles of environmental chemistry, environmental law, current remediation technologies and industrial practices relating to the environment.

Odd Spring

College of Sciences - Department of Chemistry

Civil Engineering

CEG 6515 - Retaining Structures and Slope Stability

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4011C and CEG 4012 or C.I.

Earth pressures, retaining structures, design of retaining walls, sheet piles, mechanically stabilized earth, soil nails, anchored and braced excavations. Slope stability, shear strength, limit equilibrium.

Even Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 5340 - Internet of Things: Applications in Smart Cities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGN 3405 or C.I.

Internet of Things (IoT), urban sensing ecosystem, technological tools and methods, smart city infrastructure, IoT applications for smart cities, challenges and case studies.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 5341 - Interdisciplinary Introduction to Smart Cities' Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE3810 and ENV 3001 with a grade of "C" (2.0) or better or C.I.

This course provides a broad multidisciplinary background about the different systems and technologies used in Smart Cities.

Fall, Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 5506 - Advanced Pavement and Civil Engineering Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CGN 3501C, CEG 4011C. Pavement and civil engineering materials such as aggregate, Portland cement, and concrete. In addition, mechanics, modeling, analysis, and design of those materials will be included.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 5617 - Infrastructure Systems Optimization and Identification

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032, CGN 3405, Basic programming skills, or C.I.

This course covers the advanced mathematical programming techniques that are useful for civil infrastructure planning, operations, and maintenance with increasing infrastructure connectivity and data availability.

Even Fall, Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 5877 - Monitoring for Infrastructure Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): One of the following; CES 4100C, ENV 4120, ENV 4561, CWR 4203C, CWR 4101C or CCE 4004. Applications of modern instrumentation and data processing technologies to infrastructure monitoring and assessment. Topics in current and state-of-the-art monitoring techniques, SHM for infrastructure systems, and case studies on performance-based evaluation.

Odd Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 6342 - Modeling Human Behavior with Emerging Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Parsing and visualizing trajectory data, probabilistic graphical models, hidden Markov models, human mobility models, transportation network analysis, traffic state prediction, data-driven traffic assignment.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 6343 - Cyber-Physical Systems and Smart Cities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGN 5555 or C.I.

Introduction to cyber-physical systems, smart cities as large-scale CPS, modeling and control of networked interconnected agents, mean field games, applications and case studies.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 6655 - Regional Planning, Design, and Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Project course dealing with planning, design, and development of regional systems, including projections, case studies, design alternatives, environmental impact, etc.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CGN 6938 - Mobility in Smart Cities: Technologies and Application Areas

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE3810 with grade of "C" (2.0) or better or CI.

The course introduces students to research developments in intelligent transportation systems infrastructure with a focus on video-based data collection and networks connectivity.

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5935 - Water First Seminar Series

0 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 0

Contact Hours: 0

This course will expose students to state-of-the-art interdisciplinary water and environmental research as well as real world applications. It will provide networking opportunities with potential collaborators and prospective employers at other academic institutions, industry partners, or government agencies. PhD students supervised by faculty in the water resources or environmental engineering groups will be encouraged to actively participate by presenting their thesis and dissertation research in the seminar series.

Fall, Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

Civil Engineering Structures

CES 5144 - Matrix Methods for Structural Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 4100C or C.I.

Implementation of the matrix methods for structural analysis that are commonly and currently used in practice and in research, special topics such as finite element formulations, special analysis procedures, and use of software packages.

Even Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 5325 - Bridge Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 4605 and CES 4702 or C.I.

Bridge engineering fundamentals, design philosophies, analysis and design concepts for concrete and steel bridges, AASHTO specifications, Bridge rating, and introduction to Bridge health monitoring.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 5606 - Advanced Steel Structures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 4605.

Behavior and design of steel buildings; emphasis on AISC-LRFD building code; complex connections, tension members, stability of compression members, laterally unsupported beams, frames, and beam columns.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 5706 - Advanced Reinforced Concrete

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 4702 or C.I.

Design of frames, two-way floor systems, shear walls; shear and torsion; compression field theory; inelastic analysis; wind and seismic design; introduction to prestressed concrete.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 5821 - Masonry and Timber Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Structural properties of masonry and timber; design loads-codes and standards; analysis for axial loads, flexure and shear.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6010 - Structural Reliability

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 and CES 4100C or equivalent course or C.I.

Application of probability theory to classical and computational reliability methods for civil systems. Topics in component and system reliability, simulation, bounds, sensitivity, and model updating.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6116 - Finite Element Structural Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 5144 or C.I.

Concept, theory, and application of the finite element method; analysis of one-, two-, and three-dimensional structural components and systems; stability and dynamics; applications.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6170 - Boundary Element Methods in Civil Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Green's theorems; integral formulations for two- and three-dimensional and axisymmetric problems of solid mechanics; applications to structural and geomechanics problems; programming.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6209 - Dynamics of Structures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Response analysis of single and multi-degree-of-freedom systems to periodic and non-periodic excitations; continuous systems; response spectra; applications in structural engineering.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6220 - Wind and Earthquake Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 6209 or C.I.

Wind characteristics; wind effects on structures; dynamic analysis for wind loads; nature of earthquake forces; response spectra and seismic design; wind and seismic codes.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6230 - Advanced Structural Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Review of biaxial bending and torsion; plate bending; theory of elasticity, visco-elasticity and plasticity; anisotropic elasticity and stability.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6527 - Nonlinear Structural Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CES 5144 or C.I.

Structural nonlinear analysis theory and applications, including material and geometric nonlinearity, numerical methods and solution strategies, inelastic element formulation, and use of software packages.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6715 - Prestressed Concrete Structures**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CES 4702 and CES 5706 or C.I. Prestressed concrete behavior and design; applications in building and bridge design including pre- and post-tensioned girders, floors, roofs, and walls.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CES 6876 - Smart City Built Infrastructure**3 Credit Hours**

Prerequisite(s): CES4100 with a grade of "C" (2.0) or better or C.I.

Introduction to concepts, methods and technologies related to design, assessment, analysis, monitoring and non-destructive evaluation methods with specific applications for smart city built infrastructure.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

Civil Geotechnical Engineering**CEG 5405 - Seepage in Soils****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4011C.

Principles of flow through soils; flow nets, analytical solutions; seepage forces, design of filters and drainage layers; dewatering, drainage in dams, embankments, and pavement systems.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CEG 6065 - Soil Dynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4011C.

Comprehensive coverage in calculating the dynamic response of foundations, presenting a variety of contemporary techniques for fields and laboratory.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CEG 6115 - Foundation Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4012 or C.I.

Analysis and design of spread footings, mat foundations, retaining walls, sheeting and bracing systems and pile foundations.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CEG 6317 - Advanced Geotechnical Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4012 or C.I.

Mechanics of soils and models; elasticity and plasticity of soil bodies; strength of soils and stability of soil structures.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CEG 6610 - Smart Underground Structures: Tunnels and Shafts

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CEG 4011C and CEG 4012 or C.I.

Analysis, design, construction of tunnels. Smart underground space. Field instrumentation. Stresses openings. Tunnel design. Case histories. Construction methods. Sustainability urban environments. Future Florida underground space.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CEG 7980 - Dissertation

1-99 Credit Hours

Class Hours: 1-99

Lab and Field Work Hours: 0

Contact Hours: 1-99

May be repeated for credit.

Fall, Spring, Summer

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

Civil Water Resources

CWR 5125 - Groundwater Hydrology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4124C or C.I.

Theories of groundwater movement, geological factors, analysis and design techniques, etc. Emphasis on practical considerations.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5205 - Hydraulic Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4202C or C.I.

Concepts of fluid mechanics and hydrodynamics applied to natural and man-made flow of intent to civil and environmental engineering.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5515 - Numerical Methods in Civil and Environmental Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4202C or C.I.

This course will present intermediate to advanced numerical methods theory and include code development and error assessment, while targeting civil and environmental engineering applications.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5545 - Water Resources Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4120 or C.I.

Systems identification and solution to complex water allocation problems, and other hydraulic engineering designs and operations using economic analysis and operations research techniques.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5634 - Water Resources in a Changing Environment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4120.

To model and understand potential impact of climate change and human activities on hydriodic systems and various spatial and temporal scales.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 5917 - Directed Research

College of Engineering and Computer Science

CWR 5937 - Special Topics

College of Engineering and Computer Science

CWR 5999 - Coastal Systems Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4120, CWR 4633C, GLY 4730 (Mar. Geol.), OCE 3008, or C.I

Coastal features; drivers of coastal flooding; climate variability and change; numerical and statistical modeling of extremes; coastal flood risk, management and adaptation.

Even Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6007 - Ecohydraulics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CWR 5634 OR Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology or C.I. Sustainable and multi-objective management of rivers, shorelines and aquatic resources, this course investigates fundamental linkages between physical processes and ecological responses in engineered and natural systems.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6102 - Advanced Hydrology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4120C or C.I.

Single site and regional frequency analysis; modeling hydrologic systems; lumped and distributed event models for urban and natural drainage basins; continuous simulation; real-time forecasting.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6126 - Groundwater Modeling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 5125.

Review of contemporary computer-based groundwater flow models and their application to environmental engineering problems.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6235 - Open Channel Hydraulics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4202C or C.I.

Free surface flow studies by empirical and theoretical methods for the design, operation, and management of open channels.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6236 - River Engineering and Sediment Transport**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4633C or C.I.

River morphology and regime with stabilization and modification of river courses. Sediment transport including control methods and modeling.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6535 - Modeling Water Resources Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4120 or C.I.

Contemporary mathematical models for water quality and quantity considerations including computer-based hydraulic and hydrologic models.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6539 - Finite Elements in Surface Water Modeling**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 5515 or C.I.

This course explores finite element techniques as applied to surface water modeling, introduces theory and applications, and develops means by which errors can be appraised.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6606 - Stochastic River Network Hydro-Geomorphology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CWR 5125, CWR 5205, CWR 5545, CWR 5634 or C.I. Review of Probability and Statistics, Fourier and Wavelet Analysis, Fractal Characteristics of River basins, Self-organization, Modeling River Basins, River Basin response to Climatic and Anthropogenic Changes.

Odd Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

CWR 6660 - Water Policy, Planning and Governance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CWR 4633C or C.I.

This course deals with political, social, economic and administrative systems that affect the use, development, planning, and management of water resources at different levels.

Even Fall

CLP 5937 - Special Topics

College of Sciences

CLP 6181 - Psychological Theories of Substance Abuse Treatment

3 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Acceptance to the Clinical Psychology Master's or PhD programs or C.I.

Focuses on the mechanisms responsible for, and the treatment of, substance tolerance and dependence.

Odd Fall, Even Fall

College of Sciences - Department of Psychology

CLP 6191 - Multicultural Psychotherapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and C.I.

The theories, issues, and techniques of counseling within a multicultural environment.

Occasional

College of Sciences - Department of Psychology

CLP 6195C - Introduction to Psychotherapy

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate admission and C.I.

Counseling theory with experimental lab component including practice in specific techniques in counseling.

Material and Supply Fee: \$10.00 *Odd Spring*

College of Sciences - Department of Psychology

CLP 6321 - Psychotherapy in Community Settings

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Acceptance to Clinical Psychology PhD program or C.I.

Survey of the community agencies that deliver mental health/counseling services. Includes on-site visits to local agencies. This course is intended for the PhD in Clinical Psychology; in certain instances graduate students in other programs may enroll.

Occasional

College of Sciences - Department of Psychology

CLP 6441C - Individual Psychological Assessment I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate admission and C.I.

Theory and techniques of psychological assessment with emphasis on intake interviewing, cognitive and personality assessment, and report writing.

Material and Supply Fee: \$20.00 *Fall*

College of Sciences - Department of Psychology

CLP 6449C - Career and Lifestyle Assessment

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): CLP 6441C or C.I.

Application and theory of obtaining, integrating, and utilizing career, vocational, and lifestyle assessment in clinical settings such as rehabilitation centers, mental health centers, and hospitals.

Material and Supply Fee: \$15.00 *Spring*

College of Sciences - Department of Psychology

CLP 6457C - Group Psychotherapy

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate admission and C.I.

Group counseling: theory and practice. Experiential group laboratory.

Occasional

College of Sciences - Department of Psychology

CLP 6459C - Human Sexuality, Marriage, and Sex Therapies

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate admission, and C.I.

Human sexuality, theory and practice of specific techniques of marriage and sex therapy.

Occasional

College of Sciences - Department of Psychology

CLP 6460C - Introduction to Child, Adolescent, and Family Therapies

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate admission, and C.I.

Theories and practices of child, adolescent and family therapies. Includes practice in specific techniques.

Occasional

College of Sciences - Department of Psychology

CLP 6461 - Cognitive-Behavioral Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Must be enrolled in the Clinical Psychology PhD Program.

Covers theory, outcomes, and methods of cognitive-behavioral therapy. Includes discussion of variations of CBT, as targeted to particular psychiatric disorders.

College of Sciences - Department of Psychology

CLP 6527c - Measurement, Research Design, and Statistical Analysis in Clinical Psychology I

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Corequisite(s): Admission into the Master's in Clinical Psychology Thesis Track or instructor permission.

This course provides an overview of approaches to research design, statistical analysis, and measurement in the field of clinical psychology.

Fall

College of Sciences - Department of Psychology

CLP 6528C - Measurement, Research Design, and Statistical Analysis in Clinical Psychology II

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): Admission to the Master's in Clinical Psychology, Research/Thesis Track, CLP6527c, or instructor permission.

This course is a continuation of CLP 6527C, and CLP 6528C is a prerequisite. Additional topics are covered in the areas of research design, statistical analysis, and measurement in the field of clinical psychology.

Fall

College of Sciences - Department of Psychology

CLP 6909 - Research Report

College of Sciences

CLP 6918 - Directed Research

College of Sciences

CLP 6932 - Ethical and Professional Issues in Mental Health Practices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate admission, C.I.

Examination of codes of ethics, laws, and professional standards in the mental health field.

Occasional

College of Sciences - Department of Psychology

CLP 6938 - Special Topics

College of Sciences

CLP 6949 - Predoctoral Internship

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 40

Contact Hours: 40

Prerequisite(s): Acceptance to Clinical Psychology Ph.D. program or C.I.

Placement in an approved setting on a full-time basis for one calendar year. Required of all clinical Ph.D. students. This course is intended for the Ph.D. in Clinical Psychology, in certain instances graduate students in other programs may enroll.

Fall, Spring, Summer

College of Sciences - Department of Psychology

CLP 7125 - Lifespan Psychopathology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

Clinical presentation and etiological theories of psychological disorders across the lifespan.

Every Semester

College of Sciences - Department of Psychology

CLP 7136 - Child Psychopathology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

Clinical presentation and etiological theories of psychological disorders in children and adolescents.

Fall

College of Sciences - Department of Psychology

CLP 7145C - Introduction to Clinical Psychology and Psychotherapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to the Clinical Psychology Ph.D. program or C.I.

A historical look at clinical psychology, psychotherapy, and clinical research. May be used in the degree program a maximum of 2 times only when course content is different.

Fall, Spring

College of Sciences - Department of Psychology

CLP 7378 - Proseminar in Professional Psychology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

Survey of psychologists' roles in administration, supervision, and treatment development.

Odd Spring

College of Sciences - Department of Psychology

CLP 7429 - Clinical Neuropsychological Assessment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology Ph.D. program or C.I.

Provides foundational knowledge in clinical neuropsychological assessment, with a focus on assessment of adult clinical patients by doctoral-level clinical psychologists.

Occasional

College of Sciences - Department of Psychology

CLP 7446C - Child Psychological Assessment

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to Psychology Ph.D. Clinical track or C.I.

Emphasis is placed on theories and techniques of psychological assessment with children and adolescents. Primary emphasis on interviewing, observation skills, and administering intelligence tests.

Spring

College of Sciences - Department of Psychology

CLP 7447C - Clinical Psychological Assessment

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to Psychology PhD Clinical track or C.I.

Theory and techniques of adult psychological assessment with emphasis on intake interviewing, cognitive and personality assessment, and report writing.

Every Semester

College of Sciences - Department of Psychology

CLP 7474 - Child Empirically Supported Treatments

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

Empirically supported psychological and pharmacological treatments for children and adolescents.

Odd Spring

College of Sciences - Department of Psychology

CLP 7494 - Empirically Supported Psychotherapies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

Empirically supported psychological and pharmacological treatment across the lifespan.

Every Semester

College of Sciences - Department of Psychology

CLP 7623 - Ethical and Professional Issues in Clinical Psychology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology PhD or C.I.

APA Code of Ethics, relevant laws, and professional standards in clinical psychology.

Fall

College of Sciences - Department of Psychology

CLP 7919 - Research

College of Sciences

CLP 7939 - Affective Neuroscience

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Advanced recent knowledge on the topic of affective neuroscience. We will review and discuss recent scientific journal articles across a range of subtopics related to the neuroscience of emotion. We will include both healthy and disordered functioning of the neural and hormonal systems that relate to a wide range of emotions.

College of Sciences - Department of Psychology

CLP 7942L - Supervision Practicum

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology Ph.D. program or C.I.

Advanced practicum focused on learning in didactic and experiential effective clinical supervision. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Sciences - Department of Psychology

CLP 7943C - Clinical Practicum

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Acceptance to Clinical Psychology Ph.D. program or C.I.

Clinical activities performed in an approved university or community setting under faculty/staff supervision. This course is intended for the Ph.D. in Clinical Psychology, in certain instances graduate students in other programs may enroll.

Material and Supply Fee: \$15.00 *Fall, Spring, Summer*

College of Sciences - Department of Psychology

Communication

COM 5312 - Introduction of Communication Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Provides the foundational knowledge and skills for conducting research in graduate Communication coursework including both quantitative and qualitative approaches.

Fall, Spring, Summer

Nicholson School of Communication and Media - Department of Communication

COM 5917 - Directed Research

Nicholson School of Communication and Media

COM 5932 - Topics in Communication Theory and Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Communication M.A. program or C.I. In-depth examination of a particular area of communication theory and research, emphasizing major developments, current uses, implications for research, and overall impact on the field.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 5937 - Special Topics

Nicholson School of Communication and Media

COM 6008 - Proseminar in Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Communication M.A. program or C.I.

Introduction to the field of communication at the graduate level emphasizing skills and practices needed to succeed at the graduate level and as a professional in the field.

Fall, Spring

Nicholson School of Communication and Media - Department of Communication

COM 6046 - Interpersonal Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status.

Survey of theoretical perspectives in interpersonal communication.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 6047 - Interpersonal Support in the Workplace

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Interpersonal theories relevant to understanding marginalization and building supportive relationships in the workplace.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6048 - Communication in Close Relationships

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Classic and contemporary theory of communication in close relationships.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6121 - Communication Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Analysis and development with reference to particular media. Organizational theory, structure, and behavior.

Management principles and operations.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6145 - Organizational Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Organizational communication theory, perspectives, methods and current issues that reflect the centrality of communication processes in constituting organizing and organizations.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6303 - Qualitative Research Methods in Communication**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Communication M.A. or C.I.

Examination of qualitative methods in communication with emphasis on interviewing, ethnography, focus groups, observational methods and data interpretation.

Fall, Spring

Nicholson School of Communication and Media - Department of Communication

COM 6304 - Quantitative Research Methods in Communication**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Communication M.A. program or C.I.

Examination of quantitative methods in communication. Topics include experimental research design, sampling procedures, survey design, content analysis, and introduction to data analysis.

Fall, Spring, Summer

Nicholson School of Communication and Media - Department of Communication

COM 6401 - Communication Theory**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Graduate standing or C.I.

Examination and critical analysis of the major theories of communication processes as well as their underlying metatheoretical foundations.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 6425 - Symbolism in Terrorism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Communication M.A. program or C.I.

Skills for, and approaches to, analyzing communication strategies used by terrorists in pursuing; their long-term objectives and goals.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6463 - Studies in Intercultural Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Comprehensive survey of methodological and theoretical issues and concepts in intercultural and cross-cultural research.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6466 - Persuasion in the Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The underlying persuasive messages about cultural norms and values that are communicated through mass media channels such as movies, music, etc.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6467 - Studies in Persuasion

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status.

Analysis of research and major theoretical perspectives in persuasive communication.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6468 - Communication and Conflict

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Research seminar in the study of communication and conflict.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6525 - Communication Strategy and Planning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Focus on the creation of communication strategies in conjunction with overall organizational goals, with emphasis on decision making and management.

Occasional

College of Sciences - Nicholson School of Communication and Media

COM 6535 - Communication Campaigns

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Communication M.A. program or Strategic Communication Ph.D. program or C.I.

This seminar examines the strategies and effects of public communication campaigns with a focus on foundational theory and empirical research.

Occasional

Nicholson School of Communication and Media - Department of Communication

COM 6909 - Research Report

Nicholson School of Communication and Media

COM 6918 - Directed Research

Nicholson School of Communication and Media

COM 6938 - Special Topics

Nicholson School of Communication and Media

COM 6949 - Cooperative Education in Communications

Nicholson School of Communication and Media

COM 7025 - Health Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. or C.I.

Examines issues of healthcare provider-patient communication, health literacy, public health, health in other cultures, ethics in health communication, and mass media health messages.

Fall

Nicholson School of Communication and Media - Department of Communication

COM 7227 - Seminar in Health Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COM 7025, admission to Strategic Communication Ph.D. program, or C.I.

A seminar-format advanced course designed to explore in depth a specific area of focus in health communication.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 7236 - Seminar in Risk and Crisis Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COM 7815, admission to Strategic Communication Ph.D. program, or C.I.

An advanced course designed to explore in depth a specific area of focus in risk and crisis communication selected by the instructor.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 7325 - Seminar in Research Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

In-depth examination of a particular quantitative or qualitative research method in communication with a focus on producing a publishable study.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 7464 - Theory Building for Strategic Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

Required for communication doctoral students and is designed for all graduate students who have an interest in paradigmatic issues related to communication theory construction.

Spring

Nicholson School of Communication and Media - Department of Communication

COM 7528 - Communication and Community Engagement

VAR Credit Hours

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

Project based on a partnership with a community organization.

Fall

Nicholson School of Communication and Media - Department of Communication

COM 7529 - Strategic Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

A survey of theories, principles, and processes of strategic communication in diverse contexts including advertising, public relations, health, crisis, instruction, persuasion, journalism, and organizational communication.

Fall

Nicholson School of Communication and Media - Department of Communication

COM 7745 - Current Issues in Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

In-depth examination of a particular area of communication theory and research, emphasizing major developments, current uses, implications for research, and overall impact on the field.

Spring, Fall

Nicholson School of Communication and Media - Department of Communication

COM 7815 - Risk Communication**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

A message-centered approach to the study of risk communication. The course establishes risk communication as a distinct sub-discipline within the communication discipline.

Fall

Nicholson School of Communication and Media - Department of Communication

COM 7821 - Instructional Communication in Strategic Contexts**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

Instructional communication examines communication that occurs when instructing others. This course will include strategic instructional communication theories, research and best practices.

Fall

Nicholson School of Communication and Media - Department of Communication

COM 7920 - Doctoral Colloquium**0 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 0

Contact Hours: 0

Prerequisite(s): Admission to Strategic Communication Ph.D. program of C.I.

Focuses on progression through the NSCM Ph.D. degree program, the research process, guidance on the academic profession, and written and oral presentation of scholarly research.

Fall

Nicholson School of Communication and Media - Department of Communication

MMC 6567 - New Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Communication M.A. program or Strategic Communication Ph.D. program or C.I.

A study of the development and convergence of new technologies and their mediation.

Occasional

Nicholson School of Communication and Media - Department of Film and Mass Media

SPC 7685 - Rhetorical Criticism of Strategic Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Strategic Communication Ph.D. program or C.I.

Process of rhetorical criticism of strategic communication, employing theory and practice to understand critical approaches to health and risk/crisis communication messages.

Fall

Nicholson School of Communication and Media - Department of Communication

Community Psychology

CYP 6942 - Practicum in Psychological Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Clinical Psychology MA and CLP 6195C and CLP 6441C, or C.I. Training in psychotherapy skills in a community setting under faculty supervision.

Spring

College of Sciences - Department of Psychology

CYP 6948C - Psychology Internship

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Clinical psychology MA students.

Supervised placement in community setting for 10-30 hours per week. Graded S/U. May be repeated for credit.

Occasional

College of Sciences - Department of Psychology

Comparative Politics

CPO 5917 - Directed Research

College of Sciences

CPO 5937 - Special Topics

College of Sciences

CPO 6038 - Political Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to graduate degree-seeking program, or C.I. Analyze the political determinants of economic development and the economic causes of political outcomes such as democratization.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6056 - Politics of Authoritarian Regimes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Introduction to the politics of authoritarian regimes. Review of academic work on how autocrats stay in power and the characteristics of political contention in authoritarian states.

Occasional

College of Sciences - School of Politics, Security, and International Affairs

CPO 6058 - Revolution and Political Violence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Studies or C.I.

Seminar addresses theory and analytical models of political revolutions and insurgencies with cases, especially Third World.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6091 - Seminar in Comparative Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Introduction to the theory and methodology of comparative politics, institutions, and contextual factors of selected political systems such as Canada, European, and Third World nations.

Even Spring

College of Sciences - School of Politics, Security and International Affairs

CPO 6206 - Comparative Politics of Africa

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate degree-seeking program or C.I.

Explores the conceptual, theoretical, methodological issues in the study of African political systems.

Occasional'

College of Sciences - School of Politics, Security, and International Affairs

CPO 6307 - Issues in Latin American Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Examines and evaluates major issues in Latin American politics employing political science theories and methodologies.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6407 - Comparative Politics of the Middle East

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or consent of the instructor.

A study of issues in Middle Eastern politics as studied in comparative politics including political regimes, political economy, political violence, environmental politics, and gender politics.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6446 - Comparative Political Parties

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Theories of the formation, structure, organization, and behavior of political parties as well as theories of political party systems.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6729 - Global Security in the Age of Migration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explore migration as the outcome and cause of security concerns, while introducing students to theories of migration, conflict, security, and border control policies.

Occasional

College of Sciences - School of Politics, Security and International Affairs

CPO 6776 - Comparative Rising Powers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate degree-seeking program or C.I.

The course examines key contemporary rising powers in Eurasia: China, India, and Russia. It focuses on a comparative analysis of the nature of their rise.

Occasional

College of Sciences - School of Politics, Security and International Affairs

Computer Applications for Computer Scientists

CAP 5055 - AI for Game Programming

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CS Foundation Exam or EEL 4851C or C.I.

Surveys cutting-edge AI techniques for video games and board games and contrasts them with more traditional approaches.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 5100 - Human-Computer Interface Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4331C, graduate standing and/or approval of the Director of the Software Engineering Certificate Program.

Focuses on dynamics of human-computer interaction. Provides a comprehensive overview of HCI design as a software discipline. Features a user-centered approach to Web-based application design.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5115 - Virtual Reality Engineering

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): MAS 3105 or C.I.

Virtual reality, scene graphs and computer graphics, development of travel, selection, manipulation, system control, animation-based, and physics-based interaction techniques, implementation of 360° videos.

Odd Fall, Even Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5150 - Foundations of Computer Security and Privacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Students are expected to have knowledge equivalent to a BS in Computer Science. The course provides students with fundamental knowledge in computer security and privacy.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5151 - Internet of Things Security and Privacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5200.

This class introduces full-stack IoT security and privacy issues, including hardware, software, network, and data.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 5415 - Computer Vision

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 3503C, MAC 2312 and COT 3960.

Image formation, binary vision, region growing and edge detection, shape representation, dynamic scene analysis, texture, stereo and range images, and knowledge representation.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5510 - Bioinformatics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Background in programming language or molecular biology.

This course introduces problems, concepts, algorithms, and applications in Bioinformatics. It covers essential topics such as sequence alignment and prediction of gene and protein structure.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 5512 - Evolutionary Computation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 4630 or COP 3503C or C.I.

This course covers the field of evolutionary computation, focusing on the theory and application of genetic algorithms.
Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 5516 - Medical Image Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAS 3105 and COP 4020 or COT 4210.

This course provides students with the foundation necessary for understanding, visualizing, and quantifying medical images with computational methods.
Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 5610 - Machine Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 4630 or C.I.

Origin/evaluation of machine intelligence; machine learning concepts and their applications in problem solving, planning and "expert systems" symbolic role of human and computers.
Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 5619 - Artificial Intelligence for FinTech

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5840.

Fundamentals of machine learning; deep learning; reinforcement learning; applications to customer service automation, personalization, biometrics, process automation, and fraud prevention.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5636 - Advanced Artificial Intelligence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 4630.

AI theory of knowledge representation, "expert systems", memory organization, problem solving, learning, planning, vision, and natural language.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 5725 - Computer Graphics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Architecture of graphics processors; display hardware; principles of programming and display software; problems and applications of graphic systems.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 5738 - Visualization Techniques for Data Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 3330, COP 3502C. Techniques for visualization that are useful for analyzing and presenting quantitative information are covered. Projects analyze one or more real-world publicly-available datasets. Understanding the data, visualizing it, creating hypotheses, and visually exploring them. Application of statistical techniques to test hypotheses about data trends and visualize how well their hypotheses match with their analysis.

Fall, Spring, Summer

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CAP 5917 - Directed Research

College of Engineering and Computer Science

CAP 5937 - ST: Mixed Reality - Virtual Reality

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 2

Virtual reality, scene graphs, immersion, presence, VR sickness, interaction techniques, audio, haptics, system control, perception, interaction principles, physics, scenario fidelity, animations, virtual agents, 360° videos.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6105 - Pen-Based User Interfaces

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5610 or C.I.

Designed to give students a thorough understanding of the techniques, algorithms, and evaluation methodologies used in designing and developing pen-, sketch-, and gesture-based user interfaces.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 6110 - Augmented Reality Engineering

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): CAP 5115.

Augmented reality, tracking, situated visualization, simultaneous localization and mapping, AR interactions, calibration, registration, occlusion, photometric registration, common illumination, diminished reality, viewpoint guidance, multiple perspectives, collaboration.

Odd Spring, Even Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6117 - Mixed Reality Project

3 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): CAP 6110.

Mixed reality, project management, reporting, prototyping, gesture and voice recognition, design walkthroughs, sound design, 3D scanning, character generation, motion capture, UX inspections, tutorials, help, documentation.

Odd Fall, Even Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 6121 - 3D User Interfaces for Games and Virtual Reality

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5725 or C.I.

Introduction to the design, implementation, and evaluation of the fundamental techniques in spatial 3D interaction.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6133 - Advanced Topics in Computer Security and Computer Forensics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 5611, COT 5405, CNT 5008. Advanced topics in computer security and forensics such as cryptography; automatic intrusion detection, advanced pattern matching, statistical techniques, firewalls, and vulnerability scanning.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6135 - Malware and Software Vulnerability Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Digital Forensics MS major or CDA 5106 or COT 5405.

Analyzes computer malicious codes, such as virus, worm, trojan, spyware, and software vulnerabilities, such as buffer-overflow.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6307 - Text Mining I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 3330, CAP 4630; or C.I. Extracting knowledge from unstructured text collections. Document indexing, similarity

and summarization, clustering, classification, named entity recognition and relation extraction, text stream processing. Several programming assignments.

Occasional

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CAP 6315 - Social Media and Network Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5316.

Techniques developed by the computer science research community for analyzing social networks and social media datasets.

Summer

College of Engineering and Computer Science - Department of Computer Science

CAP 6318 - Computational Analysis of Social Complexity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CAP 5316. Computational concepts, principles, modeling and simulation approaches used to analyze complex social and economic phenomena, leveraging the availability of large amounts of data, and elements of complexity theory.

Odd Spring

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CAP 6411 - Computer Vision Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5415.

Recent systems contributing toward recognition, reasoning, knowledge representation, navigation, and dynamic scene analysis. Comparisons, enhancements, and integrations of such systems.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6412 - Advanced Computer Vision

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5415.

Computational theories of perception, shape from IX techniques, multi-resolution image analysis, 3-D model based vision, perceptual organization, spatiotemporal model, knowledge-based vision systems.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6419 - 3D Computer Vision

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5415 or EEL 5820 or C.I.

2D/3D Projective Geometry, Projective Transformation Estimation, Camera Calibration, Single View Modeling, Bi-focal Modeling, Fundamental Matrix, Stratified Structure, Homography, Tri-focal Tensor, Auto-Calibration, Cheirality.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6515 - Algorithms in Computational Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5405 or CAP 5510.

This course will concentrate on algorithmic problems in computational biology.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 6517 - Computational Genomics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5510.

This course will summarize computational techniques for comparing and analyzing genomics; (DNA) sequences.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6545 - Machine Learning Methods for Biomedical Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5510 or C.I.

Summarize computational techniques for bridging two fields: machine learning and biomedical science to illustrate successful data mining and knowledge discovery in an interdisciplinary context.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6614 - Current Topics in Machine Learning**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5610 or C.I.

Machine learning, the study of algorithms that allow computer programs to learn from experience, is a rapidly changing area. This course will be a deep dive into current topics in machine learning, collected from papers appearing at recent machine learning conferences.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6616 - Neuroevolution and Generative and Developmental Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 3503C or C.I.

Focuses on evolving neural networks for difficult sequential decision and control tasks and associated issues in efficient encoding and representation.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6640 - Computer Understanding of Natural Language**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5636.

A study of the different approaches to build programs to understand natural language. The theory of parsing, knowledge representation, memory, and inference will be studied.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6671 - Intelligent Systems: Robots, Agents, and Humans

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5610 or C.I.

Includes practical techniques for designing intelligent agents capable of planning, learning, and cooperation. Discussion of psychological/social issues.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6675 - Complex Adaptive Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course is an introduction to the field of complex adaptive systems and will cover basic definitions, theoretical background, and empirical analyses.

Fall

College of Engineering and Computer Science - Department of Computer Science

CAP 6676 - Knowledge Representation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CAP 5636. Topics covered include terminological languages, logicist approaches, ontologies, ontological and conceptual relativity, processes, intangibles, time, building large knowledge bases, and complexity analysis.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6701 - Real-time Realistic Rendering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 4720 or CAP 5725.

GPU Programming; State-of-the-art algorithms for: Real-time rendering of a lighting effects and realistic materials; Real-time volume rendering; real-time simulation and rendering of smoke.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6721 - Ray Tracing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CAP 5725, programming experience.

Advanced graphics: Implementation of ray tracing algorithm plus extensions, spatial subdivisions, MC sampling, camera models, texture mapping, instancing.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CAP 6737 - Interactive Data Visualization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 5711. Principles and techniques for interactive data visualization that are useful for analyzing, presenting and exploring information are covered. The emphasis will be on algorithmic aspects of developing interactive visualization. The students will receive practical experience of building interactive visualization systems.

Spring

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CAP 6909 - Research Report

College of Engineering and Computer Science

CAP 6918 - Directed Research

College of Engineering and Computer Science

CAP 6938 - ST: Advanced Virtual Reality

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Basic knowledge of VR application development is recommended.

Advanced topics in virtual reality: Current and emerging technologies, methods, and application domains.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6938 - ST: Immersive Visualization: Using Virtual Reality Techniques to Extract Knowledge from Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Given that the field is new there are no predefined systems to develop immersive visualization applications, therefore some programming experience equivalent to an introductory programming course is required. Some data processing experience as well as 2D visualization and Virtual Reality development experience would be beneficial but is not formally required.

Data sizes are growing beyond what standard tools can handle. This course looks at using immersive and virtual reality techniques to analyze and understand data.

Spring

College of Engineering and Computer Science - Department of Computer Science

CAP 6942 - Project in Data Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 5711, CAP 5610, CNT 5805 and STA 6704. A project-focused course that demonstrates mastery of data analytics through development of novel algorithms or innovative application of existing techniques for data mining applications.

Spring, Summer

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CAP 7919 - Research

College of Engineering and Computer Science

CAP 7939 - Special Topics

College of Engineering and Computer Science

Computer Design/Architecture

CDA 5106 - Advanced Computer Architecture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4768C.

Modern processor design, instruction-level parallelism, thread-level parallelism, data-level parallelism, memory hierarchy, and I/O.

Fall, Spring

College of Engineering and Computer Science - Department of Computer Science

CDA 5110 - Parallel Architecture and Algorithms

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 4210, CDA 5106.

General-purpose vs. special-purpose parallel computers; arrays, message-passing; shared-memory; taxonomy; parallelization techniques; communication synchronization and granularity; parallel data structures; automatic program restructuring.

Occasional

College of Engineering and Computer Science - Department of Computer Science

CDA 5209 - Foundations of Secure Execution Environment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CDA 5106

This class is a graduate course covering the foundations of secure execution environment.

College of Engineering and Computer Science - Department of Computer Science

CDA 5220 - Foundations of Secure Execution Environment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CDA 5106.

This class covers the foundations of secure execution environment.

Spring

College of Engineering and Computer Science - Department of Computer Science

CDA 6107 - Parallel Computer Architecture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): CDA 5106.
Principles and trade-offs in the design of parallel architectures, shared-memory, message-passing, dataflow, data-parallel machines, cache coherence protocols, and consistence models.
Spring

College of Engineering and Computer Science - Department of Computer Science

CDA 6221 - Advanced Topics in Secure Execution Environment

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): CDA 5201.
This class covers the advanced topics in secure execution environment.
Occasional

College of Engineering and Computer Science - Department of Computer Science

CDA 6530 - Performance Models of Computers and Networks

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.
Performance models of computer systems and networks using probability models and discrete event simulations. Queuing theory and modeling tools.
Occasional

College of Engineering and Computer Science - Department of Computer Science

Computer Engineering

CDA 5121 - High Performance Computing and Programming

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): COP 3503C or C.I.
Basic hardware and software knowledge and essential programming skills for high-performance computing (HPC) including GPU computing and big data computing.
Fall

College of Engineering and Computer Science - Department of Computer Science

CEN 5016 - Software Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4331C.

Application of formal software processes, engineering methods, and documentation standards to the development of large scale software systems. A team project is required.

Spring

College of Engineering and Computer Science - Department of Computer Science

CEN 6075 - Formal Specification of Software Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Discrete math (equivalent to COT 3100C, MAD 2104, or MHF 3302) or C.I.

Issues and current research in formal specification and verification of software-intensive systems. mathematical models and formalisms.

Odd Spring

College of Engineering and Computer Science - Department of Computer Science

CEN 6087 - Cloud Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CDA 5106 or C. I.

Introduces cloud computing, infrastructure, applications, architecture, resource management, security, cloud storage systems and networks for computer clouds.

Fall

College of Engineering and Computer Science - Department of Computer Science

Computer General Studies

CGS 5131 - Computer Forensics I: Seizure and Examination of Computer Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Computer literacy and C.I.

Legal issues regarding seizure and chain of custody. Technical issues in acquiring computer evidence. Popular file systems are examined. Reporting issues in the legal system.

Material and Supply Fee: \$50.00 *Fall*

College of Engineering and Computer Science - Department of Computer Science

Computer Networks

CNT 5008 - Computer Communication Networks Architecture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4768C.

Computer networks, layers, protocols and interfaces, local area networks networking.

Fall

College of Engineering and Computer Science - Department of Computer Science

CNT 5410L - Cyber Operations Lab

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

IDC 5602 IDC 5602 or C.I. Programming, software, and hardware components for cybersecurity operations related to system administration, firewalls, cyber attack, cyber defense, security, secure architectures at network and computer level.

Summer

College of Engineering and Computer Science - Department of Computer Science

CNT 5805 - Network Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Undergraduate degree in CS, EE, or CpE. The emerging science of complex networks and their applications. Focus will be on algorithms, mathematical theories, and computational methods that analyze complex networks and predict their behavior.

Even Fall

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

CNT 5917 - Directed Research

College of Engineering and Computer Science

CNT 6418 - Computer Forensics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGS 5131 or C.I.

Computer network protocols and security models, cryptography, network intrusion detection and prevention, digital evidence collection and legal issues involved in network forensics, wireless security and forensics.

Material and Supply Fee: \$50.00 *Spring*

College of Engineering and Computer Science - Department of Computer Science

CNT 6519 - Wireless Security and Forensics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Digital Forensics MS major or CDA 5106 or COT 5405.

Advanced topics in wireless network security, security management, cryptography, wireless forensics and related areas.

Fall

College of Engineering and Computer Science - Department of Computer Science

CNT 6707 - Advanced Computer Networks

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CNT 5008 or C.I.

Recent advances in computer networks, overlay and multihomed networks, routing and multicasting, Internet friendly protocols, congestion control, QoS-differentiated services, cellular networks.

Spring

College of Engineering and Computer Science - Department of Computer Science

CNT 6918 - Directed Research

College of Engineering and Computer Science

CNT 7919 - Doctoral Research

College of Engineering and Computer Science

Computer Programming

COP 5021 - Program Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4020 and COT 4210 or C.I.

Static analysis of programs including theoretical and practical limitations, data flow analysis, abstract interpretation, and type and effect systems. Tools to automate program analysis.

Even Spring

College of Engineering and Computer Science - Department of Computer Science

COP 5537 - Network Optimization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Techniques for modeling complex, interconnected systems as networks; optimization with graph theory; algorithms, data structures, and computational complexity; statistical methods for studying large, evolving networks.

Fall

College of Engineering and Computer Science - Department of Computer Science

COP 5611 - Operating Systems Design Principles

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4600.

Structure and functions of operating systems, process communication techniques, high-level concurrent programming, virtual memory systems, elementary queuing theory, security, distributed systems, case studies.

Spring

College of Engineering and Computer Science - Department of Computer Science

COP 5621 - Compiler Construction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP4020 and COT 4210. Techniques in the design and implementation of compilers. Optimization, code generation, error recovery, attributed grammars. A project is required.

Odd Fall

College of Engineering and Computer Science - Department of Computer Science

COP 5711 - Parallel and Distributed Database Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4710.

Storage manager, implementation techniques for parallel DBMSs, distributed DBMS architectures, distributed database design, query processing, multidatabase systems.

Occasional

College of Engineering and Computer Science - Department of Computer Science

COP 5818 - Full Stack Development for FinTech

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): COT 5480.

Fundamentals of web technologies; front-end design using HTML5, CSS3 and ReactJS; SQL and NoSQL databases; back-end design.

Fall

College of Engineering and Computer Science - Department of Computer Science

COP 5917 - Directed Research

College of Engineering and Computer Science

COP 5937 - ST: Hacking For Defense (H4D): Solving National Security Issues with the Lean Launchpad

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Teaches entrepreneurship and provides opportunity for teams to rapidly build products and services that solve real problems for the Defense (DoD) and Intelligence Community (IC).

Spring

College of Engineering and Computer Science - Department of Computer Science

COP 6526 - Parallel and Cloud Computation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

COP 5711. The course introduces students to parallel computing across the hardware-software stack. Special emphasis is placed on parallel programming using emerging architectures and technologies.

Fall

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

COP 6616 - Multicore Programming

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5405 or C.I.

The course focuses on the computational principles, algorithms, and tools for multi-processor programming. Topics of study include programming models and frameworks, lock-free synchronization, transactional memory.

Occasional

College of Engineering and Computer Science - Department of Computer Science

COP 6730 - Transaction Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4710.

Transaction models, transaction monitors, isolation concepts and lock manager implementation, log manager, transaction manager, file and buffer management, client-server computing.

Occasional

College of Engineering and Computer Science - Department of Computer Science

COP 6731 - Advanced Database Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 5711.

Selected topics concerning object-oriented databases, multimedia databases, active databases, temporal databases, spatial databases, and information systems.

CIS 6206 - Electronic Discovery for Digital Forensics Professionals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CGS 5131 or C.I. This course will introduce experienced digital forensics students to legal and practical issues regarding electronic discovery, including legal requirements, technical solutions and practical aspects.

Fall

College of Engineering and Computer Science - Department of Computer Science

CIS 6207 - The Practice of Digital Forensics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGS 5131 and CNT 6418, or C.I.

Application of digital scientific techniques to solve information assurance, forensic and legal problems.

Fall, Spring

College of Engineering and Computer Science - Department of Computer Science

CIS 6386 - Operating Systems and File System Forensics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGS 5131 or C.I.

In-depth coverage of computer forensics related issues associated with multiple operating systems, multiple file systems, and applications.

Spring

College of Engineering and Computer Science - Department of Computer Science

CIS 6395 - Incident Response Technologies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Digital Forensics MS major or CDA 5106 or COT 5405.

This course covers security incidents and intrusions. Topics include: identifying and categorizing incidents, responding to incidents, log analysis, network traffic analysis, and tools.

Fall

College of Engineering and Computer Science - Department of Computer Science

CIS 6614 - Advanced Software Systems Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CIS 4615.

This course will cover various advanced topics on software threat modeling, secure software development life cycle, common security issues, and mitigations in modern software operation.

Fall

IDC 6941 - Capstone in Modeling and Simulation of Behavioral Cybersecurity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDC 6601 and CNT 5410L

Interdisciplinary teams of students apply modeling and simulation, cybersecurity, and psychology techniques to the analysis and prevention of emerging cybersecurity threats.

Fall

College of Graduate Studies - Department of Interdisciplinary Studies

Computing Theory

COT 5405 - Design and Analysis of Algorithms

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 4210.

Classification of algorithms, e.g., recursive, divide-and-conquer, greedy, etc. Data Structures and algorithm design and performance. Time and space complexity analysis.

Fall, Spring

College of Engineering and Computer Science - Department of Computer Science

COT 5480 - Computational Methods in FinTech I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Fundamentals of data structures; definition and analysis of algorithms; basic classes of algorithms; graph algorithms; algorithms for identity, privacy, anonymity and automation.

Fall

College of Engineering and Computer Science - Department of Computer Science

COT 5570 - Introductory Mathematics for Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Preparatory analytical survey of material for the M&S core Math Foundations course: algebra, discrete mathematics, and basic probability.

Fall

College of Graduate Studies - Department of Interdisciplinary Studies

COT 5600 - Quantum Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 3503C.

This course introduces basic concepts in quantum circuits and quantum algorithms.

Spring

College of Engineering and Computer Science - Department of Computer Science

College of Engineering and Computer Science

COT 5937 - Special Topics

College of Engineering and Computer Science

COT 6410 - Computational Complexity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5405.

Properties of algorithms, computational equivalence of machines, time-space complexity measures, examples of algorithms of different complexity, classification of algorithms, classes P and NP.

Occasional

College of Engineering and Computer Science - Department of Computer Science

COT 6417 - Algorithms on Strings and Sequences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5405 or C.I.

Study of algorithms for exact and approximate string pattern matching, sequence alignment and multiple string

alignment.
Occasional

College of Engineering and Computer Science - Department of Computer Science

COT 6481 - Computational Methods in FinTech II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5480.

Advanced data structures; advanced algorithms; automated accounting, risk management and tax automation; computer architectures and applications to financial technology; parallel programming on multiple processors and GPUs.

Spring

College of Engineering and Computer Science - Department of Computer Science

COT 6505 - Computational Methods/Analysis I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5405.

Analysis of direct and iterative solutions of systems of linear equations, eigenvalues and vectors and roots of nonlinear equations, error analysis.

Occasional

College of Engineering and Computer Science - Department of Computer Science

COT 6571 - Mathematical Foundations of Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5570 or equivalent background.

Provides analytical background material relevant to the M&S program. Emphasize critical thinking and problem solving and conducts survey probability and statistics, linear algebra and calculus.

Spring

College of Graduate Studies - Department of Interdisciplinary Studies

COT 6602 - Introduction to Quantum Information Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COT 5600 Quantum Computing.

Basic concepts in quantum information theory and quantum error correcting codes.

Corrections

CJC 5020 - Foundations of Corrections

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

Provides an overview of correctional process in U.S., including philosophical foundations and contemporary practices.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CJC 6135 - Seminar in Institutional Corrections

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Criminal Justice Ph.D. Public Affairs (Criminal Justice track) Ph.D. program or C.I. This course will provide an overview and analysis of institutional corrections from an historical, philosophical, theoretical and empirical perspective.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CJC 6165 - Seminar in Community Corrections

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. program, Public Affairs (Criminal Justice track) Ph.D. program or C.I. Provides an overview and analysis of community-based punishment polices and practices, focusing on issues related to community-corrections programs, professionals, and role of community in controlling crime.

Summer

College of Community Innovation and Education - Department of Criminal Justice

CJC 6486 - Seminar in Correctional Effectiveness**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. or Public Affairs (Criminal Justice track) Ph.D. program or C.I. Provides an overview and analysis of issues pertaining to correctional evaluation, focusing on the various effects of punishment on the offender, the criminal justice system, and society.

Fall

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to Creative Writing MFA or C.I.

On-site experience leading and sharing creative writing in community settings. May be used in the degree program a maximum of 3 times.

Occasional

College of Arts and Humanities - Department of English

CRW 6025 - Advanced Graduate Writing Workshop**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Creative Writing MFA and C.I.

Writing and revising in one established form. Advanced Graduate Writing Workshop may be taken five times (for a total of 15 hours) in order to produce a book-length manuscript (fiction, poetry, or other genre). May be used in the degree program a maximum of 5 times.

Fall, Spring

College of Arts and Humanities - Department of English

CRW 6720 - Professional Development in Creative Writing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Professional development lectures, discussions, and hands-on activities to assist graduate students in preparing for successful careers in writing, editing/publishing, and teaching.

Fall

College of Arts and Humanities - Department of English

CRW 6721 - Literary Journal Editing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Creative Writing MFA program or C.I.

Experiential-learning course. Students explore the history and current issues in literary publishing and participate in editing and producing an existing national journal published by the English department.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

CRW 6806C - Teaching Creative Writing

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Graduate standing in MFA in Creative Writing program or C.I.

Addresses trends in creative writing pedagogy, workshop alternatives, course design, classroom management, role of creative writing in academia.

Fall

College of Arts and Humanities - Department of English

CRW 6909 - Research Report

College of Arts and Humanities

CRW 6918 - Directed Research

College of Arts and Humanities

CRW 6920 - Fiction Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to the MFA Creative Writing Program and C.I.

Examination of fiction with an emphasis on the development of individual styles, writing and revising and preparing for publication.

Every Semester

College of Arts and Humanities - Department of English

CRW 6921 - Multi-Genre Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to the MFA Creative Writing Program or C.I.

Examination of two or more genres with an emphasis on the development of individual styles, writing and revising and preparing for publication.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Arts and Humanities - Department of English

CRW 6922 - Novel Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to the MFA Creative Writing Program or C.I. Corequisite(s): None

Examination of the novel with an emphasis on the development of individual styles, writing and revising and preparing for publication.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Arts and Humanities - Department of English

CRW 6923 - Nonfiction Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to the MFA Creative Writing Program or C.I.

Examination of creative nonfiction with an emphasis on the development of individual styles, writing and revising and preparing for publication.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Arts and Humanities - Department of English

CRW 6924 - Poetry Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to the MFA Creative Writing Program or C.I.

Examination of poetic forms with an emphasis on the development of individual styles, writing and revising and preparing for publication.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Arts and Humanities - Department of English

CRW 6938 - Special Topics

College of Arts and Humanities

CRW 6976 - Scholarship and Publication Models

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Creative Writing MFA, graduate standing or C.I.

Overview of thesis-writing process from proposal to defense, and possible subsequent publication.

Occasional

College of Arts and Humanities - Department of English

Criminology and Criminal Justice

CCJ 5015 - The Nature of Crime

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I. This course provides an overview of major dimensions of crime in the U.S.; epidemiology of crime, costs of crime, and typologies of crime and criminals.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 5456 - The Administration of Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate program, or C.I.

This course provides an overview of the criminal justice system and a critical analysis of formal and informal processing of offenders by criminal justice agencies.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 5917 - Directed Research

College of Community Innovation and Education

CCJ 5931 - Contemporary Criminal Justice Strategies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Graduate level analysis of contemporary crime issues and the reactions of the criminal justice system to combat those crimes at both the national and international levels. May be used in the degree program a maximum of 3 times.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 5937 - Special Topics

College of Community Innovation and Education

CCJ 6027 - Criminal Justice Responses to Terrorism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Criminal Justice graduate program or C.I. Critically examines phenomena of domestic and international terrorism to give students a solid grounding of salient issues in developing crime control strategies to prevent terrorism and mount appropriate responses to incidents.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6038 - Violent Crimes and Criminals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program or C.I.

This course provides critical examination of violent crimes and criminals. Students will focus on gathering, reviewing, analyzing and synthesizing evidence-based data on violent crime.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6051 - Community Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

Examines concepts of community justice as they relate to an alternative form of administering criminal justice.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6067 - Perspectives on Genocide

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program or C.I.

This course provides a critical examination of criminal justice perspectives on genocide.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6073 - Data Management Systems for Crime Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Criminal Justice, Criminal Justice certificate, or C.I.

This course is designed to provide the conceptual basis, understanding, and skills necessary for complex crime data manipulation.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6074 - Investigative and Intelligence Analysis: Theory and Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course is designed to familiarize the student with the complex analytical techniques and procedures used to support criminal investigations and criminal intelligence efforts.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6077 - Advanced Crime Mapping and Analysis in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CCJ 6073 and Crime Mapping and Analysis in Criminal Justice or C.I. Develop advanced mapping and analysis proficiency utilizing sophisticated spatial analysis techniques.

Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6079 - Crime Mapping and Analysis in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CCJ 6073.

Course provides the conceptual knowledge and practical skills to design and implement GIS based analysis of community crime problems.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6106 - Policy Analysis in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

This course is designed to familiarize students with the causes and consequences of public policy with an emphasis on criminal justice policy.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6118 - Criminal Justice Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theory and research on complex organizations are applied in criminal justice settings. Alternative organizational goals, structures, staffing patterns, management styles and planning strategies are examined.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6335 - Criminal Justice Sentencing and Punishment Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

This course critically examines the impact of sentencing policy on the correctional system, offenders, their families and the communities to which they return upon release.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6366 - Criminal Justice Responses to Domestic Violence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program and CCJ 6704 or C.I.

This course examines the criminal justice response to domestic violence. Particular emphasis is placed on historical responses, policy as well as an examination of the current role of police, prosecutors, defense attorneys and magistrates in handling domestic assault and battery.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6431 - Leadership and Ethics in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

Examines the leadership issues faced by decision makers in the criminal justice system.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6485 - Issues in Justice Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Examination of selected issues of public policy regarding the functions and roles of criminal justice agencies vis-a-vis other government departments or agencies and public purposes. May be repeated for credit.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6489 - Professionalism in Criminal Justice Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Criminal Justice, or C.I.

Historical evolution of professionalism in criminal justice organizations and how it has changed the structure or practices of each involved agency.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6617 - Mental Disorder, Crime, and Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CCJ 5456, CCJ 5015, or C.I.

An overview of the relationship between mental disorder, crime, and the criminal justice system.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6626 - Copycat Crime and Criminals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explores the nature and prevalence of copycat crime while reviewing the theories, research and criminal justice policies associated with it.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6669 - Race, Crime and Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program or C.I.

This course is designed to acquaint students of all disciplines with the operational dynamics of race, crime and justice.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6675 - Human Rights and Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, Global Health and Public Affairs certificate, or C.I. Provides in-depth analysis of the human rights movement and its potential impact upon criminal law as well as the juvenile and criminal justice systems.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6696 - Criminal Justice Perspectives on Human Trafficking**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. This course introduces students to the problem, causes and suggested solutions for human trafficking both in the United States and abroad.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6699 - Criminal Justice Perspectives on Sexual Assault**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice master's program. This course will examine the public policy response and the functions of criminal justice agencies as they identify, supervise and punish offenders and assist victims of sexual assault.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6702 - Advanced Research Methods in Criminal Justice**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program Research track and CCJ 6704.

Exposes students to the application of research methods in criminal justice. This course serves as the capstone experience for the Research Track.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6704 - Research Methods in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice Master's program or C.I.

An advanced examination of research methodology in criminal justice settings on such topics as problem conceptualization, sampling designs, research proposals, data collection, and evaluation techniques.

Fall, Spring, Even Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6706 - Data Analysis in Criminal Justice I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CCJ 6704 and admission to Criminal Justice MS or MPA/MSJ Dual degree program. Application of statistical software to quantitative and qualitative methods in Criminal Justice.

Fall, Spring, Odd Summer

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6714 - Data Analysis in Criminal Justice II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Master's program and CCJ 6706. Application of multivariate linear and nonlinear statistical techniques to criminal justice issues. Focus is on selecting appropriate procedures, computer-based analysis and interpreting and applying results.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6717 - CJ Theories of Crime Analysis and Prevention

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice M.S. program, Crime Analysis certificate or C.I. This course provides the theoretical foundation for crime analysis and crime prevention.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6902 - Qualitative Criminal Justice Research Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice PhD, or C.I. This course provides the theoretical and methodological foundation for conducting and assessing qualitative criminal justice research.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6909 - Research Report

College of Community Innovation and Education

CCJ 6918 - Directed Research

College of Community Innovation and Education

CCJ 6934 - Criminal Justice, Crime, and Popular Culture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explore how Criminal Justice System, criminals, and crime are portrayed in entertainment and news media, and the effects portrayals have on society and criminal justice.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6938 - Special Topics in Criminal Justice

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Students are exposed to in-depth coverage of a particular contemporary problem in criminal justice, for example, the death penalty or the influence of the media on crime and punishment.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 6939 - Special Topics

College of Community Innovation and Education

CCJ 6946 - Criminal Justice Practicum

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Students will undertake a significant research project in a criminal justice agency. May be repeated for credit.

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7019 - Seminar in the Nature of Crime

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. program. This course will cover the major criminological theories pertaining to the causes and consequences of criminal behavior, including early and contemporary perspectives.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7096 - Seminar in Criminal Justice Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into the Criminal Justice Ph.D. program. Coverage of the three central elements of the criminal justice system - policing, courts and corrections - and the primary factors affecting practices and operations of each.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7457 - Seminar in Criminal Justice Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. program. This course examines the theoretical foundations of Criminal Justice. The focus is on explaining how and why Criminal Justice agents, agencies, and systems behave.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7708 - Advanced Quantitative Methods for Criminal Justice Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. program. This course will cover advanced regression techniques appropriate for analyzing experimental, quasi-experimental and observational criminal justice data including general linear, log-linear and multivariate models.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7725 - The Geography of Crime: Theory and Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. program and CCJ 6073 and CCJ 6709 or equivalent. This course will cover key theoretical and practical approaches related to the understanding and examination of the geography of crime.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7727 - Advanced Research Methods in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Criminal Justice Ph.D. program. This course will cover advanced research design topics and methodologies used in criminal justice research including quantitative, qualitative and mixed method techniques.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7741 - Advanced Quantitative Methods II for Criminal Justice Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice Ph.D. program and CCJ 7708.

Course covers the theory and application of an array of advanced statistical modeling techniques for different types of

data and research designs in criminal justice.

Odd Fall, Even Fall

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7747 - Hierarchical Linear Modeling in Criminal Justice Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice Ph.D. program and CCJ 7708.

Overview of techniques of hierarchical linear modeling with an emphasis on application in criminal justice research.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7752 - Structural Equation Modeling in Criminal Justice Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. Program and CCJ 7708. Overview of techniques of structural equation modeling with an emphasis on application in criminal justice research.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7775 - Criminal Justice Research in the Community

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into the Criminal Justice Ph.D. program. This course addresses the history of community-based research, different models of community-based research, and challenges associated with conducting community-based research in criminal justice.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CCJ 7785 - Teaching Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CCJ 7096, CCJ 7019 and CCJ 7457. This course is designed to expose students to various pedagogical philosophies, approaches, technologies, and ethical issues from a criminal justice perspective.

Digital Media

DIG 5045C - Principles of Interactive Entertainment I

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Admission to Digital Media MS program or C.I.
Interactive digital content creation technologies and development processes.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5046C - Principles of Interactive Entertainment II

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): DIG 5045C or C.I.
Advanced principles of interactive digital content creation technologies and development processes.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5137 - Information Architecture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Film and digital media majors or C.I.

Exploration of the process of formal design of interactive processes, examining the theories of usability and object oriented design.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5348C - Digital Asset Creation**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Admission to FIEA MS in Interactive Entertainment program or C.I. Introduction to digital art asset creation fundamentals, including figure drawing, digital painting, 3d modeling, animation, character setup, technical art and contemporary game engine topics.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5366C - Animation and Visual Effects Production II**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

DIG 5386C Animation and Visual Effects Production I or C.I. Topics in animation and visual effects project creation and production pipeline management in a team environment.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 5378C - Editing for Animation and Visual Effects I: Theory and Production**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Exploration of history and grammar of editing will be examined, adapted and applied to the specific needs of narrative animation and live-action visual effects.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 5385C - Visual Effects for Animation and Live Action I

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Application of digital tools to generate visual effects animation for successful integration with animate and live action media, and the aesthetic critique of results.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 5386C - Animation and Visual Effects Production I

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Production of a short animated or visual effects concept to completion with the focus on working as an individual to meet deadlines.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 5387C - Visual Development and Design for Animation and Visual Effects

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Design concepts are applied to animation environments to create a "personality of place", visual continuity, and to create the visual universe of the story.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 5439C - Script and Story Development for Animation and Visual Effects

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Students will write and storyboard original narrative short animation, or script and storyboard solutions addressing specific live action problems in visual effects.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 5487 - Media Aesthetics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Aesthetics within digital environments, relationship between technologies, visual elements, and the body. Introduction to theoretical traditions along with written and digital projects, including an exhibition.

Odd Fall, Even Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5508 - Programming for Digital Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course provides a foundation for understanding and applying the elements of programming which target interactive media. Topics include functions, variables, classes, data types, and design patterns.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5529C - Production for Media

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Admission to Digital Media MS program or C.I.

Theories and practices of production processes for interactive entertainment.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5548C - Rapid Prototype Production I

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Admission to Digital Media MS or C.I. Students engage in interdisciplinary teams to create rapid development projects.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5549 - Experimentation, Application, and Innovation in Games

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): DIG 5529C or C.I.

Survey and development of games being used in non-traditional applications, such as medical simulation, education and research.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5557C - Production and Design I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to FIEA MS in Interactive Entertainment program or C.I.

Theory and methodology for creation and communication of videogame designs.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5565C - Digital Asset Management Systems

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Graduate standing or C.I.

Structure and use of Digital Asset Management Systems (DAMS). Protection of intellectual property rights by encryption, water marking, steganography. Version and work process flow control systems.

Occasional

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5637 - Game Programming Fundamentals

3 Credit Hours

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): DIG 5508 Programming for Digital Media.

Computational media techniques used in interactive media, focusing on authorship and creative applications. Topics include style transfer, voice recognition, and synthesis and text generation.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5856 - Experimentation, Application and Innovation in Games

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

DIG 5529C or C.I. Survey and development of games being used in non-traditional applications, such as medical simulation, education and research.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 5865 - The History of Animation and Visual Effects

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. History of animation and visual effects from beginning to present covering a wide-range of narrative, independent, commercial, and experimental projects produced throughout the world.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 5875C - Introduction to Modeling and Simulation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): STA 2023 or equivalent.

Introduction to the theory and practice of modeling and simulation with emphasis on multidisciplinary scientific underpinnings.

Fall, Spring, Summer

College of Graduate Studies - Department of Interdisciplinary Studies

DIG 5917 - Directed Research

Nicholson School of Communication and Media

DIG 6099C - Media Distribution

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): DIG 6558 or C.I.

Theory and practical application of videogame messaging, advertisement and distribution.

Summer

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6136 - Design for Interactive Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): DIG 5508: Programming for Digital Media, or C.I.

This studio course gives students tangible experience with the design principles, methodologies, and processes used for interactive media.

Odd Spring, Even Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6365C - Media and Music for Animation and Visual Effects

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Course will examine the use and effect of music/sound effects in various forms of media: film, games, commercials, and other forms of multimedia.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 6377C - Visual Effects for Animation and Live Action II

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

DIG 5385C Visual Effects for Animation and Live Action I or C.I. Integration of digital elements and live action footage and the aesthetic critique of those results.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 6379C - Editing for Animation and Visual Effects II: Practical Editing

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): DIG 5378C or C.I.

Students will apply practical editing solutions and incorporate audio to their own animation or visual effects material.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 6384C - Directing for Animation and Visual Effects

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Topics in production planning and adaptation of live action directing techniques to unique problems in Animation and Visual Effects.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 6388C - Animation and Visual Effects Production III

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): DIG 5366C or C.I.

Preproduction (including storyboards, visual development, and character and environmental design) for individual MFA thesis project created and presented for faculty approval.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 6389C - Animation and Visual Effects Production IV

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): DIG 6388C or C.I.

Research and production of an initial animation test demonstrating the visual look and process strategy for final MFA thesis project and presentation for faculty approval.

Spring

College of Arts and Humanities - School of Visual Arts and Design

DIG 6432 - Transmedia Story Creation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Film and digital media majors or C.I.

Repurposing of traditional stories: creation of authentic environments and the emergence of new authoring scenarios.

Fall, Summer

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6436 - Ethnographic Storytelling and New Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Theories and practices related to ethnographic storytelling using new media.

Odd Fall

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

DIG 6524 - Studio 1

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Studio project management, conceptualization, and prototyping for intensive digital projects. Create project proposal and timeline, concept and design documentation, and prototype, and participate in critiques.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6528 - Studio 2

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Continuing studio sequence for students producing a culminating digital project. Students produce a polished final project for public showcase and/or exhibition.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6546 - Previsualization and Concept Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Film and digital medial majors, DIG 6136, or C.I.

Skills and knowledge for planning and developing a new feature length film or digital media project.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6547C - Preproduction and Prototyping

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): DIG 5529C or C.I.

Standard pre-production process in interactive entertainment.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6551 - Theory and Practice of Interactive Storytelling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Analysis and creation of interactive stories within and across platforms. What makes stories compelling, how to exploit

the particular affordances of media through authors communicate.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6558 - Production and Design II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

DIG 5557C or C.I. Advanced principles of game design and production including integrating development skills into level designs and complete games.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6559C - Advanced Digital Asset Creation

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

DIG 5348 or C.I. Advanced techniques in digital asset specializations such as 2d art, mobile application art, 3d modeling and texturing, animation, lighting and effects and technical art topics.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6589C - Digital Asset Portfolio Development

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

DIG 6559C or C.I. Concentration in professional digital artist portfolio development in specializations such as 2d art, mobile application art, 3d modeling and texturing, animation, lighting and effects and technical art topics.

Summer

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6605 - Physical Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): DIG 5137.

Introduces methods of connecting physical objects to microprocessor controllers in order to build original interactive components for research or artistic purposes.

Odd Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6635 - Applied Programming Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

DIG 6638 or C.I. Application of advanced software development principles for interactive entertainment.

Summer

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6638 - Advanced Game Programming

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

DIG 5637 or C.I. Advanced principles of software development for interactive entertainment.

Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6647 - History and Theory of Dynamic Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Contemporary interactive media theory and history of convergence between computing, fine arts, and narrative media.

Through hands on interactive media production, synthesis and evaluation-oriented projects.

Odd Fall, Even Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6718C - Interactive Entertainment Project

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): DIG 5046C or C.I.

Students implement a complete game, based on designs pre-produced and prototyped in previous courses.
Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6812 - Digital Interaction for Informal Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theories of digital media interaction that apply to the design of interfaces that help people learn in informal contexts.
Occasional

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6817 - Contemporary Topics in Interactive Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing. Corequisite(s): .

Digital media research topics including games for health, social impact, and art; folklore in interactive media; data visualizations and informal learning; extended reality design.

Occasional

College of Sciences - Nicholson School of Communication and Media

DIG 6825 - Research Methods for Interactive Media

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Scholarly and creative research design and methods for interactive media. Topics: research questions, literature reviews, qualitative, quantitative, and mixed methods, and story world research.

Odd Spring, Even Spring

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6836 - Design and Development for Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

A study of the applied design and development process on concepts and practices of literacy/electracy, including pedagogical, artistic, workplace, and leisure-based communicative practices.

Fall

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

DIG 6866C - Technical Problem Solving for Animation and Visual Effects

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Emerging Media MFA - Animation and Visual Effects track student or C.I. Addresses and solves unique problems presented by individualized graduate thesis projects in animation and visual effects.

Fall

College of Arts and Humanities - School of Visual Arts and Design

DIG 6944C - Game Design Practicum

6 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 6

Contact Hours: 8

Prerequisite(s): DIG 5046C or C.I.

Supervised experience supplementing theoretical and practical experiences involving new research developments or partnerships within industry.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

DIG 6947C - Digital Venture Practicum

6 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 6

DIG 6718 or C.I. Principles and application of digital venture business development, IP rights, market research, iterative production, monetization, support and distribution as it relates to a start-up entity.

Fall

Nicholson School of Communication and Media - Department of Games and Interactive Media

Economics

ECO 5445 - Introduction to Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Master's in Economics or C.I. Students are introduced to important tools of business analytics; first, UNIX, SQLite, and Python; then analyzing data using R and implementing numerical methods using Python.

Fall

College of Business Administration - Department of Economics

ECO 5917 - Directed Research

College of Business Administration

ECO 5937 - Special Topics

College of Business Administration

ECO 6115 - Economic Analysis of the Firm

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA Master's program of Study Foundation Core.

Commodity price and output determination; factor price determination and functional income distribution; analysis of different types of markets.

Fall, Spring

College of Business Administration - Department of Economics

ECO 6118 - Microeconomic Theory I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 3101 (or equivalent), ECO 3410 (or equivalent), and ECO 6403 (concurrent enrollment), or C.I. Microeconomic principles governing individual decision-making relative to the theory of the firm and consumer choice.

Fall

College of Business Administration - Department of Economics

ECO 6315 - Seminar in Contemporary Economic Issues

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 6118 or equivalent and ECO 6403 or equivalent.

Discussion and analysis of current economic problems and issues. May be used in the degree program a maximum of 3 times only when course content is different.

Occasional

College of Business Administration - Department of Economics

ECO 6403 - Mathematical Economics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 3101 (or equivalent), ECO 3410 (or equivalent), and ECO 6118 (co-requisite), or C.I.

Covers the foundations of economic theory with particular focus on the mathematical methods that are indispensable for proper understanding of the economic literature.

Fall

College of Business Administration - Department of Economics

ECO 6404 - Games and Economic Behavior

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and ECO 6118.

The study of interactive and strategic behavior relying on Experimental Game Theoretic literature.

Even Fall

College of Business Administration - Department of Economics

ECO 6416 - Applied Business Research Tools

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Master's of Business Administration program foundation core courses; Core I Courses.

Multivariate methods and related tools applied to analyze business and economic data as an aid in decision making.

Fall

College of Business Administration - Department of Economics

ECO 6424 - Econometrics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 6403 (or equivalent) and ECO 6118 (or equivalent), or C.I.

Develops basic statistical methods and provides coverage of the general linear regression model, generalized least squares, generalized methods of moments, and multi-equation models.

Spring

College of Business Administration - Department of Economics

ECO 6445 - Data Wrangling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 5445, ECO 6405, ECO 6406, and ECO 6118.

Systematic development of data wrangling methods for use in business analytics as well as quantitative business fields.

Spring

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Organizational and administrative theories as they relate to practice in selected early childhood services.

Occasional

College of Community Innovation and Education - School of Teacher Education

EEC 6606 - Global Issues in Early Childhood

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course is designed to provide our students with global perspectives on early childhood development and engage our students in international research activities.

Fall

College of Community Innovation and Education - School of Teacher Education

EEC 6909 - Research Report

College of Community Innovation and Education

EEC 6918 - Directed Research

College of Community Innovation and Education

EEC 6938 - Special Topics

College of Community Innovation and Education

EEC 6947 - Practicum in Child, Family, and Community Sciences

6 Credit Hours

Class Hours: 1-6

Lab and Field Work Hours: 0

Contact Hours: 1-6

Prerequisite(s): Graduate standing or C.I.

Field-based placement in a social service agency, childcare center, hospital, or school, working with a mentor family liaison to develop skills/ knowledge with diverse families.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

EEC 7055 - Advocacy, Public Policy, and Program Evaluation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Research-based practice as it relates to child advocacy and changes in public policy.

Spring

College of Community Innovation and Education - School of Teacher Education

EEC 7058 - Theoretical Foundations of Early Childhood

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Theoretical bases of early childhood, philosophy, and current research in early childhood.

Fall

College of Community Innovation and Education - School of Teacher Education

EEC 7409 - Current Trends in Child, Family, and Community Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

This course examines emerging and current trends in the field of Child, Family, and Community Sciences.

Summer

College of Community Innovation and Education - School of Teacher Education

EEC 7673 - Early Childhood: Professional Publishing and Grant Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

This course examines the aspects of grant writing and writing of professional journals for the field of early childhood.

Fall

College of Community Innovation and Education - School of Teacher Education

EEC 7676 - Critical Analysis of Early Childhood Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

This course examines research, theories, and trends in early childhood and how they influence perspectives related to young children.

Spring

College of Community Innovation and Education - School of Teacher Education

EEC 7945 - Early Childhood: Internship in Teaching and Supervision

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Examine and practice the various roles of an early childhood college professor focusing on undergraduate teaching and supervision. May be used in the degree program a maximum of 4 times.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

EEC 7948 - Early Childhood: Internship in Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Examine and practice the various roles of an early childhood college professor focusing on research. May be used in the degree program a maximum of 4 times.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

EEC 7980 - Dissertation

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Student must be in candidacy. Dissertation.

College of Community Innovation and Education

Education: Exceptional Child: Core Compet.

EEX 5051 - Exceptional Children in the Schools

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Senior standing or C.I.

Characteristics, definitions, educational problems, and appropriate educational programs for the exceptional children in schools.

Fall, Summer

College of Community Innovation and Education - School of Teacher Education

EEX 5702 - Planning Curriculum for Pre-Kindergarten Children with Disabilities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Focus on curriculum planning; developmentally appropriate practices and implementation of individualized instruction for pre-kindergarten children with disabilities.

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 5750 - Communication with Parents and Agencies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Presentation of methods of interacting with community agencies, supporting and collaborating with families, developing a case management system, and facilitating program transition.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 5917 - Directed Research

College of Community Innovation and Education

EEX 5937 - Special Topics in Except Education

College of Community Innovation and Education

EEX 6017 - Typical and Atypical Applied Child Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Focus on the stages and sequence of development and the impact of disabilities and biomedical risk factors on learning and development.

Fall

College of Community Innovation and Education - School of Teacher Education

EEX 6061 - Instructional Strategies Pre-K-6**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A varying exceptionalities strategies (SLD, EH, MH) course using a cross-categorical model. The course is concerned with the pre-k handicapped child through grade 6. A required field experience must be completed with the class depending on prior experience.

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6065 - Programming for Students with Disabilities at the Secondary Level**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I. and EEX 5051.

Addresses instructional needs of secondary students with disabilities. It provides information on instruction, academic and social-personal skills, and transition planning.

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6107 - Teaching Spoken and Written Language**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Diagnosis and remediation of spoken and written language problems found in the exceptional populations. Overview of alternative methods of communication.

Fall

College of Community Innovation and Education - School of Teacher Education

EEX 6218 - Diagnostic Assessment and Intervention Planning in Exceptional Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course develops advanced instructional and intervention planning and decision-making knowledge and skills using school and classroom-based instructional data in reading and mathematics.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6222 - Observation and Assessment of Young Children

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of formal and informal observation and assessment.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6246 - Nature of Autism: Theory and Educational Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Theory and teaching applications for students with autism spectrum disorders includes 20 hour field-based experience. Designed for application towards requirements for State Endorsement in Autism.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6295 - Assessment and Curriculum Prescriptions for the Exceptional Population

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Addresses contemporary assessments and models for assessing exceptional children. Also addresses curriculum and prescription.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6297 - Assessment, Diagnosis, and Curriculum Prescriptions for Students with Autism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Contemporary assessments and models for assessing exceptional children to address curriculum and prescription. Specific emphasis is placed on assessment of students with autism spectrum disorders.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6342 - Seminar-Critical Issues in Special Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEX 5051.

An examination of research and current literature dealing with some of the critical issues in all areas of special education.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6524 - Organization and Collaboration in Special Ed

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Addresses evaluation, assessment, personnel resource, grant writing, and other administrative issues. Presents collaborative models of intervention and service delivery.

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6608 - Concepts and Principles in Applied Behavior Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course is designed to develop students' competence in the use of technical terminology pertaining to the concepts and principles of behavior analysis. This course includes content tailored to fulfill the concepts and principles of behavior analysis coursework requirements of the Behavior Analyst Certification Board® (<http://www.bacb.com>) fourth edition task list.

Fall

College of Community Innovation and Education - School of Teacher Education

EEX 6612 - Methods of Behavioral Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Analysis of the principles of behavior management and precision teaching and application of these principles to the solving of classroom management problems.

Fall

College of Community Innovation and Education - School of Teacher Education

EEX 6618 - Single Case Research Methodology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This is an initial course in the use of single subject research methodology. It includes an overview of behavioral measurement, single subject research designs, and methods of data analysis. This course includes content tailored to fulfill the behavior analysis coursework requirements of the Behavior Analyst Certification Board® (<http://www.bacb.com>).

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 6619 - Advanced Behavior Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEX 6612. This course prepares practitioners to use the principles of advanced behavior analysis (ABA) to assess and teach communication skills to individuals with autism and develop knowledge of current augmentative and alternative communication (AAC) technology.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6668 - Radical Behaviorism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course is designed to provide students with a complex understanding of the differences between radical behaviorism and other philosophies, and their impact on science. This course includes content tailored to fulfill the coursework requirements of the Behavior Analyst Certification Board® (<http://www.bacb.com>) fourth edition task list.

Even Spring, Odd Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6669 - Supervision and Personnel Management in Applied Behavior Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prepare students in Behavior Management using Performance-based assessment, performance-based measures, and performance management systems. Course requirements are consistent with Applied Behavior Analysis International for the Verified Course Sequence coursework in Applied Behavior Analysis.

Occasional

College of Community Innovation and Education - School of Teacher Education

EEX 6747 - Ethics and Legal Issues in Applied Behavior Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course is designed to develop students' competence in applying behavior analytic principles in both a legal and ethical manner. This course includes content tailored to fulfill the Ethical and Professional Conduct coursework requirements of the Behavior Analyst Certification Board® (<http://www.bacb.com>), fourth edition task list.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6759 - Transition Planning and Interdisciplinary Teaming for Students with Disabilities**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Interdisciplinary teaming to include available resources, the recognition of the role of parents, teachers, and other professionals; functional community-based curriculum; employability skills; and transition planning.

Fall, Summer

College of Community Innovation and Education - School of Teacher Education

EEX 6863 - Supervised Teaching Practicum with Exceptional Children

2-7 Credit Hours

Class Hours: 12-40

Contact Hours: 12-40

Prerequisite(s): Bachelor's degree, approved program, and C.I.

Supervised observation and teaching of an exceptional student.

Occasional

College of Community Innovation and Education - School of Teacher Education

EEX 6909 - Research Report

College of Community Innovation and Education

EEX 6918 - Directed Research

College of Community Innovation and Education

College of Community Innovation and Education

EEX 7320 - Program Evaluation and Planning in Special Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Focus on evaluation models and summative program evaluations. Students are required to demonstrate knowledge of systemic program planning, models of program funding and program change.

Odd Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7428 - Personnel Preparation: Special Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Focus on issues and strategies in preparation of teachers for students with disabilities; course development,

implementation, adaptations/ modifications for pre-service personnel with disabilities.

Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7466 - Universal Design for Learning (UDL): A framework for Exceptional Education Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 7501 or equivalent.

Examines learner variability and barriers to effective instruction and assessment. The Universal Design for Learning (UDL) framework is presented as a means to design and implement interventions maximizing the accessibility and learning outcomes of individuals with and without disabilities.

Even Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7527 - Professional Writing Grant Writing in Special Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Writing for professional publication in special education; review and edit works of others; grant writing and review for private foundations and state and federal agencies.

Fall, Summer

College of Community Innovation and Education - School of Teacher Education

EEX 7536 - Seminar: Urban Special Education Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Focus on how districts, schools, and communities can improve educational outcomes for children with disabilities and children who are at risk in urban settings.

Summer

College of Community Innovation and Education - School of Teacher Education

EEX 7766 - Technology Research Training in Special Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Computer-assisted instruction and technology with special needs populations, demonstrates emerging technologies and provides instruction in personal productivity tools for special educators in higher education.

Even Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7865 - Internship in College Instruction in Special Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Supervised experience in design, delivery, and evaluation of a college course in special education or disability services.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7866 - Internship in Practicum Supervision in Special Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education PhD program.

Supervised experience in observing, supervising, and evaluating student teacher performance in a practicum setting in special education or disability services.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EEX 7919 - Research

College of Community Innovation and Education

EEX 7936 - Current Issues Trends in Special Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD Education program.

Analysis and review of contemporary issues and trends in special education, selecting and; defending a position on

efficacy, legal, ethical, social, and policy issues.

Fall

College of Community Innovation and Education - School of Teacher Education

EEX 7947 - Internship in Special Education Policy and Leadership

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to Exceptional Education track of the Ph.D. in Education or C.I.

Supervised internship experience in policy analysis and application in special education and disability services. May be used in the degree program a maximum of 3 times only when course content is different.

Summer

College of Community Innovation and Education - School of Teacher Education

Education: Foundations and Policy Studies

EDF 5607 - Language, Culture and Pedagogy: Impact and Implications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

C.I. Explores in-depth issues surrounding learning needs of students from linguistically and culturally diverse populations. Research on language, culture and pedagogy will be highlighted.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 5937 - Special Topics

College of Community Innovation and Education

EDF 6141 - Human Intelligence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and a course in learning.

An examination of theory and research on human intelligence and its relation to learning and cognitive performance with emphasis on implications for educational and workplace settings.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6155 - Lifespan Human Development and Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Research in childhood, adolescent, and adult development relevant to contemporary American education. Emphasis on application of theory to educational practice.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6206 - Challenges of Classroom Diversity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, EDF 6886 or C.I.

An examination of factors which shape the curriculum in diverse classrooms with specific attention to learning, assessment and best practices appropriate for minority students.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6216 - Motivation in Learning and Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

An examination of theory and research in learning and performance with an emphasis on practical applications for educational and work place settings.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6233 - Introduction to Action Research and Analysis of Classroom Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6935, EDG 6223, and EDF 6472.

Analyses of teaching and curriculum practices to inform design of data-driven assessment that provides evidence of student learning and progress.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6237 - Principles of Learning and Introduction to Classroom Assessment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Students will examine prominent developmental and learning theories in depth and their implications for instruction and assessment. Key issues in educational psychology will be explored.

College of Community Innovation and Education - School of Teacher Education

EDF 6259 - Learning Theories Applied to Leadership in Teaching Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examination and application of theories of learning, leadership, and best practice in teaching that result in evidence of student progress.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6401 - Statistics for Educational Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Design of educational evaluation; analysis of data, descriptive and inferential statistics, interpretation of results.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6432 - Measurement and Evaluation in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Concepts of measurement and evaluation, classroom test construction, creation and use of derived scores, selection and use of published measurement instruments, current issues.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6447 - Development and Validation of Educational Tests and Measures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDF 6401, EDF 6432. Criterion and norm-referenced test development for educational agencies: specifications, item development and trial, scaling, passing scores, and test norms.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6464 - Mixed Methods for Evaluation in Educational Settings

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 6401 and EDF 6481 or C.I.

This service learning course will examine component and integrated mixed method designs toward developing a proposal for a program evaluation for a local nonprofit organization.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6472 - Data-Driven Decision-Making for Instruction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDG 6935 and EDG 6223 or admission to K-8 Math and Science MEd. Understand how to design a research study, understand basic measurement principles, collect/analyze data, interpret results, report findings, apply research-to-practice in applied settings.

Fall, Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6481 - Fundamentals of Graduate Research in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Review and critique of research literature, use of library resources for educational research, and introduction to the concepts of research design and data analysis.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6486 - Research Design in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDF 7403 or C.I. An examination of methodological techniques for specific educational problems. Intended for students in the process of designing independent research studies.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6496 - Teaching and Learning in Urban Settings

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Analysis and discussion of instructional and assessment methods that seek to improve the quality of teaching and learning in urban schools.

Odd Fall, Even Spring

College of Community Innovation and Education - School of Teacher Education

EDF 6517 - Perspectives on Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

A critical analysis of the conceptual and operative educational systems developed in the United States.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

EDF 6635 - Capstone: Action Research in Teacher Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 6472 and EDF 6233.

The Capstone, the final course in the program, is an action research study. The research study focuses on contemporary research in teacher leadership.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6688 - Public Policy and Urban Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Critical analysis of public policy formation, implementation, and evaluation with regard to their impact on urban schools and communities.

Even Fall, Odd Spring

College of Community Innovation and Education - School of Teacher Education

EDF 6725 - Critical Issues in the Study of High Needs Populations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. This course explores issues of social, political, and economic conditions and their impacts on schools and communities serving diverse learners in high needs settings and their families.

Summer

College of Community Innovation and Education - School of Teacher Education

EDF 6727 - Critical Analysis of Social, Ethical, Legal, and Safety Issues Related to Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Analysis of critical issues in education including social, ethical, legal, and safety concerns which impact the quality of education.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EDF 6809 - Introduction to Comparative and International Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Surveys the salient issues, perspectives and paradigms of comparative and international education, while introducing students to cross-national comparative research design.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6855 - Equitable Educational Opportunity and Life Chances: A Cross-National Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Analysis of how gender, class, race, ethnicity, and language affect the quality and outputs of schooling, with a focus on multinational organizations and NGO's.

Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6884 - Education as A Cultural Process

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, EDF 6886, or C.I.

An analysis of the theoretical underpinnings of multicultural education with special emphasis on the cultural context of American education for minority groups.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6886 - Multicultural Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A survey of multicultural education; analysis of the relationship between cultural transmission, cultural pluralism, and the learning process within American schools.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 6909 - Research Report

College of Community Innovation and Education

EDF 6918 - Directed Research

College of Community Innovation and Education

EDF 6931 - Seminar in Program Evaluation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

This course will synthesize content learned in the other Program Evaluation certificate courses, so that the learner has a comprehensive understanding of how to carry out, interpret, and report the results of educational program evaluations to a variety of stakeholders.

Odd Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

Prerequisite(s): EDF 6401 or C.I.

Examination of appropriate methods in applied educational contexts. Consideration of analysis strategies for educational data, emphasis on identification and interpretation of findings.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7405 - Quantitative Methods II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403 and EDF 7463 or C.I.

Correlation, regression, path analysis, and structural equation modeling in educational studies. Use of path analysis and structural equation modeling to test theory.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7406 - Multivariate Statistics in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403 and EDF 7463 or C.I.

Statistical methods that simultaneously analyze multiple measurements on an individual or object under investigation.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7407 - Research in Educational Leadership 2

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7101 and EDF 7471.

Focus on the role of statistical analysis in the research process with a focus on a practical application for educational decision makers. The purpose of this course is to familiarize students with basic statistical methods so as to enable one to select appropriate methods and be able to apply them.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDF 7408 - Research in Educational Leadership 3

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7215 and EDA 7224.

Research 3 continues the development of respect for the scientific spirit of inquiry and to build upon the problem-solving and research strategies studied in Research 1 and Research 2. The course is intended to enhance students' comfort and confidence with research and statistical tools that will enhance their professional effectiveness.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDF 7410 - Application of Nonparametric and Categorical Data Analysis in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403 or comparable doctoral level statistics course.

Application of nonparametric and categorical data analysis procedures to education. Topics: nonparametrics for single samples, paired samples, independent samples, logistic regression, contingency tables, and logit models.
College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7415 - Latent Variable Modeling In Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403 or its equivalent at the doctoral level.

This course introduces students to the propriety, fit, parsimony, interpretation and power analysis of latent variable measurement and causal models.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7427 - Psychometrics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403, C.I.

Overview of classical test theory with an introduction to item response theory and generalizability theory. Techniques for evaluating validity and reliability will be applied through statistical analyses.

Odd Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7457 - Data, Assessment, and Accountability

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Differentiates data from research, emphasizes working with data sets, and guides data use to make ethical decisions and to understand and measure outcomes.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7463 - Analysis of Survey, Record, and Other Qualitative Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 6401 and EDF 7403 or C.I.

Examination of the major elements involved in planning, conducting, and reporting survey research; emphasis is on the design, instrumentation, data analysis and data; interpretation for survey research.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7468 - Evaluation of Complex Problems of Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Emphasizes evaluation of complex problems of practice, review of effective evaluation, and development of knowledge and skills in program evaluation.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7471 - Research in Educational Leadership I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Educational Leadership Ed.D. Executive Track

Students will focus on the types of educational research and the fundamentals of a solid research design with an emphasis on practical applications for educational decision makers.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDF 7473 - Ethnography in Educational Settings

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Doctoral program.

Exploration and integration of theories and practices of naturalistic, field-based studies of educational settings, proceeding from conceptualization, through data collection and analysis, to results presentation.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7474 - Multilevel Data Analysis In Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): EDF 7403 or comparable doctoral level statistics course.
The course will consider the statistical foundations of multilevel linear models, also known as hierarchical linear models (HLMs), and focuses on their application in education and behavioral sciences.
College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7475 - Qualitative Research in Education

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Doctoral Standing or C.I.
Introduction to the philosophical and conceptual basis of qualitative research methods, strategies for gathering, analyzing, and interpreting qualitative data, emerging issues.
Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7476 - Advanced Research Methods

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): EDF 7403, EDF 7463, C.I.
Review/expand knowledge of empirical research in education. Includes systematic literature review, convert conceptual questions to concrete, and multiple analytic methods.
Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7478 - Analysis of Data for Complex Problems of Practice

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.
Qualitative and quantitative methods appropriate for the analysis of data are introduced and used for solving complex problems of practice.
Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7479 - Applications of Technology in Qualitative Research: Data, Organization, and Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDF 7475 or C.I. Course includes use of video and audio to collect data, two leading data analysis software packages, and requires students demonstrate competencies in lab-based assignments.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7483 - Mixed Methods Research in Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Students are expected to have completed a foundational masters-level research course.

This course provides a doctoral-level introduction to mixed methods research methods and methodology design and its implementation for educational contexts. Mixed methods research combines qualitative and quantitative data collection and analysis. Since the 1990's, this research method has evolved to include specific approaches and terminology beyond those of the individual quantitative and qualitative fields.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDF 7488 - Monte Carlo Simulation Research in Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDF 7403 or C.I. Students are taught how to generate univariate and multivariate data under various parametric conditions for the purpose of exploring the limits of analytical procedures.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7489 - Quantitative Research Synthesis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Equivalent to EDF 6481 and EDF 7403.

This course addresses the problem of the accumulation of evidence in scientific research through the use of quantitative methods for research synthesis and meta-analysis.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7494 - Identifying Complex Problems of Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Emphasizes orientation toward identifying complex problems of practice through review of sound research methodology and development of knowledge and skills in program evaluation.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7916 - Analysis and Synthesis of Educational Literature**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Students will learn to find, select, critically analyze, and synthesize educational research and scholarship.

Even Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDF 7919 - Research

College of Community Innovation and Education

EDF 7939 - Special Topics

College of Community Innovation and Education

EDF 7947 - Internship in Methodology, Measurement, and Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403, EDF 7463, and C.I.

This course provides practical application of research skills developed through course work. The student will complete/participate in an approved research project.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

Education: General**EDG 5356 - Instructional Coaching**

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course will prepare educators to become instructional coaches, developing skills and methods to impact student achievement by influencing teachers' instructional practices.

Summer

College of Community Innovation and Education - School of Teacher Education

EDG 5745 - Teaching the Non-English Student**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

C.I. Bilingual and non-linguistic instruction in curriculum areas in English as a second language.

College of Community Innovation and Education - School of Teacher Education

EDG 5917 - Directed Research

College of Community Innovation and Education

EDG 5937 - Special Topics

College of Community Innovation and Education

EDG 5941 - Clinical Practice**2-8 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 11

Contact Hours: 11

Admission to STEP II, III or IV. Clinical Internship in an appropriate educational setting under the direction of a university supervisor or peer teacher.

College of Community Innovation and Education - School of Teacher Education

EDG 6047 - Contemporary Issues in Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

An analysis of current trends in education and their impact on educational programs.

College of Community Innovation and Education - School of Teacher Education

EDG 6223 - Curriculum Theory, Organization, and Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An exploration and examination of foundations and leadership decision-making in curriculum design, development, organization, and policy.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 6224 - Curriculum Policy Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Overview and synthesis of major components of policy involving curriculum. Exploration of the relationship between curriculum policy and curriculum evaluation as parts of analysis.

Odd Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 6285 - Evaluation of School Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

History of program evaluation, systems approaches to program evaluation, concepts of stakeholder and qualitative approaches to program evaluation, the role of evaluator and administrator.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 6329 - Quality Teaching Practices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Valid teaching certificate.

Focus is on skills and competencies of quality reflective educators. Teaching episodes are videotaped and analyzed against national standards of teaching quality.

Occasional

College of Community Innovation and Education - School of Teacher Education

EDG 6337 - Techniques of Game Use in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Analysis, development, and use of educational games as an approach to classroom teaching.

College of Community Innovation and Education - School of Teacher Education

EDG 6415 - Principles of Instruction and Classroom Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or consent of department chair.

Students are exposed to various methods of delivering instruction, as well as organizational and management skills.

Students microteach and view lessons to develop reflective practices.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

EDG 6636 - Impact of Social Contexts on Teaching and Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EDF 6725. Provides analysis and discussion of instructional and assessment methods that seek to improve the quality of teaching and learning of students/community members in high needs settings. Further, the course is designed to assist students in applying the content of the course to an informed educational practice.

Spring

College of Community Innovation and Education - School of Teacher Education

EDG 6775 - Exploring Global Educational Issues in International Contexts

1-3 Credit Hours

Class Hours: 1-3

Lab and Field Work Hours: 0

Contact Hours: 1-3

Prerequisite(s): Graduate standing.

Guided field experience in global issues challenging the educational community worldwide, from both academic and experiential perspectives. In conjunction with international field experience/study abroad.

Every Semester

College of Community Innovation and Education - Learning Sciences & Educational Research

EDG 6909 - Research Report

College of Community Innovation and Education

EDG 6918 - Directed Research

College of Community Innovation and Education

EDG 6935 - Introductory Seminar in Teacher Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and admitted to Teacher Leadership MED.

Examine current leadership trends in educational contexts and critically analyze the role of collaborative leadership in school improvement.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 6938 - Special Topics

College of Community Innovation and Education

EDG 6940 - Graduate Internship

1-8 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1-8

Contact Hours: 1-8

Prerequisite(s): Approval of student internship office.

Internship in an appropriate educational setting under the direction of a qualified field supervisor and/or a university supervisor. May be repeated for credit.

College of Community Innovation and Education - School of Teacher Education

EDG 7221 - Advanced Curriculum Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6223 or C.I.

An analysis of the research base which supports the various dimensions of the curriculum field.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 7325 - Models of Teaching and Instructional Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6223; EDF 7232 or C.I.

Examination of models of teaching. Focus on the roles of the teacher, applicable contexts and learning goals; historical, philosophical, learning, and research basis.

Even Fall, Even Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 7919 - Dissertation Research

College of Community Innovation and Education

EDG 7947 - Laboratory of Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Guided internship: student placement in a leadership setting in a school, social service agency, private or community setting that is involved with learning or development. May be used in the degree program a maximum of 2 times.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 7985 - Proposing and Implementing Data-Driven Decisions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Prepares the student for the capstone experience through the development of the capstone proposal and proposal defense.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDG 7987 - Dissertation in Practice

VAR Credit Hours

Class Hours: 1-99

Contact Hours: 1-99

Prerequisite(s): Admission to the Education Ed.D. program/completion of Ed.D. coursework.

Guides the student through the completion of the capstone project experience. May be used in the degree program a maximum of 7 times.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDH 6046 - Diversity in Higher Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Introduction to theory, research, and practice of historical and contemporary diversity issues in American higher education: race, class, gender, and sexuality as they relate to institutional issues, administrators, faculty, and students.

Odd Fall

College of Community Innovation and Education

EGI 6051 - Understanding the Gifted/Talented Student**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A study of characteristics of the gifted/talented students; theories and research; identification procedures; special problems; educational forces.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EGI 6245 - Curriculum and Instruction for Teaching Advanced, Gifted, and Talented Learners

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course will develop knowledge, skills, and evidenced-based strategies to design curriculum appropriate for the advanced, gifted, and talented learner through a range of services.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EGI 6246 - Education of Special Populations of Gifted Students**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Focuses on needs of gifted subgroups, including females, minorities, handicapped, and students with learning and emotional problems. S.E.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EGI 6247 - Developing Advanced Programs and Services: Acceleration and Enrichment for Academically and Intellectually Gifted Learners**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Servicing and teaching academically gifted learners through content acceleration and enrichment. (Clusters, honors, advanced coursework, at middle and secondary levels; compacted elementary curricula).

Summer

College of Community Innovation and Education - School of Teacher Education

EGI 6305 - Theory and Development of Creativity**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course focuses on the concept of creativity and explores various means of integrating creative strategies and instructional content areas.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EGI 6417 - Guidance and Counseling Strategies for Teachers of Gifted and Talented Individuals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Guidance and counseling procedures and strategies for teachers of gifted/talented students, including student group dynamics; communication with parents; career goals; alternative educational opportunities.

Studies of ethical and legal issues in College Student Personnel.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 6505 - Finance in Higher Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of Phase II of Education Professional Preparation or C.I.

Fundamental considerations in the finance of institutions of higher education.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 6632 - American Professoriate and College Presidency

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Similarities/differences among American professoriate and college presidency in various institutions and academic disciplines. Topics relevant to faculty careers, higher education administration, student affairs, and public policy.

Odd Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 6634 - Student Personnel Services in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

A basic introduction to student personnel services which covers philosophy, history, functions, theory, and issues.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 6635 - Organization and Administration of Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Major trends and challenges of higher education organization and administration; provides synthesis and integration of historical and contemporary issues of academic governance and leadership from theoretical and practical perspectives.

Even Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 6655 - Athletics in the American University

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An examination of the historical and contemporary role of athletics in the American University with explicit focus on the student athlete and student support services of athletes.

Odd Fall

College of Community Innovation and Education - Department of Educational Leadership & Higher Education

EDH 6656 - Academic Success and the Student Athlete

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course will examine the factors related to academic success including issues related to the organization and structure of athletic support services.

Odd Summer

College of Community Innovation and Education - Department of Educational Leadership & Higher Education

EDH 6909 - Research Report

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7040 - Research on the College Student

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Introduction to theoretical concepts and research findings related to student characteristics, college environments, choice, student development, attrition, persistence, cognitive and affective development, and general outcomes.

Even Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7047 - Diversity in Issues Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Introduction to theory, research, and practice of historical and contemporary diversity issues in American higher education: race, class, gender, and sexuality as they relate to institutional issues, administrators, faculty, and students.

Odd Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

EDH 7066 - Higher Education: Philosophical/Historical Perspectives

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. This course examines basic philosophical positions and history of American higher education, historical research methods, and related applications: developing educational philosophy and historical research skills.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7207 - Curriculum, Instruction, and Distance Learning in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. Curriculum, Instruction, and Distance Learning in Higher Education examines curriculum and instructional methodologies and ways that distant learning can be used to improve student learning outcomes.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7208 - International Perspectives of Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. To increase understanding of global perspectives, this course explores worldwide tertiary education systems, related collaborations, issues and trends, and the impact of politics, economics, and cultures.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7366 - Assessment Practices in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Prepares higher education leaders with necessary knowledge, understanding, and skills to create and conduct effective assessment programs and activities.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7401 - Higher Education and Public Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Course examines development and analysis of US Higher Education policy issues, socio-political contexts at play in policy processes, and how competing policy agendas are negotiated.

Odd Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7405 - Legal Issues in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Addresses legal framework of public and private institutions of higher education with emphasis on case law related to organization, governance, faculty, students, curriculum, and environment. Exploration of key laws and legal concepts applicable to American institutions of higher education, including how to weigh and balance competing rights and responsibilities of institutions, faculty, staff, and students.

Even Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7508 - Finance in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. This course is designed to provide students with fundamental considerations, research, theory and practice regarding the funding of higher education institutions.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7631 - Managing change, conflict, and stability in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Course introduces and defines nature of change, and reviews theories of transformation in higher education; investigates various higher education change models and practical change strategies.

Odd Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7636 - Organizational Theory and Practices in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. Explores theories and models of organizations and their applicability to colleges and universities and the work done in them.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7638 - Advanced Seminar in Higher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Course explores "the enduring enigmas" in Higher Education, those long-contested controversies forging the patterns and traditions of our colleges and universities.

Even Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7665 - Higher Education Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing or C.I. To increase understanding of research, theories, models and issues related to higher education leadership including administration, college presidency, and faculty roles.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7919 - Research

College of Community Innovation and Education

EDH 7934 - Higher Ed Literature, Research, and Professional Writing Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Provides students with research strategies and writing skills for dissertation preparation, journal writing, publication and reviewing, and conference presentation skills.

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDH 7980 - Dissertation

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Doctoral standing.

Dissertation credits course for Higher Ed doctoral students.

Prerequisite(s): EME 6053 or C.I.

Use of traditional and emerging technological applications in instructional settings by students and teachers. Includes integrated software packages, multimedia productivity suites, Web 2.0 applications, and desktop publishing, as they relate to K-12 curriculum, students, and teacher productivity.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EME 6417 - Interactive Online and Virtual Teaching Environments

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6507.

Explores issues and trends in educational and human to computer interactions theories as applied to virtual and online

participatory learning environments.

Odd Fall, Even Fall

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6457 - Distance Education: Technology Process Product

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6507.

Instruction and how it is delivered at a distance. Examines technologies, processes, and products of distance education with emphasis on e-learning.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6458 - Virtual Teaching and the Digital Educator

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6417.

Explores practical applications of instructional theories related to virtual and online participatory learning environments.

Odd Spring, Even Spring

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6465 - Intelligent Tutoring System Design: Theory and Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Authoring adaptive instructional elements, analyzing learner data, classifying/predicting learner states, and evaluating the effectiveness of ITSs and their components.

College of Graduate Studies - School of Modeling, Simulation and Training

EME 6507 - Multimedia for Education and Training

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Emphasis on the elements and applications of multimedia and technology in multiple instructional settings. Includes authoring, design, alternative delivery systems, hardware, and software.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EME 6601 - Instructional Simulation Design for Training and Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6613.

Integration of ISD methods with simulation systems design, including analysis, design, development and formative evaluation of leading-edge training and educational simulation technologies.

Occasional

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EME 6602 - Integration of Technology into the Learning Environments

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6053, EME 6405, EME 6507 or C.I.

Resources, materials, and strategies for systemic achievement of curriculum goals; investigation of innovative and effective technological advances and practices for use in teaching and learning.

Odd Fall, Even Fall

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6607 - Planned Change in Instructional Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

In-depth study of the processes of planned change and adoption/rejection of innovations in educational settings.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6613 - Instructional System Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course focuses on the systematic analysis and design of instruction, including task, learner, and context analyses, objectives and learner assessments, media selection, flowcharting and storyboarding.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6614 - Instructional Game Design for Training and Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6613.

Integration of instructional design and game development processes, analysis of existing instructional games and game engines and the design of an instructional game.

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EME 6646 - Instructional Game Design for Training and Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I. for students not in the Instructional Design and Technology program.

The course examines the application of cognitive neuroscience research and physiological explanations of human learning and for designing training and educational systems.

Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EME 6705 - Administration of Instructional Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6613.

Provides opportunities for students to examine parameters, problems, and areas of importance in the management of instructional systems.

The goal of this graduate seminar is to critically examine contemporary interdisciplinary research in the area of metacognition.

Spring

College of Community Innovation and Education - Learning Sciences & Educational Research

EME 6938 - ST: Research on Advanced Learning Technologies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Research reveals that students often face challenges engaging ineffective processes for successful learning, leading to the development of advanced learning technologies (ALTs), which aim to foster the use of effective problem solving, metacognitive monitoring, decision making during learning. There are multiple types of data that can be used for assessing how students learn with these ALTs. However, some data channels may not capture all the processes a learner uses. Thus, using a combination of data channels will provide more detailed information about how learners are progressing through a task they are given. Depending on the context and research goals, some data channels will be more appropriate than others.

The goal of this graduate seminar is to explore and critically examine theoretical, methodological, and analytical approaches for using multimodal data to assess learning with advanced learning technologies. This will include: (1) reading key publications in the fields of learning sciences, self-regulated learning, affective computing, and computer science and generating thought-provoking questions; (2) integrating key challenges in the literature and leading class discussions to examine these challenges (3) selecting the most appropriate data channels to investigate learning processes ; (4) understanding the types of variables data channels can generate; and (5) presenting an idea for developing a new advanced learning technology.

In this seminar, we will address how we can use multimodal data to examine learning processes, how advanced learning technologies can be developed to foster the use of these processes, and how studies have been conducted to examine learning and performance with these different types of advanced learning technologies. The course outcomes align with the 5 goals of the seminar outlined above. Specifically, you will be able to:

1. Read and critique academic papers in various disciplines
2. Run stimulating class discussions about key issues in learning sciences
3. Understand, apply, and critique the use of multimodal data
4. Propose how to best use different types of data for assessing learning with an ALT
5. Generate ideas for developing a new advanced learning technology

EME 6938 - ST: Story Design for Instruction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): EME 6507.

The course considers story as an instructional approach for knowledge transfer to meet learning outcomes through instructional design. Stories can enhance instruction, training, and communication.

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Educational Leadership Ed.D. Executive track, Educational Leadership Ed.S., or Curriculum and Instruction Ed.D.

In this course, students will engage with relevant theoretical and empirical literatures regarding organizations, change, and leadership AND apply those literatures to issues of professional practice within their current professional settings,

and their own proposed empirical work.

Fall, Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7192 - Educational Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7101 and EDF 7471.

An analysis of the interactive process and functioning of groups; development of skills essential for effective educational leadership; and the change process.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7193 - Instructional Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7192 and EDF 7407.

Study and analysis of research on leadership resulting in improved student achievement at the local, state, and national levels is the focus of this course.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7195 - Politics, Governance, and Financing of Educational Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7215 and EDA 7224.

The study of policy development as a political process; governance issues; and financial issues in education.

Spring

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7196 - Leadership in a Learning Organization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

This course emphasizes contemporary leadership theory as it applies to a learning organization; i.e., human resources, district department leadership, military, higher education or business.

Occasional

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7205 - Planning, Research, and Evaluation Systems in Educational Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7193 and EDA 7408.

The study of research and evaluation methodologies, system theory, and planning and design strategies in educational administration.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7215 - Community Outreach for Educational Leaders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7225 and EDA 7193.

The course focus will be on developing understandings of the essential relationships between schools and community organizations and the community organizations with themselves.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7224 - Human Resource Development in Educational Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7225 and EDA 7193.

The purpose of this course is to provide understanding of the functions of recruiting, selecting, placing, evaluating, and compensating people.

Fall

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7225 - Advanced Legal Studies in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDA 7192 and EDF 7407.

In-depth study of current legal issues confronting educational leaders and their private sector counterparts.

Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7919 - Dissertation Research

College of Community Innovation and Education

EDA 7943 - Field Project in Educational Leadership**3-6 Credit Hours**

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Admission to doctoral candidacy in the Educational Leadership Ed.D. Executive track or program consent.

Field experience and projects for advanced graduate students. Participation in school plant surveys, accreditation visitation, curriculum studies, administrative analysis, and field research. May be used in the degree program a maximum of 5 times.

Fall, Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

EDA 7987 - Dissertation in Practice**1-6 Credit Hours**

Class Hours: 1-6

Lab and Field Work Hours: 0

Contact Hours: 1-6

Prerequisite(s): Admission to the EdD in Educational Leadership--Executive Track/completion of EdD coursework.

The dissertation in practice is the capstone experience during which doctoral students conduct scholarly research on a complex problem of practice in an education organization.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Educational Leadership and Higher Education

Educational Psychology**EDP 5917 - Directed Research**

College of Community Innovation and Education

EDP 5937 - Special Topics

College of Community Innovation and Education

EDP 6213 - Seminar in Applied Learning and Instruction I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An overview of contemporary theories and research related to human learning and instruction with a focus on affective and motivational issues surrounding learning and instruction.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDP 6217 - Seminar in Applied Learning and Instruction II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDP 6213 or C.I.

An overview of contemporary theories and research in human learning and instruction. Emphasis on cognition, critical thinking, problem-solving, individual differences, and assessment of learning outcomes.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDP 6909 - Research Report

College of Community Innovation and Education

EDP 6918 - Directed Research

College of Community Innovation and Education

EDP 6936 - Capstone in Applied Learning and Instruction

1-6 Credit Hours

Class Hours: 1-6

Contact Hours: 1-6

Prerequisite(s): EDP 6213, EDP 6217, EDF 6216, or C.I.

Students use critical thinking and written communication skills to integrate and apply material learned in courses in learning, instruction, and motivation. Graded S/U. Variable credit, 1-6. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

EDP 7517 - Facilitating Learning, Development and Motivation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Education Ed.D. program.

Emphasizes using theory and research in learning, development, and motivation to diagnose and solve learning and motivational problems in diverse educational environments.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

Engineering Science

EGM 6653 - Theory of Elasticity and Plasticity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237.

Review of stress and strain; solution by tensor stress and potential functions; linear and nonlinear elasticity; constitutive models; for elastic-(visco)plastic solids.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

Engineering: Computer Math

ECM 5917 - Directed Research

College of Engineering and Computer Science

ECM 5937 - Special Topics

College of Engineering and Computer Science

ECM 6308 - Current Topics in Parallel Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Research topics in parallel architectures, including, but not limited to, systolic architectures, wavefront arrays, interconnection networks, reconfigurable architectures and fast algorithms. May be used in the degree program a maximum of 2 times.

Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

ECM 6909 - Research Report

College of Engineering and Computer Science

ECM 6918 - Directed Research

College of Engineering and Computer Science

ECM 6938 - Special Topics

College of Engineering and Computer Science

Engineering: Electrical

EEL 5173 - Linear Systems Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3657.

Models and properties of linear systems, transformation, controllability and observability, control and observer designs, MFD, and realization theory.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5185 - System Identification

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3657 or C.I.

Dynamic systems, models of time-invariant linear, time-varying and nonlinear systems, nonparametric frequency- and time-domain identification methods, kernel expansion techniques, parameter estimation methods, experiment design, and applications.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5245 - Power Electronics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 4309C.

Principles of power electronics, power semiconductor devices, inverter topologies, switch-mode and resonant dc-to-dc converters, cyclo-converters, applications.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5255 - Advanced Power Systems Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4216 or C.I.

This is an advanced course in power systems engineering, designed to provide a student with the knowledge of steady-state analysis in power system operation.

Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5268 - Communications and Networking for Smart Grid

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 4515C. Introduction to smart grid communication infrastructure, communication technologies in smart grid, communication networking in smart grid, communication for vehicle-to-grid systems, secure communication and networking.

Occasional

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEL 5291 - Distributed Control and Optimization for Smart Grid

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 3657 and EEL 4216 or C.I. Electric power systems, transmission and distribution networks, voltage stability and VAR control, dispatch of distributed generation, optimization, frequency control, electricity markets and incentive controls.

Odd Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5296 - Advanced Microgrid Design and Operation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4216.

Advanced course to power systems engineering, designed to provide students with the knowledge of microgrid system fundamentals, design, and operation.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5297 - Introduction to Smart Grid

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): (EEE 3307C and EEL 3657) or EEL 4216 or C.I.

Fundamentals of electric power systems, distributed generation and smart grid components, voltage control and VAR compensation, demand response, leader-follower optimization, resiliency.

Odd Spring, Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5432 - Satellite Remote Sensing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3470 or PHY 4324.

Fundamentals of satellite remote sensing, orbits and geometry, radiative transfer theory, microwave and infrared sensing techniques, ocean, ice and atmosphere geophysical measurements.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5437C - Microwave Engineering

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): EEL 3470 or C.I.

Transmission line theory, Smith charts, S-parameters, simple impedance matching circuits, wave guides, resonators, basic microwave measurements.

Material and Supply Fee: \$40.00 *Fall*

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5439C - RF and Microwave Active Circuits

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): EEL 4436C or EEL 5437C or equivalent.

Transmission line, microwave network theory, impedance matching, noise, power gain amplifier, low noise amplifier, power amplifier, oscillator, mixer and microwave communication system.

Material and Supply Fee: \$40.00 *Spring*

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5462 - Antenna Analysis and Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3470 or equivalent.

Fundamentals of antennas; dipoles, loops, arrays, apertures, and horns. Analysis and design of various antennas.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5582 - Fundamentals of Wireless Communications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4515C and EEL 3021 Introduction to Randomness.

Large and small scale radio propagation effects, performance of digital modulation over wireless channels, capacity analysis of wireless channels, signal processing techniques to mitigate fading effects and improve performance of wireless systems (diversity techniques, adaptive modulation, multiple antenna and MIMO systems).

Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5625 - Applied Control Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

C.I. Designed to develop basic understanding of advanced control methods for nonlinear systems described by ordinary and partial differential equations and to expose recent results and ongoing research issues in the area of MEMS.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EEL 5630 - Digital Control Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3657.

Real-time digital control system analysis and design, Z-transforms, sampling and reconstruction, time and frequency response, stability analysis, digital controller design.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5659 - Introduction to Sensors**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3123C.

Basics of measurements, physics of energy transduction, sensor specifications (range, sensitivity, accuracy, repeatability, noise), applications, basics of signal conditioning.

Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5669 - Introduction to Robotics and Autonomous Vehicles**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173 or C.I.

Forward and inverse kinematics, velocity kinematics, dynamics, constrained motions, path and trajectory planning, position and trajectory control, single and multivariable control, introduction to force/impedance control, introduction to consensus-based control.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5690 - Medical Robotics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

EEL 3657 or Medical students in their second year or later.

Medical robots for minimally invasive surgery, kinematics, constrained workspace and dexterity, haptics, tele-operation and network based control, basics of laparoscopic surgery.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5706 - Resilient Computer System Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 4768 or CDA 5106 or EEL 5708, or C.I. Advanced concepts in hardware/software fault tolerance: fault models, coding in computer systems, module and system level fault detection mechanisms, such as TMR, rollback, and recovery.

Occasional

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEL 5722C - Field-Programmable Gate Array (FPGA) Design

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EEE 3342C with a "C" (2.0) or better grade.

FPGA architectures, design flow, technology mapping, placement, routing, reconfigurable computing applications, and evolvable hardware.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5780 - Wireless Networks

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4781 or C.I.

The wireless networking topics include: cellular networks, multiple access protocols, channel assignment and resource allocation, mobility and location management, handoffs, routing, authentication, call admission control and QoS provisioning, network layer issues, wireless data networking (WAP, GSM, GPRS, CDMA, WCDMA.).

Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5789 - Software-Defined Networking

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4781.

Fundamentals of software-defined networking (SDN). Control, data, and management plane separation. Northbound and southbound APIs. Network function virtualization (NFV), network orchestration, service chaining. SDN and NFV protocols and controllers such as OpenFlow, OpenDaylight, Floodlight, and Open Network Operating System (ONOS).

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5796 - Big Data Computer Architecture and Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 4768 or CGS 3763 or C.I. Computer hardware architecture and operating systems design, implementation and administrative techniques for big data computing platforms which run applications to analyze datasets of massive size and dimensionality.

Even Fall, Odd Spring

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEL 5820 - Image Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302, EEL 4750 or C.I.

Two-dimensional signal processing techniques; pictorial image representation; spatial filtering; image enhancement and encoding; segmentation and feature extraction; introduction to image understanding techniques.

Odd Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5825 - Pattern Recognition and Learning from Big Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3021 or EEL 5542

Preliminaries of pattern recognition, Bayesian Decision Theory, linear discriminant functions, Neural Network approaches, decision tree classifiers, unsupervised learning and clustering, non-parametric techniques, and other topics reflecting the state-of-the art.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5860 - Software Requirements Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Excellent oral and written communication skills. Excellent problem solving skills. In-depth study of software requirements engineering within a process centered framework. Methods for requirements elicitation, analysis, description, and validation. Formal and informal specification.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5862 - Real-Time Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4600 or EEL 4768 or EEL 4742C.

Introduction to specification, analysis, design, and validation techniques for real-time (operating) systems with an emphasis on real-time scheduling theory.

Odd Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5874 - Expert Systems and Knowledge Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4872 or CAP 4630 C.I.

Introduction to expert systems in engineering. Expert systems tools and interviewing techniques. This course is hands-on and project oriented.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5917 - Directed Research

College of Engineering and Computer Science

EEL 5937 - Attacks and Defenses in Secure Architectures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4768.

The course will bring students insights on the cutting-edge research in processor security with the understanding of the interactions between software and the underlying hardware.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5937 - Future Computing Systems for Emerging Workloads

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Introduction to future computing systems based on emerging technology and its application to emerging workloads as artificial intelligence and big data.

N Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5937 - Introduction to Electronic Design Automation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Introduction to electronic design automation (EDA) for the synthesis of circuits based on transistor and memristor technology with a focus on algorithms and data structures.

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5937 - Power System Dynamics and Stability

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4216

This is an advanced course to power systems engineering designed to provide students with the knowledge of power system dynamics and stability.

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5937 - Real-Time Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4600 or EEL 4768 or EEL 4742C.

Introduction to specification, analysis, design, and validation techniques for real-time (operating) systems with an emphasis on real-time scheduling theory.

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5937 - Special Topics

College of Engineering and Computer Science

EEL 6026 - Optimization of Engineering Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and C.I.

A unified treatment of optimization methods often used to solve problems in engineering and applied sciences. Software packages are used when appropriate.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6208 - Advanced Machines**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4205.

Theory of electric machines using reference frame transformations: Basic principles of dc and ac machines, including induction and synchronous, are included. Simulation techniques for steady state and dynamic performance analysis will be used to analyze operation of electric machines with solid state drives.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6246 - Power Electronics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5245.

Advanced topics in power electronics, soft-switching techniques, small-signal modeling of PWM and resonant converters, control techniques, power factor correction circuits.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6251 - Power System Optimization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5255.

This is an advanced course to power systems engineering designed to provide students with the knowledge of optimization technologies and their applications in power systems.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6253 - Power System Resilience

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5255.

This is an advanced course to power systems engineering, designed to provide students with the knowledge of power system resilience.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6254 - Power Systems Reliability

3 Credit Hours

Class Hours: 3

Contact Hours: 3

Prerequisite(s): EEL 4216

Advanced course to power systems engineering, designed to provide a student with a comprehensive understanding of quantitative reliability evaluation of modern power systems.

Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6257 - Data Analytics in Energy Systems

3 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EEL 5255 or equivalent with a grade "C" or above, or C.I.

Graduate level course. Introductions of data analytical methods for power system applications. Topics include energy forecasting, state estimation, demand response, load disaggregation, asset management, power system cybersecurity, grid-interactive buildings, and solar energy.

Odd Spring, Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6269 - Advanced Topics in Power Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 6255.

A current topic will be discussed such as power system transients, system protection, TandD, and dielectric engineering.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6272 - Smart Power Grids Protection

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 4216 or C.I. Different aspects of protection of smart grids. Provides a comprehensive understanding of protection of modern power systems including protection of renewable energies and protection of automated power systems.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6278 - Attacks and Defenses in Secure Cyber-Physical Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4294 or equivalent or C.I.

This is an advanced course designed to provide students with the knowledge of security challenges for cyber-physical systems and approaches to enhance their security.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6361 - Emerging Device Computing Architectures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

CDA 5106 or EEL 5708 or C.I. Post-CMOS logic devices. Spintronic logic and memory systems. Memristor-based processing elements. Logic-In-Memory and non-Boolean computing approaches. System design and performance assessment, and applications.

Occasional

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEL 6364 - Neuromorphic Computing Architecture, Circuit and Device

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 5825 or EEE 5390 or C.I. Advanced concepts in neuromorphic computing architectures and its hardware implementations using nano-scale emerging spin-transfer torque and memristor devices.

Fall

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEL 6425C - RF and Microwave Measurement Techniques

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): EEL 4436C or EEL 6482 or EEL 5439C or C.I.

RF and Microwave components in wireless systems; i.e., antennas, passive components, active circuits, as well as noise, modulation are characterized by measurement and designed/verified by EM/circuit software.

Material and Supply Fee: \$40.00 *Fall*

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6481 - Numerical Techniques in Electromagnetics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 6488 or C.I.

Applications of finite difference methods (FDTD), finite element method, integral equation method (method of moments) to electromagnetics.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6482 - Electromagnetic Theory I**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5439C or C.I.

Maxwell's equations, boundary conditions, propagation and reflection, electromagnetic theorems and principles, guided waves and scattering.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6489 - Advanced Topics in Electromagnetics and Microwaves**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Advanced and current topics in EM fields, antennas, and microwaves.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6504 - Communications Systems Design**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 6530.

Information and coding theory. Modem design. Binary and M-ary modulations. Intersymbol interference and pulse shaping. DS and FS spread-spectrum systems.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6530 - Communication Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 5542 or C.I.

Communication in the presence of noise; analog and pulse modulation; use of phase-locked loops, synthesizers, VCOs, system implementations.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6532 - Information Theory and Coding

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 5542 or C.I.

Concepts regarding information: Covers entropy, channel capacity, Shannon's theorems, Fano's inequality, coding theory, linear, Hamming, and cyclic codes, Hamming, Singleton, Gilbert-Varshamov, and Plotkin Bounds.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6537 - Detection and Estimation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 5542. Use of hypothesis testing (Bayes, Minimax, Neyman-Pearson) and estimation theory (Bayes, Maximum-likelihood) for detecting or estimating signals in noise. Application in communications and radar.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6590 - Advanced Topics in Communications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Advanced and current topics in communications, such as coding theory, information theory, spread spectrum, etc.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6616 - Adaptive Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173.

System identification and adaptive control design, including identification algorithms, MRAC, STR, and stochastic adaptive control. Lyapunov stability and input-output stability.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6618 - Probabilistic Methods for Neural Coding and Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 5542 and EEL 5173, both with a C or better or C.I.

This course provides an overview of advanced, state-of-the-art probabilistic methods used in the encoding/decoding of neural signals and control of neural systems.

Odd Fall, Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6619 - Nonlinear Robust Control and Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173 and EEL 6621.

Stability, performance and robustness of nonlinear systems with uncertainties, Lyapunov-based designs, recursive designs and nonlinear optimal designs.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6621 - Nonlinear Control Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173.

Phase plane descriptions of nonlinear phenomena, limit cycles, jump conditions, stability, describing functions, Liapunov and Popov theory, time and frequency domain analysis for nonlinear systems.

Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6662 - Advanced Robotics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5559 or C.I.

Geometric Nonlinear Control, Control of Redundant Robots, Computer Vision and Vision-based control, Formation Control, and Cooperative Rules and Behaviors of Robotic Vehicles.

Odd Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6667 - Mobile Robotic Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

EEL 5173 or EEL 5630.

Non-holonomic systems, kinematics and dynamics, trajectory planning and obstacle avoidance, canonical terms, control design, stability, performance, and robustness.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6671 - Modern and Optimal Control Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173.

The optimal control problem. Necessary conditions for constrained minimums in finite dimensional space. Application to discrete time control problems. Pontryagin conditions and Hamilton-Jacobi equations. Computational considerations.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6674 - Optimal Estimation for Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5173 or C.I.

Optimal filtering, smoothing, and prediction methods are analyzed with applications to a number of linear and nonlinear dynamic systems.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6675 - Stochastic Control**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3657 and EEL 4612C.

Models and solution techniques for decision-making problems in the presence of uncertainty; optimal control of systems with stochastic dynamics with perfect and imperfect state information.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6683 - Cooperative Control of Networked Autonomous Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL5173 or consent of instructor.

Fundamentals of cooperative control theory for autonomous vehicles and agents, with emphasis on consensus, effects of intermittent and delayed communication/sensing network, and cooperative control designs.

Odd Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6723 - Reconfigurable Logic Applications**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5722C or C.I.

Field-programmable gate array (FPGA) architectures, reconfigurable computing applications, and emerging central processing unit CPU+FPGA hybrid platform. The overall objective is to investigate the state-of-the-art FPGA-based reconfigurable computing both from a hardware and software perspective.

Odd Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6760 - Data Intensive Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CDA 5106 or C. I.

Data intensive computing and its enabling systems architectures such as MapReduce, cloud computing and storage, with a focus on system architecture, middleware and building blocks, programming models, algorithmic design, and application development.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6762 - Performance Analysis of Computer and Communication Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4742C and STA 3032 or C.I.

Stochastic modeling and discrete-event simulation; Markov chains; networks of queues; SemiMarkov models; application to multiprocessor systems, switching and multi-user communications.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6785 - Computer Network Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4768C or C.I.

Network types and network protocols. Design of networks and analysis of their performance.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6788 - Advanced Topics in Computer Networks

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4781 or C.I.

Advanced topics in the networking field, driven by the latest research and technology developments.

Odd Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6812 - Introduction to Neural Networks

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5825 or EEL 4798 or EEL 4750 or C.I.

Advanced Machine Learning and Applications. Perception Network, BP Network, Convolutional NN, Recurrent NN, Evolutionary Computation, and Reinforcement Learning.

Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6843 - Machine Perception

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 5820 or EEL 5825 or C.I. Advanced methods of machine understanding; simulation of intelligent machine systems; automatic recognition systems; visual tracking systems; multispectral feature analysis.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6865 - Architecture and Design of Software Intensive Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I.; and EEL 4851C or equivalent; and EEL 4884C or EEL 5881 . In depth study of software architecture and design of engineering complex software-intensive systems. Theory and practice.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6875 - Autonomous Agents

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4872 or CAP 4630 or C.I.

Agent architectures, including behavioral, decision theoretic and logic (BDI) based. Multi-agent systems, agent communication languages. Negotiation, argumentation, coalition formation. Project oriented.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6878 - Modeling and Artificial Intelligence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4872 or CAP 4630 or C.I.

Introduction to artificial intelligence techniques applied to computer-based modeling, simulation, and training.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6883 - Software Engineering II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5881 or equivalent; C.I.

Continuation of EEL 5881 . Emphasis on term projects and case studies.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 6909 - Research Report

College of Engineering and Computer Science

EEL 6918 - Directed Research

College of Engineering and Computer Science

EEL 6938 - ST: Integrated Grid-Tied PV Systems with Storage

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): EEL 3004.

This course is designed to equip students with knowledge on new energy technologies, specifically on grid-connected PV systems and energy storage systems.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 7919 - Research

College of Engineering and Computer Science

Engineering: Electrical and Electronic

EEE 5265 - Biomedical Effects and Applications of Electromagnetic Energy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 3470 or C.I. RF and microwave energy and their interaction with biological materials. Specific biomedical effects such as absorption, thermal therapy, hyperthermia, etc., will be discussed.

Even Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5279 - Advanced Bioelectronics Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 4309C or C.I. Advanced bioelectronics systems and techniques that enable recent biophysical and biomedical research will be discussed.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5323 - Radio Frequency Integrated Circuit Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 3307C and EEL 3470.

This course introduce the principles, analysis, and design of Radio frequency (RF) integrated circuits for wireless communication systems.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5332C - Thin Film Technology

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): EEE 3350 or equivalent.

Presents the various thin film deposition techniques for the fabrication of microelectronic, semiconductor, and optical devices.

Material and Supply Fee: \$70.00 *Spring*

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5352 - Semiconductor Material and Device Characterization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 3350 or C.I.

Semiconductor material characterization resistivity, mobility, doping carrier lifetime, device properties, threshold voltage, interface charge of MOS devices, optical and surface characterization of films.

Odd Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5353 - Semiconductor Device Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 3307C.

Large signal and small signal model development for semiconductor diodes, BJTs, and MOSFETs. Parameter extraction, numerical algorithm, and SPICE simulation are included.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5356C - Fabrication of Solid-State Devices

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): EEE 3350.

Fabrication of microelectronic devices, processing technology, ion implantation and diffusion, device design, and layout. Laboratory includes device processing technology.

Material and Supply Fee: \$70.00 *Fall, Spring*

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5370 - Operational Amplifiers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 4309C.

Ideal and non-ideal Op-Amps. Linear applications. Active RC and switched-capacitor filters. Non-linear and other functional circuits. Frequency stability and compensation of Op-Amps.

Even Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5378 - CMOS Analog and Digital Circuit Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 4309C.

Advanced principles and design techniques for CMOS ICs including most recent published results.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5390C - Full-Custom VLSI Design

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

EEE 3307C and EEE 3342C with a "C" (2.0) or better grade. Provide background in integrated devices, circuits, and digital subsystems needed for design and implementation of silicon logic chips.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5445 - Terahertz (THz) Integrated Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4436.

High-frequency nonlinear electronic devices, millimeter-wave and THz integrated circuits, broadband time- and frequency-domain signal generation and sampling techniques, on-chip antennas.

Odd Fall, Even Fall

College of Sciences - Department of Electrical and Computer Engineering

EEE 5513 - Digital Signal Processing Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4750.

The design and practical consideration for implementing Digital Signal Processing Algorithms including Fast Fourier Transform techniques, and some useful applications.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5542 - Random Processes I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3552C and STA 3032.

Elements of probability theory, random variables, and stochastic processes.

Fall, Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5555 - Surface Acoustic Wave Devices and Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3552C.

Course discusses SAW technology which includes the physical phenomenon, transducer design and synthesis, filter design and performance parameters. Actual devices and communication systems are presented.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5557 - Introduction to Radar Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 3552C.

Introduction to Pulse and CW Radar Systems. Chirp Radar Systems. Tracking Radar. Noise in Radar Systems.
Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5781 - Cyber-Physical Technologies for Smart Communities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing, EEL 4781 or EEL 4515C or C.I.

Introducing technologies that enable smart and connected communities; technologies include sensing, computing, communications, and device technologies related to smart grid, smart infrastructure, and intelligent transportation systems.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5790 - Introduction to Secure Architectures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4768.

This course will provide the students with basic understanding of the state-of-the-art support for implementing security primitives in commodity processors. Specifically, the course focus on Intel's Safe-Guard Extension(SGX), ARM's TrustZone and AMD's SME and SEV.

Fall, Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 5917 - Directed Research

College of Engineering and Computer Science

EEE 6317 - Power Semiconductor Devices and Integrated Circuits

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 3350 or equivalent or C.I.

Fundamental understanding of modern power semiconductor devices and integrated circuits (ICs) in relation to their applications in power electronics systems.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6326C - MEMS Fabrication Laboratory

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): C.I.

Silicon Nitride and Poly-silicon Depositions, Photolithography, Dry and Wet etching processes, Metal depositions and etching, MEMS device design and fabrication.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EEE 6338 - Advanced Topics in Microelectronics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Covers advanced topics in microelectronics such as semiconductor device physics, semiconductor device fabrication, and semiconductor device modeling.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6347 - Trustworthy Hardware

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 5390C or EEL 5704 or C.I. Introduce the concept of trustworthy hardware. Review scientific publications in the area of trustworthy hardware. Design, analyze, and evaluate trustworthy embedded systems.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6358 - Advanced Semiconductor Device I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 3350.

First course in advanced semiconductor device physics and modeling. Main stream devices including junctions diode, bipolar transistor, and metal-oxide field-effect transistor.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6406 - Modern EDA Algorithms in VLSI

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4783.

This course covers all of the most important aspects of modern Electronic Design Automation (EDA) software: logic synthesis, circuit placement, and routing algorithms. Students will not only learn theory but also gain hands-on experience by doing a software project.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6475 - CMOS Analog and Digital Integrated Circuit Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 4309C or C.I.

The objective of this class is to teach the graduate students the principle and techniques of CMOS IC design for high performance, low power, and RF applications.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6504 - Adaptive Digital Signal Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 5513 or C.I.

Weiner filtering, Least Mean Square and Recursive Least Squares based algorithms, adaptive prediction and identification with applications such as echo cancellation, etc.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6505 - Multidimensional Digital Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 5513 or C.I. Multidimensional signals and systems. Two-dimensional transforms and filters. Image processing applications.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6527 - Compressive Sensing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 5542. This course offers a broad coverage of the emerging topic of compressive sensing. The focus of the course is on describing the ideas and techniques that have been developed in this field with emphasis on theoretical foundations, algorithm developments, and applications.

Fall

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6543 - Random Processes II**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEE 5542.

Stochastic processes. Mean-squared estimation. Queuing theory. Spectral estimation. Applications to communications and radar systems.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6558 - Advanced Radar Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEE 5557. Advanced radar concepts: electromagnetic propagation and target scattering and fading; radar signal processing - target parameter estimation and information extraction, and radar system design.

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6712 - Modeling and Analysis of Networked Cyber-Physical Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and (EEL 4781 or EEL 4515C) or C.I. Analysis, modeling and design of networked cyber-physical systems such as intelligent transportation systems and industrial control networks; stochastic hybrid systems, continuous and discrete system modeling approaches; industry standards in transportation, smart grid, industrial control, and their use and implication in design of distributed systems.

Spring

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 6721 - Evolvable Hardware**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EEL 5722C or C.I. Evolvable digital and analog computing hardware, including intrinsic and extrinsic reconfigurable architectures, self-adapting circuits, and autonomous computing architectures.

Occasional

College of Engineering and Computer Science - Department of Electrical Engineering and Computer Science

EEE 6780 - Advanced Topics in Real-Time Cyber Physical Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 5862/4862.

This course will provide students recent research in real-time and cyber-physical systems by exploring important papers in selected topics.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEE 7919 - Directed Research

College of Engineering and Computer Science

EEL 5250 - Power System Detection and Estimation**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4216 or C.I.

This is an advanced course to power engineering, designed to provide students with the knowledge of stability and outage detection and state estimation methods.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

EEL 5272 - Biomedical Sensors

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4750 or EEL 4832 or C.I.

Study of engineering concepts behind the various biomedical sensors used to monitor a patient undergoing clinical therapy.

Occasional

College of Engineering and Computer Science - Department of Electrical and Computer Engineering

Engineering: Environmental

ENV 5410 - Water Treatment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EES 4202C or ENV 5517 or C.I.

Potable water regulations, standards, chemical reactors, oxidation, disinfection, disinfection by-products, ultraviolet irradiation. Internal corrosion and microbial control in municipal and industrial water distribution systems.

Odd Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 5505 - Sludge Management Operations in Environmental Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 4561.

Theory and design of sludge management operations and processes in environmental engineering, including stabilization dewatering and ultimate disposal.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 5517 - Engineering Chemical and Biological Processes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): ENV 4561(or equivalent) or C.I.

Coverage of equilibrium/aquatic chemistry, softening and coagulation, and disinfection of water. Microbiology and biochemistry as applied to activated sludge system design.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 5636 - Environmental and Water Resources Systems Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 3001 or C.I.

Discussion of environmental and water resources systems with the emphasis on cost-effectiveness, pollution prevention, and sustainability to aid in environmental engineering decision-making.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 5917 - Directed Research

College of Engineering and Computer Science

ENV 5937 - Special Topics

College of Engineering and Computer Science

ENV 6015 - Physical/Chemical Treatment Systems in Environmental Engineering**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 4561 and EES 4202C or C.I.

Theory and design of physical and chemical operations and processes in environmental engineering using latest technologies.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6016 - Biological Treatment Systems in Environmental Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EES 4111C and ENV 4561 or C.I.

Theory and design of biological operations and processes in environmental engineering using the latest technologies.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6030 - Environmental Biotechnology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EES 4111C.

Environmental Biotechnology teaches graduate students the management of microorganism-based engineer systems for applications in waste treatment and energy generation.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6046 - Membrane Mass Transfer**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 6015 or C.I.

Introduction to modeling of mass transfer in membrane systems; membrane morphology, mathematical development of mass transfer coefficients; fouling mechanisms, system modeling, and applications.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6047 - Environmental Informatics and Remote Sensing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Discussion of how the environmental informatics, including hydroinformatics, can be applied for sustainable decision making with the emphasis on remote sensing, GIS, expert systems, decision support systems, data mining, and environmental management.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6106 - Theory and Practice of Atmospheric Dispersion Modeling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Atmospheric composition and dynamics. Engineering methods of mathematical modeling, both for point source and mobile source. Current computer models will be used.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6126 - Design of Air Pollution Controls

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Current methods for engineering design and performance analysis of air pollution control equipment to include scrubbers, baghouses, electrostatic precipitators, VOC incinerators, others.

Odd Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6128 - Smart Air Quality Monitoring and Air Pollution Control

3 Credit Hours

Prerequisite(s): CGN 5555.

This course will introduce science and engineering principles in smart air pollution measurement and control. Hands-on experiences are also provided.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6519 - Aquatic Chemical Processes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EES 4202C and EES 4111C or C.I.

The applicability of water chemistry and physical chemistry on natural waters and waste-water with emphasis on environmental engineering problems.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6533 - Smart Water and Wastewater Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 3001 with a grade of "C" (2.0) or better or C.I.

This course introduces the concepts of smart water and wastewater systems and how advanced technology are being used for sustainable urban development.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6558 - Industrial Waste Treatment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENV 4561.

Theories, methods, unit operations of management, reduction, treatment, disposal of industrial wastes.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6616 - Ecological Engineering and Receiving Water Impacts

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ENV 5517 or C.I. Ecological engineering principles, ecosystem restoration and receiving water impacts. Introduction of green building design and integration of new ecosystem associated with green infrastructures and applications for eco-city design.

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

ENV 6909 - Research Report

College of Engineering and Computer Science

ENV 6918 - Directed Research

College of Engineering and Computer Science

ENV 6938 - Special Topics

College of Engineering and Computer Science

ENV 7919 - Research

College of Engineering and Computer Science

Engineering: Mechanical

EML 5026C - Computational Engineering Analysis

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EML 4024C.

Principle understanding and project based hands-on experience on computational engineering analysis including Finite Element Analysis (FEA), Computational Fluid Dynamics (CFD), and Multi-body Dynamics (MBD).

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5060 - Mathematical Methods in Mechanical and Aerospace Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302.

Vector field theory, generalized coordinates, complex variables, contour integration and Laplace and Fourier transforms and inversions, variable coefficient ODEs and solution of PDEs for governing equations of heat transfer, ideal fluid flow, and mechanics.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5066 - Computational Methods in Mechanical and Aerospace Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3034C.

Error Norms, interpolation and extrapolation, quadratures and adaptive quadratures, solutions of linear and nonlinear systems of equations, functional approximation, solution of ODE's and MWR.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5090 - Mechanical and Aerospace Seminar

0 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 0

Contact Hours: 0

Prerequisite(s): Graduate standing or C.I.

The course is intended to help MAE graduate students practice public speaking, learn skills of scientific communication, expand their width of knowledge, and promote collaborations. May be repeated.

Fall, Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5105 - Gas Kinetics and Statistical Thermodynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EAS 4134 or EML 4703.

Molecular and statistical viewpoint of gases and thermodynamics; Boltzmann collision integral, partition functions, non-equilibrium flows. Applications in thermo-fluid systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5152 - Intermediate Heat Transfer

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4142, EML 5060.

An intermediate-level course dealing with heat and mass diffusion, boundary layer problems, and radiation from real bodies. Emphasis on combined modes, numerical methods.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5228 - Modal Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3303C, EML 4225, and EML 5060.

Theoretical basis. Measurement techniques, excitation, transducers, data acquisition. Detailed data analysis, modal parameter extraction, curve-fitting procedures. Modeling.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5237 - Intermediate Mechanics of Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3500 or EAS 4200.

Elements of elasticity. Failure theories. Bending and torsion. Thin plates. Energy principles. Thick-walled cylinders. Applications to design.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5271 - Intermediate Dynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3321.

Dynamics of particles, rigid bodies, and distributed mass systems. Topics include: Hamilton's principle, Lagrange's equations, Numerical methods, and Mechanisms.

Odd Spring, Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5290 - Introduction to MEMS and Micromachining

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Introduction of Micro-Electro-Mechanical-Systems (MEMS) and micromachining (microfabrication) methods. Etching and etching mask. Basics of silicon macromachining processing. Fundamentals of bulk micromachining. Thin film formation and surface micromachining. Microplating and LIGA process. Nonlithographic micromachining process including laser. May be repeated for credit.

Odd Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5291 - MEMS Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060, EML 6211, or C.I.

Introduction of materials that are frequently used for MEMS applications such as silicon, metal, ceramics and polymers. The course will focus on fundamental principles involved in structures and properties of the materials, and their applications in MEMS.

Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5311 - System Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4225. Corequisite(s): EML 5060.

Modern control theory for linear and non-linear systems; controllability and observability. Linear state feedback and state estimators, compensator design.

Odd Fall, Even Fall, Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5402 - Turbomachinery

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3101, EML 4703 or EAS 4134.

Application of the principles of fluid mechanics, thermodynamics, and aerodynamics to the design and analysis of steam and gas turbines, compressors, and pumps.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5403 - Science and Technology of Fuel Cells

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365, EMA 4102 or C.I.

Fundamental knowledge along with hands-on experience with design, manufacturing and operation of fuel cells.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5430C - Design for Manufacturing in Turbomachinery: Gas/Steam/Wind Turbines and Generators

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EGN 3365 or EMA 3706.

Overall assembly of rotating and stationary components in power generation powertrains; probabilistic design, materials, coatings, manufacturing steps, defects for gas/steam/wind turbines and generators.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5431C - Design for Mechanical and Dynamic Integrity and Reliability in Turbomachinery

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EGM 3601, EML 4220 or EML 4225, EGN 3365 or EMA 3706.

Mechanical and dynamic integrity issues such as creep, fatigue, fracture, rotordynamics, vibration, flutter, as related to turbines and generators; reliability; cost-time-performance trade-off in design.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5456 - Turbines for Sustainable Power

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGM 3601, (EGN 3365 or EMA 3706), (EML 3701 or EAS 3101) Corequisite(s): EML 4142.

Multidisciplinary aspects of turbine design for sustainable power generation including aerodynamics to combustion and emissions to reliability; covers multiple applications of convention and green technology.

Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5532C - Computer-Aided Design for Manufacture

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EGN 4535C.

Builds on introductory material covered in EML 4535C. Topics include computer modeling for the synthesis, simulation, design and manufacture of mechanical, thermal, and aerospace systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5545 - Smart and Adaptive Structures

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

(EAS 4200 or EML 3500) and EML 4225 and (EGN 3365 or EMA 3706) or C.I. Modeling and design of structures with integrated active materials: piezoelectric ceramics and polymers, shape memory alloys and polymers, magneto- / electro-rheological fluids, magneto- / electro-strictives. Multi-stable structures.

Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5546 - Engineering Design with Composite Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237.

Mechanics of structural components of composite materials under static, thermal, vibratory loads. Instability. Lamina and laminate theory, energy methods, failure theories, and structural joining methods.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5713 - Intermediate Fluid Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4703. Corequisite(s): EML 5060.

Fluid kinematics; conservation equations; Navier-Stokes equations; boundary layer flow, inviscid flow, circulation and vorticity; low Reynolds number flow; turbulence.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 5917 - Directed Research

College of Engineering and Computer Science

EML 6062 - Boundary Element Methods in Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237 or EML 5713 or C.I.

Integral (numerical) solution of potential, Poisson and diffusion equations; applications to heat transfer and fluid flow; complex variable boundary element methods.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6067 - Finite Elements in Mechanical, Materials, and Aerospace Engineering I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237 or EML 5713.

Finite element analysis of thermomechanical response of aerospace and mechanical components and structures. Plates and shells. Vibrations. Composite materials. Minimum weight design. CAD interface. Introduction to codes.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6068 - Finite Elements in Mechanical, Materials, and Aerospace Engineering II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 6067 or C.I.

Advanced finite element applications to aerospace and mechanical components and structures. Rotating systems. Fracture mechanics. Aeroelasticity. Buckling. Impact. Use of codes.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6085 - Research Methods in Mechanical and Aerospace Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060.

Research project is an MAE option under supervision of an adviser. A project report is due at the end of the semester.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6104 - Classical Thermodynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3101 or C.I.

A general postulative approach to classical macroscopic thermodynamics featuring states as fundamental constructs. Conditions of equilibrium, stability criteria, thermodynamic potentials. Maxwell relations and phase transitions.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6131 - Combustion Phenomena

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5152.

Physical and chemical aspects of combustion phenomena. Rate processes, chemical kinetics, structure, propagation and stability of premixed and diffusion flames.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6144 - Boiling and Condensation Heat Transfer

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4142 or C.I.

Phase changes heat transfer including boiling and condensation. Phenomenological treatment of pool boiling, two-phase flow, and convective boiling. Filmwise and dropwise condensation. Applications.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6154 - Conduction Heat Transfer

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5152 or C.I.

Classical and numerical techniques applied to the solution of steady and transient conduction problems. Applications to the design of thermal systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6155 - Convection Heat Transfer

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5152, EML 5713, or C.I.

Convection heat, mass and momentum transfer in laminar and turbulent flows. Applications to the design of thermal systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6157 - Radiation Heat Transfer

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5152 or C.I.

Radiation properties of surfaces and analysis of radiative heat transfer between black, gray, non-gray and non-diffuse surfaces. Multimode problems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6211 - Continuum Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237.

Introduction to tensors; deformation and strain; stress; balance laws; constitutive equations; applications in linear elasticity.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6223 - Advanced Vibrational Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4220, EML 5271 or C.I.

Discrete and distributed parameter systems. Introduction to nonlinear and random vibrations. Concepts of modern dynamic analysis.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6226 - Analytical Dynamics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EML 5271. Kane method for kinematics and dynamics of particle and rigid bodies is developed and contrasted with Newton and Lagrange methods. Multibody dynamics.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6227 - Nonlinear Vibration**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EML 5060 and EML 5271. Robust, reliable algorithms for simulation of nonlinear phenomena; phase planes; limit cycles; stability; period-multiplying bifurcations; strange attractors; Poincare maps; Floquet theory; Lyapunov exponents; applications to mechanical and aerospace systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6233 - Fundamentals of Fatigue Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 6211 or C.I.

A review of classical and modern methods of fatigue life prediction and the physical process therein. Primary emphasis relates to metallic materials.

Even Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6238 - Plates and Shells

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EGM 3601, EML 6211, EML 5060. This course introduces the reduction of 3D elasticity to an equivalent 2D counterpart; basic assumptions; field equations of the theory of plates and shells; linear and nonlinear theories; buckling and vibrations; refined plate and shell theories.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6295 - Sensors and Actuators for Micro Mechanical Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060, EML 6211, or C.I.

Classifications of sensors and actuators. Physics of sensing and actuation. Evaluation of sensors and actuators.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6296 - MEMS Mechanism and Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 3500, EGM 3601, EML 4142.

Miniature Electro Mechanical Systems (MEMS) working mechanisms (mechanical, thermal, electric, piezoelectric, magnetic, etc.). Design rules. May be repeated for credit.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6297 - MEMS Characterization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060, EML 6211, or C.I.

Introduction of methods, techniques and philosophies being used to characterize MEMS for engineering applications. Materials characterization, systems characterization (mechanical, electrical, optical, etc). Test methods and sample preparation. Test results analysis.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6299 - Advanced Topics on Miniaturization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060, EML 6211, or C.I.

Advanced sensor and actuator devices, advanced micro-thermal systems, advanced topics on materials for MEMS, advanced topics on tribology for MEMS/NEMS, advanced topics on miniature power generation systems.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6305C - Experimental Mechanics

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EML 4304C, EML 5237.

Selected topics in strain measurements, photoelasticity, holographic interferometry; laser speckle measurement; acoustic emission, measurement of correlation and coherence functions.

Material and Supply Fee: \$25.00 *Occasional*

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6308C - Thermofluids Measurements and Instrumentation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): EML 4703, EML 3303C, EML 5060, EML 5152 or C.I.; not open to students that have credit for EAS 6807C.

Surface pressure and shear measurements, hotwire anaemometry, heat transfer coefficient measurement, LDV, PDPA and PIV flow field measurements.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6547 - Engineering Fracture Mechanics in Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5237 or C.I.

General understanding of elementary concepts. Practical application enabling useful prediction of fracture safety and characteristics. Some general knowledge of fracture mechanisms and fracture criteria.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6572 - Probabilistic Methods in Mechanical Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 and EML 3500 or EAS 4200.

Uncertainty modeling in design and analysis of industrial equipment and engineering systems (data analytics, quality control, and reliability engineering).

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6712 - Mechanics of Viscous Flow

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5060 , EML 5713.

Principal concepts and methods for viscous fluid motion. Incompressible and compressible boundary layer analysis for laminar and turbulent flows.

Odd Fall

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6725 - Computational Fluid Dynamics and Heat Transfer I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 5152 or C.I.

Finite Difference methods; error and stability analysis; applications to model equations and further developments; matrix methods.

Spring

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6726 - Computational Fluid Dynamics and Heat Transfer II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 6725.

Development of governing equations; turbulence modeling; numerical solution of Euler and potential equations, Navier-Stokes equations, and boundary layer equations; grid generation.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6808 - Analysis and Control of Robot Manipulators**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EML 4312C, EML 5271, or C.I.

Kinematics and dynamics of multibody systems, especially robot manipulators. Design and control of robot manipulators.

Occasional

College of Engineering and Computer Science - Department of Mechanical and Aerospace Engineering

EML 6909 - Research Report

College of Engineering and Computer Science

EML 6918 - Research

College of Engineering and Computer Science

EML 7908 - Independent Study

College of Engineering and Computer Science

English Composition**ENC 5237 - Writing for the Business Professional****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

A study of the major document designs for professionals in business, focusing on audience, purpose, style, arrangements, and content.

Fall, Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5276 - Theory and Practice of Tutoring Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the M.A. in Rhetoric and Composition program, graduate standing or C.I.
The theory and practice of assessing and responding to writing as a collaborator (as opposed to evaluator).

Fall

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5337 - Rhetorical Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Overview of theory and history of classical and modern rhetorical theory and rhetorical instruction.

Fall, Odd Summer

College of Arts and Humanities - Department of English

ENC 5703 - Composition Histories and Theories

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Intensive seminar on historical, theoretical, and intellectual traditions and approaches to composition and rhetoric.

Fall, Spring

College of Arts and Sciences - Department of Writing and Rhetoric

ENC 5705 - Approaches to Teaching College Composition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

Intensive pedagogical and theoretical seminar on teaching composition at the college level.

Fall, Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5917 - Directed Research

College of Arts and Humanities

ENC 5920 - Colloquium in Rhetoric and Composition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Foundational concepts, readings, and journals in the areas of composition, literacy, and rhetoric.

Odd Fall, Even Fall

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5930 - Current Topics in Professional Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or C.I.

Students will learn how to produce texts for specialized fields of discourse, including the medical and legal profession, as well as for general publication.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5933 - Seminar for Peer Writing Consultants

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Explore writing center research and practice on a professional level.

Fall, Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 5937 - Special Topics

College of Arts and Humanities

ENC 6216 - Editing Professional Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The study of major issues in editing, includes theory and scholarship of professional editing.

Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6217 - Technical Editing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English, or C.I.

A study of the strategies for editing the prose, design, and illustrations of print and online technical documents.

Occasional

College of Arts and Humanities - Department of English

ENC 6225 - User-Centered Design for Technical Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to English MA or C.I.

Covers multiple user-centered design methods, including usability testing; prototyping; and user research. Applies methods to a technical communication design problem.

Even Fall

College of Arts and Humanities - Department of English

ENC 6245 - Teaching Professional Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theory and practice of teaching professional writing in college and the workplace. Includes historical and contemporary approaches.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6247 - Proposal Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Theory and practice of writing proposals.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6255 - International Technical Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the English MA program or C.I.

Documentation for international audiences and the challenges of communicating across cultures.

Even Spring

College of Arts and Humanities - Department of English

ENC 6257 - Visual Technical Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing in English or C.I. Creation and editing of graphics in technical documents.

Occasional

College of Arts and Humanities - Department of English

ENC 6261 - Technical Writing, Theory and Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A study of major trends in technical communication theory and the practices this theory generates.

Occasional

College of Arts and Humanities - Department of English

ENC 6292 - Project Management for Technical Writers.

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Managing a writing project from inception to production; planning, budgeting, personnel, writing, and editing.
Occasional

College of Arts and Humanities - Department of English

ENC 6296 - Interactive Design in Technical Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The theory and practice of writing and designing interactive systems for users, including online help tutorials, procedures, and demonstrations.

Occasional

College of Arts and Humanities - Department of English

ENC 6297 - Production and Publication Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Production of technical documents including typography, visual rhetoric, layout and design, and planning and managing documentation projects.

Occasional

College of Arts and Humanities - Department of English

ENC 6306 - Persuasive Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Theory and practice of writing persuasively.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6332 - Gendered Rhetoric

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Questions women's and men's linguistic choices, the influence of medium and discipline of discourse, and consequences of status, power, and oppression.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6333 - Contemporary Rhetoric and Composition Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Instruction on politics of basic writing programs, rhetoric, ideology and cultural production, poststructuralism and rhetoric or reinvent pedagogies. May be used in the degree program a maximum of 3 times.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6335 - Rhetorical Traditions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Philosophy and techniques of classical rhetoricians such as Isocrates, Aristotle, and Cicero with special attention to their application to contemporary rhetorical situations.

Fall, Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6338 - The Rhetorics of Public Debate

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

How rhetorical theories further community goals, including activist, political, legislative, and other significant public debates.

Occasional

College of Arts and Humanities - Department of English

ENC 6339 - Rhetorical Movements

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

To study the principal rhetorical theories of the classical period and rhetoric of the eighteenth and nineteenth centuries. May be used in the degree program a maximum of 3 times.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6421 - Digital Rhetorics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Study of rhetorical theory and practice shaped by digital environments, technologies, and texts, including contemporary issues around rhetorical invention, identity, and multimodality.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6425 - Hypertext Theory and Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing in English or C.I. Theoretical and practical study of the uses and premises of hypertext.

Occasional

College of Arts and Humanities - Department of English

ENC 6426 - Visual Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Studies visual dimensions of the texts of digital discourse.

Occasional

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENC 6428 - Digital Literacies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Study of digital technology's impact on literacy theory, activities, and pedagogy, including reading and writing practices, as well as larger cultural shifts in communication and patterns of thinking.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6429 - Teaching Writing With Computers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Immersion in the theories and practices of writing in electronic spaces including current discourse conventions from speech and print media.

Occasional

College of Arts and Humanities - Department of English

ENC 6484 - Rhetoric of Health and Medicine

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

How health and medical rhetorics function in society; will study the rhetorical dimensions of clinical care, public health, patient advocacy, and personal health management.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6701 - Professional Writing Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Foundational theories and practices in rhetoric and professional writing.

Fall

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6712 - Studies in Literacy and Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Theories of cultural and critical literacy, definitions of literacy, and current political issues in literacy studies.

Odd Fall

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6720 - Research Methods in Rhetoric and Composition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Study and practice in research methods of Rhetoric and Composition Studies, with emphasis on textual and qualitative approaches.

Spring

College of Arts and Humanities - Department of Writing and Rhetoric

ENC 6740 - Topics in Rhetoric and Composition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

In-depth exploration of important historical, theoretical, and/or pedagogical topics in Rhetoric and Composition Studies. May be used in the degree program a maximum of 2 times only when course content is different.

Occasional

College of Arts and Humanities - Department of Writing and Rhetoric

College of Arts and Humanities

ENG 6005 - Dissertation Research Design in Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ENG 6812 or ENC 6720 or DIG 6825 or HIS 6159 or C.I.

Preparation for the initial stages of dissertation development, including planning, research question development, and methodology determination.

Fall

College of Arts and Sciences - Dean's Office

ENG 6074 - Historical Movements in Literary, Cultural, and Textual Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theories of literature, cultural, and textual formation from ancient Greece to the mid 20th century.

Occasional

College of Arts and Humanities - Department of English

ENG 6078 - Contemporary Movements in Literary, Cultural, and Textual Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Theories of literature, cultural, and textual formation since the mid 20th century.

Fall

College of Arts and Humanities - Department of English

ENG 6624 - Social Media Research for Humanities**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Fundamentals of humanist research in social media. Students read canonical and contemporary social media research and learn to collect and analyze social media data.

Occasional

College of Arts and Humanities - Texts and Technology PhD

ENG 6800 - Introduction to Texts and Technology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Basic concepts of graduate study in Texts and Technology.

Fall

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6801 - Texts and Technology in History**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Acceptance into the Texts and Technology program, graduate standing, or C.I.

Explores the history of relations between the Texts and Technology. We examine how various technologies have influenced the nature of texts they produce.

Spring

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6806 - Digital Editing and Databases

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Enrollment in Texts and Technology PhD program or Digital Media master's program.

Applied aspects of textual reproduction and editing, including scanning (OCR) and XML coding, as such processes relate to database content and use.

Occasional

College of Arts and Humanities - Department of English

ENG 6808 - Narrative Information Visualization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Exploration of theory and practice of information visualization, with emphasis on visualization in interactive digital texts. Includes working with large datasets to develop narrative visualizations.

Occasional

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6810 - Theories of Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Acceptance into the Texts and Technology program, graduate standing, or C.I.

Introduces general theoretical concepts as a basis for the advanced study of Texts and Technology.

Spring

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6811 - Cultural Contexts in Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Selected cultural contexts in which texts and technologies converge and where reciprocal mediation, definition, or transformation occurs. May be used in the degree program a maximum of 2 times.

Fall

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6812 - Research Methods for Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Acceptance into the Texts and Technologies program, graduate standing, or C.I.

Prepares students to design, conduct, and critique empirical research in textual technologies, broadly conceived.

Fall

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6813 - Interdisciplinary Teaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theory and practice of designing interdisciplinary courses and curricula for the humanities. Includes strategies, theories, and best practices.

Even Spring

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6814 - Gender in Texts and Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Relationships among text, science, technology and gender.

Occasional

College of Arts and Humanities - Dean's Office - College of Arts and Humanities

ENG 6819 - Critical Making for Humanist Scholarship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Critical making is making as scholarship, grounded in the humanities, interweaving design, function, and theory

through attention to code, software, and hardware.

Occasional

College of Arts and Humanities - Texts and Technology PhD

ENG 6826 - Professionalization in Texts and Technology

0 Credit Hours

Entrepreneurship

ENT 5016 - New Venture Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Applies contemporary methodologies to guide the creation, validation, and ongoing development of new business models for startup businesses and other new ventures.

Fall

College of Business Administration - Department of Management

ENT 5185 - Technological Entrepreneurship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Examines how technology and innovation processes affect social and organizational change, and the distinct challenges associated with launching, managing and growing technology-based business ventures.

Spring

College of Business Administration - Department of Management

ENT 5206 - New Venture Implementation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ENT 5XXX New Venture Design. Explains how to execute a well-researched business model by implementing required and strategic actions necessary to launch a new venture.

Spring

College of Business Administration - Department of Management

ENT 5619 - Creativity and Entrepreneurship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Graduate Standing.

This course presents contemporary methods for characterizing customer problems, designing creative solutions, and assessing value propositions for startup business ventures.

Fall

College of Business Administration - Department of Management

ENT 5946 - Small Business Consulting

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

This is a highly experiential course where students are assigned to teams that complete consulting projects for local small businesses.

Fall

College of Business Administration - Department of Management

ENT 6418 - Small Business Accounting and Finance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Master's of Science in Management Integrated Business track.

Introduces accounting concepts, financial statements, ratio analysis, time value of money, cash flow management, forecasting, funding sources, cost of capital, and capital budgeting.

Spring

College of Business Administration - Department of Management

ENT 6617 - Innovation and Entrepreneurship Strategy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. An in-depth examination of strategies that promote the diffusion of innovations and the success of innovation-driven business and social ventures.

Fall, Summer

College of Business Administration - Department of Management

ENT 6900 - Entrepreneurship Portfolio

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the graduate college.

This course provides students with an opportunity to achieve new venture development milestones, demonstrate specific entrepreneurial competencies associated with those milestones, and connect with community experts tasked with assessing their efforts. It emphasizes entrepreneurship as practice, and rewards students for making tangible progress on connecting with customers, developing solutions, and organizing startup ventures.

Finance

FIN 5917 - Directed Research

College of Business Administration

FIN 5937 - Special Topics

College of Business Administration

FIN 6406 - Strategic Financial Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MBA Professional Core I or C.I.

Emphasis on the theory and analytical techniques associated with the major financial decisions of corporate management, including risk analysis, capital budgeting, short- and long-term financial management.

Fall, Spring

College of Business Administration - Department of Finance

FIN 6465 - Financial Analysis Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Seminar in financial analysis; examining financial statements, annual reports and other sources of information. Not open to students who have completed or are enrolled in GEB 6895.

Occasional

College of Business Administration - Department of Finance

FIN 6515 - Analysis of Investment Opportunities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, FIN 6406 or C.I.

Deals with the theory and tools of analysis required in the management of financial assets.

Fall

College of Business Administration - Department of Finance

FIN 6777 - FinTech Entrepreneurship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the FinTech MS program. Corequisite(s): FIN 6468.

This course will help students identify financial sectors that have been disrupted by FinTech or those that are ripe for disruption.

Odd Fall

College of Business Administration - Department of Finance

FIN 6778 - Foundations of FinTech

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the FinTech MS program.

This course provides an overview of the emerging Fintech discipline and how innovations and new technologies are transforming conventional financial markets and services.

Odd Spring

College of Business Administration - Department of Finance

FIN 6779 - FinTech in Decision Making

3 Credit Hours

HIM 6007 - Survey of Health Information Management

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Health Care Informatics or C.I.

Provide students with an understanding of computer information systems utilized in a health care environment.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6117 - Health Care Informatics Symposium

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.S. in Health Care Informatics.

The focus of this course is on applying informatics solutions to complex situations facing the U.S. health care industry and found in today's health care organizations.

Summer

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6119C - Biostatistics and Decision Analysis

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.S in Health Care Informatics or C.I.

Selected decision structure and solution techniques. Selection, implementation, and results analysis of key statistical methods to support decision making and policy analysis in health care organizations.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6121C - Privacy and Security in Health Care Informatics

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Admission to the Health Care Informatics program or C.I. Focuses on privacy and security issues associated with health care information. Students will evaluate security audits, regulatory policies/laws, and release of information procedures.

Summer

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6122C - System Analysis and Design

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.S. in Health Care Informatics or C.I.

Analyzing workflow in health care organizations to identify data needs and system elements to support work. Modeling system elements with a variety of traditional and object oriented tools.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6123C - Project Management in Health Care Informatics

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.S. in Health Care Informatics or C.I.

This course integrates clinical, financial and administrative data to resolve managerial and patient care problems.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6124C - Health Care Data Architecture and Modeling

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): HIM 5118C or C.I.

The course integrates the key issues and techniques surrounding data architecture, modeling and standards in health care informatics.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6125 - Health Care Informatics Capstone

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): All courses in the M.S. in Health Care Informatics program.

This course serves as a culminating experience for the HCI program. Students will apply knowledge gained in all courses to a health care informatics related area of study.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6217C - Health Care Database Management

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): HIM 5118C.

Design and implementation of relational database structures for health care operations. Use of structured query language and reporting tools to manage data.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6267 - Foundation of Health Services Administration

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Health Care Informatics or C.I.

Provides students with an understanding of the managerial and administrative aspects in a health care environment, as it relates to health care informatics.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6293 - Health Care Coding and Diagnosis

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to Health Care Informatics master's degree or HIA certificate.

Medical Coding and the role it plays in informatics emphasizing document usage and extracting needed data for proper code selection. Data mapping related to ICD-9-CM and ICD-10-CM is explored.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6464C - Epidemiology, Analytics and Quality Management

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.S. in Health Care Informatics or C.I.

This course introduces epidemiological principles and analytics for enhancing utilization management, quality improvement and outcome assessment in the service delivery system.

Summer

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6477 - Medical Terminology for Informatics Professionals

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Health Care Informatics or C.I.

Provides students with medical terminology used or found in the medical environments and discuss the role the language of medicine plays in informatics.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6918 - Directed Research

College of Community Innovation and Education

HIM 6927 - MS Healthcare Informatics Orientation

1 Credit Hours

Class Hours: 30

Lab and Field Work Hours: 0

Contact Hours: 30

Prerequisite(s): Admission to M.S. in Health Care Informatics or C.I.

An orientation course designed to ensure students fully prepare for, identify, and secure an appropriate masters-level healthcare informatics internship.

Odd Fall, Even Fall

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6935 - Seminar on Current Issues in Health Care Informatics and Enterprise Management

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): HIM 5118C; HIM 6119C; HIM 6122C; HIM 6123C.

This course provides an overview of project management and will expose students to the principles of project management and health care information systems.

Summer

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6938 - ST: Informatics for Healthcare Implementation

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Current industry trends in healthcare, technology, and the automation of processes. Introduces concepts associated with algorithms, communications, and the design and development of healthcare information systems.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

HIM 6947 - MS Healthcare Informatics Internship

2 Credit Hours

Class Hours: 30

Lab and Field Work Hours: 240

Contact Hours: 30

Prerequisite(s): HIM 6998, HIM 5118C, HIM 6122C and HIM 6123C.

Experiential learning course where students apply skills and competencies to solve real-world health care informatics projects of substantive value. Students must complete required hours under the supervision of an internship site preceptor.

Advanced study of the biochemical, physiological and anatomical changes associated with diseases/conditions/surgeries that require nutrition support/medical nutrition therapy.

Even Fall

College of Health Professions and Sciences - Department of Health Sciences

HSC 6597 - Human and Applied Metabolism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.

The contribution of carbohydrate, fat and protein to energy metabolism at rest and during physical stress will be examined.

Fall

College of Health Professions and Sciences - Department of Health Sciences

HSC 6607 - Lifestyle Medicine

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences MS or C.I.

Examination and application of evidence-based practices focusing on modifiable behaviors associated with prevention and treatment of common chronic diseases and conditions.

Even Spring

College of Health Professions and Sciences - Department of Health Sciences

HSC 6616 - Clinical Exercise Physiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.

This course is designed to give the student an understanding of the graded exercise test as a functional and diagnostic modality in normal and diseased people.

Spring

College of Health Professions and Sciences - Department of Health Sciences

HSC 6636 - Issues and Trends in the Health Professions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Exploration of current status, issues, problems, and future trends in the practice and education of health professions.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Health Management and Informatics

HSC 6656 - Healthcare Ethics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examine and analyze central concepts and values in healthcare ethics in order to provide a foundation for sound ethical decision-making.

College of Community Innovation and Education - Department of Health Management and Informatics

HSC 6659 - Issues in Geriatric Health Care

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Health Sciences MS or C.I.

Emphasizes an evidence-based, interprofessional approach to examining and working through issues associated with aging and the impact of collaborative, interprofessional care for our aging population.

Analysis of hospitality/tourism industry social media marketing and management strategies.

Spring

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 6566 - Principles of Destination Marketing and Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): HMG 6596.

Examines strategies for creating integrated destination marketing and management systems; concepts and strategies for destination competitiveness and sustainability; trends/challenges influencing destination marketing and management.

Occasional

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6568 - Destination Planning for Events**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

HMG 6563 or C.I.

Principles, issues, and strategies related to destination policy-making, planning, and management to develop, attract, and retain events at destinations.

Every Semester

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6584 - Event Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): HMG 6564 or C.I.

Identify, collect, describe, and analyze data using data analytics techniques to make informed decisions in the specific context of event management.

Every Semester

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6585 - Data Analysis in Hospitality and Tourism Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing in Hospitality Management or C.I. Examination of quantitative methods applied in hospitality and tourism research, including identification of data analysis strategies and interpretation of finds. Emphasis on univariate data analyses.

Fall, Spring

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 6586 - Research Methods in Hospitality and Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in Hospitality Management or C.I.

A survey of primary research methods used by decision makers in the various sectors of the hospitality and tourism industry. Formulation of research problems, statement of hypotheses, variables and level of measurements, research designs, data collection techniques, sampling, data processing, and information analysis.

Spring

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 6596 - Strategic Marketing in Hospitality and Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

An examination of the role of marketing strategy within the overall strategic planning process of hospitality/tourism organizations. Topics such as marketing environments, competition analysis, consumer behavior, product/service mix, differentiation, segmentation, target marketing, positioning, relationship marketing, and strategic alliances are studied and analyzed.

Fall, Spring, Summer

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 6604 - Legal Environment of Events

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): HMG 6582 Event Analytics or C.I.

Survey of the laws and regulations relating to events such as public liability and insurance, compliance, technology and intellectual property, labor and employment.

Every Semester

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6608 - Hospitality/Tourism Law and Ethics Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

An interactive approach to the impact of changing social values, current legislation, and case law on management of hospitality and tourism enterprises. Professional Code of Ethics as applied to the hospitality industry are discussed.

Occasional

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 6710 - International Tourism Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

A review and critical analysis of the issues and techniques of international tourism management with specific attention to the economic, sociocultural, and environmental impacts.

Fall

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6738 - Tourism Industry Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Quantitative impact analysis of tourism as an industry in the regional/national economy along the Tourism Satellite Accounts concept.

Occasional

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6756 - Mega-Events

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): HMG 6797.

The organization and administration of mega-events. The tourism impacts of the events on the destinations that host them.

Occasional

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6757 - Advanced Theme Park and Attraction Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The course examines and reviews the managerial and guest aspects of the theme park and attraction industry, including theming, operation, marketing, human resources, and research.

Fall

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6797 - Event Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Examination of event management, focusing on sports and entertainment. Covers promotion, budgeting, marketing, crowd control, production, legal issues, customer service, ticketing and concessions.

Occasional

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 6810 - Food Supply Chain Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Food supply chain management and theory, examining strategic sourcing, pricing, negotiation, distribution, technology, stakeholder relationships, and quality control related to perishable foodservice products.

Occasional

Rosen College of Hospitality Management - Department of Foodservices and Lodging Management

HMG 6811 - Beverage Supply Chain Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

The examination of the alcoholic beverage supply chain in the USA, including the three-tier system, license and control models, logistics, legal and compliance issues.

Occasional

Rosen College of Hospitality Management - Department of Foodservices and Lodging Management

HMG 6908 - Independent Study

Rosen College of Hospitality Management

HMG 6909 - Research Report

Rosen College of Hospitality Management

HMG 6918 - Directed Research

Rosen College of Hospitality Management

HMG 6938 - ST: Food Supply Chain Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Introduction to food supply chain management and theory, examining strategic sourcing, pricing, negotiation, distribution, technology, stakeholder relationships, and quality control related to perishable foodservice products.

Spring

Rosen College of Hospitality Management - Department of Foodservices and Lodging Management

HMG 6946 - Internship

Rosen College of Hospitality Management

HMG 6958 - Study Abroad

Rosen College of Hospitality Management

HMG 6971 - Treatise (Thesis OF Research Report)

Rosen College of Hospitality Management

HMG 6973 - Thesis-Specialist

Rosen College of Hospitality Management

HMG 7258 - Strategies and Tactics: Lodging

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Hospitality Education track to the PhD in Education.

Extensive review of the theoretical and empirical literature related to current strategies and operations of lodging enterprises throughout the world.

Occasional

Rosen College of Hospitality Management - Department of Foodservices and Lodging Management

HMG 7295 - Theories in Hospitality and Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Doctoral standing. Theory construction in hosp, tourism and service; identification of relevant interdisciplinary paradigms in theory development; evaluation of theory and research models in social science research.

Fall

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 7546 - Strategies and Tactics: Guest Service Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Hospitality Education track to the PhD in Education.

Comprehensive review of the theory, methods, and research findings related to the management of guest service organizations, with special emphasis on hospitality and tourism enterprises.

Occasional

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 7587 - Foundations in Hospitality and Tourism Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Ph.D. Education Hospitality Education track, C.I.

Facilitates the introduction of hospitality and tourism research across a broad expanse of industry sectors including but not limited to attractions, events, leisure, foodservice and lodging.

Odd Fall

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 7588 - Research Seminar in Hospitality and Tourism

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to the Ph.D. Education Hospitality Education track, C.I.

This course includes the presentation of, exposure to and professional critique of current research projects by students.

Even Fall

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 7589 - Advanced Research Methods in Hospitality and Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDF 7403, EDF 7463, C.I.

Facilitates creating, developing, and solving research problems through the application of appropriate research methods to contemporary issues in the hospitality and tourism industry.

Odd Fall

Rosen College of Hospitality Management - Department of Hospitality Services

HMG 7715 - Strategies and Tactics: Travel and Tourism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Hospitality Education track to the PhD in Education.

An in-depth investigation of the various components of travel and tourism focusing on the role of policy in their operation and development.

Occasional

Rosen College of Hospitality Management - Department of Tourism Event and Attractions

HMG 7876 - Strategies and Tactics: Foodservice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Hospitality Education track to the PhD in Education.

Extensive review of the theoretical and empirical literature related to current strategies and operations of food service enterprises throughout the world.

Occasional

Rosen College of Hospitality Management - Department of Foodservices and Lodging Management

HMG 7919 - Research

Rosen College of Hospitality Management

HMG 7939 - Special Topics

Rosen College of Hospitality Management

HMG 7980 - Dissertation

Rosen College of Hospitality Management

Human Nutrition

HUN 5247 - Principles of Human Nutrition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.

Course promotes in-depth understanding of the role of macronutrients in human nutrition and health enabling graduates to integrate knowledge into other aspects of their work.

Occasional

College of Health Professions and Sciences - Department of Health Sciences

HUN 5917 - Directed Research

College of Nursing

HUN 6909 - Research Report

College of Nursing

HUN 6938 - Special Topics

College of Nursing

Humanities**HUM 5396 - Place and Space****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Study of theoretical and applied issues of place and space.

Occasional

College of Arts and Humanities - Department of Philosophy

HUM 5917 - Directed Research

College of Arts and Humanities

HUM 5937 - Special Topics

College of Arts and Humanities

Industrial and Applied Psychology

INP 5917 - Directed Research

College of Sciences

INP 5937 - Special Topics

College of Sciences

INP 6005 - Overview of Research in Industrial and Organizational Psychology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to masters or doctoral program in Industrial/Organizational Psychology, or CI.

Designed to familiarize graduate students with the core research topics of interest to contemporary I/O psychologists.

Odd Fall, Even Fall

College of Sciences - Department of Psychology

INP 6058 - Job Analysis and Performance Appraisal

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Industrial Organizational Psychology M.S. or C.I.

Theory and practice in collection, analysis, and use of job analysis data; survey of theories, research and practice in the areas of industrial/organizational performance appraisal.

Occasional

College of Sciences - Department of Psychology

INP 6072 - Survey Research Methods and Program Evaluation in Indust. and Org. Psychology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PSY 6216C and admission to master's program in Industrial and Organizational Psychology or Ph.D. in Psychology or C.I.

Applied issues in the evaluation of programs/interventions and survey design, sampling, and data analysis in organizations.

Occasional

College of Sciences - Department of Psychology

INP 6080 - Ethical, Legal, and Professional Issues in Industrial and Organizational Psychology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to master's program in Industrial and Organizational Psychology, Psychology Ph.D., or C.I. A review of the applied behavioral problems recurrent in the professional practice of Industrial and Organizational Psychology.

Occasional

College of Sciences - Department of Psychology

INP 6091 - Industrial and Organizational Psychology Consulting Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into the M.S. Industrial/Organizational Psychology program. Develop consulting skills in I/O psychology by applying theories and methods to improve individual, group, and organizational effectiveness.

Fall

College of Sciences - Department of Psychology

INP 6215 - Assessment Centers and Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate admission and C.I.

Survey of assessment center technology and application with emphasis on leadership theory and practice.

Occasional

College of Sciences - Department of Psychology

INP 6317 - Work Motivation and Job Attitudes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Industrial Organizational Psychology M.S. or Ph.D., or Modeling and Simulation M.S. or

Ph.D., or Applied Learning and Instruction M.A., or C.I.

Review of theories, research and application of psychological principles to organizational settings, including human motivation and job attitudes.

Occasional

College of Sciences - Department of Psychology

INP 6318 - Recruitment, Placement and Selection

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PSY 6308C and admission to Industrial and Organizational Psychology M.S., or C.I.

Issues related to recruiting, placing, and selecting employees and an examination of currently used tests in industry.

Occasional

College of Sciences - Department of Psychology

INP 6605 - Training and Team Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Industrial Organizational Psychology M.S., Psychology Ph.D., or C.I.

Survey and theory of training and small groups including team effectiveness and team performance within applied contexts.

Occasional

College of Sciences - Department of Psychology

INP 6909 - Research Report

College of Sciences

INP 6918 - Directed Research

College of Sciences

Prerequisite(s): Admission to the doctoral Industrial and Organizational Psychology program or C.I.

Review of the theoretical and practical issues and the research literature related to retaining, theory and program design/evaluation and performance appraisal/feedback.

Occasional

College of Sciences - Department of Psychology

INP 7310 - Organizational Psychology I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the doctoral Industrial and Organizational Psychology program. Review of the theoretical and practical issues and research literature related to work motivation theory, attitude theory, and decision theory.

Fall

College of Sciences - Department of Psychology

INP 7311 - Organizational Psychology II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the doctoral Industrial and Organizational Psychology program or C.I.

Review of the theoretical and practical issues and research literature related to small group theory and process and organization theory.

Occasional

College of Sciences - Department of Psychology

INP 7919 - Directed Doctoral Study in Industrial and Organization Psychology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the doctoral Industrial and Organizational Psychology program.

Directed study in areas of organization development theory, career development theory consumer behavior, individual assessment, or other relevant topics in Industrial and Organizational psychology. May be repeated for credit.

Occasional

College of Sciences - Department of Psychology

Industrial Engineering**EIN 5108 - The Environment of Technical Organizations****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or CI; EGS 4624 recommended.

Presentation and investigation into the principles required to transform technologists into managers focusing on engineers, scientists, and other professionals providing services in technically-oriented organizations.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5115 - Engineering MIS Control Systems in Healthcare**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Consideration is given to the organizational, managerial, and economic aspects of MIS design, implementation and use for planning and control functions in large-scale Health Systems.

Summer

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5117 - Management Information Systems I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

The design and implementation of computer-based Management Information Systems. Consideration is given to the organizational, managerial, and economic aspects of MIS.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5140 - Project Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Role of engineer in project management with emphasis on project life cycle, quantitative and qualitative methods of cost, schedule, and performance control.

Fall, Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5248 - Ergonomics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EIN 4360 or C.I.

Applications of anthropometry, functional anatomy, mechanics, and physiology of musculoskeletal system concepts in the design of industrial tools, equipment, and workstations.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5251 - Usability Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or equivalent.

Usability paradigms/principles; cognitive walk-throughs; heuristic, review-based, model-based, empirical and storyboard evaluation; techniques; query techniques; laboratory techniques; and field study approaches.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5255C - Interactive Simulation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Graduate standing or C.I.

Introduction to significant topics relative to the development and use of simulators for knowledge transfer in the technical environment.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5346 - Engineering Logistics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ESI 5306 or ESI 4312. Study of the logistics life cycle involving planning, analysis and design, testing, production, distribution, and support.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5356 - Cost Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Cost estimation and control of engineering systems throughout the product life cycle.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 5917 - Directed Research

College of Engineering and Computer Science

EIN 6182 - Engineering Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EIN 5140, EIN 5108, EIN 6370.

Capstone investigation and analysis of topics for improving engineering enterprises in national and international competitive environments. Quantitative engineering tools/methods will be used.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6215 - System Safety Engineering and Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Occupational injury and accident statistic. Accident investigation and prevention methods. Hazard analysis.

Occupational safety and health standards and regulations. Product safety and liability.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6258 - Human Computer Interaction**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Computer task analysis, human-computer design guidelines and history, usability testing, next generation user interfaces, human-virtual environment interaction.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6271 - Human Reliability**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 5219.

Methods for analysis and quantification of human performance; human error probability; applications to design and analysis of new and redesign of existing aviation, industrial, management, and power generation systems.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6326 - Technology Strategy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status.

This course is designed to expose engineering management students to cutting edge tools and concepts for managing technology and product strategy. May be repeated for credit.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6336 - Production and Inventory Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EIN 4333C or equivalent.

Review of models and techniques used in forecasting, production control and inventory control. Includes aggregate planning, production scheduling, inventory management, models, etc.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6339 - Operations Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EIN 6357, ESI 5306, or C.I.

Methods and models for design, management, and control of operational processes in engineering and technical organizations. Includes considerations of quality, productivity, performance, benchmarking, constraints, and strategy.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6357 - Advanced Engineering Economic Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3613; STA 3032 or equivalent.

Topics include measuring economic worth, economic optimization under constraints. Analysis of economic risk and uncertainty, foundations of utility functions.

Fall, Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6358 - Engineering Economic Analysis in Health Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Prerequisite(s): Admission to the Healthcare Systems Engineering track of the Industrial Engineering MS program.

Topics include Grossman's model on health economics, economics, economic optimization, economic risk, and uncertainty, utility functions, and the allocation of resources within health systems.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6370 - Innovation in Engineering Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explores techniques for innovation and presents methods for engineers to foster innovation when designing new products or systems.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6528 - Simulation Based Life Cycle Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EIN 5255C or DIG 5875C or EIN 5117.

This course examines the phenomenon of simulation based life cycle engineering. Case studies illustrate infrastructure and organization change necessary to gain operational and strategic advantage.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6893 - Healthcare Systems Engineering Capstone

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Previous 9 courses of the HSE MS.

Capstone course to depict role of a healthcare systems engineer with emphasis on project life cycle, quantitative and qualitative methods of cost, schedule, and performance.

Fall, Summer

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6909 - Research Report

College of Engineering and Computer Science

EIN 6918 - Directed Research

College of Engineering and Computer Science

EIN 6936 - Seminar in Advanced Industrial Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Topical seminar. Potential topic areas include quality function deployment, axiomatic design, design quality, benchmarking, re-engineering processes.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 6938 - Special Topics

College of Engineering and Computer Science

EIN 6950 - Industrial and Systems Engineering Capstone

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ESI 6551 and (ESI 5219 or ESI 6247) and department consent. Project-based course where students work on theoretical and applied research issues related to industrial and systems engineering.

Fall, Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

EIN 7919 - Research

College of Engineering and Computer Science

Industrial/Systems Engineering

ESI 5219 - Engineering Statistics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Discrete and continuous probability distributions, hypothesis testing, regression, nonparametric stats and ANOVA.
Fall, Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5227 - Total Quality Improvement

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or equivalent.

Quality improvement (QI) tools and techniques, advanced QI techniques, quality improvement systems, total quality management concepts and implementation, planning and management tools, and case studies.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5236 - Reliability Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 4234 or equivalent, or C.I.

Reliability theory and modeling approaches. Topics include: failure data analysis, maintainability, reliability standards (DOD), software reliability, reliability in design, and electronic systems reliability.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5250 - Engineering Statistics in Health Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Healthcare Systems Engineering track of the Industrial Engineering MS Program.

Data collection, descriptive statistics, discrete and continuous probability distributions, sampling techniques, statistical estimation, hypothesis testing, regression, nonparametric stats and ANOVA applied to Health Systems.

Fall, Summer

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5306 - Operations Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032.

Methods of operations research, including formulation for models and derivation of solutions; linear programming, network models queueing theory, simulation, and nonlinear optimization techniques.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5359 - Risk Assessment and Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 5219 or STA 3032.

Problems and complexities involved in risk assessment and management. Selected methodologies are illustrated through realistic applications in engineering and the sciences.

Occasional

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5526C - Discrete Event Simulation in Health Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Prerequisite(s): ESI 5219 (or equivalent statistics course)

Topics include operational modeling of patient flow, provider assignment, facility and asset utilization, care protocol planning, and optimization through Health Technology Assessment in Health Systems.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5531 - Discrete Systems Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032.

Methods for performing discrete systems simulation, including network modeling, will be treated.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 5917 - Directed Research

College of Engineering and Computer Science

ESI 5937 - Special Topics

College of Engineering and Computer Science

ESI 6217 - Statistical Aspects of Digital Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 5219 or C.I.

Statistical issues in digital simulation including input data analysis, pseudorandom number generation, experimental design, and simulation output analysis.

Odd Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6224 - Quality Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or equivalent or C.I.

Philosophy and concepts of quality management, organization for quality, quality cost, quality audits and corrective actions, tools and techniques for improvement.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6225 - Quality Design and Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or equivalent.

Concepts and methods for quality design and control, including statistical process control (SPC), control charts, process capability, product and process design and improvement, Taguchi methods, case studies. May be repeated for credit.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6247 - Experimental Design and Taguchi Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or ESI 4234.

Introduction to Taguchi Concepts and Methodologies, use of design of experiments for quality design and improvement.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6251C - Engineering Quality in Health Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Risk Assessment and Management in Health Systems and Advanced Engineering Economics in Health Systems.

Topics include quality management in health systems, engineering roles for the organization, quality costing, quality auditing, and corrective action activities; including tools and techniques for improvement.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6252C - Managing Engineering Risk in Health Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Healthcare Systems Engineering track of the MS in Industrial Engineering program in the UCF College of Engineering and Computer Science.

Topics include risk assessment, management, spectrum of risks for near miss and adverse event management. Selected methodologies are illustrated through realistic applications in Health systems.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6261 - Service System Quality Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 3032 or equivalent or C.I.

Philosophy and concepts of managing, organizing, planning, controlling and motivating for quality, quality cost, tools, and techniques for improvement, special topics in travel and analytics.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6336 - Queueing Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 5219.

Analysis of queueing systems and waiting line problems using analytical and Monte Carlo methods. Laboratory assignments.

Odd Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6358 - Decision Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 4312 or ESI 5306.

Classical Bayesian analysis; utility and its measurement; multiattribute utility methods; influence diagrams; Analytic Hierarchy Process; behavioral aspects; simulation.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6418 - Linear Programming and Extensions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 4312 or **ESI 5306** .

Simplex and Revised Simplex Method; interior-point methods; duality; large-scale optimization; decomposition algorithms; upper bounds; linearization; parametric LP; goal programming.

Even Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6511 - Systems Integration and Testing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 6552.

This course focuses on the application of systems engineering principles to the integration and test and evaluation of system elements and, ultimately, of the total system.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6532 - Object-Oriented Simulation**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Object-oriented modeling and development techniques for building large process-based discrete event simulation models. Concurrency in discrete event simulation. Object-oriented simulation environment.

Even Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6534 - Agent-Based Modeling of Social Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing.

The goal of this course is to teach students the fundamentals methods for building Agent-Based Models of social, economic, and engineered systems

Even Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6535 - Advanced Agent-Based Modeling**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

This course discusses advanced methods for building agent-based models of social, economic, biological and engineered systems. Methods include machine learning, data science, network science, and inverse generative processes.

Even Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6550 - Systems Thinking in Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

ESI 6551 or C.I.

This class shows how it is possible to use system thinking in order to properly define, conceive, develop, and articulate complex systems and explore 2nd and 3rd order effects of their behavior.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6551 - Systems Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing with an earned graduate degree in a technical discipline (waivable for significant industry experience).

Introduction to heuristics approach to the process of systems architecting in business, economics, social, urban, military and government domains emphasizing the conceptual representation and acceptance phases.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6552 - Systems Architecture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

ESI 6551.

This course discusses the processes and fundamentals of system architecting to include software such as SysML, modeling system, requirements, structure, and behavior.

Spring

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6609 - Industrial Engineering Analytics for Healthcare

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ESI 5219 or C.I. Course includes an overview of major data analytics algorithms and methods introduced through examples from Healthcare.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6891 - IEMS Research Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ESI 5219.

Assist students in producing publishable research and to introduce new tools which may be needed for collection and analysis of research data.

Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6909 - Research Report

College of Engineering and Computer Science

ESI 6918 - Directed Study

College of Engineering and Computer Science

ESI 6938 - Seminar in Advanced Industrial Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

This course will teach advanced methods and applications in the field of agent-based modeling, simulation and analysis.

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 6938 - Special Topics

College of Engineering and Computer Science

ESI 7480 - Optimization and Data Mining for Industrial Engineers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ESI 5306 or ESI 6418. The course introduces basic optimization theory and related data analysis algorithms for industrial engineering and data mining applications.

Odd Fall

College of Engineering and Computer Science - Department of Industrial Engineering and Management Systems

ESI 7919 - Research

College of Engineering and Computer Science

Information Systems Management

ISM 5917 - Directed Research

College of Business Administration

ISM 5937 - Special Topics

College of Business Administration

ISM 6327 - Foundations of Cybersecurity and Privacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the graduate college.

This course will introduce foundational terminology related to information technology (IT), information systems (IS), and information security (InfoSec). Students will become familiar with IT risk and security management, data privacy, and technologies for assessing network security.

Occasional

College of Business Administration - Department of Management

ISM 6328 - Cyber Risk Assessment

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): ISM 6327 or equivalent as determined by instructor.

Identification of risks associated with the functioning of modern, technology-enabled organizations and systems, technical and nontechnical. Alignment of cyber risk management frameworks with business goals.

Odd Spring, Even Spring

College of Business Administration - Department of Management

ISM 6375 - Cyber Management and Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): ISM 6327 or equivalent as determined by instructor; and ISM 6328 Cyber Risk Assessment. Development, implementation, maintenance, and leading of modern organizational cyber strategies, structures, and programs in alignment with organizational goals; effective responses to adverse cyber events.

Odd Fall, Even Fall

College of Business Administration - Department of Management

ISM 6918 - Directed Research

College of Business Administration

ISM 6938 - Special Topics

College of Business Administration

ISM 6938 - ST: Cyber Management and Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): ISM 6327 or equivalent as determined by instructor and ISM 6328 (ISM 6938). Development, implementation, maintenance, and leading of modern organizational cyber strategies, structures, and programs in alignment with organizational goals; effective responses to adverse cyber events.

N Fall

College of Business Administration - Department of Management

ISM 6938 - ST: Cyber Risk Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): ISM 6327 or equivalent as determined by instructor. Identification of risks associated with the functioning of modern, technology-enabled organizations and systems, technical and nontechnical. Alignment of cyber risk management frameworks with business goals.

N Spring

Interdisciplinary Computing

IDC 5602 - Cybersecurity: A Multidisciplinary Approach

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Interdisciplinary MandS fundamentals as applied to cybersecurity including operating system installation and administration for hardware, network architectures, configurations, behavioral aspects, organizational continuity planning, security management.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDC 6600 - Emerging Cyber Issues

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Interdisciplinary discussion of emerging issues with expert speakers from industry. Preparation of topic and required resources to complete a multi-disciplinary Modeling and Simulation capstone project.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDC 6601 - Behavioral Aspects of Cybersecurity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 5602 or C.I.

Interdisciplinary human, social, and behavioral issues related to cybersecurity. Management techniques, motives for cyber crimes, risk and threat analysis, ethics, and legal issues.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDC 6602 - Usable Cybersecurity and Privacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Introduces usability problems in security and privacy, and surveys state-of-the-art techniques and evaluation methodologies to design usable security and privacy systems.

Odd Spring, Even Spring

College of Graduate Studies - School of Modeling, Simulation, and Training

IDC 6700 - Interdisciplinary Approach to Data Visualization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

ESI 5219, STA 5206, or DIG 5876 , or C.I. A hands-on, interdisciplinary perspective on basic principles and fundamentals of visualizing statistical information. Topics include: effective visualizations, perception, representation, and general principles.

Spring

College of Graduate Studies - Interdisciplinary Grad

Interdisciplinary Sciences

IDS 6938 - Stereoscopy for Art and Science Using 3D Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Hands-on use of large 3D applications, such as MAYA and NUKE, to explore how stereoscopic 3D (S3D) can further enhance engineering-related problems and scientific query. Additionally, the emerging field of stereoscopic art is addressed.

Fall

College of Graduate Studies - School of Modeling, Simulation, and Training

ISC 5404 - Fundamentals of Discipline Based Education Research in STEM Disciplines

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing, or C.I.

Fundamental topics and methodologies in the field of discipline based education research, focusing specifically

on STEM disciplines.

Odd Fall, Even Fall

College of Sciences - Department of Physics

ISC 6146 - Environmental Education for Educators

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Graduate standing and a valid Florida Teaching Certificate or C.I.

Emphasizes the importance of environmental education in the school curriculum. Includes facilitator training in national environmental education programs.

Summer

College of Community Innovation and Education - School of Teacher Education

ISC 6416 - History of Physical Science and Cultural Connections

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Graduate standing, C.I.

This course is designed for graduate students in science who wish to know something about the "who, how, why, when and where " of physics.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

Interdisciplinary Studies

IDS 5127 - Foundation of Bio-Imaging Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Fundamental theory, design, and practice of modern bio-imaging techniques used for basic biomedical research applications.

College of Medicine - Department of Molecular and Microbiology

IDS 5142 - Modeling and Simulation for Instructional Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Graduate standing or C.I. Interdisciplinary aspects of MandS applications for instructional design. Emphasis on domains such as aviation, space, military, healthcare, education, hospitality, entertainment, and cybersecurity.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDS 5741 - Modeling Neuronal Systems

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Brain-inspired artificial intelligence. Study in cognitive computational neuroscience, deep learning, and how the fields are ripe for convergence.

Occasional

College of Graduate Studies - School of Modeling, Simulation, and Training

IDS 6126 - Interdisciplinarity

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course examines the history and challenges of interdisciplinary teaching and scholarship. We start by posing the question, "What is a discipline?" Then we will explore various interdisciplinary approaches and scholarship. Our final goal is for each student to present an interdisciplinary research proposal that will guide their work on their Interdisciplinary Studies MA or MS thesis.

Fall, Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6145 - Simulation Techniques

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): DIG 5876 or ESI 5219 or STA 5205 or C.I.

Foundations, examples, hands-on tools to implement solutions to various problems using three different categories of simulation: discrete event simulation, continuous simulation, and agent-based simulation.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6146 - Modeling and Simulation Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An overview of issues, techniques and tools that impact the design, development, verification, and validation of simulation systems.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDS 6147 - Perspectives on Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Perspectives on the theory and practice of modeling and simulation with emphasis on specific topics of current interest.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6148 - Human Systems Integration for Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Covers general process of the human systems integration approach for modeling and simulation systems. Addresses standards, analysis tools and techniques for developing systems-level solutions.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDS 6149 - Modeling and Simulation for Test and Evaluation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and C.I.

Modeling and simulation for test planning, execution, and evaluation will be described, characterized, and illustrated with real-world examples and case studies.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6209 - Introduction to Electrochemical Energy Conversion and Storage

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PSM or MS in Nanotechnology or C.I.

Topics in nanotechnology, materials science and electrochemistry concerning renewable energy generation and storage. Electrochemical systems and their applications in renewable energy generation and storage.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6250 - Introduction to Nanoscience and Nanotechnology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology or C.I. A general overview of nanomaterials and nanodevices, including their synthesis, new properties and applications.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6251 - Computation, Simulation and Modeling in Nanotechnology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology and background in chemistry and computer science, or C.I. Modeling methods and computational approaches applicable to nanotechnology problems.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6252 - Biomedical Nanotechnology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology and IDS 6250, UG General and Organic Chemistry, or C.I. Synthesis and properties of nanomaterials related to biomedical applications, nanotechnology for in vitro and in

vivo diagnostics, and therapeutics.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6253 - Bioanalytical Technology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology and IDS 6250, or C.I. Analytical technologies and products for biomolecular detection and analysis, nanotechnology-based medical diagnostics.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6254 - Nanofabrication and Characterization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology and IDS 6250, or C.I. Techniques for fabrication and characterization of nanoscale materials, nanoelectronics and devices.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6255 - Nanotechnology in Energy and Sustainability

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Professional Science Master's in Nanotechnology or C.I. Energy generation and storage, sustainability of materials and device fabrication and deployment, application of nanotechnology in improving the device efficiency in energy generation and storage.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6256 - Principles of Nanostructure Quantum Well, Wires, and Dots

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the PSM or MS in Nanotechnology and Intro Nanosci Nanotech, or C.I. Introduction to low dimensional semiconductor devices based on quantum wells, dots and wires; approximate and numerical device modeling.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6257 - Principles and Techniques of Nanobiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Nanotechnology PSM or MS program, or C.I. This course aims to integrate multi-disciplinary approaches covering physics, biology, and nanoscience to understand how living system works at the nanoscale.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6258 - Advanced Materials and Nanotechnology for Rechargeable Batteries

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PSM in Nanotechnology and IDS 6250 , or C.I.

Build a bridge between nanomaterials and electrochemical energy storage performance and demonstrate renewable energy storage on the nanoscale.

Odd Spring, Even Spring

College of Graduate Studies - NanoScience Technology Center

IDS 6259 - Advanced Energy-Efficient Nanoelectronic Devices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PSM or MS in Nanotechnology or C.I.

Discusses low power nanoelectronic devices that can meet the need of future electronics by using novel physical mechanisms of current conduction.

College of Graduate Studies - Interdisciplinary Grad

IDS 6260 - Electrical and Optical Properties of Nanoscale Materials and Devices

3 Credit Hours

Class Hours: 2.5

Lab and Field Work Hours: 0

Contact Hours: 2.5

Prerequisite(s): IDS 6250 or C.I.

Multiple topics on electrical and optical properties of nanoscale materials and devices, including size-dependent change in material properties, structural understanding by atomic-to-nanoscale characterizations, fabrication of nanoscale devices and their electrical properties, luminescent properties and applications.

Odd Spring, Even Spring

College of Graduate Studies - NanoScience Technology Center

IDS 6261 - Nanotechnology for Sustainable Agriculture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PSM or MS in Nanotechnology or C.I.

Prepares a new generation of STEM students who are equipped with necessary knowledge to adapt sustainable agricultural practices.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6262 - Research Design for Modeling and Simulation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 6XXX Simulation Techniques. Prerequisite(s) or Corequisite(s): IDS 6148

Theoretical and practical aspects of interdisciplinary research methodologies as they relate to human-centered Modeling and Simulation.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6264 - Biointerfaces Enabled by Micro/NanoFabrication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PSM or MS in Nanotechnology or C.I.

Introduces students to the interfaces and devices in the biotechnology and biomedical arenas that are enabled by Micro/NanoFabrication.

Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6265 - Luminescent Materials and Devices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 6250 or upon instructor approval.

Fundamental and applied topics of luminescent materials and devices: Luminescent Processes; Phosphors; Scintillators; Organic Emitters; Compound Semiconductors; Quantum dots; Photoluminescence; Cathodoluminescence; Electroluminescence; Various Applications.

Fall

College of Graduate Studies - Department of Interdisciplinary Studies

IDS 6308 - Ways of Knowing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Theoretical models of knowledge as exemplified by various disciplines and interdisciplinary activity. Focus on epistemological issues raised in past and present works.

Even Spring

College of Graduate Studies - Interdisciplinary Grad

IDS 6351 - Critical Thinking and Writing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 6308 and IDS 6669.

Focus on refining critical understanding of interdisciplinary research and organization and presentation of interdisciplinary ideas, building on first two core courses.

Fall

College of Graduate Studies - Interdisciplinary Grad

IDS 6503 - International Trends in Instructional Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EME 6613.

International and multicultural issues and how they affect the global impact of technology in education, training, and quality management.

Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

IDS 6504 - Adult Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

An examination of theory and research on adult learning with emphasis on practical applications, instruction, and technology use in educational and workplace settings.

Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

IDS 6513 - Preparing Tomorrow's Faculty

0 Credit Hours

Class Hours: 24 hours (twelve 2-hour meetings)

Lab and Field Work Hours: 0

Contact Hours: 24 hours (twelve 2-hour meetings)

Prerequisite(s): Active graduate student standing

Preparing Future Faculty introduces the foundations of teaching in higher education, student learning, course design, teaching pedagogies, assessment and feedback, classroom management, and career development.

Every Semester

College of Graduate Studies - Interdisciplinary Studies

IDS 6515 - Classroom Management for Mathematics and Science Teachers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Teacher candidates will engage in critical examination of current school and classroom organization and management models, methods, and strategies in middle school. Causes and solutions to disruptive and noncompliant behaviors will be discussed.

Even Fall

College of Community Innovation and Education - School of Teacher Education

IDS 6516 - Leadership Development for Mathematics and Science Teachers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Development of mathematics and science teachers' abilities to assume teacher leadership roles in their schools.

Even Spring

College of Community Innovation and Education - School of Teacher Education

IDS 6606 - Approaches to Network Analysis and Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

This course is co-organized between social and computer scientists. It covers basic network concepts, best practices in collecting and analyzing network data and interdisciplinary/multidisciplinary applications.

Odd Fall, Even Fall

College of Sciences - School of Politics, Security, and International Affairs

IDS 6657 - Professional Collaboration in Language and Literacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Interdisciplinary approach to exploring issues in language and literacy for struggling children and adolescents and development of collaboration competencies for professionals from different disciplines.

Odd Summer, Even Summer

College of Health Professions and Sciences - Department of Communication Sciences and Disorders

IDS 6669 - Interdisciplinary Approaches to Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 6308 or C.I.

Explores methods/assumptions/challenges experienced in interdisciplinary research; includes practice integrating discipline-based research methods with reflexive/dialogic methods; helps prepare students for capstone project or thesis.

Odd Spring, Even Spring

College of Graduate Studies - Interdisciplinary Studies

IDS 6694 - Experimental Design and Analysis in Biomedical Sciences

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Graduate standing in biomedical sciences or C.I.

Problem based learning graduate course focused on how to effectively design experiments and analyze data for hypothesis-driven research in biomedical sciences.

Spring

College of Medicine - Department of Molecular and Microbiology

IDS 6740 - Nonlinear Dynamics in the Cognitive and Behavioral Sciences**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Theoretical and practical aspects of research applying nonlinear dynamical systems methodologies as they relate to human-centered Modeling and Simulation.

Odd Spring, Even Spring

College of Graduate Studies - School of Modeling, Simulation, and Training

IDS 6910 - Research in Mathematics and Science Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Support provided for graduate students in mathematics and science education as they plan and/or implement research projects.

Even Fall

College of Community Innovation and Education - School of Teacher Education

IDS 6916 - Simulation Research Methods and Practicum**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): DIG 5875C and DIG 5876 or their equivalents.

Interdisciplinary teams of students conduct fundamental and applied research on contemporary issues in modeling, simulation, and training.

Occasional

College of Graduate Studies - Interdisciplinary Grad

IDS 6933 - Seminar in Teaching Mathematics and Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and valid Florida Teaching Certificate or C.I.

This course is designed so that graduate students may study specific areas related to curriculum, instruction, and assessment in mathematics and science education. May be repeated for credit.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

IDS 6937 - Teaching Mathematics and Science Using Reform-Based Practices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and valid Florida Teaching Certificate or C.I.

Focuses on the work of Dewey and Piaget as it applies to mathematics and science teaching. Emphasizes integrating math and science teaching.

Fall

College of Community Innovation and Education - School of Teacher Education

IDS 6938 - Hardware Prototyping for Modeling and Simulation

3 Credit Hours

Contact Hours: 3

Prerequisite(s): IDS 6145 or basic programming experience.

Introduction to 3D design and printing, microcontroller programming, and circuit board construction. Additionally, IoT and MQTT protocols to manage data, and IP protection topics.

College of Graduate Studies - Department of Interdisciplinary Studies

IDS 6938 - ST: Interdisciplinary Approaches to Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): IDS 6308 or C.I.

Explores methods/assumptions/challenges experienced in interdisciplinary research. Includes practice integrating discipline-based research methods with reflexive/dialogic methods; helps prepare students for capstone project or thesis.

Spring

College of Graduate Studies - Interdisciplinary Studies

IDS 6938 - ST: Nonlinear Dynamics in the Cognitive and Behavioral Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Theoretical and practical aspects of research applying nonlinear dynamical systems methodologies as they relate to human-centered Modeling and Simulation.

Spring

College of Graduate Studies - School of Modeling, Simulation, and Training

IDS 6938 - ST: Usable Security & Privacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Introduces usability problems in security and privacy methods, tools, and software and overviews prominent examples of both failures and successes in usable security and privacy.

Spring

College of Graduate Studies - School of Modeling, Simulation, and Training

IDS 6939 - Reforming Curriculum in Mathematics and Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and valid Florida Teaching Certificate or C.I. Emphasizes the reform movement including technology, history of curriculum, curriculum theory, and standards documents.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

IDS 6950 - Modeling and Simulation Capstone Report Planning

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Graduate standing. Identify topic and required resources to complete multi-disciplinary Modeling and Simulation capstone project. Develop annotated topical outline for Modeling and Simulation capstone report.

Summer

College of Graduate Studies - Interdisciplinary Grad

IDS 6953 - Urban and Regional Planning Capstone I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of all required Urban and Regional Planning program core courses and concentration electives or consent of Program Director. This Capstone I course synthesizes previous planning coursework through the development of a service learning project proposal.

Even Fall

College of Community Innovation and Education - School of Public Administration

IDS 6954 - Urban and Regional Planning Capstone II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of IDS 6953 - Urban and Regional Planning Capstone I. This Capstone II course implements the service learning project proposal where students collect and analyze data and make planning recommendations.

Odd Spring

College of Community Innovation and Education - School of Public Administration

IDS 7500 - Seminar in Educational Research

1-3 Credit Hours

Class Hours: 1-3

Lab and Field Work Hours: 0

Contact Hours: 1-3

Prerequisite(s): Admission into doctoral program in Education or C.I.

An examination of education related research initiatives. May be repeated for credit.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

IDS 7501 - Issues and Research in Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD in Education or C.I.

An examination of major issues impacting education and related practical and methodological issues in research.
Odd Fall

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

IDS 7502 - Case Studies in Research Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the PhD in Education.

A critical analysis of educational research design.

Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

IDS 7657 - Professional Collaboration Around Language Issues

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Education Ph.D. program or C.I.

Interdisciplinary approach to exploring issues in language and literacy for struggling children and adolescents and development of collaboration competencies in professionals from different disciplines.

Odd Fall

College of Community Innovation and Education - Dean's Office

IDS 7690 - Frontiers in Biomedical Sciences

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Biomedical Sciences Ph.D. program.

Cross-disciplinary biomolecular research seminar, collaboration between chemistry, biology, and molecular biology and microbiology. May be used in the degree program a maximum of 6 times.

Fall, Spring

College of Medicine - Department of Molecular and Microbiology

IDS 7692L - Experiments in Biomedical Sciences

1-3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1-3

Contact Hours: 1-3

Prerequisite(s): Admission to Biomedical Sciences Ph.D. program.

Laboratory rotations in one to three research laboratories throughout the first year of the Biomedical Science doctoral program. Graded S/U. May be used in the degree program a maximum of 4 times.

Fall, Spring

College of Medicine - Department of Molecular and Microbiology

IDS 7938 - Research Cluster Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the PhD program in Education or C.I.

An examination of research issues focusing on interdisciplinary inquiry in education. May be used in the degree program a maximum of 2 times.

Spring, Summer

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

IDS 7939 - Special Topics

College of Community Innovation and Education

International Relations

INR 5917 - Directed Research

College of Sciences

INR 5937 - Special Topics

College of Sciences

INR 6007 - Seminar in International Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Introduces the student to the advances in international relations theory and research through a broad sampling of approaches and methods.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6039 - International Political Economy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or post bac status.

A survey of major themes, concepts, theories, and methods of international political economy, which also entails policy discussion and applications.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6062 - Peace Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to degree-seeking program or C.I.

Examines how humans manage conflict, fostering justice and creative development. Surveys both international and domestic conflicts, outlining theories of peace and utilizing various case studies.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6065 - Seminar on War

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to degree-seeking program or C.I.

Examination of theories and empirical evidence locating the cause of war at the systemic, state, and individual levels of analysis.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6067 - Human Rights and Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to degree-seeking graduate program or C.I. Analyze international human rights and human security, including issues of human development, gender and environmental security.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6068 - Politics of Civil Wars

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to degree-seeking program or C.I. Exploration of the causes, the dynamics of violence, the international aspects, and the resolution of civil wars.

College of Sciences -School of Politics, Security and International Affairs

INR 6108 - Seminar in American Foreign Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Domestic and international factors influencing the development of selected foreign policy issues.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6136 - Seminar in American Security Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate degree seeking program or C.I.

Examination of domestic and international factors influencing the development of selected American security policy issues.

College of Sciences -School of Politics, Security and International Affairs

INR 6137 - Terrorism and Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Examines terrorism, including its strategic logics, contemporary methodologies, political roots, and the problems of counter-terrorism.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6228 - International Politics of the Caspian Sea Region

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Degree-seeking graduate standing or C.I.

A comprehensive analysis of the political issues of the Caspian region.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6254 - International Relations of Africa

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Investigates international relations in the African context, with an explicit focus on implications for international security.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6275 - International Politics of the Middle East

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Analysis of the international relations of the Middle East both among Middle Eastern states, as well as relations with other states, especially the great powers.

Even Fall

College of Sciences -School of Politics, Security and International Affairs

INR 6339 - Strategic Warning Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Explores the question of strategic warning within the context of national security with focus upon principles of analysis using examples.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6346 - Politics of International Terrorism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to degree-seeking program or C.I.

Analysis of causes of and political responses to international terrorism. Emphasis on political science approaches to analysis of international terrorism.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6352 - Global Environmental Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Political Science MA or C.I.

Unique environmental struggles and issues on the international and global levels.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6356 - Environmental Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to degree-seeking program or C.I.

Examination of the relationship between environmental degradation and both national and international security, introducing students to the technical and political debates on global environmental change.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6365 - Seminar on Intelligence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to degree-seeking program or C.I.

Examines the organization and functions of the U.S. intelligence community, its interaction with national security policymakers, and the challenges in defining its future role.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6366 - The Intelligence Community

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to a graduate program, or C.I. The intelligence community structure in its relationship to foreign policy decision making, consideration of control and reliability questions, and issues of cooperation and coordination.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6507 - International Organization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. A survey of the theories, structures, issues, and agents of international organization, focusing on the effects of regional and global governance on state behavior.

Occasional

College of Sciences -School of Politics, Security and International Affairs

INR 6726 - Political Behavior in International Conflict

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Analysis of the ways in which cognitive and emotional theories of human behavior have been used to explain conflict between nation-state and other non-state actors.

Occasional

College of Sciences - School of Politics, Security and International Affairs

INR 6909 - Research Report

College of Sciences

INR 6918 - Directed Research

College of Sciences

INR 6938 - Special Topics

College of Sciences

INR 7139 - Issues in Domestic Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Examination of national issues such as domestic terrorism, with a particular emphasis on challenges arising at the state level.

Even Fall

College of Sciences -School of Politics, Security and International Affairs

INR 7332 - Scientific Study of Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Principles of research design and evaluation of studies on domestic and international security; preparation of an empirical research paper.

Fall

College of Sciences -School of Politics, Security and International Affairs

INR 7337 - Issues in International Security

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Overview of international issues such as terrorism, genocide, nuclear proliferation, war, the spread of infectious diseases, fragile and failing states, transnational organized crime and gender.

Even Spring

College of Sciences -School of Politics, Security and International Affairs

INR 7687 - Theoretical Approaches to Security Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Survey of realist, liberal, constructivist, critical and other theories of international security.

Even Fall

College of Sciences -School of Politics, Security and International Affairs

Journalism

JOU 5917 - Directed Research

JOU 5937 - Special Topics

Juvenile Justice

CJJ 6020 - The Juvenile Justice System

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

This course will focus on the development and philosophy of the Juvenile Justice System; the measurement of delinquency, theories and correlates of delinquency and prevention.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CJJ 6124 - Seminar in Prosecuting Juvenile Offenders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admitted to Criminal Justice Ph.D. Program or Public Affairs (Criminal Justice track) Ph.D. program or C.I. This course will provide students with an advanced understanding of the theory and research surrounding the major decision-making stages in the juvenile court process.

Summer

College of Community Innovation and Education - Department of Criminal Justice

CJJ 6126 - Seminar in Juvenile Corrections

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admitted to Criminal Justice Ph.D. or Public Affairs (Criminal Justice track) Ph.D. program or C.I. This course will focus on community and institutional correctional settings in juvenile justice, evidence-based screening and assessment techniques, and juvenile justice interventions and their effectiveness.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CJJ 6546 - Seminar in Policing and Prevention in the Juvenile Justice System**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admitted to Criminal Justice Ph.D. program or Public Affairs Ph.D. Criminal Justice track or C.I. This course will provide students with an advanced understanding of the initial stages of the juvenile system and the strategies used to intervene.

Spring

College of Community Innovation and Education - Department of Criminal Justice

Language Arts and English Education**LAE 5295 - Writing Workshop****1-3 Credit Hours**

Class Hours: 1-3

Lab and Field Work Hours: 0

Contact Hours: 1-3

Prerequisite(s): C.I.

Students will engage in exploration and practice of effective writing strategies. (May be repeated up to 3 semester hours.) May be repeated for credit.

Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5319 - Methods of Elementary School Language Arts**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Principles, procedures, organization and current practices in reading, writing, listening, and talking.

Fall, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5337 - Literacy Strategies for Middle and Secondary Teaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415 or C.I.

Designed to assist teachers and graduate students in understanding the adolescent learner. This course will examine theory, strategies, research, resources and implementation options for effective middle and secondary literacy programs.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

LAE 5338 - Teaching Writing in Middle and High School

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415 or C.I.

Techniques and methods in teaching dialects, semantics, and the various grammars within the context of writing.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

LAE 5346 - Methods of Teaching English Language Arts

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415 and TSL 5085 or CI or admission to Initial Teacher Professional Preparation certificate.

Designed for alternative certification and Masters of Arts students to explore the strands, methods and materials related to school curriculum in teaching English.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

LAE 5369 - Literacy Strategies in a Digital Age for Middle and High School

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to graduate program or C.I. Designed to assist teachers in understanding and presenting information using digital literacies, technological innovations, language arts skills and multicultural models of instruction for secondary education.

Spring, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5415 - Children's Literature in Elementary Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Survey of children's literature: criteria for selection according to literary elements and child development needs. Methods for presenting to children; integrating literature with elementary curricula.

Spring, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5465 - Literature for Adolescents

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Senior standing or C.I.

Selecting and evaluating books for adolescents with emphasis on the use of literature in the development of young people.

Spring, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5495 - Assessing Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Students will explore a variety of strategies for assessing students' writing including holistic scoring, primary trait scoring, and portfolio assessment.

Spring

College of Community Innovation and Education - School of Teacher Education

LAE 5496 - Disciplinary Literacy in the Content Areas

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Graduate standing. Designed to assist in understanding the adolescent reader and writer, this course will examine theory, strategies, resources, and implementation options of disciplinary literacy specifically in the content areas (Mathematics, Science, Social Studies, and other content areas).

Spring, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 5917 - Directed Research

College of Community Innovation and Education

LAE 5937 - Special Topics

College of Community Innovation and Education

LAE 6296 - Advanced Writing Workshop

1-3 Credit Hours

Class Hours: 1-3

Lab and Field Work Hours: 0

Contact Hours: 1-3

Prerequisite(s): LAE 5295 or C.I.

Designed for teachers who have completed a previous writing workshop course. Includes history, theory, research, and strategies for teaching writing. (Course may be repeated up to 3 semester hours.) Course May be repeated for credit.

Summer

College of Community Innovation and Education - School of Teacher Education

LAE 6366 - Advanced Studies in Adolescent Literature

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): LAE 4464 or LAE 5465.

Analysis of major works in genre, examination of criticism, instructional strategies, and research in teaching adolescent literature.

Fall, Summer

College of Community Innovation and Education - School of Teacher Education

LAE 6417 - Investigation in Children's Literature

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): A previous survey course in children's literature.

Learning through the utilization of children's literature, literature analysis and evaluation, storytelling, visual and reference materials.

Spring

College of Community Innovation and Education - School of Teacher Education

LAE 6616 - Trends in Language Arts Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Basic Teacher Certificate or C.I.

Historical development and trends; English usage systems; materials; instructional strategies.

Fall

College of Community Innovation and Education - School of Teacher Education

LAE 6637 - Research in Teaching English

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Examination and interpretation of major research in English education. Design of models for research in language instruction in secondary schools.

Spring

College of Community Innovation and Education - School of Teacher Education

LAE 6909 - Research Report

College of Community Innovation and Education

LAE 6918 - Directed Research

College of Community Innovation and Education

LAE 6936 - Seminar in Language Arts Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Provides classroom teachers with opportunities to conduct in-depth explorations of timely topics related to teaching language and literacy.

Summer

College of Community Innovation and Education - School of Teacher Education

LAE 6938 - Special Topics

College of Community Innovation and Education

Latin American History

LAH 5917 - Directed Research

College of Arts and Humanities

LAH 5920 - Colloquium in Latin American History

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examines the major themes and historiography of recent works on Latin American history. May be used in the degree program a maximum of 2 times only when course content is different.

Occasional

College of Arts and Humanities - Department of History

LAH 5937 - Special Topics

College of Arts and Humanities

LAH 6909 - Research Report

College of Arts and Humanities

LAH 6918 - Directed Research

College of Arts and Humanities

Law and Process

CJL 5049 - International Perspectives on Law and Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Examination of the legal and criminal justice systems of other nations and territories through lecture, seminar, research and field visits.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CJL 6520 - American Criminal Courts

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program or C.I.

Critically study and evaluate day-to-day discretionary decisions of prosecutors, judges and defense attorneys and identify how their decisions shape the broad discretionary power this institution yields.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CJL 6568 - Law and Social Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate, or C.I.

This course will examine the types of behavior the state has sought to control and the means employed to exert such control.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

Law Enforcement

CJE 5021 - Foundations of Law Enforcement

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Criminal Justice graduate program, graduate certificate program, or C.I.

Examines police role in modern society and law enforcement policy.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CJE 6120 - Personnel Management in Criminal Justice Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Criminal Justice or C.I.

This course provides a general overview of the issues and problems in the management of criminal justice agencies with an emphasis on best practices.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CJE 6320 - Seminar in Police Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Criminal Justice Ph.D. or Public Affairs (Criminal Justice track) Ph.D. program or C.I. Administration and operational task of police organization, including exercise and control of discretion, hierarchies and divisions of labor, incentive structures, and evaluation of effectiveness and efficiency of police operations.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CJE 6456 - Seminar in Policing Urban Communities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission into the Criminal Justice Ph.D. or Public Affairs (Criminal Justice track) Ph.D. programs or C.I. This course concentrates on the urban communities of the United States and delves into the issues that affect the type of policing that occurs in these locales.

Spring

College of Community Innovation and Education - Department of Criminal Justice

CJE 6688 - Cyber Crime and Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CCJ 5015 or C.I.

Deals with the problem of cyber crime and the criminal use of the Internet. Includes investigation, enforcement and legal issues.

Occasional

College of Community Innovation and Education - Department of Criminal Justice

CJE 6706 - Seminar in Police Socialization and Culture

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Criminal Justice Ph.D. or Public Affairs (Criminal Justice track) program or C.I. This course examines the origins and correlates of socialization and culture operating within the internal and external environments of policing.

Fall

College of Community Innovation and Education - Department of Criminal Justice

CJE 6718 - Proseminar in Criminal Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Capstone experience for the Criminal Justice Professional track. Reviews and integrates the six other courses in the core curriculum.

Fall

College of Community Innovation and Education - Department of Criminal Justice

Linguistics

LIN 5137 - Linguistics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

Modern linguistic theories and studies focusing on language acquisition and development, contemporary American English, semantics, and para-linguistics.

Occasional

College of Arts and Humanities - Department of English

LIN 5675 - English Grammar and Usage

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

An overview of modern grammar, including structural, transformational and rhetorical grammar, along with an examination of controversial usage.

LIT 6039 - Studies in Contemporary Poetry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in MFA Creative Writing program or C.I.

English language poetry from 1945 to the present. Emphasis on American poets, but others such as English or Australian will be included. May be used in the degree program a maximum of 2 times.

Occasional

College of Arts and Humanities - Department of English

LIT 6076 - Studies in Contemporary Nonfiction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Creative Writing MFA Program or C.I. based on submission of manuscript.

Comprehensive study of nonfiction, including memoir, personal essay, literary journalism, and/or nature writing, with special emphasis on craft. May be used in the degree program a maximum of 2 times.

Occasional

College of Arts and Humanities - Department of English

LIT 6097 - Studies in Contemporary Fiction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in MFA in Creative Writing program or C.I.

Fiction in the last 20 years in the United States and Britain. May be used in the degree program a maximum of 2 times.
Occasional

College of Arts and Humanities - Department of English

LIT 6216 - Issues in Literary Study

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Specific issues and controversies in literary study. May be used in the degree program a maximum of 4 times only when course content is different.

Occasional

College of Arts and Humanities - Department of English

LIT 6276 - Teaching College Literature

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Pedagogical theory and practical techniques for teaching literature in college and university settings.

Occasional

College of Arts and Humanities - Department of English

LIT 6435 - Rhetoric of Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in English or C.I.

Rhetorical analysis of traditional scientific texts and critically examine the discourse of technology.

Occasional

College of Arts and Humanities - Department of English

College of Business Administration

MAN 6066 - Ethical Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in the College of Business Administration or C.I.

Building on a foundation of basic theories of ethical decision making from organizational and behavioral perspectives.

The course examines challenges involved in maintaining exemplary professional ethics.

Occasional

College of Business Administration - Department of Management

MAN 6146 - Professional Leadership I

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 1.5

The Professional Leadership course is comprised of two complementary 1.5-credit modules. Part I includes topics, cases, reading assignments, and exercises that are designed to develop cognitive and interpersonal skills.

Odd Fall, Even Fall

College of Business Administration - Department of Management

MAN 6147 - Professional Leadership II

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 1.5

The Professional Leadership course is comprised of two complementary 1.5-credit modules. Part II includes topics, cases, reading assignments, and exercises that are designed to develop cognitive and interpersonal skills related to strategic leadership, leading change, and leading during a crisis.

Odd Spring, Even Spring

College of Business Administration - Department of Management

MAN 6245 - Organizational Behavior and Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core or C.I.

The analysis of human behavior in organizations in terms of the individual, small group, intergroup relationships, and the total organization.

Fall

College of Business Administration - Department of Management

MAN 6285 - Change Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Course designed to familiarize students with change management processes and interventions.

Even Fall

College of Business Administration - Department of Management

MAN 6296 - Executive Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Executive MBA program.

A review of the theory, research, and practice of leadership in organizations. Special attention to contemporary leadership issues, including transactional and transformational leadership.

Odd Spring

College of Business Administration - Department of Management

MAN 6305 - Human Resources Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Course is designed as an overview of human resources practices, techniques and strategies.

Occasional

College of Business Administration - Department of Management

MAN 6311 - Advanced Topics in Human Resources Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAN 6305 or C.I.

An in-depth analysis of current human resource issues related to the attraction, management, and retention of human capital.

Occasional

College of Business Administration - Department of Management

MAN 6325 - Applied Research Tools

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Development of applied qualitative and quantitative research skills for collecting, analyzing and reporting data to organizations.

College of Business Administration - Department of Management

MAN 6385 - Strategic Human Resources Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAN 6305 or C.I.

Examination of the strategic orientation of human resources management and the development of the human resources architecture aligned with the organization's strategy and task environment.

Occasional

College of Business Administration - Department of Management

MAN 6395 - Leadership Development and Coaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Course is designed to prepare students to understand the nature and role of leadership development with an emphasis on coaching.

Occasional

College of Business Administration - Department of Management

MAN 6448 - Conflict Resolution and Negotiation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theory and processes of negotiation in a variety of settings, with relevance to the broad spectrum of negotiation faced by managers.

Occasional

College of Business Administration - Department of Management

MAN 6581 - Project Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Integrated Business track in the Masters of Science in Management.

Introduces key project management skills and strategies with a focus on methods needed to initiate and manage projects efficiently and effectively.

Spring

College of Business Administration - Department of Management

MAN 6721 - Applied Strategy and Business Policy**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MBA Professional Core I and taken in last semester of program.

This capstone course integrates the various functional disciplines in business administration. It focuses on the theories and frameworks in the field of strategic management.

Spring

College of Business Administration - Department of Management

MAN 6909 - Research Report

College of Business Administration

MAN 6915 - Applied Field Project**3-6 Credit Hours**

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): All other courses in the selected track in the program.

Capstone course; applies concepts, theories and methods learned earlier in program to organizational problems in business settings.

Occasional

College of Business Administration - Department of Management

MAN 6918 - Directed Research

College of Business Administration

MAN 7207 - Organization Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral status.

Study of impact of environment, technology, size and innovation on organization structure, functions and development.

Occasional

College of Business Administration - Department of Management

MAN 7275 - Organizational Behavior**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

In-depth review of the classic and modern organizational behavior research literature, which deals with management of individual and group behavior in organizations.

Occasional

College of Business Administration - Department of Management

MAN 7776 - Business-level Strategic Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to doctoral program and C.I.

In-depth review of the classic and modern business-level strategy research literature, which deals with topics such as competitive strategy, industry analysis and the strategy process.

Occasional

College of Business Administration - Department of Management

MAN 7900 - Directed Readings in Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to doctoral program and C.I.

Directed readings in the area of Management concentration, as determined by the student's doctoral study advisory committee. May be repeated for credit.

Occasional

College of Business Administration - Department of Management

MAN 7916 - Seminar in Management Research

Var Credit Hours

Contact Hours: 0

Prerequisite(s): Admission to PhD program or C.I.

Examines empirical and theoretical research in selected management topics. Specific topics may not be repeated for credit. Maximum of 15 hours toward degree. May be repeated for credit only when course content is different.

Occasional

College of Business Administration - Department of Management

MAN 7919 - Research

College of Business Administration

MAN 7922 - Management Research Forum

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): Admission to doctoral program.

Research and pedagogical issues in management, including research presentations by faculty, doctoral students, and invited scholars.

College of Business Administration

MAR 5937 - Special Topics

College of Business Administration

MAR 6409 - Lead Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

Lead management is responsible for generating high quality sales leads and nurturing them into customers. The goal of the class is to help students become familiar with lead management activities, technologies, and strategies for accomplishing this objective.

Even Spring, Occasional

College of Business Administration - Department of Marketing

MAR 6416 - Sales and Marketing Strategies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Integrated Business track of the Masters of Science in Management.

Marketing strategy including analytical and conceptual tools. Introduction to digital marketing and the sales process.

Conceptualization of integrated marketing and sales plans.

Fall

College of Business Administration - Department of Management

MAR 6466 - Strategic Supply Chain and Operations Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Master's program of study foundation core or C.I.

Planning and management of all activities involved in designing and managing the processes, assets, and flows of material and information required to meet customers' demands.

Spring

College of Business Administration - Department of Marketing

MAR 6476 - Sales Force Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

Overview of the sales management process with an emphasis on sales program formulation and management. The overall goal of Strategic Sales Force Management is to examine the elements of an effective sales force as a key component of the organization's total marketing strategy with an emphasis on a highly effective use of the value proposition.

Odd Fall, Occasional

College of Business Administration - Department of Marketing

MAR 6477 - Sales Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

This class is intended to simulate the real-world selling environment. It will introduce students to the technological tools in data management and analysis as applied to the sales process. The course will accomplish two key objectives:

1. An 'analytics' perspective on the selling and buying processes: things that don't get measured don't get changed!
2. Analysis of sales management challenges and analytics applications using the case method of instruction.

Odd Fall, Occasional

College of Business Administration - Department of Marketing

MAR 6646 - Marketing Analytics for Strategic Decision Making

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Consent of College of Business Graduate Studies.

Study of a variety of data-driven models and techniques used to understand customers, improve results, and facilitate strategic decision making.

Occasional

College of Business Administration - Department of Marketing

MAR 6722 - Digital Marketing Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core.

Understand how digital marketing differs from conventional marketing. Develop an ability to formulate digital marketing applications and build viable digital marketing strategies.

Occasional

College of Business Administration - Department of Marketing

MAR 6729 - Marketing of High Technology Products

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core.

Understand high technology marketing issues. Acquire concepts and tools to develop high technology business models. Develop insights into branding, new product development, forecasting and CRM.

Occasional

College of Business Administration - Department of Marketing

MAR 6816 - Strategic Marketing Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MBA Professional Core I.

Marketing competitive strategy formulation with respect to product, pricing, promotion and distribution. Course aims at developing strategic thinking, functional marketing expertise and analytical skills.

Fall, Spring

College of Business Administration - Department of Marketing

MAR 6849 - Services Marketing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Marketing in services industries is the focus of study with particular emphasis on unique aspects of services marketing, the service marketing mix, and the implementation of service strategies.

College of Business Administration - Department of Marketing

MAR 7626 - Multivariate Analysis for Business Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 7423 or equivalent, C.I.

Provides PhD students an in-depth treatment of multivariate analysis applications to marketing and business research problems.

Occasional

College of Business Administration - Department of Marketing

MAR 7638 - Seminar in Marketing Theory, Scaling, and Measurement

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): ECO 7423 and admission to the PhD program.

Provide doctoral students with a foundation in marketing theory, scaling, and measurement.

Occasional

College of Business Administration - Department of Marketing

MAR 7666 - Seminar in Marketing Models I

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): ECO 7423 (or equivalent) and admission to the Ph.D. program or C.I.

Overview of marketing literature with emphasis on marketing models topics.

Occasional

College of Business Administration - Department of Marketing

MAR 7667 - Seminar in Marketing Models II

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0
Contact Hours: 2

Prerequisite(s): ECO 7423 (or equivalent) and MAR 7666 and admission to Ph.D. program or C.I.
Overview of marketing literature with emphasis on marketing models, beyond those covered MAR 7666.
Occasional

College of Business Administration - Department of Marketing

MAR 7807 - Seminar in Marketing Strategy I

1.5 Credit Hours

Class Hours: 1.5
Lab and Field Work Hours: 0

Materials Engineering

EMA 5060 - Polymer Science and Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Structure and properties of polymers, preparation and processing of polymers, mechanical properties, use in manufacturing and high tech applications.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5104 - Intermediate Structure and Properties of Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Fundamentals of dislocation theory, metallurgical thermodynamics and diffusion. Phase transformations, strengthening

mechanisms and fracture. Introduction to engineering polymers, ceramics, and composites.

Fall

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5106 - Metallurgical Thermodynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Laws of thermodynamics, phase equilibria, reactions between condensed and gaseous phases, reaction equilibria in condensed solution and phase diagrams.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5108 - Surface Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365 or EMA 3706 or C.I.

This course focuses on the physics underlying the techniques used to analyze the surface region of materials. This course also addresses the fundamentals of these processes.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5140 - Introduction to Ceramic Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Uses, structure, physical and chemical properties, and processing of ceramic materials. Discussions will include recent developments for high technology applications.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5317 - Materials Kinetics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Mass and thermal transport, phase transformations and Arrhenius rate processes.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5326 - Corrosion Science and Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Electrochemical principles and applications to detecting and monitoring corrosion processes. Various forms of corrosion, their causes and control. Techniques of corrosion protection.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5415 - Electronic Principles of Materials Properties

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365 or EMA 3706 or C.I.

This course will cover the fundamental concepts of band structure and bonding of materials, electrical and thermal conduction in metals, semiconductors and dielectric. The interaction between light and matter will be addressed and the important concepts such as excitons will be introduced.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5504 - Modern Characterization of Materials

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EMA 5104 or C.I.

This course overviews the modern characterization instrumentation for contemporary materials science and engineering studies and aims to understand their scientific significance, and operation principles, and technological applications.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5505 - Scanning Electron Microscopy

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): EMA 5104 or C.I.

A review of electron optics, beam/specimen interactions, image formation, X-ray analysis, specimen preparation, microelectronic applications and crystallography in the SEM.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5584 - Biomaterials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Properties of natural biological materials and their relation to microstructure, biocompatibility, specific applications in orthopedic, cardiovascular, visual, neural, and reconstruction implants.

Even Spring

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5585 - Materials Science of Thin Films

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Interaction of thin film processing techniques with the structure and properties of the materials deposited.

Odd Fall

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5586 - Photovoltaic Solar Energy Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365.

Materials properties basic to photovoltaics, structures, homojunction, heterojunction, and surface barrier solar cells, AMDS-1D modeling of c-Si, GaAs bulk and a-Si:H, CIGS, and CdTe thin film solar cells. May be repeated for credit.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5588 - Biocompatibility of Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3365 or C.I.

Biocompatibility and bioactivity; cell-biomaterials interactions; engineering bone and cartilage; soft-tissue replacements; total hip replacements; nanostructured biomaterials, imaging techniques, preservation techniques for biomaterials, MSDS and FDA compatibility data.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5610 - Laser Materials Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGN 3343 or EMA 5106 or C.I.

Laser beam optics; laser-material interactions; laser heating, melting, vaporization. Plasma formation; laser surface treatment, welding, machining; laser material synthesis. Thin film deposition, crystal growth.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5705 - High Temperature Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

The course covers the principles of strengthening alloys for high temperature service, alloy and process selection, alloy development and design principles for elevated temperature applications.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 5917 - Directed Research

College of Engineering and Computer Science

EMA 5937 - Special Topics

College of Engineering and Computer Science

EMA 6017 - Nanostructured Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

The course covers the science of the building blocks of nanostructured materials, their chemical and structural characterization, material behavior, and the technological implications of these materials.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6126 - Physical Metallurgy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or EMA 3124.

Analytical methods in crystallography, dislocation theory, annealing, solid solutions, phases and phase diagrams, ferrous and non-ferrous alloy systems.

Fall

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6129 - Solidification and Microstructure Evolution

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EML 4142, EMA 5104, or C.I. Cooling process, nucleation, spinodal decomposition, interface instability, cells, dendrites, eutectic and peritectic microstructures, solute segregation, modeling project.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6130 - Advanced Phase Transformations in Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 and EMA 5106 or C.I.

Principles of thermodynamics, kinetics, and phase diagrams for the understanding of diffusion and diffusionless phase

transformations in ferrous and non-ferrous alloys.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6136 - Diffusion in Solids

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 and EML 5060 or C.I.

Fundamental equations and mechanisms of diffusion. Diffusion in metallic, ionic, and semiconducting materials with emphasis on measurement techniques.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6149 - Imperfections in Crystals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

Describes point, line, and planar defects in crystalline materials. Discusses vacancy formation, dislocation theory, plasticity, grain boundary modeling, and the interaction between defects.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6319 - Colloids and Interface Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or EMA 5060 or C.I.

Surface and interfacial tension of liquids, self-assembled monolayers, applications of scanning probe microscopes in interfaces, forces in colloidal systems, stability of macro emulsions, formation and properties of microemulsions, self-assembly.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6516 - X-ray Diffraction and Crystallography

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

Theory and experimental techniques of X-ray diffraction of materials. Topics include the structure of crystalline solids, including lattices, point group and space group theory.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6518 - Transmission Electron Microscopy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

An introduction to the theory and operation of a transmission electron microscope. Electron diffraction techniques, contrast from images, analytical microscopy, and specimen preparation.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6605 - Materials Processing Techniques

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or C.I.

Phase transformation; grain size; surface, powder, and composite processing; shape forming; polymer processes; liquid and vapor phase synthesis; radiation-induced processes, mathematical analysis, project.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6611 - Optoelectronics Materials Processing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 4413, graduate standing or C.I.

Electronic Theory for Materials Preparation, Doping, Metallization, Effect of Materials Properties on Device (eg. Solar Cells, LEDs, and Detectors) Performances.

Occasional

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6626 - Mechanical Behavior of Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EMA 5104 or EMA 4223.

Fundamentals of the mechanical behavior of materials; advanced treatment of elasticity, plasticity, viscoelasticity, creep, fracture and fatigue in a variety of material classes.

Spring

College of Engineering and Computer Science - Department of Materials Science and Engineering

EMA 6909 - Research Report

College of Engineering and Computer Science

EMA 6918 - Research

College of Engineering and Computer Science

EMA 6938 - Special Topics

College of Engineering and Computer Science

EMA 7919 - Research

College of Engineering and Computer Science

Mathematics

MAT 5712 - Scientific Computing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in mathematics or C. I.

Introduction to numerical algorithms and programming, covering computer arithmetic, solution of nonlinear equations, approximation of functions, numerical integration, and numerical solution of ODEs.

Odd Fall, Even Fall

College of Sciences - Department of Mathematics

Mathematics Applied

MAP 5117 - Mathematical Modeling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4321, MAP 4303, graduate standing or senior standing, or C.I.

Introduction to modeling in industrial and scientific applications; techniques for studying statistical and deterministic models.

Even Fall

College of Sciences - Department of Mathematics

MAP 5336 - Ordinary Differential Equations and Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 5228 or C.I.

Existence and uniqueness of solutions of differential equations, systems of ordinary differential equations, autonomous systems, phase plane analysis, stability, bifurcations.

Spring

College of Sciences - Department of Mathematics

MAP 5426 - Special Functions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302, and graduate status or senior standing or C.I.

Series and integral representations, generating functions, recurrence relations and orthogonality properties of the special functions. Emphasis on Bessel, Legendre and hypergeometric functions.

Occasional

College of Sciences - Department of Mathematics

MAP 5435 - Advanced Mathematics for Engineers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302, and graduate status or senior standing or C.I.

Linear Algebra and matrix methods, ordinary differential equations, Fourier series, partial differential equations, numerical methods for differential equations, and applications to engineering.

Occasional

College of Sciences - Department of Mathematics

MAP 5606 - Differential Equations for Financial Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 4341 or C.I.

Initial value problem, terminal value problem, existence and uniqueness, Gronwall's inequality, linear system theory, parabolic PDE, elliptic PDE, basic regularity theory, maximum principle, stability.

Fall

College of Sciences - Department of Mathematics

MAP 5612 - Computational Methods for Financial Mathematics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Financial Mathematics Track in the M.S. in Mathematical Sciences, or C.I.

Numerical modeling, Numerical solutions, stability issues for Ordinary and Partial Differential Equations within the setting of financial mathematics.

Fall

College of Sciences - Department of Mathematics

MAP 5641 - Financial Mathematics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5612 or C.I.

Single-period market, arbitrage, risk-neutral probability measure, market completeness, mean-variance portfolio analysis, multi-period market, binomial tree, contingent claim pricing.

Fall

College of Sciences - Department of Mathematics

MAP 5917 - Directed Research

College of Sciences

MAP 5931 - Proseminar for Financial Mathematics

1 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to the Financial Mathematics Track in the M.S. in Mathematical Sciences, or C.I. Seminar to develop basic career skills in Financial Mathematics.

Odd Fall

College of Sciences - Department of Mathematics

MAP 5933 - Seminar in Financial Mathematics**2 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): MAP 5931

Seminar to develop advanced career skills in Financial Mathematics.

Odd Fall

College of Sciences - Department of Mathematics

MAP 5937 - Special Topics

College of Sciences

MAP 6111 - Mathematical Statistics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6238 - Measure and Probability I or C.I.

Strong laws of large numbers, consistency and asymptotic normality, complete and sufficient statistics, maximum likelihood and least squares, optimal estimators, hypothesis testing.

Spring

College of Sciences - Department of Mathematics

MAP 6118 - Introduction to Nonlinear Dynamics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5336, PHY 2048C or equivalent, or C.I.

Nonlinear differential equations; bifurcation theory; Hamiltonian dynamics; integrable systems and breakdown of integrability; chaos in conservative and dissipative systems.

Occasional

College of Sciences - Department of Mathematics

MAP 6168 - Mathematical Modeling II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5117, graduate standing, or C.I.

Solutions of complex industrial mathematics problems in navigation/guidance, object tracking, pattern recognition, and fluid dynamics.

Occasional

College of Sciences - Department of Mathematics

MAP 6195 - Mathematical Foundations for Massive Data Modeling and Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 5228 and MAS 5145 or C.I.

Mathematical model and analysis of massive data, numerical algorithms, optimization, nonlinear and sparse models.

Even Spring, Even Fall

College of Sciences - Department of Mathematics

MAP 6197 - Mathematical Introduction to Deep Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAT 5712 Scientific Computing, or C.I.

Covers feed-forward and convolutional neural networks, loss functions, gradient descent optimization and selected topics from the current research literatures.

Occasional

College of Sciences - Department of Mathematics

MAP 6207 - Optimization Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 4226 or C.I.

Lagrangian function and duality, Kuhn-Tucker' theorem, quadratic programming and Wolfe's theorem, Griffith and Stewart's method, search methods for unconstrained optimization.

Occasional

College of Sciences - Department of Mathematics

MAP 6218 - Stochastic Calculus

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

MAA 6245, or C.I. Stochastic integration, Stochastic Differential Equations.

Occasional

College of Sciences - Department of Mathematics

MAP 6356 - Partial Differential Equations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 4341 or MAP 5435 or equivalent.

First and second order linear equations; classification; analytical methods including Green's functions and integral representations; introduction to nonlinear equations; applications.

Even Fall

College of Sciences - Department of Mathematics

MAP 6385 - Applied Numerical Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAT5712 Scientific Computing, or C.I.

Topics in solutions of linear systems, numerical linear algebra, numerical solutions of partial differential equations, linear programming and optimization.

Odd Spring, Even Spring

College of Sciences - Department of Mathematics

MAP 6387 - Numerical Linear Algebra

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAT 5712 Scientific Computing, MAP 6385 Applied Numerical Mathematics, or C.I Corequisite(s): The students should be very comfortable with applying the theorems from Calculus, Linear Algebra concepts and using MATLAB or Fortan as a programming language.

Prepares students to understand fundamentals of numerical linear algebra and its algorithms, optimization and statistics, and machine learning algorithms with applications.

Occasional

College of Sciences - Department of Mathematics

MAP 6407 - Integral Equations and the Calculus of Variations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 3203 and MAS 3105, or graduate standing , or C.I.

Dimensional Analysis and Scaling, Calculus of Variations, Lagrangian and Hamiltonian Mechanics, Noether's Theorem, Equations of Applied Mechanics, Sturm-Liouville Theory, Integral Equations, Similarity Methods.

Fall

College of Sciences - Department of Mathematics

MAP 6408 - Perturbations and Asymptotic Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 3203, MAS 3105, and MAA 4402, or graduate standing, or C.I.

Asymptotic Analysis and Perturbation Methods, Multiple Scales, Boundary Layers, WKB method, Stationary Phase method, Steepest Descents, Riemann-Lebesgue Lemma.

Spring

College of Sciences - Department of Mathematics

MAP 6416 - Applied and Computational Harmonic Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

MAA 6229 or C.I. Fourier Series, Fourier transform, Littlewood-Paley theory, Heisenberg uncertainty principle, wavelets, frame theory, Karhunen-Loeve transform, comprehensive sensing, matrix completion, phase retrieval, signal processing.

Occasional

College of Sciences - Department of Mathematics

MAP 6419 - Advanced Transform Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 6424 or C.I.

Fourier analysis and sliding-window Fourier transform, sampling theory and its applications in signal analysis and optics, Radon transforms, the technique of back projection.

Occasional

College of Sciences - Department of Mathematics

MAP 6420 - Generalized Functions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6506 or C.I.

Spaces of test functions and their duals, calculus of distributions, convolution and tempered distributions, Fourier transforms of distributions, and applications to PDEs.

College of Sciences - Department of Mathematics

MAP 6421 - Integral Equations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6405 or C.I.

Successive approximations, Volterra equations, Fredholm theory, Hilbert-Schmidt theory, Neumann series, singular integral equations, the Riemann-Hilbert problem.

Occasional

College of Sciences - Department of Mathematics

MAP 6424 - Transform Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6405 or C.I.

Laplace, Fourier, Hankel, and other integral transforms, inversion theorems; the Z transform; applications to physical problems.

Occasional

College of Sciences - Department of Mathematics

MAP 6438 - Mathematical Fluid-Flow Theory I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302, MAP 4303, MAA 4402, PHY 3220 or equivalent, or C.I.

Mathematical theory of incompressible fluid flows along with analytical methods in solving the equations of fluid dynamics in various situations.

Even Spring

College of Sciences - Department of Mathematics

MAP 6445 - Approximation Techniques

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 4227, MAA 5210 or C.I.

Normed linear spaces; Weierstrass approximation theorem; Tchebycheff approximation by polynomials; trigonometric approximation; orthogonal expansions and least squares approximations.

Occasional

College of Sciences - Department of Mathematics

MAP 6465 - Wavelets and Their Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 4341, MAA 6508, or C.I.

Continuous wavelet transforms, discrete wavelet transforms, frames, Zak transform, multi-resolution analysis, orthonormal bases of compactly supported wavelets, spline wavelets.

Even Fall, Even Spring

College of Sciences - Department of Mathematics

MAP 6469 - Bayesian Analysis and Approximation Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

One of the following combinations: (1) Either MAA 5210 or MAA 5228 and MAS 5145; (2) AST 4762C or AST 5765; or (3) C.I. Bayes' theorem, Fourier and wavelet transforms. Function approximation in multidimensional spaces. Kernels, Splines. Bayesian data analysis, Monte Carlo and Markov Chain Monte Carlo methods.

Occasional

College of Sciences - Department of Mathematics

MAP 6616 - Computational Methods for Financial Mathematics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5612 or C.I.

Monte-Carlo methods, Numerical aspects of stochastic differential equations.

Spring

College of Sciences - Department of Mathematics

MAP 6642 - Financial Mathematics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5641 or C.I.

Theoretical discussion of Stochastic processes, Brownian motion, Ito's integral, Ito's formula, martingales, Girsanov's transformation, stochastic differential equations, option pricing.

Spring

College of Sciences - Department of Mathematics

MAP 6646 - Risk Management for Financial Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 5641 or C.I.

Credit risk, counter party credit risk, securitizations, market risk, operational risk, asset liability management, Basel III regulations.

Fall

College of Sciences - Department of Mathematics

MAP 6909 - Research Report

College of Sciences

MAP 6918 - Directed Research

College of Sciences

MAP 6938 - ST: Theory and Applications of q-series

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Mathematics graduate student, or C.I.

The theory of basic hypergeometric functions and their applications to discrete mathematics
Spring

College of Sciences - Department of Mathematics

MAP 7119 - Advanced Nonlinear Dynamics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 6118 or C.I.

Solitons, inverse scattering transform, breakdown or integrability, analytic structure of dynamical systems, fractal aspects of turbulence.

Occasional

College of Sciences - Department of Mathematics

MAP 7359 - Advanced Topics in Partial Differential Equations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 6356, MAA 6506, or C.I.

The course prepares students advanced PDE techniques needed for their future research.

Occasional

College of Sciences - Department of Mathematics

MAP 7386 - Numerical Solutions of PDE

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 6356, MAP 6385 or C.I.

Numerical solution of linear and nonlinear partial differential equations of parabolic, elliptic and hyperbolic type.
Solution of PDE using finite difference and spectral methods.

Occasional

College of Sciences - Department of Mathematics

MAP 7439 - Mathematical Fluid-Flow Theory II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 6438 or C.I.

Mathematical theory of compressible potential flow, nonlinear acoustics, exact solutions to equations of viscous fluid flow, viscous fluid flows at low or high Reynolds numbers.

Odd Fall

College of Sciences - Department of Mathematics

MAP 7919 - Research

College of Sciences

Mathematics Education

MAE 5327 - Teaching Middle School Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415 and TSL 5085 or admission to Initial Teacher Professional Preparation certificate.

Students will develop skills in planning and delivering mathematics instruction in grades 5-9. The use of technology, cooperative learning, ESOL, and manipulatives is considered.

Occasional

College of Community Innovation and Education - School of Teacher Education

MAE 5336 - Current Methods in Secondary School Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415, TSL 5085, or admission to MED program or Initial Teacher Professional Preparation certificate.

Required special methods course for mathematics 6-12 certification. Assessment, curriculum, technology, practical

classroom ideas and activities.

Occasional

College of Community Innovation and Education - School of Teacher Education

MAE 5917 - Directed Research

College of Community Innovation and Education

MAE 5935 - Post-Secondary Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing or C.I.

The course will focus on issues which are faced by teachers of collegiate mathematics. Topics will be selected from teaching issues, program issues, and other issues.

Even Fall

College of Sciences - Department of Mathematics

MAE 5937 - Special Topics

College of Community Innovation and Education

MAE 6318 - Current Methods in Elementary School Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDE 6933 or C.I.

Strategies of instruction of computation and concepts of number, geometry, and measurement; and algebra. Standards for teaching mathematics.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

MAE 6337 - Teaching Algebra in the Secondary School

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAE 3330 or C.I.

Addresses specific techniques for developing algebra skills for pre-algebra through precalculus algebra needs. Logical deductions, problem solving, computer applications, and innovative methods are explored.

Even Summer

College of Community Innovation and Education - School of Teacher Education

MAE 6338 - Teaching Geometry in the Secondary School

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAE 3330 or C.I.

This course addresses specific techniques for developing geometry skills beginning in the general mathematics classes of grade 6 through the high school geometry course.

Odd Summer

College of Community Innovation and Education - School of Teacher Education

MAE 6517 - Diagnosis/Remediation of Difficulties in Mathematics for the Classroom Teacher

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Basic Teacher Certificate or C.I.

The study of techniques for diagnosis and remediation of difficulties in mathematics.

Odd Summer

College of Community Innovation and Education - School of Teacher Education

MAE 6641 - Problem Solving and Critical Thinking Skills

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Regular Certificate or C.I.

Development of procedures and practices necessary to implement critical thinking skills and problem solving techniques in the schools.

Spring

College of Community Innovation and Education - School of Teacher Education

MAE 6656 - Using Technology in the Instruction of K-12 Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

The application of computer technology to mathematics instruction including calculators, CAI, CMI, application software, simulators, and video disc technology.

Even Fall

College of Community Innovation and Education - School of Teacher Education

MAE 6899 - Seminar in Teaching Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Six semester hours of graduate credit in mathematics education.

Development of historical and current issues, forces, and individuals and their impact on the teaching of mathematics K-12. Consideration of advanced instructional techniques. May be repeated for credit.

Fall

College of Community Innovation and Education - School of Teacher Education

MAE 6909 - Research Report

College of Community Innovation and Education

MAE 6918 - Directed Research

College of Community Innovation and Education

MAE 6938 - Special Topics

MAE 7367 - Instructional Coaching in K-8 Mathematics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): MAE 7817: Content Knowledge for Teaching K-8 Mathematics I

This course addresses improving instructional quality in mathematics by collecting data that influences instruction and implementing strategies for coaching to improve student outcomes.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

MAE 7640 - History of Mathematics Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Study of issues and forces that have shaped mathematics education including policies, classroom practices, curriculum development, instructional materials, technology and assessment of learning.

Even Spring

College of Community Innovation and Education - School of Teacher Education

MAE 7795 - Seminar on Research in Mathematics Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): Doctoral standing.

Even Summer

College of Community Innovation and Education - School of Teacher Education

MAE 7804 - Content Knowledge for Teaching K-8 Mathematics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAE 7817: Content Knowledge for Teaching K-8 Mathematics I.

This course addresses pedagogical content knowledge for supporting K-8 mathematics teachers. Topics include integers; proportional relationships; equations, expressions, and inequalities; geometry and measurement; and statistics.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

MAE 7805 - Policies, Practices, and Structures in K-8 Mathematics Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral Standing.

This course explores existing inequitable policies, practices, and structures in K-8 mathematics education and strategies to develop equitable, just, and inclusive K-8 mathematics programs.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

MAE 7817 - Content Knowledge for Teaching K-8 Mathematics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course addresses pedagogical content knowledge for supporting K-8 mathematics teachers. Topics include whole number concepts and operations, and rational number concepts and operations.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

MAE 7819 - Professional Leadership in K-8 Mathematics Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral Standing.

This course culminates professional leadership experiences in the doctoral program and leverages knowledge of content, methods, practices & policies in K-8 mathematics education.

Every Semester

College of Community Innovation and Education - School of Teacher Education

MAE 7919 - Research

College of Community Innovation and Education

MAE 7930 - Seminar in K-8 Mathematics Education

1-2 Credit Hours

Class Hours: 1-2

Lab and Field Work Hours: 0

Contact Hours: 1-2

Prerequisite(s): Acceptance into K-8 Mathematics Specialization of Curriculum and Instruction Ed.D.

This course addresses requirements of the K-8 Mathematics Education Specialization within the Curriculum and Instruction Ed.D. and supports synthesis of the learning in the program.

Odd Spring, Even Spring

College of Community Innovation and Education - School of Teacher Education

MAE 7945 - Internship in Mathematics Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Math Ed track of the Ph.D. in Education.

The focus of this course is on student's participation in teaching and service related to mathematics education. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

Mathematics: Algebraic Structures

MAS 5145 - Advanced Linear Algebra and Matrix Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAS 3106 or C.I.

Linear spaces, subspaces, linear transformations, matrices, eigenvalues and eigenvectors, Jordan forms, positive definite matrices, bilinear and quadratic forms, functions of matrices.

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAS 3105, MAP 2302, or equivalent or C.I.

Real numbers, epsilon-delta language, limits, continuity, integration, differentiation, Taylor's theorem, series, uniform convergence, inverse and implicit function theorems.

Fall

College of Sciences - Department of Mathematics

MAA 5228 - Analysis I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAS 3106 or C.I.

Real numbers, limits, differentiation, Riemann integrals, Riemann-Stieltjes integrals, calculus in \mathbb{R}^n , metric and normed spaces, contraction mapping theorem, inverse and implicit functions.

Fall

College of Sciences - Department of Mathematics

MAA 5237 - Mathematical Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 4226, or MAA 5210, or C.I.

Metric spaces, sequences, limits, and continuous functions, multi-variable function differentiation and Riemann integrals, uniform convergence, series of numbers and functions.

Odd Fall, Even Fall

College of Sciences - Department of Mathematics

MAA 5917 - Directed Research

College of Sciences

MAA 5937 - Special Topics

College of Sciences

MAA 6229 - Analysis II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 5228 or C.I.

Topological Spaces, Banach Spaces, Hilbert Spaces, Bounded Linear Operators, Distribution and Fourier Transform, Measure Theory and Function Spaces.

Spring

College of Sciences - Department of Mathematics

MAA 6238 - Measure and Probability I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6229 or C.I.

The law of large numbers, central limit theorems, random walks, Poisson processes, stopping times, martingales.

Occasional

College of Sciences - Department of Mathematics

MAA 6245 - Measure and Probability II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

MAA 6238, or C.I. Martingales, Markov Processes, stopping times, Brownian motion, Weiner measure.

Occasional

College of Sciences - Department of Mathematics

MAA 6306 - Real Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 5210.

Sets, function spaces, Lebesgue measure, Lebesgue-Stieltjes measure, measurable functions, convergence notions, general measure and integration, Radon-Nikodym theorem.

Occasional

College of Sciences - Department of Mathematics

MAA 6404 - Complex Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 6405, MAA 4402, MAA 4226, or C.I.

Review of complex variable theory; advanced topics chosen from conformal mapping and its applications, boundary behavior, numerical techniques; singular integrals.

Occasional

College of Sciences - Department of Mathematics

MAA 6405 - Complex Variables

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 5228 or C.I.

Complex plane, analytic functions, harmonic functions, Cauchy's theorem and integral formula, maximum modulus principle, Laurent series, singularities, the residue theorem.

Spring

College of Sciences - Department of Mathematics

MAA 6416 - Topology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 4226, MTG 4302.

Topological spaces and continuous functions, connectedness and compactness, separation axioms, metrization theorems, Baire spaces and dimension theory, the fundamental group and homotopy paths.

Even Spring

College of Sciences - Department of Mathematics

MAA 6506 - Functional Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAA 4226 or C.I.

Normed vector spaces, linear operators, Baire Category theorem, Banach fixed point theorem, Hahn-Banach theorem and applications, open mapping and closed graph theorem with applications, Hilbert space, Gateaux and Frechet.

Even Spring

College of Sciences - Department of Mathematics

MAA 6508 - Hilbert Spaces with Applications**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAP 2302, MAS 3106, or C.I.

Normed and inner product spaces; Hilbert spaces; orthonormal systems; linear operators and spectral decomposition; applications to differential and integral equations.

Occasional

College of Sciences - Department of Mathematics

MAA 6531 - Analysis of Manifolds**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Matrix or Linear Algebra, MAA 4226 or MAA 5210, or C.I. Derivatives as linear transformations, inverse function theorem, manifolds and integration of real-valued functions on manifolds, wedge products, differential forms, vector analysis as a specific case.

Occasional

Medical Electives

MDE 6170 - Core Clinical Rotation - Prenatal Genetics

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Matriculation into the M.S. Genetic Counseling Program. This course is for students to have clinical experience in Prenatal Genetic Counseling.

Fall, Spring, Summer

College of Medicine - Department of Clinical Sciences

MDE 6171 - Core Clinical Rotation - Pediatric Genetics

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Matriculation into the M.S. Genetic Counseling Program. This course is for students to have clinical experience in Pediatric Genetic Counseling.

Fall, Spring, Summer

College of Medicine - Department of Clinical Sciences

MDE 6172 - Core Clinical Rotation - Adult Oncology Genetics

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Matriculation into the M.S. Genetic Counseling Program. This course is for students to have clinical experience in Prenatal Genetic Counseling.

Fall, Spring, Summer

College of Medicine - Department of Clinical Sciences

MDE 7230 - Special Topics in Internal Medicine

6 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 10

Contact Hours: 18

Prerequisite(s): MDC 7200.

Clinical 4 week elective for M3 students who want additional experience in Inpatient Internal Medicine.

Every Semester

College of Medicine M.D. Program

MDE 7257 - Dermatology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must be concurrently enrolled in MDC 7600.

M3 elective in busy dermatology practice, with exposure to many common dermatologic conditions and treatments.

Every Semester

College of Medicine M.D. Program

MDE 7310 - Rheumatology Outpatient Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must be concurrently enrolled in MDC 7600.

This 4-week M3 elective introduces the medical student to the field of Rheumatology. The rotation provides clinical

experience in the assessment and treatment of outpatients with a variety of Rheumatology disorders.
N *Occasional'*

College of Medicine M.D. Program

MDE 7340 - Care of the Critically Ill Patient: Theory and Practice

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must be concurrently enrolled in MDC 7600.
Students will learn from ICU patients about the management of critical illness including aggressive life-extending therapy and setting goals of care.

Occasional'

College of Medicine M.D. Program

MDE 7690 - Orthopedic Spine Surgery Elective

6 Credit Hours

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M2 year. Corequisite(s): MDC 7600.
M3 students will get a brief sense of the outpatient (and possibly inpatient) practice of orthopedics and spine surgery.
Odd Fall, Even Fall, Odd Spring, Even Spring

College of Medicine M.D. Program

MDE 7703 - Anesthesiology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must be concurrently enrolled in MDC 7600.
The basics of anesthesiology, clinical and technical skills and professional attitudes will be taught so that students may gain exposure and proficiency to transition into an anesthesiology residency program.

Fall, Spring

College of Medicine M.D. Program

MDE 7716 - Emergency Medicine Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must be concurrently enrolled in MDC 7600.
This M3 elective rotation will give students interested in pursuing a career in Emergency Medicine an excellent exposure to the breadth of this specialty's clinical practice.

Spring

College of Medicine M.D. Program

MDE 8035 - 4th Year Elective in Patient Safety

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M2 modules and M3 core clerkships.
UCF COM Students only. Students will have the opportunity to study patient safety and quality issues in an inpatient setting and see how the application of the fundamental concepts can improve health care safety and quality.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8040 - Medical Spanish Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

At least two years of high school Spanish or equivalent language exposure. Designed for medical students with at least basic Spanish knowledge to improve their understanding of medical Spanish.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8048 - Narrative Medicine

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of the M3 year. This elective introduces fourth year medical students to the nationally recognized field of Narrative Medicine and teaches them to apply concepts of attention, representation and affiliation to patient and self care.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8051 - The History of Western Medicine Elective

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of the M3 year. This course will explore the history of medicine from Hippocratic medicine to the sequencing of the human genome through the biography of its most prominent figures.

Fall, Spring

College of Medicine - M.D. Program

MDE 8064 - Ward Ethics Elective**3 Credit Hours**

Class Hours: 12 hrs/week

Lab and Field Work Hours: 0

Contact Hours: 12 hrs/week

Prerequisite(s): Completion of M3 year, C.I.

Provide medical students with a learning platform to identify, reflect, discuss, and prepare for everyday ward ethical challenges in their clerkship and residencies.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Medicine M.D. Program

MDE 8072 - International Elective**VAR Credit Hours**

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Successful completion of M3 core clerkships.

Students interested in completing an elective outside the U.S. should contact the Office of Student Affairs. Additional information may be available from Director of International Health Programs. Student must arrange approval process early in the third year.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8080 - 4th Year Elective in Health Information Technology**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M2 modules and M3 core clerkships.

Students will identify and explore a variety of topics on information technology's intersection with medicine. Topics include electronic and personal health records, information security and knowledge resources at the point of care.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8081 - Telemedicine Elective

3 Credit Hours

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of M3 year.

This is an introductory course to familiarize students with key concepts, competencies, and applications of Telemedicine.

Every Semester

College of Medicine M.D. Program

MDE 8082 - Teleurgent Care Elective

3-6 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2-5

Contact Hours: 3-6

Prerequisite(s): Completion of the M2 year.

This is an introductory course to introduce students with key concept, competencies, and application of Teleurgent Care.

Every Semester

College of Medicine M.D. Program

MDE 8092 - MedEd Instructional Materials Development: Moving Beyond the PowerPoint

6 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M2 year.

This course introduces students to basic principles of instructional design and pedagogy.

Every Semester

College of Medicine M.D. Program

MDE 8093 - Clinical Anatomy Teaching Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

M4 medical students can participate as teaching assistants in the human anatomy laboratory component of the UCF COM HB-2 module.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8094 - Simulation in Medical Education Elective

3 Credit Hours

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M3 year.

After reviewing current trends, literature and methodologies in medical simulation, learners will design and deliver one complete scenario to their peers in a simulated clinical setting.

Every Semester

College of Medicine M.D. Program

MDE 8095 - Integrative Reproductive Medicine E-text Development

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 Core Clerkships. Students will design a series of short interactive e-modules for preclinical students on a subject in reproductive medicine. Elective includes training in educational technology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8097 - WikiProject Medicine: A Medical Informatics Elective for Enhancing the Quality of Patient Education

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s):

Completion of M3 clerkships.

This course enables students to improve and enrich the quality of reliable information read by patients on Wikipedia by becoming a WikiProject Medicine Editor.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDE 8099 - Evidence Based Medical Education: Shaping the Education of Future Physicians

6 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M2 year.

Participants examine learning experience through the lens of evidence-based practice, and established models of human learning and instructional design.

Odd Fall, Even Fall

College of Medicine M.D. Program

MDE 8105 - Culinary Medicine Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. Culinary Medicine is a unique approach to nutrition education that integrates medical nutrition therapy principles with culinary medicine techniques. The goal is to teach patients what to eat and how to deliciously prepare meals in their own home kitchens.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8110 - Elective in Reproductive Endocrinology and Infertility**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Experience evaluating new and returning patients in REI clinic: participation in preoperative, operative and inpatient postoperative care, advanced gynecologic ultrasonography, and IVG services.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8124 - Elective in Patient and Family Centered Care**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of the M3 year. This elective introduces fourth year medical students to the philosophy and practice of Patient and Family Centered Care through active engagement in clinical experiences that underscore basic PFCC tenants of respect and dignity, collaboration, open information sharing and meaningful participation which correlate directly to three of the Association of American Medical Colleges' Entrustable Professional Activities for medical students.

Fall, Spring

College of Medicine - M.D. Program

MDE 8127 - Lifestyle Modification Skills in Practice

3-6 Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Completion of the M2 year.

This elective will provide hands on practice with patients taking detailed lifestyle assessments and coaching patients to achieve beneficial lifestyle changes and also by helping run group visits.

Odd Spring, Even Spring

College of Medicine M.D. Program

MDE 8140 - Geriatric Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week 4th year elective experience will provide advanced clinical training and experience in the selective specialty. Provides a menu of options for exposure and experience in geriatric medicine.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8147 - Geriatric Elective

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of the M3 year.

Students will select one of two experiences based on their goals. The menu of options will include either a geriatric primary care clinic, including home visits within an upscale retirement complex, or an academic geriatric/pharmacological experience.

Spring, Odd Summer, Fall

College of Medicine - M.D. Program

MDE 8150 - Hospice and Palliative Care Rotation

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

This two or four week rotation will provide students with extensive exposure to palliative and end of life care.
Spring, Summer, Fall

College of Medicine - M.D. Program

MDE 8152 - Palliative and Pain Management Principles

3-6 Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): MDC 7200.

This non-clinical elective covers the key principles of palliative care and pain management.
Odd Fall, Even Fall

College of Medicine M.D. Program

MDE 8160 - Obstetrics and Gynecology Ambulatory Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. The Ob/Gyn Ambulatory elective is available to 4th year medical students to acquire a comprehensive experience in obstetrics and gynecology. The experience will be both outpatient and inpatient and include participation in all aspects of care for women. The student will participate in obstetric and gynecologic consultations, attending outpatient clinics, assisting in the operating room with obstetric and gynecologic cases, and participating in pre-op and post-op care.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8162 - Gynecologic Oncology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. The student works with two experienced educators on a busy service. There is a large volume of tumor/cancer cases (robotic, laparoscopic, open, perineal).

Fall, Spring

College of Medicine - M.D. Program

MDE 8165 - Elective in Gynecology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. The Gynecology elective is available to 4th year medical students to acquire a comprehensive experience with commonly treated gynecologic issues for women. The experience will include performing inpatient and emergency gynecologic consultations, attending outpatient clinics, assisting in the operating room with gynecologic cases and participating in following gynecologic patients with breast disorders in the breast clinic.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8182 - Advanced Prenatal Diagnosis Clinic**6 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

This 4 week elective will offer medical students insight into the specialty of Maternal-Fetal Medicine and Genetics Counseling.

Every Semester

College of Medicine M.D. Program

MDE 8204 - In-Patient Medicine Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

completion of the M3 year. Students will be assigned to an in-patient team consisting of a medical resident and a teaching hospitalist. Students will follow assigned patients throughout their hospitalization and be responsible along with the resident for their care.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8205 - Elective in Ambulatory Internal Medicine**3-6 Credit Hours**

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M3 year.

This 2 or 4 week experience will provide advanced clinical training in the care of patients age 16 and older in an ambulatory clinic setting.

Odd Fall, Even Fall

College of Medicine M.D. Program

MDE 8207 - Sleep Medicine Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 clerkships.

The sleep medicine rotation is designed to expose students to the specialty of sleep medicine including screening, diagnosis, testing, and treatment of common sleep disorders.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDE 8208 - Advanced Physical Diagnosis

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 Core Clerkships.

C.I. Advance techniques in physical diagnosis as an aid in data collection and syntheses of differential diagnosis.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8209 - Nanomedicine Elective

6 Credit Hours

Class Hours: 14 hrs/week

Lab and Field Work Hours: 0

Contact Hours: 14 hrs/week

Prerequisite(s): Completion of M3 year.

Introduces students to nanomedicine as a branch of medicine that applies the knowledge and tools of nanotechnology to the disease screening, diagnosis, treatment, and prevention.

Odd Fall, Even Fall

College of Medicine M.D. Program

MDE 8210 - Advanced Physiology of the Critically Ill Patient

3-6 Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Completion of the M2 year.

This online course offers advanced integration of advanced physiology and ICU cases in online meetings with physiologists and intensivists to do case evaluation and working through mechanism of disease analyses.

Odd Summer, Even Summer

College of Medicine M.D. Program

MDE 8220 - Clinical Cardiology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. Clinical rotation in cardiology with emphasis on gaining basic knowledge in diagnosis and management of common cardiovascular conditions.

Fall, Spring

College of Medicine - M.D. Program

MDE 8222 - Ambulatory Elective in Cardiology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The four week 4th year elective experience will provide advanced clinical training in the outpatient care of adult cardiology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8223 - Cardiology-Inpatient/Outpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The student will develop an understanding of the pathophysiology and cardiovascular disease and learn an approach to the evaluation and treatment of patients with cardiovascular disease.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8225 - Congenital Cardiology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0
Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
In-depth exposure to pediatric cardiology including patients with congenital heart disease in the inpatient, outpatient, CVICU, and operative room settings.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8226 - Clinical Cardiac Electrophysiology Elective

3 or 6 Credit Hours Credit Hours

Class Hours: 0
Lab and Field Work Hours: 0
Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M3 year.
The student will gain an in-depth understanding of advanced medical and surgical management of cardiac rhythm disorders.
Every Semester'

College of Medicine M.D. Program

MDE 8227 - Advanced ECG Self-Study Elective

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Completion of the M3 year. Students will engage in a 2 week intense ECG self-study review with weekly meeting sessions.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8245 - Pulmonary Elective

6 Credit Hours

Class Hours: 6
Lab and Field Work Hours: 0
Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
Inpatient and outpatient management of pulmonary diseases and sleep disorders.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8246 - Ambulatory Elective in Pulmonary Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult pulmonary medicine patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8248 - Elective in Pulmonary Critical Care and Sleep Medicine**3 Credit Hours**

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of M3 year.

This elective will give the students an extensive exposure with insights into the specialty of pulmonary/critical care/sleep medicine.

Every Semester

College of Medicine M.D. Program

MDE 8250 - Dermatology Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The student will be exposed to almost all aspects of diagnosis and treatment within dermatology (pediatrics to geriatric), surgical dermatology (routine, Moh's, laser), cosmetic dermatology (lasers, fillers, cosmetic surgery, hair transplantation, aesthetic services and dermatopathology).

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8251 - Dermatology Clinic Elective**VAR Credit Hours**

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

This elective will provide exposure to a general dermatology practice.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8252 - Ambulatory Elective in Dermatology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult dermatology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8254 - Advanced Dermatology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships and satisfactory completion of Dermatology elective.

This elective will expose the student to almost all aspects of diagnosis and treatment within general dermatology and provide additional opportunities in research and office management.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8256 - Trichology

Prerequisite(s): Completion of the M3 year.

In-office rotation. Clinical diagnosis and clinical/surgical treatment of various hair disorders.

Every Semester

College of Medicine M.D. Program

MDE 8262 - Ambulatory Elective in Endocrinology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult endocrinology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8270 - Gastroenterology Inpatient/Outpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The student will develop an understanding of the pathophysiology of gastrointestinal disease and learn an approach to the evaluation and treatment of patients with gastrointestinal disease.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8271 - Ambulatory Elective in Gastroenterology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult gastroenterology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8280 - Hematology/Oncology Inpatient/Outpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This course provides an in-depth exposure to the diagnosis and treatment of hematologic disease and malignancy in the hospital and outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8281 - Ambulatory Elective in Hematology/Oncology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult hematology/oncology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8283 - Hematologic Oncology and Bone Marrow Stem Cell Transplantation

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides an in-depth exposure and experience in hematologic malignancies and bone marrow hematopoietic stem cell transplantation. Patients seen will have wide range of malignancies such as leukemia, lymphoma, myeloma, Hodgkins disease and bone marrow failure syndrome such as aplastic anemia.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8285 - Diagnostic Hematology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The student will be working closely with the hematopathologist, immunopathologist, clinical hematologists, senior residents and supervisors of the hematology section; he/she will both observe and participate in the usual studies performed in these areas.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8310 - Ambulatory Elective in Rheumatology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult rheumatology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8320 - Infectious Diseases-Inpatient/Outpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This course provides an in-depth exposure to the diagnosis and treatment of infectious diseases in the hospital and outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8321 - Ambulatory Elective in Infectious Disease and Travel Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult infectious disease/travel medicine patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8341 - Internal Medicine/Critical Care Medicine Elective

Prerequisite(s): Completion of the M3 year.

Rotation includes teaching of mechanical ventilation, ACLS, dialysis, bedside ultrasounds, vasopressors, antibiotics, and other subjects relevant to practice of critical care medicine.

Every Semester

College of Medicine M.D. Program

MDE 8342 - Surgical Critical Care

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 10

Contact Hours: 18

Prerequisite(s): Completion of the M3 year.

Expose students to acute and daily management of surgical critical care patients.

Every Semester

College of Medicine M.D. Program

MDE 8344 - Ambulatory Elective in Acute Care Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week 4th year elective experience will provide advanced clinical training in the outpatient care of adult acute care patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8345 - Wound Care

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Provides an in-depth exposure to the patient with open wounds, precursor and follow-up of healed wounds.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8350 - Nephrology Inpatient/Outpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This course provides an in-depth exposure to the diagnosis and treatment of renal disease in the hospital and outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8351 - Ambulatory Elective in Nephrology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult nephrology patients in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8362 - Clinical Pharmacology Elective

Prerequisite(s): Completion of the M3 year.

This course will offer exposure to inpatient pediatric and women's health pharmacology with a focus on basic pharmacology concepts and opportunities for self-directed learning.

Every Semester

College of Medicine M.D. Program

MDE 8364 - Insights into the Medication Use Process

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of the M2 year.

Explore the medication use process (prescribing, transcribing/documenting, dispensing, administering, and monitoring) using a variety of virtual learning platforms.

Odd Fall, Even Fall

College of Medicine M.D. Program

MDE 8370 - Essentials of Musculoskeletal Care Elective

6 Credit Hours

Class Hours: 40/week

Lab and Field Work Hours: 0

Contact Hours: 40/week

Prerequisite(s): Completion of M3 year.

The elective will provide students opportunity to learn initial evaluation, work-up and conservative treatment of various musculoskeletal complaints.

Odd Spring, Even Spring

College of Medicine M.D. Program

MDE 8391 - Integrative Medicine Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

This elective rotation that provides introductory sessions and workshops will be presented by community practitioners and preceptors focusing on different modalities of integrative medicine; botanicals, homeopathy, mind/body, nutrition, traditional Chinese medicine, osteopathy, and energy medicine.

Spring

College of Medicine - M.D. Program

MDE 8400 - Pediatric Hospitalist

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides an in-depth exposure and experience in hospital level care of admitted patients, ages birth through 18 years, consults and admissions.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8404 - Ambulatory Pediatrics Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This elective is designed to acquaint the student with the management of acute pediatric illness in an outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8409 - General Outpatient Pediatrics Clinic**3-6 Credit Hours**

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of M3 year.

This rotation will give the student a broad exposure to general pediatrics focusing on outpatient primary care.

Every Semester

College of Medicine M.D. Program

MDE 8410 - Adolescent Medicine Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This elective is designed to acquaint the student with the fundamentals of adolescent medicine by providing outpatient, community based exposure to the care of adolescents.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8412 - Pediatric Telehealth Elective

3-6 Credit Hours

Class Hours: 6-12

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Completion of M3 year.

This elective will provide a broad learning experience in telehealth.

Every Semester

College of Medicine M.D. Program

MDE 8415 - Developmental/Behavioral Pediatric Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This program emphasizes the use of multiple disciplines and community resources that specialize in developmental issues.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8420 - Pediatric Cardiology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This clinical rotation will introduce the student to the outpatient pediatric cardiology practice with the goals of developing basic cardiology skills such as data collection and clinical examination. EKG interpretation, basic echocardiography, basic catheterization will be introduced.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8425 - Pediatric Pulmonary Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This clinical course will be based on basic respiratory physiology and will include a variety of clinical pulmonary experiences and diseases.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8430 - Pediatric Endocrinology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Provide in-depth exposure and experience in the diagnosis and treatment of endocrine disorders with a focus on the multidisciplinary care of the diabetic child; also, growth disorders, disorders of puberty and obesity, and its complications.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8433 - Pediatric Gastroenterology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Students will be exposed to a wide spectrum of pediatric gastrointestinal and liver diseases.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8438 - Genetics and Dysmorphology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This elective will introduce the student to the evaluation and treatment of pediatric patients with a known or suspected genetic, cyto genetic, metabolic, or dysmorphic disorder.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8440 - Pediatrics Hematology/Oncology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
Pediatrics hematology and oncology including bone marrow transplant.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8445 - Pediatric Nephrology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
This rotation is designed to familiarize the student with the wide range of pediatric kidney diseases encountered in the ICU, inpatient service and outpatient departments.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8454 - Pediatric Infectious Diseases

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
Introduction to the clinical aspects of the diagnosis and treatment of infectious diseases in children.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8460 - Neonatology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
This elective is designed to expose the student to normal physiology and a wide variety of disease that affect the term and pre-term newborn.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8465 - Pediatric Critical Care and ICU Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0
Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
This course is designed to give students the experience of caring for critically ill patients ranging from infancy through adolescence in the ICU/SCU setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8466 - Acting Internship in General Outpatient Pediatrics with Nursery

6 Credit Hours

Class Hours: 40 hrs per week
Lab and Field Work Hours: 0
Contact Hours: 40 hrs per week

Prerequisite(s): Completion of M3 year.
Daily rounding in Level I nursery and outpatient general pediatrics.

Every Semester

College of Medicine M.D. Program

MDE 8480 - Special Topics in Pediatric Ophthalmology

6 Credit Hours

Class Hours: 0
Lab and Field Work Hours: 6
Contact Hours: 6

Prerequisite(s): Completion of the M2 Year.

This course provides advanced clinical training in pediatric ophthalmology.
Every Semester

College of Medicine M.D. Program

MDE 8485 - Pediatrics Orthopaedics Elective

6 Credit Hours

Class Hours: 6
Lab and Field Work Hours: 0
Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
This rotation will expose the student to a wide variety of pediatrics orthopaedic problems affecting the growing musculoskeletal system.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8490 - Pediatric Surgery Selective and Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Participates in outpatient, inpatient and intra-operative treatment of children.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8491 - Pediatric Neurosurgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

An introduction to Pediatric Neurosurgery.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8500 - Pediatric Dermatology**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Overview of pediatric dermatology including common skin dermatoses, birthmarks, genodermatoses in both outpatient and inpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8505 - Pediatrics Emergency Medicine**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 Core Clerkships.

This elective will provide students with experience assessing and caring for children in a Pediatrics Emergency Department that provides emergent and urgent care to patients aged 0-17 years old, including pregnant adolescent patients in their first trimester. Students will be exposed to a wide variety of illnesses and injuries, including critical illnesses, and primary care diagnoses. Supervision will be provided by attending physicians in Pediatrics, Emergency Medicine or Pediatrics Emergency Medicine. Students will perform an initial rapid assessment followed by a thorough history and physical examination, and then generate a differential diagnoses and preliminary management plan. All

management decisions will be discussed with a senior resident or attending physician.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8511 - Pediatric Anesthesia Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. This two- or four-week elective rotation, open to fourth year medical students, will provide a broad learning experience in pediatric anesthesiology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8512 - Pediatric/Adolescent Gynecology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. The pediatric and adolescent gynecology elective is designed to expose medical students to the full spectrum of gynecologic services for the pediatric and adolescent population while remaining within a developmentally appropriate, supportive environment. Students will also participate in the surgical management of endometriosis and ovarian cysts.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8520 - Advanced Clinical Anatomy

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Student will plan and implement a program to study and demonstrate the anatomy, current literature and surgical approaches related to a contract agreed upon by student and elective supervisor at the start of the elective.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8530 - Pathology and Laboratory Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides introduction to all areas of pathology practice with emphasis on anatomic pathology disciplines.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8532 - Clinical Pathology Methods and Interpretation

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The course is designed to acquaint the student with all aspects of a large hospital clinical laboratory. The student will learn the capabilities of the laboratory by rotating through hematology, immunology, chemistry and microbiology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8533 - Forensic Pathology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 clerkships.

This course is designed to provide students with exposure to forensic pathology and death investigation. Students will participate in autopsies and death investigation.

Spring, Fall

College of Medicine - M.D. Program

MDE 8534 - Surgical Pathology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The course is designed to provide the student with the opportunity for surgical specimen preparation and interpretation. Emphasis is placed on normal gross and histologic findings, gross and microscopic pathology and clinicopathologic correlation of the patient's disease process.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8535 - Autopsy Pathology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provide the student with the opportunity for in-depth study and performance of complete autopsies.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8550 - Clinical Ophthalmology Elective**VAR Credit Hours**

Class Hours: 1.5-6

Lab and Field Work Hours: 0

Contact Hours: 1.5-6

Prerequisite(s): Successful completion of M3 core clerkships.

An eye clinic based experience where students will master ophthalmoscopy, ophthalmic examination skills, and participate in general and specialty eye surgery and clinics.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8555 - Special Topics in Ophthalmology**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M2 year.

This course will provide advanced clinical training for students with an interest in ophthalmology.

Every Semester

College of Medicine M.D. Program

MDE 8582 - Physical Medicine and Rehabilitation Elective - Psychiatry**3-6 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 9-12

Contact Hours: 9-18

Prerequisite(s): Completion of the M3 year.

Provide medical students a broad exposure to the field of physical medicine and rehabilitation.

Odd Spring, Even Spring

College of Medicine M.D. Program

MDE 8590 - Otolaryngology - Head and Neck Surgery Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. This elective rotation is led by internationally respected surgeons skilled in Otolgic/Neurologic head and neck surgery. Students work with 5 surgeons to learn the basics of Oto-HNS surgery.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8591 - Pediatric Maxillofacial and Craniofacial Surgery Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This course is designed to provide trainees with expanded clinical training in the areas of cleft, craniofacial and pediatric oral and maxillofacial surgery.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8592 - Pediatric Otolaryngology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. This rotation will allow students interested in pediatric primary care to spend time with our busy service learning about medical and surgical care of common pediatric head and neck, upper airway, and otologic conditions of children. This will take place in the inpatient/outpatient/operating room settings.

Fall, Spring

College of Medicine - M.D. Program

MDE 8603 - Elective in Orthopaedic Patient Care and Surgical Techniques

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. M4 students will be exposed to the daily interactions with patients needing musculoskeletal care, medical evaluations, review of history, care options and surgical techniques. All patients are sports medicine related injuries. Students will get exposure to orthopedic sports medicine injuries and arthritic condition of the lower extremity.

Fall, Spring

College of Medicine - M.D. Program

MDE 8605 - Vascular Surgery Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 academic year. Student will actively participate in clinical care of vascular surgery patients including operating rooms. Student may present cases at conference.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8606 - Introduction to the Ambulatory Surgical Center

Prerequisite(s): Completion of the M3 year.

This course will introduce the medical student to health care delivery in an ambulatory surgical setting.

Fall, Spring

College of Medicine M.D. Program

MDE 8607 - Non-Clinical Advanced Surgery Elective

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 0

Contact Hours: 30/week

Prerequisite(s): Completion of the M2 year.

Remote surgery elective comprised of operative videos, independent study, and web-based meetings, encompassing the core competencies of surgery and elective material in a sub-specialty.

Odd Spring, Even Spring, Odd Summer, Even Summer

College of Medicine M.D. Program

MDE 8631 - General Thoracic Surgery Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. Elective rotation for 4th year medical student in General Thoracic Surgery where students learn to take care of thoracic surgery patients.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8632 - Cardiothoracic Surgery

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 academic year. The student will be joining the team in daily rounds, scrubbing in surgeries, and following post-operative patients, and participating in a weekly outpatient clinic.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8660 - Plastic Surgery Elective

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

This rotation has been designed to expose the 4th year medical student to the diversity of plastic surgery, by having him/her work with several UCF College of Medicine plastic surgeons whose interests and practice patterns vary.

Fall, Spring, Summer

College of Medicine M.D. Program

MDE 8663 - Aesthetic Plastic Surgery

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Rotation providing a focused learning experience in aesthetic surgery; students with interest in facial reconstruction may elect to take call or become involved in complex facial trauma reconstruction at the regional trauma center.

Spring, Summer, Fall

College of Medicine M.D. Program

MDE 8675 - Urology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Elective in clinical urology with a focus on inpatient, outpatient and surgical aspects of urology.

College of Medicine - M.D. Program

MDE 8676 - Colon and Rectal Surgery Elective

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Completion of the M3 clerkships.

This rotation will include workup, diagnosis, and treatment/follow up of surgical diseases involving the colon, rectum, and anus in both inpatient and outpatient settings.

Every Semester

College of Medicine M.D. Program

MDE 8682 - Introduction to Trauma and Surgical Critical Care Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 year. This course will expose students to the multidisciplinary nature of modern trauma care while providing ample opportunity to learn and understand core principles of trauma, critical care, and emergency general surgery.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8683 - Trauma and Orthopaedics Elective**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The course is designed to present to the student the basic aspects of orthopaedic care.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8691 - Intro to Ortho Surgery and Musculoskeletal Care**3-6 Credit Hours**

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of the M3 year.

The student will be exposed to a wide variety of musculoskeletal issues both acute and chronic. They will improve their physical diagnosis skills, learn the use of appropriate imaging options, and be involved in formulating a treatment plan and go to surgery with preceptor.

Every Semester

College of Medicine M.D. Program

MDE 8700 - Anesthesia Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. With a combination of clinical and didactic experiences, students will learn the role play as perioperative physicians, intensivist, and pain management specialists.

College of Medicine - M.D. Program

MDE 8702 - Anesthesia Elective at VA

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Medical students will learn the multi-faceted role anesthesiologists play in medicine as perioperative physicians and pain management specialists.

College of Medicine - M.D. Program

MDE 8710 - Emergency Medicine Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 Core Clerkships.

This course allows students with interest in EM to fully explore the reality of being an Emergency Physician within a busy Emergency Department. There will be opportunity to participate in the management of all ED patients from the critically ill to the minor complaints.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8760 - Elective in Radiology

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Student will rotate with radiologists at APH or ORMC. Exposure to subspecialties within radiology including interventional, neuroradiology, pediatric, GI/GU, oncology and trauma.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8763 - Diagnostic Radiology Clerkship

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 Core Clerkships.

In-depth exposure to diagnostic radiology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8765 - Diagnostic and Interventional Radiology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year

A fourth-year elective for eligible medical students in diagnostic and interventional radiology.

Fall, Spring

College of Medicine - M.D. Program

MDE 8765 - Diagnostic and Interventional Radiology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

A fourth year elective for eligible medical students in diagnostic and interventional radiology.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDE 8767 - Neuro-Radiology

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Evaluation and interpretation of modalities used to image the central nervous system.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8769 - Pediatric Radiology Elective

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides an in-depth exposure and experience in pediatric radiology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8773 - Emergency Ultrasound Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 academic year. This elective is intended to help integrate knowledge, skill and experience to perform and interpret ultrasound imaging at the patient's bedside.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8775 - Pediatric Ultrasound Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

This two or four-week elective rotation, open to fourth-year medical students, will provide a broad learning experience in pediatric ultrasound.

Fall, Spring

College of Medicine - M.D. Program

MDE 8775 - Pediatric Ultrasound Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s):

Completion of the M3 year.

This two or four-week elective rotation, open to fourth-year medical students, will provide a broad learning experience in pediatric ultrasound.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDE 8780 - Radiation Oncology Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 core clerkships. This clinical rotation will involve exploring the field of radiation oncology through basics of cancer medicine, diagnosis of strategy and treatment of cancer, and radiation physics.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8790 - Special topics in Anesthesiology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

This elective provides M3 and M4 medical students with advanced clinical training in anesthesiology.

Every Semester

College of Medicine M.D. Program

MDE 8807 - Neuro-Oncology

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Evaluation and clinical care of patients with brain tumors and neurological complications of cancer.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8820 - Interventional Pain Management Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of M3 year.

Four-week elective rotation providing clinical experience in an outpatient setting in the field of interventional medicine.
Odd Fall, Even Fall, Odd Spring, Even Spring

College of Medicine - M.D. Program

MDE 8823 - Outpatient Pain Management and Neurology Elective

3 or 6 Credit Hours Credit Hours

Prerequisite(s): Completion of the M3 year.

M4 students will learn non-opioid options for chronic pain management, as well as appropriately prescribing controlled medications when necessary.

Every Semester'

College of Medicine M.D. Program

MDE 8831 - Outpatient Psychiatry Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M2 year. Completion of the Core Clerkship in Psychiatry.

Students will be given progressive clinical responsibilities in the assessment and treatment of psychiatric patients.

Every Semester

College of Medicine M.D. Program

MDE 8835 - M4 Acting Internship Psychiatry VA Residential Care at Domiciliary

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Responsibility for clinical assessment and treatment planning for residential care patients with special emphasis on substance related disorders and PTSD at VA Medical Center Domiciliary.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8836 - Psychiatry Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 academic year and instructor consent. Responsibility for clinical assessment and treatment planning for residential care patients.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8838 - Clinical Psychiatric Pharmacology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides an in-depth exposure and experience in psychiatric pharmacology protocols.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8844 - Post-Traumatic Stress Disorder Clinic

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 academic year; Instructor consent; UCF COM students only. Participate in the assessment and treatment of patients with combat-related post-traumatic stress disorder. Experiences may include diagnostic assessments, assisting in conducting individual and group treatments and participating in ongoing research protocols.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8873 - Child and Adolescent Psychiatry - Outpatient Elective

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

M4 students will be given progressive clinical responsibilities in the assessment and treatment of patients at Orange Psychiatric Associates.

Fall

College of Medicine M.D. Program

MDE 8883 - Geriatric Psychiatry Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.
Responsibility for clinical mental health assessment and treatment.
Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8890 - Academic Psychiatry Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

In this elective, students will develop a scholarly project, do clinical and classroom teaching of junior medical students, and help deliver resident as teacher didactics to residents.

Spring, Fall

College of Medicine - M.D. Program

MDE 8891 - Special Topics in Psychiatry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of the M2 year. Completion of MDC 7830 Core Clerkship in Psychiatry.

This elective allows for advanced clinical training in Psychiatry in both inpatient and outpatient settings.

Every Semester

College of Medicine M.D. Program

MDE 8892 - Special Topics in Neurology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

This rotation allows M3 and M4 student to gain advanced clinical experience in neurology.

Every Semester

College of Medicine M.D. Program

MDE 8900 - Directed Study/Independent Study

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Prior approval required.

Individual study by students under the direction of a faculty member and with the approval of the Assistant Dean of Medical Education and the Associate Dean of Students. Topics vary and will be selected on an individual basis. Credit hours and student level may vary.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDE 8910 - Medical Externship in Interdisciplinary Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Completion of the M1 year.

This flexible research externship will provide opportunities for M1-M4 medical students to refine research skills for special projects/patents as well as preparation for residency match.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDI 8555 - Acting Internship in Clinical Ophthalmology

6 Credit Hours

Class Hours: 40 hrs per week

Lab and Field Work Hours: 0

Contact Hours: 40 hrs per week

Prerequisite(s): Completion of M3 year.

This rotation will provide greater exposure to diagnosis, management, and surgical treatment of clinical ophthalmology cases encompassing cornea, retina, glaucoma, and oculoplastic and reconstructive surgery.

Odd Summer, Even Summer

College of Medicine - M.D. Program

Medical Externships

MDX 8011 - Extramural Clerkship

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Extramural elective offers students the opportunity to gain experience at an LCME accredited medical school and its affiliated facilities. Interested students should contact the Office of Student Affairs for information regarding extramural (visiting) elective.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDX 8900 - Independent Study/Research Elective Away

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Elective away permits fourth year medical students to pursue areas of study/research outside of UCF. Arrangements are made between the student, the away supervising faculty member and must be supervised by a UCF College of Medicine faculty member.

Fall, Spring, Summer

College of Medicine - M.D. Program

Medical Internships

MDI 8120 - Acting Internship in Family Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

This four week experience will provide advanced clinical training in the care of patients of all ages in the hospital and clinic settings.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8160 - Acting Internship in Obstetrics and Gynecology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of Core Clerkship in Obstetrics and Gynecology. Experience comparable to a month of obstetrics and gynecology internship, during which the student will function as an intern under the supervision of the senior resident/s and attending physician.

College of Medicine - M.D. Program

MDI 8162 - Acting Internship in Benign Gynecology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Experience comparable to a month of gynecologic internship, during which the student will function as an intern under supervision of senior resident(s) and attending physician.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8164 - Acting Internship in Gynecologic Oncology

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Provides an in-depth exposure and experience in gynecologic oncology.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8165 - Acting Internship in Obstetrics

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Experience comparable to a month of obstetric internship, during which the student will function as an intern under the supervision of the senior resident and attending physician.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8200 - Acting Internship in Internal Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the outpatient care of adult medical patients.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8201 - Acting Internship Internal Medicine, Inpatient

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the care of adult medical patients in the inpatient and outpatient settings.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8247 - AI in Medicine Critical Care and Pulmonary Diseases**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Immerses the student in the care of MICU patients by focusing on technology, multidisciplinary personnel, and physiologic, goal-oriented, humanistic practice in critical illness.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8300 - Acting Internship in Allergy/Asthma/Immunology**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. The student will see patients with allergy disorders in the outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8340 - Acting Internship in Internal Medicine Acute Care**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This four week experience will provide advanced clinical training in the care of acutely ill hospitalized adult medical patients.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8342 - Acting Internship in Critical Care

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M-3.

Immerses the student in the care of patients by focusing technology, multidisciplinary personnel, and physiologic, goal-oriented, humanistic practice in critical illness.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8343 - Acting Internship in Surgery Critical Care**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Immerses the student in the care of SICU patients by focusing technology, multidisciplinary personnel, and physiologic, goal-oriented, humanistic practice in critical illness.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8344 - Acting Internship in Medicine Critical Care**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Immerses the student in the care of MICU patients by focusing technology, multidisciplinary personnel, and physiologic, goal-oriented, humanistic practice in critical illness.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8400 - Acting Internship in General Pediatrics Inpatient**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

This elective is designed to acquaint the student with the management of acute pediatric illness in the hospital setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8461 - Acting Internship in Neonatal ICU

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. This acting internship is designed to expose the student to normal physiology and a wide variety of diseases that affect the term and preterm newborn.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8463 - Acting Internship in Pediatric Critical Care**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. Immerses the student in the care PICU patients by focusing technology, multidisciplinary personnel, and physiologic, goal-oriented, humanistic practice in critical illness.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8470 - Acting Internship in Pediatric Neurology/Epilepsy**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of Core Clerkship in Neurology. C.I. Evaluate treatment of inpatient and outpatient Pediatric Neurology patients, with exposure to acutely ill patients in ICU to evaluations of Epilepsy/Seizures, Movement Disorders and Headache.

College of Medicine - M.D. Program

MDI 8490 - Acting Internship Pediatric Surgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The fourth year medical student on Pediatric Surgery (AI) will build upon their surgical clerkship experience with exposure to the workup, diagnosis and treatment/follow-up of surgical diseases involving neonates, infants and children in both the inpatient and outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8570 - Acting Internship in Pediatric Orthopedic Surgery

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 academic year. The student in AI Pediatric Orthopedic Surgery will be focused on the orthopedic surgical care of children. He/she will lead the orthopedic surgical service in the outpatient and inpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8571 - Acting Internship in Adult Orthopaedic Surgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Completion of the M3 year

This fourth year medical student rotation is structured to develop clinical skills in the six ACGME competencies as they apply to adult orthopaedic surgical care.

Fall, Spring

College of Medicine - M.D. Program

MDI 8600 - Acting Internship in General Surgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Completion of core clerkship in surgery. The fourth year medical student on the General Surgery Acting Internship will build upon the surgical core M3 rotation and further explore the workup, diagnosis and treatment/follow-up of surgical diseases in both the inpatient and outpatient setting.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8650 - Acting Internship in Neurosurgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3. C.I. This four-week experience will provide advanced clinical training to prepare the 4th-year medical student for the rigors of surgical internship (with neurosurgical focus).

College of Medicine - M.D. Program

MDI 8661 - Acting Internship in Oculo-Facial Plastic and Reconstructive Surgery

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s):

Completion of M3 year.

This 4-week AI rotation will provide greater exposure to diagnosis, management and surgical correction of ophthalmic and reconstructive disorders.

Spring, Summer, Fall

College of Medicine - M.D. Program

MDI 8676 - Acting Internship Colon and Rectal Surgery**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The fourth year medical student on the colon and rectal surgery acting internship will build upon the surgical core M3 rotation and further explore the workup, diagnosis and treatment/follow-up of surgical diseases involving the colon, rectum and anus in both the inpatient and outpatient settings.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8710 - Acting Internship in Emergency Medicine**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of M3 clerkships. This four-week rotation introduces the student to initial evaluation, workup, diagnostic ordering and treatment of patients presenting in the emergency department.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8802 - Acting Internship in Clinical Neurological Ophthalmology**6 Credit Hours**

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. An eye clinic based experience where students will master ophthalmoscopy, ophthalmic examination skills, and participate in general and specialty eye surgery and clinics.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8833 - Acting Internship Psychiatry Advanced Therapies

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

Clinical assessment and treatment experience with child, adolescent and adult populations with treatment-resistant, "dual diagnoses" (psychiatric comorbidities) in residential and day treatment settings.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8840 - Acting Internship in Psychiatry

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Increased level of responsibility for clinical assessment and treatment planning in walk-in/triage clinic at VA. Additional responsibility for teaching third year medical students.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8841 - Acting Internship in Consultation Liaison Psychiatry

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. As acting interns, M4 students will be given progressive clinical responsibilities in the assessment and treatment of patients hospitalized on medical and surgical wards at the Lake Nona Orlando V.A. Medical Center that have concomitant psychiatric conditions.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8842 - Acting Internship in Emergency Psychiatry

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Completion of the M3 year. As acting interns, M4 students will be given progressive clinical responsibilities in the psychiatric assessment and treatment of patients presenting for urgent care at the Lake Nona Orlando V.A. Medical Center Emergency Room.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDI 8843 - Acting Internship in Inpatient Psychiatry

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Completion of the M3 year.

As acting interns, M4 students will be given progressive clinical responsibilities in the assessment and treatment of patients hospitalized on the psychiatry ward.

Contact Hours: 3

Acceptance in the Specialist in Blood Banking program. Supervised practice in donor recruitment, phlebotomy, donor testing. Component preparation, HLA typings, transfusion service and management in the community blood center.
College of Medicine - Department of Molecular and Microbiology

MLS 6949 - Cooperative Education in Medical Laboratory Science

College of Sciences

Medical Research

MDR 8250 - Dermatology Research Elective

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 core clerkships.

The student will have opportunities to work on one of several ongoing clinical research projects. In addition, the student may develop their own project or join onto an ongoing project co-sponsored through another medical school, a patient support group or a medical society.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDR 8550 - Ophthalmology Research Elective

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Students will gain exposure to clinical trials, translational research and patient care in an ophthalmology subspecialty (retina) community-based practice.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDR 8570 - Orthopaedic Research Elective

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): Completion of the M2 year.

This course will highlight some of the challenges, approaches, and current research in orthopaedic medicine.

Occasional

College of Medicine M.D. Program

MDR 8802 - Neurodegenerative Disease: Research and Clinical Care

VAR Credit Hours

Class Hours: 3-6

Lab and Field Work Hours: 0

Contact Hours: 3-6

Prerequisite(s): Successful completion of M3 core clerkships.

Evaluation, clinical care, and clinical research in neurodegenerative disease with special emphasis on Alzheimer's disease and Parkinson's disease.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDR 8900 - Independent Study/Research at UCF

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Successful completion of M3 core clerkships.

Elective permits fourth year medical students to pursue, under the sponsorship of a UCF College of Medicine faculty member, areas of study/research that are not included among regular elective offerings.

Fall, Spring, Summer

College of Medicine - M.D. Program

Medicine Clinical Clerkships

MDC 7002 - Transition to Core Clerkships

16 Credit Hours

Class Hours: 8

Lab and Field Work Hours: 0

Contact Hours: 28.3/week

Prerequisite(s): Completion of the M2 year.

This 12-week rotation is intended to give M3 students an in-depth transition to the core clerkships, building clinical knowledge and skills that will be directly applicable in the clinical settings of each clerkship.

Odd Summer, Even Summer

College of Medicine M.D. Program

MDC 7180 - Core Clerkship in Obstetrics and Gynecology

8 Credit Hours

Class Hours: 8

Lab and Field Work Hours: 0
Contact Hours: 8

Prerequisite(s): Successful completion of M-2 term.
During this 6-week required clerkship, you will be introduced to the obstetric and gynecologic care of women in the outpatient and inpatient settings.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDC 7200 - Core Clerkship in Internal and Family Medicine

16 Credit Hours

Class Hours: 16
Lab and Field Work Hours: 0
Contact Hours: 16

Prerequisite(s): Successful completion of M-2 term.
Students will learn care of the adult patient in both inpatient and outpatient settings, with emphasis on diagnosis and treatment in common medical disorders.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDC 7400 - Core Clerkship in Pediatrics

8 Credit Hours

Class Hours: 8
Lab and Field Work Hours: 0
Contact Hours: 8

Prerequisite(s): Successful completion of M-2 term.
This course is a 6 week, required clerkship introducing the student to the general inpatient and outpatient clinical care of children.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDC 7600 - Core Clerkship in Surgery and Surgical Selectives

10 Credit Hours

Class Hours: 10
Lab and Field Work Hours: 0
Contact Hours: 40+/Week

Prerequisite(s): Completion of the M2 year. Corequisite(s): Must also be concurrently enrolled in an M3 elective course.

The surgical clerkship will expose the student to the diagnosis, workup, treatment, and follow up care of a broad spectrum of both common and not so common surgical diseases.

Every Semester

College of Medicine - M.D. Program

MDC 7710 - Core Clerkship in Emergency Medicine

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): Successful completion of M3 clerkships.

Four week core clerkship introduces the student to initial evaluation and workup as well as diagnostic ordering and treatment of patients presenting to the emergency department.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDC 7800 - Core Clerkship in Neurology

8 Credit Hours

Class Hours: 8

Lab and Field Work Hours: 0

Contact Hours: 8

Prerequisite(s): Successful completion of M-2 Term.

The neurology clerkship combines clinical neuroscience with neurologic history and examination to enable students to formulate differential diagnosis and treatment plans for common neurologic disorders.

Fall, Spring, Summer

College of Medicine - M.D. Program

MDC 7830 - Core Clerkship in Psychiatry

8 Credit Hours

Class Hours: 8

Lab and Field Work Hours: 0

Contact Hours: 8

Prerequisite(s): Successful completion of M-2 Term.

Students will participate in patient assessment and treatment, with an emphasis on the most common psychiatric disorders and recognition of cases needing specialty psychiatric referral.

Fall, Spring, Summer

College of Medicine - M.D. Program

Mental Health Services

MHS 5005 - Introduction to the Counseling Profession

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of Phase II of Education Professional Preparation or C.I.
Overview of the philosophy, organization, administration, and roles of counselors in various work settings.

Foundations of mental health counseling including organizational, administration, fiscal, and accountability structures.
Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6070 - Diagnosis and Treatment in Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 6400, MHR 6401.

Examines diagnosis in the assessment and treatment of mental disorders and the use of the DSM IV. Disorders reviewed with emphasis on symptoms and implications for treatment.
Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6220 - Individual Psychoeducational Testing I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

An overview of appraisal instruments for individual testing with emphasis on administration, scoring, and interpretation. Designed for practitioners interested in understanding individual assessment.
Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6221 - Individual Psychoeducational Testing II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): C.I.

Analysis of test theory and practice in administration, scoring, and interpretation of tests assessing achievement, visual-motor and cognitive ability, adaptive behavior, and self-concept.

Occasional

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6245 - Assessment and Treatment in Addictions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Application of assessment and treatment models in addictions, and the ethical application of services to support persons with addictions and chemical dependency and their families.

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6400 - Theories of Counseling and Personality

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 5005 or MHS 6020, EDF 6481, or C.I.

Major theories and approaches to counseling, correlating them with counterpart theories of personality and learning.

Fall, Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6401 - Techniques of Counseling

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): MHS 6400 or C.I.

The nature of counseling and its relationships to theoretical concepts.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6403 - Group and Family Play Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

MHS 6421. This practical course provides an overview of using different mediums of play therapy, including expressive arts, groups of children, and families for a systemic approach.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6407 - Counseling for Wellness

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Introduction to wellness concepts and topics in counseling including spirituality, health, stress research, positive assessment and others.

Odd Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6420 - Foundations of Multicultural Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 5005 or C.I.

Reviews knowledge and research pertaining to multicultural counseling and social justice issues, develops skills and personal awareness, and examines attributes that affect counseling diverse populations.

Occasional

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6421 - Foundations of Play Therapy and Expressive Arts

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course addresses the theories and application of principles of play and expressive arts in the counseling process with children.

Fall, Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6422 - Advanced Theories and Techniques of Play Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 6421.

This course provides an in-depth study of play therapy counseling theories, utilizing didactic and experiential mediums to enhance the students' development of play therapy skills.

Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6424 - Filial Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 6421.

This course teaches students how to include parents in the play therapy process through learning a specific model of filial in a 10-week group experience.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6430 - Family Counseling I

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): MHS 5005 or MHS 6020 or C.I.

Presentation of specific family counseling theories. An evolution and current state of the art.

Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6431 - Family Counseling II

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): MHS 6430, EDF 6481, or C.I.

Presentation of techniques to work with entrenched, paradoxical, and **fixed** family systems that pose problems for the family and the counselor.

Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6440 - Couples Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Overview of couple counseling theory and technique. In addition, the course covers special problems and stressors in the couple relationship.

Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6450 - Addictions Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examination within systematic, theoretical framework of the function that a substance, individual, and the environment play in use and abuse of illicit and licit substances.

Fall, Even Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6465 - Counseling Victims and Perpetrators of Family Violence

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Examination of counseling interventions used with victims and perpetrators of family violence.

Occasional

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6466 - Foundations of Trauma and Crisis Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 9

Prerequisite(s): MHS 5005 or C.I.

An overview of the effects of crisis, disasters, and trauma on diverse individuals across the lifespan, focusing on trauma-specific counseling interventions and trauma-informed counseling strategies.

Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6470 - Human Sexuality and Relationships**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A basic course in understanding how human beings form intra- and interpersonal relationships and how sexuality develops.

Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6500 - Group Procedures and Theories in Counseling**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 6401.

This course is designed to give the student an understanding of the role of theories in group counseling as well as the many process applications of groups.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6510 - Advanced Group Counseling**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): MHS 6500 or C.I.

This course is designed to give students practical experience in leading groups. It is also intended to challenge students to explore professional and advanced issues in group counseling.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6600 - Consultation, Staffing, and Case Management

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

MHS 6500 or C.I. Understanding the counselor's role as consultant and staffing team member. Study of case management procedures.

Occasional

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6702 - Ethical and Legal Issues

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Studies of ethical standards and legal issues in counseling and other human service professions.

Odd Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6803 - Practicum in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 5005, MHS 6400, MHS 6401, MHS 6500, C.I.

Supervised counseling emphasizing competence in (1) individual counseling (2) working with groups (3) tests in educational-career-personal counseling. May be repeated for credit.

Odd Fall, Even Spring, Odd Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6830 - Counseling Internship

1-6 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1-6

Contact Hours: 1-6

Prerequisite(s): C.I.

Supervised placement in setting appropriate for program track. May be repeated for credit.

Fall, Spring, Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 6909 - Research Report

College of Community Innovation and Education

MHS 6918 - Directed Research

College of Community Innovation and Education

MHS 6938 - Special Topics

College of Community Innovation and Education

MHS 6949 - Cooperative Education in Mental Health Services

College of Community Innovation and Education

MHS 7311 - Scholarship and External Funding in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into UCF's Counselor Education PhD program.

Emphasis on review processes and grant writing for State and Federal agencies as well as Private Foundations.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7340 - Advanced Career Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD in Education.

An advanced study of career development theories, occupational and educational information, approaches to career decision-making, lifestyle and leisure in the development of the whole person.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7406 - Advanced Theories in Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD program in Education--Counselor Education track.
Examination of counseling theories including historical foundations and emerging theories.
Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7497 - Advanced Multiculturalism in Counseling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Admission to UCF's PhD in Education - Counselor Education Track program.

The course examines multiculturalism from the perspective of higher education and also within the context of counseling multicultural competencies.

Even Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7611 - Supervision in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD in Education--Counselor Education track.

An examination of the process and various theories of supervision in counselor education.

Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7700 - Literature and Leadership in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD program in Education--Counselor Education track.

Emphasis on current trends, leadership development, and consultation in Counselor Education.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7730 - Research Seminar in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD in Education.

An examination of outcome research design, methodological issues and empirical basis of counseling.

Even Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7801 - Advanced Practicum in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD program in Education--Counselor Education track.

This course provides advanced graduate students an opportunity to demonstrate and develop counseling skills.

Occasional

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7808 - Internship in Counseling Supervision

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD program in Education and MHS 7611.

Integration of theory and practice in counseling supervision.

Odd Fall, Even Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7840 - Internship in Counselor Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to PhD program in Education--Counselor Education track.

Examine and practice the various roles within a Counselor Education program under direct supervision.

Fall, Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

MHS 7919 - Research

College of Community Innovation and Education

MHS 7939 - Special Topics

College of Community Innovation and Education

MHS 7980 - Dissertation

Microbiology

MCB 5117C - Microbial Genomics

4 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): MCB 3020C.

This course introduces common concepts and tools in microbial genomics, which spans the fields of biology, bioinformatics, and phylogenetics. The course will provide hands-on experience applying computational tools. In addition, we will cover the basics of genomics, evolutionary theory, phylogenetics, bacterial recombination, metagenomics, bacterial genome-wide association studies, and data visualization.

Odd Fall

College of Medicine - Burnett School of Biomedical Sciences

MCB 5205 - Infectious Processes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MCB 3020C or C.I.

Discussion of current theories of the infectious process and the response of host cells and tissue to infection.

Fall

College of Medicine - Department of Molecular and Microbiology

MCB 5208 - Cellular Microbiology: Host-Pathogen Interactions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, PCB 3522.

Examination of the molecular details of host-pathogen interactions. Key areas of cell biology will be considered in relation to microbial pathogenesis.

Spring

College of Medicine - Department of Molecular and Microbiology

MCB 5209 - Microbial Stress Response

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examination of the molecular genetic mechanisms, bacterial and fungal pathogens used to adapt to changes in their environment.

Fall

College of Medicine - Department of Molecular and Microbiology

MCB 5225 - Molecular Biology of Disease

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An in-depth study of the molecular biological mechanism of diseases in experimental animal models and human populations.

Occasional

College of Medicine - Department of Molecular and Microbiology

MCB 5415 - Cellular Metabolism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Basic concepts of the mechanisms that define the functioning and regulation of prokaryotic and eukaryotic cell metabolism.

Fall

College of Medicine - Department of Molecular and Microbiology

MCB 5505 - Molecular Virology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An in-depth overview of the fundamental aspects and current concerns in modern virology including HIV, tumor viruses Prion disease, virus-host interaction, genome replication and pathogenesis.

Occasional

College of Medicine - Department of Molecular and Microbiology

MCB 5654 - Applied Microbiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Background or undergraduate coursework in microbiology and/or biotechnology.

Microbial biochemistry of industrial processes including economics, screening, scale-up, quality control, and applied genetics.

Occasional

College of Medicine - Burnett School of Biomedical Sciences

MCB 5722C - Methods in Biotechnology

4 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 6

Prerequisite(s): Graduate standing.

A laboratory course that will train graduate students in fluorescence and luminescence-based assays used in biopharmaceutical industry for target validation.

Material and Supply Fee: \$70.00 *Occasional*

College of Medicine - Department of Molecular and Microbiology

MCB 5917 - Directed Research

College of Sciences

MCB 5932 - Current Topics in Molecular Biology

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): Graduate standing or C.I.

Selected current research topics from the primary literature reflecting recent advances in molecular biology. May be repeated for credit.

Occasional

College of Medicine - Department of Molecular and Microbiology

MCB 5937 - Special Topics

College of Sciences

MCB 6026 - Molecular Biology and Microbiology Capstone

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Molecular Biology and Microbiology M.S. program (non thesis track).

An in-depth current literature research report on a relevant subject will be developed by student and evaluated by faculty committee.

Occasional

College of Medicine - Department of Molecular and Microbiology

MCB 6226 - Molecular Diagnostics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

PCB 3522, PCB 4524 and MCB 5225 or C.I. A course in basic laboratory skills used in molecular genetic or clinical diagnostic laboratories for detecting genetic diseases.

Occasional

College of Medicine - Department of Molecular and Microbiology

MCB 6273 - Advanced Topics in Infectious Processes

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Graduate standing.

Data presentations from the primary literature and from the student's original research will focus on the molecular mechanisms of host-pathogen interactions.

Occasional

College of Medicine - Burnett School of Biomedical Sciences

MCB 6314 - Industrial Perspectives Seminar

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Biotechnology MS students.

Learning concepts of basic research and drug development in the pharmaceutical industry and technical presentation.

May be used in the degree program a maximum of 2 times.

Fall, Summer

College of Medicine - Department of Molecular and Microbiology

MCB 6417C - Microbial Metabolism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I. and Graduate Standing

Relationship between microbial metabolism and principal cellular activities, emphasizing transport, respiration, differentiation, and synthesis.

Occasional

College of Medicine - Burnett School of Biomedical Sciences

MCB 6723 - Practice of Biomolecular Science

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Graduate standing. Provides MS and PhD students with an introduction to the practice of Biomolecular Science.

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 2

Prerequisite(s): Admission to the Doctor of Nursing Practice program or a Nurse Practitioner certificate track.
Development of theoretical, and clinical skills for the evaluation, diagnosis, and management of illnesses and injuries.
Material and Supply Fee: \$45.00 *Fall, Spring*

College of Nursing - Department of Nursing

NGR 6105 - Management of Symptoms and Outcomes of Disease

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s) or Corequisite(s): NGR 5141 or C.I.
Focused examination of the concepts, theories and research evidence that provide the basis for assessment and management of the patient experiences related to disease outcomes. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6172 - Pharmacology for Advanced Nursing Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5141 or C.I.

Comprehensive study of medications used in the promotion and maintenance of health across the lifespan. Examination of the implications for advanced nursing practice. May be used in the degree program a maximum of 2 times.
Fall, Spring

College of Nursing - Department of Nursing

NGR 6175 - Critical Care Pharmacology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

NGR 6172 - Pharmacology for Advanced Nursing Practice. Provides a general overview of the pharmacologic agents unique to the care of the critically ill and medically-complex unstable adult-gerontology client.

Fall, Spring, Summer

College of Nursing - All

NGR 6186 - Genetics and Genomics in Advanced Nursing Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Baccalaureate degree in Nursing, NGR 5141 or approval of graduate coordinator or C.I.

Application of genetics and genomic principles to advanced clinical nursing practice.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 6200 - Gender Related Primary Care

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Corequisite(s): 6342L. Prerequisite(s) or Corequisite(s): NGR 6172.

Admission to the Doctor of Nursing Practice program, Family Nurse Practitioner or Adult/Gerontology Nurse Practitioner track; completion of NGR 5003; NGR 5003L; NGR 5141. Development of theoretical skills for evaluation, diagnosis, and management of the gender related health needs of men and women. May be used in the degree program a maximum of 2 times.

Fall

Development of Clinical Nurse Specialist skills in management of an elderly population with acute and chronic conditions. Graded S/U. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6265 - Adult/Gerontology CNS I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5141; NGR 5003L; NGR 6874.

Adult/Gerontology Clinical Nurse Specialist foundation. Role/scope of CNS; direct care/coaching focus. Health promotion and disease prevention across the adult lifespan. May be used in the degree program a maximum of 2 times.
Spring

College of Nursing - Department of Nursing

NGR 6265L - Adult/Gerontology CNS I Clinical

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Corequisite(s): NGR 6265.

Introduction to Adult/Gerontology CNS role; emphasis on direct care, coaching, systems leadership for health promotion and managing common problems. Graded S/U. May be used in the degree program a maximum of 2 times.
Spring

College of Nursing - Department of Nursing

NGR 6266 - Adult/Gerontology CNS II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6265; NGR 6265L; NGR 6172; NGR 6801; NGR 5720.

Continuation of Adult/Gerontology CNS I. Management of acute and/or complex problems; focus on research and ethical decision making. May be used in the degree program a maximum of 2 times.
Fall

College of Nursing - Department of Nursing

NGR 6266L - Adult/Gerontology CNS II Clinical

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): NGR 6265; NGR 6265L Corequisite(s): NGR 6266.

Continued development of Adult/Gerontology CNS role; emphasis on research, ethical decision making, and management of acute and chronic health problems.
Fall

College of Nursing - Department of Nursing

NGR 6267 - Adult/Gerontology CNS III

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6266; NGR 6266L.

Continuation of Adult/Gerontology CNS II. Management of acute and/or complex problems. Focus on collaboration, systems leadership, and consultation. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6267L - Adult/Gerontology CNS III Clinical**3 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): NGR 6266; NGR 6266L Corequisite(s): NGR 6267.

Continued development of adult/gerontology Clinical Nurse Specialist role; emphasis on collaboration, systems leadership, consultation in management of acute and chronic problems.

Spring

College of Nursing - Department of Nursing

NGR 6305 - Pediatric Primary Care**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Nursing Practice program, Family Nurse Practitioner track; completion of NGR 5003, NGR 5003L, or C.I. Corequisite(s): 6305L. Prerequisite(s) or Corequisite(s): NGR 6172.

Development of theoretical skills for evaluation, diagnosis, and management of the primary care needs of children and their families, including common normal and abnormal variations in physical, cognitive, and psychological development. May be used in the degree program a maximum of 2 times.

Spring, Summer

College of Nursing - Department of Nursing

NGR 6305L - Pediatric Primary Care Clinical**2 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Corequisite(s): NGR 6305.

Development of clinical skills for evaluation, diagnosis, and management of the primary care needs of children and their families, including common normal and abnormal variations in physical, cognitive, and psychological

development. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6331L - Pediatrics I Clinical for APNs

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): Admission to MSN program or nursing certificate, FNP or PNP track. Corequisite(s): NGR 6331. Evaluation diagnosis and management of the primary care needs of children and their families.

Spring

College of Nursing - Department of Nursing

NGR 6332L - Pediatrics II Clinical for APNs

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Nursing program, Nursing certificate, Pediatric Nurse Practitioner track, NGR 6332.

Evaluation, diagnosis, and management of the complex health needs of children and their families.

Fall

College of Nursing - Department of Nursing

NGR 6334 - Women's Health for APNs

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to M.S. in Nursing program, Nursing certificate or track, NGR 5003, NGR 5003L, NGR 5141, NGR 6172. Corequisite(s): NGR 6342L (for Adult Nurse Practitioner and Family Nurse Practitioner tracks). Development of theoretical skills for evaluation, diagnosis, and management of women.

Summer

College of Nursing - Department of Nursing

NGR 6335L - Focused Pediatrics Clinical for APNs

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Nursing program, Nursing certificate, Pediatric Nurse Practitioner track, NGR 6331.

Application of theory and skills for the in-depth developmental and physical assessment of children and their families.
Summer

College of Nursing - Department of Nursing

NGR 6342L - Women's Health for APNs Clinical

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): Admission to M.S. in Nursing program, Nursing certificate, Adult Nurse Practitioner or Family Nurse Practitioner track. Corequisite(s): NGR 6334.

Application of skills for evaluation, diagnosis, and management of the health needs of women. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6351 - Nursing Care of Children and Childbearing Women

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5141; NGR 5003 and NGR 5003L Corequisite(s): NGR 6801 or C.I.

Analysis of nursing care of children and childbearing women. Incorporates diagnostic reasoning, nursing management, and evidence-based practices. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6627 - Management of Common Health Problems of Communities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5141; NGR 5003 and NGR 5003L Corequisite(s): NGR 6801 or C.I.

Analysis of current practices in management of communities. Incorporates diagnostic reasoning, nursing management, and evidence-based practices. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6713 - Curriculum Development in Nursing Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admissions to M.S. in Nursing program or certificate of Nursing Education, or C.I.

Analysis of external and internal influences affecting curriculum development for the nursing education. Examination of societal factors impacting nursing education. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6714 - Clinical Teaching Strategies for Nursing**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6791 or C.I.

Synthesis of research-based literature and best practice in the development, implementation and evaluation of clinical education for nursing students. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6715 - Application of Instructional Technology for Nursing Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6791 or C.I.

Analysis of effective teaching and learning strategies with emphasis on developing techniques for teaching using instructional technology in nursing education. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6717 - Introduction to Healthcare Simulation**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to M.S. in Nursing or Nursing Certificate or C.I. Course applies pedagogical principles and knowledge of a range of technologies to developing healthcare simulation programs. Includes principles of educational evaluation.

Fall, Spring, Summer

College of Nursing - All

NGR 6718 - Evaluation in Nursing Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6713; NGR 6791 or C.I.

Analysis of the process of systematic evaluation of learning outcomes at individual, class and program levels. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 6722 - Financial Management and Resource Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.S. in Nursing or Doctor of Nursing Practice program or C.I.

Overview of health care financing and economics at the macro and micro level and their influence on health care delivery, resource development and health policy. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6723 - Nursing Leadership and Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Science in Nursing, Doctor of Nursing Practice, Nursing Ph.D. program, or C.I.

Analysis, synthesis and application of health care leadership principles including health and patient care, delivery systems, personnel management and finance, ethical, legal and regulatory requirements.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6723L - Nursing Leadership Role Specialization Practicum

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): NGR 6723.

Preceptor supervised experience with a nurse leader. Experience will focus on the analysis, synthesis and application of the principles related to leadership in the health care setting, including health care delivery systems, patient care

delivery systems, staffing, personnel management, finance and ethical, legal and regulatory requirements.
Fall, Spring

College of Nursing - Department of Nursing

NGR 6758L - Clinical Nurse Specialist Advanced Practicum

4 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 4

Contact Hours: 4

Prerequisite(s): NGR 6781.

Supervised advanced clinical practice in the clinical nurse specialist role. Integration of practice, education, consultation, research and administrative roles.

Spring

College of Nursing - Department of Nursing

NGR 6771L - Healthcare Simulation Practicum

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

NGR 6978 or C.I. Optional practicum course to prepare for roles in nursing and healthcare simulation design and evaluation.

Fall, Spring, Summer

College of Nursing - All

NGR 6772L - Nurse Leadership and Management Internship

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): NGR 5720, NGR 5871, NGR 6722, NGR 6723, and NGR 6723L.

Percepted advanced leadership and management experience focusing on analysis, synthesis and application of principles related to nurse lead administration of health care systems.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6773L - CNL Residency

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): NGR 6777L, NGR 6775L, NGR 6776L and NGR 6813.

Intensive clinical immersion in role of the clinical nurse leader. Graded S/U. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6775L - CNL Resources and Outcomes

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Corequisite(s): NGR 6105 and NGR 6722.

Participation in clinical activities related to symptom and disease management and healthcare finance and resource utilization to improve patient outcomes.

Summer

College of Nursing - Department of Nursing

NGR 6776L - CNL Advocacy and Education

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Corequisite(s): NGR 5720.

Participation in clinical activities related to organizational assessment, patient/staff education and advocacy, and professional development.

Fall

College of Nursing - Department of Nursing

NGR 6777L - CNL Quality and Safety

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Corequisite(s): NGR 6874.

Introduction to role of CNL in clinical setting; participation in clinical activities related to quality improvement and patient safety. Graded S/U. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6783 - Adult CNS II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 6172, NGR 6782, NGR 6782L, NGR 6263, NGR 6264L; C.I.

Continuation of Adult Clinical Nurse Specialist I. Management of acute and/or complex patients. Clinical Nurse Specialist competencies of collaboration, consultation, systems leadership, and research. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 6783L - Adult CNS II Clinical**2 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): NGR 6782 and NGR 6782L; NGR 6263; NGR 6264L Corequisite(s): NGR 6783.

Continued development of the Clinical Nurse Specialist role. Emphasis on direct care, collaboration, consultation, systems leadership, and research. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 6791 - Teaching Strategies for Nurse Educators**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate program in the College of Nursing or the graduate certificate in Nursing and Health Professional Education or C.I.

Application of evidenced-based practice guidelines to the processes of teaching and learning. Analysis of external and internal influences affecting the educational process of health professionals. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 6794 - Organizational Leadership and Operations in Healthcare Simulation**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

NGR 6717 or C.I. Prepares students with the knowledge and skills necessary to manage a simulation program in a healthcare environment.

Spring

College of Nursing - All

NGR 6801 - Research Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5800.

Identify and critically appraise existing scientific evidence, and apply evidentiary findings to nursing practice, population or setting. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6813 - Evidence Based Nursing Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 5800 and NGR 6801; must be in last 12 hours of M.S. in Nursing program or in Doctor of Nursing Practice plan of study.

Apply research, theory and other evidence to advanced practice nursing. Processes for implementation, evaluation and synthesis of evidence-based nursing practice are included. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 6871 - Augmented, Virtual, and Mixed Realities in Healthcare

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Interdisciplinary examination of virtual, augmented, and mixed reality use in healthcare.

Occasional

College of Nursing - Department of Nursing Practice

NGR 6874 - Nursing Environment Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the M.S. in Nursing or Doctor of Nursing Practice track or C.I. In-depth analysis of the use of informatics, quality management, risk reduction and patient safety concepts and tools to promote improved patient outcomes for nursing care. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 6886 - Professional Ethics and Rational Decision Making in Medicine and Advanced Nursing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An analysis of ethical theories that guide clinical, policy, and research decision-making in medicine and advanced nursing in a diverse society. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 6899 - The Practice of Global Health Care

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Graduate Nursing Program or C.I. An overview of health care from a global perspective, synthesizing the theory and practice of global health.

Fall, Spring, Summer

College of Nursing - All

NGR 6909 - Research Report

College of Nursing

NGR 6918 - Directed Research

College of Nursing

NGR 6938 - Special Topics

College of Nursing

NGR 6941 - Advanced Practice Practicum

Variable Credit Hours

Class Hours: 1-7

Contact Hours: 1-7

Prerequisite(s): Admission to M.S. in Nursing, Doctor of Nursing Practice, Clinical Nurse Specialist or Nurse Practitioner certificate.

Can be started concurrently with final clinical course in program of study. (Varies with plan of study.). Supervised advanced clinical practice in the role of nurse practitioner in an individualized preceptorship.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 6942C - Internship in Nursing Education**4 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): NGR 6351 or NGR 6627 or NGR 6249; and NGR 6945L.

Application of principles of education through guided practice in classroom and clinical settings and assimilation of the nurse educator role. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 6945L - Clinical Specialty Practicum**1 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): NGR 5141, NGR 5190, or C.I.

Supervised clinical practice activities related to nursing care of common health problems of specific patient population. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Nursing - Department of Nursing

NGR 6978 - Healthcare Simulation Capstone Project**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

NGR 6794 or C.I. Preparation and testing of a healthcare simulation project using a multi-disciplinary team approach.

Fall, Summer

College of Nursing - All

NGR 7065 - Advanced Clinical Management for Advanced Practice Nursing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): NGR 7748L.

Advanced diagnostic reasoning and analysis of clients with complex health maintenance, health promotion and illness management specific to speciality. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7115 - Philosophical and Ethical Foundations of Nursing Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in College of Nursing or C.I.

Analysis of the philosophical and ethical underpinnings of nursing science, linking it to the development of philosophy of science and personal philosophy.

Odd Fall, Even Fall

College of Nursing - Department of Nursing

NGR 7123 - Theory in Nursing Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a doctoral program in Nursing or C.I.

This course examines the foundations and application of theory in nursing science.

Odd Fall, Even Fall

College of Nursing - Department of Nursing

NGR 7163 - Illness as a Social Construct

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7818 or C.I.

Focused examination of concepts, theories, and research related to physical expression of disease and its link to individual psychosocial responses, beliefs, relationships and social environment. May be used in the degree program a maximum of 2 times.

Occasional

College of Nursing - Department of Nursing

NGR 7661 - Healthcare for Vulnerable Populations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Health and healthcare issues of vulnerable populations and the influence of social, cultural, political and economic factors. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7673 - Epidemiology Principles in Advanced Practice Nursing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Doctor of Nursing Practice program or C.I.

Advanced application of epidemiological concepts in community and public health practice, including disease surveillance, prevalence, prevention and statistical management of patient aggregate data. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7748L - Advanced Clinical Practice Selective for Advanced Practice Nursing

1-3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 1-3

Contact Hours: 1-3

Prerequisite(s): NGR 7176 Corequisite(s): NGR 7065.

Clinical management of clients with complex health maintenance, health promotion and illness management needs. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7778L - Advanced Leadership Selective for DNP

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.
Application of evidence-based management processes to support decision making in the health care environment.
Graded S/U. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7779C - Program Development and Management for DNP

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.
Application of inquiry, critical thinking and strategic planning skills related to project planning, management, evaluation and dissemination. Graded S/U. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7793 - Leadership and Economics in Advanced Practice Nursing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7891.

Advanced analysis of change management, leadership theories/strategies, finance and resource management and the health care systems and economic structures in Advanced Practice Nursing.

Summer

College of Nursing - Department of Nursing

NGR 7805 - Doctoral Scholarship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Ph.D. track or C.I.

An introduction to doctoral scholarship in support of beginning a program of research. Includes responsible conduct of science and research ethics consideration. May be used in the degree program a maximum of 2 times.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 7806 - Doctoral Scholarship II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7805 or C.I.

A continuation of Doctoral Scholarship with an emphasis on synthesizing the research and theoretical literature related to the students area of research. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 7807 - Research Approaches and Designs for Nursing and Healthcare**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Quantitative and qualitative approaches to studying nursing and health related phenomena; ethical issues; internal and external validity; comparison of designs. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7808 - Qualitative Methods in Nursing and Healthcare II**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7815 Qualitative Methods I or equivalent or C.I.

Application of qualitative methodologies for in-depth study of nursing and health-related phenomena; hands-on experience with data collection, analysis, and interpretation. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7812 - Advanced Study Design and Methods**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7807; NGR 7817; NGR 7815; and NGR 7818 or NGR 7808; or C.I.

Identify and discuss evolving trends in advanced research design and methods as they apply to the development of nursing research programs.

Odd Spring, Even Spring

College of Nursing - Department of Nursing

NGR 7815 - Qualitative Methods in Nursing Research and Healthcare I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Knowledge of qualitative research designs and methods for studying nursing and health-related phenomena. Course may be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7817 - Quantitative Methods for Nursing and Healthcare I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7807 or C.I.

Designing quantitative studies and related statistical analysis; maximizing statistical power; ethical issues related to nursing research. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7818 - Quantitative Methods for Nursing and Healthcare II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7817 Quant Methods I or its equivalent or C.I.

Advanced research designs; multivariate and biostatistical data analysis in nursing and health related research. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 7820 - Innovative Technologies in Healthcare

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Application of innovative technologies in healthcare to research, teaching and practice. Legal, ethical and cultural issues related to technology transfer. May be used in the degree program a maximum of 2 times.

Summer

College of Nursing - Department of Nursing

NGR 7823 - Psychometrics and Measurement for Nursing Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7817, NGR 7815, or C.I.

Developing, testing and applying measurement theory in physiological and psycho social research analysis of psychometric properties of instruments and methods appropriate to theoretical perspectives and scientific rigor. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7827 - Concepts, Measurement, and Data Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Doctor of Nursing Practice program, NGR 6813 or equivalent, C.I.

Identification, analysis, and measurement of concepts; analysis and management of clinical data. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 7855C - Evidence-Based Practice Development for DNP

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Nursing Practice, Executive Doctor of Nursing Practice track or C.I.

Critique and synthesis of evidence for practice related questions. Includes analysis of the context where evidence will be applied. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Nursing - Department of Nursing

NGR 7892 - Healthcare Systems and Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Underpinnings of healthcare policy; healthcare policy formation and change agency; influences on healthcare systems; related analysis and research. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 7911C - Doctoral Project I**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Doctoral standing in the College of Nursing or C.I.

Identification of a practice-based problem, integration of existing evidence to propose a project to address the problem. May be used in the degree program a maximum of 2 times.

Fall

College of Nursing - Department of Nursing

NGR 7912C - Doctoral Project 2**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): NGR 7911C - Doctoral Project I, Doctoral standing in the College of Nursing or C.I.

Implementation of a DNP Committee approved practice based project to address a health care problem. May be used in the degree program a maximum of 2 times.

Spring

College of Nursing - Department of Nursing

NGR 7913 - Doctoral Project 3**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7912C - Doctoral Project 2, Doctoral standing in the College of Nursing or C.I.

Completion of implementation, analysis of data, final paper approval and public presentation of DNP project.

Fall, Spring, Summer

College of Nursing - Department of Nursing

NGR 7916 - Research Grants Process and Proposal Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing or C.I.

Grants process include writing elements of research proposal for HHH R-series applications and strategies for successful proposal preparation. May be used in the degree program a maximum of 2 times.

Occasional

College of Nursing - Department of Nursing

NGR 7919 - Doctoral Research

College of Nursing

NGR 7932 - Nursing Research Grants Process and Proposal Writing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

NGR 7916. The second of a Nursing two-course series on development and funding of programs of research; focuses on refinement of student research trajectories and grantsmanship for small research grant funding.

Spring

College of Nursing - All

NGR 7939C - Special Topics

College of Nursing

NGR 7942L - DNP Professional Practice Immersion

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Doctoral standing in the College of Nursing or C.I. Sponsored student immersion in a professional practice setting to promote advanced nursing leadership needs assessment, evaluation of public policy and design of care delivery models.

Fall, Spring, Summer

College of Nursing - All

NGR 7948L - Doctor of Nursing Practice Residency

VAR Credit Hours

Class Hours: VAR

Lab and Field Work Hours: VAR

Contact Hours: VAR

Prerequisite(s): NGR 7065; NGR 7748L.

Clinical management of clients with complex health maintenance, health promotion and illness management needs focusing on a continuum of care within health care systems or organizations. There is a 6 hour requirement.

Spring, Summer

College of Nursing - Department of Nursing

NGR 7952 - Scientific Writing for Nurses and Healthcare Professionals**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Graduate Nursing or Healthcare related discipline. Identify, discuss, and practice effective scientific writing elements as they apply to nursing and healthcare related disciplines; prepare a scientific manuscript for publication.

Fall

College of Nursing - All

NGR 7974 - Doctor of Nursing Practice Project**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): NGR 7176; NGR 7673, NGR 7115; NGR 7817; NGR 7123; NGR 7892; NGR 6874.

Analyze health care needs, develop an evidence based intervention and evaluate outcomes for a specific population within an identified health care setting.

Even Spring, Odd Summer

College of Nursing - Department of Nursing

NGR 7976L - Executive DNP Residency**3 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

NGR 7911C, NGR 7912C. Implementation of the Executive DNP Project.

Fall, Spring, Summer

College of Nursing - All

Optical Science and Engineering

OSE 5041 - Introduction to Wave Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EEL 4440 or PHY 4424 or C.I.

Electromagnetic foundation of light waves as applied to reflection, diffraction, interference, polarization, coherence, and guided waves.

Occasional

College of Optics and Photonics - Department of Optics and Photonics

OSE 5115 - Interference and Diffraction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.

Interference of light, optical interferometry, Fraunhofer and Fresnel scalar diffraction, diffraction gratings, temporal coherence, spatial coherence, and partial coherence.

Fall, Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 5203 - Geometrical Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.

Fundamentals of Geometrical Optics, Geometrical Theory of Image Formation and Aberrations.

Fall, Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 5312 - Light Matter Interaction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Microscopic theory of absorption, dispersion, and refraction of materials; classical and quantum mechanical description of optical properties.

Fall, Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 5414 - Fundamentals of Optoelectronic Devices

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Operation, methods of fabrication, applications, and limitations of various optoelectronic devices including quantum well semiconductor devices.

Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 5525 - Laser Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Principles of laser amplification and oscillations; design of lasers; general characteristics of excitation systems.

Spring, Summer

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 5917 - Directed Research

College of Optics and Photonics

OSE 5937 - Special Topics

College of Optics and Photonics

OSE 6111 - Optical Wave Propagation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Optical propagation of light waves as applied to isotropic, anisotropic, and inhomogeneous media, guided waves and Gaussian beams.

Fall, Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6120 - Theoretical Foundations of Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Mathematical concepts used in Optics. Topics covered include linear algebra, orthogonal expansions of functions, Fourier transforms, ordinary differential equations, and partial differential equations.

Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6125 - Computational Photonics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, OSE 6111 or C.I.

Computational methods for photonic guided wave structures, periodic structures, and integrated photonic structures and devices.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6143 - Fiber Optics Communication System

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 6111 and OSE 6474 or C.I.

Use of fiber optics as a communication channel. Principles of fiber optics. Mode theory, transmitters, modulators, sensors detectors and demodulators.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6211 - Imaging and Optical Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admitted to a graduate program in Optics, Physics or Electrical Engineering, or C.I.
Linear systems theory of discrete and continuous one- and two-dimensional systems. Applications to optical polarization, pulse propagation, and image formation.
Fall, Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6234C - Applied Optics Laboratory

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Graduate standing and OSE 5203 or C.I.
Laboratory Techniques for observing optical phenomena and quantitative experimental study of geometrical optics, optical interferometry, diffraction, and image processing.
Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6242 - Infrared Systems

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): GS in Electrical Engineering, or GS in Optics and Photonics, or C.I.
This course provides the background, theory, and practice of how to design, analyze, and test high performance infrared imaging systems.
Odd Fall, Even Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6265 - Optical Systems Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing and OSE 5203 or C.I.
Design principles of lens and mirror optical systems; evaluation of designs using computer techniques.
Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6313 - Materials for Optical Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Course reviews attributes of optical materials, physical properties and structural origin to predict performance and limitations of optical materials devices and components in optical systems.

Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6314 - Optics of Low Dimensional Semiconductors**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 5312 or C.I.

Optical properties and semiconductor physics of low-dimensional systems (quantum wells, wires, and dots), nano-phonic devices, and future nano-optical concepts.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6315 - Liquid Crystal Materials and Devices**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Basic liquid crystal materials and their physical, optical, and electro-optic properties; photonic devices for amplitude and phase modulations.

Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6319 - Optical Waves and Materials**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Reviews Optics and material properties important for propagation and control of light. This is a review course in preparation for the Ph.D. Qualifying Exam.

Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6330 - Stimulated and Holographic Scattering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The study of those processes in Nonlinear Optics, which are characterized by propagation of light in the media with the size considerably larger than the wavelength.

Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6334C - Nonlinear Optics

3 Credit Hours

Class Hours: 2.5

Lab and Field Work Hours: 0.5

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 6111 or C.I.

Maxwell's equations in nonlinear media, frequency conversion techniques (SHG, SFG, OPO), stimulated scattering, phase conjugation, wave-guided optics, nonlinear crystals.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6335 - Nonlinear Guided Wave Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 6334C or C.I.

The physics and applications of nonlinear optical interactions in fibers and planar waveguides is discussed, including parametric processes, all-optical effects and solutions.

Even Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6347 - Quantum Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 5312 or C.I.

Semiclassical treatment of light/matter interactions (quantized atomic states plus Maxwell's equations). Density matrix theory, coherent optical transients, pulse propagation.

Even Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6349 - Applied Quantum Mechanics for Optics and Engineering

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Presents the elements of quantum mechanics that are essential for understanding many areas in modern optics and photonics.

Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6416 - Organic Photonics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing, C.I. The course reviews optic and electronic properties inorganic molecules and polymers that are critical for photonic and opto-electronic applications.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6421 - Integrated Photonics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, OSE 6111 or C.I.

Reviews working principle, system functionality and design and fabrication issues of semiconductor integrated photonic devices and circuits for optical telecommunication and interconnect applications.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6432 - Guided Waves and Optoelectronics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 6111 or OSE 5041 or C.I.

Principles of guided wave optics, electro-optics, acousto-optics and optoelectronics.

Spring, Summer

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6445 - Fundamentals of Ultrafast Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, and OSE 6111 or PHY 5346, and OSE 5525, or C.I.

Introductory concepts: Ultrafast Optical Signal Generation, Ultrafast Signal Detection, Ultrafast Optical Signal Transmission, and Ultrafast Optical Signal Processing.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6447 - Attosecond Optics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing, and OSE 6349 or PHY 5606, and OSE 6111 or PHY 5346 or OSE 5525, or C.I. Introduction of the forefront of attosecond optics research. Topics include the fundamental theories and latest journal publications.

Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6455C - Photonics Laboratory

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Graduate standing, and OSE 5414 and OSE 6474, or C.I.

Experimental study of photonic devices and systems including liquid crystal displays, fiber-optic sensors, laser diodes, electro optic modulation, acousto-optic modulation, lightwave detection, optical communications, and photonic signal processing.

Even Fall, Odd Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6474 - Fundamentals Optical Fiber Communications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing; OSE 6111, or C.I.

GS; OSE 6111, or C.I. Introduces key principles and analysis of optical communication systems. Emphasis on developing the ability to analyze and design digital, analog fiber-based systems and networks.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6526C - Laser Engineering Laboratory**3 Credit Hours**

Class Hours: 1

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Graduate standing and OSE 5525 or C.I.

Designing and device implementation of diode pumped solid-state lasers, nonlinear frequency conversion, Q-switching, mode locking, and pulse second harmonic generation.

Summer

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6527 - Fiber Lasers**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

GS and OSE 5525, and OSE 6432 or OSE 6474. This course combines an introduction to fiber lasers with detailed technical discussions based on reviews of recent progress and latest developments in fiber laser research.

Even Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6536 - Semiconductor Lasers**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and OSE 5414 or C.I.

Light-matter interaction, thermal physics and solid state physics to understand, analyze, and engineer semiconductor lasers with different active region dimensionalities.

Odd Spring, Even Spring

College of Optics and Photonics - Department of Optics and Photonics

OSE 6615L - Optoelectronic Device Fabrication Laboratory

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Graduate standing or C.I.

Design and micro-fabrication of semiconductor optoelectronics devices including passive waveguides, light emitting diodes (LEDs), laser diodes (LDs), photodetectors and electro-optic modulators.

Fall

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6650 - Optical Properties of Nanostructured Materials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing OSE 6111, OSE 5312, or C.I.

Theory and application of nanostructured optical materials: Effective medium theory, nanostructured surfaces, plasmon waveguides, nanophotonic circuits, metallic near-field lenses, collective modes in nanoparticle arrays, metamaterials.

Spring

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6820 - Flat Panel Displays

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Liquid crystal display, projection display, micro display, plasma display, light emitting diodes, organic light emitting display, and field emission display.

Occasional

College of Optics and Photonics - Department of College of Optics and Photonics

OSE 6908 - Special Topics

College of Optics and Photonics

OSE 6909 - Research Report

College of Optics and Photonics

OSE 6938 - Special Topics

College of Optics and Photonics

OSE 6938 - ST: Infrared Detectors

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Discusses major types of infrared detectors including thermal, photoconductors, photovoltaic, and photodiodes. Emphasis on modern staring-infrared-focal-plane design. Review of design and measurement of detector properties that contribute to detector sensitivity.

College of Optics and Photonics

Paralegal/Legal Assistant/Legal Administration

PLA 5587 - Current Issues in Cyberlaw

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Advanced examination and discussion of free speech, copyright, trademark, patent and privacy issues in the online environment through interactive class discussions, online discussions, postings, case study reviews, and legal research projects.

Occasional

College of Community Innovation and Education - Department of Legal Studies

PLA 5917 - Directed Research

College of Community Innovation and Education

PLA 6245 - Advanced Applied Negotiation and Conflict Resolution

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing. Students should have already completed either PLA 6247 Conflict Resolution Theory or PLA 6515 Understanding Human Behavior and Conflict prior to enrolling in this course. Course provides students ability to understand the negotiation process and become stronger negotiators. Students delve into real-world conflict situations with an eye toward resolution.

Odd Spring, Even Spring

College of Community Innovation and Education - Department of Legal Studies

PLA 6246 - Advanced Mediation and Conflict Resolution Practicum

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 1

Prerequisite(s):

Graduate Standing. Students should have already completed all other requirements of their program or be completing their degree in the same semester they are participating in the practicum.

The Advanced Mediation and Conflict Resolution Practicum allows students to gain real-world or simulated real-world experience to enhance their own mediation and conflict resolution skills by engaging in either a community mediation program, an externship, or a graduate level academic competition.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Community Innovation and Education - Department of Legal Studies

PLA 6247 - Conflict Resolution Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing.

This course is an exploration of various theories on conflict resolution and practice.

Odd Fall, Even Fall

College of Community Innovation and Education - Department of Legal Studies

PLA 6486 - Administrative Law

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

The study of administrative law and procedure on the federal, state and local levels.

Spring

College of Community Innovation and Education - Department of Legal Studies

PLA 6487 - Legal and Ethical Compliance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Critical compliance issues and the importance of responsible conduct of research including export control, conflict of interest, protection of animal/human subjects and research misconduct.

Occasional

College of Community Innovation and Education - Department of Legal Studies

PLA 6488 - Legal and Regulatory Framework

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Outline the various requirements governing research (OMB Circulars, Federal Acquisition Regulations and other federal state and local regulations).

Occasional

College of Community Innovation and Education - Department of Legal Studies

PLA 6515 - Understanding Human Behavior and Conflict

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Philosophy of Man and Society**PHM 5035 - Environmental Philosophy****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHI 3640, PHI 2630, graduate status or senior standing, or C.I.

This course will provide an in-depth examination of the major contemporary positions in environmental philosophy, including deep ecology, ecofeminism, and social ecology.

Occasional

College of Arts and Humanities - Department of Philosophy

PHM 5917 - Directed Research

College of Arts and Humanities

PHM 5937 - Special Topics

College of Arts and Humanities

Photography

PGY 5108C - Photography Theory and Practice

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 2

Prerequisite(s): Graduate Standing or C.I.

Focuses on the study and practice of theory and photography as contemporary art making through readings, discussions, lectures, demos, web-based resources, in-class exercises and projects.

Occasional

College of Arts and Humanities - School of Visual Arts and Design

PGY 5917 - Directed Research

College of Arts and Humanities

PGY 5937 - Special Topics

College of Arts and Humanities

Phys. Edu. Acts. (Gen): Perform. Centered, Land

PEO 5937 - Special Topics

Physical Education Theory

PET 5216 - Motivational Aspects of Coaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Assist students to understand and conceptually integrate mental and physical performance, mental rehearsal, motivation, effort, persistence, adherence and compliance, measurement and evaluation, and other related topics of interest.

Even Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 5355 - Exercise Physiology I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): Admission to Kinesiology MS or Exercise Physiology PhD or C.I.

Provides an in-depth understanding of systems physiology with an emphasis on responses to various exercise intensities and modalities, and homeostatic control.

Odd Fall, Even Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 5495 - Critical Issues: Ethics in Coaching and Sport

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Specializes in coaching and sport leadership in self-evaluating, examining, and developing philosophy, values, and moral reasoning skills.

Even Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 5766 - Advanced Coaching Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): C.I.
Advanced study of theories and methods of coaching for optimum sports performance.
Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 5917 - Directed Research

College of Community Innovation and Education

PET 5937 - Special Topics

College of Health Professions and Sciences

PET 6096 - Youth Physical and Athletic Development

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Graduate standing or C.I. This class will introduce concepts associated with sport and physical activity development in youth athletes. A multi-factorial, systematic approach to the development process, including discussion of key factors, such as physical literacy, talent identification, specialization, etc. will be presented. Students will also become familiar with the theory and practice of strength and conditioning for children and young athletes.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6217 - Peak Performance in Sports

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or C.I.
An in-depth study of mental and physical performance, including mental rehearsal, motivation, effort, and persistence.
Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6335 - Functional Anatomy and Kinesiology

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Admission to the Kinesiology MS or Education PhD - Exercise Physiology track or C.I.
Overview of functional anatomy and fundamental movements from a biomechanical perspective.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6347 - Advanced Coaching Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Stimulate philosophic thinking and foster a spirit of confidence in the coaching profession by showing coaches various methods they can use to teach their athletes.

Odd Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6357C - Environmental Perturbation and Human Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

A study of physiological adaptation resulting from prescribed physical activity programs.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6363 - Dietary and Nutritional Supplementation for Athletic Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An in-depth study of the efficacy of dietary and nutritional supplements used to enhance athletic performance and improve activities of daily living.

Even Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6366 - Exercise, Nutrition and Weight Control

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explores the interrelationship between nutrition, energy metabolism and exercise performance.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6367 - Bioenergetics of Human Movement and Performance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or C.I.

Analysis of substrate metabolism at rest, during acute exercise and following exercise training.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6372 - Physical Activity and Nutritional Epidemiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or Education PhD-Exercise Physiology track or C.I.

Overview of the epidemiology of physical activity, sedentary behavior and nutrition and the interaction of physical activity and nutrition with disease from a global and cultural perspective.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6376 - Sport Nutrition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Study of the proper nutrition for training, the role of macro and micronutrients on the physiological processes of the body, and the importance of nutrient timing.

Even Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6381 - Physiology of Neuromuscular Mechanisms

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Human body morphology and function critical in producing motion, strength, power, and endurance.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6388 - Cardiovascular Physiology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Anatomy and Physiology or equivalent.

Operation of the cardiovascular system in vivo.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6389 - Exercise Physiology II**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): Admission to Kinesiology MS or Exercise Physiology PhD or C.I.

An in-depth study of adaptations of various physiological systems to exercise training and the effects of environmental factors on physiological systems and performance.

Odd Spring, Even Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6391 - Training and Conditioning Techniques for Coaches**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PET 5355.

Knowledge and application of training and conditioning as it relates to the improvement of physical athletic performance and fitness.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6395 - Program Design in Strength and Conditioning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

An in-depth study of various types of training, including insights on developing athletes' strength, power, anaerobic conditioning, endurance, agility, and speed.

Odd Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6515 - Assessment and Evaluation in Kinesiology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or C.I.

Techniques of assessment and evaluation of human performance and their applications to kinesiology.

Material and Supply Fee: \$47.00 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6521 - Exercise Physiology Instrumentation**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Instrumentation management and assessment protocols related to select exercise physiological parameters: anthropometric, bioenergetic, blood lactate, joint flexibility, and muscle rheology, strength and fatigue curve measurements.

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6690 - Exercise Prescription for Special Populations**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

Designed to provide the student the basic understanding of exercise testing and prescription as it pertains to special populations.

Odd Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6909 - Research Report

College of Health Professions and Sciences

PET 6910 - Problem Analysis - Review of Literature

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS and C.I.

Comprehensive review of literature related to a selected topic in kinesiology; identification, analysis, and evaluation of developments, issues, and research problems. May be repeated for credit.

Every Semester

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 6918 - Directed Research

College of Health Professions and Sciences

PET 6938 - Special Topics

College of Health Professions and Sciences

PET 6946 - Practicum, Clinical Practice

3-6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 8-16

Contact Hours: 8-16

Prerequisite(s): Admission to Kinesiology MS and C.I.

Field experience in a kinesiology-related organization, association or business. May be repeated for credit.

Every Semester

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 7365 - Cardiovascular Dynamics During Exercise

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

An examination of the cardiovascular regulatory mechanism responsible for the adjustment to acute and chronic exercise.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 7368 - Regulation of Metabolism During Exercise

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

An examination of the metabolic regulatory mechanism responsible for the adjustment to acute and chronic exercise.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 7387 - Exercise Endocrinology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the program or C.I.

An in-depth study of the neuroendocrine system and the hormonal responses to exercise.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PET 7919 - Research

College of Health Professions and Sciences

Physical Therapy

PHT 5003 - Foundations of Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to the Physical Therapy program.

Introduction to the profession of physical therapy.

Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5125 - Clinical Kinesiology

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Corequisite(s): PHT 5125L.

Investigates the mechanical aspects of human movement, joint mechanics of the upper and lower extremity, the vertebral column and tissue mechanics of relevant human tissues.

Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5125L - Clinical Kinesiology Lab

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Corequisite(s): PHT 5125.

Graduate level study of human musculoskeletal movement with an emphasis on joint mechanics and clinical applications.

Material and Supply Fee: \$35.00 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5218C - Therapeutic Modalities in Rehabilitation

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to the Doctor of Physical Therapy Program.

Theories of physical agents, heat, light, cold, water, sound, and massage; problem solving rationale and selection of interventions for inflammation, pain, edema, and weakness.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5240 - Physical Assessment

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Physical Assessment Lab. Extensive theory and practice in the examination of the patient.

Incorporate a systems approach, utilizing screening, and patient problem solving.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5240L - Physical Assessment Lab

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 4

Contact Hours: 4

Corequisite(s): Physical Assessment.

Lab course emphasizing the examinations required to perform an evaluation of physical therapy patient.

Material and Supply Fee: \$45.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5241 - Therapeutic Exercises I**2 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Corequisite(s): Therapeutic Exercises I Lab.

Theory of developing, implementing, and evaluating a therapeutic exercise program for patients with musculoskeletal dysfunction.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5241L - Therapeutic Exercise Lab I**2 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 4

Contact Hours: 4

Prerequisite(s): Therapeutic Exercise I.

Lab course emphasizing therapeutic exercise skills for the treatment of patients with musculoskeletal dysfunction.

Material and Supply Fee: \$20.00 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5260 - Patient Care Skills**2 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Corequisite(s): Patient Care Skills Lab.

Affective, cognitive, and psychomotor skills, regarding patient care. Basic skills of patient care, transfers, mobility skills, draping, gait training.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5260L - Patient Care Skills Lab

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 4

Contact Hours: 4

Corequisite(s): PHT 5260

Skills of patient care, transfers, mobility skills.

Material and Supply Fee: \$30.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5718 - Neurological Physical Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): PHT 5718L

Analysis of selected neuromotor theories and their clinical applications. Examinations and interventions for the evaluation and treatment of neurological patients presented.

Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5718L - Neurological Physical Therapy Lab

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Corequisite(s): Neurological Physical Therapy.

Lab Course emphasizing the clinical application of selected neuromotor theories.

Material and Supply Fee: \$30.00 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 5917 - Directed Research

College of Health Professions and Sciences

PHT 5937 - Special Topics

College of Health Professions and Sciences

PHT 5937L - Special Topics

College of Health Professions and Sciences

PHT 6070C - Radiology/Imaging for Physical Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to DPT program.

A diagnostic imaging course focusing on clinical implications in rehabilitation. The focus will be on patients with neurological and orthopedic disorders.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6115C - Gross Anatomy/Neuroscience I

6 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Admission to DPT program.

Study of human anatomy via lecture and cadaver dissection emphasizing upper and lower extremity, musculoskeletal, peripheral vascular and peripheral nervous systems, thoracic and abdominopelvic cavities.

Material and Supply Fee: \$70.00 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6118C - Gross Anatomy/Neuroscience II

6 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 6

Contact Hours: 9

Prerequisite(s): Gross Anatomy/Neuroscience I.

Comprehensive study of anatomy and physiology of the nervous system to develop DPT students' improved treatment strategies for patients with neurological problems.

Material and Supply Fee: \$70.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6119L - Seminar in Anatomical Sciences Techniques

3 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 6

Prerequisite(s): Admission to the Anatomical Sciences Graduate Certificate.

Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6153 - Physiologic Assessment in Physical Therapy Practice

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s):

PHT 6156C.

Course provides clinical applications and laboratory demonstrations of human musculoskeletal, neurological, cardiovascular, hemopoietic, respiratory, gastrointestinal, and renal systems.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6156 - Applied Human Physiology for Health Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Physical Therapy program.

Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

Occasional

College of Community Innovation and Education - School of Kinesiology and Physical Therapy

PHT 6156C - Applied Human Physiology for Health Sciences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Physical Therapy program.

Course provides in-depth study of human cardiovascular, hemopoietic, respiratory, gastrointestinal, renal and reproductive systems with emphasis on mechanisms responsible for maintaining homeostasis.

Material and Supply Fee: \$25.00 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6219C - Pain Mechanisms and Treatment in Rehabilitation

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): Admission to Doctor of Physical Therapy program.

This course will cover current concepts in pain science, including theoretical models for the basis of pain and the multidimensional nature of pain.

Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6242 - Orthopedic Physical Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Corequisite(s): PHT 6242L

Examination and interventions for the evaluation and treatment of specific orthopedic cases and injuries presented.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6242L - Orthopedic Physical Therapy Lab

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Corequisite(s): Orthopedic Physical Therapy.

Lab course emphasizing the examinations and interventions for the evaluation and treatment of specific orthopedic cases and injuries.

Material and Supply Fee: \$40.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6245 - Therapeutic Exercise II

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): PHT 5218 and PHT 5218L Corequisite(s): PHT 6245L

Exploration of the various therapeutic exercise modalities, and their application to the rehabilitation course of treatment.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6245L - Therapeutic Exercise II Lab

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): Therapeutic Exercise I and Lab Corequisite(s): Therapeutic Exercise II.

Lab course emphasizing the use of the various therapeutic exercise modalities.

Material and Supply Fee: \$15.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6306 - Pathology in Rehabilitation**2 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to Doctor of Physical Therapy program.

Organized seminars on the pathophysiology and clinical manifestations and treatments of various medical conditions as they relate to medical management in rehabilitation.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6322C - Pediatric Physical Therapy**3 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to DPT program.

Study of the normal neurodevelopmental sequences for pediatric clinical assessment and physical therapy intervention provided to clients with abnormal diseases and dysfunction.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6356 - Pharmacology in Rehabilitation**2 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to the Doctor of Physical Therapy program.

Mechanisms of drug action, dose-response relations, pharmacokinetics, drug delivery systems, drug metabolism, toxicity of pharmacological agents, and drug interaction as it relates to rehabilitation.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6374C - Geriatric Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to the Doctor of Physical Therapy program.

This course provides an introduction to physiological aging and physical therapy management of the older adult. Includes examination, evaluation, and development of intervention programs focusing on exercise, prevention, education, and modification programs.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6381C - Cardiopulmonary Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to DPT program.

Examinations and interventions for the management of chronic and acute cardiopulmonary problems. Teaching patient strategies for preventing/managing dysfunction.

Material and Supply Fee: \$15.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6510 - Administration of Anatomical Sciences Laboratory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate or professional level gross human cadaver dissection course.

Developing administrative skills for educators in the anatomical sciences with an emphasis on laboratory safety, health concerns, and cadaver procurement and storage to prepare educators for graduate and professional programs.

Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6521 - Management of Physical Therapy Services

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to DPT program.

Planning, organizing, delivering and evaluating physical therapy services within a health care system, including quality

management, third party payers, DRG's and legislative impact.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6606 - Research Methods in Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to DPT program.

Methods of research applied to clinical environment of physical therapy. Coverage of the language, logic, design and analysis of clinical research.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6618 - Research Applications in Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Research methods in Physical Therapy - PHT 6606.

To evaluate research studies, focus on evidence-based practice. SPSS and principles of epidemiology will be introduced.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6716C - Advanced Orthopedic Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Orthopedic Physical Therapy Corequisite(s): Advanced Orthopedic Physical Therapy Lab.

Specific rehabilitative protocols regarding particular orthopedic injuries and illnesses are presented. Focus on the previous course work in therapeutic modalities, anatomy, physiology, and therapeutic exercises incorporated.

Material and Supply Fee: \$25.00 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6719 - Advanced Neurological Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): PHT 5718 Corequisite(s): PHT 6719L.

Examinations and interventions for the evaluation and treatment of the neurological patient. Emphasis on patients with spinal cord injury and neurological diseases.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6719L - Advanced Neurological Physical Therapy Lab

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): PHT 5718L Corequisite(s): PHT 6719.

Course Emphasizing examinations and interventions for the evaluation and treatment of patients with neurological disease. Emphasis on patients with spinal cord injury and neurological disease.

Material and Supply Fee: \$25.00 *Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6720 - Integumentary Physical Therapy

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Physical Therapy program.

Instruction in contemporary issues and specialized care of the integumentary system provided by physical therapists.

Material and Supply Fee: \$45.00 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6805C - Clinical Education I

4 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 20

Contact Hours: 1

Prerequisite(s): Admission to DPT program.

Collaborative course where students meet to analyze, synthesize and discuss current professional, ethical and moral decision-making in physical therapy setting, culminating in a six-week clinical internship.

Material and Supply Fee: \$12.50 *Odd Fall, Even Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6909 - Research Report

College of Health Professions and Sciences

PHT 6918 - Directed Research

College of Health Professions and Sciences

PHT 6938 - ST: Administration of Anatomical Sciences Laboratory

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): PHT 6115C.

The course focuses on developing administrative skills as an educator in the anatomical sciences emphasizing laboratory safety, health concerns, and cadaver procurement and storage.

Summer'

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6938 - ST: Seminar in Anatomical Sciences Techniques

2 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): PHT 6115C.

Development of skills as an anatomist with an emphasis on integrating a diverse repertoire of scientific technique.

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 6958 - Study Abroad

PHT 7021 - Professional Practice in Physical Therapy

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Foundations of Physical Therapy.

Professional development, ethics and strategies to address cultural diversity issues, communication skills and different styles of learning to prepare for clinical practice as a doctoring healthcare professional in physical therapy.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7134C - Physical Therapy Integration

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1
Contact Hours: 3

Prerequisite(s): PHT 7722C

This course integrates foundational knowledge of physiology and pathology to develop physical therapy skills for examinations and interventions of medically complex patients and special populations.

Material and Supply Fee: \$15.00 *Spring*

College of Health Professions and Sciences - Department of Health Sciences

PHT 7329C - Advanced Pediatric Physical Therapy

1 Credit Hours

Class Hours: 1
Lab and Field Work Hours: 1
Contact Hours: 2

Prerequisite(s): Admission to DPT program.

Course provides an advanced look into abnormal motor development, neurological and orthopedic diseases/conditions, interventions, examinations and other aspects of the patient/client management model for the pediatric population.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7521 - Management of Physical Therapy Services II

2 Credit Hours

Class Hours: 2
Lab and Field Work Hours: 0
Contact Hours: 2

Prerequisite(s): PHT 6521.

Application of management, finance and economic health-related principles for strategy development, implementation and assessment for the physical therapy manager.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7702C - Advanced Orthotics and Prosthetics

2 Credit Hours

Class Hours: 1
Lab and Field Work Hours: 1
Contact Hours: 2

Prerequisite(s): PHT 6245, PHT 6245L.

Advanced considerations for the amputee patient with regards to rehabilitation. Students will review the primary focal issues surrounding rehabilitation after an amputation and how prosthetics may assist with functional return.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7721C - Integrations in Orthopedic Physical Therapy

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): PHT 6716C.

Designed to correlate all previous coursework in curriculum in study presentations. Advanced evaluation procedures included. Advanced knowledge of differential diagnosis in the orthopedic patient covered.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7722C - Integrative Clinical Practice

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): Admission to DPT program.

This course emphasizes the synthesis of clinical and differential diagnostic skills required of a physical therapist in order to enter clinical practice.

Material and Supply Fee: \$15.00 *Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7730C - Primary Care for the Physical Therapist

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): Admission to DPT program.

Students learn higher level diagnostic screening skills to make clinical decisions. The course takes a system approach including system review, clinical signs and symptoms and case studies.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7742C - Acute Care Physical Therapy

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): PHT 6306

Considerations and evidence-based evaluation, treatment, and management of patients in various settings within acute care.

Odd Fall, Even Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7764C - Advanced Neurological Treatment

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): PHT 6719, PHT 6719L, PHT 7772C.

This course can provide third year students with the opportunity to further explore evidence-based neurological intervention.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7772C - Advanced Neurological Physical Therapy II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): PHT 6719 and PHT 6719L.

Problem-based learning provides a team based interdisciplinary problem-solving environment where students devise solutions and approaches to problems encountered by physical therapists treating patients with neurological problems.

Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7778C - Advanced Manual Therapy

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): PHT 6716C, PHT 7721C.

Concepts associated with advanced manipulative interventions in the context of physical therapy care. Indications and contra-indications will be reviewed and applied in a clinical context.

Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7779C - Sports Physical Therapy

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): Admission to the Doctor of Physical Therapy program.
Considerations and evidence-based evaluation, treatment, and management of patients with sport-related injuries.
Spring

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7780C - Advanced Geriatric Physical Therapy

1 Credit Hours

Class Hours: 1
Lab and Field Work Hours: 1
Contact Hours: 2

Prerequisite(s): PHT 6374C.
Advanced topics in geriatric rehabilitation.
Fall

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7822C - Clinical Education II

6 Credit Hours

Class Hours: 1
Lab and Field Work Hours: 40
Contact Hours: 1

Prerequisite(s): Admission to the Doctor of Physical Therapy program.
Collaborative course for third year students to meet, analyze, synthesize and discuss current ethical, legal, and moral decision-making in physical therapy clinical setting culminating in internship.
Material and Supply Fee: \$12.50 *Odd Summer, Even Summer*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7823C - Clinical Education III

4 Credit Hours

Class Hours: 1
Lab and Field Work Hours: 20
Contact Hours: 1

Prerequisite(s): PHT 7822C.
Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, 8-week clinical internship in physical therapy practice setting.
Material and Supply Fee: \$12.50 *Odd Fall, Even Fall*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7829C - Clinical Education IV

4 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 20

Contact Hours: 1

Prerequisite(s): PHT 7823C.

Clinical education course to synthesize ethical, legal, and professional contemporary practice with evidence-based intervention, culminating in a full-time, terminal 8-week clinical internship in physical therapy practice setting prior to graduation.

Material and Supply Fee: \$12.50 *Odd Spring, Even Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7900 - Capstone Project in Physical Therapy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to DPT program.

Directed research culminating in a substantive paper related to the art or science of Physical Therapy.

Material and Supply Fee: \$13.09 *Spring*

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

PHT 7999 - Physical Therapy Residency

2 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Beyond the earned Doctor of Physical Therapy degree and C.I. Instruction for post-professional physical therapy residency program fostering advanced clinical practice as outlined by the American Board of Physical Therapy Specialties.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

Physics

PHY 5346 - Electrodynamics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 4324, and graduate status or senior standing or C.I.

Special Relativity, Charges in Electromagnetic Fields, Electromagnetic Field Equations, Constant Fields, Electromagnetic Waves, Propagation of Light, Fields of Moving Charges, and Radiation of Electromagnetic Waves.

Odd Fall, Even Fall

College of Sciences - Department of Physics

PHY 5524 - Statistical Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 3513, STA 3032, and graduate status or senior standing or C.I.

A study of physical concepts and methods appropriate for the description of systems involving many particles. Ensemble theory, partition functions. Maxwell Boltzmann, Bose-Einstein, Fermi-Dirac statistics.

Spring

College of Sciences - Department of Physics

PHY 5606 - Quantum Mechanics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 4605, and graduate status or senior standing or C.I.

Basic postulates of quantum mechanics, operators, eigenvalues, parity, potential wells, harmonic oscillator, time dependent and time independent Schrodinger equation, matrix formulation, and time independent perturbation theory.

Fall

College of Sciences - Department of Physics

PHY 5715 - Physical Basis of Life

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Molecular and physical principles of origin of life, physical and chemical interpretation of life processes.

Fall

College of Sciences - Department of Physics

PHY 5817L - Building Physics Apparatus

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing and C.I.

Hands-on shop course. Focus will be machine shop practice with possible extension to printed circuit boards and glass work.

Material and Supply Fee: \$45

College of Sciences - Department of Physics

PHY 5917 - Directed Research

College of Sciences

PHY 5933 - Selected topics in biophysics of macromolecules

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 3101, CHM 2046, and graduate status or senior standing or C.I.

Physical concepts and techniques used in the spectroscopic study of dynamic structure and function of biological macromolecules such as proteins; Connections with other complex systems. May be repeated for credit.

Occasional

College of Sciences - Department of Physics

PHY 5937 - Special Topics

College of Sciences

PHY 6246 - Classical Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Variational principles. Lagrange, Hamiltonian, and Poisson bracket formulations of mechanics. Hamilton's principle of least action. Hamilton-Jacobi theory. Perturbation theory. Continuous systems. Chaos.

Occasional

College of Sciences - Department of Physics

PHY 6347 - Electrodynamics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 5346, or C.I.

Electrostatics of Conductors, Electrostatics of Dielectrics, Steady Current, Static Magnetic Field, Superconductivity,

Quasi-static Electromagnetic Field, Electromagnetic Wave Equations, and Propagation of Electromagnetic Waves.
Odd Spring, Even Spring

College of Sciences - Department of Physics

PHY 6600C - Theory and Computations of Molecular Wavefunctions

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Undergraduate Quantum Mechanics or Physical Chemistry or C.I.

Approximate method of solving electronic Schrodinger equation for molecular systems: Hartree-Fock and semiempirical methods, basis sets, multireference wavefunction theory methods, potential surfaces, and electronic transitions.

Even Fall

College of Sciences - Department of Physics

PHY 6624 - Quantum Mechanics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 5606 or C.I.

Time dependent perturbation theory, exchange symmetry, Dirac Equation, second quantization, and scattering theory.

Spring

College of Sciences - Department of Physics

PHY 6667 - Quantum Field Theory I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 6347 and PHY 6624 or C.I.

Second quantization and fields, relativistic equations, path integral quantization, gauge fields.

College of Sciences - Department of Physics

PHY 6909 - Research Report

College of Sciences

PHY 6918 - Directed Research

College of Sciences

PHY 6938 - Special Topics

College of Sciences

PHY 6949 - Cooperative Education in Physics

College of Sciences

PHY 7669 - Quantum Field Theory II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 6667 or C.I.

Regularization, renormalization, spontaneous symmetry breaking, unification, topological objects, supersymmetry.

College of Sciences - Department of Physics

Physics (Continued)

PHZ 5156 - Computational Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHZ 3151 or C.I.

Computational methods applied to the solution of problems in many branches of physics. May be repeated for credit.

Fall

College of Sciences - Department of Physics

PHZ 5304 - Nuclear and Particle Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 4604 or equivalent, and graduate status or senior standing or C.I.

Particles and nuclei, symmetries and conservation laws, interactions, models.

Occasional

College of Sciences - Department of Physics

PHZ 5405 - Condensed Matter Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 4604, PHY 3101, and graduate status or senior standing or C.I.

Crystal lattice cell structure, phonons, free electron model, band theory of solids, Fermi surface, solid state applications, and polymers.

Occasional

College of Sciences - Department of Physics

PHZ 5432 - Introduction to Soft Condensed Matter Physics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 3513 or C.I.

Introduction to the physics of polymers, colloids, surfactants using basic tools of statistical mechanics.

Occasional

College of Sciences - Department of Physics

PHZ 5505 - Plasma Physics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 4324, and graduate status or senior standing or C.I.

Introduction to theory and experimental basis of both weakly and highly ionized plasmas. Instabilities, plasma waves, nonlinear effects, controlled thermonuclear fusion.

Occasional

College of Sciences - Department of Physics

PHZ 5625 - General Relativity**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Introduction to Einstein's theory of gravitation.

Odd Spring

College of Sciences - Department of Physics

PHZ 5917 - Directed Research

College of Sciences

PHZ 5937 - Special Topics

College of Sciences

PHZ 6234 - Atomic Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 6624 or OSE 6347.

Brief review of spectroscopy, photoionization, inner shell processes, Auger effect, atom-atom collisions, electron-atom collisions, spin polarization.

College of Sciences - Department of Physics

PHZ 6420 - First Principles Computational Methods in Condensed Matter Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 5606 - Quantum Mechanics I.

Introduction to density functional theory and first principles computational methods used in modern condensed matter physics with hand-on sessions using computers.

Occasional

College of Sciences - Department of Physics

PHZ 6426 - Condensed Matter Physics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHY 5606, and either PHY 6624 or OSE 6347.

Quantum theory of crystalline solids: crystals, electronic band structure, metals, insulators, semiconductors, electron interactions in solids, lattice dynamics.

Occasional

College of Sciences - Department of Physics

PHZ 6428 - Condensed Matter Physics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHZ 6426.

Many-body theory: Green's functions, Feynman diagrams, screening in the electron gas, linear response theory, magnetism, conductivity, electron-phonon interactions, superconductivity, superfluids.

Occasional

College of Sciences - Department of Physics

PHZ 6439 - Interfacial Physics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing and PHY 5606, or C.I. A conceptual understanding of fundamental electronic and structural characteristics relevant to surfaces and the experimental methodologies used to investigate them.

Odd Fall

College of Sciences - Department of Physics

PHZ 6909 - Research Report

College of Sciences

PHZ 6918 - Directed Research

College of Sciences

PHZ 6938 - Special Topics

College of Sciences

Political Science

POS 5917 - Directed Research

College of Sciences

POS 5937 - Special Topics

College of Sciences

POS 6045 - Seminar in American National Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Examines major aspects of the American system, including mass behavior, public opinion, and political institutions.

Fall

College of Sciences - Department of Political Science

POS 6079 - The Politics of Race, Ethnicity, Gender, and Class in the United States

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate program or C.I.

Examines the political consequences of race, ethnicity, gender, and class in the US.

Even Spring

College of Sciences - School of Politics, Security and International Affairs

POS 6174 - Seminar in Southern Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Will provide an overview of the political and social changes that have occurred in the American South in the post-World War II period.

Occasional

College of Sciences - Department of Political Science

POS 6207 - Political Behavior

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status.

A review of theory and findings in regard to mass political behavior, including participation, voter choice, public opinion, collective action, and communication.

Occasional

College of Sciences - Department of Political Science

POS 6403 - Teaching American Political Institutions

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Post bac or graduate status.

Seminar will equip students with essential knowledge of American politics and explore technologies for transferal of this knowledge into the secondary and college level classroom.

Occasional

College of Sciences - Department of Political Science

POS 6415 - The American Presidency**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Presidency research with attention to historical, personal, institutional, and political development.

Occasional

College of Sciences - Department of Political Science

POS 6427 - Congress and the Legislative Process**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examination of Congress as a dynamic institution with emphasis on general legislative procedures, legislator recruitment, institutional rules, legislative norms, and the committee system.

Even Fall

College of Sciences - Department of Political Science

POS 6639 - Seminar in Public Law and Judicial Politics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate or post bac status.

This course is intended to acquaint students broadly with the scholarly literature in the subfield of Public law. It surveys the meaning of the field and its development, using books and articles to illustrate the major research and teaching concentrations in the subfield.

Occasional

College of Sciences - Department of Political Science

POS 6686 - National Security Law

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Domestic and international law affecting national security, with emphasis on branches' competing legal claims of authority and law affecting modern security challenges.

Occasional

College of Sciences - Department of Political Science

POS 6729 - Political Network Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or consent of instructor.

Introduces concepts, analytic metrics and methods, and empirical applications in political network analysis.

Occasional

College of Sciences - School of Politics, Security and International Affairs

POS 6736 - Conduct of Political Inquiry

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to graduate program or C.I.

Research design and quantitative and qualitative analysis in political science.

Fall

College of Sciences - Department of Political Science

POS 6743 - Geographic Tools for Political Science Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Provides an introduction to the theoretical assumptions, analytical possibilities and application of geographic tools of analysis for political science research.

Odd Spring

College of Sciences - Department of Political Science

POS 6746 - Quantitative Methods in Political Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Methods of model building and research design, including conceptualization and measurement of political variables; techniques of data collection and quantitative analysis and computer usage.

Occasional

College of Sciences - Department of Political Science

POS 6747 - Advanced Topics in Quantitative Political Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the graduate program.

Successful completion of POS 6746, or equivalent, or C.I. Advanced topics in quantitative political analysis, including OLS variants, regression problems, time series, limited dependent variables and SPSS.

Occasional

College of Sciences - Department of Political Science

POS 6757 - Survey Design for Political Science Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Survey methods and survey design, including survey experiment techniques, used in political science.

Occasional

College of Sciences - School of Politics, Security and International Affairs

POS 6909 - Research Report

College of Sciences

POS 6918 - Directed Research

College of Sciences

POS 6938 - Special Topics/Political Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course title covers all political analysis special topics courses which are not listed in the catalog with a course number. May be repeated for credit only when course content is different.

Occasional

College of Sciences - Department of Political Science

POS 6949 - Cooperative Education in Political Science

College of Sciences

POS 7267 - Professional Development: The Practice of Security Studies

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Security Studies Ph.D. program or C.I.

Addresses ethics in security studies and prepares students for careers in the security sector, including topics such as ethics in decision making.

Even Spring

College of Sciences - Department of Political Science

POS 7707 - Advanced Qualitative Methods in Political Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Advanced qualitative methods employed in political science research, including case studies, the logic of comparison, and archival and interview-based research.

Odd Spring

College of Sciences - Department of Political Science

POS 7745 - Advanced Quantitative Methods in Political Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Security Studies Ph.D. or C.I.

Survey of advanced quantitative methods used in political science research, including problems in regression analysis and nonlinear models.

Even Spring

College of Sciences - Department of Political Science

POS 7930 - Professional Development: Academic Careers in Security Studies

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Security Studies Ph.D. program or C.I.

Prepares students for teaching, submission of articles to peer-reviewed journals, grant writing, ethics in the discipline, and other questions related to an academic career.

Process Biology (Cell/Molecular/etc.)

PCB 5025 - Molecular and Cellular Pharmacology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, PCB 3522.

The cellular and molecular events that lead to disease states and the molecular basis of agents that modulate these processes will be covered.

Spring

College of Medicine - Department of Molecular and Microbiology

PCB 5235 - Molecular Immunology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MCB 3020C or equivalent.

Fundamental functions of the human immune system, focusing on cellular and molecular aspects of the innate and adaptive immune response.

Fall

College of Medicine - Department of Molecular and Microbiology

PCB 5236 - Cancer Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 4524 and graduate standing.

Current knowledge and research on molecular mechanism of tumor development, tumor progression, metastasis and therapy of cancer.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 5238 - Immunobiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3233 , PCB 4280.

Advanced topics in immune system dysregulation with special emphasis on innate immunity.

Spring

College of Medicine - Department of Molecular and Microbiology

PCB 5265 - Stem Cell Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

Introduction to embryonic and adult stem cells, procedures to isolate them, principles and applications of stem cells in animal and human diseases.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 5275 - Signal Transduction Mechanics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3522 and PCB 4524.

A course emphasizing various signal transduction cascades used in mammalian cells to control growth and differentiation. Discussion of original research papers will occur.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 5326C - Ecosystems of Florida

5 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM In Conservation Biology, or C.I. Ecosystems of Florida will be discussed to include geography, geology, climate, energetics, nutrient cycling, community structure and conservation.

Material and Supply Fee: \$15.00 *Occasional*

College of Sciences - Department of Biology

PCB 5362C - Wetland Ecology and Biogeochemistry

4 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 4

Prerequisite(s): Graduate standing in the Department of Biology or C.I.

Examination of wetland ecosystems, laws and policy, current research, global biogeochemical cycles, and relevant field and laboratory techniques.

Even Spring

College of Sciences - Department of Biology

PCB 5416 - Sensory Ecology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

How and why animals acquire, process and use information from their environment, and how sensory systems influence evolutionary processes.

Odd Spring, Even Spring

College of Sciences - Department of Biology

PCB 5435C - Marine Ecology of Florida

4 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 6

Contact Hours: 8

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, PSM in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Survey of experimental methods used in the study of marine communities in central and southern Florida, combining field manipulation and readings from primary literature.

Odd Spring

College of Sciences - Department of Biology

PCB 5447 - Disease Ecology and Ecoimmunology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

A grade of B (3.0) or better in Genetics (PCB 3063 or equivalent) and Ecology (PCB 3044 or equivalent), or C.I., or graduate standing. Examination of how hosts, parasites and environment interact to shape organisms, populations and communities.

College of Sciences - Department of Biology

PCB 5469 - GIS for Biologists and Ecologists

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 6

Contact Hours: 3

Prerequisite(s): Graduate standing in the Dept. of Biology, or C.I.

Investigates how GIS is currently being used to better understand and address environment problems and to help manage and conserve natural resources.

Odd Fall, Even Fall

College of Sciences - Department of Biology

PCB 5527 - Genetic Engineering and Biotechnology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3522 and PCB 4524 or C.I.

Principles of Genetic Engineering/Biotechnology in Bacteria, Yeast, Viral, Mammalian, Non-mammalian systems, Plants, including human gene therapy, novel pharmaceuticals, recombinant proteins will be discussed in depth.

Fall

College of Medicine - Department of Molecular and Microbiology

PCB 5596 - Biomedical Informatics: Sequence Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3522 or equivalent or C.I.

Introduction of useful bioinformatics tools and resources on sequence analysis.

Fall

College of Medicine - Department of Molecular and Microbiology

PCB 5688 - Wildlife Genomics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate student in Biology MS or Conservation Biology PhD

Understanding of how Genomic methods are applied to problems in wildlife biology, with an emphasis on vertebrate animal species in terrestrial and marine ecosystems.

Odd Fall

College of Sciences - Department of Biology

PCB 5709C - Laboratory Virtual Simulations in Physiology

3 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 2

Contact Hours: 3

Corequisite(s): PCB 5834C

Advanced Human Physiology. Conduct experiments in physiology that enhance the ability to design, collect, analyze data and report results in a scientific manner.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 5815 - Molecular Aspects of Obesity, Diabetes and Metabolism

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 3522 or BCH 4053 or BSC 6432.

Biochemical, molecular and physiological aspects of obesity, diabetes and metabolic diseases and how scientific findings can be translated towards prevention and treatment.

Odd Spring

College of Medicine - Department of Molecular and Microbiology

PCB 5834C - Advanced Human Physiology

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): Graduate standing or C.I.

Designed to provide graduate students advanced knowledge of physiological processes at the cellular, molecular and system levels.

Fall

College of Medicine - Department of Molecular and Microbiology

PCB 5837 - Cellular and Molecular Neuroscience

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. An advanced and thorough course providing understanding of the cellular components and molecular signaling pathways involved in the nervous system function.

Spring

College of Medicine - Department of Molecular and Microbiology

PCB 5838 - Cellular and Molecular Basis of Brain Functions**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Designed to provide graduate students the concepts required to understand the physiological basis of brain functions at the molecular, cellular and system levels.

Fall

College of Medicine - Department of Molecular and Microbiology

PCB 5917 - Directed Research

College of Sciences

PCB 5935 - Population Genetics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I. Population genetics and the study of the various forces that result in evolutionary changes through time.

Even Fall

College of Sciences - Department of Biology

PCB 5937 - ST: Advanced Inferences in Conservation Biology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

Prerequisite(s): PCB 6466 or Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

An Introduction to fundamental concepts of processing high-dimensional data in an applied conservation biology context. The course includes lectures, discussions, and computer lab modules.

Spring

College of Sciences - Department of Biology

PCB 6041 - Ecological Modeling

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 6466, or C.I.

Mathematical models used in ecology and offers tools for process-based model development in ecology.

Even Spring

College of Sciences - Department of Biology

PCB 6042 - Conservation Biology Theory

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Graduate standing in Biology or C.I. Review and analysis of the literature of conservation biology.

College of Sciences - Department of Biology

PCB 6046 - Advanced Ecology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing in Biology, admission to Certificate in Conservation Biology, or C.I.

Population and community ecology with emphasis on growth, regulation, species interactions, succession, and community classification.

Occasional

College of Sciences - Department of Biology

PCB 6047 - Advances in Plant Ecological Research

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Current methodological and conceptual developments in plant ecological research. Examination of newly published and on-going research through presentations and group discussions. Graded S/U. May be used in the degree program a maximum of 2 times.

Occasional

College of Sciences - Department of Biology

PCB 6053C - Restoration Ecology

4 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 6

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I. Survey of the general ecological principles that guide restoration ecology: the process of assisting the recovery of degraded, damaged or destroyed ecosystems.

Material and Supply Fee: \$70.00 *Spring*

College of Sciences - Department of Biology

PCB 6095 - Professional Development in Biology I

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Methods in experimental design, research, and the ethics of animal research.

Occasional

College of Sciences - Department of Biology

PCB 6096 - Professional Development in Biology II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Preparation and presentation of research grants, scientific presentations, and scientific papers.

Occasional

College of Sciences - Department of Biology

PCB 6124 - Structure Bioinformatics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PCB 5596 or equivalent.

Focus on tools and resources in RNA and protein structure analyses.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 6328C - Landscape Ecology**4 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, PSM in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Influence of spatial heterogeneity on ecological processes. Emphasizes quantitative methods (e.g., GIS, remote sensing and modeling) to characterize landscape patterns and dynamics.

M&S fee \$15.00 *Occasional*

College of Sciences - Department of Biology

PCB 6409 - Global Change Biology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Examination of global climate change science applied to biological systems. Topics include physical basis, physiological and evolutionary responses, range shifts, biogeochemical cycles, disturbance, uncertainty, and effective communication.

Odd Spring

College of Sciences - Department of Biology

PCB 6466 - Methods in Experimental Ecology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I. An introduction to methods of population ecology. Experimental design, statistics, experimental variables and treatments and measurements of organisms and the environment.

Fall

College of Sciences - Department of Biology

PCB 6468 - Methods in Experimental Ecology II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

PCB 6466 Methods in Experimental Ecology. Strengthen student's ability to collect, organize and interpret ecological data. Confronts concepts in experimental design, execution and analysis as a tool to improve ecological research.

Even Spring

College of Sciences - Department of Biology

PCB 6480C - Quantitative Conservation Biology

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 3

Prerequisite(s): C.I.

Data analysis & modeling to evaluate population dynamics, basic training in programming & statistical procedures of population analysis of different modeling approaches, uses & limitations.

Occasional

College of Sciences - Department of Biology

PCB 6528 - Plant Molecular Biology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

PCB 4524 or C.I. Structure and function of plant genomes, genes, gene products and experimental approaches for genetic engineering for production of edible vaccines, antibodies or other pharmaceuticals.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 6556 - Conservation Genetics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the M.S. In Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I. Applications of genetic models to the understanding and conservation of animal and

plant populations.
Odd Spring

College of Sciences - Department of Biology

PCB 6595 - Regulation of Gene Expression

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Advanced course in molecular biology of BSC 6407C.

Concepts of molecular biology focusing on major areas in transcriptional and translational processes.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 6655 - Advanced Invertebrate Genetics

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): PCB 3063 or equivalent, graduate standing.

Literature based discussion of recent developments in classical and molecular genetics of invertebrates. May be used in the degree program a maximum of 3 times.

Fall, Spring

College of Sciences - Department of Biology

PCB 6675C - Evolutionary Biology

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Review of modern concepts and theories in evolutionary biology with emphasis on readings in the primary literature.

Even Fall

College of Sciences - Department of Biology

PCB 6677 - Molecular Evolution and Phylogenetics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Advanced understanding of evolution at the molecular level based on phylogenetic analysis of changes in DNA, RNA and protein.

Odd Fall

College of Sciences - Department of Biology

PCB 6909 - Research Report

College of Sciences

PCB 6918 - Directed Research

College of Sciences

PCB 6930 - Current Topics in Ecology

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Graduate standing or C.I.

Research on current ecological topics will be added. The instructor will assign readings on a weekly basis. Students will lead discussion. Graded S/U. May be repeated for credit.

Occasional

College of Sciences - Department of Biology

PCB 6935 - Advanced Topics in Cardiovascular Science

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Graduate standing.

Cutting-edge research in cardiovascular science is presented with emphasis on molecular mechanisms of cardiac development, vascular inflammation, oxidative stress, and neural regulation of the cardiovascular system.

Occasional

College of Medicine - Department of Molecular and Microbiology

PCB 6938 - Special Topics

College of Sciences

PCB 6939 - Topics in Genomics

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

PCB 3063. Review current literature in Genomics, one of the fastest growing fields in Biology.

Occasional

College of Sciences - Department of Biology

PCB 7049C - Conservation Biology Practice**4 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 6

Prerequisite(s): Acceptance into the Conservation Biology Ph.D. program.

Case studies and evaluation of local and regional conservation issues from a biological perspective.

Material and Supply Fee: \$70.00 *Spring*

College of Sciences - Department of Biology

PCB 7919 - Doctoral Research

College of Sciences

Psychobiology**PSB 5005 - Physiological Psychology****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PSB 3002 and graduate status or senior standing or C.I.

An advanced survey of the physiological basis of behavior, emphasizing the relationship between the nervous system and behavior.

Occasional

College of Sciences - Department of Psychology

PSB 5917 - Directed Research

College of Sciences

PSB 5937 - Special Topics

College of Sciences

PSB 6328 - Psychophysiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing, or C.I. Anatomy and function of the nervous system, use of psychophysiological recording methods, and design of studies exploring the biological bases and indicators of behavior.

Spring

College of Sciences - Department of Psychology

PSB 6348 - The Neuroanatomical Basis of Psychological Function

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing, or C.I. Fundamental human neuroscience course that includes thorough review of neuroanatomy and physiology at cellular, anatomical and functional region levels in the context of psychological function.

Fall

College of Sciences - Department of Psychology

PSB 6352 - Neuroimaging Design and Analysis Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Overview and hands-on practice in design of neuroimaging studies and analysis of neuroimaging data.

Spring

College of Sciences - Department of Psychology

PSB 6909 - Research Report

College of Sciences

PSB 6918 - Directed Research

PSY 7919 - Research

College of Sciences

Public Administration

PAD 5041 - Ethics and Values in Public Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Examination of ethics in the public sector. Public concerns, past patterns, and individual/social aspects of ethical behavior are explored.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 5145 - Volunteerism in Nonprofit Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Nonprofit Management degree, Nonprofit certificate or C.I.

Volunteer development in nonprofit organizations, including board selection, development and leadership, volunteer recruitment, training, retention and theories of motivation, leadership, ethical issues.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 5146 - Nonprofit Resource Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Nonprofit Management, Certificate in Nonprofit Management, Certificate in Fundraising or C.I. Examines human resource development and financial resource development in nonprofit organizations including management issues.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 5185 - Foundations of Social Justice for Public Service

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Graduate standing.

The course provides an overview and foundation for understanding the roots of some of today's most complex public management social problems.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Community Innovation and Education - School of Public Administration

PAD 5186 - Policy Advocacy for Social Justice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Graduate standing.

Community-based policy advocacy seeks to strengthen group solidarity to promote change. Policy analysis and interpersonal skills to mobilize groups and communities are examined.

PAD 5937 - Special Topics

College of Community Innovation and Education

PAD 6035 - Public Administration in the Policy Process

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Public Administration, or Master of Science in Urban and Regional Planning, or Certificate in Public Administration, or Certificate in Police Leadership, or C. I. Analysis of the role of the public administrator in the analysis, formulation, implementation, and evaluation of public policies, especially at the state and local levels.

Fall, Spring, Summer

College of Community Innovation and Education - School of Public Administration

PAD 6036 - Change Management in Public Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Human and political dimensions of change within public organizations; applications of strategic management, budgeting, organizational culture, public policy and performance to organizational change.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6037 - Public Organization Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to the Master of Public Administration, or Certificate in Public Administration, or Certificate in Emergency Management and Homeland Security, or Certificate in Police Leadership, or C. I. Structure, functioning, performance of public organizations; behavior of individuals and groups; application for public management, includes both macro and micro approaches to organizational behavior.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6053 - Public Administrators in the Governance Process

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Public Administration, or Master of Science in Urban and Regional Planning, or Certificate in Public Administration, or C. I. An examination of the political, social, economic, and moral context of modern public administration, with special attention to the ethical dimensions of the administrator's role.

Fall, Spring, Summer

College of Community Innovation and Education - School of Public Administration

PAD 6062 - Advanced Concepts and Applications in Public Administration**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PAD 6035, PAD 6037, PAD 6053, PAD 6227, PAD 6417 and PAD 6701 or C.I.

An integrative course applying the skills, knowledge, and values considered in the program to selected public problems.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6086 - Advanced Concepts and Applications in Emergency and Crisis Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): All core courses in Master of Emergency and Crisis Management.

Combines knowledge and skills gained and applies them in an integrative manner to challenges facing emergency managers today. Provides a foundation to be an effective leader in emergency management.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6142 - Nonprofit Organizations**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Nonprofit Management, or Master of Science in Urban and Regional Planning, or Certificate in Nonprofit Management, or Certificate in Fundraising, or Certificate in Emergency Management and Homeland Security, or C.I. Synthesis of best practices and research literature in nonprofit organization management. Instruction method is simulation where students act as nonprofit organization Board Members developing policies and procedures.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6149 - Nonprofit Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master in Nonprofit Management or Graduate Certificate and PAD 5145, PAD 5146, PAD 6142, PAD 6208 and PAD 6335 or C.I.

Provides an overview of nonprofit leadership and board development, focusing on the ethical, legal and administrative responsibilities of those individuals responsible for nonprofit management.

Fall, Spring, Summer

College of Community Innovation and Education - School of Public Administration

PAD 6167 - Graduate Nonprofit Leadership Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Nonprofit Management or Nonprofit certificate program and C.I.

Discussion and activity-based course exploring nonprofit competencies to prepare students for management and leadership positions in human services.

Odd Fall

College of Community Innovation and Education - School of Public Administration

PAD 6200 - International Emergency and Crisis Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Master student in the School of Public Administration.

This course will engage students to the world of *crises*, *disasters*, and *emergencies*. They devastate, injure, and kill, wherever they occur, but when they strike the least among us, the devastation, the injuries, and the fatalities increase exponentially. Students are expected to complete the course with a well-defined mental map – a map that will guide your understanding of new crises, disasters, and emergencies as they increase in frequency and intensity around the world. We want you to be both *engaged* and *thoughtful* observers and participants in the WORLD of emergency management.

Every Semester

College of Community Innovation and Education - School of Public Administration

PAD 6207 - Public Financial Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PAD 6227 and PAD 6700, or C.I.

Survey of financial management functions in local government, such as accounting, fund structures, debt and case management, and financial reporting.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6208 - Nonprofit Financial Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Nonprofit Management, or Certificate in Nonprofit Management, or Certificate in Fundraising or C.I. Financial management in nonprofit organizations, including nonprofit funding, budgeting policies and procedures, orientation of department managers to budgeting, estimating income and expenses, and ethical implications of budgeting and finance.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6227 - Public Budgeting**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Public Administration, or Master of Emergency and Crisis Management, or Certificate in Public Administration, or Certificate in Public Budgeting, or C.I. and PAD 6700.

A political and rational examination of the government budgetary process and document to better understand their managerial, policy, planning, and communication functions.

Spring

College of Community Innovation and Education - School of Public Administration

PAD 6355 - Growth Management Approaches and Techniques

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Regional and metropolitan planning course that focuses on how growth management works in communities.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6357 - Urban Resilience

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Master student in the School of Public Administration.

This course will examine a range of issues associated with understanding urban resilience from community, environment, infrastructure, security, to planning, and assessment aspects. Specific topics will include urban resilience and resilient communities, urban resilience, urban vulnerability, disaster resilience, resilience policy and practice, adaptive planning and hazard mitigation, urban resilience assessment, climate change adaptation, infrastructure interdependency and security, disaster recovery and housing recovery, and interdisciplinary research in urban resilience.

Every Semester

College of Community Innovation and Education - School of Public Administration

PAD 6387 - Transportation Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. An examination of the process of public policy formulation and implementation in the field of transportation.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6397 - Managing Emergencies and Crises**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Analyzes and integrates the basic crisis management steps: hazard mitigation, disaster preparedness, disaster response, and recovery --building analytical and practical skills necessary to perform effectively in homeland security/emergency management-related positions.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6398 - Hazard Analysis and Disaster Planning**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing; School of Public Administration Major.

Examines geospatial aspects of hazards analysis and planning with reference to disaster preparedness, recovery, mitigation, and resilience.

occasional

College of Community Innovation and Education - School of Public Administration

PAD 6399 - Foundations of Emergency Management and Homeland Security**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Analyzes the policy and organizational design issues confronting managers of emergency management and homeland security programs by: examining the natural and manmade threats; by analysis of the network of actors - national, state, local, and private; and by assessing the policy, plans, and procedures at governmental and community levels.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6417 - Human Resource Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Public Administration, or Master of Nonprofit Management, or Master of Research Administration, or Certificate in Public Administration, or Certificate in Corrections Leadership, or C. I. Administrator as manager and motivator of public employees with particular emphasis on organizational behavior and contemporary public service legislation.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6439 - Leadership in Public Service

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to School of Public Administration graduate degree programs. Importance of sound public leadership and development of analytical skills to recognize and resolve critical public management issues.

Fall

College of Community Innovation and Education - School of Public Administration

PAD 6616 - Economic Principles for Public Policy and Management

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Graduate Certificate in Public Budgeting or Master of Public Administration. Economic concepts, relationships, and methods of analysis that are relevant for public sector management decisions and policy analysis; usefulness of economic analysis in Public Sector decision making.

Fall, Spring, Summer

College of Community Innovation and Education - School of Public Administration

PAD 6700 - Research Methods in Public Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Public Administration program or C.I.
Statistical methodology and use of computers as a tool for decision making in the public sector.
Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6701 - Analytical Techniques for Public Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PAD 6700 or C.I.

Applied analytical tools for administrators in the public sector. Practical use of computers in policy and decision making.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6705 - Public Sector Communications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Public Administration or Nonprofit Management master's programs. Recognizing stakeholders and their needs; focusing on communications specific to reputation management, branding and marketing strategies in keeping with regulatory standards.

Spring

College of Community Innovation and Education - School of Public Administration

PAD 6716 - Information Systems for Public Managers and Planners

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Use of systems concept, software and computers in contemporary public sector management and planning information systems.

Fall, Spring

College of Community Innovation and Education - School of Public Administration

PAD 6717 - Visualization and Presentation Workshop for Urban Planners

PAD 6741 - Research Integrity for Research Administrators

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program.

This course provides an overview of research integrity from the perspective of those in the field of research administration.

Summer

College of Community Innovation and Education - School of Public Administration

PAD 6742 - Introduction to Research Administration**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Overview of research administration including history, roles and relationships, partnership, purpose and core value of research and research organizational types.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6743 - Leadership and Organization Models in Research Administration**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

General management concepts in preparation for leadership roles in Research Administration, the tools of managerial decision-making and team building, and acquaints students with theories and principles of research and development organizations.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6744 - Financial Management in Research Administration**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Overview of financial management in research administration to establish an understanding of the complex financial management and reporting environment.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6745 - Contracting for Sponsored Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Overview of the contracting mechanisms that are relevant to sponsored program management, including federal regulations; policy-, business- and risk-based decisions impacting sponsored program contracting.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6746 - Intellectual Property, Technology Transfer and Commercialization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Role of research administration in technology transfer and commercialization of new innovations, including intellectual property relating to copyright, patents and trademarks.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6747 - Audits in Research Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.

Overview of financial and non-financial audit process for research contracts and grants. Includes audit process, types of audits and do's and don'ts when an organization is audited.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6748 - Governance and Regulatory Issues for Sponsored Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Research Administration program or C.I.
Provides an overview of the governing and regulatory structure for which research organizations must comply and operate to administer and manage research projects and programs.

Fall

College of Community Innovation and Education - School of Public Administration

PAD 6825 - Cross-Sectoral Governance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

Examines the structures, dynamics and processes associated with developing and delivering public services through networks and partnerships involving public, nonprofit, voluntary and private sectors.

Occasional

College of Community Innovation and Education - School of Public Administration

PAD 6826 - Urban Policy and Regional Governance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 3

Prerequisite(s): Graduate student in School of Public Administration.

This course explores conceptual, analytical and applied aspects of regional governance to achieve more effective local economic, environmental and social policy outcomes.

College of Community Innovation and Education - Dean's Office

PAF 7925 - Symposium on Public Affairs Issues

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Public Affairs program or C.I.

Issues and trends impacting the four subject areas in the U.S. Public Affairs along with the inter-disciplinary characteristics of the respective cognate areas will be explored.

College of Community Innovation and Education - Dean's Office

PAF 7947 - Public Affairs Community-Based Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Public Affairs Ph.D. and PAF 7000, PAF 7802, PAF 7804, PAF 7317, PAF 7820, PAF 7325, PAF 7805 or C.I.

This course provides students an experiential engagement working with interdisciplinary teams and community partners to conduct and report on a community-engaged research study.

Fall, Spring

College of Community Innovation and Education - Dean's Office

PAF 7981 - Dissertation Prospectus Seminar in Public Affairs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Public Affairs Ph.D. program and C.I. Train and guide students as they begin the dissertation prospectus process. Includes planning the study, conducting the literature review, developing the research questions and choosing theories and methods.

College of Community Innovation and Education - Dean's Office

Public Health Concentration

PHC 5917 - Directed Research

College of Health Professions and Sciences

PHC 5937 - Special Topics

College of Health Professions and Sciences

PHC 6000 - Epidemiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Health Services Administration graduate program or C.I.

A study of the distribution and determination of diseases and injuries in human populations.

Summer

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6003 - Epidemiology of Chronic Diseases

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.
Selected topics in chronic disease with critical analysis of the current epidemiologic literature is covered; opportunity to study methodological issues, contemporary findings and future direction of research.
College of Health Professions and Sciences - Department of Health Sciences

PHC 6010 - Quantitative Methods in Epidemiology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MS Health Sciences graduate program and PHC 6000.
Principles of managerial epidemiology, quantitative methods, application of prostatistics, use of personal computers to handle data and solve problems.

Occasional

College of Health Professions and Sciences - Department of Health Sciences

PHC 6020 - Introduction to Clinical Trials

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S.
Clinical and Lifestyle Sciences track or C.I. An overview of clinical trials theory and design characteristics provides the background necessary to conduct single center and multi-center studies.

Spring

College of Health Professions and Sciences - Department of Health Sciences

PHC 6146 - Health Planning and Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Services Administration graduate program or C.I.
Review of the determinants of the revolution of the health care system in the United States; analysis of public health, preventive medicine, and therapeutic medicine in terms of quality, access, and cost; methodologies and issues in comprehensive health planning; and trends in health policy development.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6160 - Health Care Finance

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): HSA 5177 or passing score on finance assessment exam.

The identification of resources available to health care institutions, allocation of resources, and control of resource expenditures.

Fall

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6164 - Health Care Finance II**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): PHC 6160.

Course facilitates the development of strategic financial plans and its application to current health care management issues.

Occasional

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6183 - Health Care Emergency Management**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Broad overview of topics related specifically to how the health care industry addresses issues associated with disasters and emergencies.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6411 - Health and Society**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Understanding health and illness as defined by patients, providers, and other persons in the social system.

Occasional

College of Health Professions and Sciences - Department of Health Sciences

PHC 6420 - Case Studies in Health Law

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Health Services Administration graduate program or C.I.

Health law including patient care, liability, malpractice, workmen's compensation, and legal responsibilities of health personnel.

Spring

College of Community Innovation and Education - Department of Health Management and Informatics

PHC 6706 - Introduction to Clinical Research**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Health Sciences M.S. Clinical and Lifestyle Sciences track or C.I.

This course offers an introductory overview to clinical research. Course content focuses on key concepts beginning with an overview of the conception of research question.

College of Sciences

PUP 6208 - Environmental Politics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to a graduate degree-seeking program or C.I.

Examines the political ideas and practices which have shaped environmental politics and practices in the U.S.

Occasional

College of Sciences - Department of Political Science

PUP 6247 - Contemporary Issues in Environmental Politics**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing.

A detailed examination of recent developments in one or more areas of environmental politics. Topics may include land and water regulation and pollution control.

Occasional

College of Sciences - Department of Political Science

PUP 6324 - Women and Public Policy**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing. Analyzes U.S. public policies with differential impact on women, including policies regarding employment, family, health, reproduction and sexuality. Strong theoretical emphasis.

Occasional

College of Sciences - Department of Political Science

PUP 6607 - Politics of Health**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate or post bac status.

Analysis of public health policies, primary focus upon political processes, policy makers, and interest groups. Comparative health practices.

Occasional

College of Sciences - School of Politics, Security and International Affairs

PUP 6909 - Research Report

College of Sciences

PUP 6918 - Directed Research

College of Sciences

PUP 6938 - Special Topics/Public Policy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to graduate program or C.I. This course title covers all public policy special topics courses which are not listed in the catalog with a course number. May be repeated for credit only when course content is different.

Nicholson School of Communication and Media

PUR 5937 - Special Topics

Nicholson School of Communication and Media

PUR 6005 - Theories of Public Relations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Communication M.A. program or C.I.

Focus on theories of public relations with implications for communications practices in corporate and other organizations and government agencies.

Occasional

Nicholson School of Communication and Media - Department of Communication

PUR 6215 - Communicating Corporate Social Responsibility

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Graduate standing or C.I. Communication processes required for developing, implementing, publicizing, and evaluating corporate social responsibility program in organizations.

Occasional

Nicholson School of Communication and Media - Department of Communication

PUR 6403 - Crisis Public Relations

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): C.I.

The course examines the management of crisis situations from a PR perspective, as well as how to manage issues to prevent them from becoming crises.

Occasional

Nicholson School of Communication and Media - Department of Communication

PUR 6405 - Communication and Public Relations in Politics and Government

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

COM 6008 or C.I. Role of professional and practical public relations communication skills and knowledge in contemporary politics and government.

Fall

Nicholson School of Communication and Media - Department of Communication

PUR 6918 - DIRECTED INDIVIDUAL Research IN PUBLIC RELATIONS

Nicholson School of Communication and Media

Quantitative Methods in Business

College of Business Administration

QMB 5937 - Special Topics

College of Business Administration

QMB 6010 - Mathematical Tools for Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Acceptance into a graduate business program of study.

Introduction to the most used mathematical tools in business analytics, specifically, different and integral calculus as well as linear algebra.

Occasional

College of Business Administration - Department of Management

QMB 6303 - Probability and Statistics for Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the MSM Business Analytics program.

Introduction to the main tools of probability and statistics used in business analytics.

Occasional

College of Business Administration - Department of Management

QMB 6358 - Software Tools for Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the MSM Business Analytics program.

Introduction to the main software tools used in business analytics, specifically, Python, R, and SQLite as well as UNIX.

Occasional

College of Business Administration - Department of Management

QMB 6909 - Research Report

College of Business Administration

QMB 6912 - Capstone Project in Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission into the MSM Business Analytics program, successful completion of all required courses in the program, permission of instructor.

Integration of all the tools developed in the program to solve an empirical problem.

Reading Education

RED 5147 - Developmental Reading

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Principles, procedures, organization, and current practices in the elementary reading program.

Materials and methods of instruction.

College of Community Innovation and Education - School of Teacher Education

RED 5517 - Classroom Diagnosis and Development of Reading Proficiencies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): RED 5147 or equivalent.

Classroom diagnosis and corrective teaching in reading; instructional materials. Case study required.

Even Fall, Spring

College of Community Innovation and Education - School of Teacher Education

RED 5917 - Directed Research

College of Community Innovation and Education

RED 5937 - Special Topics

College of Community Innovation and Education

RED 5948 - Practicum in Reading Assessment and Instruction**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5517.

Practicum that requires application of reading assessment and instruction in order to increase reading proficiency of struggling readers. Concurrent K-12 field experiences required.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

RED 6116 - Advanced Study in Foundations of Reading**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5147 or C.I.

Historical development and current research-based practice related to language and cognitive foundations of reading components: phonemic awareness, phonics, vocabulary, fluency, comprehension, investigation of research.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

RED 6336 - Teaching Content Area and Disciplinary Literacy**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Basic Teacher Certificate or C.I.

Differentiation of and strategies for content area reading and disciplinary literacy instruction for K-12 readers; focus on print and digital texts.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

RED 6337 - Reading in the Secondary School

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 6336, Basic Teacher Certification, or C.I.

Motivation and engagement of the adolescent reader. Strategies for differentiation to support all proficient and non-proficient adolescent readers.

Odd Fall, Even Fall

College of Community Innovation and Education - School of Teacher Education

RED 6746 - Literacy Leadership and Coaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5517 or C.I.

Collaboration with stakeholders to plan, implement, and supervise reading programs in K-12 settings, including data mining and professional development. Exploration of coaching models and facilitation of a school-wide literate environment.

Odd Spring, Even Spring

College of Community Innovation and Education - School of Teacher Education

RED 6845 - Advanced Evaluation and Instruction in Reading

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5517 or C.I.

Administration and interpretation of formal and informal evaluation techniques. Instructional strategies (including multisensory and motivation) contributing to reading achievement at classroom and individual level. Emphasis on parent involvement.

Odd Spring, Even Spring

College of Community Innovation and Education - School of Teacher Education

RED 6846 - Reading Practicum

6 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 6

Contact Hours: 0

Prerequisite(s): RED 6845 or C.I.

Evaluation and instructional practices for the individualization of reading instruction in a supervised clinical setting. Development of personalized instructional plan and parent communication.

Odd Summer, Even Summer

College of Community Innovation and Education - School of Teacher Education

RED 7648 - Analysis and Evaluation of Trends and Issues in Literacy Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 7797.

Critical analysis and evaluation of trends and issues in literacy education: research, policy, and instruction.

Even Summer

College of Community Innovation and Education - School of Teacher Education

RED 7697 - Literacy for the Twenty-First Century

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 6116, RED 7797, RED 7648.

Investigates changing role of literacy in a technology-based world; explores issues of literacy in an increasingly diverse world.

Spring

College of Community Innovation and Education - School of Teacher Education

RED 7743 - Reading and Writing Processes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5147 or equivalent.

Investigates reading and writing as interrelated processes; focuses on research that shapes reading and writing instruction in the U.S.

Spring

College of Community Innovation and Education - School of Teacher Education

RED 7745 - Research in Reading Education Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5147 or equivalent; RED 6116.

The study of the reading research process and the design of a research proposal in the reading education field.

Even Fall

College of Community Innovation and Education - School of Teacher Education

RED 7797 - Theoretical Processes of Reading Comprehension

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): RED 5147 or equivalent.

Investigates theoretical processes and factors related to comprehension. Studies relevant issues and research.

Fall

College of Community Innovation and Education - School of Teacher Education

RED 7919 - Doctoral Research

College of Community Innovation and Education

RED 7947 - Internship in Reading Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PhD in Education--Reading Education Track.

College teaching of reading education courses under supervision of reading education faculty mentor.

Fall, Spring

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415, TSL 5085 or admission to MED program or Initial Teacher Professional Preparation certificate.

This course will provide experiences that promote effective science teaching in grades 5-9 including interdisciplinary teaming, technology use, ESOL, and inquiry in science.

Occasional

College of Community Innovation and Education - School of Teacher Education

SCE 5337 - Issues and Methods in Secondary School Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415, TSL 5085, or admission to MED program or Initial Teacher Professional Preparation certificate.

Secondary science education special methods course is designed to augment students' understanding of instructional methods and their applications to middle and high school science curriculum.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

SCE 5836 - Space and Physical Science for Educators

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Introduction to space and physical science, manned space flight, and space education curriculum.

Summer

College of Community Innovation and Education - School of Teacher Education

SCE 5917 - Directed Research

College of Community Innovation and Education

SCE 5937 - Special Topics

College of Community Innovation and Education

SCE 6315 - Methods in Elementary School Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDE 6933 or C.I.

Organization of instruction in elementary school science including methods, evaluation, materials, strategies, and current practices.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

SCE 6909 - Research Report

College of Community Innovation and Education

SCE 7145 - Design of Post Secondary Science Curriculum

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing, admission to the PhD or EdD Education programs, and C.I.

Successful completion of ESE 6217 or an approved equivalent. This course will examine issues of curriculum theory, research, and practice at the post-secondary level situated in science education.

Odd Fall

College of Community Innovation and Education - School of Teacher Education

SCE 7146 - Professional Issues in Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PhD in Education or C.I.

Students will study issues and forces that have shaped science education policies, classroom practices, ethics development, and professional identity.

College of Community Innovation and Education - School of Teacher Education

SCE 7242 - Assessment in Science Teaching, Learning and Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing, admission to the PhD or EdD Education programs, and C.I.

This course will examine current instruments/tools used in science assessment covering standardized science testing and authentic and performance-based science assessments.

Odd Fall

College of Community Innovation and Education - School of Teacher Education

SCE 7746 - Teaching Theory and Research in Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PhD in Education or C.I.

Course will provide students means to become familiar with trends and current status of research in science teaching and learning.

College of Community Innovation and Education - School of Teacher Education

SCE 7864 - Science Technology and Society

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PhD in Education or C.I.

The course is focused on the history of science in the U.S. with particular emphasis on institutional configurations that emerged in the period since nationhood.

College of Community Innovation and Education - School of Teacher Education

SCE 7935 - Seminar—Professional Writing/Grants in Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Ph.D. in Education or C.I.

The focus of the course is on scholarly writing and grant writing in science teaching, learning, assessment and relationships.

College of Community Innovation and Education - School of Teacher Education

SCE 7942 - Internship/Practicum in Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the PhD in Education or C.I.

The focus of this course is students' participation in current research projects in science/science education.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

SCE 7980 - Doctoral Dissertation**0-12 Credit Hours**

Class Hours: 0-12

Lab and Field Work Hours: 0

Contact Hours: 0-12

Prerequisite(s): Taken and passed comprehensive exam.

Approval of Education Ph.D SCE?track program coordinator. May be repeated for credit.

Social Studies Education

SSE 5391 - Global Education: Theory and Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examines the theoretical underpinnings of teaching about the world along with a variety of theoretically grounded teaching strategies for engaging students in global education.

Spring

College of Community Innovation and Education - Department of Learning Sciences and Educational Research

SSE 5776 - Democracy and Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Explores the intersection of theory and practice with regard to promoting democratic life in schools. Will examine competing theories of democracy and education, investigate problem areas in schools related to democracy, and consider examples of practice.

Fall

College of Community Innovation and Education - School of Teacher Education

SSE 5790 - Inquiry and Instructional Analysis in Social Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EDG 6415 or admission to Teacher Leadership MEd program or Initial Teacher Professional Preparation certificate.

Study of instructional programs in social science education and related scholarship; development of an inquiry about the intersection of theory and practice in social science teaching.

Summer

SSE 6115 - Methods in Elementary School Social Science

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Study of instructional programs in social sciences; objectives; materials; techniques; current research; and their application in elementary school setting.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

SSE 6348 - Foundations and Fundamentals of Teaching History in the K-12 Classroom

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course examines empirical research and pedagogical approaches related to the teaching of history in the K-12 classroom environment.

Odd Fall

College of Community Innovation and Education - School of Teacher Education

SSE 6387 - Teaching with Film

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Selected strategies, trends, methods, materials, and legal issues for effectively incorporating film in the K-12 classroom. Selected topics include media literacy, film research, and making movies appropriate to educational settings.

Spring

College of Community Innovation and Education - School of Teacher Education

SSE 6388 - Digital History in the K-12 Classroom

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course looks at the concept of digital history and how this pedagogical approach can and should be applied in the K-12 social studies classroom environment.

Fall

College of Community Innovation and Education - School of Teacher Education

SSE 6396 - Teaching with Primary Sources in the History Classroom

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. This course focuses on the creation, teaching, and evaluation of history-specific, content-informed and effective instructional practices that integrate primary sources.

College of Community Innovation and Education - School of Teacher Education

SSE 6636 - Contemporary Social Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Basic Teacher Certificate of C.I.

A survey of recent developments and contemporary programs in all areas of the social sciences.

College of Community Innovation and Education

SSE 7700 - Critical Issues in Social Studies Teacher Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

An examination of the relevant literature surrounding the research and practice of social studies teacher education. The course examines the major themes, ideas, perspectives, and programs.

Even Fall

College of Community Innovation and Education - School of Teacher Education

SSE 7740 - History of Social Studies Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Major themes, ideas, and personalities in the historical development of curriculum and instruction in social studies in the United States since 1880.

Odd Fall

College of Community Innovation and Education - School of Teacher Education

SSE 7796 - Research in Social Science Education Seminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Analysis and evaluation of scholarly research in social studies education.

Odd Spring

College of Community Innovation and Education - School of Teacher Education

SSE 7797 - Content and Program Analysis in Social Science Education

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Analysis of social science instructional programs including development of content, materials, processes, and assessment procedures in light of current research and practice.

Even Fall

College of Community Innovation and Education - School of Teacher Education

SSE 7947 - Internship in Social Science Education**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Doctoral standing.

Student teaching in a classroom under supervision of a certified classroom teacher. May be used in the degree program a maximum of 3 times.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

Social Work**SOW 5107 - Human Behavior in the Social Environment****3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to MSW program. Study of human development and psychosocial functioning of individuals, groups, families and communities with particular attention to implications of human diversity.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 5132 - Diverse Client Populations**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of human diversity, focusing on the needs, resources, problems, and service issues of several identified minority client populations.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 5217 - Foundations of Behavioral Health Policy and Social Work Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to MSW program. This course helps students think critically about mental health services by analyzing the factors that influence global behavioral health policies.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 5235 - Social Welfare Policies and Services

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of societal responses to human needs; forces shaping social welfare systems; introduces frameworks for analyzing social policies and services.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 5305 - Social Work Practice I: Generalist Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of social work functions, knowledge, values, roles and skills; the use of a generalist model of practice.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 5306 - Social Work Practice II: Intervention Approaches

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of selected social work theories, strategies, and techniques for helping people and improving system responsiveness to human needs.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 5404 - Social Work Research

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Study of group research designs in social work; quantitative analyses; and related ethical issues.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 5538 - Full-Time MSW Generalist Field Integrative Seminar I

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Master of Social Work program or C.I. Corequisite(s): SOW 5305 and SOW 5940

Field education seminar for full-time MSW generalist students.

College of Health Professions and Sciences

SOW 5937 - Special Topics

College of Health Professions and Sciences

SOW 5940 - Generalist Field Education

VAR Credit Hours

Contact Hours: 0

Admission to MSW program. Field education for Master of Social Work generalist students; includes supervised practice of social work in an agency for 200 clock hours.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 6109 - Violence Against Women: A Global Perspective

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

An introduction to the types of violence imposed on women around the world. Social, political and economic issues related to women and violence are reviewed.

Summer

College of Health Professions and Sciences - School of Social Work

SOW 6123 - Psychosocial Pathology**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of all Master of Social Work core courses or advanced standing.

Study of psychosocial dynamics of dysfunctional behavior in individuals.

Summer

College of Health Professions and Sciences - School of Social Work

SOW 6149 - Military Culture and Social Work Practice**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Social Work program or C.I.

Provides a detailed overview of the practice of social work with these military connected clients, families, and communities.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 6155 - Human Sexuality in Social Work Practice**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Social Work program, Graduate Certificate in Gender Studies or C.I.

Study of human sexuality with emphasis on assessment and intervention skills for social workers with clients experiencing problems involving sexual issues.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6324 - Clinical Practice with Groups

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SOW 6123.

Group work theories, interventions and techniques applied to persons with emotional, social and psychological problems.

Fall, Spring

College of Health Professions and Sciences - School of Social Work

SOW 6348 - Clinical Practice with Individuals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SOW 6123.

Behavioral, crisis, and psychosocial theories applied to persons with emotional, social, and psychological problems.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 6383 - Social Work Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work program or C.I. Designed as a general introduction to the multi-faceted nature of social work administration in public and private non-profit settings.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6424 - Theories for Evidence-Based Clinical Practice in Social Work

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of all Master of Social Work core courses or advanced standing.

Theoretical perspectives including: Cognitive; Cognitive Behavioral; Feminist Therapy; Psycho-dynamic Therapy; Motivational Interviewing; Rational Emotive Behavioral Therapy; Solution-focused Therapy; and Narrative Therapy.

Summer

College of Health Professions and Sciences - School of Social Work

SOW 6433 - Clinical Evaluation in Social Work Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

SOW 5404. Students will learn to critically analyze and apply specific research designs and analytical methods for systematic evaluation of clinical interventions, services, and programs.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 6531 - Full Time MSW Clinical Field Integrative Seminar I

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): SOW 6123 and SOW 6424. Corequisite(s): SOW 6940

Field education seminar for full-time Master of Social Work students.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 6536 - Full Time MSW Clinical Field Education and Seminar II

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): SOW 6531.

Field education for full-time Master of Social Work clinical students; includes seminar and supervised practice of social work in an agency for 300 clock hours.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6561 - Part-Time MSW Clinical Field Integrative Seminar I

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): SOW 6123 and SOW 6424. Corequisite(s): SOW 6940

Field education seminar for part-time Master of Social Work students.

College of Health Professions and Sciences - School of Social Work

SOW 6562 - Part Time MSW Clinical Field Integrative Seminar II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): SOW 6561. Corequisite(s): SOW 6940

Field seminar education for part time Master of Social Work clinical students.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6563 - Part-Time MSW Clinical Field Integrative Seminar III

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): SOW 6562. Corequisite(s): SOW 6940

Field education seminar for part-time MSW clinical students.

Summer

College of Health Professions and Sciences - School of Social Work

SOW 6603 - Social Work in Health Settings

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work program or C.I. Study of social work roles, interventions, and issues related to helping clients in health care settings.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6604 - Medications in Social Work Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Social Work program and SOW 6123, or C.I.

The study of the effects that psychotropic medications can have within the counseling/helping relationship.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6608 - Understanding and Managing Combat Related Behavioral and Mental Health Disorders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SOW 6149.

Advances students' knowledge about the unique nature of trauma, PTSD and other mental health disorders as they relate to combat-exposed soldiers, veterans, their families and other military experiences.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6610 - Clinical Practice with Military and Veteran Families or Groups

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SOW 6149.

Theoretical/practical approaches to clinical practice with military families and groups. Examines the demands of military service on family/group dynamic, composition and related issues.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6612 - Clinical Practice with Families

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SOW 6123.

Family-focused models of intervention applied to families in transition and to problems such as divorce, single parenting, and blended families.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 6635 - Social Work Practice in Schools

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MSW program or Social Work Graduate Certificate or C.I.

Enhance clinical knowledge and skills that are essential to effective school based practice with students, teachers, families, schools and communities.

Summer

College of Health Professions and Sciences - School of Social Work

SOW 6644 - Interventions with Older Adults and Their Families

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work program or C.I. Study of concepts, skills, models and theories for intervening with the elderly. Special attention is given to minority populations.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6652 - Child Welfare Services

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Social Work program or C.I.

Provides a framework of knowledge, values and skills necessary to work with maltreated children and their families. It also serves to introduce students to the field of Child Welfare (CW).

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6655 - Child Abuse: Treatment and Prevention

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MSW degree or SW or Criminal Justice Certificate program.

Study of various forms of child abuse, the social worker's role and interventions with victims of child abuse and their family members.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6670 - Clinical Social Work Practice with LGBTQ+

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work and SOW 6123 or C.I. Focus on Social Work resources, social policy and clinical assessment, diagnosis and therapeutic interventions of LGBTQ+ individuals, families, groups and communities.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6712 - Clinical Social Work Practice with Substance Addictions**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work program, Juvenile Justice certificate, or Corrections Leadership certificate, or C.I. The most common substance addictions are identified along with current evidence-based practice strategies.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6713 - Prevention and Treatment of Adolescent Substance Use and Misuse**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Master of Social Work program or C.I.

Clinical application and analysis of prevention, intervention, treatment, recovery, relapse issues and public policy regarding adolescents with substance use addictions.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6726 - Social Work Practice with Children from Birth to Age Five and their Families**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Social Work practice and treatment of children from birth to five years of age and their families.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 6727 - Core Concepts of Child and Adolescent Trauma

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Trauma informed concepts applied to practice with children and adolescents.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 6735 - Documentation Skills for Helping Professionals

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MSW students, C.I.

Study of documentation skills and record keeping for helping professionals.

Odd Spring, Even Summer

College of Health Professions and Sciences - School of Social Work

SOW 6756 - Forensic Social Work

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MSW program or Social Work Certificate.

Course studies theories and practice of forensic social work focusing on roles, ethics, skills and functions.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6806 - Behavioral Health Skills for Clinical Social Workers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Social Work and SOW 6123. Provides comprehensive knowledge and skills for providing behavioral health interventions in medical and behavioral health settings.

Odd Summer

College of Health Professions and Sciences - School of Social Work

SOW 6846 - Spirituality in Clinical Social Work Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MSW or Social Work Certificate program.

Faith development theory, study of spirituality in various settings and development of strategies for use in practice designed to heighten sensitivity to spiritual dimensions of life.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 6909 - Research Report

College of Health Professions and Sciences

College of Health Professions and Sciences

SOW 6938 - Special Topics

College of Health Professions and Sciences

SOW 6940 - Clinical Field Education

VAR Credit Hours

Contact Hours: 0

Admission to MSW program. Field education for Master of Social Work students; includes supervised practice of social work in an agency for 300 clock hours.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Social Work

SOW 6949 - Cooperative Education in Social Work

College of Health Professions and Sciences

SOW 7215 - Advances in Behavioral Health Policy in the US and Abroad

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to DSW program or C.I.

Critical analysis of the historical foundations and evolution of public policy in the United States and abroad.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 7339 - Community Partnership and Leadership in Behavioral Health Organizations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the DSW Program or C.I.

Critical analysis of the field of community behavioral health practice, including community accountability, community behavioral health assessment, organizing, policy advocacy, and social services and social change leadership in behavioral health organizations.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 7421 - Data Management for Decision Making in Behavioral Health Social

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to DSW program or C.I.

Evaluates types and uses of primary and secondary data relevant to behavioral health decision making and applications of data management and presentation through the use of innovative computer technology.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 7444 - Program Evaluation in Behavioral Health Organization

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Admission to DSW program or C.I.

Focuses on concepts, data, methods and dissemination of evaluation outcomes in behavioral health organizations that provide social work services.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 7450 - Grant Writing for Behavioral Health

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the DSW Program or C.I.

Advances knowledge and skills in grant writing for behavioral health program planning, service delivery, and intervention research.

Occasional

College of Health Professions and Sciences - School of Social Work

SOW 7492 - Theory Building in Social Work and Applied Social Science Disciplines**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Public Affairs Ph.D. program or C.I.

This advanced seminar in theory building will teach design, tools and methods used in social theory building.

Odd Fall

College of Health Professions and Sciences - School of Social Work

SOW 7494 - Conducting Evidence-based Practice Research in Social Work and Allied Fields**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Public Affairs Ph.D. program or C.I.

This is an advanced seminar in conducting evidence-based practice research. Analytical design and methods used in such research will be applied.

Even Spring

College of Health Professions and Sciences - School of Social Work

SOW 7910 - DSW Capstone II: Behavioral Health Leadership**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the DSW Program and Completion of DSW Capstone I or C.I.

A mentored research experience for students to complete a publishable article based on their completed review of evidence-based literature on a topic from Capstone I.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 7913 - DSW Capstone I: Behavioral Health Leadership

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s):

Admission to DSW Program or C.I.

Mentored research experience for students to consolidate the DSW curriculum by developing a systematic review of evidence-based literature applied to an area of behavioral health practice in the student's area of interest.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 7919 - Research

College of Health Professions and Sciences

SOW 7920 - Teaching Skills for Social Work Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the DSW Program or C.I.

Critically examines theory-based and evidence-based learning theory and employs experiential training using today's media and technology for teaching social work.

Fall

College of Health Professions and Sciences - School of Social Work

SOW 7935 - Innovations in Behavioral Health: Current Topics and Program Development Workshop

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to DSW Program or C.I.

Seminar on current topics in the field of behavioral health aimed at developing expertise in the design of programmatic responses to these emergent topics.

Spring

College of Health Professions and Sciences - School of Social Work

SOW 7939 - Special Topics

College of Health Professions and Sciences

SOW 7956 - Workshop in Dissemination of Behavioral Health Research and Scholarship

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the DSW Program or C.I.

Experiential practice in developing presentation and publishable works aimed at extrapolating from the literature state of the art theory informed evidence for advancing best practices in behavioral health management.

Spring

College of Health Professions and Sciences - School of Social Work

Sociological Analysis

SYA 5625 - ProSeminar

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Survey of conceptual issues, methodological concerns, and findings in substantive sociological areas that currently dominate scholarly inquiry, including such topics as crime, deviance, community, alcoholism, education.

Fall

College of Sciences - Department of Sociology

SYA 5917 - Directed Research

College of Sciences

SYA 5941 - Participatory Geographic Information Systems in Belize

SPA 6057 - Methods in School Speech-Language Pathology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

The study of essential concepts, methods and procedures used in school-based, speech-language pathology.

Occasional

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6204 - Articulation/Phonological Dis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

Advanced theory, diagnosis, and treatment of articulation/phonological disorders including developmental apraxia of

speech, dysarthria, and cleft palate; communicative differences vs. disorders emphasized.
Material and Supply Fee: \$44.65 *Fall, Spring, Summer*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6211C - Voice Disorders

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

Study of the etiology, evaluation, and management of voice disorders in children and adults, with laboratory demonstration and participation.

Material and Supply Fee: \$15.00 *Fall, Spring*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6225C - Fluency Disorders

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

Study of the theories, etiology, symptomatology and development of fluency disorders as well as assessment, differential diagnosis and management of disorders of fluency in children and adults with fluency failures.

Fall, Spring

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6236 - Motor Speech Disorders in Adults and Children

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders and SPA 6204 or C.I.

Evaluation and treatment of dysarthrias, apraxias, and other motor speech disorders in adults and children associated with neurological problems, brain injury and systemic disease.

Material and Supply Fee: \$17.00 *Fall, Spring, Summer*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6245 - Communication Disorders in Cleft Palate-Velopharyngeal Dysfunction

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6204, SPA 6211C, or C.I.

Introduction to the management of communication and feeding disorders related to cleft palate and/or velopharyngeal dysfunction.

Fall

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6327 - Aural Habilitation Rehab

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the Communication Sciences and Disorders master's program or C.I.

Principles and procedures involved in speech and language acquisition, management, utilization of residual hearing, speech reading, and the use of hearing aids.

Material and Supply Fee: \$28.49 *Fall, Spring, Summer*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6401 - Language Disorders in Infants and Toddlers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6496 .

Assessment and intervention of communication disorders in infants and toddlers incorporating transdisciplinary and family-centered models.

Material and Supply Fee: \$12.00 *Fall*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6410 - Aphasia and Related Disorders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

Evaluation and treatment of language disorders in adults with damage to the central nervous system, with an emphasis on etiology and differential diagnosis.

Material and Supply Fee: \$60.00 *Fall, Spring*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6417 - Cognitive/Communicative Disorders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6410 or C.I.

Evaluation and treatment of right hemisphere dysfunctions, traumatic brain injury, and dementias, with special emphasis on memory, cognition, pragmatics and other issues affecting functional communication.

Material and Supply Fee: \$60.00 *Spring*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6432 - Issues in Autism**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6402 or C.I.

Study of the diagnosis, assessment and intervention strategies for autism and related disorders.

Occasional

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6437 - Communication Foundations and Assistive/Instruction Technology for Communication**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Classroom approaches involving assistive/instructional technology used to meet communication needs of students with autism spectrum disorders and other communicative disorders.

Occasional

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6453 - Management of Cognitive-Communication Disorders in Traumatic Brain Injury**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6452 or C.I.

Management of cognitive-communication disorders in traumatic brain injury of school-aged and post-secondary students with emphasis on attention, perceptual skills, executive function, learning and social interaction.

Occasional

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6474 - Assessment and Management of Culturally and Linguistically Diverse Populations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to MA in Communication Sciences or C.I.

Role of native and second languages, dialects and culture in the assessment and management of individuals from culturally and linguistically diverse backgrounds.

Material and Supply Fee: \$60.00 *Fall, Spring*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6503 - Foundations of Clinical Practice Level II

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): 6551 or C.I. Corequisite(s): 6503L.

Seminar preparing graduate clinicians for practicum with pediatric/adolescents across varied communication disorders: clinical decision-making, generalization, transfer, maintenance, service delivery, ethics, public policy and professional issues.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6503L - Found Clinic Practice-II APP

1 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): SPA 6551 or C.I. Corequisite(s): SPA 6503.

Supervised practicum across a variety of communication disorders within the pediatric and adolescent population. May be repeated for credit. Minimum of 20 clock hours required.

Material and Supply Fee: \$20.80 *Fall, Spring, Summer*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6541 - Assessment of Language Disorders in Children and Adolescents

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.
The assessment of spoken and written language disorders in children and adolescents.
Material and Supply Fee: \$70.00 *Every Semester*

College of Health Professions and Sciences - Department of Communication Sciences and Disorders

SPA 6542 - Intervention of Language Disorders in Children and Adolescents

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.
The nature and treatment of spoken and written language disorders in children and adolescents.
Every Semester

College of Health Professions and Sciences - Department of Communication Sciences and Disorders

SPA 6551 - Foundations of Clinical Practice: Level I

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 0

Contact Hours: 1

Prerequisite(s): Admission to Communication Sciences and Disorders master's program or C.I.
Strategic application of knowledge in normal communication sciences and development to clinical practice through creating, testing and developing hypotheses about the nature of communication disorders.
Fall, Spring, Summer

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6553L - Clinical Practice in Differential Diagnosis in Speech and Language Pathology

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): SPA 6503, SPA 6503L or C.I.
Clinical application of diagnostic process and assessment procedures for a variety of communication disorders across the life span. May be repeated for credit.
Material and Supply Fee: \$44.00 *Fall, Spring, Summer*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6559 - Augmentative and Alternative Communication

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

The total integrated network of techniques, aids, strategies, and skills individuals use to supplement or replace inadequate natural speaking ability.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6563L - Clinical Practice and Instrumental Diagnostics in Individuals with Dysphagia**1 Credit Hours**

Class Hours: 0

Lab and Field Work Hours: 1

Contact Hours: 1

Prerequisite(s): Admission to Communication Sciences and Disorders MA and SPA 6565 and SPA 6943C.

Gain competency diagnosing and planning care in individuals with swallowing disorders across the lifespan. Students learn fluoroscopic interpretation and individualized care planning.

Every Semester

College of Health Professions and Sciences - Department of Communication Sciences and Disorders

SPA 6565 - Feeding and Swallowing Disorders**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in communication Sciences and Disorders and SPA 6211C or C.I.

Evaluation and management of feeding and swallowing disorders in children and adults.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6569 - Management of Upper Airway and Aerodigestive Disorders**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): SPA 6211C; SPA 6565.

Overview of the presentation, diagnosis, management and potential complications of common upper airway and aerodigestive disorders in adults and children.

Material and Supply Fee: \$42.00 *Occasional*

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6805 - Research in Communicative Disorders

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders and STA 2014C or STA 2023 or equivalent or C.I.

Introduction to empirical research in communicative disorders, with emphasis on hypothesis testing, research design, data analysis, and interpretation of results.

Fall, Spring, Summer

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6843 - Severe Language-Based Reading and Writing Disabilities

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to M.A. in Communication Sciences and Disorders or C.I.

Development, assessment, and instruction of reading, writing, and spelling, with emphasis on phonemic awareness, decoding, text comprehension, spelling, and written expression.

Spring

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 6909 - Research Report

College of Health Professions and Sciences

Supervised experience in the design, delivery and evaluation of a college course in communication sciences and

disorders.

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 7948 - Internship in Professional Development

2 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 2

Contact Hours: 2

Prerequisite(s): Admission to PhD in Education Communication Sciences and Disorders Track.

Supervised experience in the design, delivery and evaluation of professional development for educators in the area of communication sciences and disorders.

Fall

College of Health Professions and Sciences - School of Communication Sciences and Disorders

SPA 7980 - Dissertation

College of Health Professions and Sciences

Sport Business

SPB 6406 - Sport Law

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core and admission to the Sport Business Management program.

Legal issues applicable to a sports context, developing familiarity with the legal terminology and broad understanding of key concepts in tort, contract, constitutional and common law. Employment, labor, antitrust, and agency law are also key components of this course.

Fall

College of Business Administration - Dean's Office - College of Business Administration

SPB 6506 - Moral and Ethical Issues in Sport

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): CBA master's program of study foundation core, and acceptance into the Sport Business Management program.

Broad understanding of the moral and ethical issues in sport including a special focus on the responsibility of governing bodies and decision-makers in sport including faculty, coaches, athletic directors, presidents, league commissioners, the NCAA, and the media. Issues will also include equity for women and people of color, academic abuses of student-

athletes at the high school and college level, illegal recruitment of student-athletes, use of performance enhancing drugs, agents, and gambling.

Fall

College of Business Administration - Dean's Office - College of Business Administration

SPB 6606 - Diversity and Social Issues in Sport Business Management

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): CBA master's foundation core and admission to the Master of Sport Business Management.

The impact of diversity and social issues in sport as business imperative to achieve social responsiveness and financial performance in professional, collegiate, and Olympic sport.

Occasional

College of Business Administration - Dean's Office - College of Business Administration

SPB 6706 - Sport Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Completion of foundation core modules and admission to Master of Sport Business Management program. Analysis and application of statistics, operations research, and economic theory to current business challenges and opportunities within the sport business industry.

Summer

College of Business Administration - Dean's Office - College of Business Administration

SPB 6715C - Professional Selling in Sport

1.5 Credit Hours

Class Hours: 1.5

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): CBA master's program of study foundation core and admission to the Sport Business Management program.

This course offers a comprehensive understanding of the sales process in the sport area. An overview of sales theory and its applications in sports are examined.

Summer

College of Business Administration - Dean's Office - College of Business Administration

SPB 6716C - Strategic Sport Marketing

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 4

Prerequisite(s): CBA Masters Program of Study Foundation Core, and admission to the Sport Business Management program.

This course offers a comprehensive understanding of the marketing of sport and marketing through sport. Theoretical and practical applications of sport marketing are examined.

Occasional

College of Business Administration - Dean's Office - College of Business Administration

SPB 6725 - Leadership in Sport**1.5 Credit Hours**

Class Hours: 1.5

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): CBA master's program of study foundation core, and admission to the Sport Business Management program.

Theory, research, and practice of leadership in sports organizations. Special attention is given to contemporary leadership issues with leaders of sports industry leading many of the discussions. Examines the multiple roles that leaders can help sports organizations play in serving the community, including both traditional and creative philanthropy and case studies of model community service programs of sports teams, leagues, and college athletics departments. Lab Required.

Spring

College of Business Administration - Dean's Office - College of Business Administration

SPB 6735 - The Global Environment of Sport**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core, and acceptance into the Sport Business Management program.

With the continuing development of sport as a global enterprise comes the need to understand the global environment. The focus of this course is on the international business environment and how sport may best operate within that environment.

Occasional

College of Business Administration - Dean's Office - College of Business Administration

SPB 6806 - Business of Sport Media**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CBA master's program of study foundation core, and acceptance into the Sport Business Management program.

History of how media has evolved from radio, network television and magazines into the multi-dimensional world of regional and national cable, the internet, the networks, huge rights fees and other new elements. The way sports media provides so much of the revenue for sports as an entertainment industry has made it the anchor for the sports industry.

Sports Management

SPM 5155 - Introduction to Sports Administration

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or C.I.

This course will provide an overview of the sports industry. Fundamental leadership administration and research theories as well as information on current issues are emphasized.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

SPM 5308 - Marketing and Promoting Sports and Fitness Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to Kinesiology MS or C.I.

Introduces students to all aspects of sports marketing including planning, organizing, marketing, evaluating, and conducting special and sport events.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

SPM 6106 - Planning and Operating Facilities for Sports and Fitness Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

This course will provide students with an understanding of the factors involved in planning, designing, equipping, and managing of sport facilities and event logistics.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

SPM 6158 - Leadership and Management in Sports and Fitness Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

C.I. Examines leadership, management fundamentals, professional knowledge, sports personnel and evaluation systems, leadership ethics, and communication skills required of leaders in the sports industry.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

SPM 6726 - Legal Issues in Sports and Fitness Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

This course examines major legal issues in sports leadership. Emphasis is on providing legally sound programs that reduce the risk of litigation.

Occasional

College of Health Professions and Sciences - School of Kinesiology and Physical Therapy

Statistics

STA 5104 - Advanced Computer Processing of Statistical Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4163 and knowledge of a programming language, graduate status or senior standing, or C.I. Use of SAS and other statistical software packages; data manipulation; graphical data presentation; data analysis; creating analytical reports.

Fall

College of Sciences - Department of Statistics

STA 5176 - Introduction to Biostatistics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4163 or STA 4173, graduate status or senior standing, or C.I.

Fixed-effects model, random-effects model, repeated measures design, logistic regression, survival analysis, Kaplan-Meier estimates, proportional hazards model.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 5205 - Experimental Design

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4164, STA 5206 or ESI 5219, and graduate status or senior standing, or C.I.

Construction and analysis of designs for experimental investigations. Blocking, randomization, replication; Incomplete block designs; factorial and fractional designs; design resolution.

Spring

College of Sciences - Department of Statistics

STA 5206 - Statistical Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 2023; not open to students who have completed STA 4164. Graduate status or senior standing or C.I.

Data analysis; statistical models; estimation; tests or hypotheses; analysis of variance, covariance, and multiple comparisons; regression and nonparametric methods.

Fall

College of Sciences - Department of Statistics

STA 5505 - Categorical Data Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4163 or STA 5206, and graduate status or senior standing or C.I.

Considers discrete probability distributions, contingency tables, measures of association, and advanced methods, including loglinear modeling, logistic regression, McNemar's Test, Mantel-Haenszel test.

Occasional

College of Sciences - Department of Statistics

STA 5703 - Data Mining Methodology I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 5104 and STA 5206, graduate status or senior standing, or C.I.

Supervised data mining tools including boosting trees, SV machine, regression, and neural network will be covered. The Enterprise Miner (R or Python) will be used.

Fall

College of Sciences - Department of Statistics

STA 5735 - Fundamental Data Analytical Methodology with Business Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 5104 An Analytical Programming Language PYTHON or R, or C.I.

Introduce methods to prepare structured and unstructured data that will then be used with modeling techniques, for the purpose of uncovering hidden knowledge and information in the data.

Fall

College of Sciences - Department of Statistics and Data Science

STA 5736 - Advanced Data Analytical Methodology with Business Applications

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and A Programming Language such as PYTHON and R, or C.I.

Learn to apply advanced analytical techniques to build models of real-world data collected from a variety of sources. These models are used to uncover data patterns and behaviors that can be used to support decision-making and to predict new business opportunities.

Spring

College of Sciences - Department of Statistics and Data Science

STA 5737 - Fundamental and Advanced Data Analytical Methodology with Business Applications

6 Credit Hours

Class Hours: 6

Lab and Field Work Hours: 0

Contact Hours: 6

Prerequisite(s): STA 5104, or C.I.

The applications of data analytics for business. Emphasis is made on students being able to use the techniques in a variety of situations.

N Spring

College of Sciences - Department of Statistics and Data Science

STA 5738 - Data and Analytical Methodology for Metropolitan and Regional Areas

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): COP 4020, or STA 4102, or C.I.

Examining tools and methodologies for analyzing urban data collections. This information can assist in the emergence of smart cities. Practice and theory will be covered.

Fall

College of Sciences - Department of Statistics and Data Science

STA 5825 - Stochastic Processes and Applied Probability Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4321, and graduate status or senior standing or C.I.

Conditional probability and conditional expectations, sequences of random variables, branching processes, random walks, Markov chains, recurrent events, renewal theory, queueing theory, and simple stochastic processes.

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6106 (or Knowledge of programming with R and Python) and STA 6329 (or knowledge of Matrix Algebra).

Monte Carlo for inferential statistics, bootstrap, Jackknife, cross-validation, Karush-Kuhn-Tucker (KKT) optimality conditions, Strong duality, SVM, least squares SVM, MCMC, Metropolis Hastings algorithm, Gibbs sampling, Ridge regression (Tikhonov regularization), lasso, EM algorithm, kernel methods, QR decomposition, updating methods.

Spring

College of Sciences - Department of Statistics

STA 6136 - Probability and Statistics for Business Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to the MSM Business Analytics program.

Introduction to the main tools of probability and statistics used in business analytics.

Occasional

College of Sciences - Department of Statistics

STA 6223 - Conventional Survey Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 5206 and graduate student standing, or C.I.

Design of conventional finite population sample surveys; Stratified, systematic, and multistage cluster sampling designs, ratio and regression estimators, non-response bias.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 6224 - Bayesian Survey Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 5206, STA 6222, or C.I.

Bayesian methods for survey design and analysis of survey data.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 6226 - Sampling Theory and Applications**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4321.

Different techniques of sampling, sampling for proportions, choosing sample size, ratio estimates, effects of sampling and non-sampling errors.

Occasional

College of Sciences - Department of Statistics

STA 6236 - Regression Analysis**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAS 3105 and STA 4164.

General linear model, model aptness and remedial measures, regression through the origin, independent and dependent indicator variables, multicollinearity, outliers, biased regression.

Fall

College of Sciences - Department of Statistics

STA 6237 - Nonlinear Regression**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6236 (or knowledge of linear regression).

Nonlinear regression: model specification, diagnostics. Estimation: nonlinear least squares, SAS, Gauss Newton algorithm. Robust regression: M-estimation adaptive robust regression. Logistic regression, Poisson regression.

Occasional

College of Sciences - Department of Statistics

STA 6238 - Logistic Regression

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6236.

Studies of logistic regression models: estimation, interpretation, model building strategies and assessments, and polytomous regression, SAS programming in the application of logistic regression modeling.

Spring

College of Sciences - Department of Statistics

STA 6246 - Linear Models

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6329, STA 4164, and STA 4322.

Theoretical development of full rank linear statistical models, least squares and maximum likelihood estimation, interval estimation, hypothesis testing, and introduction to less than full rank models.

Spring

College of Sciences - Department of Statistics and Data Science

STA 6326 - Theoretical Statistics I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAC 2313.

Distribution of random variables, conditional probability and independence, some special distributions, distributions of functions of random variables, limiting distributions.

Fall

College of Sciences - Department of Statistics

STA 6327 - Theoretical Statistics II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6326.

Point estimation, sufficient statistics, completeness, exponential family, maximum likelihood estimators, statistical hypotheses, best tests, likelihood ratio tests, noncentral distributions.

Spring

College of Sciences - Department of Statistics

STA 6329 - Statistical Applications of Matrix Algebra

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MAC 2313 and STA 4164 or STA 5206.

Basic theory of determinants, inverses, generalized inverses, eigenvalues and eigenvectors, partitioned matrices.

Diagonalization and decomposition theorems, least squares and statistical applications.

Fall

College of Sciences - Department of Statistics

STA 6346 - Advanced Statistical Inference I

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6327.

Decision rules, risk functions, utility theory, the loss function, prior information and subjective probability, Bayesian analysis.

Occasional

College of Sciences - Department of Statistics

STA 6347 - Advanced Statistical Inference II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 6346, or C.I..

Minimax analysis, invariance, admissibility, maximal invariants, sequential analysis.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 6507 - Nonparametric Statistics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4321.

Theory and methods for one and two sample problems; one and two way layouts; independence problems; regression problems.

Occasional

College of Sciences - Department of Statistics

STA 6662 - Statistical Methods for Industrial Practice

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 4164 or C.I.

Variance components, PCRs, autocorrelation structures, charting, EVOP, design strategies, calibration, standards, and associated awards.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 6704 - Data Mining Methodology II

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): STA 5703.

Unsupervised learning methods such as cluster analysis, association analysis and newly developed tools will be covered. The Enterprise Miner (R or Python) will be used.

Spring

College of Sciences - Department of Statistics

STA 6705 - Data Mining Methodology III

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing and STA 5703, or C.I.

Current topics in data mining.

Occasional

College of Sciences - Department of Statistics and Data Science

STA 6707 - Multivariate Statistical Methods

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): MAS 3105, STA 4163, and STA 4322.
Concepts of statistical relationships among several variables and methods for inference. Multivariate normal, Hotelling's T-Squared, multivariate analysis of variance, canonical correlations and principal components.
Occasional

College of Sciences - Department of Statistics

STA 6709 - Spatial Statistics

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

STA 6707 and STA 5825. Statistical models and methods for analyzing data that are collected at different spatial locations and/or at different times, spatial or spatio-temporal data.

Even Spring

College of Sciences - Department of Statistics

STA 6714 - Data Preparation

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): STA 5104.
Variable selections, missing value imputation, text, time series, and new data preparation method will be covered. The Enterprise Miner (R or Python) will be used.

Spring

College of Sciences - Department of Statistics

STA 6857 - Applied Time Series Analysis

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): STA 4322, MAS 3105.
Stationarity, autocorrelation, moving averages and autoregressive processes. Non-stationary time series. Identification and estimation. Forecasting.

Occasional

College of Sciences - Department of Statistics

STA 6909 - Research Report

College of Sciences

STA 6918 - Directed Research

College of Sciences

STA 6938 - Special Topics

College of Sciences

STA 6949 - Cooperative Education in Statistics

College of Sciences

STA 7239 - Dimension Reduction in Regression

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 6236 or STA 5206. Reducing the number of random variables/features in regression, feature selection and extraction, kernel principal component analysis, locally linear embedding.

Occasional

College of Sciences - Department of Statistics

STA 7348 - Bayesian Modeling and Computation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 5703 and STA 6704. Bayesian model, prior specification, basics of decision theory, Markov chain Monte Carlo, Bayes factor, empirical Bayes, Bayesian linear regression and generalized linear models, hierarchical models.

Occasional

College of Sciences - Department of Statistics

STA 7719 - Survival Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 6326 and STA 6327, or C.I. Censoring, hazard and survival functions, Kaplan-Meier estimator, lifetime table, partial likelihood, Cox proportional hazards model, accelerated failure time model.

Even Spring

College of Sciences - Department of Statistics

STA 7722 - Statistical Learning Theory

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 6329, STA 6327, and STA 6106. Discuss when statistical learning algorithms work and why by focusing on developing a theoretical understanding of the statistical properties of learning algorithms.

Even Fall

College of Sciences - Department of Statistics

STA 7734 - Statistical Asymptotic Theory in Big Data

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 6327 and STA 6704. Asymptotic theory of statistics, with an array of applications to motivate as well as demonstrate its utility in addressing problems in Big Data research.

Even Fall

College of Sciences - Department of Statistics

STA 7920 - Statistical Colloquium

0 Credit Hours

Class Hours: 0

Lab and Field Work Hours: 0

Contact Hours: 0

Prerequisite(s): Admission to the PhD program in the Department of Statistics and Data Science, or C.I. Introduces students to new variety of topics in statistics and big data analytics.

Odd Fall, Even Fall, Odd Spring, Even Spring

College of Sciences - Department of Statistics

STA 7935 - Current Topics in Big Data Analytics

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 5703 and STA 6704. Discussion of new and current techniques developed to solve big data problems that are not covered in current big data analytic courses.

Occasional

Student Development Services

SDS 5917 - Directed Research

College of Community Innovation and Education

SDS 5937 - Special Topics

College of Community Innovation and Education

SDS 6308 - Applied Practice in Career Services

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

SDS 6347 and SDS 6XXX Career and College Readiness in Schools PK-12. This course provides an opportunity to work with individuals in various school and community settings to experience career development activities.

Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

SDS 6347 - Career Development

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

A study of career development theories, occupational and educational information, approaches to career decision-making life-style and leisure in the development of the whole person.

Summer, Fall

College of Community Innovation and Education - Department of Counselor Education and School Psychology

SDS 6411 - Counseling with Children and Adolescents

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): EGC 6436 and EDF 6155 or C.I.

Study of counseling theory, process, and techniques as applied to children and adolescents. Course will contain an experiential component.

Spring

College of Community Innovation and Education - Department of Counselor Education and School Psychology

SDS 6620 - Coordination of Comprehensive Professional School Counseling Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): MHS 5005, MHS 6400, MHS 6401, MHS 6500, MHS 6702.

In-depth analysis of comprehensive developmental professional school counseling programs, including the coordination of these programs.

Odd Spring, Summer

College of Community Innovation and Education - Department of Counselor Education and School Psychology

SDS 6622 - Career and College Readiness in Schools PK-12

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. This course provides graduate students and practitioners with a developmental overview of child and adolescent career growth focusing on interventions for career education and counseling.

Teaching English as a Second Language

TSL 5085 - Teaching Language Minority Students in K-12 Classrooms

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to College of Education Master of Arts Program or C.I.

Teaching K-12 limited English proficient (LEP) students. Florida standards regarding cross-cultural communication, ESOL curriculum, and materials, ESOL methodology, testing and evaluation of ESOL students, applied linguistics.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

TSL 5325 - ESOL Strategies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

This course will survey cross-cultural communication and understanding, testing and evaluation, curriculum and methods of teaching ESOL to meet the needs of limited English proficient students.

Occasional

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 5345 - Methods of ESOL Teaching

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course is designed to develop understanding, knowledge and skills of the current methods used in the teaching of

ESOL.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

TSL 5376 - Reading and Writing in a Second Language

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Theoretical and pedagogical approaches to ESOL reading and writing.

Occasional

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 5380 - Computers and Technology for ESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Emphasizes research in computer assisted language learning, as well as design and evaluation of software and websites for learning English as a second language.

Even Summer

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 5525 - ESOL Cultural Diversity

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

This course is designed to identify major cultural groups represented by the LEP population in Florida schools and to understand their special needs.

Summer

College of Community Innovation and Education - School of Teacher Education

TSL 5601 - Second Language Vocabulary Learning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Considers lexical issues encountered by second language learners; explores best practices for learners and their teachers and examines current research for pedagogical application.

Occasional

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 5917 - Directed Research

College of Arts and Humanities

TSL 5937 - Special Topics

College of Community Innovation and Education

TSL 5940 - Issues in TEFL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate status or senior standing or C.I.

Address issues specifically related to TEFL, such as materials adaptation, teaching in multi-level classrooms, learning styles, cultural issues, and curriculum syllabus design.

Spring

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6142 - Critical Approaches to ESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Emphasis placed on current research in second language acquisition as it relates to the development of ESOL curriculum and materials.

Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6143 - Curriculum and Instruction in Dual Language Programs

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

This course is an introduction to methods and research in teaching of literacy to all bilingual learners, using the home

language and new language.

Spring

College of Community Innovation and Education - School of Teacher Education

TSL 6250 - Applied Linguistics in ESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Applying linguistics, psycholinguistics, and sociolinguistics to teaching English as a second language with emphasis on pronunciation, intonation, structural analysis, morphophonemics, and decoding from print to sound.

Spring

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6252 - Sociolinguistics for ESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Core concepts in the field of sociolinguistics as it relates to the teaching of English as a second language.

Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6350 - Grammar for ESOL Teachers

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Emphasis on English grammar for English as a Second Language teachers. Includes analytical and theoretical background, but primarily examines problematic grammar points for ESOL learners.

Occasional

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6374 - TESOL Listening, Speaking and Pronunciation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Graduate standing or C.I. Applications of second language acquisition theories, principles, and current research as they relate to the teaching of ESL listening, speaking and pronunciation.

Even Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6377 - Bilingualism, Multiculturalism, and Biliteracy in the Dual Language Classroom

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course is an introduction to methods and research in teaching of literacy to all bilingual learners, using the home language and new language.

Fall

College of Community Innovation and Education - School of Teacher Education

TSL 6379 - Second Language Literacy

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TSL 5085 or TSL 5345 AND TSL 6250.

An overview of literacy issues and literacy instruction for second language learners.

Even Fall

College of Community Innovation and Education - School of Teacher Education

TSL 6440 - Assessment Issues in TESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course provides for the development of sound assessment knowledge necessary to prepare students to apply second language assessment theories, principles, and current research.

Even Fall, Even Spring

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6442 - Fundamentals of Standardized Assessment in TESOL

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0
Contact Hours: 3

Graduate standing or C.I. This course will address the standardized assessment practices in TESOL as well as the instructional and research implications.

Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6443 - Assessment in Dual Language Programs

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate Standing or C.I.

This course provides a foundation for assessing language and academic proficiency in dual language programs.

Spring

College of Health Professions and Sciences - School of Social Work

TSL 6526 - Interdependencies of Language, Culture, and Education for Dual Language Learners

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s):

Graduate Standing or C.I.

This course focuses on the interdependencies of language, culture, and education as they relate to dual language learners.

Summer

College of Community Innovation and Education - School of Teacher Education

TSL 6600 - Second Language Vocabulary Acquisition

3 Credit Hours

Class Hours: 3
Lab and Field Work Hours: 0
Contact Hours: 3

Prerequisite(s): Graduate standing or C.I. and one of the following graduate research courses: TSL 6640, EDF 6481, EDF 7475, EDF 7403.

Research on how learners acquire new vocabulary in a second language. Course requires extensive reading as well as original field research.

Even Spring

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6640 - Research in Second Language

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

This course focuses on research into language learning processes which serves as a knowledge base for effective teaching of language-minority students.

Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6642 - Issues in Second Language Acquisition

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TSL 6250, TSL 6640.

Focuses on second language acquisition theories, principles, and current research as they relate to language-minority students acquiring English as a Second Foreign Language.

Even Spring

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6643 - Diachronic Analysis of Second Language Acquisition Processes

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Analysis of current research on second language acquisition (SLA) processes across the life span.

Odd Fall

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6909 - Research Report

College of Arts and Humanities

TSL 6938 - Special Topics

College of Arts and Humanities

TSL 6940 - ESOL Practicum

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Techniques and strategies for creating effective lesson plans for ESOL classroom activities.

Fall, Spring, Summer

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 6971 - Thesis**VAR Credit Hours**

Contact Hours: 0

This course is intended for graduate students in the TESOL MA program who wish to exercise the option of writing a thesis. May be repeated for credit.

Occasional

College of Arts and Humanities - Department of Modern Languages and Literatures

TSL 7006 - Second Language Teacher Preparation**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Admission to TESOL Ph.D. track or C.I.

Examines the history of general and second language teacher preparation and provides a theoretical and practical rationale for the development of knowledge, skills, and dispositions necessary to prepare ESL and other teachers of English learners.

Even Spring

College of Community Innovation and Education - School of Teacher Education

TSL 7948 - Doctoral Internship**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Students work with faculty members to develop teaching competency and research focus through a professional teaching experience. May be used in the degree program a maximum of 2 times.

Fall, Spring

College of Community Innovation and Education - School of Teacher Education

TSL 7980 - Dissertation Research

VAR Credit Hours

Class Hours: 0-99

Contact Hours: 0-99

Prerequisite(s): Student must be in candidacy.

This is a dissertation research course. May be repeated for credit.

Fall, Spring, Summer

College of Community Innovation and Education - School of Teacher Education

Theatre Performance and Performance Training

TPP 5087C - Theatre Careers in Performance

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Admission to the MFA and MA programs in Theatre. Techniques needed to secure employment in performance or related fields.

Even Spring

College of Arts and Humanities - School of Performing Arts

TPP 5125C - Improvisation Studio

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Acting for Youth Theatre.

A study of spontaneous dramatic play and theatre exercises designed to develop self-discipline, creative freedom and resources for the stage and classroom.

Odd Fall

College of Arts and Humanities - School of Performing Arts

TPP 5156C - Acting Studio I

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to the MFA Acting program.

An advanced scene study course using Shakespeare's canon to explore scene analysis, character development, and application of acting techniques.

Even Fall

College of Arts and Humanities - School of Performing Arts

TPP 5157C - Acting Studio II

3 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): TPP 5156C.

Advanced scene study course applying acting methodologies to the works of modern playwrights.

Odd Spring

College of Arts and Humanities - School of Performing Arts

TPP 5246C - Circus Arts

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to Theatre graduate program or C.I

Circus skills and history.

Even Spring

College of Arts and Humanities - School of Performing Arts

TPP 5248C - Storytelling as a Theatrical Art Form

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 2

Contact Hours: 4

Prerequisite(s): Admission to Theatre graduate program or C.I.

Application of storytelling as an art form.

Spring

College of Arts and Humanities - School of Performing Arts

TPP 5273 - Musical Theatre Acting I

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): TPP 5157C.

Integrated study in musical theatre acting, singing and movement applied to musical theatre performance, direction and choreography; emphasizing developing skills in textual and musical interpretation.

Occasional

College of Arts and Humanities - School of Performing Arts

TPP 5278C - Musical Theatre Lab

1 Credit Hours

Class Hours: 1

Lab and Field Work Hours: 1

Contact Hours: 2

Prerequisite(s): TPP 5157C.

Practical course in developing musical theatre skills for the actor.

Spring

College of Arts and Humanities - School of Performing Arts

TPP 5289C - Acting Methodologies

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 3

Contact Hours: 5

Prerequisite(s): Admission to the graduate program in Theatre or C.I.

Approaches to acting.

Even Fall

College of Arts and Humanities - School of Performing Arts

TPP 5386C - Directing for Young Audiences

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): THE 5910 and THE 5385.

Study of the principles, procedures, and practices of stage direction as it applies to theatre for young audiences.

Odd Spring

College of Arts and Humanities - School of Performing Arts

TPP 5515 - Movement Studio I

2 Credit Hours

Class Hours: 2

Lab and Field Work Hours: 0

Contact Hours: 2

Prerequisite(s): Admission to MFA Performance Program.

Graduate level course in principles and methods of movement for the stage focusing on relaxation, centering, increased physical control, and physical development of a character.

Fall

Contact Hours: 3

Prerequisite(s): CGN 5555 or C.I.

The course explores the impact of information technologies on sustainable mobility and the transformation towards complete streets.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 5532 - Policy Aspects of Smart City Transportation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGN 5555 or C.I.

Provide an overview of the policy aspects of transportation in Smart Cities. Introduce policy implications of Big Data and Analytics in a Smart Cities.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 5805 - Geometric Design of Transportation Systems**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 3810 or C.I.

Study of highway geometric design in the engineering of transportation systems.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 5835 - Pavement Engineering**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

EGN 3331C, CGN 3501C, CEG 4011C. Materials, analysis, evaluation, and management of pavement and pavement systems.

Even Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 5917 - Directed Research

College of Engineering and Computer Science

TTE 5937 - Special Topics

College of Engineering and Computer Science

TTE 6205 - Highway Capacity**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 6256 or TTE 5204 or C.I.

Highway capacity for all functional classes of highway. Traffic signalization including traffic studies, warrants, cycle length, timing, phasing and coordination.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6256 - Traffic Operations

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 4274 or C.I.

Fundamentals of traffic flow theory and applications to traffic operations on highways and streets. Work on real life traffic operations project and report results.

Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6270 - Intelligent Transportation Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 6256 or TTE 5204 or C.I.

Theories and applications of intelligent vehicle highway systems in transportation engineering.

Odd Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6275 - Connected and Autonomous Vehicles

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 3810 or C.I.

Explain Connected, Automated and Autonomous vehicles' technologies and current and future applications, their expected benefits for transportation safety, operation, social and economic, and potential impact.

Even Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6315 - Traffic Safety Analysis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): TTE 5805 or TTE 5204 or C.I.

Understanding crash research concepts, and identifying factors contributing to traffic crash occurrence.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6526 - Planning and Design of Airports**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Background of aviation and airport development, aircraft characteristics. Planning and design of airport components. Heliport and STOL ports and pavement and drainage design.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6533 - Mobility in Smart Cities: Technologies and Application Areas**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): CGN 5555 or C.I.

The course introduces students to research developments in intelligent transportation systems infrastructure with a focus on video-based data collection and networks connectivity.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6608 - Algorithms and Models for Smart Cities**3 Credit Hours**

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

STA 5206 or C.I. Cities as complex systems, urban geo-location data collection and processing, data exploration and geo-visualization, classification techniques, urban mobility models. and urban networks.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6625 - Mass Transportation Systems

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): C.I.

Planning, design, construction, operation, and administration of mass transportation systems.

Occasional

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6667 - Discrete Choice Modeling in Transportation

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

TTE 4274 or STA 5206(or equivalent) or C.I. Multivariate regression analysis, individual choice theory, random utility frameworks, ordered and unordered response models, maximum likelihood approaches, and recent advances in the field.

Odd Fall

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6909 - Research Report

College of Engineering and Computer Science

TTE 6910 - Travel Technology and Analytics Capstone Course

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Completion of TTA core courses (HMG 6710, HMG 6449, ESI 6251, TTE 6667, TTE 6608) or C.I. permission.

Identification of problems and design, implementation, and evaluation of appropriate technological and analytical solutions to meet current and future needs in the global travel industry.

Spring

College of Engineering and Computer Science - Department of Civil, Environmental, and Construction Engineering

TTE 6918 - Directed Research

College of Engineering and Computer Science

TTE 6938 - Special Topics

College of Engineering and Computer Science

Urban and Regional Planning

URP 6711 - Sustainable Transportation Planning

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Admission to Master of Urban and Regional Planning program or C.I. Planning for multimodal transportation, including highway/automobile, public transit, pedestrian, bicycling and rail systems, to explore the social, economic and health implications to communities.

Occasional

College of Community Innovation and Education - School of Public Administration

Women's Studies

WST 5108 - Global Women in Crisis

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or C.I.

Examines how crisis shapes women's lives around the world through the lens of Feminist Theory from a global, multi-cultural perspective, combined with global feminist activism.

Fall

College of Arts and Humanities - Department of Women's and Gender Studies

WST 5347 - Research in Women and Gender Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing or senior standing, or C.I.

To explore feminist research methodologies and investigate relationships among feminist theory, research, social change, and gender equality as experienced at the workforce in private, public and non-profit spheres.

Even Fall

College of Arts and Humanities - Program in Women's Studies

WST 5601 - Theories in Gender Studies

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 0

Contact Hours: 3

Prerequisite(s): Graduate standing, Gender Studies graduate certificate standing, or C.I.

Foundational scholarship in gender studies, with emphasis on theoretical and interdisciplinary approaches to gender and sexuality.

Even Fall

College of Arts and Humanities - Program in Women's Studies

WST 5917 - Directed Research

College of Arts and Humanities

WST 5937 - Special Topics

College of Arts and Humanities

WST 5957 - Study Abroad

College of Arts and Humanities

Zoology**ZOO 5456C - Ichthyology****4 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 6

Contact Hours: 8

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Introduction to the biology of the fishes, their classification, evolution, and life histories.

Even Fall

College of Sciences - Department of Biology

ZOO 5463C - Herpetology**4 Credit Hours**

Class Hours: 2

Lab and Field Work Hours: 4

Contact Hours: 6

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, Certificate in Conservation Biology, PSM in Conservation Biology, or C.I.

Introduction to the biology of the amphibians and reptiles, their classification, evolution, and life histories.

Material and Supply Fee: \$60.00 *Odd Spring*

College of Sciences - Department of Biology

ZOO 5475L - Field Ornithology

3 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 1

Contact Hours: 3

A comprehensive introduction and appreciation for the evolutionary history, diversity, ecology, biology, and behavior of birds such as disciplines, evolutionary biology and psychology.

Material and Supply Fee: \$30.00 *Odd Fall*

College of Sciences - Department of Biology

ZOO 5486 - Mammalogy

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 0

Contact Hours: 4

Prerequisite(s): Admission to the M.S. in Biology, Ph.D. in Conservation Biology, PSM in Conservation Biology, or Certificate in Conservation Biology, or C.I.

Study of the diversity and biology of mammals from an evolutionary perspective.

Even Spring

College of Sciences - Department of Biology

ZOO 5745C - Neuroanatomical Pathways and their Neurotransmitters

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): Human/Comparative Anatomy, or Human/Animal Physiology or C.I.

Fundamental concepts of both morphological and functional organization of the nervous system. Primary emphasis on human structure.

Material and Supply Fee: \$15.00 *Occasional*

College of Medicine - Department of Molecular and Microbiology

ZOO 5748C - Clinical Neuroanatomy

5 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): ZOO 3733C Human Anatomy.

Provides the necessary knowledge to understanding the complexities of human nervous system, its normal and pathologic functions, relevant to practice of general medicine and/or neuroscientists.

Fall

College of Medicine - Department of Molecular and Microbiology

ZOO 5749C - Clinical Neuroscience

5 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 2

Contact Hours: 5

Prerequisite(s): ZOO 3733C and ZOO 3744, or ZOO 3733C and ZOO 4743C or ZOO 5748C, or equivalents.

Clinically oriented teachings of neuroscience areas including selected topics in neuropathology, neuro-oncology, neuroimmunology, neuropharmacology, and neurodiagnostics.

Spring

College of Medicine - Department of Molecular and Microbiology

ZOO 5758C - Vertebrate Histology

4 Credit Hours

Class Hours: 3

Lab and Field Work Hours: 3

Contact Hours: 6

Prerequisite(s): Graduate standing and college-level Human Anatomy, Human Physiology or Introduction to Histology.

Microanatomical detail plus appropriate developmental and functional considerations of major cell types, primary tissues, organs, and organ systems. Survey of modern animal-tissue microtechnique.

Spring

College of Medicine - Burnett School of Biomedical Sciences

ZOO 5917 - Directed Research

College of Sciences

ZOO 5937 - Special Topics

College of Sciences

ZOO 6737 - Clinically Oriented Human Anatomy

4 Credit Hours

Class Hours: 4

Lab and Field Work Hours: 6

Contact Hours: 10

Human Anatomy ZOO 3733 or equivalent. Clinically Orientated Human Anatomy (COHA) is an advanced course

focusing on integrated functional anatomy by means of problem-based learning and project-based learning.
Summer

College of Medicine - Burnett School of Biomedical Sciences

ZOO 6909 - Research Report

College of Sciences

ZOO 6918 - Directed Research
