- C14
- Flotation
- Pollen
- Sediment/Soil
- Other: \_\_\_\_\_

Description: \_\_\_\_\_

\*Sunny, 40°F/50°F

NOTES:

- Orientated North to South
- Surface level, pottery sherds found, conch fragments/wholes
- <sup>found</sup> ~~Riverine~~ <sup>possible</sup> bivalves, very rocky substrate, possible calcium deposits
- Bone fragments and charcoal discovered at approx. 30cm
- Soil change from dark gray to orangey brown 69cm
- Hit hard "pac" substrate
- Lots of various shells, mollusks (fragments) ~~conchide~~ shell fragments and larger (mediumish) charcoals
- Burnt bone discovered 83cm and burnt sherd
- Called at 92cm because cannot get through hardpac <sup>→ contained shell ~~and~~</sup>

+ As we oriented North-South one of the first shovel-fulls were full of pottery sherds, conch fragments/wholes, and bivalves were found. As we continued the substrate was full of roots and at around 30cm we began to find bone fragments such as vertebrae and unidentifiable bone fragments. At 69cm there was a soil change from dark gray to an orangey color. As we dug further we hit hard-pac substrate, but still found bones and various shells, along with charcoal. Burnt bone was ~~found~~ discovered at 83cm along with burnt sherd. Multicolored substrate noted and at 92cm the dig was called due to hardpac substrate.

 Artifacts Density:  Increases with depth  Decreases with depth  Same  NA  
 Artifacts Distribution:  Evenly distributed  Concentrated in one of more areas/levels  NA  
 Description: Concentrated to 10-20 cm

**ARTIFACT CONTENT:**

- Prehistoric Ceramics  Lithics  Shell  Modified Shell  Faunal Remains  Charcoal  
 Modified Faunal Remains  Human Remains  Metal  Glass  Historic Ceramics  Masonry  
 Bead  Coin  Bottle  Fired Clay/Daub  Other: ceramics, possibly modern

Description: or historic

**FEATURES:**

- Yes  No Depth Below Surface: \_\_\_\_\_ Size: \_\_\_\_\_ cm  
 Possible Post Mold  Hearth  Burial  Trash Pit  Well  Cistern  Foundation  
 Artifact Concentration  Living Floor  Charcoal Concentration  Midden  Soil Discoloration  
 Other: \_\_\_\_\_  Unknown at this time

Description: \_\_\_\_\_

**SPECIAL SAMPLES:**

- Yes  No Special Sample Number: \_\_\_\_\_  
 C14  Flotation  Pollen  Sediment/Soil  Other \_\_\_\_\_

Description: \_\_\_\_\_

**NOTES:**

- STP 4 skipped per Tom
- about 50 M from the highway, can see fence to the south of the boundary from STP
- top layer of soil has quite a few natural shells
- first odd ceramic at 10cm, another 2 at 20cm
- soil change from sandy dry gray to wet, dark orange, from that to a more dry honey mustard color
- shells throughout, quite easy to sift all the way through
