## Correction to: Sports Medicine

<https://doi.org/10.1007/s40279-021-01516-8>

Tables 6, 7, 11 and 12 each include a header cell, near the top, stating the wording “Proportion of sig. analyses (without studies with > 4 comparisons)”. Table 6 also features a header cell at the bottom, stating “Proportion of sig total Locomotor/ Coordination /Stability analyses without studies with > 4 comparisons”.

Rather than stating “...without studies with > 4 comparisons” the text in each of these cells should read “...without studies with many comparisons”.

The original article has been updated.
