## Welcome to Central Washington University

At Central Washington University, we like to say: "You belong here."

It is a simple but powerful message that I believe correctly expresses how we feel about our students at Central Washington University. It means that at Central, you will find professors who know your name and want you to succeed. It means we are a university where you are welcome to become the person you want to be. It means an affordable education from topnotch faculty who teach the subjects you want to know.

One of the best ways to succeed at Central is by getting involved in available co-curricular activities ranging from student sports clubs and student government to community organizations and research teams. Join a club, play a sport, or volunteer with a student organization. Getting involved enhances your Wildcat experience and provides lifelong benefits and friends.

I would be remiss if I failed to mention that Ellensburg, home of CWU's residential campus, is an amazing place. Located on the east side of the Cascades, we are minutes away from fantastic mountains, nature trails, the Yakima River, and a host of other outdoor recreational opportunities. The community offers plenty of choices for dining, shopping, and community events.

Of course, one of the advantages of choosing Central Washington University is that we offer a variety of ways for you to learn. Students at one of our eight university centers or facilities can earn course credit and degrees that meet their individual needs while allowing them to remain close to home.

Additionally, Central provides a host of online classes and certifications. In fact, when it comes to online learning, few universities can compare to CWU. Several of our programs, including psychology, professional and creative writing, and information technology and administrative management, have been named among the nation's top online programs, and last year a national college rating website named Central the best value online school in the state of Washington.

By enrolling at Central, you have taken an important step by becoming a member of the Wildcat family. We are diverse and inclusiveCWU was recently the only Washington state university given the prestigious Higher Education Excellence in Diversity (HEED) awardalong with being friendly and welcoming. At Central, you will find a nurturing environment with a strong foundation in the principles of respect, support, and acceptance.

One of the best parts of my job is getting to meet and know our students; so, when you see me around campus or in the community, please introduce yourself.

Welcome to Central-a place where you truly do belong!
Sincerely,
Katherine Frank
Provost and Vice President for Academic and Student Life

## Catalog Guidelines

The university catalog is prepared by Registrar Services and the Public Affairs teams.
This catalog and its contents shall not constitute a contract between Central Washington University and prospective or enrolled students.
The information contained in this catalog reflects the current policies and regulations of the university. However, the university reserves the right to make changes in its policies and regulations at any time. Accordingly, if policies or regulations of the university at any time conflict with information contained in the catalog, the policies and regulations will govern, unless expressly determined otherwise by the CWU Board of Trustees.

A file containing documents describing the university's accreditation and approval by accrediting agencies is maintained in the Office of the Provost and Associate Provost and may be viewed by any current or prospective student upon request.

## Central Washington University is an AA/EEO/Title IX Institution.

Central Washington University's policies and practices affirm and actively promote the rights of all individuals to equal opportunity in education and employment without regard to their race, color, religion, creed, national origin, sex, sexual orientation, gender identity and gender expression, age, marital status, disability, genetic information, or status as protected veterans. CWU complies with all applicable federal, state, and local laws, regulations, and executive orders. ## Information Directory

## ONLINE ELECTRONIC CATALOG

www.cwu.edu/registrar/catalogs
The Online Electronic Catalog (OEC) is the university's official compilation for all curriculum. The OEC serves as the basis for major, minor, and program requirements for the academic year. For current policy and curriculum requirements, refer to the CWU online catalog.

This catalog provides a general guideline of courses offered by the university. The classes and programs described herein are implemented at the sole discretion of the college and are subject to change at any time without notice. Information contained on classes and programs are illustrative only and are not intended to create any contractual obligation or covenant with the university.

## LIMITATION OF LIABILITY

The university's total liability for claims arising from a contractual relationship with the student in any way related to classes or programs shall be limited to the tuition and expenses paid by the student to the university for those classes or programs. In no event shall the university be liable for any special, indirect, incidental, or consequential damages, including but not limited to, loss of earnings or profits.

# History, Mission, Vision and Core Values 

## History

Since 1891, Central Washington University has prepared its students to excel in the workplace and as effective members of society. Established by the Washington State Legislature in 1891 as Washington Normal School, CWU has consistently redefined and advanced higher education in the state of Washington and focused on making it accessible to all.

Our success is based on creating a diverse, inclusive, and welcoming environment, having award-winning professors, being affordable, and providing the programs our students want. Our focus on these values has helped make CWU the fastest growing public university in the state of Washington.

## Mission

Prepare students for enlightened, responsible, and productive lives; to produce research, scholarship, and creative expression in the public interest; and to serve as a resource to the region and the state through effective stewardship of university resources.

## Vision

Central Washington University (CWU) is a dynamic, creative, and inclusive environment that promotes engaged learning and scholarship. It is distinguished regionally for the rigor of its curriculum and scholarship, for the excellence of its pedagogy, for the vibrancy of its cocurricular and residential experiences, for its commitment to providing access to higher education, and for its efforts to advance the social and economic health of the region. It is typified by an entrepreneurial spirit that establishes it as a national leader in higher education. It has a strong commitment to engaged learning and scholarship, internationalism, sustainability, inclusiveness, and life-long learning.

## Core Values

Central Washington University exists to advance society through the essential activities of teaching, discovery, and service. While no one of these core elements is meaningful in isolation from the others, CWU finds it necessary to prioritize its efforts in relation to its mission, vision, values, goals, and resources. In order to maximize the value of each of the elements of its mission, CWU emphasizes the integration of scholarship, teaching, and public service.

As a public comprehensive university, CWU strives to create an engaging learning environment and therefore places its highest priority on teaching, learning, and student success. The faculty is comprised of scholar-teachers working in the interests of their students, their disciplines, and the region. CWU encourages individualized programs of student success and promotes undergraduate and graduate student-faculty partnerships that are actively engaged in discovery, creative expression, and engaged learning.

As a community dedicated to the principles of academic freedom, CWU must be an environment that promotes reasoned, civil, and enlightened discourse and creative expression without fear of reprisal, ridicule, or exclusion. CWU's educational environment must empower each person with the freedom to explore, to evaluate, and to learn.

CWU must also strive to serve its region by addressing pressing economic and social issues. As a comprehensive university, CWU must use its intellectual capacity not only to contribute to disciplinary literatures, but also to assist area business, social, and government leaders in strengthening and diversifying the area's economic base, to help create a sustainable natural environment, and to address critical social issues.

CWU is also a place where people gather to live and to work. It must therefore be a place that enables people to grow and to prosper. In keeping with the academic values of shared governance and reasoned dialogue, the university must be open, transparent, and empowering.

It follows, then, that CWU is committed to the following shared values:

- Student success: CWU believes that student success is best achieved by providing supportive learning and living environments that encourage intellectual inquiry, exploration, and application. CWU believes that learning is best achieved in small classroom or group settings with ample opportunities for individualized instruction, mentoring, advising, and programming.
- Access: CWU believes in providing educational opportunities to as many qualified students as possible. CWU believes that restrictions of place, time, and finances can be overcome through the effective use of partnership with community colleges and by effective and efficient use of learning, communication, and social technologies.
- Engagement: CWU believes that learning, research, and creative expression are enhanced by engagement with external partners. CWU believes that as a publicly-funded institution, it has a responsibility to help address the social and economic challenges faced by our communities.
- Inclusiveness: CWU believes that diversity of peoples, cultures, and ideas is essential to learning, discovery, and creative expression. CWU believes that all faculty, staff, and students must be and must feel physically, professionally, and emotionally safe in order to fully engage in and benefit from the university experience.
- Shared governance: CWU believes that shared governance is most effective when information systems and decision-making processes are both robust and transparent. CWU believes that communication channels should be open and two-way and that faculty, staff, and students should be empowered to participate in the governance systems.
- Facilities: CWU believes that state-of-the-art, safe, and attractive facilities enhance the working and learning environments of faculty, staff, and students. CWU also believes that state-of-the-art technologies provide leverage for the efforts of faculty, staff, and students.
- Safety: CWU believes it has a responsibility to providing a working and learning environment that is both physically and emotionally safe.

## EQUAL OPPORTUNITY POLICIES

CWU's policies and practices affirm and actively promote the rights of all individuals to equal opportunity in education and employment without regard to their race, color, creed, religion, national origin, sex, sexual orientation, gender identity and gender expression, age, marital status, disability, genetic information, or status as protected veterans. The university administers an affirmative action program for employment purposes and complies with applicable federal, state, and local laws, regulations, and executive orders. Policy statements on affirmative action, gender equity, and sexual harassment, as well as discrimination complaint and resolution policy and procedures available at www.cwu.edu/resources-reports.

The person responsible for institutional compliance with most federal and state laws and institutional policies dealing with discrimination is Gail Farmer, Manager, Equal Opportunity and Affirmative Action, 509-963-2206 or farmer@cwu.edu. She also serves as one of the university's Title IX coordinators. Please contact Pam Wilson, Administrator, Disability Services for any questions or concerns related to disability-related laws and institutional policies, 509-963-2018 or Pam.Wilson@cwu.edu. Human Resources is located in Mitchell Hall, First Floor.

## ACCREDITATION AND MEMBERSHIP

The university is accredited by the Northwest Commission on Colleges and Universities (NWCCU). Some programs have been accredited by specialized accrediting and certification associations, including:

- ABET - Engineering Technology Accreditation Commission
- Academy of Nutrition and Dietetics and The Accreditation Council for Education in Nutrition and Dietetics
- American Chemical Society
- American Council for Construction Education
- Association of Advance Collegiate Schools of Business
- Committee on Accreditation of Educational Programs for the EMS - Professions
- Council for Accreditation of Counseling and Related Education Programs
- Foundry Education Foundation
- Professional Educator Standards Board
- National Association of School Psychologists
- National Association of Schools of Music
- Technology Accreditation Commission of the Accreditation Board of Engineering and Technology

## Student Success

The Office of the Dean for Student Success oversees the areas of Undergraduate Advising, Student Development and Student Living as well as serves in an advising capacity to the Associated Students of Central Washington University. The Dean and staff coordinate the work of committees dealing with student personnel policies, student discipline, and student academic grievances.

## Student Development and Achievement

## Undergraduate Advising

## Academic Advising - First Year and Exploratory

Students who are undecided on a major and their exploring options work with Academic Advisors in the First Year and Exploratory Office, located in Hertz 107 (phone: 509.963.2722). This office also administers the Student Transitions and Academic Resources (STAR) program. STAR is an intensive academic support program that assists academically at-risk students in completing transitions into, and through, and out of the university.

## Academic Advising - Professional Advising

Located in Bouillon 205, Professional Advising provides academic advising to students who have decided or declared a major. This office also supports students in online majors, students attending a university center, and incoming transfer students. (Phone: 509.963.3423)
Wildcat Academic Success Center (Athletic Advising)
The Wildcat Academic Success Center (WASC) provides academic advising for first year and undeclared student athletes at Central Washington University. The WASC also provides academic support for student athletes by offering study hall, tutoring services, and the Commitment to Higher Academic Milestones and Personal Success (CHAMPS) program.
For more information about academic support services for student athletes, call 509-963-3084 or visit
www.wildcatsports.com

## Student Development

## Academic Achievement Programs: Student Support Services (SSS)

SSS is a federally funded TRIO program under the auspices of the U.S. Department of Education. SSS provides opportunities for academic development, assists students with basic college requirements, and serves to motivate students toward the successful completion of their post-secondary education. Students who are first generation, low income, or who have a disability are eligible for the program on a space-available basis. The program may also provide grant aid to current, active, SSS participants who are receiving Federal Pell Grants and are of freshman or sophomore status. The goal of SSS is to increase the college retention and graduation rates of its participants and facilitate the process of transition from one level of higher education to the next. SSS is funded 80 percent by a federal grant from the U.S. Department of Education and 20 percent by CWU.

## College Assistance Migrant Program (CAMP)

The College Assistance Migrant Program (CAMP) provides
financial and academic support services to freshman students from migrant and seasonal farm-working backgrounds. It is funded by a grant from the Department of Education, Office of Migrant Education. CAMP is designed to help students succeed as they begin their college careers and through their freshman year. CAMP students receive a variety of services including scholarships, stipends, tutoring, study skills training, mentoring, career planning services, and cultural enrichment opportunities.
To qualify for the CAMP program, the student must meet the following requirements:

- Be a U.S. citizen, permanent resident, or eligible noncitizen
- Have freshman standing (fewer than 44 quarter credits)
- Meet criteria to determine migrant or seasonal farmworker status:
- Parent (or student, if independent) has worked for at least 75 days in the last 24 months in farm-work such as production of crops, dairy products, poultry, livestock, tree harvesting, or fish farming. Farm-work must be primary form of employment and be performed on a temporary or seasonal basis
- OR student has participated in the Chapter 1 Migrant Education Program
- OR student or parent qualifies for the WIA167 program
To apply for the CAMP Program, call 509-963-1729 or download and/or submit an application at www.cwu.edu/camp.

## High School Equivalency Program (HEP)

The High School Equivalency Program is a federally funded program that provides service to migrant and seasonal farm working populations. The program conducts educational awareness, community outreach and recruitment throughout central Washington. The program recruits 110 program participants annually. All participants receive comprehensive GED preparation. This preparation consists of providing GED instruction, test preparation and tutoring services. In addition, students are provided with career development services and educational and/or employment placement assistance.

## Career Services

Career Services is a free comprehensive career counseling and resource center designed to engage students as active participants in their career development from freshman year through alumni status. The central purpose of Career Services is to help students prepare for academic and career success. The office strives to serve the needs of individuals through these career-related classes, programs and events.

UNIV 103: For those who are not certain which major or career path is right for them, Career Services offers a two-credit course, called Career Exploration, on the Ellensburg campus each quarter. One-on-one counseling can achieve similar results over time if a student cannot take the class.

UNIV 301: This two-credit career management class helps students prepare for the transition from the classroom to the workplace. The focus of the course is on job search skills in pursuit of fulfilling employment. A separate section for international students is available.

Job Search Preparation: Career workshops are organized throughout the year to help students prepare for work or graduate school. To prepare for internship and career opportunities in the US and abroad, career counselors provide information on careers, developing strong resumes, CV's and cover letters, practicing effective interviewing skills, learning successful internship and career job search strategies, including how to negotiate salary.

Career Counseling: Career counselors help students make major and career decisions through online assessments and determining skills, strengths, values, and interests. Counselors also assist students to apply for graduate school and postbachelor studies. Alumni experiencing career transitions are also welcome to meet with a career counselor. Counselors are available from 8 a.m. to 5 p.m. in Bouillon 206 in Ellensburg, and at CWU-Lynnwood and CWU-Des Moines Centers.
Appointments are also available by phone, Skype or e-mail.
Wildcat Career Network: The WCN database contains career information, job and internship opportunities, and enables students to sign up for on-campus interviews and career events. Students can access their account through their MyCWU account. Alumni can create an account through our website. There is no fee for this service.

Cooperative Education/Internships: Cooperative Education offers assistance to students wanting to earn credits for professional work experience while they are in school. Many departments require an internship as part of the major; others accept a limited number of hours toward graduation. An internship is an opportunity to combine career, social, and personal growth with the educational process. The student works with their department faculty and the Career Services Co-op coordinator to prepare for the process that leads to a successful, credit-bearing academic/work experience.

Career Fairs and Events: The department organizes career fairs and events throughout the year as an opportunity to network with employers, learn dining etiquette, interview with businesses, and meet with faculty for major selection, review graduate school opportunities, and more. On-campus interviews and information sessions take place on the main campus and the centers, between students and a variety of businesses, government agencies, non-profit organizations, school districts, and the military. For further information: www.cwu.edu/career.

## Educational Opportunity Center

Deciding where to go to college, figuring out how to pay for it, and completing all the necessary forms is complicated. The Educational Opportunity Center (EOC) is set up to help students gather the necessary information to make good decisions about their future educational plans and think clearly through the available options. EOC is available, principally, to help lowincome adults who are the first in their family to attend college, work through the admission process. For further information, call 509-574-6895 or e-mail eoc_program@cwu.edu.

## GEAR UP

GEAR UP prepares ALL students to pursue and succeed in some form of post-secondary education and seeks to: increase parent involvement, professional development for teachers, community involvement, and collaboration with school staff.

GEAR UP serves approximately 5,300 students from 11 school districts in central Washington. Participating students engage in university campus visits, college preparatory programs, academic support programs, and STEM related activities.

## KCWU-FM (88.1 the 'Burg)

KCWU-FM is CWU's student run, nationally awardwinning Radio Station. Operating out of a state-of-the-art living media laboratory, the student broadcasters master speaking and presentation skills while performing as music DJs, newscasters, sportscasters, talk show hosts, production and imaging talent and brand, marketing and event specialists. The multi-platform approach of on-air, on-line and in-person serves the CWU student body and community, and fosters a culture of professionalism, diversity and inclusion.

## Learning Support Services (Learning Commons)

Learning Support Services encourages student success by offering a wide variety of instructional resources and peer tutoring services. In Ellensburg, Learning Support Services can be found in the Academic and Research Commons (ARC) on the first floor of the Brooks Library. Five key program areas are associated with Learning Support Services: 1) The Math Center provides academic support in quantitative skills for students in courses across the curriculum. Drop-in and scheduled tutoring sessions are available, 2) At the Writing Center, trained peer tutors work with students of all levels and disciplines, guiding them toward effective written communication. Tutors meet one-on-one with students by appointment or drop- 3) Peer Assisted Labs (PALs) provide free, out-of-class study sessions led by CWU undergraduate students who have already taken and excelled in the course. PAL sessions are open to all CWU students enrolled in the PAL-targeted class; 4) The University Center and Online Tutoring program offers tutoring in mathematics and writing to students who do not attend classes in Ellensburg; and, 5) Students enrolled in developmental coursework (Math 100A, 100B, 100C, and English 100T) are taught by Learning Support Services faculty and regularly access tutoring services. Ellensburg students can contact Learning Support Services by phone ( 509.963 .1270 ) or via email (tutor@cwu.edu). University Center and online students may contact Learning Support Services by phone (206.439.3800 x3827) or via e-mail (onlinetutoring@cwu.edu).

## Veteran's Center

CWU's Veterans Center opened in 2009 to aid service members and their families entering college. The center is committed to the academic success of its students by helping with the transition into student life and laying the groundwork for a satisfying career. Services include assisting with veteran education benefits applications, certifying enrollment, and locating additional resources veterans and their family members may need. Find more information at www.cwu.edu/veterans or stop by our office located in Bouillon Hall, 206.

## Office of Student Rights and Responsibilities, Wellness, \& Health Promotion

The Office of Student Rights and Responsibilities has responsibility for assisting students understanding university policies and procedures that support them. In addition, the Office of Student Rights and Responsibilities is responsible for holding students accountable to the student conduct code and taking reports that include behaviors of concern by other members of the University Community. This office is located in Bouillon 205. The Office of Student Rights and Responsibilities also houses University Case Managers who assist students with
referrals within the CWU campus and the Ellensburg Community. In addition, our office serves all CWU locations.

## Wildcat Wellness Center

The Wildcat Wellness Center is located in SURC 139. Services and programs delivered through the center include: alcohol/drug education, prevention and referrals for assessment and treatment, ASTP (Alcohol Skills Training Program) classes, web-based alcohol and drug curriculum, peer education programs, sexual assault prevention and response coordination, and programs that promote positive health behavior and risk reduction behaviors.
The University has a comprehensive alcohol education and prevention program. Parental notification is one part of CWU's comprehensive sanctioning procedure for underage alcohol and marijuana use. CWU supports all local, state and federal laws pertaining to controlled substances and as such, cannabis is not allowed on any CWU premise.

## Violence Prevention and Response Coordinator

Students impacted by sexual violence or other forms of harassment may call 509-963-3233 and leave a confidential message and/or drop by the Wellness Center at SURC 139. Services include confidential, referral, advocacy, information and crisis response for victims, survivors, and significant others. Those experiencing an emergency are still encouraged to contact 9-1-1.

There is also a peer education program sponsored by the Wellness Center and advised by the Wellness Center's health educator. It can be reached by phoning 509-963-3213. For additional information please visit www.cwu.edu/wellness.

## Student Living

## ASCWU - Student Government

The Associated Students of Central Washington University (ASCWU) is the student government board elected by the CWU student body to serve as policy-development officers. Executive responsibility is vested in the seven-member ASCWU-Student Government with the Executive Director of Student Involvement serving as the primary advisor. As a vehicle from which students may share different views, the ASCWU is an integral part of the shared governance of CWU. The ASCWU Student Government recognizes and approves student clubs, student organizations, and student appointments to committees in order to serve and represent a variety of student needs and interest areas.
To learn more about ASCWU Student Government, please check out our contact info found below:
Office location: SURC 236
Phone: 509-963-1693
Website: http://www.cwu.edu/ascwu/

## Campus Activities

Campus Activities offers a variety of events including music, comedy, speakers, concerts, performances, movies, and special events such as Homecoming, Family Weekend, Boo Central, Ware Fair, CWUp Late and Student Appreciation Day. They also offer a variety of educational and development opportunities through practicum and internship experiences and advisement of the university's clubs and organizations.

## Center for Leadership and Community Engagement

The (CLCE), with endowments by David Wain Coon and Don and Verna Duncan, serves CWU students and our community with leadership development programs and educational service opportunities which promote positive social change and servant
leadership. Through inclusive and intentional high-impact practices, students are provided opportunities to enhance and develop individual competencies to better understand self, others, citizenship and service.
Signature programs include:

- Experience Leadership Project (ELP) - A three-day retreat in the Cascade Mountains designed for firstyear students, where they learn how to get involved at CWU, enhance their leadership skills and build a network of support.
- Cross-Cultural Leadership Program (CCLP) Each Fall, students come together for a year-long exploration of leadership through culture, discovering how each culture varies and how to make a positive difference in the lives of others.
- Leadership Conference - An annual conference where students gain knowledge and insight from national and local leaders.
- Earth Week Programs including Yakima River Clean Up - A series of events dedicated to making a difference by bettering the environment and educating all who affect it.
- Holiday Extravaganza - Every Fall, CWU student volunteers gather to create a winter wonderland of holiday crafts and activities for K-5 children and their families.
- Chavez-King Leadership Institute for Social Change - An Institute that seeks to foster a generation of active and engaged student leaders committed to civic responsibility, diversity, and social justice in local and global contexts.
- Martin Luther King, Jr. Celebration and Tribute A weeklong celebration that consists of various civil rights activities with K-5 children, documentary and speech screenings, and a presentation addressing past and current social justice efforts.
- Leadership Transcript - Use this to supplement employment, graduate school and scholarship applications, and document your college years.
The CLCE recognizes that every student has leadership capacity and will have ample opportunities to demonstrate leadership throughout their lifetime. Through various programs, workshops and resources, CWU students are equipped to make a positive impact within their communities. From short-term volunteering to intense capstone service programs, individuals are encouraged to use their disciple-specific knowledge in order to address community-based social, political and environmental economic justice issues.
To learn more about the CLCE, please check out our contact info found below:
Office location: SURC 256
Phone: 509-963-1850
E-mail: clce@cwu.edu
Website: www.cwu.edu/leadership-engage.

## Disability Services and Central Access

Disability Services is committed to supporting and sustaining an inclusive campus that recognizes disability as diversity. We are dedicated to ensuring individuals with disabilities have an equal opportunity to fully participate in the educational process and university experience.

Disability Services facilitates full participation, universal access, and reasonable accommodation to meet the unique needs of each person. The office provides this support by individualizing the accommodation process and facilitating creative approaches to eliminating barriers.
Central Access creates accessible materials for individuals with print related disabilities. Our team provides quality work for students and staff at Central Washington University as well as many institutions and schools across the country.
Central Access also provides meaningful opportunities for student employees to learn about the production of accessible materials and grow professionally while serving the community.
Disability Services is located in Hogue 126 and can be reached at DS@cwu.edu or by phone at (509)963-2214. Employees seeking accommodations can contact Human Resources at (509)963-1202.

## Early Childhood Learning Center

The Early Childhood Learning Center (ECLC) provides early learning to the campus community serving children aged onemonth to eight-years of age. There are two sites; 1900 Brooklane Village, Suite 100, serves children aged two years to eight years of age; Michaelsen Hall, room 109, serves children aged one month to 28 months. The program consists of early learning activities especially designed for young children; including music, language, physical activities, stories, science and math experiences, games, puzzles, blocks, and dramatic play. Nutritious meals and snacks are served throughout the day. Operating hours during the academic year are 7:30 a.m. to 5:30 p.m., Monday through Friday. Call 509-963-1744 or e-mail eclc@cwu.edu for more information.

## The Publicity Center

The Publicity Center offers a full slate of creative services to promote campus events, programs and departments while providing real world experience to student employees through hands on skill development, professional mentoring and portfolio development. The Publicity Center, located in the Student Union building, is also home to Hype, a multi-platform communication approach to spreading the word about campus events and opportunities for students to get involved outside the classroom.

## Recreation

Recreation is committed to offering recreation programs that provide personal and professional development for a diverse university community. Our nationally recognized facilities and services support the university mission by promoting an inclusive campus environment. Our programs contribute to the wholeness and wellness of our patrons while providing cocurricular activities that complement other avenues of learning and aid individuals in achieving balance and well roundedness. Through excellent customer service and care for the individual, Recreation seeks to provide a sense of belonging that enhances retention for students, faculty, and staff. Programs include intramural sports, collegiate sport clubs, personal training, group fitness, outdoor pursuits and rentals, climbing wall, challenge course, summer kid's camp, recreation center operations, and a myriad of special events including films, lectures, interactive programs, and instructional courses.

- Intramural Sports, also known as IM Sports, offers a variety of leagues per quarter. Sports range from the traditional, such as basketball, flag football, softball, and soccer to the non-traditional such as dodgeball, archery tag, and electronic gaming tournaments. Sports are offered in different levels of competition as
well as different divisions such as coed, open, or women's. Students, staff, and faculty are all eligible to participate in IM Sports.
- The CWU Collegiate Sport Clubs Program is designed to provide opportunities for CWU Students with mutual interests in a sporting activity, to pursue their interests more in depth. Each club is formed and administered by their student membership. Student leadership, interest, and participation are essential elements of a successful sport club. The Collegiate Sport Club Program at CWU is designed to be a learning experience for members through their involvement in leadership, club administration, financial management, and event planning. The leadership traits developed through these experiences are not only intended to benefit the students during their time on campus, but long after they leave the university. For a current list of clubs please visit www.cwu.edu/sport-clubs.
- Personal training packages are available to all recreation center members. For a nominal charge, a personal trainer will develop a challenging workout routine specifically designed to meet an individual's fitness goals.
- Group fitness classes are available to all recreation center members for a very small fee. From spinning to ballet, intense abdominal workouts to yoga, there's something for everyone.
- Outdoor Pursuits and Rentals provides low-cost guided trips and equipment rentals to support students' outdoor recreation desires and educational needs.
- The 50 -foot climbing wall in the Recreation Center offers bouldering and roped climbing, and certification courses in top-rope belay and lead climbing.
- Challenge Course programming offers the opportunity to participate in team building activities to accomplish individual and group goals on both low-ropes elements and a state-of-the-art high challenge course for low-cost fee. Our staff will provide everything your group needs to successfully participate in the challenge course experience, including equipment and instruction, as well as a pre-event meeting to determine your group's specific needs.
- Camp C-Woo provides a quality day camp atmosphere for Ellensburg-area youth entering grades 1-5. Our primary function is to offer a safe environment where kids can have fun, make new friends, create unforgettable memories, and spend their summer with positive role models. The camp primarily operates during the summer months but has a variety of programs during the school year. For more information about Camp C-Woo please visit www.cwu.edu/rec/camp-c-woo.

## Student Involvement

The Department of Student Involvement is dedicated to enriching students' experiences outside the classroom by providing social, cultural, recreational, and educational programs, services, and apprenticeships. Student Involvement is comprised of the functional areas including Campus Activities, ASCWU-Student Government, KCWU 88.1 the 'Burg Radio Station, and Westside Student Life. Student Involvement representatives serve on committees for campus events such as

Discover! New Student Orientation, Wildcat Welcome Weekend, and Homecoming. Student Involvement employs 30plus students each year in paraprofessional positions, offers internships and practicum experiences, and provides a range of services for university departments, student organizations, and the community.
To learn more about Student Involvement, please check out our contact info found below:
Office location: SURC 263
Phone: 509-963-1691
Website: http://www.cwu.edu/student-involvement/home

## Student Medical and Counseling Clinic

Students registered for 6 or more credits pay a health and counseling fee ( 5 or more credits for summer session) and are thereby eligible for services. The Clinic bills insurance for the initial medical appointment. If you do not have insurance, your student account will be billed $\$ 50$. There is no charge for all follow-up office visits. There will be charges for any ancillary services provided (e.g., labs, x-rays, etc.). More information on appointments can be found at: www.cwu.edu/medical-counseling/your-first-appointment. All counseling services are provided free of charge.

Services are offered at the Medical and Counseling Clinic building (southeast corner of the campus). The Clinic hours are 8 a.m. to 5 p.m. Monday through Friday. Summer hours are 8 a.m. to noon and 1 p.m. to $3 \mathrm{p} . \mathrm{m}$. when classes are in session. The Clinic is closed on weekends, holidays and during academic breaks. When the Clinic is closed, emergency medical services are available at Kittitas Valley Community Healthcare. The cost of hospital care is at the student's expense. Medical appointments are available through the patient portal at the Clinic's website or can be made by phone (509-963-1881), Monday through Friday. It is imperative that you log onto the student portal and complete the required forms prior to your first medical appointment.

The medical staff provides routine and urgent-care services, including care for medical problems such as illnesses, injuries, and infections (e.g., colds, flu, and sexually transmitted infections). It offers customary primary care services including routine physical examinations, sports physicals, travel medicine, women's health services (e.g., pap smears, pregnancy testing, long term contraceptives and reproductive counseling), and diagnostic laboratory tests/X-rays. In keeping with the educational mission of the university, emphasis is placed on education regarding wellness, prevention and treatment of illnesses.

The Counseling Clinic (509-963-1391) operates on the basis of a brief treatment model. Counseling services include individual, couple, and group counseling. Common student issues include transitional/adjustment concerns, relationship difficulties, eating disorders, stress, anxiety, and/or depression. Group counseling opportunities routinely include coping with anxiety, therapeutic lifestyle change for depression, bipolar support, personal growth, and relationship difficulties. Special programs for campus groups are available upon request (e.g., education and outreach). Counseling services are private and confidential. A copy of the clinic's privacy policy is available at www.cwu.edu/medical-counseling.

## Testing Services

CWU Testing Services is an NCTA certified Testing Center.

Testing Services provides support to CWU students, faculty, and staff, as well as the central Washington community.
Testing Services also works closely with Disability Services, Faculty, and students in providing student accommodation for testing.
CWU Testing Services partners with the majority of the major nationwide testing companies (including ETS, PearsonVUE, and PSI) and administers a multitude of exams.

For more information, including a list of exams and dates, contact Testing Services in room 125 of Bouillon Hall, call 509-963-1847, or visit www.cwu.edu/testing.

Exams offered include, but are not limited to:
CWU Placement Tests
College Level Examination Program (CLEP) tests
ETS Testing:
${ }^{\circ}$ GRE
${ }^{\circ}$ PRAXIS
${ }^{\circ}$ ASE
${ }^{\circ}$ MCAT
${ }^{\circ}$ TOEFL
${ }^{\circ}$ TOIEC
Castle Testing:
${ }^{\circ}$ ACE certifications
Kryterion Testing:
${ }^{\circ}$ Certified Counselor/Adviser Exam
PearsonVUE Testing:
${ }^{\circ}$ WEST
${ }^{\circ}$ NES
${ }^{\circ}$ Microsoft
${ }^{\circ}$ CISCO
${ }^{\circ}$ CompTIA
${ }^{\circ}$ GED
PSI Testing:
${ }^{\circ}$ FAA
Various other testing:
$\circ$ Proctored Exams for other institutions
${ }^{\circ}$ Spanish Placement Test
${ }^{\circ}$ TEAS V
${ }^{\circ}$ MPRE
${ }^{\circ}$ LSAT
${ }^{\circ}$ CHES/MCHES
${ }^{\circ}$ NCE
${ }^{\circ}$ GRE Subject

## The Student Union

The Student Union serves as a centralized hub of student activity on campus. The state-of-the-art fusion facility is combined with a Recreation Center and houses the university bookstore, multiple dining options, banking, multiple student programming and service areas, and the student government. The welcoming, inclusive environment provides meeting, lounging and studying spaces in addition to a vast array of activities presented daily that contribute to students' sense of belonging. Seamless, quality services through Student Union Operations include centralized scheduling, event coordination, and technical support of university facilities for all university and non-university events. Student employees gain hands-on experience and take pride in their part in making the Student Union a vibrant hub for student life.

## Westside Student Life Programs

Our mission is to engage the Westside student body and develop a sense of campus community through diverse activities and events, student clubs, student leadership training and development, special graduation events, collaborating with community college partners, and supporting our non-traditional student populations. In addition, we provide support for students with disabilities seeking accommodations.
To learn more about Westside Student Life Programs, please check out our contact info found below:
Adam Haizlip, Associate Director of Westside Student Life E-mail: Adam.Haizlip@cwu.edu

## University Housing and New Student Programs

## NEW STUDENT PROGRAMS (Orientation)

At Central Washington University, we place special emphasis on each student's transition to the CWU campus. Through research and our own experience, we know that the foundations built through these intentional experiences are key to a student's success. Once you are admitted to CWU, New Student Programs will pick up where the Admissions Office leaves off for both first year and transfer students. Making the commitment to spend your college career at CWU is a major decision. With this in mind, it only makes sense that the CWU community welcomes you by providing a comprehensive guide as you make this transition. We have designed a four-phase orientation program to aid you as you acclimate to life at Central. Your participation in orientation is required, please see our website at cwu.edu/orientation for additional details. This is certain to increase your success at CWU. That's why we have created an orientation program with a wide array of options and opportunities to suit your needs.
Phase I of New Student Orientation is Wildcat Day: Rolling Out the Crimson Carpet, the first component of Central's four-tiered new student orientation program. It is scheduled for your choice of Saturday, April 7, 2018 or Saturday, April 14, 2018. This program is designed to introduce students who are accepted for the fall 2018 quarter and your parents/guests; provide you with information about academic departments and majors; and provide an opportunity for you to ask any questions you may have about Central. This event regularly attracts more than 1,000 incoming students and guests each weekend. Attendance is strongly recommended.
As a part of the event we offer Todos Somos Familia for Spanish speaking families. More information, including a schedule of events, will be posted early in the new year at cwu.edu/orientation. WELCOME WILDCATS!
Phase II of New Student Orientation is a two-day program for first year students and parents/family held in June and July. The program allows you to meet with academic advisors who will help you register for classes, participate in social events with other incoming students, and attend valuable programs that feature campus resources and services. Programs include academic requirements and expectations, housing services, dining services, and financial aid. Parent/family-only sessions are offered to assist with the transition to the university. Faculty and administrators are available throughout the program to assist with parent and student needs. Students with fewer than 40 transferable college credits, and/or who are Running Start students, are required to attend Orientation. Students unable to attend one of the dates in June and July need to contact us by email at discover@cwu.edu as soon as possible. Class registration will take place after the final July orientation session.

Transfer students have an option of a one day orientation session in June or July. Transfer students are expected to attend.
For further questions, call New Student Programs at 509-9632735 or e-mail discover@cwu.edu or check out our website at cwu.edu/orientation.
Phase III of New Student Orientation is Wildcat Welcome Weekend (W3). It picks up in the fall where Orientation left off. W3 is a first-year-focused program that begins on move-in day (Sept. 14). Students will participate in a weekend filled with many fun and informative activities and sessions. Attendance is required to receive credit for University 101.
Phase IV of New Student Orientation is the First-Six-Weeks Programming. It is intentionally designed to help students adjust during the critical first six weeks of their first year at CWU. Attendance at first-six-weeks programming is required as part of a student's University 101 class.
Orientation dates and registration information is available online at cwu.edu/orientation.

## University Housing

University Housing provides well-maintained housing facilities, with an emphasis on student development, as part of the university's academic environment, and works to augment classroom instruction with a learning environment that is supportive of students' educational goals, personal and interpersonal growth, and cultural awareness.
CWU is a residential university with most Ellensburg students living on or near campus. The residence halls and apartments can house 3,800 students. CWU's residence halls offer students a variety of quality living experiences and options.

The residences are within a few minutes' walk of any classroom, library, or dining hall, which offers considerable convenience and flexibility to students. Residence hall and apartment staff provides crisis intervention and educational, cultural, social, and community services programs, as well as coordinating behavioral problem-solving interventions in cooperation with the Dean of Student Success.

The residence halls offer a diverse selection of communities and environments. The residence halls, which house between 35 and 476 occupants, offer programs and environments to enhance classroom experiences. Furniture, basic cable service, wireless internet, utilities, and coin-operated laundry facilities are also provided. Many halls have their own pool table, piano, or pingpong table. All residence halls and apartments are smoke-free.

Living and Learning Communities (LLCs) are available for students interested in the following areas: Education, Science Talent Expansion Program, Aviation, Music, Casa Latina, Business, Students for the Dream, International House, Leadership House, ROTC, Social Science, and William O. Douglas Honors College. Students may request a residence hall offering a living-learning enrichment opportunity. Hall staff and faculty from these areas of interest collaborate to provide residents with educational and social activities that integrate their field of study, enhancing their residence hall experience.

Since college is a total learning experience, Central requires all freshmen/first year students who are under 20 years-of-age to live in the residence halls for one academic year. Running Start students under 20 years-of-age, regardless of class standing, must also fulfill the live-in requirement. Students requesting an
exception to the policy must apply through University Housing and New Student Programs.

CWU also maintains 450 apartments (studio, one, two or three bedrooms) designed for single students and those with families. The apartment complexes offer activities for residents that focus on their needs and priorities. Complexes feature programs and facilities that support students emotionally, socially and academically. These programs might include wellness, selfdefense, cultural awareness, lifestyle planning, career planning, and recreation. Many activities for children and families are presented, such as holiday events, child safety awareness programs, domestic violence prevention programs, and career planning. In addition, we have a living learning community for students in the sciences called Solvers.

At different times of the year, demands for apartments may exceed availability. For this reason, waiting lists are provided. To be eligible for apartment housing, a student must be currently enrolled in and must maintain at least 7 credit hours of coursework.

Students who are required to live in residence halls are not eligible to live in the apartments. Each apartment resident is required to sign a lease, which provides for renting an apartment on a month-to-month basis. Written notice must be given at least 30 days prior to vacating an apartment. Pets are not allowed in any area of CWU housing. Central Washington University abides by all state and federal laws pertaining to service animals in on campus housing.

## CWU Life

## Dining Services

All students living in CWU residence halls are required to select a meal plan. There are five to choose from, and all are set up as a prepaid dining debit account, which allows for purchase of meals or snacks at any campus dining location. Students living off-campus may also purchase a meal plan for the convenience of dining and buying beverages and snacks on campus.

Dining Services' staff is dedicated to your dining satisfaction. Its mission is to provide exceptional food service and customer service to the campus community. This is evident in fresh, appetizing, and nutritionally balanced menus along with the hospitality offered at each of its distinctly different dining locations on campus. These include:

- Central Market Place, located in the SURC, offers a la carte service in six restaurants: Taglianno's Pizza and Pasta, Totally Tossed Salads, Lion's Rock Broiler, El Gato Loco, Pan Asia, and Wrap and Roll Deli Bar
- Holmes Dining Room, located in the SURC, offers an all-you-can-eat service for brunch/lunch and dinner
- North Village Café, located in Green Hall on the north side of campus, offers a la carte service for meals and snacks throughout the day
- 1891 Bistro, located in Tunstall Hall on the south side of campus, featuring local fare, D and M's Coffee and espresso, Winegar's ice cream, ABC Donuts, EZPZ, grab and go, good food FAST - Student made On
campus, and CWU Catering Pastry Case and soups of the day.
You may also use your meal plan at any of CWU Dining Services' espresso bars or convenience stores:
- Cat Trax East Espresso and Smoothie Bar, Cat Trax West Espresso, and Cat's Convenience Store in the SURC
- Coach's Coffee House in the Wendel Hill Hall
- NVC Espresso Bar and NVC Store in the North Village Café and Store
Dining services are available on campus for breakfast, lunch, dinner, late-night meal service on weekdays, and for brunch and dinner on weekends.

If you have questions about the dining options available at CWU Dining Services, call 509-963-1591, or contact us via its web page at www.cwu.edu/dining. Dining also has a Facebook page and can be found on Twitter.

## Nutritious Foundations

Dining Services offers nutritious menu selections, based on the U.S. Department of Agriculture's food pyramid, to support your healthy lifestyle. You're encouraged to adopt a diet rich in balance, variety, and moderation by exploring the nutrition foundation that Dining Services provides in all dining arenas.

## Special Events

Several special dining events are offered quarterly to enrich your dining experience. Some of these events include the Octoberfest, a holiday season buffet, a seafood buffet extravaganza, theme and ethnic dinners, Cinco De Mayo, the Student Appreciation BBQ , and the commencement luncheon.

## Employment Opportunities

Dining Services is the largest employer on campus, hiring between 250-350 students annually for part-time work. Consider joining the team where you will meet new friends and earn money.
Dining Services is a member of the National Association of College and University Food Services, and an active supporter of the academic mission of the university through participation in many out-of-classroom events and activities held throughout campus.

## Honor Societies

Central Washington University maintains memberships in several national honor society chapters. Here is a list of those memberships. Please see the appropriate department for more information about these honor societies.

Alpha Epsilon Rho: This is the national honor society for broadcasting. Founded in 1943 for the purpose of emphasizing superior scholarship and creative participation in telecommunication production and activity, it prepares its members for roles as responsible telecommunicators. Membership in Alpha Epsilon Rho is open to undergraduate and graduate students who are making electronic media studies one of their major academic interests and who meet high standards of scholarship. Please see the Department of Communication for more information.

Alpha Eta Rho: (AHP) This International Professional Collegiate Aviation fraternity acts as a bridge between aviation colleges and the aviation industry. AHP was established in 1929
by Earl W. Hill, an aviation instructor at the University of Southern California and, with help from students and faculty, was founded on April 10, 1929. It is the oldest professional aviation fraternity in history. AHP members serve the aviation industry in fields such as: Aviation Captains, NASA Engineers, Flight Attendants, Aircraft Mechanics, Aerospace Engineers, Corporate Pilots, and many more. Please see the Department of Aviation for more information.

Alpha Kappa Delta: This is an international sociology honor society. Founded in 1920 and an accredited member of the Association of College Honor Societies, Alpha Kappa Delta is a non-secret, democratic, international society of scholars dedicated to the philosophy of Athropon Katamannthanein Diakonesin or "to investigate humanity for the purpose of service." AKD seeks to acknowledge and promote excellence in scholarship in the study of sociology, the research of social problems, and such other social and intellectual activities that will lead to the improvement of the human condition. Please see the Department of Sociology for more information.

Alpha Phi Sigma: This is the nationally recognized honor society for students in the criminal justice sciences. The society recognizes academic excellence by undergraduates as well as graduate students of criminal justice. The honor society is open to undergraduate students who have a declared law and justice major or minor, have maintained a minimum GPA of 3.2 on a 4.0 scale in their cumulative and criminal justice class or rank in the top 35 percent of their classes, and have completed a minimum of four courses within the law and justice curriculum. Graduate students must have a minimum GPA of 3.4 on a 4.0 scale or rank in the upper 25 percent of their class, and have completed a minimum of four courses within the law and justice curriculum. Please see the Department of Law and Justice for more information.

Alpha Sigma Lambda: This national honor society, established in 1946, provides the opportunity to recognize the special achievements of adult students. Alpha Sigma Lambda acknowledges adult students who accomplish academic excellence while facing competing interests of family, work, and community. Members must have earned a minimum GPA of 3.5 on a 4.0 scale. The CWU chapter of ASL is Psi Delta Omega and is advised by the Center for Student Empowerment. Invitations to join Psi Delta Omega are sent out at the beginning of each academic year, and induction ceremonies are held both at the Ellensburg campus and at one of the Puget Sound- area centers. Please see the Center of Diversity and Social Justice for more information www.cwu.edu/diversity/alpha-sigma-lambda.

Beta Alpha Psi: This is a not-for-profit honor and service organization for accounting, finance and information systems students at AACSB-or EQUIS-accredited universities. Founded in 1919, the CWU chapter was installed in 2013. It provides opportunities for development of communication, leadership and professional skills, participation in community service, encouragement of ethical, social and public responsibility and interaction among students, faculty and professionals. Beta Alpha Psi requires its members to maintain at least a 3.0 GPA. It is recognized and respected by the business community as a premier collegiate organization. Please see the College of Business for more information.

Beta Beta Beta: TriBeta is a society for students, particularly undergraduates, dedicated to improving the understanding and
appreciation of biological study and extending boundaries of human knowledge through scientific research. Since its founding in 1922, more than 200,000 persons have been accepted into lifetime membership, and more than 553 chapters have been established throughout the United States and Puerto Rico. Please see the Department of Biological Sciences for more information.

Eta Sigma Gamma: Since its inception in 1967, Eta Sigma Gamma, the National Health Education Honorary, has had a rich history of contributions to the profession of health education and health promotion. It was through the commitment of a group of dedicated professors and students at Ball State University that the first chapter of the honorary was established. Today, there are over 80 chapters representing thousands of students in colleges and universities around the United States. Please see the Department of Health Sciences for more information.

Eta Zeta: This is the Department of Geological Science's chapter in the Earth Sciences national honor society, Sigma Gamma Epsilon. The purpose of the honor society is to recognize exceptional scholarship and professionalism among our geological science majors, and to foster student scholastic, scientific, and professional advancement. To become a member, a student must have completed at least 15 quarter hours in Earth Sciences courses, have a minimum 3.0 GPA in Earth Sciences courses, and have a minimum GPA of 2.67 in all university courses. Please see the Department of Geological Sciences for more information.

Gamma Theta Upsilon: Gamma Theta Upsilon is an international honor society in geography. Gamma Theta Upsilon was founded in 1928 and became a national organization in 1931. Members of Gamma Theta Upsilon have met academic requirements and share a background and interest in geography. Gamma Theta Upsilon chapter activities support geography knowledge and awareness. New members are inducted annually. Please see the Department of Geography for more information.

Kappa Delta Pi: The honor society in education, Kappa Delta Pi , encourages high professional, intellectual, and personal standards, and recognizes and honors outstanding achievement in the study of education. Membership is open to undergraduate students, graduate students, and faculty by invitation. New members are inducted quarterly. Please see the College of Education and Professional Studies for more information www.cwu.edu/education-professional-studies/funds-andendowments.

Lambda Alpha: The Lambda Alpha National Collegiate Honors Society for Anthropology was founded on March 15, 1968 at Wichita State University in Kansas. To date there are over 200 chapters nationwide. Lambda Alpha (derived from the Greek Logos Anthropou, meaning "the Study of Humans") was established for the purpose of encouraging and stimulating scholarship and research among students, faculty and others engaged in the study of anthropology. Lambda Alpha provides scholarships, research and publication opportunities to student members (undergraduate and graduate). Please see the Department of Anthropology and Museum Studies for more information.

Lambda Pi Eta: This is the national honorary society for undergraduates in communication. As an accredited member of the Association of College Honor Societies (ACHS), Lambda Pi Eta (LPH) has an active chapter at CWU's Department of

Communication. LPH represents what Aristotle described in The Rhetoric as three ingredients of persuasion: logos (lambda) meaning logic, pathos (pi) relating to emotion and ethos (eta) defined as character credibility and ethics. Lambda Pi Eta recognizes, fosters, and rewards outstanding scholastic achievement while stimulating interest in the communication discipline. Please see the Department of Communication for more information.

Pi Sigma Alpha: (Mu Lambda chapter) This is CWU's honor society for students of political science. This is a national honorary, first organized in 1920, with more than 740 chapters throughout the country. Membership is based upon scholastic achievement and a genuine interest in the understanding of politics and political issues, as evidenced by performance in several political science courses. Please see the Department of Political Science for more information.

Phi Alpha Theta: This is a nationally recognized honor society founded in March 1921 at the University of Arkansas, and today it numbers over 900 chapters, representing 500,000 members. Central's Tau Iota chapter was chartered in 1972. Membership is composed of undergraduate and graduate students and professors who have been elected upon the basis of excellence in the study and writing of history. The society's objective is the promotion of the study of history by the encouragement of research, good teaching, publication, and scholarly interaction among historians. Please see the Department of History for more information.

Phi Kappa Phi: The national honor society of Phi Kappa Phi recognizes and encourages superior scholarship in all academic disciplines. Membership is open to undergraduate students, graduate students, and faculty members by invitation, with election based on superior scholarship. New members are inducted each spring. Please see the Department of Accounting for more information.

Phi Sigma Tau: This is the international honor society in philosophy. Its purpose is to recognize and encourage excellence in philosophic scholarship among students and faculty. It publishes philosophy articles from undergraduate students in its journal Dialogue. Central's local chapter (Washington Alpha) meets periodically to discuss philosophic issues. Membership is based on scholastic attainments. Please see the Department of Philosophy and Religious Studies for more information.

Psi Chi: This is the international honor society in psychology, founded in 1929 for the purpose of encouraging, stimulating, and maintaining scholarship in, and advancing the science of, psychology. Membership is open to graduates and undergraduates who are making the study of psychology one of their major interests and who meet the minimum qualifications. Psi Chi is an affiliate of the American Psychological Association and a member of the Association of College Honor Societies. Please see the Department of Psychology for more information.

Salute: This is a national academic honor society recognizing student veterans and military personnel who have demonstrated outstanding performance in the academic setting. One of the primary goals of SALUTE is to acknowledge and recognize members who have shown courage, strength, leadership, excellence, and perseverance in their military endeavors and now are showing that same commitment to their academic careers. Please see the Veteran's Center for more information.

Sigma Lambda Chi: The fundamental purpose of Sigma Lambda Chi is to provide recognition to outstanding students in construction curricula. Sigma Lambda Chi is the society that offers students the opportunity to be recognized locally and internationally for their academic accomplishments as a construction major. Please see the Department of Engineering Technologies, Safety and Construction for more information.

Sigma Pi Sigma: This is the national physics honor society. It was founded in 1921 and now has over 500 chapters nationwide. It is a member of the Association of College Honor Societies and is affiliated with the American Institute of Physics and with the American Association for the Advancement of Science. Membership is open to undergraduate and graduate students and faculty members. Students elected to membership must maintain high standards of general scholarship and outstanding achievement in physics. Besides providing an incentive for all physics students to rise to excellence, the society also encourages physics interest and science literacy in the general public. Please see the Department of Physics for more information.

Theta Alpha Kappa: The only honor society devoted to religious studies. Theta Alpha Kappa granted Central Washington University a charter in 2007. Its overall purpose is to provide local and national recognition to students with high scholarship and an academic interest in the field of religious studies. In addition to promoting student interest in research and advanced study in the field, it provides opportunities for the publication of student research papers of merit through the Journal of Theta Alpha Kappa, encourages a professional spirit and friendship among those who have demonstrated an aptitude for excellence within the field, and popularizes interest in religious studies among the general collegiate and local community. Please see the Department of Philosophy and Religious Studies for more information.

## Wildcat Shop

The Wildcat Shop has everything you need right here on campus and its selling prices on textbooks are lower than 96 percent of all college stores in the country. It also has a strong textbook rental program for students. It carries:

- Textbooks (new, used, rental, and ebook)
- General reading and reference books
- Computer software (special prices for students)
- Computer hardware (special student prices)
- Electronics
- Clothing and gifts
- School and art supplies
- Greeting cards
- Dorm supplies
- Health and beauty aids
- Stamps
- Snack foods and more

It also provides laminating, binding, copying (color or black and white), mat board cutting, DVD and CD recording, Apple computer repair, and fax services.

Special order any book, computer, or electronic product, or supply, at no additional cost. For your convenience the Wildcat Shop buys back textbooks throughout the quarter. Contact the Wildcat Shop at 509-963-1311, or at www.wildcatshop.net.

## University Services

## Archival Services

The Archives at Central Washington University was established in 2004 to act as the repository for official and unofficial records that document the history of the university. The Archives also serve as a regional repository to house, preserve, and promote the history of central Washington. It is located on the fourth floor of the James E. Brooks Library on the Ellensburg campus.

The primary objectives of the Archives is to collect, organize, describe, preserve, and make available university records and regional collections of permanent historical value. It also aims to support research, teaching, and public awareness of the rich heritage of central Washington and the university.

The Archives contain records, photographs, and artifacts produced by CWU or its predecessors: Washington State Normal School at Ellensburg (1891-1937); Central Washington College of Education (1937-1961); and Central Washington State College (1961-1977). The collection contains documents published by the university as well as materials produced by university administrators, faculty, staff, students, and alumni. The collection includes administrative reports, department and committee records, student publications, photographs, printed records, and the correspondence of former presidents, deans, and other university officials.

The regional manuscript collection, which is part of the Archives, consists of historically significant 19th- and 20thcentury personal papers, business and organizational records, photograph collections, and other materials produced in central Washington by individuals, businesses, and organizations that reside, or have resided, in the region. One-of-kind unpublished works from the counties of Benton, Chelan, Douglas, Grant, Kittitas, Klickitat, Okanogan, and Yakima are represented in the collection. The collection includes materials relevant to the history and cultural development of central Washington.

## Center for Diversity and Social Justice

The Center for Spatial Information and Research (CSIR) encourages, supports, and coordinates research projects for students and faculty using hardware and software technologies that gather and analyze "spatial" information to solve problems in the social sciences, natural sciences, and business.
Geographic Information Systems (GIS), high-precision Global Positioning System (GPS), ground-penetrating radar, precision conventional laser surveying, and satellite image processing are some of the spatial technologies used by CWU faculty and students. Typical GIS applications include projects in resource geography, archaeology, field biology, geology, and planning. CSIR also relies on the Department of Geography's GIS laboratory, where a variety of undergraduate and graduate GIS courses are taught, and numerous large and small research projects are conducted using state-of-the-art computing systems.

CSIR encourages creative, interdisciplinary uses of spatial technology, and actively works with the private and government sectors to identify problems to which CWU personnel and equipment can provide effective solutions. CSIR's home page is at www.cwu.edu/spatial-information.

## Center for Spatial Information and Research

The Center for Spatial Information and Research (CSIR) encourages, supports, and coordinates research projects for students and faculty using hardware and software technologies that gather and analyze "spatial" information to solve problems in the social sciences, natural sciences, and business.

CSIR encourages creative, interdisciplinary uses of spatial technology, and actively works with the private and government sectors to identify problems to which CWU personnel and equipment can provide effective solutions. CSIR's home page is at www.cwu.edu/spatial-information.

## Central Washington Archaeological Survey

The Central Washington Archaeological Survey (CWAS) is a research and public service office that is part of the Department of Anthropology. CWAS conducts archaeological investigations in the central counties of the state and promotes public involvement in the identification and protection of regional archaeological resources. CWAS involves faculty and students in research projects funded through external grants and contracts. CWAS cooperates with state and federal agencies, Native American tribes and nations, professional archaeologists throughout the state, and state and local archaeological societies in the study and preservation of central Washington's archaeological resources.

## Disability Services

Disability Services (DS), and Human Resources (HR), in partnership with the university community, are dedicated to creating an inclusive campus that celebrates diversity and provides individuals with disabilities an equal opportunity to fully participate in and benefit from all aspects of the employment and educational environments. Utilizing documentation of disability and information obtained in consultation with the student or employee, DS staff assesses the effects of a student's disability on his/her ability to access the educational process. HR staff assesses the effects an employee's disability has on his/her ability to perform the essential functions of his/her job. Based on this assessment, DS/HR staff identifies reasonable accommodations designed to ensure these individuals equal access to all facets of the University. Students or employees wishing to request disability accommodations are responsible for contacting DS/HR.

Examples of accommodations available to CWU students and/or employees with disabilities include, but are not limited to, textbooks and academic/employment materials in accessible formats (large print, Braille, electronic text, PC-read audio), alternative examination procedures, sign language interpreters, speech-to-text transcription, permission to audio-record lectures, note-taking assistance, early registration, priority snow removal routes, special classroom or workplace furniture, access technology and temporary disability parking permits. DS also
serves as a resource for student, faculty, staff, and the community regarding disability issues.

Students with disabilities may request reasonable accommodation by contacting DS: 509-963-2214; Hogue 126; DS@cwu.edu, www.cwu.edu/disability-support. Employees and visitors may request reasonable accommodation by contacting HR; 509-963-1202; Mitchell Hall, First Floor; hr@cwu.edu.

## Diversity and Equity Center (DEC)

Located in the heart of the Student Union and Recreation Center (SURC 250) the DEC aspires to promote equity, inclusion and social justice through programs, outreach and partnerships. Within co-curricular and extracurricular initiatives, the DEC advocates and nurtures a campus community who recognize and celebrate diversity, facilitates inclusion and creative expression. Our signature, thematic, and outreach programs include Heritage months, Identity development and Ally workshops, and many more. In all cases students and staff work together to define programming and outreach efforts. DEC provides resources to students, faculty, and staff on a variety of topics related to underrepresented populations and the intersectionality of identities. Students are welcome in the DEC to hang out and to participate in the activities. Come check out the DEC and see how we can support you!

## Family Resource Center

The Family Resource Center (FRC) is part of the Family and Child Life program and Department of Family and Consumer Sciences at Central Washington University. The mission of the FRC is to provide programming and resources to support families, coordinate family-related research, and provide civic engagement opportunities for students. Information about current FRC events and resources for families can be found online at www.cwu.edu/family/, and the FRC director can be reached at 509-963-2758.

## Geographic Information Systems Laboratory

The GIS laboratory contains up-to-date computer hardware and various software suites employed in the analysis of spatial data such as maps, aerial photos, satellite imagery, and digital terrain models. The laboratory provides a teaching and research facility for faculty and students from a variety of fields, including anthropology, archaeology, biology, geography, geology, landuse planning, resource management, and sociology. In addition, the laboratory offers contract and consultation services to public and private agencies for GIS applications. Additional information can be found at www.cwu.edu/geography.

## Information Services

Information Services (IS) provides computer, communications, enterprise application and networking services to the Ellensburg campus and university centers located throughout the state. IS staff members work closely with all segments of the university to ensure that information technology is broadly developed, acquired, used, and available to all students, faculty, and staff. IS information is available on the web at www.cwu.edu/its and can be contacted at 509-963-2924. The CWU Service Desk (formerly ITS Help Desk) can be contacted at 509-963-2001.

Students and faculty have easy access to computers and software in 23 general-purpose and discipline-specific computer labs spread throughout academic buildings on campus. Every residence hall room is equipped with a network connection
providing Internet services for those students that bring computers to campus and residence halls have Wi-Fi service. Students, faculty, and staff who reside off campus can access CWU technology resources (i.e., Canvas, portal, e-mail, file services, etc.) via the Internet through my.cwu.edu.

Wi-Fi access to the CWU network and the Internet is available across the campus and via laptop checkout in the SURC and Brooks Library. Information on Wi-Fi at CWU is online at www.cwu.edu/its-helpdesk/connecting-cwu-wireless-network.

## James E. Brooks Library

The Brooks Library provides quality resources and innovative services to stimulate creativity, intellectual curiosity, and to facilitate lifelong learning and research within the communities we serve. The library's faculty and staff are engaged in the creation of collections that support the curriculum and the provision of access to those materials. More specifically, these activities include the collection and preservation of materials, user instruction and guidance, information retrieval, analysis and organization, global access to library and information resources, and collaboration with instructional faculty in developing programs, collections, and research.

Students and other library users have $24 / 7$ online access to electronic materials, as well as, 1.3 million books, films, government documents, maps, and audio recordings on site in the Brooks Library. Additionally, the library provides similar access to more than 28 million information items from the academic libraries of the Northwest that belong to the Orbis Cascade Alliance. Full-text electronic and/or paper subscriptions to over 15,000 periodicals and academic journals are available electronically or on site.

Library staff is available to provide personal service to students 100 hours per week. The Academic and Research Commons (ARC) on the first floor provides spaces for students, faculty and staff to work collaboratively to enhance teaching and learning The ARC combines the services of Learning Support Services tutoring, research librarians, Career Services and Information Services. Group study areas, a Family Study Space, and desktop computers are available to those who visit the main library in Ellensburg. Students at the Centers have access to library services and materials at the main library and libraries at the Des Moines and Lynnwood Centers. Academic support is also available through a toll-free phone number, e-mail, and 24/7 Ask-A-Librarian services. Internet connectivity for personal laptops is available on each floor of the Brooks Library and laptops are available for checkout by students. The libraries' staff, services, and collections support the educational efforts of students, foster intellectual, social and ethical development, and assist students in locating, using, and evaluating information to equip them for independent, lifelong learning.

## Multimodal Education Center

The Multimodal Education Center (MEC) embraces the vision that Technology Empowers Learning. We provide instructional and multimedia technologies, support, and training for all CWU students, faculty, and staff. Our goal is to create opportunities for exploration of emerging technologies, digital media, and innovative learning spaces. Through a variety of workshops, we can help you create multimedia projects, develop a 3D model for printing at the Center, learn a new technology skill, explore the uses of Virtual Reality, and more. We have laptops, video cameras, and projectors for checkout, both Apple and PC
computer labs, and an educational curriculum library. For more information, visit us in Black Hall, call 509-963-3293 or visit the website at www.cwu.edu/multimodal-education/.

## Student Employment

The university supports the employment of current students, recognizing the reciprocal benefits of their work. Employment of students provides them the opportunity to gain valuable work experience and assists them with financing their education. Student employees are a valuable source of labor and spirit for the university.

We work to ensure that each student enjoys his or her CWU work experience and that employers have the resources needed to employ, mentor, and support student employees. The role of Human Resources is to facilitate connections between students and employers so that students can fund their educational expenses, obtain valuable work experience, and build career portfolios through work experience and training opportunities created specifically for student employees.

Student Employment job opportunities are available for both on and off campus (including summer opportunities) at careers.cwu.edu. For additional information about Student Employment visit our website at www.cwu.edu/studentemployment. Contact us at 509-963-1202 or seo@cwu.edu or come see us in Human Resource, Mitchell Hall, First Floor.

## University Police and Parking Services

University Police and Parking Services (UPPS) provides service to the Ellensburg, WA campus of CWU. Commissioned and trained police officers provide service to the campus community 24 hours per day, 7 days a week. In addition, parking enforcement officers, professional support staff and student employees work diligently to meet our mission: "Work in partnership with our communities to create a safe and secure environment through education and enforcement."

UPPS works closely with neighboring law enforcement agencies. "Blue-light" emergency telephones are installed in or adjacent to many parking lots and walking paths throughout the campus. Each phone has an emergency button and a two-way speaker that directly connects to KITTCOM.

UPPS employs students in a program called Courtesy Assistance Team or CAT. CAT provides walking companions from campus buildings to parking lots or residence halls. CAT employees also check doors to buildings and walk through buildings that are open.

Throughout the school year we give 60-75 crime prevention programs and have been invited to present "active shooter response" to numerous classes. We routinely work with the student newspaper and radio station, as well as other media, to provide safety tips and timely warnings of criminal activity.

Central Transit provides transportation from campus to various locations in the city of Ellensburg.

## Our motto is "Integrity Service Excellent."

Emergency Phone: 911
Non-emergency: 509-925-8534
Business Phone: 509-963-2959
Fax: 509-963-2750

Monday through Friday, 8 a.m.-5 p.m.
Courtesy Assistance Team (CAT) 509-963-2950

## Veteran Center

CWU's Veterans Center opened in 2009 to aid service members and their families entering college. The center is committed to the academic success of its students by helping with the transition into student life and laying the groundwork for a satisfying career. Services include assisting with veteran education benefits applications, certifying enrollment, and locating additional resources veterans and their family members may need. Call 509-963-3028 or e-mail va@cwu.edu, find more information at www.cwu.edu/veterans. We are located in Bouillon Hall, 206.

## University Centers

Central Washington University has six campus and two instructional locations in addition to the residential campus in Ellensburg. The University Centers offer upper-division (300and $400-\mathrm{level}$ ) and graduate-level coursework leading to baccalaureate and master's degrees. The University Centers are designed for students who have completed their Direct Transfer Agreement (DTA) associate degree or most of their general education requirements. Day and evening classes are offered to accommodate the needs of time- and place-bound students. Visit us at www.cwu.edu/welcome/cwu-campus-locations.

For more information about the University Centers, contact Lauren Hibbs, Interim Executive Director of Extended Learning at (509)-963-1456 or Lauren.Hibbs@cwu.edu.

## UNIVERSITY CENTER POLICIES

## Admission

Students interested in entering a university center program may submit an application at www.cwu.edu/admissions.

## Registration

Continuing students follow the same procedures as noted in the registration part of this catalog. Students may register via MyCWU, phone, or in person during their assigned enrollment appointment. Non-matriculated students may register for classes on a space-available basis during open enrollment.

## Advising

General transfer advising and specific program advising is available by contacting your university center for an appointment. Final official transcripts must be received for articulation of all transfer courses.

## Tuition

See current tuition rates and fees or refer to the Registrar Services home page at www.cwu.edu/registrar. Continuing Education courses are offered on a self-support basis. The selfsupport tuition schedule is separate from full-time tuition and fees. Visit the Continuing Education web site at www.cwu.edu/ce/. Tuition and fees are subject to change.

## Student Services

Information for services that accommodate physical- and learning-disabled students, career placement, or counseling is available by contacting your specific university center.

## Financial Aid

Students attending a university center are eligible to apply for financial aid. You can apply online at www.fafsa.ed.gov. For more information about financial aid, visit
www.cwu.edu/financial-aid. All students must submit the Free Application for Federal Student Aid (FAFSA) to begin the process.

## Veterans

Information on veterans' benefits is available through the Veterans Center on the Ellensburg campus, by calling 509-9633028, or by emailing va@cwu.edu.

## Library

Access to library services is available to students and faculty at the university centers through the CWU Brooks Library, which is available by logging on to www.lib.cwu.edu/. Assistance in acquiring reference materials may also be obtained by calling 800-290-3327. On-site library resource centers are also located at CWU-Des Moines and CWU-Lynnwood.

## Textbooks

Textbooks may be purchased through the Wildcat Shop at cwubookstore.collegestoreonline.com. You may also inquire at your individual center for specific information.

## Final Exam Schedule

University Centers' final exam dates are different from the Ellensburg campus schedule. University Center instructors establish their own finals calendar. Therefore, University Center students should check with the instructor to verify the appropriate date and time or refer to the syllabus.

## Office Hours and Parking

Contact the University Center office regarding office hours as times may vary for each center. Parking permit questions can also be directed to your University Center office.

## CWU-Des Moines

At Highline Community College
Higher Education Center, Building 29
2400 South 240th Street
P. O. Box 13490

Des Moines, WA 98198

Yakima, WA 98907
509-574-6894

## Degree Programs:

- BAEd Elementary Education
- BS Interdisciplinary Studies - Social Sciences

# Undergraduate Admissions 

## General Information

Central offers admission to qualified students as they apply. All applicants must submit a completed CWU online or paper admissions application (the online application is preferred) along with a non-refundable application processing fee of $\$ 50$. To apply online visit www.cwu.edu and click on Apply Now.

Freshmen applicants that apply for fall quarter will be notified of an admissions decision within two to four weeks. The priority application date for fall quarter application for freshmen and transfer students is February 1. Applications received after February 1 will be processed on a space-available basis. For the most current information and admissions deadlines for other academic quarters, please visit www.cwu.edu/admissions.

## Freshmen Applicants

Freshmen applicants (students currently enrolled in high school or high school graduates who have earned fewer than 40 college credits after high school graduation, including Running Start credits) must send official copies of all high school and college transcripts, as well as ACT or SAT scores, to the Office of Admissions.

Applicants with a 3.4 cumulative GPA or higher and have satisfied the CADR requirements (see below) will be automatically admitted regardless of ACT or SAT score*. Admission Essay is not required.
*Applicants must still submit an ACT or SAT test scores. Test scores are required if you are applying for Financial Aid and also used for scholarship consideration and for placement into English and Math courses at CWU.

Applicants with a 3.39-3.00 cumulative GPA who have satisfied the CADR requirements will be considered for admission based on grades AND test scores.

For applicants with CADR deficiencies, Admissions will take into account, grade trends, course rigor, senior year course schedule, and ACT/SAT scores.

Applicants with a cumulative GPA of 2.99-2.00 and/or CADR deficiencies will be considered through CWU's Admissions Review Process. In this process we consider grade trends, course rigor, senior year course schedule, and ACT/SAT scores.

CWU does not require an essay at the time of application. If during the review process we feel additional information will be helpful we will request it.

To be considered for admissions, students must have at least a 2.00 cumulative GPA in high school and any applicable college work.

## College Academic Distribution Requirements (CADR)

CADR refers to college admission criteria established by the Washington Student Achievement Council (WSAC). Each school district determines which of its courses meet CADR guidelines. Students are encouraged to take additional courses above and beyond the minimum CADR requirements listed below.

English: 4 credits (including 3 credits of literature and composition)
Math: 3 credits (including algebra I, algebra II and geometry, senior year math-based quantitative course: 1 credit)
(Acceptable courses include algebra I, algebra II, geometry, precalculus and above, math analysis, statistics, applied math, appropriate career and technical courses, or an algebra-based science course such as chemistry or physics. If you take and pass pre-calculus, math analysis of calculus prior to your senior year, you're exempt from this requirement.
Social Science: 3 credits
Lab Science: 2 credits (one credit required in an algebra based lab science)
World Language: 2 credits of the same world language, Native American language or American Sign Language
1 credit of fine, visual, or performing arts, or electives from any of the other required CADR areas

Central Washington University recommends that students take additional courses beyond the minimum to prepare them for university-level work.

## College Credit Earned While in High School

Regardless of the number of college credits completed or if an Associate Degree is earned, students earning college credit while in high school, including coursework taken during summer after graduation, will be considered freshmen for admissions purposes. Running Start students and others with college credit are eligible for all freshmen scholarships and must live on campus for their first year. CWU accepts most college credit earned while in high school, including programs such as:

- Advanced Placement (AP)
- College in the High School
- College Level Examination Program (CLEP)
- CWU Cornerstone
- International Baccalaureate (IB)
- Running Start

## Home-school Applicants

A home-schooled student is any applicant who will complete their high school coursework at home and will not receive a diploma from an accredited high school. An applicant is qualified for freshman admission if they:

- Present evidence of their completion of the academic CADR courses by submitting an official home-school transcript. Transcripts must be signed by a parent or guardian in order to be official.
- Submit ACT or SAT scores
- Provide the GED as proof of high school completion. A GED is not required but may be submitted for eligibility for Federal Financial Aid and to participate in varsity athletics.
- Submit any official college transcripts (if applicable). Regardless of the number of college credits completed, students earning college credit in high school will be considered freshmen for admissions purposes as long as they do not take coursework after graduation from high school (excluding summer).
All home-schooled students will be reviewed by the Admissions Review Process on an individual basis.

## Transfer Applicants

Transfer students who have earned 40 or more college-level credits ( 27 semester credits) must send official copies of all college transcripts to the Office of Admissions. Generally, transfer students who have completed at least 40 college-level transferable credits with at least a 2.5 cumulative GPA will be admissible. Students who have completed college-level math and English and those who have completed a Direct Transfer Associated degree (DTA) will do better in the Admissions Review Process. A current list of DTA degrees is available online at www.cwu.edu/registrar. For current information and application deadlines, visit www.cwu.edu/admissions.

Your application will go through the Admissions Review Process. The admissions review committee takes into account your grade trend, the number of transferable credits you have completed, and type of coursework completed, including college-level English and math completion.

## Admissions Review Process

Central recognizes that many factors affect grades and test scores, so the university utilizes an Admissions Review Process. Freshmen applicants whose cumulative GPA is 2.99 or below and/or who are missing any of the high school CADR requirements, or transfer applicants whose GPA is below 2.5 from any previous college attended, maybe asked to submit an essay. The application will go through the Admissions Review Process.

Other students who may be reviewed through the Admissions Review Process include those who have not completed high school, earned a General Education Development (GED) certificate, as well as students 25 or older who have poor academic histories and have not attended school recently. Applicants may be required to complete supplemental application forms and/or submit additional information or essays.

## International Students

Central welcomes qualified students from other countries. Students demonstrating the greatest potential for success at the university level may be admitted after a thorough review and evaluation of their entire academic background.

Because educational systems vary widely around the world, there is no single, uniform admission requirement for international students. However, they must meet the following minimum requirements for admission purposes:

1. Completion of the academic coursework and national examinations necessary to satisfy admission requirements to colleges and universities in their
native country.
2. Competency in English is required before an I-20 can be issued. If English is not their first language, competency in English must be demonstrated through one of the following:

- English Composition Courses

Receive a 3.0 (B grade) in each of two college-level English composition courses from an accredited United States college or university. Contact the Office of Admissions at admissions@cwu.edu to find out what courses are acceptable.

- Undergraduate English as a Second Language (UESL) Program Recommendation

Receive a recommendation from CWU's UESL Program after successful completion of their highest level. CWU also offers Conditional Admissions to students who meet all of the requirements other than English proficiency. For more information and application materials visit
www.cwu.edu/international-programs.

- Test of English as a Foreign Language (TOEFL)

Receive a TOEFL score meeting the following criteria:
A score of 525 or above-Paper-based TOEFL
A score of 195 or above-Computer-based TOEFL
A score of 71 or above-Internet-board TOEFL

- Test of International English Language Testing System (IELTS)
Receive a IELTS score of 6.0
Students who originate from one of the following countries are considered to have met English Proficiency Standards: Australia, Ireland, New Zealand, United Kingdom, and Englishspeaking provinces of Canada. These students are exempt from furnishing proof of English proficiency documents.

International Transfer students who are transferring from U.S. institutions must have a minimum grade point average of 2.5 in transferable college level courses and meet the academic requirements for college entrance in their native country. Please Note: Though not required for admission purposes, adequate financial support, verified by the Confidential Financial Statement form and a current bank letter or scholarship award, is required of all international applicants.

There are three ways of applying to Central Washington University:

1. Apply online. With this option you will submit your application electronically with the online application form and pay your \$50 application fee electronically using a credit card.
2. Download and print copies of required application forms. Links to down-loadable forms in PDF (Portable Document File) format are found online on the CWU Web site. Once completed, your forms and supporting documents should be returned to the CWU Office of Admissions in person or through the mail.
3. Request needed forms be sent to your address.

Contact the CWU Office of Admissions at admissions@cwu.edu with your request. Once completed, your forms and supporting documents should be returned to the CWU Office of Admissions in person or through the mail.

All supporting documents should be sent a minimum of 90 days in advance of the quarter for which the applicant seeks admission.

Students who submit international college or university transcripts must have an official course-by-course translation. Evaluation may be done by university personnel or one of the following foreign credential evaluation companies:
Foundation for International Services (FIS) Inc. at www.fisweb.com.
World Education Services (WES)
www.wes.org/students/index.asp.

## Re-admission of Former Students

Students who interrupt their CWU studies for more than one quarter (excluding summer) must re-apply for admission to the university and pay the application fee. For more information, check the admissions Web site at www.cwu.edu/admissions. If the student has attended any institution during his or her absence from CWU, the student must send official transcripts of all postCWU coursework to the Office of Admissions at the time they re-apply. Eligibility for re-admission will be based on prior academic performance at the university and any courses completed since last attending CWU. If a student left on academic or disciplinary suspension, they should contact the Dean of Student Success for reapplication instructions 30 days prior to the start of the quarter for which the student is applying.

## Confirmation of Admission

Students who are offered admission to the university must confirm their intention to enroll by logging on to MyCWU and using the Accept/Decline button in their Admissions Toolbox. This will begin the orientation, registration, and advising process. The university will not withdraw an offer of admission for fall quarter until after May 1. Students who have not confirmed may be denied admission after that time if enrollment limits have been reached. Students who choose not to accept offers of admission must notify the Office of Admissions in writing or use the same Accept/Decline button in their Admissions Toolbox to decline the offer of admission. An offer of admission is only valid for the academic quarter indicated in the acceptance letter. A student who chooses not to accept an offer of admission may reapply for a subsequent quarter.

## Withdrawal of Offer of Admission

Offers of admission may be withdrawn by the Office of Admissions if a student's academic work between the time of application and the quarter for which the student has applied results in the student not meeting the admissions criteria.

## Non-matriculated Student Application

Students who are not seeking degrees or certificates may be allowed to enroll in courses as non-matriculated students. These students do not need to go through the regular admissions process, but should apply through Registrar Services by completing the Non-Matriculated Application form. Nonmatriculated students register during open enrollment a spaceavailable basis. Credits earned as a non-matriculated student may not be used to satisfy degree or certificate requirements
unless the student applies and is accepted as a matriculated student, in which case a maximum of 45 credits may be applied. Exceptions may be made for non-matriculated students in collaborative certificate programs.

Students who have previously attended Central as matriculated students and have not obtained a degree, and students who have applied and been rejected for undergraduate matriculated status will not be allowed to enroll as non-matriculated students. Nonmatriculated students are not eligible for most financial aid, veteran's benefits, or other services regularly provided for matriculated students.

## High School Enrichment Program

Students who have not yet graduated from high school may be allowed to enroll as non-matriculated students for courses that they need to advance academically, provided that such academic opportunities are not readily available to them elsewhere.

To be eligible for the High School Enrichment Program, students must have demonstrated superior academic performance or preparation in the area of study for which they are applying. High School Enrichment Program applicants must submit official copies of their high school transcript. Some courses may require that the student submit ACT, SAT, or COMPASS scores in order to qualify for placement into those courses. In addition, they must complete the High School Enrichment application that is available from Registrar Services, and obtain the approval of their high school principal, the course instructor, and Registrar. Regular tuition and fees apply. For further information, please call 509-963-3001 or e-mail reg@cwu.edu.

## Central Visitation Program

The Central Visitation program is a student-run program designed to give prospective students an insight into campus life from a student's perspective. Our staff is trained to know all aspects of CWU. The staff understands that visiting campus is one of the most important steps in the college decision-making process.
The Central Visitation program offers a variety of programs to help you explore CWU:

- Campus Tour: Campus walking tours are offered Monday through Friday at 10 a.m. and 2 p.m. Weekend tours are offered Saturday at 1:00 p.m. by appointment only. Check the Web site for a list of available dates. Tours are expected to last at least one hour and 15 minutes depending on the size of the group. Please remember to wear appropriate shoes and clothing for the time of year.
- Saturday Preview Days: offers you a unique opportunity to get great information about the undergraduate admissions process, value of CWU, campus life, and explore our wonderful campus by going on a campus tour. Lunch will be provided by CWU.
- An Official CWU Welcome Packet

For the most current information, dates, and times, visit www.cwu.edu/admissions or call 509-963-1262.

## Transfer Credit

## Equivalency Guides and Policies

Central Washington University accepts a maximum of 135 total transfer credits from regionally accredited four-year schools, including a maximum of 105 total credits from regionally accredited community colleges. Credits are evaluated by Registrar Services based on official transcripts. Credits earned in courses numbered 100 and above are generally accepted toward total transfer credits provided the courses require universitylevel study.

Transfer courses equivalent to CWU courses will apply toward the baccalaureate degree exactly as do the CWU courses for which they are being substituted. Equivalency is established by a course review from the appropriate academic department. Other transfer courses that have not been established as exact equivalents may transfer as general electives and may also be allowed in the degree program with approval from the appropriate academic department chair and, as appropriate, college dean.

Colleges that operate on semester basis give semester credits. Equivalent quarter credits are semester credits multiplied by one and one half.

Credits earned at institutions which are not fully accredited by a regional accrediting association are not accepted. Consideration for exception to this policy may be made by written petition to the dean of the appropriate college after earning a minimum of 45 credits at Central with a cumulative GPA of at least 2.5 .

The university recognizes college credit from a number of sources, including Advanced Placement (AP), College Level Examination Program (CLEP), International Baccalaureate (IB), DANTES and military educational experience or correspondence credit. Up to 45 quarter credits from these programs may be counted toward graduation.

The university endorses the policy on Inter-College Transfer and Articulation among Washington public colleges and universities published by the Washington Student Achievement Council. The policy deals with the rights and responsibilities of transfer students, and the review and appeal process in transfer credit disputes. Contact Registrar Services for more detailed information.

Academic associate degrees which are part of the Direct Transfer Agreements (DTA) between the university and Washington community and technical colleges will meet the general education requirement of a bachelor's degree. Community and technical colleges offer several kinds of associate degrees, therefore, students who plan to transfer to the university should check with their counselors to make sure they are enrolled in the appropriate direct transfer degree program.

Associate of science degrees with transfer agreements between the university and Washington community and technical colleges will meet the general education requirements of a bachelor's degree when students complete additional lower division, general education courses at CWU.

A student cannot earn an associate degree and bachelor's degree in the same quarter.

Academic associate of art degrees from a public community college outside of Washington State, accredited by the Northwest Commission on Colleges and Universities (NWCCU), will meet the general education requirements of a bachelor's degree. Approved degrees are noted on the Registrar website (www.cwu.edu/registrar/transfer-equivalenciespolicies).

Students transferring to CWU from another Washington State public baccalaureate institution, whose General University Requirements or General Education Requirements were complete at the sending institution, will also satisfy all of the CWU General Education Requirements, provided official documentation is received from the sending institute and certified by CWU.

## Credit for Military Service

Matriculated students seeking to use Veterans Affairs Educational Benefits must submit official military transcripts (Joint Services Transcript) for evaluation. Students may receive up to 30 lower and/or upper division credits for completion of military educational experiences as recommended by the American Council on Education (ACE). Basic training and Military Occupational Specialty courses are excluded. Military credit recommendations that are direct equivalents to CWU course offerings may be articulated to that specific course with departmental approval. If direct course equivalents do not exist, elective credit will be awarded when possible.

## Non-U.S. College/University Credit

Credit will be accepted from non-U.S. institutions of higher education when (1) it has been earned at an institution linked to CWU either by a bilateral or consortial (e.g., International Student Exchange Program (ISEP) agreement, or when an institution has been certified by the CWU Office of International Studies and Programs as a legitimate, recognized institution of higher education (tertiary level) within a particular country; (2) the student has received a passing grade recognized by the institution; and (3) an official record or transcript has been received by the university.

## Non-Transferable Courses

Credit will not be granted for vocational/technical courses; noncredit courses and workshops; remedial or college preparatory courses; or sectarian religious studies.

## Degrees Offered

Central Washington University offers the following undergraduate degrees:

Bachelor of Applied Science
Bachelor of Arts
Bachelor of Arts in Education
Bachelor of Fine Arts
Bachelor of Music
Bachelor of Science
Students wishing to earn a BA, BAS, BAEd, BFA, BM, or BS degree must complete (1) the general education program; (2) a concentration of at least 60 credits which may be satisfied by a specified major, or a specified major and minor, or a specified major and courses in other fields as prescribed by the major department; (3) electives in sufficient quantity to include 60 upper-division credits to bring the total quarter credits to 180 ; and (4) other degree requirements as specified in the catalog under Graduation Requirements. Department fields of study are listed by major, minor, or specialization by college on the undergraduate programs offered. Minor concentrations are offered in many fields.

Students wishing to earn a BAEd degree must complete (1) the general education program; (2) a major in Early Childhood Education, Elementary Education or Special Education and minors, when appropriate; (3) the professional education foundation courses; (4) 180 total quarter credits (including 60 upper-division credits); and (5) other general degree requirements as listed under the College of Education and Professional Studies and Graduation Requirements sections in this catalog. Students may select any university minor; however, students are strongly encouraged to select an endorsable teaching minor.

## Advanced Placement Credit

The University will grant at a minimum elective credit for College Board Advanced Placement (AP) exams completed with a score of three (3) or higher. Students may receive credit for advanced placement with a grade of S, depending upon the scores achieved on the College Entrance Examination Board Advanced Placement Test (AP). Students must request that their AP test scores be sent to the Registrar Services at Central. Scores of 3 or better on Advanced Placement Examination will be awarded as free electives for departments without specific policy. No more than 45 total quarter credits through AP or other sources of nontraditional credit may apply toward graduation requirements.

| Department | AP Score | CWU Equivalent (credit amount) |
| :---: | :---: | :---: |

## College Level Examination Program

Students will be awarded college-level quarter credits with a grade of S for each score at the 50 th percentile on the College Level Examination Program (CLEP) humanities, social science/history and natural sciences examinations. These credits will meet the general education requirements in the appropriate areas. Students may also be awarded credit for subject examinations as determined by appropriate academic departments at the time of application for credit.

No more than 45 total quarter credits through CLEP or other sources of nontraditional credit may apply to graduation requirements. CLEP credit is not awarded for English.

| College Level Examination Program |  |  |

## International Baccalaureate

Central recognizes the International Baccalaureate (IB) program as a coherent, challenging course of study and responds individually to each participant's IB transcript for award of college credit. Central will grant at a minimum elective credit for International Baccalaureate (IB) higher level exams completed with a score of five (5) or higher, with exceptions. Standards for acceptance will be established by the appropriate academic departments and listed in the official catalog. CWU recognizes the International Baccalaureate Diploma and awards up to 45 quarter credits ( 30 semester credits). With the receipt of a Diploma, credit will be awarded for 3 courses ( 15 quarter credits) and distributed evenly among the three general education breadth areas (natural sciences, social sciences, arts and humanities). These credits will not be applied to lab or writing courses. An additional 30 quarter credits ( 20 semester credits) may be awarded in the areas of the students' higher level subject exams with a score of 5 or higher. No more that 45 total quarter credits through IB or other sources of nontraditional credit may apply toward graduation requirements.

## Cambridge International AS/A Level Exams

Once the student has submitted the original exam certificate directly from Cambridge International, students will be awarded up to 15 quarter credits for each A-level exam with a passing grade and up to 7.5 quarter credits will be granted for each AS-level exam with a passing grade. A satisfactory ( S ) grade will be posted for A-level or AS-level exams.

No more than 45 total quarter credits through Cambridge International or other sources of nontraditional credit may apply to graduation requirements. Cambridge International credit is not awarded for ENGL 101.

## Tuition and Fees

## General Tuition and Fees

General tuition and fee rates are established by the State Legislature and miscellaneous fees are set by the CWU Board of Trustees. The tuition rates shown below are an estimate. All tuition and fees are subject to change without notice.

Tuition rates for 2018-2019 are not available at this time.

## Undergraduate and post-baccalaureate students registering for $\mathbf{1 0 - 1 8}$ credits:

Quarterly tuition fees for residents of the state of Washington \$2,012.20
Quarterly tuition fees for nonresidents of the state of Washington $\$ 6,714.50$

## Undergraduate and post-baccalaureate

students registering for nine credits or less:
Resident: Each credit, \$201.22
Minimum of \$402.44
Nonresident: Each credit, \$671.45
Minimum of \$1,342.90
Graduate (Master's Degree)
students registering for $\mathbf{1 0 - 1 8}$ credits:
Resident graduate: \$2,924.90
Nonresident graduate: $\$ 6,851.50$
Graduate (Master's Degree)

## students registering for nine credits or less:

Resident graduate: Each credit, \$292.49
Minimum of $\$ 584.98$
Nonresident graduate: Each credit, \$685.15
Minimum of \$1,370.30

## Students registering for more than 18 credits:

Undergraduate and post-baccalaureate, Resident: Each credit over 18, \$201.22
Nonresident: Each credit over 18, \$671.45
Resident graduate: Each credit over 18, \$292.49
Nonresident graduate: Each credit over 18, $\$ 685.15$

## Continuing Education Tuition Fees

All courses taught through the Office of Continuing Education are self-supporting. The waiver for veterans, university staff and senior citizens does not apply. Full fee-paying students must make additional payments at the rate established for each continuing education course in which they enroll.

## Resident and Non-Resident Status

Washington State law concerning resident classification for tuition and fee purposes, RCW 28B.15.012 et seq., requires that a student "(a)(i) have established a bona fide domicile in the state of Washington, primarily for purposes other than educational, for at least one year immediately prior to the beginning of the quarter for which he or she registers at the university, and (ii) be financially independent, or (b) be a dependent student, one or both of whose parents or legal guardians have maintained a bona fide domicile in the state of

Washington for at least one year prior to the beginning of the quarter for which the student registers at the university." The term "domicile" denotes a person's true, fixed, and permanent home and place of habitation. It is the place where he or she intends to remain, and to which he or she expects to return when he or she leaves without intending to establish a new domicile elsewhere.

Any change of residency status for a given quarter must be based on written evidence provided by the student on a residency classification questionnaire on or before the first class day of the quarter for which a change of residency is sought. Questionnaires are available through Registrar Services. The burden of proof in all cases rests with the student.

In accordance with RCW 28B.15.014, certain nonresidents are exempted from paying nonresident tuition and fees. To be eligible for such an exemption, a nonresident student must provide documented evidence that he or she resides in the state of Washington, and (a) holds a graduate service appointment, designated as such by the university, involving not less than 20 hours per week; (b) is employed for an academic department in support of the instructional or research programs involving not less than 20 hours per week; or (c) is a faculty member, classified staff member, administratively exempt employee holding not less than a half-time appointment, or dependent child of such a person.

## Resident Tuition for Veterans and Eligible Individuals

 Effective July 24, 2015, ESSB 5355 was signed into law in July 2015, modifying the definition of resident student to comply with federal requirements established by the Veterans Access, Choice, and Accountability Act of 2015 (Choice Act). The Choice Act requires states to charge in-state tuition and fees to "covered individuals" in order for the Department of Veterans Affairs to approve programs of education for everyone training under the Post 9/11 GI Bill and the Montgomery GI Bill.
## A "covered individual" is defined in the Choice Act as:

1. A Veteran who lives in the state in which the institution of higher learning is located (regardless of his/her formal state of residence) and enrolls in the school within three (3) years of discharge from a period of active duty service of 90 days or more.
2. A spouse or child using transferred benefits who lives in the state in which the institution of higher learning is located (regardless of his/her formal state of residence) and enrolls in the school within three (3) years of the transferor's discharge from a period of active duty service of 90 days or more.
3. A spouse or child using benefits under the Marine Gunnery Sergeant John David Fry Scholarship who lives in the state in which the institution of higher learning is located (regardless of his/her formal state of residency) and enrolls in the school within three (3) years of the service member's death in the line of duty following a period of active duty service of 90 days or more.
The Choice Act does not apply to active duty service members or dependents of active duty service members.

## Eligibility Requirements

Covered individuals may qualify to pay in-state tuition and fees, regardless of his/her formal state of residence. To apply for residency for tuition purposes as covered individuals, the following criteria must be met:

1. Separated from the uniformed services with any period of honorable service after at least ninety (90) days of active duty service. Must provide DD-214 to show separation date. Uniformed services include: Army, Navy, Marine Corps, Air Force, Coast Guard, US Public Health Service Commissioned Corps, and the National Oceanic and Atmospheric Administration Commissioned Officer Corps.
2. Lives in Washington and enters a Washington higher education institution within three (3) years of discharge from a period of active duty service. Enters is defined as the first day of the quarter prior to the end of the third year of discharge.
3. Has received a Certificate of Eligibility verifying VA educational benefit.
Procedure:
4. Request for Veterans Center to send supporting documents to Registrar's Office.
5. Contact Registrar's Office to complete additional paperwork reg@cwu.edu 509-963-3001.

## Out-of-State Applicants

To qualify as a Washington State resident, a student must be a U.S. citizen or have permanent resident (resident alien) status. A student must also be either independent and have established a permanent home in the state of Washington for purposes other than education at least 12 months prior to enrollment. Verification will be requested.

The spouse or dependent of a person who is on active military duty, stationed in Washington, can be classified as a resident, for tuition paying purposes, by submitting proof of military assignment. A student cannot qualify as a Washington resident if $\mathrm{s} / \mathrm{he}$ (or parent, in the case of a dependent) has attended college as a resident of another state within a year prior to enrollment; has received financial assistance from another state, including reciprocity awards, within a year prior to enrollment; or possesses a current out-of-state driver's license, vehicle registration or other document which gives evidence of being domiciled in another state. For further information, contact Registrar Services at 509-963-3001.

Residency questions should be directed to Registrar Services. Residency requirements are subject to legislative change.

## Senior Citizens

Senior citizens are encouraged to take advantage of the large variety of courses offered at the university. Persons 60 years of age or older may register as an auditor the first day of class on a space-available basis with permission of instructor. The fee is $\$ 5$ for a maximum of two courses, not to exceed six credits. Any person utilizing this provision taking more than six credits must pay an additional $\$ 25$ tuition charge. Credits may not be applied toward meeting requirements for any degree or for increments
on any wage or salary scale. Waivers are not available during summer quarter.

## Veterans Conflict Grant

## Not available summer quarter.

Central Washington University (CWU) offers a Veteran Conflict Grant (amount of available grant is determined each academic year) with the following limitations and requirements:

1. Admission to CWU.
2. DD-214 Member 4 copy showing Honorable Discharge (all grants are awarded on information that that Department of Defense (DOD) codes on each DD-214).
3. Veteran must be a Washington State Resident.
4. Veteran must complete the FAFSA-Financial Aid Application each year.
5. Minimum enrollment must be halftime ( 6 credits)
6. The Veteran of Foreign Conflict Waiver/Central Grant can be received for up to 225 quarter credits.
This grant replaces all other military conflict waivers awarded in the past by CWU. For further information, contact the Veterans Center at 509-963-3028 or e-mail va@cwu.edu or check the website at: www.cwu.edu/veterans.

## Children and Spouse of Totally Disabled or POW/MIA or Deceased Eligible Veterans or National Guard Members

Tuition Waiver: The Washington State legislature RCW 28B.15.621 established this waiver to honor active and reserve veterans, National Guard members and their dependents. This is a mandatory tuition waiver for the children and spouse of totally disabled or POW/MIA or deceased eligible veterans or National Guard Members. Children, Spouse and Veteran must be Washington State residents.

- Child and spouse of an eligible veteran or National Guard member who became totally disabled;
- Child and spouse of an eligible veteran or National Guard member determined to be a prisoner of war or missing in action;
- Child and spouse of an eligible veteran or National Guard member who lost his or her life;
- The Washington State Disabled Veteran Dependent Tuition Waiver can be received up to 200 quarter credits or in the case of the child, until they turn 27 years old.
- Child is defined as a biological child, adopted child, or stepchild.
For more information, contact the Veterans Center at 509-963-
3028 or e-mail va@cwu.edu, or check the website at www.cwu.edu/veterans.

## Washington State Employee Tuition Waiver

Educating the citizens of Washington State is integral to Central Washington University's mission. CWU encourages and supports its employees, as well as non-CWU state employees and others as allowed by law, to continue their education as prescribed through this educational benefits policy. Central Washington University provides educational benefits for Central Washington University faculty, exempt, and classified staff, non-CWU state employees, members of the Washington National Guard, and veterans (as defined by 41.04.005 RCW)
who are not eligible for educational benefits from the Veteran's Administration. Eligible employees (CWU and state) must hold appointment to a half-time or more position. In addition, civil service employees must have permanent status (i.e., passed their probationary period). Faculty and exempt employees who are employed half time or more and are expected to be employed for more than six months are eligible on the first day of employment. Eligible CWU employees may take up to eight (8) credit hours of course work per quarter. Washington National Guard, veterans, and non-CWU state employees may take up to six (6) credit hours of course work per quarter. Faculty who are hired on a quarter-to-quarter basis will become eligible beginning with the second consecutive quarter of half-time or more employment. For the purposes of this section, employment of faculty in spring quarter and the following fall quarter may constitute consecutive employment.

Employees who are not eligible for the tuition and fee waiver are: faculty on courtesy appointments; retired faculty, staff, and exempt personnel; and undergraduate and graduate assistants, associates, or others holding positions with student status. Employees must meet university admission requirements and file proof of eligibility with the Office of the Registrar no less than 15 working days prior to the beginning of each academic term may take up to eight credit hours of coursework for a nominal fee each quarter (summer excluded). Enrollment is subject to space availability only. Enrollment in a closed or wait-listed course under this waiver is prohibited. A waiver processing fee and course fees may apply. Refer to CWU academic policy: www.cwu.edu/resources-reports/cwup-2-20090 -waiver-tuition-and-fees for further information.

## Tuition Refund Schedule

A continuing student will receive a 100 percent refund of tuition and fees if a complete withdrawal from the university occurs prior to the sixth day of the quarter.
A student will receive a 50 percent refund of tuition and fees if a complete withdrawal from the university occurs on or after the sixth day of the quarter and within 30 calendar days of the beginning of the quarter.

There is no refund of tuition and fees if withdrawal from the university occurs after the 30th calendar day of the quarter.

There is no refund for individual class withdrawals after the change of schedule period.

Tuition and fees may be refunded to students unable to complete coursework as a result of medical circumstances or being called to active duty in the Armed Forces of the United States. Students must petition Registrar Services.

## Miscellaneous Fee Schedule

Fees are subject to change for the 2018-2019 academic year.

## Application for Admission Fee: $\$ 50$.

Athletic Fee: $\$ 56$ mandatory fee per quarter for all students. Students with less than 10 credits will be assessed $\$ 5.60$ per credit. This fee supports student athletics and provides free admittance to all events. Ellensburg campus only.

Audit Fee (without credit): A student enrolling in a course as an auditor is charged regular fees.

Background Check Fee: In order to participate in certain programs/majors a student must arrange for and obtain a criminal background check from the appropriate law enforcement agency. Information regarding the process, requirements, and costs can be obtained through the department offering the program/major.

Breakage Fee: Students enrolled in certain courses are required to pay for any equipment they break. Fees are variable according to the item broken.

Central Transit Fee: $\$ 3$, mandatory fee per quarter for all Ellensburg students. This provides bus transportation throughout town.

Credit by Examination Fee: Students applying to challenge a course will be assessed a nonrefundable fee of $\$ 15$ per credit, with a minimum of $\$ 30$ per course challenge.

Graduation Application Fees: The fee for a baccalaureate degree is $\$ 50$. The fee for degree reapplication is $\$ 20$. An additional $\$ 12$ will be assessed for concurrent degrees and an additional fee of $\$ 17$ per diploma when requesting more than one diploma for multiple majors. For further information, www.cwu.edu/registrar/degree-checkout-fees.

Health and Accident Insurance: Group insurance is optional. An additional premium will allow student dependents to be covered by medical facilities other than the student health center, which is reserved for student use only. For further information, inquire at the Cashier's Office.

International Studies Application Fee: A fee of $\$ 50$ per student per quarter for students participating in study abroad or exchange programs.

Late Fee: Students failing to pay their tuition in full by the published deadline are assessed a $\$ 50$ and $\$ 100$ late fee.

Late Registration Fee: Students will be charged a $\$ 25$ per course fee for registration from the sixth through the 10th day of instruction; a $\$ 50$ fee per course for the 11th day through the 30th day of instruction; and $\$ 75$ per course after the 30th day. Permission to add courses will still require signature of the instructor or the department chair and the college dean after the 10th day of classes.

Library Fee: $\$ 10$, mandatory fee per quarter for all students.
Master's Thesis Binding Fee: Students submitting a thesis as part of the requirements for the Master's degree pay a fee of $\$ 75$ for binding of three copies of their thesis. Two copies are deposited in the library and one copy is given to the student. Students not wishing a copy for themselves will be assessed $\$ 50$. Any students wanting more than one copy for themselves must make their own binding arrangements for the extra copies.

Parking: Students using the university's parking facilities must purchase a campus parking permit.

Recreation Center Fee: $\$ 102$, mandatory fee per quarter for all Ellensburg campus-based students enrolled for six credits or more.

Registration Cancellation Fee: Students who register and do not drop their classes prior to the change of schedule period and have extenuating circumstances that result in a refund of tuition will be assessed a $\$ 50$ cancellation fee.

Student-in-Training (Liability) Insurance: In order to register for certain courses, a student must arrange for individual student-in-training (liability) insurance purchased either through the CWU business office or through some other agency. Information regarding types of coverage available may be obtained from the department chair or program director.

Student Medical and Counseling Clinic Fee: \$91, mandatory fee per quarter for all Ellensburg campus-based students enrolled for six credits or more. Students can see a physician for free regardless of insurance status. Students only pay for testing costs. In order to get this fee waived students must live outside of town or be a CWU employee or staff member.

Student Lobby Fee (WSL): \$1, mandatory fee per quarter for all students. This fee supports student lobbying for CWU needs in Olympia.

Supply and Equipment Fees: Students enrolling in certain courses are charged for supplies and equipment not furnished as part of the course.

SURC Building Fee: $\$ 69$, mandatory fee per quarter for all Ellensburg campus-based students enrolled for 10 credits or more. Students with less than 10 credits will be assessed $\$ 6.90$ per credit. Students with one credit will be assessed the same as the two-credit fee, $\$ 13.80$. This building is OWNED by the STUDENTS. This fee pays for operational costs such as utilities and monthly lease. When the building was built students voted to pay the cost of the building and that cost is continued through every year that the debt is not paid off.

Technology Fee: $\$ 30$, mandatory fee per quarter for all students. Students with less than 10 credits will be assessed \$ 3.00 per credit. Pays for student's ability to use computers, software, and print on campus.

Transcript Fee: $\$ 10$ for each copy. $\$ 18$ for on demand, express mail or FAX copies. All fees are due in advance. A $\$ 2.25$ credit card fee may apply if ordering through the clearinghouse. For more information, www.cwu.edu/registrar/request-transcripts.

Tuition Nonpayment Fee: Students who have not paid full tuition by the 30th calendar day of the quarter will be assessed a $\$ 100$ tuition nonpayment fee. A hold will be placed on their student record and they will be liable for 100 percent of tuition and fees. Students will receive notification to their CWU e-mail account. Students must have their student account cleared prior to registering for future quarters.

Web-based Course Fee: $\$ 40$ per class will be assessed for all Web (WW) courses.

Wellness Fee: $\$ 18$, mandatory fee per quarter for all Ellensburg students. The wellness center promotes healthy decision making and prevention services, confidential support for issues related to alcohol/drugs/sexual violence. It also provides training for students to handle these sorts of situations. In order to waive this fee, students must live outside of town or be a CWU employee or staff.

## Financial Obligation

Registering for classes or receiving services for which payment is required will create a CWU account and constitutes a contractual financial obligation according to the rules and regulations of the State of Washington. The student or other CWU account holder agrees to pay for all charges incurred at Central Washington University including but not limited to tuition and fees, housing and dining charges, university store purchases, day care charges, financial aid over-awards, and other miscellaneous charges or fines for services received at the recreation center, the medical and counseling center, the library, parking, special events, or any other CWU service offering. It is the student's or account holder's responsibility to ensure that his/her account is kept current and that payments are made by the published due dates to avoid additional charges. Charges that are not paid by the due dates may be assessed late fees, a $1 \%$ interest charge, and all university services may be suspended including admission to or registration with the university, conferring of degrees, and issuance of academic transcripts.

Furthermore, the University or its representative will make reasonable attempts to collect any past due charges by letter, phone, e-mail, or any other reasonable method including text messages as required by the State of Washington.

Enrolled students will receive an e-mail notification when the billing statement is available to view online or a monthly statement if the account holder is not an enrolled student. The account information can only be released to the account holder. Statements are located online through MyCWU account.

Any unpaid balance to the University that is not being paid through a satisfactory payment arrangement, will be placed with an external collection agency and will be subject to additional collection fee of up to $33 \%$ of the original debt as allowed by the State of Washington. In addition, if the account goes to litigation, it may be assessed additional attorney and legal fees of up to $40 \%$ of the original debt. Accounts placed with outside collection agencies may be reported to all three credit bureaus (Equifax, TransUnion, and Experian).

# Financial Aid and Scholarships 

## Financial Aid

Each year approximately 80 percent of CWU students receive financial aid. To be eligible for federal aid a student must be a U.S. citizen, a permanent resident, or eligible non-citizen. Washington state aid programs are also available to financially eligible DREAMers (undocumented students) who complete the Washington Application for State Financial Aid (WASFA).

Financial aid is available to matriculated students seeking a degree or certification in an eligible program. Most financial aid programs require a minimum of half-time enrollment, which is 6 credits at the undergraduate level and 5 credits at the graduate level. Students who have a first baccalaureate degree and are not admitted to a master's program will be classified as a postbaccalaureate student. Post-baccalaureate students are eligible for federal loans.

Students must apply and be accepted for admission to the university (matriculated) to receive financial aid. Students and their families must complete a Free Application for Federal Student Aid (FAFSA). The application can be completed online at www.fafsa.ed.gov. Paper copies are available in the Financial Aid Office and at most high schools or libraries. If ineligible to file the FAFSA, Washington resident students and their families should submit a Washington Application for State Financial Aid (WASFA) to be considered for Washington State aid programs. The WASFA is available on the web at www.readysetgrad.org/wasfa.

The application should be submitted to the federal processor as soon as possible after October 1 each year. February 1 is the cutoff date for priority consideration for limited gift aid. Accurate preparation of the FAFSA/WASFA and timely response to all requests for additional information or documentation are critical. If you are selected for Verification be sure to get all documents required for verification submitted to the Financial Aid Office by April 1 in order to assure that your Financial Aid, if eligible, will be ready by September.

Students who have been admitted to the university and have listed Central Washington University Title IV code \#003771 on the FAFSA will have a student financial aid file delivered to the university electronically. Once that file has been reviewed and verified, the student will receive an award letter. WASFA applications are also received electronically before being reviewed, verified and awarded aid by the financial aid office.

The award letter will indicate the estimated student budget, the federally determined expected family contribution, and an offer of aid including the type and amount. You must accept, reduce or decline aid offers on MyCWU. Aid is disbursed quarterly in equal amounts. If you have chosen to borrow student loans, the master promissory note and loan entrance counseling are completed electronically at www.studentloans.gov.

Students are expected to maintain "good academic standing" while receiving financial aid. A minimum CWU cumulative GPA of 2.0 is required for undergraduates after two years of attendance; post-baccalaureates are required to maintain a 2.0
cumulative GPA; and a minimum cumulative GPA of 3.0 is required for graduate students. Financial aid recipients are required to make reasonable progress toward a degree.

Additional financial aid information is available in the Financial Aid Office, Bouillon Hall, room 232; and through the Financial Aid Counselors at certain University Centers, at 509-963-1611, financialaid@cwu.edu, or on the CWU Financial Aid home page at www.cwu.edu/financial-aid.

## Scholarships

Scholarships are gift aid, which do not have to be repaid. More information on CWU scholarships can be found at www.cwu.edu/scholarships. The CWU Scholarship Central Application opens each October 1st and closes February 1st, scholarships awarded through this application are for the following academic year beginning in fall quarter. Make sure to apply online through your MyCWU account using the path MyCWU>Financial>Scholarship Application.

Scholarship eligibility is based on a variety of criteria including, but not limited to, academic proficiency, specialized talent, community service, leadership, and financial need. College and departmental selection committees as well as the Financial Aid Office select scholarship recipients. Some scholarships require students to complete the FAFSA (Free Application for Federal Student Aid), www.fafsa.ed.gov or WASFA (Washington State Application for Financial Aid), www.readysetgrad.org/wasfa, and any college or departmental scholarship applications for which the student is eligible that are available in the Financial Aid Office. In addition, students with talent in athletics, art, music, and/or theatre should contact the department(s) directly for specific audition or exhibition opportunities. Institutional merit aid is awarded to incoming students based on GPA and ACT/SAT scores. Need is not always a criteria.

Community-sponsored scholarships include awards for which the recipients are chosen by organizations outside the university. Each organization establishes its own eligibility criteria and application process. More information can be found at the scholarship website www.cwu.edu/scholarships or by contacting the organizations directly. Recipients are to inform the CWU Financial Aid Office if they are receiving an award from a community organization. Checks should be made payable to "Central Washington University." Include student's name and identification number. Send to the CWU Cashiers Office, 400 East University Way, Ellensburg, WA 98926-7495.

Scholarships are considered an educational funding source and may change a student's eligibility in other institutional, state or federal aid programs.

# Academic and General Regulations 

## Academic Advising

All students are expected to seek, and the university is expected to provide appropriate advising resources. These resources include academic advisors for first-year and undecided students, professional and faculty major advisors, online and transfer advisors, special program advisors, career counselors, success courses, workshops, and publications. Academic advising for first-year and undecided students is available at the Exploratory Advising office, located in Hertz 107. Incoming transfer students may contact transferadvisor@cwu.edu to receive initial advising. Professional advising for the Colleges of Arts and Humanities, Sciences, and Education, and Professional Studies is available in the Academic Advising office in Bouillon 205, College of Business advising is located in Shaw Smyser 128. Students pursuing an online major need to email onlineadvisor@cwu.edu to contact their professional advisor. Faculty advisors are available in their respective departmental offices and are also responsible for providing major program advising. Students are encouraged to seek additional academic counsel from various faculty concerning specific areas of interest.

All students are required to meet their assigned academic advisor at the following prescribed points throughout their academic career.

- Every quarter until they have earned over 45 credits. Students will meet with advisors who will assist them with class selection toward major declaration and major admission requirements, as well as appropriate completion of General Education Requirements.
- The quarter after they have earned their 90th credit. Students meet with major advisors to review and discuss major and overall graduation requirements and to develop a degree completion plan.
In addition, students who have not declared their major by the time they have earned their 75th credit or have not completed their Basic Skills General Education Requirements are required to meet with an advisor before they can register for the next quarter.

## Admission to Major

As a student progresses, identification with a major or pre-major program of study becomes necessary for effective advising. Students are required to apply for admission to the program in which they want to major. Application forms are available in department offices or on their department web sites. After completing the form, students should submit it to the department office which administers the major. A major or pre-major advisor will be assigned by the major department at the time a student is admitted into a major or pre-major program.

Students who have earned 75 or more credits and who have not applied and been admitted to a major or pre-major will not be permitted to register for classes until their advisor has removed their advising hold.

Students are bound by the major requirements which became effective with the fall quarter Online Electronic Catalog (OEC)
for the academic year in which they are accepted into their major.

If a student does not enroll for two or more consecutive quarters at Central (excluding summer), he or she will be required to reactivate his or her major status. Unless a student applies for an official leave of absence from the school, reactivation must be done with the concurrence of the department and in accordance with the department and the OEC requirements current at the time of readmission. A leave of absence should be requested, if a student is going to opt-out for more than one quarter (excluding summer) at Central. Leave of absence forms are due to Registrar Services by the end of the quarter prior to the quarter they are requesting their leave. A leave of absence can be granted for up to two consecutive quarters at a time. This will allow the student to be eligible for registration, maintain status in their major, and the student will not have to re-apply for admissions.

## Registration

Currently enrolled students may register for courses by using MyCWU, the web registration system. Registration for new and readmitted students will take place during new student orientation. New students who did not attend orientation may register during the open enrollment period.

Students may change their schedule during the designated change of schedule period as stated in the academic calendar. Students are encouraged to use the MyCWU web registration system to complete all registration transactions.

Registration, in-person, by telephone, or web, obligates students for payment of all tuition and fees. If tuition is not paid by the due date, students will be liable for late fees and for any other reasonable collection costs and charges.

Students are assigned a registration appointment through MyCWU. This designates when the student may start registering for classes for the term. Consult the university calendar at www.cwu.edu/registrar/course-information or contact the university center administration office to determine exact dates for early registration, open enrollment, tuition deadlines, and the change-of-schedule period.

## Fall 2018 Registration

Please note that "credits earned" does not include courses in progress but does include transfer credit that has been posted to your academic record. Please use your MyCWU unofficial transcript, not Academic Requirements report, to determine your total earned credit hours. Non-matriculated students do not qualify for priority registration.

| Priority Registration |  |  |
| :---: | :---: | :---: |
| Date | Day | Category Eligible |
| April 30 | Monday | Disability Support Students (as required by RCW 28B.10.92) |
| May 4 | Friday | Graduating Students |
| May 7 | Monday | Student Support Services/TRIO, STAR/STAR2 (FR/SO) and CAMP Students |
|  |  | Veteran Students (as required by RCW 28B.15.625) |
|  |  | Douglas Honors College Students |
|  |  | Competing Student Athletes (Men's Basketball, Women's Basketball, Men's Cross-Country, Women's Cross-Country, Football, Women's Rugby, Soccer, Volleyball) |
| May 7 | Monday | Graduate Students |
| May 7 | Monday | Post-Baccalaureate Students |
| May 7 - May 9 | Monday Wednesday | Seniors with 135 or more credits earned (use your unofficial transcript to find your total credits) |
| May 9 | Wednesday | Sammamish Running Start Students |
| May 10 - May 14 | Thursday Monday | Juniors with 90-134.99 credits earned (use your unofficial transcript to find your total credits) |
| May 15 - May 18 | Tuesday - Friday | Sophomores with 45-89.99 credits earned (use your unofficial transcript to find your total credits) |
| May 21 - June 1 | Monday - Friday | Freshmen with 0-44.99 credits earned (use your unofficial transcript to find your total credits) |
| August 1 | Wednesday | Open Enrollment |

## Winter 2019 Registration

Please note that "credits earned" does not include courses in progress but does include transfer credit that has been posted to your academic record. Please use your MyCWU unofficial transcript, not Academic Requirements report, to determine your total earned credit hours. Non-matriculated students do not qualify for priority registration.

| Priority Registration |  |  |

| February 27 - March 7 | Wednesday Thursday | Freshmen with 0-44.99 credits earned (use your unofficial transcript to find your total credits) |
| March 18 | Monday | Open Enrollment |

## Summer 2019 Registration

Please note that "credits earned" does not include courses in progress but does include transfer credit that has been posted to your academic record. Please use your MyCWU unofficial transcript, not Academic Requirements report, to determine your total earned credit hours. Non-matriculated students do not qualify for priority registration.

## Priority Registration

| Date | Day | Category Eligible |
| :---: | :---: | :---: |
| April 25 | Thursday | Disability Support Students <br> (as required by RCW 28B.10.92) |
| April 26 | Friday | Graduating Students |
| April 29 | Monday | Open Enrollment |

## Academic Credit Hour

The rule for determining academic credit is: one credit represents a total time commitment of three hours each week of the quarter. A regular load of 15 credits requires 45 hours of work per week. The total time includes class time, studying, conferring with the instructor, writing, performing laboratory work, exercising, or performing any other activity required of students. A minimum of 180 credits is required for an undergraduate bachelor's degree.

CWU operates on a quarter system and grants quarter credit. Some colleges operate on a semester basis (i.e., divide the academic year into two parts, exclusive of summer) and give semester credits. Quarter credits can be multiplied by two-thirds to determine equivalent semester credits. Semester credits can be multiplied by one-and-one-half to determine equivalent quarter credits.

## Course Numbering and Class Standing

Courses are numbered sequentially from 100 through 700. Those numbered 100 are pre-collegiate and credits in such courses are not accepted toward meeting degree requirements or calculated in the student's grade point average. Undergraduate courses are numbered 101 through 499 and graduate courses are numbered 501 and above. Courses numbered 500 are professional development courses and are not accepted toward meeting degree requirements.

## Lower Division

Freshman 101 through 199
Sophomore 200 through 299

## Upper Division

Junior 300 through 399
Senior 400 through 499
Students may enroll in courses one year ahead of their present status except when otherwise specified in the course description. A student's class standing is determined by the number of credits earned and/or accepted upon transfer. The following table lists the credits required for each class standing:

Freshman 0-44.9
Sophomore 45-89.9

## Senior 135 or more

Students holding bachelor's degree and pursing a second degree or CWU certification program are considered postbaccalaureate. Students that are admitted to a master's degree program are considered graduate students. Satisfying undergraduate graduation requirements depends not only on the number of credits completed (a minimum of 180), but also on completion of all other degree $/$ major $/$ minor requirements.

## Student Study Load

Full-time and part-time students are determined by the number of credits for which they register. Full-time undergraduate is 12 credits or more. Three-quarter time undergraduate is 9-11 credits. One-half time undergraduate is $6-8$ credits. Full-time graduate is 10 or more credits. One-half time graduate is 5-6 credits.

Students are encouraged to enroll in 15 credits or more each term to ensure timely progress toward degree. Please discuss your degree completion timeline with your academic advisor.

## Undergraduate:

15 credits - Standard undergraduate load
18 credits or fewer - No permission required
19-20 credits - Major advisor and major department chair approval required, or Advising Center for undeclared majors.
Over 21 credits - Major advisor and major department chair approval as well as the appropriate college dean.
A cumulative GPA of 2.8 or higher is required for students seeking an overload.

## Graduate:

15 credits - Normal graduate load
16 credits or less - No permission required
17-19 credits - Major department chair or dean approval required
20 or more credits - Dean of Graduate Studies and Research approval required

## Proficiency Requirements

Students will be assessed for placement into ENG 101 and MATH 101 and above upon entering CWU. Students with deficiencies in English usage/reading or mathematical computation must correct them prior to enrolling in ENG 101 or MATH 101 and above. Students should review requisites for courses listed in the catalog. Not having the appropriate pre- or co-requisite may result in being disenrolled.

## Seniors in Graduate Courses

Seniors may enroll in graduate-level courses (501 and above) with the approval of both the instructor of the course and the department chair. Credit earned in these courses may meet undergraduate or graduate program requirements, but not both. Students wishing to designate the course for graduate credit must obtain approval from the dean of Graduate Studies and Research.

## Auditing a Course

Students eligible to enroll in a course for credit may enroll as an auditor provided space is available and permission is secured from the instructor prior to registration. To receive credit for an audited class, students must enroll for credit in and repeat the samencourse in 98ubseguent quarter. Students are assessed full tuition for audited courses. Instructors may not compel auditors to write papers or take examinations, but may insist upon other course requirements. Instructors may request that the college dean withdraw the auditor from the course if these requirements are not met. Students receive neither credit nor grades for audited courses. Course participation requirements are set by the faculty member responsible for the course.

## Concurrent Enrollment

Credit for work taken while simultaneously enrolled at CWU and other educational institutions may be transferred to Central. Any student who has obtained an F-1 visa from CWU must obtain permission from the executive director of the Office of International Studies and Programs (or designee) prior to enrolling in any other institution.

## University Catalog

The Official Electronic Catalog (OEC) is the university's compilation for all curriculum. Undergraduate catalogs are valid for five years, and may be found at www.cwu.edu. A student should expect to complete general education requirements as listed in the OEC current at the time of first enrollment at either Central or a community college in the state of Washington (provided he or she transfers directly to CWU from the community college and has not attended another four-year institution). The student should also expect to meet the specific requirements of the departments for majors and minors in the OEC current at the time he or she is accepted by the department into the major or minor program.

Graduate students admitted to the master's degree program may use the catalog they are admitted under or the current one.

## Leave of Absence

Students will automatically be granted one term leave of absence for fall, winter or spring quarter without reapplying for admission as long as they were enrolled in the previous academic term. A student may petition for consecutive terms of leave by submitting a leave of absence form to Registrar Services. The request may be granted if the following conditions are met:

1. The petition must be submitted at least two weeks prior to the start of the term for which the student is seeking leave.
2. The petition demonstrates that attendance would present an exceptional hardship or loss of opportunity for the student.

Students who are on leave are permitted to register for classes as continuing students at the designated time.

A student who attends another college or university while on a leave of absence must submit an official transcript from the school by the end of the term in which they return to CWU.

## Graduate students need to contact the Graduate Studies office at 509-963-3103 for leave of absence information.

## Withdrawal from a Course

Peremptory (uncontested) withdrawals will not be permitted after the first six weeks of instruction. Students who withdraw after the change of schedule period from 25 percent or more of the coursework for which they have registered for two or more quarters each academic year are subject to dismissal. Students who have been dismissed under this policy may not enroll for courses without submitting an approved plan of study signed by an academic advisor to the Office of the Provost/ Vice President for Academic and Student Life. To continue enrollment, the student must satisfactorily complete all credits enrolled during the first quarter of readmission. Students who do not meet this requirement will not be allowed to register for one calendar year.

Peremptory withdrawals will be noted on the student's transcript with " +W, " but are not calculated into the student's grade point average. Students who are considering an uncontested withdrawal should consult the Financial Aid Office as it may affect the student's satisfactory academic progress for financial
aid. Class rosters will reflect the +W for students who have used their peremptory withdrawal.

Withdrawals after the sixth week of instruction will be granted only for reasons of hardship and then only upon written petition to and written approval by the registrar. The student must contact the course instructor and obtain the faculty member's signature on the hardship withdrawal petition. The signature serves merely to acknowledge the petition and implies neither support nor rejection of the request. The registrar may consult with affected faculty when evaluating a petition and will notify the instructor if the hardship withdrawal has been approved. Hardship withdrawals will be noted on the student's transcript with an "HW" (hardship withdrawal). Hardship withdrawals from individual courses will not be permitted during or after the final examination period.

Conversions of incompletes to withdrawals must be petitioned as if they were hardship withdrawals. They may be changed only upon petition to the registrar. Withdrawals will not be included in calculating grade point averages. There are no tuition refunds in cases of withdrawal from individual courses.

## Complete Withdrawal from the Academic Term

A student may withdraw from the academic term for reasons of illness or other extenuating circumstances at any time prior to finals week. An official withdrawal form is available at Registrar Services or university center offices. A student may not withdraw from the university during finals week except with approval of the registrar. A complete withdrawal from the university will be noted on the student's transcript with a "W" and will not affect the student's grade point average. The registrar will notify affected faculty members when a student has withdrawn from the university. Students who plan to leave the university must complete the official withdrawal form and may need to have an exit interview. Failure to do so may result in failing grades. There is no refund of tuition and fees if total withdrawal occurs after the 30th calendar day of the beginning of the quarter. See refund policy for specific details.

## Military Exigency Withdrawal

Students who have been called into military service of the United States due to a national emergency will be eligible for withdrawal from the university or the granting of credit. The policy does not apply to regular National Guard or Reserve duty or to annual active-duty requirements.

- Students who must withdraw from the University during the first third of the quarter will be granted a total University withdrawal (W).
- Students who must withdraw from the university during the second third of the quarter may request either an uncontested withdrawal $(+W)$ or an incomplete (I) in each course with specified deadline for completion to be determined by the dean in consultation with the instructor or a total university withdrawal from all courses (W).
- Students who must withdraw from the university during the last third of the quarter may request an uncontested withdrawal ( +W ) or an incomplete (I) or credit if the coursework is satisfactory, to be determined by the dean in consultation with the instructor or a total university withdrawal from all courses (W). If credit is awarded, the instructors must report either a letter grade or a satisfactory ( S ) for each
course depending upon the quality of the student's work. If credit is received and the course(s) complete(s) all requirements for the baccalaureate degree, the degree will be awarded.
- Students being called to active duty will be placed on a leave of absence until their return, at which time they will be reactivated, so they will not need to reapply to the university or pay the application fee. Students should contact Registrar Services when they are ready to return to Central to ensure a smooth transition.
- In all circumstances, students will be expected to attend classes up to fifteen (15) calendar days prior to induction.
- Students need to contact Registrar Services or their university center office as soon as possible to complete the appropriate paperwork, and to submit a copy of the Federal Activation Orders.

## Grading Policies and Regulations

"Grade Points" are assigned to each grade as follows:

| Letter Grade | GPA Credit | Transcript Explanation | Definition of letter grade/Policy statement |
| :---: | :---: | :---: | :---: |
| $\begin{aligned} & \text { A } \\ & \text { A- } \end{aligned}$ | $\begin{aligned} & 4.0 \\ & 3.7 \end{aligned}$ | Excellent | Meets all objectives of the course and fulfills all requirements; performs at a level that reflects excellence |
| $\begin{aligned} & \text { B+ } \\ & \text { B } \\ & \text { B- } \end{aligned}$ | $\begin{aligned} & 3.3 \\ & 3.0 \\ & 2.7 \end{aligned}$ | Good | Meets all objectives of the course and fulfills all requirements; performs at a high level |
| $\begin{aligned} & \text { C+ } \\ & \text { C } \\ & \text { C- } \end{aligned}$ | $\begin{aligned} & 2.3 \\ & 2.0 \\ & 1.7 \end{aligned}$ | Satisfactory | Meets all objectives of the course and fulfills all requirements; performs at a satisfactory level |
| $\begin{aligned} & \text { D+ } \\ & \text { D } \\ & \text { D- } \end{aligned}$ | $\begin{aligned} & 1.3 \\ & 1.0 \\ & 0.7 \end{aligned}$ | Marginal Pass | Makes progress toward meeting the course objectives; fulfills course requirements at a substandard level |
| F | 0 | Failure | Fails to meet the course objectives; does not fulfill course requirements |

The following symbols are also used. No "grade points" are assigned.

| CR | Credit |
| :--- | :--- |
| NC | No Credit |
| S | Satisfactory |
| U | Unsatisfactory |
| AU | Audit |
| W | Complete withdrawal from |
|  | The university |
| + W | Uncontested withdrawal from |
|  | A course |
| HW | Hardship withdrawal from |
|  | A course |
| I | Incomplete |
| IP | In Progress |
| NR | No grade reported |
| NS | No show |

## All grades are frozen upon award of degree.

Financial aid may be affected by certain grades and/or grading symbols. It is incumbent upon students to be aware of the impact of all grades on their financial aid. Financial aid information policies are available from the Financial Aid Office.

## Incomplete Grade

The "I" grade is used when the student was not able to complete the course by the end of the term, but has satisfactorily completed a sufficient portion of it and can be expected to finish without having to re-enroll in it. The instructor will designate what a student must do to complete the course and set a specific date up to one calendar year for the completion of the coursework.

If the work is not completed within one (1) calendar year from the last day of the quarter in which the "I" was received, the registrar will automatically convert the "I" to an "F." However, instructors may require the work to be completed prior to the end of the calendar year. In these cases the registrar will convert the grade according to the date indicated by the instructor. It is the student's responsibility to contact the professor and make arrangements to complete the course.
To earn a grade, the student must complete the work for the course as prescribed by the instructor by the indicated date on the incomplete. Students may not re-register for a course in which they receive a grade of incomplete.

All incomplete changes exceeding the one calendar year limit, including extensions, must be submitted by the instructor to Registrar Services for approval.

## In-progress Grade

For undergraduate students, the "IP" grade is used when the student was not able to be evaluated by the end of the term, usually because instruction is not yet completed. "IP" is used for special circumstances within programs such as aviation, international studies, and cooperative education.
For graduate students, "IP" is used for thesis, and project study, that normally extend beyond a single term.
All uses of the "IP" grade must be submitted to and approved by the registrar. A letter grade is issued when the course is completed and recorded by the registrar, upon receipt of the Change of Grade form submitted by the instructor. If a grade is not submitted to the registrar within one calendar year, the "IP" will automatically be changed to " F " by the registrar.

## Grade Point Average

Grade point averages will be calculated by dividing grade points earned by the credit hours attempted. Here is a typical example:

| Course | Credit <br> Hours | Grade | Grade Points <br> Earned |
| :--- | :--- | :--- | :--- |
| MUS 104 | 3 | C+ | $3 \times 2.3=6.9$ |
| HIST 143 | 5 | B- | $5 \times 2.7=13.5$ |
| PSY 300 | 5 | C | $5 \times 2.0=10.0$ |
| COM 207 | 4 | B | $4 \times 3.0=12.0$ |
| Totals | $\mathbf{1 7}$ |  | $\mathbf{4 2 . 4}$ |
| Divid |  |  |  |

Dividing 42.4 by 17 gives a grade point average of 2.49. In computing cumulative grade point averages, only work attempted at Central will be included in the computation. Within the major, minor, and professional education option, grades earned in all allowed courses are used. Credits earned at other
institutions are accepted in meeting degree requirements according to the limits described under bachelor's degree requirements. Graduation with distinction honors shall be based on the GPA of all credits earned at Central and all transfer credits accepted by CWU.

## Credit/No Credit Option

Students are urged to use the credit/no credit option as a way to explore academic areas of interest. All students except firstquarter freshmen and students on academic probation may select one class per quarter under this option. A maximum of 15 credits earned in credit/no credit courses may be allowed toward the 180 required for the bachelor's degree.

The courses must be selected from free electives; they must not be courses counting towards the students general education, major or minor concentrations, or the professional education sequence. Students may designate the course as credit/no credit until the end of the change of schedule period. Courses may not be repeated on a credit/no credit option.

Credits earned under the credit/no credit options are not included in computing the grade point average. The grade recorded on the student's transcript will be "CR" if the course grade is C - or above; if below C -, the entry will be "NC."

## Statute of Limitation on Grade Changes

Grade changes may be filed until the end of the quarter following the one in which they were recorded. Spring quarter grades may be changed until the end of the fall quarter.

## Grade Reports

A report of the final grades assigned in courses will be available on MyCWU at the end of each quarter. Students may request a hard copy be mailed by contacting Registrar Services or their university center office.

## Honor Roll

Undergraduates who achieve a grade point average of 3.5 or higher will be placed on quarterly honor roll. To be eligible, a student must complete a minimum of 12 graded credits in the quarter earned. Central will provide honor roll recipient names to student's hometown based on the student's permanent address listed on MyCWU at the end of the quarter. If a student has placed a FERPA directory restriction on their record through MyCWU, the hometown newspaper will not be notified of his/her honor roll status. Post-baccalaureate and master students are not eligible for the honor roll. The honor roll status is listed on the student's unofficial transcript and is posted two to three weeks after grades are due on the web located at www.cwu.edu/registrar/honor-roll.

## Grade Appeal Procedure

Students who believe they have been improperly graded should first attempt to resolve the matter with the instructor. If resolution is not achieved, the student may appeal the grievance to the department chair. Failing resolution at that level, the grievance may be submitted to the college dean. Finally, if the grievance is not resolved at the dean level, the student may petition for a hearing with the board of academic appeals. For details, contact the Office of Student Success in Bouillon Hall, room 204 or by calling 509-963-1515.

## Repetition of Courses

Some CWU courses are approved for repetition with credit awarded each time the course is taken and passed. Such approval is indicated in the course description in the university
catalog. Full tuition is assessed for all repeated courses. Other courses may be repeated under the following conditions:

- Students are allowed to take a course a second time without restriction. Students attempting to take the same course a third time may do so only with permission of the course instructor and the department chair. Unless otherwise designated as repeatable, courses may not be taken more than three times without permission of the dean of the college and department chair.
- Credit will be awarded only once, including credit for transfer courses that are repeated at Central.
- When a course is repeated, only the last grade earned will be used in the computation of the cumulative and major grade point averages. All grades will remain in the student's official record.

Any CWU course repeated at another institution is subject to the following requirements:

- May be transferred in for CWU credit.
- Will be used in calculating both the CWU and the transfer GPA.

## Scholastic Standards

Academic standards are established by the faculty. The Dean of Student Success has responsibility for implementing these standards. A student's academic standing appears on the quarterly grade report or unofficial transcript located on MyCWU. Questions about academic standing should be directed to the Office of Student Success (Bouillon Hall, room 204).

Good Standing: A student is in good standing when both the quarterly and cumulative grade point averages (GPA) are 2.0 or higher.

Academic Warning: A student who has been in good standing will be placed on academic warning when the GPA for the previous quarter is below 2.0.

Academic Probation: A student who has been on academic warning will be placed on academic probation if either the quarterly or cumulative GPA is below 2.0.

Academic Suspension: A student who has been on academic probation will be placed on academic suspension if the GPA for the previous quarter is below 2.0. If the GPA for the previous quarter is 2.0 or above, but the cumulative GPA remains below 2.0, the student will remain on academic probation.

Immediately after grades are submitted, the dean of student success or designee(s) reviews the academic files of all suspended students and makes one of three decisions:

- The student may be allowed to register for one more quarter with an academic standing of probation.
- The student may be allowed to submit an academic appeal presenting: (a) reasons for poor academic performance, (b) explanation and documentation of circumstances beyond the student's control which adversely affected the student's performance during the preceding quarter(s), and (c) an academic success plan which clearly outlines what the student will do differently to achieve academic good standing, should $\mathrm{s} /$ he be reinstated. The committee will hear the
student's case and may decide to allow the student to enroll for one more quarter on academic probation.
- The student may be denied enrollment for one year, following which the student will need to re-apply for admission to the university; however, readmission is not guaranteed.

A letter will be sent to the student informing him or her of the committee's decision.

## Academic Forgiveness

An undergraduate student may petition the registrar in writing for academic forgiveness if all of the following criteria are met:
a. The student returned to CWU after an absence of at least five years;
b. The student's CWU cumulative GPA at the time of leaving CWU was below 2.0 ; and
c. The student has earned at least a 3.0 GPA in at least 45 credits since returning to CWU.
If academic forgiveness is granted, the previous credits and grades at CWU will remain on the student's transcript but will not be used in the calculation of the cumulative GPA, and the student will be placed on good standing. Only the grades earned since returning to CWU will be used in computing the CWU cumulative GPA.
The student may request a review of the registrar's decision by the board of academic appeals and academic standing. A petition for academic forgiveness may be granted only once. Unless academic forgiveness is granted, the GPA at CWU will include all CWU grades for all courses. The forgiveness policy does not extend to calculating GPA of major or to honors.

## Class Attendance and Participation

Instructors may require regular class attendance. The first day of the quarter is the first day of instruction listed in the university calendar. An instructor may drop a student from the class by notifying the registrar if the student has failed to attend the class by the end of the third day of the quarter or the first class meeting if the class does not meet during the first three days of the quarter. Students enrolled in web courses should make a post on the learning management system within the first three days of classes to ensure they are not dropped for non-attendance. Students are responsible for checking their schedules by the fifth day of instruction or the end of the change of schedule period to ensure their class schedule is correct.

A student who does not meet course prerequisites may be required to drop the course. Instructors are not required to offer makeup work for missed classes, including those missed during the change of class schedule period, regardless of student course enrollment status.

Sponsors of university-approved activities requiring absence from campus will prepare and sign an official list of the names of those students who plan to be absent. It is each student's responsibility to present a copy of the official list to the appropriate instructors and make arrangements prior to the absence(s). Instructors are strongly encouraged to make accommodations.

Members of the university community directing or arranging such activities must adhere to the following guidelines:
a. Scheduling of such activities shall not overlap with official final examination periods.
b. Scheduling of such activities shall not require an absence of more than three (3) consecutive class days.
c. Scheduling of such activities shall be announced to the students' far enough in advance for them to plan to fulfill course requirements.
d. Seeking permission for an exception lies with the sponsor and not with the student(s).

## Student Bereavement Leave

In the event that a student experiences a death of an immediate family member or relative as defined below, the student will be excused from class for funeral leave, subsequent bereavement, and/or travel considerations. The student will provide appropriate documentation and arrange to complete missed classroom work as soon as possible according to the process outlined below.
Upon notification of the absence and proper documentation, each faculty member shall excuse the student from class according to this policy and provide an opportunity to complete missed exams, quizzes, and other required work. Ultimately, the student is responsible for all material covered in class and must consult with each individual professor as soon as they return to complete any required work.

## (A) Excused Absences

1. Immediate Family and Relatives. Students shall be eligible for up to five (5) consecutive days (not including weekends or holidays) or excused absence in the event of a death of a spouse, domestic partner, parent, child, grandparent, grandchild or sibling.
2. Other. In the event that a death occurs to a family member or friend that does not qualify as an immediate family or relative above, students can communicate the circumstances to individual faculty to determine on a case by case basis if it is covered by this policy.

## Athletic Participation

Central Washington University athletics is governed by the rules of the NCAA Division II and the Great Northwest Athletic Conference. Further information on those rules is available through the Athletic Office, or the office of the faculty athletic representative. University academic requirements for participation require the student athlete to meet the requirements of those athletics organizations as well as:

- Maintain a 2.00 a cumulative grade point average at all times
- Not be in probation status
- All incoming freshmen and transfer students must complete HED 205 - Drugs and Sport by the end of their third year (or junior status) in order to remain eligible for participation in varsity sports.

## Course Challenge (Credit by Examination)

Under certain circumstances the university may award credit based on course challenges and other prior learning assessments. Matriculated students, enrolled in one or more course, may challenge any course which appears on the current course challenge list.
The following rules apply:

- A Course Challenge Prior Learning Assessment (Credit by Examination) application form, must be completed. This application form is available in the Registrar Services Office.
- A fee of $\$ 15$ per credit, with a minimum of $\$ 30$ per course, will be charged to the student's account and must be paid at the Cashiers Office.
- The challenge is conducted according to procedures established by the appropriate department.
- A list of department-approved courses which may be challenged will be maintained by Registrar Services.
- Special courses such as "individual study," "special topics," "cooperative education," and "seminars" may not be challenged for credit.
- The result of the course challenge is recorded as "S" or "U" on the transcript and is not used in computing grade point average.
- The application to challenge a course will be denied if credit for the course has been received previously at this or another college, the course was previously failed, the student previously withdrew from the course, the course was previously unsatisfactorily challenged, the course was previously audited, or if registration was canceled.
- Credits earned by course challenge or prior learning assessment will not be allowed toward meeting the residence study requirements by the university.
- Graduate students who have been admitted to a graduate program must obtain permission from the dean of Graduate Studies and Research, their advisor and the course instructor for course challenge.

## Course Challenge List

Special courses such as Individual Study, Special Topics, Cooperative Education, Workshops, and Seminars may not be challenged for credit.
Accounting: no courses are offered for challenge
Aerospace Studies: no courses are offered for challenge
Administrative Management: 201 and 271
Anthropology: all undergraduate courses with chair's approval
Art: all undergraduate courses with chair's approval, except 101
Aviation Management and Aviation Professional Pilot: all courses with departmental approval
Biological Sciences: no courses are offered for challenge
Chemistry: no courses are offered for challenge
Communication: no courses are offered for challenge
Computer Sciences: all undergraduate courses with chair's approval
Early Childhood Education: no courses are offered for challenge Economics: no courses are offered for challenge
Education: all undergraduate courses with chair's approval
English: no courses are offered for challenge
Engineering Technologies, Safety, and Construction: all
undergraduate courses with chair's approval
Environmental Studies: no courses are offered for challenge
Ethnic Studies: all 100 and 200 level courses with the director's
approval
Family and Consumer Sciences: ATM 280
Finance: no courses are offered for challenge
Geography: no courses are offered for challenge
Geology: no courses are offered for challenge
Health Education: HED 101
History: 101, 102, 103, 143, and 144
Humanities: 101, 102, and 103
Information Technology: 101, 228, 248, 258

Law and Justice: no courses are offered for challenge Management: no courses are offered for challenge Mathematics: all undergraduate courses numbered above 170 Military Science: all 100 and 200 level courses.
Music: all undergraduate courses except applied lessons, class lessons, and performing groups
Nutrition: NUTR 101, 240, 240LAB, 340, 340LAB, 345, 440,
$440 \mathrm{LAB}, 442,443,444,445,446,447$, and 448
Paramedics: EMS 245, 250, 440, 441, 443, 444, and 451
Philosophy: all undergraduate courses
Physics: no courses are offered for challenge
Political Science: no courses are offered for challenge
Psychology: all undergraduate courses with the chair's approval Recreation and Tourism: no courses are offered for challenge
Religious Studies: all undergraduate courses
Safety Education: no courses are offered for challenge
Social Science: no courses are offered for challenge
Sociology: all 100 and 200 level courses with the chair's approval
Theatre Arts: no courses are offered for challenge
World Languages: all undergraduate courses with chair's approval

## Course Substitutions

Students may petition the degree granting department chair if they wish to substitute courses within degree requirements. The course(s) used for substitution must satisfy the programmatic goals and objectives of the department as determined by the dean and the department chair. The substituted course(s) credits may not reduce the total required credits. Permit to Substitute form can be obtained from Registrar Services or online.

## Academic Appeal

Students should be aware that procedures have been established to hear complaints regarding academic matters. The board of academic appeals exists to guarantee due process for academic grievances involving students, faculty, staff, and administrators. The academic appeals policy is established by the faculty senate and is administered by the Dean of Student Success.

## Required Participation in Assessment Activities

Students are required to participate in assessment activities at several points during their academic careers. They will be assessed for placement into English 101, Math 101, and above upon entering CWU as first-year students. Students with deficiencies in English usage/reading or computation must correct them prior to enrolling in ENG 101 or MATH 101 and above, respectively. Departments may establish their own requirements as long as they meet or exceed university standards. Departments may also require students with deficiencies to correct them before being accepted into their major.

Unless otherwise stated, all courses at CWU are taught in English.

Once accepted, international students may be evaluated by the ESL staff to determine whether additional English-as-a-SecondLanguage coursework will be required during attendance at CWU.

Students will participate in an assessment of intended student outcomes of the general education program. End-of-major assessments are required prior to graduation.

## Graduation Requirements

Students are eligible for awarding of a bachelor's degree when they fulfill the following requirements.

## Credits

- A minimum of 180 quarter credits is required for a baccalaureate degree; students should note, however, that some bachelor's degrees have requirements in excess of 180 credits. Central allows a maximum of 135 quarter ( 90 semester) credits to transfer from regionally accredited four-year institutions, including no more than 105 quarter ( 70 semester) credits of lower division (100-200 level) coursework from a regionally accredited community or technical college. Additional coursework that exceeds this amount may be used to meet specific requirements, but additional credits will not be allowed to count toward the 180 credit requirement for graduation.
- A minimum of 60 credits of upper-division study is required. Upper-division courses are numbered 300 and 400 . Credits earned in study at the lower division (courses numbered 100-299) will not be allowed toward meeting this requirement.
- Students must study on the university campus, through CWU online course, or at an established university center at least three quarters and earn a minimum of 45 credits. Credits earned through industrial experience, military experience, or through credit by examination may not be used to meet residency requirements.
- Up to 45 credits may be counted from course challenge or other prior learning assessments.
- Transfer students must earn a minimum of 10 credits in the major and, if a minor is declared, 10 credits in the minor from CWU.
- Cooperative education courses will apply toward graduation requirements, but in no case will a student be allowed to count more than 10 credits at the 290 level nor more than 20 total credits toward graduation requirements. No more than 10 credits are accepted in transfer. No more than eight credits may be applied to a graduate degree. Cooperative education courses may be repeated if field experience learning objectives and activities are distinctly different from previous work or field experience.
- Students who have accumulated 210 or more credits and intend to complete a double major or double degree, and have not yet completed either program, must meet with both department advisors and submit one graduation plan signed by both department chairs and both major advisors to Registrar Services. This also applies to double majors in different colleges. If one major has been completed, only the advisor and the department chair for the uncompleted major need to review and sign the petition.
- Students who have accumulated 210 or more credits and intend to include one or more minors in their
academic plan are required to obtain the approvals of their major and minor advisor.

## Degree Components

- The general education program must be completed as defined in the university catalog.
- Students transferring from Washington State community colleges holding the appropriate academic direct transfer associate degree will have met the general education program requirements.
- Completion of all requirements for a major as specified by the appropriate department, as defined in the university catalog, is required.
- Completion of a minor is required when the major is less than 60 credits. In that case the total credits of the major and minor must total a minimum of 60 credits.
- All professional education programs require completion of professional education courses in addition to completion of the major requirements.
- A student may be awarded more than one baccalaureate degree (BA, BAEd, BFA, BMUS, BS) at the same time provided that requirements of both the degree programs have been completed. Double majors within the same baccalaureate program do not constitute separate baccalaureate degrees. In disciplines offering multiple baccalaureate degrees with identical or similar names, e.g., BA or BS in Biology, only one degree will be awarded. Exceptions to this policy require approval by the department chair and the appropriate dean.
- Successful demonstration of writing and computational skills is required for graduation.
- Students who enter Central Washington University with 45 or fewer credits must complete UNIV 101 Student Success Seminar. Students must enroll in UNIV 101 during their first quarter at CWU.
- University General Education Policy requires that students have completed either two-years of the same foreign language, Native American language, or American Sign Language in high school, or one year of college-level foreign language. If this requirement was completed prior to enrollment at the University, the student must submit official transcripts to the Office of Admissions. If foreign language has not been satisfied prior to enrollment, then the student must take one year of foreign language before graduating from the university.

## Scholastic Requirements

- Graduation and graduation with honors are based on credits and grade point averages (GPA) earned at the
time the degree is awarded. For more information regarding graduation with honors, please review the Graduation with Distinction section of the catalog. When a degree is awarded the academic record is frozen and no grade changes may be performed. Final responsibility for meeting graduation requirements resides with the student.
- In order to graduate, students must have achieved a cumulative grade-point average of at least 2.0 (C) in courses taken at CWU.
- Students must also have achieved a cumulative grade point average of at least 2.25 in the major and 2.0 in the minor field of study. All courses fulfilling the major and minor requirements, including courses accepted in transfer, are used in computing the major and minor GPA.
- Before a degree is awarded students must be in good academic standing and cannot be on academic suspension.
- Specific degree and professional certification programs may have more stringent degree requirements than those specified above.
- Transfer students must earn from CWU a minimum of 10 credits in the major and, if a minor is declared, 10 credits in the minor.

## Teacher Certification Program

- Cumulative grade-point average of at least 3.0 for the last 45 graded credits, OR an overall (all colleges attended) cumulative grade point average of 3.0.
- Grade point average of at least 2.5 for major, minor and professional education sequence.
- No grade lower than a C in major or minor, and foundation coursework, will be accepted for certification.

## Application for Degree

Degrees are not automatically awarded when requirements are completed. It is the responsibility of the student to apply for the degree in Registrar Services. Application for the bachelor's degree must be submitted by the second Friday of the quarter preceding the quarter in which the degree is to be completed. Students who apply for graduation after the deadline may incur late fees. Complete instructions and deadlines are available in Registrar Services and through university center offices. Step-by-step instructions may be found at www.cwu.edu/registrar/degree-checkout.

## Final responsibility for meeting graduation requirements and deadline dates resides with the student.

Exceptions to university graduation requirements must be petitioned to the registrar. An exception approval may be obtained from the general education committee, department, or program chair and college dean where appropriate. Exceptions to majors or minors and Teacher Certification Programs must be approved by the appropriate department chair and college dean or designee.

## Commencement Participation

Students who have met graduation requirements during the current academic year, summer through winter quarters, and those expecting to meet the requirements during the current
spring quarter or upcoming summer session, may participate in the spring commencement ceremony.

Students must complete the online commencement registration form located on the Wildcat Shop's home page at cwubookstore.collegestoreonline.com prior to the published commencement participation deadline. Students should also review the information on the commencement website located at www.cwu.edu/commencement for the most current information on the commencement activities and procedures.

Students participating in commencement exercises must wear commencement regalia approved by the registrar.

Students anticipating graduation the summer quarter following commencement exercises may participate in the commencement ceremony on a space available basis.

Candidates for summer graduation who wish to participate in the spring commencement ceremony prior to issuance of a degree must submit an application for graduation prior to the spring quarter deadline and complete degree requirements by the end of summer quarter. Published acknowledgment of the degree will not take place until the degree is conferred.

Candidates who have applied for their degree the summer following the June commencement ceremony are not eligible for honors distinction nor will their degree be published in the commencement book until the following academic year.

Exceptions to commencement procedures are approved by the registrar.

## Graduation with Distinction

The following conditions must be met in order to be considered for graduation with distinction:

- At least 45 of the credits required for the degree must be earned at Central in courses taken on the A-F grading scale.
- Credits earned by course challenge, CLEP, and other national examinations, military experiences or courses, non-college courses, and industrial experience will not be allowed toward the 45 -credit eligibility requirement.
- Honors shall be based on the GPA of all credits earned at Central and all transfer credits accepted by CWU.
Baccalaureate honors are awarded to recipients of a first
bachelor's degree according to the following standards:
3.500 to 3.699 - cum laude
3.700 to 3.899 - magna cum laude
3.900 to 4.000 - summa cum laude

Cum laude, magna cum laude, and summa cum laude will be noted on the recipient's diploma and university transcript and students participating in commencement exercises may wear their appropriate honors tassel.

For spring quarter degree candidates, the registrar will calculate the top percentage for the declared spring degree candidates based on the end of winter quarter data. Commencement honor tassels will be determined based upon the most recent data available. Final determination of honors will be made after the
spring quarter graduation ceremony when all grades are recorded.

Students completing degree requirements during the summer will not be eligible for honors recognition until the following spring commencement ceremony.

President's Scholars: President's Scholars are those students who, in the current academic year, have cumulative GPA's in the top $1 \%$ of their respective school or college class. GPA is calculated by existing university policy.

Dean's Scholars: Dean's scholars are those students who, in the current academic year, have a cumulative GPA in the top $5 \%$ of their respective school or college class (but not including the top $1 \%$ ). GPA is calculated by existing university policy. Eligible individual study majors will be determined by the Provost or designee.

The following conditions must be met in order to be considered for President's and Dean's Scholars:

- At least 45 of the credits required for the degree must be earned at Central in courses taken on the A-F grading scale.
- Credits earned by course challenge, CLEP, and other national examinations, military experiences or courses, non-college courses, and industrial experience will not be allowed toward the 45 -credit eligibility requirement.
- Honors shall be based on the GPA of all credits earned at Central and all transfer credits accepted by CWU.
NOTE: Individual study majors will be computed with the College of the Sciences majors.

## Concurrent Baccalaureate Degrees

A student may be awarded more than one baccalaureate degree (BA, BAEd, BAS, BFA, BM, BS) at the same time provided that requirements of both degree programs have been completed. Double majors within the same baccalaureate program do not constitute separate baccalaureate degrees except in cases where the second degree requires 60 or more credits that do not satisfy any degree requirements of the first degree.

In disciplines offering multiple baccalaureate degrees with identical or similar names, such as BA and BS in biology, only one degree will be awarded. Exceptions to this policy require approval by the department chair and appropriate dean.

Source URL: http://www.cwu.edu/resources-reports/cwup-5-$90-050$-graduation-requirements-bachelor $\% \mathrm{E} 2 \% 80 \% 99$ sdegrees

## Second Baccalaureate Degree

Qualified students seeking second baccalaureate degrees are admitted to post-baccalaureate status; this does not mean, however, that they are enrolled in an "advanced degree program." To receive a second baccalaureate degree, students must complete: (1) all degree requirements not satisfied by the previous degree, and (2) a minimum of 45 quarter credits from Central.

Second baccalaureate students must be accepted into a degree or certificate program by the time they have earned 25 credits beyond their last degree. Once a degree objective has been
declared, second baccalaureate students must develop graduation plans with academic advisors. Academic department chairs may grant extensions beyond the 25 -credit limit. Second baccalaureate degree students follow regulations applicable to undergraduates.

Second baccalaureate degree students may request from the department that any requirement of a minor be satisfied by the initial bachelor's degree earned provided that the requirements of the minor were completed in prior course work.

CWU reserves the right to review a post-baccalaureate student's transfer work to determine fulfillment of requirements.

## 2018-2019 General

## Education Program

MISSION, RATIONALE, AND STUDENT OUTCOMES

The general education program offers undergraduate students a liberal arts education in order to cultivate thoughtful and responsible persons and citizens, to prepare them for the world of work and to teach them to pursue knowledge for its own sake. In order to accomplish those broad goals, the general education program seeks to promote effective reasoning, broad and deep learning, and the inclination to inquire.

## Effective Reasoning

A comprehensive liberal education helps students to develop their abilities to recognize and to think clearly about important issues and questions. The ability to think clearly involves fluency in reading, writing and oral communication, as well as mastery of the basic principles of logical, mathematical and scientific reasoning.

## Broad and Deep Learning

A liberally educated person should possess a rich and broad fund of meaningful knowledge as well as the ability to compare and integrate new or different areas of knowledge in fruitful ways. To that end, the general education curriculum imparts a broad understanding of the various liberal arts and sciences and the ways that those arts and sciences evolve. In much the same way, the curriculum aims to foster an appreciation of diversity as a rich source of new ideas and opportunities for learning. Through such studies, students may comprehend the interconnectedness of knowledge and the importance of integrating knowledge gained from disparate parts of the curriculum.

## The Inclination to Inquire

An education in the liberal arts fosters a student's commitment to seek out and acquire important knowledge and skills, both for their intrinsic value and for the good they contribute to our common and individual lives. For this reason, a disposition to ask incisive and insightful questions is perhaps the surest sign of a liberally educated mind.

The general education requirement offers a basic knowledge of mathematics and the natural sciences, including laboratory experience, intermediate knowledge of at least one world language, the study of the humanities, the political, philosophical and cultural history of world civilizations, and the foundations and principles of American society.

This mission statement reflects the standards promulgated by the American Academy for Liberal Education and CWU's Mission Statement.

## General Education Program Goals

1. Students will become thoughtful and responsible members of society and stewards of the Earth.
2. Students will respect diversity of background, experience and belief, and will value the different perspectives that this diversity brings.
3. Students will achieve fluency in reading, writing, oral communication and information technology.
4. Students will master the basic principles of logical, mathematical and scientific reasoning.
5. Students will develop an appreciation of the breadth and depth of scientific and humanistic knowledge.
6. Students will develop a sense of the interconnectedness of knowledge.
7. Students will integrate knowledge from diverse fields of study in order to solve real-world problems.
8. Students will become aware of the manifold ways that knowledge evolves.
9. Students will develop a disposition to ask incisive and insightful questions.

## Assessment of the General Education Program

1. Students will be surveyed as to how well they think their courses addressed the mission of the general education program.
2. Instructors will be surveyed as to how well they think the courses addressed the mission of the general education program.
3. Student achievement in general education classes will be evaluated regularly by means of examinations.

All courses taken to satisfy general education requirements must be taken for a letter grade.

## BASIC SKILLS REQUIREMENT

All students must satisfy the following requirements in basic academic and intellectual skills:

## 1. Academic Advising

Only required of students who enter Central with fewer than 45 credits.

- UNIV 101 - Transition to CWU Credits: (1)

## 2. English Comp I

A grade of C- or higher is required in ENG 101 before ENG 102 may be taken.

- ENG 101 - Academic Writing I: Critical Reading and Responding Credits: (5)

## 3. English Comp II

- ENG 102 - Academic Writing II: Reasoning and Research on Social Justice Credits: (5)

## 4. Mathematics

Select one from the following:

- FIN 174 - Personal Finance Credits: (5)
- MATH 101 - Mathematics in the Modern World Credits: (5)
- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- MATH 164 - Foundations of Arithmetic Credits: (5)
- MATH 170 - Intuitive Calculus Credits: (5)
- MATH 172 - Calculus I Credits: (5)

## 5. Reasoning

Select one from the following:

- CS 105 - The Logical Basis of Computing Credits: (4)
- ECON 130 - Foundations for Business Analytics Credits: (5)
- MATH 102 - Mathematical Decision Making Credits: (5)
- MATH 130 - Finite Mathematics Credits: (5)
- PHIL 150-Critical Thinking Credits: (5)
- PHIL 201 - Introduction to Logic Credits: (5)

## 6. Computer Fundamentals

Select one from the following:

- BUS 102 - Business Computer Skills Credits: (4)
- CS 101 - Computer Basics Credits: (4)
- IT 101 - Computer Applications Credits: (3)

## 7. Foreign Language

- 2-years high school or 1-year college (One year of college or university study of a single foreign language or two years of high school study of a single foreign language. Courses used to satisfy this foreign language basic skills requirement may not be used to satisfy the Philosophies and Cultures of the World breadth requirement).

## All students

All students must have met these basic education requirements by the end of the quarter in which they complete 75 credits. (This does not include the foreign language basic skills requirement, which may require more time to complete.) Students who do not meet this standard will have a hold placed on further course registration. To remove the hold, the student must meet with an advisor and submit a program of study to plan successful completion of this requirement. The student's progress will then be monitored by an assigned academic advisor.

## Williams O. Douglas Honors

Students in the William O. Douglas Honors program should check with their advisor regarding the General Education requirements.

## WRITING REQUIREMENT

Four (4) of the courses taken to fulfill the breadth requirement must have the writing designation in the list below. These are courses which include at least seven
(7) pages of assigned writing that is assessed for content and mechanics (grammar, spelling, punctuation, and organization).

## BREADTH REQUIREMENT

## I. ARTS AND HUMANITIES

Students must take at least one course from each of the three groups. No more than one class from a single department may be counted toward this requirement.

## Literature and the Humanities

A grade of C- or higher is required in ENG 101 before taking any of the courses in this category.

- ABS 110 - Expressive Black Culture: African American Literary Traditions from Folklore to Rap Credits: (5)
- ENG 105 - The Literary Imagination: An Introduction to Literature Credits: (5) (Fulfills Writing Requirement)
- ENG 247 - Multicultural Literature Credits: (5) (Fulfills Writing Requirement)
- ENG 347 - Global Perspectives in Literature Credits: (5) (Fulfills Writing Requirement)
- HUM 101 - Exploring Cultures in the Ancient World Credits: (5) (Fulfills Writing Requirement)
- HUM 102 - Exploring Cultures From 16th through 19th Centuries Credits: (5) (Fulfills Writing Requirement)
- HUM 103 - Exploring Cultures in Modern and Contemporary Societies Credits: (5) (Fulfills Writing Requirement)

## The Aesthetic Experience

- ART 103-Art Appreciation Credits: (4)
- FILM 250 - Introduction to Film Credits: (5) (Fulfills Writing Requirement)
- MUS 101 - History of Jazz Credits: (5)
- MUS 102 - Introduction to Music Credits: (5)
- MUS 103 - History of Rock and Roll Credits: (5)
- DNCE 161 - Cultural History of Dance Credits: (4)
- TH 101 - Appreciation of Theatre and Film Credits: (4)
- TH 107 - Introduction to Theatre Credits: (4) (Fulfills Writing Requirement)
- TH 375 - Asian Drama Credits: (4) (Fulfills Writing Requirement)
- TH 382 - Diverse Experiences in American Drama Credits: (4) (Fulfills Writing Requirement)

## Philosophies and Cultures of the World

- World Languages 251, 252, or 253. Second-year World Language (same as studied in high school) Credits: (5)
OR World Languages 151, 152 or 153 or CHIN 141, 142, or 143. First-year World Language (different than the one used to meet basic skills requirement) Credits:(5)
- PHIL 101 - Philosophical Inquiry Credits: (5) (Fulfills Writing Requirement)
- PHIL 104 - Moral Controversies Credits: (5) (Fulfills Writing Requirement)
- PHIL 106 - Asian Philosophy Credits: (5) (Fulfills Writing Requirement)
- PHIL 306 - Environmental Ethics Credits: (5) (Fulfills Writing Requirement)
- PHIL 378 - Philosophy of Love Credits: (5) (Fulfills Writing Requirement)
- RELS 101 - World Religions Credits: (5) (Fulfills Writing Requirement)

## II. SOCIAL AND BEHAVORIAL SCIENCES

Students must take at least one course from each of the three groups. No more than one class from a single department may be counted toward this requirement.

## Perspectives on the Cultures and Experiences of the United States

An introduction to the institutions, cultures, and traditions of the United States intended to encourage a critical and analytical understanding of how the past affects the present and the future. An introduction to the complexities of social, economic, and political processes, issues, and events in the United States intended to provide a context for informed decision-making and citizenship.

- AIS 101 - American Indian Culture before European Contact Credits: (5) (Fulfills Writing Requirement)
- AIS 102-American Indians in the Contact Period Credits: (5) (Fulfills Writing Requirement)
- AIS 103 - Contemporary American Indian Experience Credits: (5) (Fulfills Writing Requirement)
- COM 202 - The First Amendment: Rights and Responsibilities Credits: (5)
- ECON 101 - Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- SOC 109 - Social Construction of Race Credits: (5) (Fulfills Writing Requirement)
- HIST 143 - United States History to 1865 Credits: (5) (Fulfills Writing Requirement)
- HIST 144 - United States History Since 1865 Credits: (5) (Fulfills Writing Requirement)
- LAJ 102 - Introduction to Law and Justice Credits: (5)
- POSC 210 - American Politics Credits: (5)
- SOC 101 - Social Problems Credits: (5) (Fulfills Writing Requirement)
- SOC 305 - American Society Credits: (5) (Fulfills Writing Requirement)
- WGSS 201 - Introduction to Women's, Gender, and Sexuality Studies Credits: (5) (Fulfills Writing Requirement)
- WGSS 250 - Introduction to Queer Studies Credits: (5) (Fulfills Writing Requirement)

## Perspectives on World Cultures

An introduction to institutions, cultures, and traditions of nations, groups, and societies outside the United

States intended to encourage an understanding and appreciation of the dimensions of human diversity as well as similarities. An introduction to contemporary international and transnational issues intended to provide a broader perspective of the individual's relationship to other cultures and to common human concerns.

- ANTH 130 - Cultural Worlds Credits: (5)
- AST 102 - Introduction to Asian Studies Credits: (3) (Fulfills Writing Requirement)
- COM 302 - Intercultural Communication Credits: (4) (Fulfills Writing Requirement)
- ECON 102 - World Economic Issues Credits: (5) (Fulfills Writing Requirement)
- GEOG 101 - World Regional Geography Credits: (5)
- HIST 101 - World History to 1500 Credits: (5) (Fulfills Writing Requirement)
- HIST 102 - World History: 1500-1815 Credits: (5) (Fulfills Writing Requirement)
- HIST 103 - World History Since 1815 Credits: (5) (Fulfills Writing Requirement)
- LLAS 102-An Introduction to Latino and Latin American Studies Credits: (5) (Fulfills Writing Requirement)
- POSC 270 - International Relations Credits: (5) (Fulfills Writing Requirement)

## Foundations of Human Adaptions and Behavior

An introduction to and analysis of the fundamental principles underlying human interaction intended to foster a better understanding of the human condition. An introduction to the fundamental patterns and understandings of human interaction with natural and man-made environments intended to help students make informed judgments concerning broad environmental issues.

- ANTH 107 - Being Human: Past and Present Credits: (5)
- ANTH 120 - Archaeology: Science of the Past Credits: (5) (Fulfills Writing Requirement)
- FCL 310 - Family Issues in the 21st Century Credits: (4) (Fulfills Writing Requirement)
- FCL 337 - Human Sexuality Credits: (4)
- GEOG 208 - Our Human World Credits: (5)
- HED 101 - Essentials for Healthy Living Credits: (4)
- POSC 101 - Introduction to Politics Credits: (5) (Fulfills Writing Requirement)
- PSY 101 - General Psychology Credits: (5)
- PSY 205 - Psychology of Adjustment Credits: (5) (Fulfills Writing Requirement)
- SOC 107 - Principles of Sociology Credits: (5) (Fulfills Writing Requirement)

## III. THE NATURAL SCIENCES

The natural sciences provide basic methods for rigorously describing and comprehending the natural world. Inquiry-driven laboratory and field observations are an essential mode of teaching, learning, and practicing natural science. Students must take at least
one course from each of the three groups. No more than one class from a single department may be counted toward this requirement. It may be advantageous for students to take courses from groups in the order they appear below.

## Fundamental Disciplines of Physical and Biological Sciences

An introduction to those sciences that study the fundamentals of physical and life systems.

- BIOL 101 - Fundamentals of Biology Credits: (5)
- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- GEOL 101 - Introduction to Geology Credits: (4)
- AND GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- PHYS 106 - Physics Inquiry Credits: (5) (Lab included)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 181 - General Physics I with Laboratory Credits: (5)

Patterns and Connections in the Natural World
Those sciences that use a knowledge of basic scientific disciplines to examine large and complex physical and life systems.

- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- BIOL 200 - Plants in the Modern World Credits: (5) (Fulfills Writing Requirement)
- BIOL 201 - Human Physiology Credits: (5)
- BIOL 300 - Introduction to Evolution Credits: (5)
- ENST 201 - Earth as an Ecosystem Credits: (5)
- GEOG 107 - Our Dynamic Earth Credits: (5)
- GEOL 103-Geology of Washington Credits: (4)
- AND GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOL 107 - Earth's Changing Surface Credits: (4)
- GEOL 302 - Oceans and Atmosphere Credits: (4)
- PHYS 101 - Introductory Astronomy I Credits: (5) (Lab included)
- PHYS 102 - Introduction to Astronomy Credits: (4) (Lab included)

## Applications of Natural Science

These courses explicitly treat social, economic, technological, ethical or other implications of natural phenomena, of human influence on natural systems, or of responsive scientific inquiry.

NOTE: *Only open to freshman students enrolled in STEP program, and all three courses must be completed with passing grade to receive credit for Application of Natural Science breadth and one Writing requirement.

- ANTH 314 - Human Variation Credits: (4)
- BIOL 302 - Sustainability and Environmental Change Credits: (5)
- CHEM 101 - Chemistry and Planet Earth Credits: (5) (and Lab)
- ENST 202 - Environment and Society Credits: (5)
- ENST 310 - Energy and Society Credits: (5) (Fulfills Writing Requirement)
- ETSC 101 - Modern Technology and Energy Credits: (5)
- GEOG 273 - Geography of Rivers Credits: (5)
- GEOL 108 - Earth and Energy Resources Credits: (4)
- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- PHYS 103 - Physics of Musical Sound Credits: (5) (Fulfills Writing Requirement)
- PHYS 108 - Light and Color Credits: (4) (Lab included)
- STEP 101 - Scientific Perspectives and Experimentation I Credits: (2) *see note
- STEP 102-Scientific Perspectives and Experimentation II Credits: (2) *see note
- STEP 103 - Scientific Perspectives and Experimentation III Credits: (1) *see note (Fulfills Writing Requirement)

## General Education Course Descriptions

ABS 110. Expressive Black Culture:
African American Literary
Traditions from Folklore to Rap (5).
Interdisciplinary exploration of
perspectives in African American folk
culture, from oral expressions
originating in Africa and developed
during slavery to contemporary rap and
stand-up comedy. Course explores the
worldwide contribution of black oral
performative art. AH-Literature and
Humanities. Course will be offered
every year (Fall, Winter and Summer).
AIS 101. American Indian Culture
before European Contact (5). An
interdisciplinary approach explores the
lifeways and environments of
American Indians prior to European
contact and settlement. Sources of pre-
contact information consist of the
archaeological, oral history, and
paleoenvironmental records. SB-
Perspectives on Cultures and
Experiences of U.S. (W). Course will
be offered every year (Fall).
AIS 102. American Indians in the
Contact Period (5). An
interdisciplinary study of the lifeways
and environments of American Indians
during the period of European contact.
Sources of contact period information
come from the archaeological,
American Indian and European written
and oral history records. SB-
Perspectives on Cultures and
Experiences of U.S. (W). Course will
be offered every year (Winter).
AIS 103. Contemporary American
Indian Experience (5). An
interdisciplinary approach explores the
emergence of contemporary American
Indians after AD 1890 with an
emphasis on social, political, and
cultural aspects. Sources of information
about this period come from written
and oral history. SB-Perspectives on
Cultures and Experiences of U.S. (W).
Course will be offered every year
(Spring).
ANTH 107. Being Human: Past and
Present (5). Exploration of being
human throughout the world from the
earliest human ancestors to today using
archaeological, biological, cultural and
linguistic anthropology methods and
perspectives. SB-Foundations of
Human Adaptations and Behavior.
and

ABS 110. Expressive Black Culture: African American Literary Interdisciplinary exploration of perspectives in African American folk originating in Africa and developed during slavery to contemporary rap and old id performative art. AH-Literature and Humanities. Course will be offered every year (Fall, Winter and Summer) before European Contact (5). An interdisciplinary approach explores the ays and environments of contact and settlement. Sources of precontact information consist of the archaeological, oral history, and paleoenvironmental records. SBes on Culures and be offered every year (Fall).
AIS 102. American Indians in the Contact Period (5). An interdisciplinary study of the lifeways and Sources of contact period information come from the archaeological, American Indian and European written and oral history records. SB-
Perspectives on Cultures and Experiences of U.S. (W). Course will be offered every year (Winter).

## Indian Experience (5). An

interdisciplinary approach explores the Indians after AD 1890 with an emphasis on social, political, and cultural aspects. Sources of information about this period come from written oral history. SB-Perspectives on Course will be offered every year (Spring).
ANTH 107. Being Human: Past and Present (5). Exploration of being Pan throughout the world from the linguistic anthropology methods and perspectives. SB-Foundations of Human Adaptations and Behavior.

Course will be offered every year (Fall, Winter, Spring).
ANTH 110. Bones, Apes, and Genes: Exploring Biological Anthropology
(5). Exploration of the field of biological anthropology, including humankind's evolutionary relationships to other primate forms, the human fossil record, and on-going evolutionary processes impacting on the human species. NS-Patterns and Connections Natural World. Course will be offered every year (Fall, Winter, Spring, Summer).
ANTH 120. Archaeology: Science of the Past (5). Introduction to the concepts, methods, and development of archaeology, as well as key discoveries from the ancient world. Illustrations of how fields of science are combined to uncover past human achievements and diverse cultures. SB-Foundations of Human Adaptations and Behavior (W). Course will be offered every year (Fall, Winter, Spring)
ANTH 130. Cultural Worlds (5). The cross-cultural and holistic study of humans worldwide, including the analysis of race, gender, power, kinship, globalization, and the role of symbols in social life. Students will also examine their own world through anthropological lenses. SBPerspectives on World Cultures.
ANTH 314. Human Variation (4). Survey of genetic, physiological, and morphological diversity of modern human populations, with a focus on how humans' biological variation interacts with culture to enable adaptation to various ecological settings. NS-Applications Natural Science. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: sophomore standing or above.
ART 103. Art Appreciation (4). Art Appreciation is an introduction to artistic styles, periods of art, and artistic techniques and processes. It introduces students to the visual components of art, and considers the cultural, economic, and societal significance of art. AH-Aesthetic Experience. Course will be offered every year (Fall, Winter, Spring and Summer).
AST 102. Introduction to Asian Studies (3). An interdisciplinary introduction to
the study of Asia; emphasizing geography, history, culture, and economics. SB-Perspectives on World Cultures (W). Course will be offered every year (Fall, Winter, Spring, and Summer).
BIOL 101. Fundamentals of Biology
(5). Introduction to scientific inquiry and basic principles of biology at molecular, cellular, organismal, community, and ecosystem levels as applied to humans, society, and the environment. Four hours lecture and one two-hour laboratory per week. May not be counted toward a major or minor in the department of biological sciences. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, Spring, and Summer).
BIOL 200. Plants in the Modern World (5). In this course, students will develop a broad knowledge base about plants, their life processes and ways in which humans are dependent on plants and their products. The course includes inquiry-driven laboratory and field observations. May not be counted toward a major or minor in the department of biological sciences. NSPatterns and Connections Natural World (W) (L). Course will be offered every year. Course will not have an established scheduling pattern.
BIOL 201. Human Physiology (5). An introduction to the function of human cells, organs, and organ systems as it relates to health and well-being current developments, and society. Not open to students with credit in BIOL 455; may not be counted toward a major or minor in the department of biological sciences. NS-Patterns and Connections Natural World. Course will be offered every year (Fall, Winter, Spring, and Summer).
BIOL 300. Introduction to Evolution (5). An introduction to the Darwinian theory of evolution. Exploration of the mechanisms of evolutionary change, speciation, and macroevolutionary patterns of the evolution of life on Earth including humans. May not be counted toward a major or minor in the department of biological sciences. NSPatterns and Connections Natural World. Course will not have an established scheduling pattern.

Prerequisite: sophomore standing or above. May not be counted toward a major in the department of biological sciences.
BIOL 302. Sustainability and Environmental Change (5). Basic concepts of ecology with emphasis on ecosystems and populations and how human activities and attitudes relate to these basic concepts. May not be counted toward a major or a minor in the department of biological sciences. NS-Applications Natural Science.
BUS 102. Business Computer Skills (4). This course will develop practical computer skills needed to evaluate and help solve business problems. Students will learn how to use software commonly used in businesses to access, organize and analyze information and present it professionally in presentations and reports. Basic Skills 6 - Computer Fundamentals.

CHEM 101. Chemistry and Planet
Earth (5). Introduction to chemical principles and applications for nonscientists, with a focus on the interaction of human beings with the natural environment, 4 hours lecture and 2 hours lab weekly. NSApplications Natural Science (L). Course will be offered every year (Fall, Spring, Summer).
CHEM 111. Introduction to Chemistry
(4). Chemical principles of the compositions, structure, properties, and changes of matter. Designed for students in certain health science programs. Four lectures weekly.
Combined with CHEM 111LAB satisfies Physical and Natural World,
Ways of Knowing pathway. NS-Fund
Disc Phys and Biological Sciences.
Course will be offered every year (Fall,
Winter, Spring).
CHEM 111LAB. Introductory
Chemistry Laboratory (1).
Introduction to basic chemistry
techniques. Two hours
laboratory weekly. Combined with CHEM 111 lecture satisfies Physical and Natural World, Ways of Knowing. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, Spring and Summer). Co- or prerequisite:

## CHEM 111.

CHEM 181. General Chemistry I (4).
This course introduces chemistry concepts such as atoms and molecules, stoichiometry, solution chemistry, thermochemistry, electronic structure of the atom and periodicity, and chemical bonding. NS-Fund Disc Phys and Biological Sciences. Course will be
offered every year (Fall, Winter and Spring). Prerequisites: strongly recommend high school chemistry and recommend qualification for MATH 153.

CHEM 181LAB. General Chemistry Laboratory I (1). This laboratory supports hands-on, inquiry-based approaches to exploring topics presented in CHEM 181. Three hours of laboratory weekly. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter and Spring). Co- or prerequisite: CHEM 181.
COM 202. The First Amendment: Rights and Responsibilities (5). This class explores the First Amendment freedoms as the foundation of a free, tolerant and democratic society. The communicative rights and responsibilities of citizens in a democracy governed by such an amendment are also examined. SBPerspectives on Cultures and Experiences of U.S. Course will be offered every year (Fall, Winter, Spring, Summer).
COM 302. Intercultural Communication (4). The objective of this course is to give the participants the skills and understanding necessary to improve communication with peoples of other nations and cultures. SB-Perspectives on World Cultures (W). Prerequisite: sophomore standing or above.
CS 101. Computer Basics (4). Integrated, project-based course using student-produced working materials in the form of a mini thesis. Microsoft Office tools are learned in a web-based practical application environment.
Basic Skills 6 - Computer Fundamentals.
CS 105. The Logical Basis of Computing (4). Students develop mathematical and quantitative reasoning skills by learning the fundamentals of computer programming. Students gain an understanding of possible connections between technology and artistic expression. Basic Skills 5 - Reasoning. Course will be offered every year (Fall, Winter, Spring, Summer).
DNCE 161. Cultural History of Dance (4). A comprehensive look at the global dynamics of dance, examining the diverse cultural traditions and the innovations that have advanced dance into the 21st century. AH-Aesthetic Experience. Formerly PED 161, students may not receive credit for
both. Course will be offered every year (Fall, Winter, Spring, and Summer).
ECON 101. Economic Issues (5). For the student who desires a general knowledge of economics. Applications of economic principles to current social and political problems. ECON 101 cannot be substituted for either ECON 201 or 202. SB-Perspectives on Cultures and Experiences of U.S. Course will be offered every year (Fall, Winter).

## ECON 102. World Economic Issues

(5). An introduction to current international issues related to international trade and finance, economic development, and comparative economic systems. SBPerspectives on World Cultures (W). Course will be offered every year (Fall, Spring).

## ECON 130. Foundations for Business

Analytics (5). Role of mathematics, statistics and software to business and economic decision making; business and economics applications including indexing, percentage changes, compounding, financing, and accounting; probability theory and descriptive statistical analysis; modelling. Includes a lab component. Basic Skills 5 - Reasoning. Prerequisites: either at least 500 on the SAT, 19 on the ACT, a Compass test score of either 50-Pre-Algebra, 26Algebra, 31-College Algebra, or 31Trigonometry, or completed MATH 100B or a higher level math class.
ECON 201. Principles of Economics Micro (5). Introduction to standard economic models used to examine how individuals and firms make decisions under different market structures; role of government in the economy in addressing market failure and efficiency equity tradeoff. SBPerspectives on Cultures and Experiences of U.S. Course will be offered every year (Fall, Winter, Spring, Summer).
ENG 101. Academic Writing I: Critical Reading and Responding (5). Develops skills necessary for academic writing, including summarizing, reading sources critically and responding to them, synthesizing multiple perspectives, and using academic writing conventions. Required of all students except those who have passed an exemption examination. Students must earn a minimum grade of C - or above to enroll in ENG 102. Basic Skills 2 English Comp I. Course will be offered every year (Fall, Winter, Spring,

Summer). Prerequisite: appropriate test scores or have satisfactorily completed ENG 100T: Transitional English.
ENG 102. Academic Writing II: Reasoning and Research on Social Justice (5). Develops skills in researchbased academic argument through assignments involving evaluation, analysis, and synthesis of multiple sources. Course will be offered every year (Fall, Winter, Spring, Summer). Basic Skills 3 - English Comp II. Prerequisite: ENG 101 with a grade of C- or higher.
ENG 105. The Literary Imagination: An Introduction to Literature (5). Human experience as it is imagined, interpreted, and made significant in poetry, prose, fiction, and drama. ENG 105, 106 and ENG 107 are equivalent courses; students may receive credit for only one. Course will be offered every year (Fall, Winter, Spring, Summer). AH-Literature and Humanities (W). Prerequisite: ENG 101 with a grade of C- or higher.
ENG 247. Multicultural Literature (5). Literary themes examined through the comparison of works from various cultures. AH-Literature and Humanities (W). Prerequisite: ENG 101 with a grade of C - or higher.
ENG 347. Global Perspectives in Literature (5). An introduction to contemporary non-western and postcolonial literature. Course will be offered every year (Fall, Spring, Summer). AH-Literature and Humanities (W). Prerequisites: sophomore standing or above and ENG 101 with a grade of C- or higher.
ENST 201. Earth as an Ecosystem (5). Introduction to the concept of our planet as a finite environment with certain properties essential for life and will explore dynamic nature of the earth's physical, chemical, geological, and biological processes and their interrelated "systems". Course will be offered every year (Fall, Spring). NSPatterns and Connections Natural World.
ENST 202. Environment and Society
(5). The physical and cultural dimensions of environmental problems with particular emphasis given to the interaction between ecosystems, basic resources, population dynamics, and culture. Course will be offered every year (Fall, Summer). NS-Applications Natural Science.
ENST 310. Energy and Society (5).
Through classroom and field experience, students will examine society's use of and dependence upon
energy. Students will become more discerning citizens, able to take part in local, national, and global energy discussions. Course will be offered every year (Fall). NS-Applications Natural Science (W). Prerequisite: sophomore standing or above.
ETSC 101. Modern Technology and Energy (5). A study of how basic scientific principles are applied daily in industrial societies through a survey of transportation, energy and power, construction, and consumer product technologies. Formerly IET 101, students may not receive credit for both. NS-Applications Natural Science. Course will be offered every year (Fall, Winter, Spring, Summer).
FCL 310. Family Issues in the 21st Century (4). An introduction to social issues that impact family life. Current issues pertaining to individual and family relationships are assessed from an interdisciplinary perspective. SBFoundations of Human Adaptations and Behavior (W). Formerly FS 310, students may not receive credit for both.
FCL 337. Human Sexuality (4). The biophysical, psychosocial, and behavioral aspects of sexuality with emphasis on making responsible sexual decisions and promoting healthy relationships. General Education: SBFoundations of Human Adaptations and Behavior. Formerly FS 337, students may not receive credit for both. Prerequisite: sophomore standing or above.
FILM 250. Introduction to Film (5). Learning and applying motion picture vocabulary and aesthetic concepts through screenings, discussions, and writing. Emphasis on the social context, cultural influences, and aesthetic qualities of film. AHAesthetic Experience (W). Formerly FVS 250, students may not receive credit for both. Prerequisite: ENG 101 and ENG 102 with a grade of C- or higher.
FIN 174. Personal Finance (5). This course addresses the broad spectrum of financial issues encountered by individuals throughout their lives. Topics include but are not limited to: Preparing a personal budget, money management, investments, retirement planning, educational planning and insurance. Course will be offered every year (Fall, Winter, Spring, Summer). Basic Skills 4 - Math. Prerequisites: either at least 500 on the SAT, 19 on the ACT, a Compass test score of either 50-Pre-Algebra, a 26-Algebra, 31-

College Algebra, or 31-Trigonometry, or an Accuplacer score in Elementary Algebra of $60+$ or Arithmetic of $100+$, or completed MATH 100B or a higher level math class.
GEOG 101. World Regional
Geography (5). An introduction to the dynamic landscapes of the world's major regions, examining socioeconomic, political, demographic, cultural and environmental patterns, processes, and issues. SB-Perspectives on World Cultures. Course will be offered every year (Fall, Winter, Spring and Summer).
GEOG 107. Our Dynamic Earth (5).
The complex weather, climate, water, landforms, soils, and vegetation comprising Earth's physical environments over space and time. Incorporates map interpretation and scientific analysis in understanding various landscapes and human impacts upon those landscapes. NS-Patterns and Connections Natural World. Course will be offered every year (Fall, Winter, Spring and Summer).
GEOG 208. Our Human World (5).
Explores the historical diffusion and contemporary spatial distribution of cultures, religions, and languages. Evaluates how these features interact with economic and political systems to create distinctive places at scales ranging from local to global. Formerly GEOG 108, student may not receive credit for both. SB-Foundations of Human Adaptations and Behavior. Course will be offered every year (Fall, Spring and Summer).
GEOG 273. Geography of Rivers (5). Drawing on local, regional, and global case studies, this course examines rivers as bio-physical systems, impacted by natural and anthropogenic forces. Focus is placed on human development of floodplains and ecosystem functioning within riparian areas. Course will be offered every year (Fall, Winter, Spring, Summer).
GEOL 101. Introduction to Geology
(4). An introduction to geology emphasizing the origin and nature of the common rocks, plate tectonic theory, earthquake and volcanoes, and geologic time. Course will be offered every year (Fall, Winter, Spring, Summer). NS-Fund Disc Phys and Biological Sciences. Co- or prerequisite: GEOL 101LAB.
GEOL 101LAB. Introductory Geology Laboratory (1). Application of map study to geological processes and land forms, identification of rocks and minerals, and local field trips. Two
hours laboratory per week. NS-Fund Disc Phys and Biological Sciences (L) or NS-Patterns and Connections Natural World (L).
GEOL 103. Geology of Washington (4). Fundamentals of geology applied to the state of Washington. Topics include Washington's volcanic, earthquake, tectonic, and glacial activity. Four lectures per week. Course will be offered every year (Fall, Winter). NS-Patterns and Connections Natural World. Corequisite: GEOL 101LAB.
GEOL 107. Earth's Changing Surface
(4). The role of natural geologic processes in shaping the earth's surface; includes hydrologic cycle, rivers and flooding, landslides, coastal processes, and climate cycles. Four hour lecture per week plus required field trips.
Course will be offered every year (Fall, Winter, Spring). General Education: NS-Patterns and Connections Natural World.
GEOL 108. Earth and Energy Resources (4). Exploration of the earth's mineral and energy resources, how they are formed, harnessed, and the environmental impacts of their extraction and use. Course will be offered every year (Fall, Winter, Spring, Summer). NS-Applications Natural Science.
GEOL 302. Oceans and Atmosphere
(4). Introduction to Earth's climate and the hydrologic cycle through study of the ocean-atmosphere system. Chemical and physical changes will be studied over time scales ranging from millions of years to days. Will include a field trip. Course will be offered every year (Fall, Winter, Spring, Summer).
NS-Patterns and Connections Natural World. Prerequisite: sophomore standing or above.
HED 101. Essentials for Healthy Living (4). Essentials for Healthy Living is a survey course designed to give the student the practical and theoretical knowledge necessary to apply principles of overall wellness in the pursuit of a healthier lifestyle.
Course will be offered every year (Fall, Winter, Spring, Summer). SB-
Foundations of Human Adaptations and Behavior.
HIST 101. World History to 1500 (5). Origins and development of the major world civilizations to the 15 th century. A comparative study of their political, social, and economic institutions, and their religious and intellectual backgrounds. Course will be offered
every year (Fall, Winter, Spring). SB-
Perspectives on World Cultures (W).
HIST 102. World History: 1500-1815
(5). A comparative survey of political, social, economic, and cultural developments in world history from 1500-1815. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on World Cultures (W).

## HIST 103. World History Since 1815

(5). A comparative survey of political, social, economic, and cultural developments in world history since 1815. Course will be offered every year (Fall, Winter, Spring, Summer). SB-
Perspectives on World Cultures (W).
HIST 143. United States History to 1865 (5). Survey of U.S. history from before contact to Civil War. Themes include pre-Columbian societies; colonization; epidemics and environmental change; slavery; the American Revolution and Constitution; the market revolution; Manifest Destiny; and the Civil War. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on Cultures and Experiences of U.S. (W).
HIST 144. United States History Since 1865 (5). U.S. history from Reconstruction to the present. Themes include Imperialism, Progressivism, World War I, Great Depression, World War II, the Civil Rights and Women's Movements, the Vietnam War, recent U.S. foreign policy and political movements. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on Cultures and Experiences of U.S. (W).
HUM 101. Exploring Cultures in the Ancient World (5). An
interdisciplinary exploration from literature, history, philosophy, and the arts of selected major ancient civilizations in Asia, Africa, Europe, and/or the Americas from their beginnings through the 15 th century. Course will be offered every year (Fall, Winter, Spring, Summer). AHLiterature and Humanities (W). Prerequisites: ENG 101 with a grade of C- or higher.

## HUM 102. Exploring Cultures From

 16th through 19th Centuries (5). An interdisciplinary exploration of selected literature, history, philosophy, and the arts in Asia, Africa, Europe, and the Americas from the 16th through the 19th centuries. Course will be offered every year (Fall, Winter, Spring, Summer). AH-Literature and Humanities (W). Prerequisites: ENG 101 with a grade of C - or higher.HUM 103. Exploring Cultures in Modern and Contemporary Societies (5). An interdisciplinary exploration of literature, history, philosophy, and the arts of selected world civilizations of the 20th and 21 st centuries. Course will be offered every year (Fall, Winter, Spring, Summer). AH-Literature and Humanities (W). Prerequisites: ENG 101 with a grade of C- or higher.
IT 101. Computer Applications (3). Basic skills in Windows, word processing, spreadsheets, databases, and presentations. Basic Skills 6 Computer Fundamentals.
LAJ 102. Introduction to Law and Justice (5). This course will focus on the role of law in society and will examine both the criminal and civil law system, as well as, the function of law in social change and social control. Course will be offered every year (Fall, Winter, Spring). SB-Perspectives on Cultures and Experiences of U.S.
LLAS 102. An Introduction to Latino and Latin American Studies (5). A multi-disciplinary introduction of Latino and Latin American studies, presented in three main components: People and the Land, The Environment and the Human Condition, and SocioPolitical Spectrum. SB-Perspectives on World Cultures (W).
MATH 101. Mathematics in the Modern World (5). Selected topics from the historical development and applications of mathematics together with their relationship to the development of our present society. Basic Skills 4 - Math. Prerequisites: either at least 500 on the SAT, 19 on the ACT, a Compass test score of either 50-Pre-Algebra, 26-Algebra, 31College Algebra, or 31-Trigonometry, or completed MATH 100B or a higher level math class.
MATH 102. Mathematical Decision Making (5). Selected topics from probability, statistics, and mathematical decision making with real-world application. Basic Skills 5 - Reasoning. Prerequisites: either at least 500 on the SAT, 19 on the ACT, a Compass test score of either 50-Pre-Algebra, 26Algebra, 31-College Algebra, or 31Trigonometry, or completed MATH 100B or a higher level math class.
MATH 130. Finite Mathematics (5). The language of sets, counting procedures, introductory probability, decision making, and introductory descriptive statistics. Meets General Education "reasoning" requirement and prepares student for introductory statistics courses in various
departments. Basic Skills 5 -
Reasoning. Prerequisites: either at least
500 on the SAT, 19 on the ACT, a
Compass test score of either 50-Pre-
Algebra, 26-Algebra, 31-College Algebra, or 31-Trigonometry, or completed MATH 100B or a higher level math class.
MATH 153. Pre-Calculus Mathematics I (5). A foundation course which stresses those algebraic and elementary function concepts together with the manipulative skills essential to the study of calculus. Basic Skills 4 - Math. Prerequisites: either MATH 100C with a grade of C or higher; or a score of 18 or higher on the Intermediate Math Placement Test, or a score of 66 or higher on the Compass Algebra test.
MATH 154. Pre-Calculus Mathematics II (5). A continuation of MATH 153 with emphasis on trigonometric functions, vectors, systems of equations, the complex numbers, and an introduction to analytic geometry. Basic Skills 4 - Math. Prerequisites: MATH 153 with a grade of C or higher, a score of 17 or higher on the Advanced Math Placement Test, or a score of 46 or higher on the Compass College Algebra Test.
MATH 164. Foundations of Arithmetic (5). Structure of the real number system. Properties of and operations on integers, rationals, decimal representation, percentages, proportion, graphing, and elementary problem solving. Recommended for the prospective elementary school teacher.
Basic Skills 4 - Math. Prerequisites: 45 earned credits, and either at least a 500 on the SAT, a 19 on the ACT, or a score of 50 on the Compass test.
MATH 170. Intuitive Calculus (5). An intuitive approach to the differential and integral calculus specifically designed for students in the behavioral, managerial, and social sciences. Not open to students with credit for MATH 172 or higher. Basic Skills 4 - Math. Prerequisites: MATH 153 with a grade of C or higher or a score of 19 or higher on the Advanced Placement Test.
MATH 172. Calculus I (5). Theory, techniques, and applications of differentiation and integration of the elementary functions. Basic Skills 4 Math. Prerequisites: MATH 154 with a grade of C or higher, a score of 19 on the Advanced Math Placement Test, or a score of 46 or higher on the Compass Trigonometry test.
MUS 101. History of Jazz (5). History of artistic, cultural, and technological developments in jazz, focusing on
important players and performances. Introduction to fundamental musical concepts and methods; emphasis on active listening, social justice, current issues. Course will be offered every year (Fall, Winter, Spring). AHAesthetic Experience.
MUS 102. Introduction to Music (5). Landmark composers, styles, and works of Western music history from the Middle Ages to the present. Fundamental musical concepts (melody, harmony, rhythm, form, etc.) are emphasized to develop student understanding and listening skills. Course will be offered every year (Fall, Winter, Spring). AH-Aesthetic Experience.
MUS 103. History of Rock and Roll (5). History of Rock and Roll, America's second indigenous musical art form, after jazz. Emphasis placed on artists, music genres, and cultural/societal forces shaping rock's evolution, 1950s to present. Extensive listening, reading; required online discussion. Course will be offered every year (Fall, Winter, Spring). AHAesthetic Experience.

## NUTR 101. Introduction to Human

 Nutrition (5). Fundamental nutritional concepts as related to health. Four hours lecture and one hour discussion per week. Course will be offered every year (Fall, Winter, Spring, Summer). NS-Applications Natural Science.PHIL 101. Philosophical Inquiry (5). Introduces students to the basic concepts, questions, and methods of philosophical inquiry. Topics may include free will and responsibility, knowledge and skepticism, the nature of the divine, moral reasoning, and human rights and social justice. Course will be offered every year (Fall, Winter, Spring, Summer). AH-Philosophies and Culture World (W).
PHIL 104. Moral Controversies (5). An introduction to moral reasoning through the study of current ethical problems. Topics may include abortion, capital punishment, consumerism, immigration, sexual ethics, killing in war, and/or torture. AH-Philosophies and Culture World (W). Formerly PHIL 210, students may not receive credit for both. Course will be offered every year (Fall, Winter, Spring).
PHIL 106. Asian Philosophy (5). Examination of selected classical and/or contemporary issues and questions in Chinese, Japanese and Indian philosophy. AH-Philosophies and Culture World (W). Formerly PHIL 209, students may not receive
credit for both. Course will not have an established scheduling pattern (Fall, Winter, Spring).
PHIL 150. Critical Thinking (5). This course will focus on informal logic: understanding and evaluating arguments in ordinary language. Students will learn to read, write, and think critically. Basic Skills 5 Reasoning.
PHIL 201. Introduction to Logic (5). Formal principles, methods and techniques for analyzing, constructing, and evaluating arguments. Topics include validity, soundness, truth tables, Venn diagrams, syllogisms, and logical symbolism. Basic Skills 5 Reasoning.
PHIL 306. Environmental Ethics (5).
An examination of various positions on the human relationship with the natural environment, from ancient and contemporary, western and nonwestern, as well as interdisciplinary perspectives. AH-Philosophies and Culture World (W). Prerequisite: sophomore standing or above.
PHIL 378. Philosophy of Love (5). A study of various concepts of love as they occur in philosophy, literature, and other cultural expressions. The nature of romantic love, eros, agape, friendship, and fellow feeling will be discussed. AH-Philosophies and Culture World (W). Prerequisite: sophomore standing or above.
PHYS 101. Introductory Astronomy I
(5). An inquiry-based introduction to celestial motions, celestial objects, observational astronomy and the physics associated with each. Emphasis on stars and planets. NS-Patterns and Connections Natural World (L). Course will be offered every year (Fall). Prerequisite: eligible to enroll in MATH 101. Student must have received at least a 500 on the SAT, or a 19 on the ACT or a score of 50 -PreAlgebra or 26-Algebra or 31-College Algebra or 31-Trigonometry on the Compass test or completed MATH 100B or a higher level math class.
PHYS 102. Introduction to Astronomy (4). An introduction to the physics of the bodies in our solar system with an emphasis on planets and the Sun. This course will include an emphasis how we observe the planets and Sun, current and past planetary missions, and the comparative evolution of bodies in our solar system. NS-Patterns and Connections Natural World (L).
PHYS 103. Physics of Musical Sound (5). Basic principles of acoustics applied to the production of sound by
musical instruments and the human voice. Related topics include musical scales, human hearing, sound synthesis, and recording technology. Class format emphasizes active learning. NS-
Applications Natural Science (L) (W). Course will be offered every year (Winter). Prerequisite: eligible to enroll in MATH 101.
PHYS 106. Physics Inquiry (5). An introduction to fundamental physics topics highlighting applications to the world around us. There will be an emphasis on learning by inquiry and on designing and critiquing solutions to real world issues. Course will be offered every year (Fall, Winter). NSFund Disc Phys and Biological Sciences (L).
PHYS 108. Light and Color (4). An introduction to topics in light and color with applications to technology in the arts. NS-Applications Natural Science (L).

PHYS 111. Introductory Physics I with Laboratory (5). An integrated experimental and analytical investigation of topics including kinematics and dynamics. This integrated lecture/laboratory course includes the analysis of physical systems using algebra and trigonometry along with inquiry-based activities and experimental investigation. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, and Summer). Prerequisite: PHYS 110 OR eligible to enroll in MATH 172 OR successful completion of a comprehensive year-long high school pre-calculus course, or equivalent, the year prior to enrollment in PHYS 111. Co-requisite: PHYS 110 OR concurrent enrollment in a comprehensive year-long high school pre-calculus course, or equivalent.
PHYS 181. General Physics I with Laboratory (5). An integrated experimental and analytical investigation of topics including kinematics and dynamics. This integrated lecture/laboratory course includes the analysis of physical systems using algebra, trigonometry, and calculus along with inquiry-based activities and experimental investigation. Formerly PHYS 211, students may not receive credit for both. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, Summer). Co- or pre-requisite: MATH 172.

POSC 101. Introduction to Politics (5).
This course explores the meanings of power, political actors, resources of power and how they are being used for what purposes, under what ideological, institutional and policy processes affecting our quality of life. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Foundations of Human Adaptations and Behavior (W).
POSC 210. American Politics (5). Origin and development of the United States government; structure, political behavior, organizations, and processes; rights and duties of citizens. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on Cultures and Experiences of U.S.
POSC 270. International Relations (5). This course explores political issues and theories in international relations. This class will focus on issues of war and peace, international law and organization, foreign policy, diplomatic history, and international political economy. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on World Cultures (W).

PSY 101. General Psychology (5). The study of the basic principles, problems and methods that underlie the science of psychology, including diversity, human devleopment, biological bases of behavior, learning, sensation and perception, cognition, personality, and psychopathology. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Foundations of Human Adaptations and Behavior.
PSY 205. Psychology of Adjustment (5). The nature of the adaptive process and the means by which people adjust to their environment. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Foundations of Human Adaptations and Behavior (W).
RELS 101. World Religions (5). Survey of the major world religions (Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism, Daoism), including their tenets, practices, and evaluation of the human condition. AHPhilosophies and Culture World (W).
SOC 101. Social Problems (5). An introduction to the study of contemporary issues such as poverty, military policies, families, crime, aging, racial, ethnic conflict, and the environment. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Perspectives on Cultures and Experiences of U.S. (W).

SOC 107. Principles of Sociology (5).
An introduction to the basic concepts and theories of sociology with an emphasis on the group aspects of human behavior. Course will be offered every year (Fall, Winter, Spring, Summer). SB-Foundations of Human Adaptations and Behavior (W).
SOC 109. Social Construction of Race (5). Exploration of the social construction of race from antiquity to modern day. How did the idea of race come about? How did it evolve? What have been the social consequences of the idea of race? Formerly ETS 101, students may not receive credit for both. Course will be offered every year (Fall, Winter, Spring, Summer). SB-
Perspectives on Cultures and Experiences of U.S. (W).
SOC 305. American Society (5). Introduction to the social structure and processes of American society; emphasis on institutions such as government, family, schools, and religion, and processes such as conflict, change, stratification, mobility, and communication. Course will be offered every year (Fall, Winter, Spring,
Summer). SB-Perspectives on Cultures and Experiences of U.S. (W).
Prerequisite: sophomore standing or above.
STEP 101. Scientific Perspectives and Experimentation I (2). First course in three-quarter freshman science series. Students will take an interdisciplinary approach toward scientific research centered on a single theme. Students must take STEP 101, 102, and 103 to receive credit for First Year Experience: Quantitative Reasoning. Course will be offered every year (Fall). NS-Applications Natural Science. Prerequisite: enrollment in the STEP program or by permission.
STEP 102. Scientific Perspectives and Experimentation II (2). Second course in three-quarter freshman science series. Students gain practical introduction to the scientific process through designing and conducting experimental, computer, laboratory and/or field investigations. Students must take STEP 101, 102, and 103 to receive credit for First Year Experience: Quantitative Reasoning. By department permission. Course will be offered every year (Winter). NSApplications Natural Science.
Prerequisites: STEP 101.

STEP 103. Scientific Perspectives and Experimentation III (1). Third course in three-quarter freshman science series. Topical survey of active research efforts by faculty and students in science, technology and mathematics fields at CWU. Students must take STEP 101, 102, and 103 to receive credit for First Year Experience: Quantitative Reasoning. By department permission. Course will be offered every year (Spring). NS-Applications Natural Science (W). Prerequisite: STEP 102.
TH 101. Appreciation of Theatre and Film (4). Viewing, discussing, and comparing film and live theatre performance. Course will be offered every year (Fall, Winter, Spring). AHAesthetic Experience.
TH 107. Introduction to Theatre (4).
Overview of the basic elements of the theatre arts and dramatic structure, and the environment for production of plays. Attendance at assigned outside events is required. Course will be offered every year (Fall, Winter, Spring, Summer). AH-Aesthetic Experience (W).

TH 375. Asian Drama (4). Survey of the traditional theatre, puppetry, and dancedrama forms of Asia. Historical development. Cultural and aesthetic aspects of the text in performance. Influence on contemporary world theatre. AH-Aesthetic Experience (W). Prerequisite: sophomore standing or above.

## TH 382. Diverse Experiences in

 American Drama (4). Study of contemporary American multi-cultural plays by people of color and other ethnic groups. AH-Aesthetic Experience (W). Prerequisite: ENG 101.UNIV 101. Transition to CWU (1). UNIV 101 is designed to foster a successful transition to CWU. This course will promote a sense of belonging and discovery, stimulate engagement in curricular and cocurricular activities, and connect students to campus resources. Course will be offered every year (Fall, Winter, Spring).
WGSS 201. Introduction to Women's, Gender, and Sexuality Studies (5). An interdisciplinary exploration how
gender and sexuality impact people's lives both historically and in contemporary society. Gender related issues are examined through social, political, economic, and cultural issues and processes influencing societies, communities, and individuals. SBPerspectives on Cultures and Experiences of U.S. (W). Meets the General Education writing requirement. Formerly WGS 201; students may not receive credit for both. Course will be offered every year (Fall, Winter, Spring, Summer).
WGSS 250. Introduction to Queer Studies (5). An interdisciplinary introduction to queer studies, investigating the historical and contemporary reality of those who identify as gay, lesbian, bisexual, transgender, and/or queer. SBPerspectives on Cultures and Experiences of U.S. (W). Formerly WGS 250; students may not recieve credit for both. Course will be offered every year (Winter).

## Overview

The College of Arts and Humanities (CAH) is comprised of 12 departments and programs, which represent the disciplines of the arts and humanities. All of the departments and some of the programs of CAH offer undergraduate degrees as well as minors which supplement other degree programs. Five departments offer Master's degrees. In addition to its role in providing degree programs, CAH is responsible for many of the course offerings of the general education programs as well as extensive service coursework for the entire university. The college also plays a major role in Central's teacher education programs, offering bachelors and master's degrees for students preparing to be secondary teachers and providing coursework in educational foundations and discipline-specific methods for teacher education majors. Building on a legacy of teaching excellence, college faculty are engaged in research, creative activities and service, involving students in the scholarship and practical applications of their various academic specializations, while making important contributions to the intellectual tradition and to society at large. There are no special requirements for admission to the college, but some departments have requirements that are described under the respective department and program headings in the catalog.

## Mission

The College of Arts and Humanities advances knowledge, promotes intellectual inquiry, and cultivates creative endeavor among students and faculty through teaching informed by scholarship, creative activity, and public and professional involvement. We are committed to helping students develop intellectual and practical skills for responsible citizenship and the challenges of contemporary life in a global society. The college offers disciplinary and interdisciplinary programs of the highest quality, acts as a steward of the foundational disciplines upon which all inquiry is based, and serves as a cultural center for arts and humanities for the university and the region.

## Vision

The College of Arts and Humanities will be recognized as a distinguished learning community known regionally for scholarly and creative excellence, innovative, and rigorous
foundational liberal arts education, and undergraduate and graduate programs that are outstanding and unique in the state.

## Departments and Programs

Africana and Black Studies: Bobby Cummings, PhD
(Michaelsen Hall, room 104)
Art and Design: Gregg Schlanger, MFA (Randall Hall, room 100)
Asian Studies: Michael Launius, PhD (Psychology Bldg., room 414)
Communication: Katharine Whitcomb, MA (Lind Hall, room 109B)
English: George Drake, PhD (Language and Literature Bldg., room 423)
Film Program: Jon Ward (Lind Hall, room 117E)
History: Roxanne Easley, PhD (Language and Literature Bldg., room 100)
Center Latino and Latin American Studies Program: Daniel
Beck, PhD (Science 1 Bldg., room 338) and Gilberto
Garcia, PhD (Psychology Bldg., room 414)
Music: Nikolas Caoile, DMA (Jerilyn S. McIntyre Music Building, room 144)
Philosophy and Religious Studies: Matthew Altman, PhD
(Language and Literature Bldg., room 337)
Theatre Arts: Christina Barrigan, MFA (McConnell Hall, room 106)
World Languages and Cultures: Michael Johnson, PhD
(Language and Literature Bldg., room 102)

## Vision

CWU's College of Business will be recognized as a premier learning community creating an environment in which students, faculty, and staff reach their full potential.

## Mission

We launch students toward a better future by engaging them in industry-relevant and student-centered programs driven by strong partnerships between students, faculty, and business professionals.

## Our Shared Values

The faculty and staff of the CB share a set of core beliefs and commitments.

## We believe in: <br> - Student success

- Lifelong learning
- Integrity and ethical behavior
- Excellence

## We commit ourselves to:

- Prepare students for the future
- Impart knowledge on which students can build
- Treat everyone with respect and fairness
- Exemplify our values by serving as teachers and role models
- Maintain currency in our academic disciplines and professional fields
- Engage in scholarly activities that contribute to the body of knowledge in our disciplines

## Statement of Conduct

The College of Business is a learning community committed to a set of core values based on integrity, respect, and responsibility that guide our interactions.

Integrity: The quality of possessing and steadfastly adhering to high moral principles or professional standards.

Respect: To show consideration or thoughtfulness in relation to others.

Responsibility: The state, fact, or position of being accountable and responsible.

## Code of Honor

As College of Business students we pledge to uphold these standards of professionalism and conduct ourselves in accordance with them. We will not lie, cheat, or steal, and will not tolerate those who do. Our behavior defines who we are and what we will become.

## Programs

The College of Business offers programs leading to the Bachelor of Science degree in the following areas:

- Bachelor of Science, Accounting
- Bachelor of Science, Business Administration with specializations in:
Finance
General Business
Human Resource Management
Leadership and Management
Marketing Management
Personal Financial Planning
Supply Chain Management
- Bachelor of Science, Economics with specializations in:

Economic and Business Forecasting
General Economics
Managerial Economics

- Bachelor of Science, Personal Financial Planning
- Bachelor of Applied Science, Supply Chain Management

The College of Business offers minors in:
Accounting
Business Administration
Entrepreneurship
Finance
Human Resource Management
Sport Business
Supply Chain Management

The College of Business offers certificate programs in:

Accounting<br>Sport Business<br>Supply Chain Management

Students may take their junior and senior years of the accounting and business administration programs at two Puget sound-area centers: Lynnwood and Des Moines.

## Admission Requirements

Admission requirements to major programs within the College of Business are identical regardless of the location of the program. Students must first be accepted by the university and, if applicable, the university center which they plan to attend. Then, students must formally apply to the College of Business and be admitted to a College of Business Program prior to enrolling in 300- and 400-level courses within the college.

Students must attend a College of Business major declaration session to be fully admitted to our majors. Applications are only accepted at new student major declaration sessions. The application form must be completed and returned to the appropriate office along with copies of current transcripts.

Students must have the below requirements to be admitted to a College of Business major. Students seeking entry to the College without these requirements will be granted premajor standing.

- Completion of 30 credits (If a student is a transfer student, credits must be transferable)
- The applicant must be in good academic standing
- $\quad$ 2.25 Collegiate GPA
- Completion of ENG 101 and ENG 102 with a Cor higher, or equivalent
- Attend a College of Business Major Declaration Session
International students whose native language is not English must meet one of the following English proficiency requirements:
- A score of 71 or above on the Internet-based TOEFL or 525 or above on the paper-based

TOEFL (195 for computer based, 71 for internet based), OR

- A score of 6.0 or above on the International English Language Testing System (IELTS) exam, OR
- A 3.0 (B grade) or above in each two collegelevel English composition courses from an accredited United States college or university. Contact the Office of Admissions to find out what courses are acceptable.
Students who have met all of the above requirements will be admitted unless the number of applicants exceeds available space. In that case, acceptance will be competitive, based on a selection index.

## Previous or Transfer Coursework Policy

Business courses taken to fulfill the requirements for an undergraduate or graduate degree from the CWU College of Business must have been taken within the last 10 years at the time of graduation. Exceptions may be made, but must be approved prior to acceptance into the College of Business by the department chair and dean or designee.

Students wishing to have credits from non-United States institutions considered for transfer into the College of Business for any major or minor must have their transcripts evaluated through outside credential evaluators who are members of the National Association of Credential Evaluation Services (NACES), such as the Foundation for International Services (FIS), the World Education Service (WES), or Educational Perspectives. Students who intend to pursue the CPA may instead decide to use the NABSA (National Association of State Boards of Accountancy) international evaluation services since it is a requirement of the CPA. Credits for current students participating in a CWU study abroad program will be evaluated by the Office of the Registrar.

Equivalent lower-division (100-200 level) courses may be transferred toward meeting the foundation course requirements for any BS degree in the college. Upperdivision (300-400 level) courses may be transferred toward meeting the major requirements only with the approval of the department chair and the college dean (or designee).

## Academic Jeopardy Policy

The College of Business is committed to the success of its students. If a student that has been admitted to the College of Business is deemed to be in academic jeopardy, the College of Business may place restrictions on the student. A student is considered in academic jeopardy for the following reasons:

- On academic warning or probation
- Frequently withdraws from class
- Repeating coursework to be successful
- Has less that a 2.5 (2.499 and below) in any of the required GPAs for graduation.

CWU GPA

- Collegiate GPA (CWU and all transfer coursework combined)
- Major GPA
- Upper-division coursework in the major GPA
- Accounting majors: upper-division Accounting coursework GPA

The College of Business may do the following in response to an Academic Jeopardy situation:

- Limit College of Business coursework in future quarters
- Require academic advising with both faculty and/or professional advisors
- Require academic success plans
- Double majors or double specialization students may be limited to one major plan in the College of Business
If a student is unable to improve academically while receiving intensive advising and support or does not actively participate in required advising, the student may be subjected to the College of Business Separation Policy.

## Separation Policy

If a student that has been admitted to the College of Business is placed on academic warning, probation, suspension, has repeat academic course withdrawals, or academic performance below the necessary grade point averages required to graduate, then the student's admission into the College of Business may be rescinded. Students may also be rescinded for violations of the College of Business Statement of Conduct and Code of Honor, or for engaging in Prohibited Student Conduct as defined by Washington Administrative Code (see WAC 106-125-020). Once rescinded, the student will be denied readmission to the College of Business for one year following which a written petition for readmission must be presented at least 30 days prior to the start of the quarter in which readmission is desired. The decision to readmit will be based on meeting current admission standards, analysis of the entire academic record, as well as any other sources of information deemed appropriate. Readmission is not guaranteed.

## Service to Other Majors

Students majoring in programs outside CB who are required to take courses in this college for either their major or minor will be eligible to enroll on a space-available basis. These students will be given priority over other noncollege majors wishing to enroll in courses. All students must have taken prerequisites for courses prior to enrollment.

## Repeat Policy

Business administration courses may be repeated only once.

## Departments and Programs

Accounting: Kenneth Smith (Shaw-Smyser Hall, room 340)

Economics: Toni Sipic (Shaw-Smyser Hall, room 428)
Finance and SCM: Carlo Smith (Des Moines Center, room 373)

www.cwu.edu/education-professional-studies
The mission of the College of Education and Professional Studies (CEPS) is to prepare competent, enlightened citizens who will enhance their respective professions, commit themselves to socially responsible leadership, and help develop the global economy in a spirit of cooperation. Each academic unit of the college has developed specific goals to address this mission.

Graduates of the College of Education and Professional Studies programs are Professionally Prepared and Profession Ready, or P3R. Graduates enter the job force right after graduation and make an immediate positive impact on their profession.

## School of Education

The School of Education programs at CWU are all about preparing students to enter the greatest profession in the world.... Teaching! Our Education programs approach learning in a supportive and positive environment where students and staff share responsibility for knowledge, and where students and staff value working and learning together. Graduates enter their teaching positions after graduation and make an immediate positive impact on the students they teach.

CEPS facilitates communication between and among the respective disciplines that contribute to the preparation of educators, including teachers, school administrators, and school psychologists. Supporting the mission, purpose, and governance structure of CEPS is the constructivist philosophy-a belief that knowledge is actively created by learners and made meaningful when learners relate new information to prior knowledge.

The School of Education Teacher Preparation Program is administered through CEPS. Admission to the university does not guarantee admission into the School of Education

Teacher Preparation Program. Students must apply to the School of Education Teacher Preparation Program and meet specific application criteria before being admitted. For more information about the Teacher Certification process, link to www.cwu.edu/teacher-certification/.

## Professional Studies

The Professional Studies at Central Washington University strives to deliver innovative applied science and technology programs that develop competent globally responsible citizens who contribute to their respective professions. The vision of Professional Studies at CWU is to be recognized as a premier learning community dedicated to providing relevant and authentic learning experiences.

College of Education and Professional Studies programs value:

- Students
- Excellence in teaching
- A rigorous academic and learning environment
- The preparation of students for successful careers
- Accreditation and industry standards
- Applied research
- Creative, diverse and innovative ideas
- Open, collaborative environments
- Partnerships with external constituents
- The use of current technology
- Professionalism, integrity, and responsible citizenship
- Life balance

For more information about the Departments and Programs, go to the departments listed below.

The Department of Aerospace Students (AFROTC). CWU's Air Force ROTC detachment is designed to recruit, educate and commission officer candidates with a mission of developing quality leaders for the Air Force.

The Department of Aviation is a regional leader in professional aviation education, attracting individuals with a passion for the combined art and science of flight. Established in 1975, it is the only fully accredited public university aviation program in the Pacific Northwest. The Department offers B.S. degrees in Aviation Management and Professional Pilot and has a stellar reputation for preparing students for the demands of the industry.

The Department of Curriculum, Supervision, and Educational Leadership houses the Professional Education Program (PEP), Field Experiences, Instructional Foundations undergraduate degree, and Master Teacher Graduate Program. They also have master level degrees in School Administration, Instructional Leadership and Higher Education.

The Department of Education, Development, Teaching and Learning (EDTL) is committed to ensuring graduates are prepared to be outstanding educational leaders and facilitators of learning who demonstrate the knowledge and
skill necessary to educate and work within a diverse school population. EDTL offers programs for teacher candidates interested in developing educational $\mathrm{pK}-12$ specialties in Bilingual Education/Teaching English as a Second Language; Literacy (reading, writing, speaking, and listening); and Special Education. Each program leads to an endorsement for the Washington State teaching certificate.

The Department of Engineering Technologies, Safety, and Construction Management offers Bachelor of Science degree programs in Construction Management, Safety and Health Management, Mechanical and Electrical Engineering Technologies, and Technology Education. The department also offers a Master's of Science Degree in Engineering Technology.

## The Department of Family and Consumer Sciences

 offers degree programs in: Apparel, Textiles and Merchandising; Business and Marketing Education; Family and Consumer Sciences Education; Family Studies; Global Wine Studies; and Recreation, Tourism and Event Management. The department offers a graduate Master of Science with specializations in Family Studies and Career and Technical Education and is the home of the International Sustainable Development Institute.The Department of Information Technology and Administrative Management (ITAM) offers high demand undergraduate and graduate programs blending technical skills with soft skills in the areas of Administrative Management, Information Technology, Web and Database Management, Retail Management Technology, Network Management, Project Management, and Cybersecurity. Degree programs are offered on campus, hybrid, $100 \%$ online, and self-paced competency based. Find out more: www.cwu.edu/it-management.

The Department of Military Science (AROTC) houses the Army ROTC program at CWU. The mission of the Wildcat Battalion is to recruit, educate, coach, mentor and commission outstanding scholars, athletes and leaders inspired for service in our nation's Army.

The Department of Health Sciences prepares students in a variety of professions that focus on the physical and functional abilities of humans including clinical physiology, exercise science, nutrition and dietetics, public health and paramedicine.

The Department of Physical Education, School Health and Movement Studies. Graduates in this department are prepared to enter careers as physical education and school health teachers. With master level degrees in Health and Physical Education with a specialization in Athletic Administration.

The College of the Sciences (COTS) is comprised of 13 departments and 12 interdisciplinary programs representing disciplines in the behavioral, natural, and social sciences, and mathematics. The departments and programs of the college offer undergraduate baccalaureate degrees, master's degrees, minors that supplement other degree programs, and a comprehensive range of service coursework. As an essential part of its mission, the college offers an extensive general education curriculum. The departments play a major role in Central's Teacher Certification Programs, offering bachelors and master's degrees for students preparing to be secondary teachers and providing coursework in educational foundations and disciplinespecific content and methods.

Departments within the college are committed to teaching excellence, active engagement by faculty in research, scholarship and professional service activities, student involvement in research, community service, and
employing practical applications of academic specializations.

## Departments

All departments offer baccalaureate degree programs and, in some cases, minors, educational specialist degrees and master's degrees. In addition to consulting
department/program headings in this catalog, students are encouraged to contact individual departments and program offices directly.

Anthropology and Museum Studies: Lene Pedersen, PhD, Dean Hall, room 356, 509-963-3211

# School of Education 

College of Education and Professional Studies<br>School of Education<br>Ellensburg<br>Black Hall, room 101<br>www.cwu.edu/programs/school-education

## Executive Director

Ron Jacobson, PhD

## Interim Associate Director

Crystal Weddington

## School of Education General Information

The School of Education is administered through CEPS and the School of Education Executive board. The provost/vice president for academic and student life in collaboration with the CEPS dean appoints faculty to serve on the advisory council, which advises the School of Education Executive board on program policies.

## Admission Requirements

Admission to the university does not guarantee a student admission into the School of Education. Students must be fully admitted to the School of Education in order to enroll in Education-related courses.

The processing of applications takes time. To insure the thorough review of an application, it is required that all application materials for admission to the School of Education be submitted by the following dates: For Ellensburg campus programs-winter, October 1; spring, January 1; summer, April 1; fall, April 1. For university center programs-please contact the university center.
(All application forms are available online at www.cwu.edu/teacher-certification)

1. A 3.0 grade point average (GPA) for at least the last 45 graded quarter credits (the total may exceed 45 if an entire quarter is needed to achieve the minimum 45) or overall CWU/transfer cumulative is required for full admittance into the School of Education. A 2.8 GPA for at least the last 45 graded quarter credits or overall CWU/transfer cumulative will be considered for conditional admittance into the School of Education. A 3.0 GPA for at least the last 45 graded quarter credits or overall CWU/transfer cumulative is required prior to making application to student teaching.
2. Completed APPLICATION FOR ADMISSION TO SCHOOL OF EDUCATION.
3. Completed Character and Fitness supplement. Answering "YES" to any question on the form will require that you meet with the Certification

Officer prior to a decision regarding admission. All court documents should be submitted prior to that meeting. False answers to the questions on the form may result in denial of program admission and/or certification.
4. Official or unofficial transcripts for all college/university coursework must be submitted directly to the School of Education. These transcripts are in addition to transcripts submitted to Registrar Services.
5. Successful completion of ENG 101, ENG 102, and one of either MATH 101, 153, 154, 164,170, or 172 or FIN 174.
6. Submission of the Dispositional Survey. Once you activate your LiveText account, you are automatically sent the Dispositional Survey. It is located in your Forms box in LiveText. Once you complete the survey, click the submit button. Please call 509-963-2660 if you have any questions.

1. Successful completion of the Basic Skills (Reading, Writing, and Math) requirement. Candidates may satisfy this requirement by passing the WEST-B or obtaining certain scores on the SAT and/or ACT. Please see below:

| Subject <br> (Basic Skill) | WEST-B | SAT Score | ACT Score |
| :---: | :---: | :---: | :---: |
| Math | PASS | 515 or higher | 22 or <br> higher |
| Reading | PASS | 500 or higher | 22 or <br> higher |
| Writing | PASS | 490 or higher | 8 or higher |

## WEST-B Test

The WEST-B exam is administered statewide several times each year. Registration information and test dates can be found online at www.west.nesinc.com.

Note: Failure to begin the program within one year from date of acceptance may result in cancellation of admission.

The completed application packet needs to be submitted to the following address by the appropriate deadline date: School of Education, College of Education and Professional Studies, Central Washington University, 400 East University Way, Ellensburg, WA 98926-7414.

Please be aware that:
No grade lower than a $C$ in major or minor, and foundation coursework, will be accepted for certification.

To remain in the program, students must maintain a 3.0 GPA for the last 45 graded quarter credits or overall CWU/transfer cumulative.

Each applicant for admission to the School of Education
will be notified in writing of the status of his or her application.

Completion of the School of Education does not guarantee certification by the state of Washington. In order to be certified, the candidate must demonstrate good moral character and personal fitness as defined by WAC 180-79A-155. Current fingerprint clearance from the Washington State Patrol and FBI will be required prior to application for any practicums, all courses that require any type of field experience or working with P 12th grade children, EFC 330 - Field Experience, and/or EFC 480 - Student Teaching. If you have anything from your past that you think may compromise your certification, please seek advisement from the Certification Officer at 509-963-2660 prior to submitting your application.

School of Education admission regulations are administered by the College of Education and Professional Studies. Personal folders are maintained in the School of Education for each student enrolled in a teaching program at Central.

## Transfer Students

Students entering the university with a transferable associate of arts (AA) degree from an accredited Washington community college will need to meet the admission requirements for the School of Education prior to enrolling in any education courses. These students are frequently surprised to find that, after finishing two years of community college, they have more than two years left to complete an education degree. This is because the AA degree required 90 credits and, when transferred to CWU, satisfies only the Basic and Breadth requirements, which can generally be completed in 60 credits at CWU. Community college students can make good use of the additional 30 credits required by the AA by selecting courses at the community college which may meet major, minor, or, in some cases, courses in the Professional Education Program. Check your community college's equivalency sheet to make certain your courses are equivalent to CWU's courses for these particular requirements.

## National Evaluation Series (NES) Exam

As of July 1, 2014, all teachers wishing to obtain certification must take the NES exam in each content area for which they seek endorsement prior to student teaching. Documentation (i.e., registration confirmation, test scores) that the student has registered for a test date that occurs prior to student teaching must be submitted to the School of Education prior to applying for student teaching. Final certification will not be awarded until successful completion of the NES exam is earned. Test information and registration is online at www.nestest.com.

## Alternative Admissions Procedures to the School of Education

Students who do not have the required grade point average, or who do not pass portions of the WEST-B test may apply
for provisional admission to the School of Education by alternative means.

## PROCEDURE

1. Applications will be made in writing to the Candidate Admissions, Recruitment, and Retention Committee (CARR) in care of the Certification Officer. The deadline for application will be the first Friday of the quarter preceding the quarter admission is desired (fall quarter applicants deadline will be the first Friday of spring quarter.) The written application will include the following:
a. A letter from the applicant's major advisor that supports the following:

- Applicant's academic ability, service experience, growth, commitment, and motivation
- Potential for graduate study (following graduation from the undergraduate program)
- Potential for success in working with diverse groups
- Other criteria appropriate to the applicant's potential as a teacher
- Other extenuating circumstances that may have affected the applicant's grades and test scores
b. One supporting letter from a former employer, supervisor, or other individual knowledgeable of the applicant's experiences in working with young people
c. A personal essay by the applicant that describes his or her educational goals and objectives

2. An interview with the Candidate Admissions, Recruitment, and Retention committee (CARR) may be required.
3. Those admitted will be monitored on a quarterly basis by the CARR committee, and will meet all admission requirements prior to student teaching.
4. Students who have been admitted to the School of Education via the CARR committee will receive personal guidance to facilitate completion of their undergraduate degrees and receipt of their certificates.
5. For further information, contact the Certification Officer at 509-963-2660.

## Graduation/Certification Requirements for the School of Education

- No grade lower than a C in major, minor, and professional education foundation courses
- Minimum GPA of 2.5 in major, minor, and professional education foundation courses
- Minimum GPA of 3.0 for last 45 graded quarter credits (the total may exceed 45 if an entire quarter is needed to achieve the minimum 45) or overall CWU/transfer cumulative.
- Passing scores on the NES and/or WEST-E exam.
- Passing scores on the edTPA.

## Major and Minor Concentrations

The following majors offered at CWU, may lead to
Washington state approved endorsements. Students should contact the departments to request information about major requirements.

Traffic Safety Education Minor

## Certification

Central is in compliance with the Every Student Succeeds Act (ESSA).
CWU is accredited by the Northwest Commission on Colleges and Universities (NWCCU). NWCCU is recognized by the U.S. Department of Education and the Council for Higher Education Accreditation (CHEA) as the regional authority on educational quality and institutional effectiveness of higher education institutions in the sevenstate Northwest region of Alaska, Idaho, Montana, Nevada, Oregon, Utah, and Washington.

CWU's School of Education is approved by the state of Washington's Professional Educators Standards Board and
the Office of Superintendent of Public Instruction to offer programs, which lead to teacher certification. To be awarded Washington certificates, candidates must be at least 18 years of age.

Graduates of the School of Education are legally qualified for certification in states, which are party to the interstate certification compact.

## Residency Certificate

The residency-teaching certificate is normally awarded simultaneously with the bachelor's degree. Individuals who hold, or have held a residency-teaching certificate and are enrolled in a professional certificate program, may have the certificate renewed for an additional two years upon verification the individual is enrolled in a professional certificate program.

## Professional Certificate (Pro Teach Program)

The Pro Teach Portfolio is an evidence-based assessment designed for teachers seeking the Washington professional certificate. Teachers who hold a residency certificate must meet the passing score set on the Pro Teach Portfolio (determined by the Professional Educators Standards Board) in order to earn their professional certificate. The Pro Teach Portfolio evaluates teachers on their ability to impact student learning as stated in the 3 standards-effective teaching, professional development and professional contributions-- and 12 criteria for the professional certificate approved by the Professional Educator Standards Board (PESB). Visit www.waproteach.org/index.html for more information.

To maintain the continuing (professional) certificate, each person must complete 150 clock hours of approved inservice education and/or 15 college or university credits every five years.

## Endorsement-only Program

CWU's endorsement-only program is available to certified teachers who hold the Washington State initial, residency, or continuing teaching certificate and who wish to add a teaching endorsement to their certificate. Teachers interested in obtaining an endorsement from CWU should obtain an application online at www.cwu.edu/teacher-certification/endorsement-programs. Once an application and transcripts are submitted, a credit evaluation will be completed.

To qualify for an endorsement to teach in more than one specialization, students must meet the requirements for each specialization.

## Certification Only

Candidates with a bachelor's degree who desire certification must follow the guidelines for admission to the School of Education. Certification-only students may earn the residency-teaching certificate by satisfactorily completing the professional foundation courses and at least one college endorsement program. Final approval of the college endorsement program lies with the individual's content area.

## Alternative Pathway to Teaching Program

## General Information

Washington has a shortage of teachers in the areas of special education, English language learners, mathematics, and the sciences. While the need for these teachers is widespread across the state, some districts have difficulty recruiting and retaining high-quality teachers. Merely preparing more teachers is not the answer to meet current demands. The solution is to address teacher placement and retention.

The online APT program is inquiry-based. Throughout the year, you will complete and implement pieces of evidence for an online portfolio using case studies, chat rooms, and discussion boards. A co-teaching model is used for your internship. You will begin your internship supporting the classroom teacher, and as your skills build, the roles gradually reserve. You will complete a series of transitions that conclude with the submission of a portfolio and passing the teacher performance assessment (edTPA).

You begin the program with a ten-day intensive "boot camp" held on the main CWU campus in Ellensburg. This "boot camp" occurs the first two full weeks after the Fourth of July every year and is taught by university faculty from across the CWU Education Departments. Featured seminars include orientation to teaching, classroom management, exceptional learners, lesson planning, assessment, culturally relevant teaching practices, and English Language learners, to name a few.

After the boot camp, you complete a mentored internship in a school close to where you live. This mentored internship progresses so that you assume more and more responsibility for lead instruction and culminates in six weeks of student teaching. You proceed through the mentored internship at your own pace, completing a minimum of 720 field experience hours (combined observation and teaching), in your endorsement area(s). Most teacher candidates spend a full year in their internship, dedicating the first quarter to observation, the second quarter to guided instruction or teaching a short lesson segment, the third quarter to teaching one class or prep, and spending the fourth quarter student teaching full time. This progression is flexible and is developed in concert with a university field supervisor and your mentor teacher.

During the internship, you complete online course work designed to supplement the learning that occurs during your school day. You will be asked to complete focused observations, write reflections, read case studies around various education topics, write your own case study, conduct video conferences with peers in your cohort, and more generally, critically reflect on your process of learning to teach.

A capstone of the program is the successful completion of the edTPA, a statewide requirement for certification. Modeled after the National Board Examination, the edTPA asks you to prepare a learning segment, videotape your teaching of that segment, and then reflect on your teaching practice.

## Credits and Course Work

Completion of the program will confer twenty-four (24) quarter credits.

Summer
ECTL 470: Teaching Seminar (3 cr)
ECTL 480: Curriculum Planning ( 3 cr )
Fall ECTL 490: Internship (6 cr)
Winter ECTL 490: Internship ( 6 cr )
Spring ECTL 490: Internship ( 6 cr )

## Choosing your Internship Route

CWU's APT program offers three internship routes in order to accommodate diverse levels of education and experience. Candidates in each of these three internship routes must already hold a bachelor's degree from a regionally-accredited university.

## Route 2:

- As an applicant, you currently work as an instructional aide or paraprofessional. In this route, you remain employed by your school district in your IA or Parapro role but gradually assume more and more responsibility for lead instruction. You and the lead teacher adopt more co-teaching roles. Route 2 applicants are advised to consult with their school district before applying.

## Route 3:

- As an applicant, you are a mid-career professional or someone who has decided to change his/her career. You work alongside a mentor teacher in an unpaid internship and are placed into your internship after receipt of your application materials, and prior to the start of the summer "boot camp". It is recommended that Route 3 applicants indicate school district placement preferences upon application to the program. It is also recommended that Route 3 applicants spend some time in the year prior to entering the program observing one or more teachers in a potential placement district.

## Route 4:

- As an applicant, you have been hired on a contractual basis with a school district to teach as the teacher of record in an area of need. Your district has extended a conditional or emergency license (also termed a limited teaching certificate) to you, and you have a window of time to earn your initial teaching residency license. As an APT candidate, you are assigned a mentor teacher who works with you, but not alongside you, as you have your own classroom of students. More information about the contracted conditional and emergency license types is provided here: http://www.k12.wa.us/certification/teacher/l imited.aspx\#contracted. It is recommended that Route 4 applicants consult with their school district before applying.

## Admission Requirements

- Applicants must complete a bachelor's degree from a regionally accredited institution prior to enrollment in the CWU-Alternative Pathways to Teaching-Online Program. Degrees attained from foreign institutions must be translated and evaluated for U.S. equivalency by an accredited agency.
- Attained a cumulative GPA of 2.50 or higher from all college coursework.
- Complete the application to the Alternative Pathways to Teaching-Online Program.
- Complete a post-baccalaureate application to Central Washington University.
- Submit official transcript(s) from ALL previous colleges or universities attended. All transcripts must be sent directly from the school to CWU Admissions Office.
- Submit a resume.
- Submit two letters of recommendation.
- Submit passing scores from the Washington Educator Skills Test - Basic (WEST-B). Candidates may also satisfy this requirement if they have scored high enough on the SAT or ACT. Please see the chart below:

| Subject <br> (Basic Skill) | WEST-B | SAT Score | ACT Score |
| :---: | :---: | :---: | :---: |
| Math | PASS | 515 or higher | 22 or <br> higher |
| Reading | PASS | 500 or higher | 22 or <br> higher |
| Writing | PASS | 490 or higher | 8 or higher |

- Complete an interview. You will be contacted by the Alternative Pathways to Teaching-Online Program Manager to schedule an interview time.
- Submit a passing score on the WEST-E and/or NES exam in your content area. (Information on the exam can be found online at www.nestest.com).
- Submit a completed Character and Fitness Form. If you have any yes answers on the form, you must contact the CWU Certification Office at 509-963-2660 to schedule an appointment to discuss the yes answer(s).
- Have current WSP and FBI fingerprint clearance (verified through the OSPI Fingerprint Database by the CWU School of Education).

Please contact the APT Program Manager at 509-963-2433 or Jesslyn.Hollar@cwu.edu if you have any questions.

## Recency of Coursework

Education courses may not be older than 10 years at the time of graduation/ certification.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/programs/schooleducation or by contacting the department directly.

# Office of Continuing Education 

The Office of Continuing Education provides lifelong learning opportunities in support of the university mission. The unit offers a variety of credit, non-credit, training, and enrichment courses and programs.

Please NOTE:

- All Continuing Education courses, certificates, degrees, and services are offered on a self-support basis, and may be canceled if adequate enrollment is not reached.
- Waivers for veterans, university staff, senior citizens, and others do not apply. However, student financial aid can be applied to credit courses.
- Full fee-paying students must make additional payments at the rate established for each continuing education course in which they enroll.
- Tuition for some Continuing Education courses is higher than regular CWU tuition. Additional course fees may also apply.

Please visit us on the Web at www.cwu.edu/ce or call 509-963-1504 for complete information on the following programs:

## ACADEMIC PROGRAMS

## Craft Brewing Certificate

Are you a homebrewer? Or looking for a career change into the exciting world of the craft brewing industry? The Craft Brewing Certificate is a year-long, 16 -credit interdisciplinary program that provides an overview of biochemistry, microbiology, technology, and business aspects of the craft brewing industry. Offered in partnership with the College of the Sciences, this program spans three quarters ( 30 weeks), meets every other weeknight evening, and is designed to be challenging and interactive. Students learn about all aspects of the brewing industry from production, distribution, marketing and operation of a brewery by using a variety of approaches including lab work, hands on experience, lectures, field trips, and industry speakers. Graduates of the certificate have gone on to work in all aspects of the craft brewing world - from masterbrewers to marketing professionals to opening their very own breweries. The Certificate program is designed to aid students who have a passion for brewing to become skilled brewers, entrepreneurs and seasoned professionals while responding to an industry that is growing like never before.

For more information, please visit www.cwu.edu/ce or email craftbrewing@cwu.edu.

## UNIV 304 and GIVE International Excursions

Through cultural immersion and experiential learning in an international setting, students will engage in activities designed to broaden their perspectives on sustainable development while providing opportunities for personal growth. Students will apply critical thinking skills, field observations, and reflective processing to explore and reveal the contextual impacts and opportunities associated with international sustainable development projects.

Content is delivered via a hybrid course that has an online component and an international immersion component through partnership with GIVE Excursions. A pin number for accessing the online course will be provided once the student is registered. The course begins prior to departure and concludes after your return.

For more information, please visit CE Collaborations at www.cwu.edu/ce.

## CAREER TRAINING AND DEVELOPMENT

## Online Certificates - Non-credit

Are you looking to start a new career or gain skills to advance in your current one? The Office of Continuing Education, in partnership with ed2go, offers online, open enrollment courses and programs designed to provide the skills necessary to acquire professional level positions for many in-demand occupations.

You can start these career training programs anytime and work at a pace that suits your individual style. You will have access to all the lessons and assignments from day one, and many of these programs can be completed in less than six months. Instructors are actively involved in your online learning experience. They respond to questions and concerns, as well as encourage and motivate you to succeed. Upon completing your program with a passing score, you will get a certificate of completion.

Please NOTE: Many of these programs are approved by the Workforce Training Board and are eligible to receive funding from the Workforce Investment Act (WIA). For a list of approved courses, visit the Washington Career Bridge website at www.careerbridge.wa.gov and search the Eligible Training Provider List for online programs at Central Washington University, Ellensburg.

For a full list of our current offerings, please visit Career and Professional at www.cwu.edu/ce.

## Online Courses - Non-credit

Looking to get ahead in your career? These six-week, online, professional development courses are the perfect way to learn a new skill or enhance your existing ones. You will spend roughly two to four hours each week completing two engaging lessons in an enjoyable, interactive learning environment. Expert instructors develop and lead every course, and you will be able to interact with them and with fellow students in lively online discussion areas. New sessions start every month, so you can sign up
anytime. Upon completing a course with a passing score, you will receive a certificate of completion.

For a full list of our current offerings, please visit Career and Professional at www.cwu.edu/ce.

## Seminars and Workshops - Non-credit

These face to face courses are available each quarter and are designed to enhance and strengthen your business operations or your personal career development. Upon completion of each seminar or workshop, continuing education units (CEU's) will be issued. Course topics are timely, taught by experienced instructors, and offer professionals and businesses convenient, affordable options for training. Course topics include Microsoft Excel, Leading across generational differences, Social media strategy, and more.

For a full list of our current offerings, please visit Career and Professional at www.cwu.edu/ce.

## PROGRAMS FOR EDUCATORS

## Alternate Pathways to Teaching Program

Washington has a shortage of teachers in the areas of special education, English language learners, mathematics, and the sciences. While the need for these teachers is widespread across the state, some districts have difficulty recruiting and retaining high-quality teachers. Merely preparing more teachers is not the answer to meet current demands. The solution is to address teacher placement and retention.

The online APT program is inquiry-based. Throughout the year, you will complete and implement pieces of evidence for an online portfolio using case studies, chat rooms, and discussion boards. A co-teaching model is used for your internship. You will begin your internship supporting the classroom teacher, and as your skills build, the roles gradually reserve. You will complete a series of transitions that conclude with the submission of a portfolio and passing the teacher performance assessment (edTPA).

You begin the program with a ten-day intensive "boot camp" held on the main CWU campus in Ellensburg. This "boot camp" occurs the first two full weeks after the Fourth of July every year and is taught by university faculty from across the CWU Education Departments. Featured seminars include orientation to teaching, classroom management, exceptional learners, lesson planning, assessment, culturally relevant teaching practices, and English Language learners, to name a few.

After the boot camp, you complete a mentored internship in a school close to where you live. This mentored internship progresses so that you assume more and more responsibility for lead instruction and culminates in six weeks of student teaching. You proceed through the mentored internship at your own pace, completing a minimum of 720 field experience hours (combined observation and teaching), in your endorsement area(s).

Most teacher candidates spend a full year in their internship, dedicating the first quarter to observation, the second quarter to guided instruction or teaching a short lesson segment, the third quarter to teaching one class or prep, and spending the fourth quarter student teaching full time. This progression is flexible and is developed in concert with a university field supervisor and your mentor teacher.

During the internship, you complete online course work designed to supplement the learning that occurs during your school day. You will be asked to complete focused observations, write reflections, read case studies around various education topics, write your own case study, conduct video conferences with peers in your cohort, and more generally, critically reflect on your process of learning to teach.

A capstone of the program is the successful completion of the edTPA, a statewide requirement for certification. Modeled after the National Board Examination, the edTPA asks you to prepare a learning segment, videotape your teaching of that segment, and then reflect on your teaching practice.

For more information, please visit School of Education or Career and Professional at www.cwu.edu/ce.

## Online Courses - Non-credit

Numerous professional development classes are available year round through online learning in partnership with VESi (Virtual Education Software). Course topics are timely, taught by experienced instructors, and offer PK-12 teachers convenient, affordable options for professional development (500) credit or clock hours. Course topics include classroom management, special education, bilingual education, health and safety management, teaching strategies, technology in schools, and more.

For a full list of our current offerings, please visit Career and Professional at www.cwu.edu/ce.

## Seminars and Workshops - Non-credit

Professional development classes are available each quarter through in-service and distance learning. Course topics are timely, taught by experienced instructors, and offer PK-12 teachers convenient, affordable options for professional development (500) credit or clock hours. Course topics include classroom management, special education, bilingual education, health and safety management, teaching strategies, technology in schools, and more.

For a full list of our current offerings, please visit Career and Professional at www.cwu.edu/ce.

## LIFE AND LEISURE

## Courses - Non-credit

These fun, open to the public offerings range from recreational activities like fly fishing and hiking to beer tastings and bus trips to local wineries and breweries. Categories of classes include Outdoor Recreation and

Fitness; Bus Tours and Day Trips; Food, Wine, and Beer; and Art, Culture, and History.

For a full list of our current offerings, please visit Lifelong Learning at www.cwu.edu/ce.

## Online Learning

The Office of Multimodal Learning seeks to assure that Central Washington University maintains the highest standards of excellence in online learning and is recognized regionally and nationally for offering outstanding online programs that provide increased access of educational opportunities to diverse, place-bound, traditional, and nontraditional students.

Online offerings at CWU are meant to:

- provide more flexible access to content and instruction for learners who are unable to attend traditional face-to-face offerings
- provide greater educational course and program selection for students
- improve time-to-degree completion by offering students greater course scheduling flexibility
More information about online learning at CWU is available on the web at: www.cwu.edu/online-learning.

## ONLINE LEARNING POLICIES

## Admission

Students interested in entering an online program may submit an application at www.cwu.edu/admissions. Once admitted to the university, students must also apply for their online major.

## Registration

Continuing students follow the same procedures as noted in the registration part of this catalog. Students may register via MyCWU, phone, or in person during their assigned enrollment appointment. Non-matriculated students may register for classes on a space-available basis during open enrollment.

## Advising

Online students are encouraged to visit the Online Student Resource Center webpage at www.cwu.edu/student-achievement/online-student-resource-center to explore all the advising resources and services available. General transfer advising is available by e-mailing onlineadvisor@cwu.edu and specific program advising is available by contacting your faculty advisor. A list of advisors for the online programs is available on the web at: www.cwu.edu/online-learning/online-programs-list. Final official transcripts must be received for articulation of all transfer courses.

Tuition
See current tuition rates and fees or refer to the Registrar Services home page at www.cwu.edu/registrar. Continuing

Education courses are offered on a self-support basis. The self-support tuition schedule is separate from full-time tuition and fees. Visit the Continuing Education web site at www.cwu.edu/ce. Tuition and fees are subject to change.

## Student Services

Questions regarding services that accommodate physicaland learning-disabled students can be directed towards Disability Services at DS@cwu.edu. CWU also offers career counseling through our Career Services office. They can be contacted by e-mailing career@cwu.edu. Tutoring is available for some subjects, including math and writing. Students can e-mail onlinetutoring@cwu.edu for additional information.

Financial Aid
Students enrolled in an online program are eligible to apply for financial aid. You can apply online at www.fafsa.ed.gov.

For more information about financial aid, visit www.cwu.edu/financial-aid. All students must submit the Free Application for Federal Student Aid (FAFSA) to begin the process.

## Veterans

Information on veterans benefits is available through the Veterans Center on the Ellensburg campus by calling 509-963-3028 or by e-mailing va@cwu.edu.

## Library

Access to library services is available to students enrolled in the online programs through the CWU Brooks Library, which is available by logging on to www.lib.cwu.edu. Assistance in acquiring reference materials may also be obtained by calling 800-290-3327. On-site library resource centers are also located at CWU- Ellensburg, CWU-Des Moines, and CWU-Lynnwood.

## Textbooks

Textbooks may be purchased through the Wildcat Shop at wildcatshop.net/.

Final Exam Schedule
Online Learning final exam dates can be different from the Ellensburg or Center campus schedule. Please review your syllabus and confirm with your instructor for the appropriate date and, if applicable, time.

## Qualifying States Disclaimer

Central Washington University has authorization to deliver online degree programs to out-of-state students. Please check www.cwu.edu/online-learning/out-of-statestudents for a list of authorized states. If you reside in a state not listed, you are ineligible at this time for admission into an online degree program offered at CWU.

## High School Partnerships

## College in the High School/Cornerstone

Central Washington University's College in the High School/Cornerstone program is a cooperative partnership between school districts across the state of Washington and CWU. The program allows high school students to take CWU courses from their approved high school instructors without leaving their high school campus. Students benefit from the academic challenges of college course work and find that the experience helps to clarify their educational goals. The College in the High School/Cornerstone program can also help ease with the transition from high school to college, and provide students with a unique opportunity to take on more academic responsibility.

Courses are taught by high school teachers who have been approved as non-tenure track faculty by the appropriate CWU academic departments. High school teachers work closely with CWU faculty liaisons to ensure that the materials taught in the high school are equivalent to a course taught on the university campus. CWU faculty liaisons provide high school teachers with syllabus development, curriculum, and the necessary support to help assure that the College in the High School/Cornerstone students are experiencing the same academic rigor as those who are taking classes on any CWU campus. The College in the High School and Cornerstone programs act the same in obtaining college credit but there are some key differences financially.

College in the High School courses are paid for by the State of Washington. The Office of Superintendent of Public Instruction (OSPI) provides funding for those schools that have applied and qualified. This state funding is only available for 11th and 12th grade students in schools that have been awarded the subsidy.

Cornerstone courses are privately paid, whether that be the student/family, the school district, or an outside
organization. Students are able to take Cornerstone courses at the same time as College in the High School courses, although students are only allowed to take 15 credits per grading term through both Cornerstone and College in the High School. Students who are in the 10th, 11th, and 12th grades are eligible under Cornerstone.

Students interested in participating in College in the High School/Cornerstone should speak with their high school counselor or administrator to find out what CWU classes are available at their school.

For more information, visit us at www.cwu.edu/runningstart/students or call 509-963-1351.

## Running Start

Central Washington University welcomes eligible high school juniors and seniors to participate in the Running Start program at Ellensburg and Sammamish. Students enrolled in the Running Start program are able to take college courses tuition-free during the fall, winter, and spring quarters. Public, home, and private school students are all encouraged to apply.

The credits earned from these courses apply to Central Washington University general education and major requirements and are generally transferable to other colleges and universities, while also satisfying high school requirements. Students may enroll simultaneously in high school and college courses, or exclusively in college courses. Participating in the Running Start program allows Running Start students the opportunity to take a wide range of courses from CWU faculty and gain the experience of a traditional college student while also enjoying the support of their family, high school, and local community.

## Admission Requirements:

- Applicants with a 3.4 cumulative GPA or higher will automatically be admitted.
- Applicants with a 3.00-3.39 cumulative GPA will be considered for admission based on grades AND test scores.
- Applicants with a 2.00-2.99 cumulative GPA will be considered through CWU's Running Start Admission Review Process. In this process, we consider grade trends, course rigor, and test scores.
- Homeschool students are evaluated on an individual basis and must submit both homeschool transcripts and appropriate test scores.
- To be considered for admission, students must have at least a 2.00 cumulative GPA in high school and any applicable college work.
- CWU does not require an essay at the time of application. If during the review process we feel additional information will be helpful, we will request it.

## Placement Testing

In order to register for a particular class, students must meet the eligibility requirements as stated in the CWU Course Catalog. Requirements usually vary between classes, but two common requirements are either successfully passing previous course work and/or placement testing. Appropriate test scores include Smarter Balance, Accuplacer, ACT, SAT, and ALEKS. Please see the CWU College Catalog for a full listing of appropriate placement tests and scores.

CWU offers students the option to take the ACT Residual and Accuplacer English and Math Placement tests at the Ellensburg campus. Accuplacer testing is available at the Sammamish campus. Students who are unable to schedule testing at a CWU location are welcome to submit test scores from other colleges.

- ACT Residual is an on-campus ACT test available to students who are unable to test during the national test dates. ACT Residual is intended for students who are applying to CWU and the scores are only reported to CWU for admission, course placement, and advising purposes. Students taking the ACT Residual will not be able to send their results to other colleges. The ACT Residual is offered once a month in Ellensburg.
- Accuplacer is a computer-based test designed to assist accurate placement into appropriate courses for Math and English. Accuplacer offers tests in reading, writing, and math. You will receive your test results immediately upon completion of testing, and your score report will include placement messages informing you what courses you should take.
- Students in the Ellensburg area should check for available dates using the "Schedule a Test" link on the testing website (www.cwu.edu/testing).
- Students in the Sammamish area should contact CWU Sammamish at 509-963-3690 to schedule the Accuplacer test.
- The Running Start office can pay for testing at CWU if a student meets criteria for the Running Start Book Loan and Testing Fee Waiver program. Please see below for details. If you qualify for this program, you need to submit your application to the Running Start office before scheduling your test.
Please note that CWU does not use ACT, SAT, or Smarter Balance test scores for placement into pre-calculus or calculus math courses. Students wanting to enroll in Math 153 (Pre-Calculus I) will need one of the following: one year of high school calculus with a grade of B or higher, or an Accuplacer College Math score of 35 or higher, or ALEKS score of $51 \%$ or higher.

## Advising and Registration

Each quarter (fall, winter, and spring), Running Start students will be able to register online after attending an advising appointment with the Running Start advisor. Students should review the quarterly calendar to determine when their registration assignment and the quarterly schedule will be available. Registration assignments are not advising appointments. They are the earliest day that registration will open for a particular student.

Once a student has determined when they will be able to register, they should view the quarterly schedule and plan which courses they want to take. Because registration is based on seniority, some courses may no longer be available by the time a particular student can register. Therefore, students should plan 2 to 3 different schedules that will work for their high school requirements and college goals.

After choosing possible schedules, students should schedule an appointment to meet with their high school counselor to review high school requirements and fill out the Running Start Enrollment Verification Form (RSEVF). This form is due each quarter. Students will not be permitted to register until a signed and completed RSEVF is turned in to the Running Start office. The high school has the final word on which CWU courses will fulfill high school graduation requirements. (Homeschool students are not required to complete state high school graduation requirements. They are, however, required to complete the RSEVF each quarter prior to enrolling.)

Students are welcome to schedule an appointment for advising any time between the beginning of advising and the last day of registration. Students should, however, meet with their high school counselor and fill out the RSEVF before attending a Running Start advising appointment. At the advising appointment, the student and advisor will discuss course selections, how these fit into the student's academic goals at CWU or other institutions, and review the student's academic progress.

The Running Start advisor is also available to meet with students to discuss applying to CWU and other institutions, academic degree planning, referrals to other resources on campus, help with selecting a major, scholarship resources, and navigating college life. Once the student meets with the Running Start advisor, they will be released to register and will be able to register for their courses online through their MyCWU account during their assigned enrollment period.

Students will be notified about advising, registration, and other important dates via their CWU email accounts. Students are expected to check their CWU email on a regular basis (daily) so that they do not miss important information from the Running Start office, other services on campus, and their instructors. Students who are unsure of how to access their email or MyCWU account are welcome to stop by the Running Start office in Ellensburg (Hebeler 122) or Sammamish (main office) for assistance.

Please keep in mind that Running Start funding is only available for the fall, winter, and spring quarters. Students wishing to enroll in summer courses at CWU must obtain permission from the Registrar's Office and pay full tuition.

## Benefits and Challenges

There are a number of benefits afforded to students who participate in the Running Start program, but students can also encounter some challenges. As you make the important decision about applying to the Running Start program, please keep the following in mind.

## Benefits:

- Students have the opportunity to take courses that may not be offered at their local high schools.
- Academically prepared students have an opportunity to take college level courses.
- Students have an opportunity to experience university education while in high school. This experience may be helpful in making the transition from home to college, self-assessing college readiness skills, and in informing future education plans.
- Students can earn up to two years of tuition-free college credit during the fall, winter, and spring quarters, saving many dollars in college education.
- It is not uncommon for students who have strong college readiness skills, yet have difficulty fitting-in the traditional high school setting, to flourish in a different educational setting such as college.
- In college, high school students have the opportunity to gain academic and career maturity and knowledge from participating within the challenge of a college setting and with other college students.
- Running Start students are eligible to take part in college activities, with the exception of intercollegiate athletics.
- Students can get a "Running Start" on completing a college degree including general education requirements and prerequisites to a college major.
- Students may still participate in any high school extracurricular activity, if time permits and consistent with Washington Interscholastic Athletic Association (WIAA) rules of eligibility.
- Students who have transferred between high schools and have incurred credit difficulties may find that Running Start can help them meet graduation requirements on time.
- Financially, this is the best scholarship a student can earn. Consider the worth of each college class completed.
- First time freshmen with CWU enrollment prior to high school graduation through CWU Cornerstone, CWU College in the High School, or Running Start at CWU will be given a $\$ 500$ tuition award, provided they have earned a 3.00
cumulative GPA or higher in their CWU courses. Note: Students must be admitted by February 1 and submit a FAFSA for their freshman year to receive the tuition waiver.

## Challenges:

- Some students who are academically qualified may not be ready socially or emotionally for the college environment. They may find the independence and speed of college classes overwhelming. Maturity is one of the key ingredients needed for success in Running Start.
- High schools provide a social network and social development experiences for teenagers. This network is not as readily available at the college level as it is in the high schools. However, Running Start students may participate in student activities at the college, such as clubs.
- Students are not guaranteed space in preferred college classes, and college schedules may conflict with high school classes or extracurricular activities (sports, drama, music, etc).
- CWU operates on a quarter system, which may be different from the high school academic calendar. Holidays and vacation periods are frequently different. Students are expected to attend classes at the university even though their high schools may not be in session. Careful planning must occur in order to avoid conflicts in family and school activities.
- College courses move at a much faster pace than high school courses. A class that may take a semester or year at the high school will be completed in ten weeks at the university.
- The high school is the final authority on high school graduation requirements. It is important to work closely with a high school counselor to insure graduation requirements will be met. Some schools may not allow students to participate in graduation ceremonies if their college classes are not completed by the date of graduation. Check with the high school for their policies.
- Students and their families are responsible for tuition costs above 1.2 combined high school and college FTE. For a student taking a full load at the college ( 15 credits) he/she might be eligible to be in only one class in their high school. It is the student and family responsibility to understand these limitations and carefully plan his/her educational program.
- College classes are designed for adult learners. Contemporary issues of our society will be actively discussed in our classrooms. The content of classes will not be censored for younger students.
- The high school determines students' eligibility to be involved in high school activities. Being away from the high school might mean that students are out of the loop for some things, such as
activity requirements or scholarship application deadlines.
- The program is not free. Tuition is covered up to 1.2 combined high school and college FTE over fall, winter, and spring quarters. Students must pay for mandatory college fees, books, online course fees, campus parking, gas, supplies, and other related costs. Students wishing to enroll in summer courses must receive permission from the Registrar's Office and pay full tuition.
- Students start a college transcript when they take their first college class. It will stay with them throughout their college careers. If students perform poorly, it may jeopardize future college plans. These grades will transfer back to the high school transcript as well.
- There is much less contact between colleges and parents than the high schools and parents.
- College offers a much less structured environment with more independent study required. The speed at which college classes are taught is much faster than classes in high school. College classes typically demand approximately 2 hours of homework for each hour of class, with no classroom time for homework.
- Communication concerning grades and attendance is more frequent in high schools.

## Tuition, Fees, and Other Costs

- Students may take up to 15 tuition-free credits per quarter (fall, winter, and spring).
- The number of tuition-free credits a student is eligible for depends on how many classes the student takes at the public high school.
- Students may enroll in additional credits, but are required to pay the remaining tuition.
- Students are responsible for technology and course fees. Course fees range depending on what course the student enrolls in. A listing of course fees is available here: www.cwu.edu/registrar/courses-additional-fees.
- Students are responsible for paying for testing, textbooks, transportation, and other supplies.

## Testing Fee Waiver and Book Loan Program

The Running Start office can waive testing fees and provide loaned books to eligible low-income students on a first-come, first-served basis. Students are required to return loaned textbooks to the Running Start office at the end of each quarter. The Running Start program will do its best to help students with at least one textbook a quarter. However, books are not guaranteed due to limited funding and textbook availability. Books that cannot be reused are not purchased.

Running Start students must meet one of the following criteria to qualify:

- Family receives public assistance (example: SSI, TANF, Basic Food/QUEST, Washington State medical coupons).
- Student is eligible to receive free or reduced lunch at their school district, or has been eligible within the last five years.
- Student is a foster youth.
- Student's primary caregiver is currently receiving unemployment

For more information, visit us at www.cwu.edu/runningstart/new-students or call 509-9631351.

## Degrees Offered (Majors, Minors, Certificates)

Accessibility Studies Certificate

Accessibility Studies Minor
Accounting Certificate
Accounting Major, BS
Accounting Minor
Actuarial Science Major, BS
Administrative Management Minor or Certificate
Adventure Leadership Minor
Advertising Minor
Aerospace Studies Minor
Africana and Black Studies Minor
American Indian Studies Minor
American Sign Language Minor

Lisa Woods, secretary

## Department Information

We help our students learn foundation knowledge and skills in accounting and business that will aid them in private, government, or non-profit careers or prepare them for additional education for public accounting careers.

The Department of Accounting will allow non-matriculated students in their classes under the following conditions:

Post-baccalaureate students who have a business degree from an AACSB-accredited program in the United States, or

Current students who are enrolled at another AACSB-accredited program in the United States.

These requests will be addressed on a space-available basis and will need the permission of the Accounting Chair. If you meet either of the above criteria, please e-mail the Accounting classes
you desire (including the course location: Ellensburg, Lynnwood, or Des Moines) and an unofficial transcript to the Chair of the Department of Accounting. The Chair will then prepare the necessary paperwork for admission into the course.

## Graduation Requirements

To graduate with an accounting degree, the department requires a cumulative grade-point average of at least 2.0 for in-the-major upper-division accounting courses completed at CWU, in addition to the university grade-point average requirements that apply to all CWU major programs. Accounting majors cannot earn a business minor.

Upper-division (300-400 level) courses may be transferred toward meeting the major requirements only with the approval of the department chair and the college dean (or designee). Transfer students must earn at least 45 credits at CWU. Transfer students and post-baccalaureate students must complete at least 20 CWU in-the-major upper-division accounting credits to be eligible for the accounting degree. In addition to the 20 CWU in-the-major upper-division credits, transfer students and postbaccalaureate students must complete an additional 17 CWU in-the-major accounting major required course or elective credits to be eligible for the accounting degree. Lower-division (100-200 level) accounting or business courses cannot be transferred to meet upper-division (300-400 level) course requirements. No accounting courses are offered for challenge by examination. CWU students who desire to study abroad must have the department chair and dean pre-approve credits transferred back to the College of Business using the Credit Transfer Agreement.

The B.S. in Accounting is designed for students who will begin their career with business, government or not-for-profit organizations. Graduates with the B.S. and appropriate electives are prepared to sit for professional exams such as Certified Management Accounting (CMA), Certified Internal Auditor (CIA), Certified Fraud Examiner (CFE) and Certified Government Financial Manager (CGFM). Students should consult with their major advisor for details.

NOTE: The B.S. degree is NOT sufficient by itself to enable students to pursue the CPA (Certified Public Accountant) license, see below on our Graduate Certificates.

Students wishing to begin their career with a professional accounting firm and pursuing their CPA (Certified Public Accountant) license, need to obtain the equivalent of a "5th year" of coursework. We recommend CPA-seeking students complete one or both of our Graduate Certificates to get the 225 total credits needed to sit for the CPA exam:

1) Our 18-credit Professional Accounting Graduate Certificate covers advanced skills and content material that is tested on the CPA exam.
2) Our 17-credit Professional Tax Practice Certificate covers advanced skills and content that is tested on the Enrolled Agent (EA) Exam, which allows EA's to legally represent their clients
before the IRS (the only others who may do so are licensed CPA's and Lawyers.)

Central accounting students who are up to 180 days prior to obtaining a degree and at least 225 quarter credits are eligible to sit for the Uniform Certified Public Accountant (CPA) examination. Washington law requires individuals wishing to sit for the CPA examination to have completed a minimum of 36 quarter credits of study in accounting and a minimum of 36 quarter credits in related business courses. (See WAC 4-30-060 for educational requirements). Registration for the examination is made through the State Board of Accountancy, Olympia, Washington www.cpaboard.wa.gov/.

Students seeking the CPA license are encouraged to check annually with the State Board as the rules and procedures may change.

## College of Business Admission Requirements

## Accounting Certificate

The accounting certificate provides students with an introduction to several key areas of accounting. Accounting certificates are available to all students. Declaration forms with instructions are available online and, in department and center
offices. The accounting certificate requires that the student take five accounting courses and earn a cumulative grade point average of 2.00 in them.

Required Courses Credits: 15

- ACCT 251 - Financial Accounting Credits: (5)
- ACCT 252 - Managerial Accounting Credits: (5)
- ACCT 350 - Intermediate Accounting I Credits: (5)

Department-Approved Electives Credits: 10

Choose any two five-credit courses from the ACCT upperdivision prefix excluding ACCT 301, ACCT 303, ACCT 490, ACCT 492, and ACCT 493.

Total Credits: 25

## Professional Tax Minor or Certificate

The Professional Tax Certificate/Minor provides students with the skills, knowledge, professional orientation and credit hours required to become an Enrolled Agent. Enrolled Agents (EA) are one of just three types of professionals (along with CPA's and attorneys) who have unlimited practice rights to represent any taxpayer before the IRS (Internal Revenue Service) on any tax matters and at any IRS office/location.

Among the requirements to become an Enrolled Agent, the candidate must pass a three-part professional examination called SEE: Special Enrollment Examination. The three courses in the Professional Tax Certificate/Minor cover the material within the SEE exam as well as other professional training and skills needed to succeed in tax careers.

While this program will not be designed to teach only to the SEE exam, it will help better prepare those who are interested and capable in succeeding on it.

The program has 3 core courses plus a practicum:
ACCT 441-Advanced Tax 1: Individuals, ACCT 442-Advanced Tax 2: Corporations and other entities, ACCT 443-Advanced Tax 3: Practice and Procedure and the 2-credit Practicum can be satisfied with: (i) ACCT 492-Volunteer Income Tax Assistance or (ii) ACCT 490-Internship or (iii) prior work experience.

Additionally, the program is designed to further develop Taxoriented students with computer, research, communications, critical thinking, and time (project) management skills. Such skill development will be integrated across the curriculum.

NOTE: CWU also offers a Graduate Professional Tax Certificate. Please meet with your advisor to determine the best program for your career needs.

## Admission Requirements

- Completion of one foundation tax course (equivalent to ACCT 303 or ACCT 340) with a minimum grade of C
- Evidence of English language proficiency for ESL students
- Computer-based TOEFL minimum score of 213, or
- Internet-based TOEFL minimum score of 79 , or
- IELTS minimum score of 6.5.
- Statement of Educational and Professional Objectives
- Admissions approval by the Professional Tax Certificate Program Committee

## Graduation Requirements

Students must earn at least a 2.0 GPA in each course and an overall average GPA of 2.5 for all the courses in the Certificate.

Required Courses Credits: 15

- ACCT 441 - Advanced Tax 1: Individual Credits: (5)
- ACCT 442-Advanced Tax 2: Corporations and other entities Credits: (5)
- ACCT 443 - Advanced Tax 3: Practice and Procedure Credits: (5)

Practicum Credits: 2

- ACCT 490 - Cooperative Education Credits: (1-12)
- OR ACCT 492 - Volunteer Income Tax Assistance Credits: (2)

Total Credits: 17

## Faculty and Staff

Chair
Lieutenant Colonel Mark L. Meier, USAF, MS

## Professor

Lieutenant Colonel Mark L. Meier, USAF, MS, aeronautical science

## Assistant Professors

Major James B. Barnett, USAF, MS, teaching-elementary Captain DaJon D. DeMille, USAF, MA, business administration and management

## Staff

Technical Sergeant Marie A. Gordon, USAF, NCOIC, personnel

Staff Sergeant Katie N. Williams, USAF, NCOIC, administration
Kendra L. Sterkel, program coordinator

## Department Information

The United States Air Force Reserve Officer Training Corps (AFROTC), represented at CWU by Detachment 895, develops leaders in preparation to be commissioned as second lieutenants in the U.S. Air Force. Upon completing a baccalaureate/master's degree and all officer qualifications, graduates are commissioned and enter active duty. The program is designed to work with your other academic courses and is taught by active duty officer/professors. The Air Force is seeking qualified candidates from under-represented groups including women, African Americans, Hispanics, Asian/Pacific Islanders, and Native American/Alaskan Natives.

The program is designed to educate students about aerospace studies, with a leadership lab to provide a unique opportunity to practice leadership skills. The Aerospace Studies courses cover an introduction to the Air Force, history, leadership, and regional studies/preparation for active duty. Between sophomore and junior year, students attend a four-week field-training encampment, where they are introduced to an intensive training environment designed to teach critical teamwork, leadership, and fellowship skills. Each year there is also an opportunity to visit an Air Force base to see the environment and meet members of the Air Force. All textbooks, materials, and uniforms are provided.

## Admission Requirements

Students from any academic major degree program with a minimum 2.0 cumulative GPA are eligible. Enrollment in the freshman and sophomore classes creates no obligation to the Air Force. A contractual agreement is required after the sophomore year to continue in the ROTC program. Students are eligible to compete for an enrollment allocation into the POC only after successfully passing a medical examination, physical fitness test and having an excellent SAT, ACT or AFOQT (Air Force Officer Qualifying Test) score.

## Transfer Students

Students transferring from other institutions who are interested in pursuing a commission in the Air Force should contact the Unit Admissions Officer prior to their fall quarter, if possible.

## Scholarships

AFROTC competitive merit scholarships are available and awarded to both non-technical and technical majors. A scholarship will normally cover tuition, fees, and books. Those who have never been a full-time college student may apply for a four-year AFROTC scholarship at www.afrotc.com by December 1 (the year prior to attending college). College freshmen and sophomores may compete for three-year and twoyear scholarships. All contracted cadets in good standing receive a monthly stipend, separate from any scholarships.

## Special Training Opportunities

There are a variety of summer programs available to enhance a student's knowledge of the Air Force. Opportunities such as base visits, flying, parachuting, Air Force Office of Special Investigations, engineering, space orientation, as well as trips to other countries to enhance cultural awareness or language immersion. All travel and meals are provided.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/airforce or by contacting the department directly.

## Aerospace Studies Minor

AFROTC courses are accredited and may be taken as an academic minor or as free electives. The aerospace studies minor is awarded upon successful completion of the required courses.

## Required Courses

- AFRO 301-Air Force Leadership Studies Credits: (3)
- AFRO 302 - Air Force Leadership Studies Credits: (3)
- AFRO 303 - Air Force Leadership Studies Credits: (3)
- AFRO 401 - National Security Affairs and Preparation for Active Duty Credits: (3)
- AFRO 402 - National Security Affairs and Preparation for Active Duty Credits: (3)
- AFRO 403 - National Security Affairs and Preparation for Active Duty Credits: (3)

Total Credits: 18

## Africana and Black Studies Minor

The Africana and black studies minor program offers interdisciplinary study of the history, culture, economics, and political institutions that have shaped the experiences of people of African ancestry throughout the world. The program serves as an interdisciplinary intellectual center for study and research in the many dimensions of African and black diasporic experiences, and for application of knowledge and scholarship to advance the common good. It provides access for students and scholars to a broad range of information and research by drawing upon the insights of English, geography, history, political science, music, and other disciplines at Central. The minor is designed for all highly motivated and adventurous students in all majors who have a serious interest in learning about the black diaspora and its impact on the individual countries and on the interdependent world in which we live.

Students in the minor are encouraged to take advantage of studyabroad programs to Africa and to countries of the black diaspora. Africana and Black Studies minors are expected to participate actively in co-curricular multicultural learning experiences offered by the following: student organizations, Students for the Dream Living Learning Community, Diversity Education Center, Campus Life activities, Center for the Dream, University Housing and New Student Programs, Center for Student Empowerment, Latino and Latin American Studies Program, and the David Wain Coon Center for Excellence in Leadership.

Required Courses Credits: 15

- ABS 110 - Expressive Black Culture: African American Literary Traditions from Folklore to Rap Credits: (5)
- ABS 210 - Intro to the African American Odyssey: Socio-Economic and Political Forces Shaping Black Experience Credits: (5)
- HIST 332 - History of the Black Diaspora Credits: (5)

Department-Approved Electives Credits: 15-20
Africana Electives Credits: 11-15
Select from the following:

- ABS 300 - Black Diaspora Studies: Afro-Latin America and Afro-Caribbean Cultures Credits: (5)
- ABS 302 - Hip Hop as Global Culture Credits: (5)
- ABS 305-20th Century Black Women's Literature (Put on reserve 9/16/16) Credits: (4)
- ABS 308 - African American Folklore Credits: (5)
- ABS 309 - Race and Sports: Freedom, Power, and Difference Credits: (4)
- ABS 399- ABS Seminar Credits: (3-5)
- ABS 400 - Race and Literature Credits: (4)
- ENG 330 - African American Literature Credits: (5)
- HIST 331 - Colonial Africa Credits: (5)

Social Sciences Electives Credits: 4-5
Select one from the following:

- ETS 354 - Minority Experiences Credits: (5)
- LAJ 402 - African Americans and the Constitution Credits: (4)
- POSC 365 - African Politics Credits: (5)
- SOC 354 - Minority Experience Credits: (5)
- SOC 386 - Seminar on Racism Credits: (5)

Total Credits: 30-35

## American Indian Studies Minor

The American Indian studies minor program goals are to provide an interdisciplinary opportunity to learn about American Indian peoples, to facilitate research and creative activities that concern American Indian peoples, and to recognize the diversity represented in the rich heritage of American Indians. Students with a minor in American Indian studies will use academic and experiential knowledge to appreciate the natural and cultural diversity of American Indian people.

Required Courses Credits: 15

- AIS 101 - American Indian Culture before European Contact Credits: (5)
- AIS 102 - American Indians in the Contact Period Credits: (5)
- AIS 103 - Contemporary American Indian Experience Credits: (5)

Department-Approved Electives Credits: 18-19

Humanities Electives Credits: 10

Select two of the following courses:

- AIS 321 - American Indian Spirituality Credits: (5)
- ENG 332 - American Indian Literature Credits: (5)
- ENG 334 - American Indian Oral and Nonfiction Literature Credits: (5)
- ENG 461 - Studies in Film and Culture Credits: (5)
- HIST 385 - Aztec, Inca, Maya: Empire and City in the New World Credits: (5)
- HIST 434 - American Indian History to 1795 Credits: (5)
- HIST 438 - American Indian History since 1795 Credits: (5)

Science Electives Credits: 8-9

Select two of the following courses:

- ANTH 324 - North American Archaeology Credits: (4)
- ANTH 325 - Prehistory of the Pacific Northwest Credits: (4)
- ANTH 341 - Native American Cultures of the Pacific Northwest Credits: (4)
- ANTH 347 - Native American Cultures of North America Credits: (4)
- POSC 411 - American Indian Politics and Sovereignty Credits: (4)
- SOC 366 - Sociology of American Indians Credits: (5)

Additional course opportunities in:

The below courses are offered throughout the academic year under different titles.

- AIS 296 - Individual Study Credits: (1-6)
- AIS 490 - Cooperative Education Credits: (1-12)
- AIS 491 - Workshop Credits: (1-6)
- AIS 496 - Individual Study Credits: (1-6)
- AIS 498 - Special Topics Credits: (1-5)

Total Credits: 33-34

## Department Information

Anthropology presents an integrated perspective on the cultural and biological nature of humans. Anthropologists study present and past human diversity through classroom, laboratory, and field studies in cultural and biological anthropology, including archaeology, linguistics, ethnology, and applied anthropology.

Students interested in major and minor programs should contact the department office as soon as possible for further information, application forms, and assignment of an advisor. Anthropology majors are expected to meet with their advisors at least once a quarter.

Students need a GPA of 2.5 or higher to be admitted to the department.

## Special Programs

Reflecting the broad nature of anthropological study, the department directly sponsors or is affiliated with a wide range of on- and off-campus options to broaden classroom experiences.

Further information about the following programs is available through the anthropology department office:

- Museum Studies Program, offering coursework, field experiences, and projects with local and regional museums
- Central Washington Archaeological Survey (CWAS), a service, research, and public information facility with special emphasis in the Northwest
- Bachelor of science in primate behavior and ecology, an interdisciplinary program providing undergraduate training in method and theory of primatology as basis for research, laboratory, and field experience
- Master of science in resource management, offering an integrated program in natural and cultural resource management including anthropology classes in cultural resource management, and historic preservation
- Master of science in primate behavior, an interdisciplinary program in primatology, including courses in the history, field and lab methods, and current topics and issues in the discipline
- Center for Spatial Information, providing a range of Geographic Information System (GIS) tools for analysis of social and natural science data
- Summer workshops and field schools, including survey archaeology in eastern Washington, primate and biodiversity studies in China, and workshops in forensic anthropology
- Study abroad opportunities coordinated through the CWU Office of International Study and programs
- Departmental honors program encourages individualized research and study in a sub-area of anthropology. It is open to junior and senior students with an anthropology major GPA of 3.0 or better
- Anthropology Student Association, an active student group which sponsors academic and social events related to the discipline.

## Subfield identification key:

## A=Archaeology

B=Biological Anthropology
C=Cultural Anthropology
$\mathrm{L}=$ Linguistics
$\mathbf{S}=$ Seminars

## Program Outcomes

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/anthropology or by contacting the department directly.

## Anthropology Major, BA (45 Credits)

This 45 -credit major must be accompanied by a major in a discipline related to anthropology. The program will consist of
coursework focused on areas related to the dual major and must be designed in close consultation with an anthropology advisor. A program proposal must be approved prior to admission to this BA program.

## Required Courses

- Introductory (100-level) Credits: (15)
- Intermediate (300-level) must include three subfieldsCredits: (12-16)
- Advanced Courses (400-level) must include two subfields- Credits: (8-12)
- ANTH 301 - Anthropology: Principles and Assessment Credits: (2)
- ANTH 458 - Senior Comprehensive Survey Credits: (4)

Total Credits: 45

College and Department Information

Anthropology and Museum Studies Department College of the Sciences

## Anthropology Major, BA ( 62 Credits)

This liberal arts and sciences major provides background to prepare students for any vocation, in that a measure of achievement in all careers is success in human relationships. The major is also consistent with employment in a variety of business, government and social service areas.

Required Courses
Anthropology Core Requirements

- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- ANTH 120 - Archaeology: Science of the Past Credits: (5)
- ANTH 130 - Cultural Worlds Credits: (5)
- ANTH 180 - Language and Culture Credits: (5)
- ANTH 301 - Anthropology: Principles and Assessment Credits: (2)

Anthropology Core Total Credits: 22

Additional Required Courses

- ANTH 458 - Senior Comprehensive Survey Credits: (4)
- Select 300-level courses from at least three subfields: Archaeology, Biological Anthropology, Cultural Anthropology, LinguisticsCredits: (16)
- Advanced (400-level) courses (must include a department-approved, 400-level seminar course) Credits: (16)
- Department-approved electives Credits: (4)

Total Credits: 62

College and Department Information

Anthropology and Museum Studies Department College of the Sciences

## Anthropology Major, BS

This major prepares students for graduate work in anthropology or for careers in anthropology and closely related fields. Electives are chosen in consultation with an advisor to lead into specialization in areas such as: ethnology, linguistics, archaeology, environmental studies, or biological anthropology. Students in this major must have course schedules approved quarterly by their departmental advisors.

Anthropology Core Requirements

- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- ANTH 120 - Archaeology: Science of the Past Credits: (5)
- ANTH 130 - Cultural Worlds Credits: (5)
- ANTH 180 - Language and Culture Credits: (5)
- ANTH 301 - Anthropology: Principles and Assessment Credits: (2)

Anthropology Core Total Credits: 22

## Required Courses

Intermediate: (300-level courses) Credits: 24

- Select one 300-level course from each subfield: Archaeology, Biological Anthropology, Cultural, Linguistics- Credits: (16)
- Select additional 8 credits from 300-level courses. Credits: (8)

Advanced (400-level courses) Credits: 20

- ANTH 458 - Senior Comprehensive Survey Credits: (4)
- Theory Course: ANTH 410 or ANTH 421 or ANTH 451 Credits: (4)
- Department-approved 400-level seminar Credits: (4)
- Select additional 8 credits of advanced (400-level) courses Credits: (8)

Electives in Anthropology and related fields (must include a course in statistics) Credits: 8

## Total Credits: 74

(NOTE: Students planning on graduate school in linguistics are strongly advised to select ANTH 382.)

College and Department Information

Anthropology and Museum Studies Department
College of the Sciences

## Anthropology Minor

Required Courses Credits: 15

Select three from the following:

- ANTH 107 - Being Human: Past and Present Credits: (5)
- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- ANTH 120 - Archaeology: Science of the Past Credits: (5)
- ANTH 130 - Cultural Worlds Credits: (5)
- ANTH 180 - Language and Culture Credits: (5)

Department-Approved Electives Credits: 12

Elective credits must be at the 300 or 400 course level.
(NOTE: Students in teacher education must include ANTH 324 or ANTH 347, and ANTH 355 or ANTH 381 within the 10 credits of electives. ANTH 381 suggested for those enrolled in Teaching English as a Second Language.)

Total Credits: 27

College and Department Information

Anthropology and Museum Studies Department College of the Sciences

## Museum Studies Minor

The museum studies minor prepares students for entry-level, museum-related employment and/or for graduate work in museum studies. To be eligible for admission to this program, students should be enrolled in a related major (e.g., anthropology, art, biology, geology, geography, history, recreation and tourism, science education, etc.).

Approval by the anthropology department chair is also required.
Required Courses Credits: 18

- ANTH 360 - Introduction to Museum Studies

Credits: (4)

- ANTH 361 - Museum Exhibit Design Credits: (4)
- ANTH 362 - Museum Curation and Management Credits: (4)
- ANTH 490 - Cooperative Education Credits: (1-12) (must be taken for 6 credits)

Select one from the following: Credits: 5

- ANTH 107 - Being Human: Past and Present Credits: (5)
- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- ANTH 120 - Archaeology: Science of the Past Credits: (5)
- ANTH 130 - Cultural Worlds Credits: (5)

Department-Approved Electives Credits: 7

Total Credits: 30

College and Department Information

Anthropology and Museum Studies Department College of the Sciences

## Forensics Certificate

The Forensics certificate provides recognition for students completing the required core curriculum and electives of forensics-related classes from at least two academic departments. Certification will provide students with an introduction to the topic and may assist them in their future job searches. By itself the certificate is not sufficiently comprehensive to indicate a student is highly trained in forensic science.

Required Courses Credits: 15
Courses may be taken in any order, although the Introduction to Forensics course is recommended to be taken early. It is acceptable to count any of these courses in a major as well as in the certificate.

- ANTH 310 - Research/Laboratory in Biological Anthropology Credits: (1-2)
- ANTH 315 - Forensic Skeletal Analysis Credits: (4)
- ANTH 318 - Introduction to Forensics Credits: (4)
- OR LAJ 318 - Introduction to Forensics Credits: (4)
- ANTH 497 - Forensics Capstone Credits: (1)
- OR LAJ 497 - Forensics Capstone Credits: (1)
- LAJ 300-Administration of Criminal Justice Credits: (4)

## Electives Credits: 15

A total of 15 or more credits must be taken from the following list. Courses must include at least two different academic departments. It is recommended that students enroll in at least
one laboratory or field course (indicated with *), but this is not required.

Anthropology:

- ANTH 316 - History and Theory of Molecular Anthropology Credits: (4)
- ANTH 323 - Field Archaeology Credits: (3-6) *
- ANTH 357 - Medical Anthropology: Cross-cultural Perspectives on Health and Healing Credits: (4)
- ANTH 414 - Forensic Anthropology: Cold Case Analysis Credits: (6) *
- ANTH 415 - Forensic Anthropology: Theoretical and Applied Issues Credits: (4)
- ANTH 425 - Zooarchaeology Credits: (4) *
- ANTH 444 - Ethnographic Field Methods Credits: (4)
- ANTH 486 - Advanced Methods in Archaeology Credits: (1-8) *
- ANTH 490 - Cooperative Education Credits: (1-12)

## Biological Sciences:

- BIOL 321 - Genetics Credits: (5) *
- BIOL 351 - General Entomology Credits: (5) *
- BIOL 353 - Integrative Anatomy Credits: (6) *
- BIOL 355 - Human Anatomy and Physiology I Credits: (5) *
- BIOL 356 - Human Anatomy and Physiology II Credits: (5) *
- BIOL 425 - Molecular Biotechnology Credits: (5) *
- BIOL 490 - Cooperative Education Credits: (1-12)

## Chemistry:

(Note that typically 30 quarter hours in chemistry are required for work in state forensics laboratories, such as for Forensic Scientist I at the Washington State Patrol.)

- CHEM 112 - Introduction to Organic Chemistry Credits: (4)
- CHEM 112LAB - Introduction to Organic Chemistry Laboratory Credits: (1) *
- CHEM 113 - Introduction to Biochemistry Credits: (4)
- CHEM 113LAB - Introduction to Biochemistry Laboratory Credits: (1) *
- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I

Credits: (1)*

- CHEM 182-General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)*
- CHEM 183-General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1) *
- CHEM 332 - Quantitative Analysis Credits: (3)
- CHEM 332LAB - Quantitative Analysis Laboratory Credits: (2) *

Law and Justice:

- LAJ 302 - Criminal Procedure Credits: (4)
- LAJ 313 - Introduction to Criminal Law Credits: (4)
- LAJ 331 - Investigation Credits: (4)
- LAJ 490 - Cooperative Education Credits: (1-12)

Physics:
(Note that typically 8 quarter hours in physics are required for work in state forensics laboratories, such as for Forensic Scientist I at the Washington State Patrol.)

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 490 - Cooperative Education Credits: (1-12)

Psychology:

- PSY 449 - Abnormal Psychology Credits: (4)
- PSY 484 - Violence and Aggression Credits: (4)

Sociology:

- SOC 346 - Criminology Credits: (5)
- SOC 348 - Women and Crime Credits: (5)
- SOC 490 - Cooperative Education Credits: (1-12)

Total Credits: 30

## Departmental Information

The Department of Art and Design is the primary agent for the study and practice of visual culture. Our faculty facilitates liberal learning and academic excellence to enable our students to assume their respective roles as practitioners, educators, and informed patrons of the visual arts. Degrees are offered in studio art and graphic design with allied course offerings in art history. We also offer minors in art studio and art history.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/art or by contacting the department directly.

## Art Major, BA

An art degree for students desiring to pursue studio art or graphic design-related careers and/or seeking artistic enrichment. The degree can be directed toward a disciplinespecific studio art practice, graphic design or a crossdisciplinary and/or cross-media studio art practice.

Required Courses Credits: 30

- ART 150 - Introduction to Drawing Credits: (3)
- ART 170 - Two-Dimensional Design Credits: (3)
- ART 171 - Three-Dimensional Design Credits: (3)
- ART 172 - Computer Fundamentals in Art and Design Credits: (3)
- ART 235 - Ancient and Medieval Art Credits: (3)
- ART 236 - Renaissance through Mid-19th-century Art Credits: (3)
- ART 237- Impressionism through Postmodernism Credits: (3)
- ART 250 - Figure Drawing Credits: (3)
- ART 414 - Recent Art Credits: (4)
- ART 495 - Studio Project Credits: (2)

Art History Credits: 4
Select one course from the following:

- ART 324 - History of Photography Credits: (4)
- ART 333 - Art, Design, and Popular Culture Credits: (4)
- ART 374 - History of Graphic Design Credits: (4)
- ART 389-Contemporary Concepts in Art (Put on reserve as of 9/16/15) Credits: (4)
- ART 420 - American Art and Architecture Credits: (4)

Lower Division Studio Arts Required Courses Credits: 16

Select four lower-division studio courses from the following eight courses:

- ART 225 - Beginning Photography Credits: (4)
- ART 241 - Beginning Wood Design Credits: (4)
- ART 246 - Beginning Jewelry/ Metals Credits: (4)
- ART 260 - Beginning Painting Credits: (4)
- ART 265 - Beginning Ceramics Credits: (4)
- ART 274 - Beginning Typography Credits: (4)
- ART 280 - Beginning Sculpture Credits: (4)
- ART 283 - Beginning Graphic Interface Design Credits: (4)

Department-approved Upper-division Courses Credits: 23-25

Total Credits: 73-75

College and Department Information

Art and Design Department
College of Arts and Humanities

## Art BFA, Graphic Design Specialization

A comprehensive studio art degree for students desiring careers in graphic design/visual communications. Critical thinking through the exploration of digital and print media is emphasized. After completion of the art core and pre-graphic design prerequisites, students are required to complete the graphic design concentration requirements, including a contracted field experience. Transfer students are encouraged to complete as many of the transferable art requirements prior to enrolling at CWU.

An Apple laptop is required.

Bachelor of Fine Arts Requirements

- ART 150 - Introduction to Drawing Credits: (3)
- ART 170-Two-Dimensional Design Credits: (3)
- ART 171-Three-Dimensional Design Credits: (3)
- ART 172-Computer Fundamentals in Art and Design Credits: (3)
- ART 235 - Ancient and Medieval Art Credits: (3)
- ART 236 - Renaissance through Mid-19th-century Art Credits: (3)
- ART 237 - Impressionism through Postmodernism Credits: (3)
- ART 250 - Figure Drawing Credits: (3)
- ART 414 - Recent Art Credits: (4)
- ART 495 - Studio Project Credits: (2)

BFA Requirements Total Credits: 30

Graphic Design Specialization

Prerequisite Lower-division Required Courses Credits: 12

- ART 225 - Beginning Photography Credits: (4)
- ART 274 - Beginning Typography Credits: (4)
- ART 283 - Beginning Graphic Interface Design Credits: (4)

Art History Credits: 4

- ART 374 - History of Graphic Design Credits: (4)

Lower-division Required Courses Credits: 12

- ART 251 - Beginning Illustration Credits: (4)

Select an additional two department-approved lowerdivision studio courses from the following:

- ART 241 - Beginning Wood Design Credits: (4)
- ART 246 - Beginning Jewelry/ Metals Credits: (4)
- ART 260 - Beginning Painting Credits: (4)
- ART 265 - Beginning Ceramics Credits: (4)
- ART 280 - Beginning Sculpture Credits: (4)

Upper-division Required Courses Credits: 50-52

- ART 351 - Intermediate Illustration Credits: (4)
- ART 370 - Beginning Layout and Design Credits: (4)
- ART 371 - Intermediate Layout and Design Credits: (4)
- ART 372 - Beginning Design and Production Credits: (4)
- ART 383 - Intermediate Graphic Interface Design Credits: (4)
- ART 470 - Advertising Graphic Design Credits: (4)
- ART 471 - Corporate Graphic Design Credits: (4)
- ART 472 - Intermediate Design and Production Credits: (4)
- ART 474 - Intermediate Typography Credits: (4)
- ART 483 - Advanced Graphic Interface Design Credits: (4)
- ART 490 - Cooperative Education Credits: (1-12) (Must be taken for 10-12 credits)

Total Credits: 108-110

## Art BFA, Studio Art Specialization

A comprehensive studio art degree for students desiring to pursue studio art-related careers or seeking artistic enrichment. The degree can be directed toward either a discipline-specific studio art practice or a cross-disciplinary and/or cross-media studio art practice.

Bachelor of Fine Arts Requirements

- ART 150 - Introduction to Drawing Credits: (3)
- ART 170 - Two-Dimensional Design Credits: (3)
- ART 171 - Three-Dimensional Design Credits: (3)
- ART 172 - Computer Fundamentals in Art and Design Credits: (3)
- ART 235 - Ancient and Medieval Art Credits: (3)
- ART 236-Renaissance through Mid-19th-century Art Credits: (3)
- ART 237 - Impressionism through Postmodernism Credits: (3)
- ART 250 - Figure Drawing Credits: (3)
- ART 414 - Recent Art Credits: (4)
- ART 495-Studio Project Credits: (2)

BFA Requirements Total Credits: 30

Studio Art Specialization

Art History Credits: 4

Select one course from the following:

- ART 324 - History of Photography Credits: (4)
- ART 333 - Art, Design, and Popular Culture Credits: (4)
- ART 374 - History of Graphic Design Credits: (4)
- ART 389 - Contemporary Concepts in Art (Put on reserve as of $9 / 16 / 15$ ) Credits: (4)
- ART 420-American Art and Architecture Credits: (4)

Lower-division Studio Required Courses Credits: 24

Select six department-approved lower-division studio courses from the following courses:

- ART 225 - Beginning Photography Credits: (4)
- ART 241 - Beginning Wood Design Credits: (4)
- ART 246 - Beginning Jewelry/ Metals Credits: (4)
- ART 260 - Beginning Painting Credits: (4)
- ART 265 - Beginning Ceramics Credits: (4)
- ART 274 - Beginning Typography Credits: (4)
- ART 280 - Beginning Sculpture Credits: (4)

Upper-division Department-approved Studio Art Courses Credits: 50-52

Total Credits: 108-110

## Program Information

The Asian Studies Program is an interdisciplinary program focusing on a region currently undergoing a dramatic economic, political, and social transformation. The program provides students with a grasp of the region's diversity while emphasizing the interactive nature of an overarching community of nations. Careers in international business, government service, and education can be augmented by preparation in Asian Studies.

The program also serves as an excellent preparation for graduate study in various academic and professional fields.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/asian-studies or by contacting the department directly.

## Asian Studies Major, BA

The program provides students with a grasp of the region's diversity while emphasizing the interactive nature of an overarching community of nations. Careers in international business, government service, and education can be augmented by preparation in Asian Studies. The program also serves as an excellent preparation for graduate study in various academic and professional fields.

## Asia/Pacific Studies Core

- AST 102 - Introduction to Asian Studies Credits: (3)
- AST 401 - Asia/Pacific Studies Capstone Credits: (3)

First- and Second-year Chinese - Credits: 30

- CHIN 151 - First-year Chinese Credits: (5)
- CHIN 152 - First-year Chinese Credits: (5)
- CHIN 153 - First-year Chinese Credits: (5)
- CHIN 251 - Second-year Chinese Credits: (5)
- CHIN 252 - Second-year Chinese Credits: (5)
- CHIN 253 - Second-year Chinese Credits: (5) OR

First- and Second-year Japanese

- JAPN 151 - First-year Japanese Credits: (5)
- JAPN 152 - First-year Japanese Credits: (5)
- JAPN 153 - First-year Japanese Credits: (5)
- JAPN 251 - Second-year Japanese Credits: (5)
- JAPN 252 - Second-year Japanese Credits: (5)
- JAPN 253 - Second-year Japanese Credits: (5)

Total Core Credits: 36
Choose six classes from the following list: Credits (25-29)

You are required to choose a minimum of one class from each of the three groups. Elective courses may not be chosen from the student's major area.
(Note: Other courses may be included with advisor's approval)

Group 1 (Social Sciences)

- ANTH 344 - Cultures of Asia Credits: (4)
- ANTH 345 - Cultures of Southeast Asia and Oceania Credits: (4)
- AST 310 - Japan Today Credits: (3)
- GEOG 375 - Geography of Asia Credits: (4)
- POSC 366 - Government and Politics of East Asia Credits: (5)
- POSC 367 - Politics of Japan Credits: (5)
- POSC 369 - Korean Politics Credits: (5)
- POSC 373 - International Politics of the Pacific Rim Credits: (5)

Group 2 (Aesthetic Experience)

- AST 301-Chinese Literature in Translation Credits: (4)
- CHIN 461 - Chinese Cinema Credits: (4)
- JAPN 462 - Japanese Cinema Credits: (5)
- TH 375 - Asian Drama Credits: (4)

Group 3 (Humanities)

- HIST 380 - Modern East Asia Credits: (5)
- HIST 383 - East Asian Civilization Credits: (5)
- HIST 483 - Modern China Credits: (5)
- PHIL 345 - Chinese Philosophy Credits: (5)
- RELS 351 - Religions of China and Japan Credits: (5)
- RELS 352 - Religions of India Credits: (5)
- RELS 401 - The Daoist Tradition Credits: (5)
- RELS 403 - Buddhist Thought and Practice Credits: (5)

Total Credits: 61-65

## Asian Business Minor

The minor in Asian Business is designed to prepare students for working within the state's emerging Asia-oriented economy. It combines an overview of the nuances of the regional economy with an introduction to Asia's cultural and historical development. Topics include an introduction to Asian culture and philosophy, corporate-government relations, twentiethcentury history, regional development, and export strategies. It can be supplemented with study abroad opportunities and language study. There are two tracks: one for College of Business majors and one for non-business majors.

Required Courses Credits: 12

- AST 102 - Introduction to Asian Studies Credits: (3)
- COM 302 - Intercultural Communication Credits: (4)
- ECON 101 - Economic Issues Credits: (5)
- OR ECON 102 - World Economic Issues Credits: (5)
- OR ECON 201 - Principles of Economics Micro Credits: (5)

Track for Business Majors Credits: 9-10

- ANTH 344 - Cultures of Asia Credits: (4)
- OR ANTH 345-Cultures of Southeast Asia and Oceania Credits: (4)
- OR HIST 380 - Modern East Asia Credits: (5)
- POSC 366 - Government and Politics of East Asia Credits: (5)
- OR POSC 373 - International Politics of the Pacific Rim Credits: (5)

Track for Non-Business Majors Credits: 10
Choose two of the following courses:

- HRM 381- Management of Human Resources Credits: (5)
- MGT 380-Organizational Management Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)

Total Credits: 21-22

Sundaram Nataraja, MA, MS, EdD, UAS/Remote Pilot (FAA
Part 107)

## Professors

Amy L. Hoover, PhD, CFII, mountain flying, meteorology, human factors
Sundaram Nataraja, MS, EdD, CILT, aviation management, airport finance, airport/airlines marketing
Teresa Sloan, MIT, ATP, FAA ground schools, air transportation
Jason Underhill, MBA, ATP, CFII, aircraft systems and simulation, airline operations
Dale Wilson, MS, ATP, MGI, CFI, aviation safety, human factors, aviation weather

## Lecturers

Cathy Busha, JD, aviation law
Andrew McIrvin, BS, ATP, DPE, director of flight operations
Rich Bates, CFII, MEI, assistant chief flight instructor

## Staff

Lisa Broweleit, program support supervisor
Gail Darling-Tanneberg, dispatcher

## Department Information

The Department of Aviation offers two Bachelor of Science degrees.

Professional Pilot degree: Specializations in flight officer and commercial pilot
Aviation Management degree: Specializations in aviation management and aviation maintenance management.

## Accrediting Information

The aviation department holds an FAA Air Agency certificate. Ground schools and flight labs are conducted under 14CFR Part 141 of the Federal Aviation Administration regulations. CWU aviation department is a member of the University Aviation Association.

## Department Standards

## Admissions

Students must apply for acceptance into a degree or specialization. Application will be reviewed upon acceptance to CWU. Admission decisions are based on a number of factors, including grade point average, SAT/ACT scores, letters of
recommendation, financial capability, and a written statement of purpose, as outlined in the aviation department application form. Transportation Security Administration (TSA) regulations require proof of citizenship for pilots.

## Financial Obligations

Flight training fees are paid by the student and will be in addition to normal university tuition and fees (see aviation department website for current fees). Additional fees are required for AVP 444, AVP 445, and AVP 489 (see online student registration handbook). Additional costs for students enrolled in flight labs include current FAA charts, pilot supplies, and optional personal aviation headphones.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/aviation or by contacting the department directly.

## Aviation Management BS, Aviation Management Specialization

## Aviation Management Core Requirements

The Department of Aviation at CWU offers two undergraduate degree programs. One of them is Bachelor Science in Aviation Management (major). Currently, this major has two specializations i.e., (i) Aviation Management Specialization; and (ii) Aviation Maintenance Management Specialization.

This program prepares graduates for a variety of administrative and management positions in the aviation industry.

## Graduation Requirements

1. Student should have completed a total of 180 credits.
2. Student should have satisfied the Program Core requirements to a total of 44 core credits.
3. Student should satisfy the 45 credits of Specialization requirements.

## Program Requirements

Bachelor of Science in Aviation Management requires a total of 78-91 credits, of which 44 credits are core courses requirement.

## Core Courses

- ADMG 271 - Business Math Applications Credits: (4)
- AVM 330 - Aviation Law Credits: (3)
- AVM 333 - Air Transportation Credits: (4)
- AVM 334 - Airport Management Credits: (3)
- AVM 335 - Aviation Management Credits: (3)
- AVM 338 - Airport Administration and Finance Credits: (4)
- AVM 350-Aviation Career Planning and Professionalism Credits: (3)
- AVM 417 - Aviation Safety Management Credits: (4)
- AVM 422 - Legal Ethics in Aviation Credits: (4)
- AVM 424 - Aviation Security Credits: (4)
- AVM 426 - International Aviation Management Credits: (4)
- AVM 430 - Airport/Airline Marketing Credits: (4)

Total Core Credits: 44

Aviation Management Specialization Courses
Select 5 of the following courses Credits: (15-28)

- ADMG 371 - Administrative Management Credits: (4)
- ADMG 372 - Leadership and Supervision Credits: (4)
- AVM 332 - Aviation Legislation Credits: (4)
- AVM 418 - Threat and Error Management in Aviation Credits: (3)
- AVM 420 - Aviation Labor Relations Credits: (4)
- AVM 434 - Airport Operations Credits: (3)
- AVM 438 - Airport Planning and Design Credits: (4)
- AVM 490 - Cooperative Education Credits: (1-12)

Select 4 of the following courses Credits: (19-20)

- ACCT 251 - Financial Accounting Credits: (5)
- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- COM 345 - Business and Professional Speaking Credits: (4)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)
- HRM 381 - Management of Human Resources Credits: (5)
- MGT 380-Organizational Management Credits: (5)
- MATH 130 - Finite Mathematics Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)

Total Specialization Credits: 34-48
Total Credits: 78-92

- AVM 424 - Aviation Security Credits: (4)
- AVM 426 - International Aviation Management Credits: (4)
- AVM 430 - Airport/Airline Marketing Credits: (4)

Total Core Credits: 44

Maintenance Management Specialization
This specialization prepares graduates for entry into aviation maintenance and management in the aviation industry or FAA.

Students enrolling in this specialization must already possess an FAA Airframe and Powerplant certificate and/or graduation certificate from a Federal Aviation Administration-approved 14CFR Part 147 school. (Certificate not offered at Central Washington University.) Forty-five credits of the Airframe and

Powerplant certificates will be accepted upon completion of all other degree requirements.

Maintenance Management Specialization Courses

- Airframe and Powerplant Certificates Credits: (45)
(Certificate not offered at Central Washington
University. Forty-five credits of the Airframe and Powerplant Certificate will be accepted upon completion of all other degree requirements. See program advisor.)

Total Specialization Credits: 45
Total Credits: 89

College and Department Information

Aviation Department
College of Education and Professional Studies

## Aviation: Professional Pilot BS, Commercial Pilot Specialization

This specialization prepares graduates for commercial aviation employment opportunities. Students must earn a minimum grade of B- in CWU's FAA approved ground school courses to receive an FAA course graduation certificate as required by FAR141.

To be eligible for the FAA Restricted ATP certificate, students must complete the instrument/commercial pilot course with CWU in-house flight training and in the manner approved by the FAA under FAR Part 141 and the R-ATP LOA.

## Professional Pilot Core Requirements

The Professional Pilot major prepares graduates for entry level careers and leadership roles in the aviation community. Students select one of two technical specializations leading to a Bachelor of Science degree in Professional Pilot. The Aviation curriculum is designed to provide a solid foundation in the liberal arts as well as a thorough education and training in a technical discipline.

- AVM 330-Aviation Law Credits: (3)
- AVM 350-Aviation Career Planning and Professionalism Credits: (3)
- AVM 418 - Threat and Error Management in Aviation Credits: (3)
- AVP 101 - Private Pilot Flight Laboratory I Credits: (2)
- AVP 102 - Private Pilot Flight Laboratory II Credits: (2)
- AVP 103 - Private Pilot Flight Laboratory III Credits: (2)
- AVP 131 - Introduction to Aviation Credits: (1)
- AVP 141 - Principles of Flight I Credits: (4)
- AVP 142 - Principles of Flight II Credits: (4)
- AVP 201 - Instrument Pilot Flight Laboratory I Credits: (2)
- AVP 202 - Instrument Pilot Flight Laboratory II Credits: (2)
- AVP 203 - Instrument Pilot Flight Laboratory III Credits: (2)
- AVP 211 - Meteorology for Pilots Credits: (4)
- AVP 221 - Aircraft Systems I - Reciprocating Credits: (4)
- AVP 237 - Outdoor Survival for Pilots Credits: (1)
- AVP 241 - Instrument Flight I Credits: (4)
- AVP 242 - Instrument Flight II Credits: (3)
- AVP 304-Commercial Pilot Flight Laboratory I Credits: (2)
- AVP 305-Commercial Pilot Flight Laboratory II Credits: (2)
- AVP 306-Commercial Pilot Flight Laboratory III Credits: (2)
- AVP 312 - Aviation Weather Services Credits: (3)
- AVP 319- Applied Aerodynamics Credits: (3)
- AVP 340 - Human Factors in Flight Credits: (5)
- AVP 352 - Multiengine Principles Credits: (2)
- AVP 354 - Commercial Pilot Credits: (4)
- AVP 470 - Professional Pilot Capstone Credits: (1)

Total Core Credits: 70

Commercial Pilot Specialization Courses Credits: 20

Any AVM or AVP course(s) that is/are not used in required core course.

Total Credits: 90

- AVP 470 - Professional Pilot Capstone Credits: (1)

Total Core Credits: 70

Flight Officer Specialization Courses Credits: 40

- AVM 333-Air Transportation Credits: (4)
- AVP 348 - Air Carrier Operations Credits: (4)
- AVP 401 - Multiengine Flight Laboratory Credits: (2)
- AVP 402 - Certified Flight Instructor Laboratory Credits: (2)
- AVP 410 - Crew Resource Management Credits: (3)
- AVP 444 - Multiengine FTD, Baron G58 Credits: (2)
- AVP 448 - Fundamentals of Flight Instruction Credits: (5)
- AVP 469- Turbojet Operations Credits: (4)
- AVP 489 - Turbo FTD, CRJ-200 Credits: (3)
- Department-approved electives: any AVM or AVP course not used in required course: Credits (4)

Total Credits: 110

College and Department Information
Aviation Department
College of Education and Professional Studies

## Aviation Management Minor

An aviation management minor provides students with an introduction to several key areas of aviation management.

Required Courses

- AVM 330 - Aviation Law Credits: (3)
- AVM 334 - Airport Management Credits: (3)
- AVM 335 - Aviation Management Credits: (3)
- AVM 417 - Aviation Safety Management Credits: (4)
- MGT 380-Organizational Management Credits: (5)

Choose two courses from the following:

- AVM 333-Air Transportation Credits: (4)
- AVM 434 - Airport Operations Credits: (3)
- AVM 438 - Airport Planning and Design Credits: (4)

Total Credits: 25-26

College and Department Information
Aviation Department
College of Education and Professional Studies

## Aviation Professional Pilot Minor

A program designed for students who wish to earn a pilot's license (private pilot certificate). Flight training is taken through CWU's approved flight training operator at Bowers Field in Ellensburg, Washington, and may be taken under FAR Part 61 or Part 141.

Required Courses

- AVP 101 - Private Pilot Flight Laboratory I Credits: (2)
- AVP 102 - Private Pilot Flight Laboratory II Credits: (2)
- AVP 103 - Private Pilot Flight Laboratory III Credits: (2)
- AVP 141 - Principles of Flight I Credits: (4)
- AVP 142 - Principles of Flight II Credits: (4)
- AVP 211 - Meteorology for Pilots Credits: (4)
- AVP 221 - Aircraft Systems I - Reciprocating Credits: (4)
- Department-approved AVM or AVP electives Credits: (6)

Total Credits: 24

Kristina A. Ernest, PhD, terrestrial and community ecology
Jason T. Irwin, PhD, animal physiology
Paul W. James, PhD, ecology and fisheries biology
James E. Johnson, PhD, mycology, systematics
Sheldon R. Johnson, PhD, zoophysiology, mammalogy (emeritus)
Holly C. Pinkart, PhD, microbiology, microbial ecology
Mary E. Poulson, PhD, plant physiology
Wayne S. Quirk, PhD, sensation and perception, neuroscience Ian J. Quitadamo, PhD, science education, cell and molecular biology
Linda A. Raubeson, PhD, evolutionary biology and genetics
Stamford D. Smith, PhD, entomology (emeritus)
Lixing Sun, PhD , behavioral ecology and evolution
R. Steven Wagner, PhD , conservation genetics and
herpetological science

## Associate Professors

Clay Arango, PhD, stream ecology and nitrogen biogeochemistry
Jennifer Dechaine, PhD, plant biology
Blaise Dondji, PhD, human physiology, microbiology, parasitology, immunology
Alison Scoville, PhD, ecological and evolutionary genomics

Gabrielle Stryker, PhD, microbiology, immunology and parasitology

## Assistant Professors

April Binder, PhD, molecular developmental biology

## Lecturers

Lucy Bottcher, PhD, ecologist, herpetologist
Raymon Donahue, PhD, plant ecology, physiology
Eric Graham, PhD, plant ecology
Fabiola Serra-Fuertes, DVM, animal biology, physiology

## Staff

Emil Babik, engineering technician
Jonathan Betz, instructional classroom support technician
Eric Foss, instructional classroom support technician
Mari Knirck, fiscal specialist I
Kariann Linnell, secretary supervisor
Ormacinda White, engineering technician
Mark Young, instructional classroom support technician

## Department Information

The Department of Biological Sciences provides the biological component of the liberal arts education at the university. We promote student understanding of biological concepts relevant to the individual and society, and foster an appreciation of scientific inquiry. Evolution is the unifying theme of our curriculum. Our students obtain a broad education, covering a wide variety of biological disciplines. We focus on the student. Classes are small, facilitating hands-on experience, interactions with faculty, and opportunities for both undergraduate and graduate research. We offer a full complement of competitive pre-professional programs, strong programs in regional field biology, and a quality program for secondary biology educators.

## Admission Requirements

To be admitted to a biology major or minor, all students must:

1. Meet with an advisor

Advisors are normally assigned by the biology department upon admission to the major. However, it is highly recommended that a student talk with an advisor well before being admitted to the major. Any biology department faculty member may serve as an advisor but different faculty members advise in different areas. Please meet with your advisor as early in your academic career as possible to begin planning your program.
2. Complete and file an application to the major by the beginning of the junior year.

A formal application to the biology major must be submitted with your advisor's approval. The entry-to-major qualifications must be met and application should be made by the beginning of the junior year. Application forms can be obtained from the advisor, the department office, or online at
www.cwu.edu/biology/forms-and-information.
3. Complete and file a program of study by the end of the junior year.

To graduate, each student must have on file in the biology department and in the registrar's office, an official Course of Study. The Course of Study documents a student's individual degree program and lists the required and elective courses necessary for successful program completion. It is prepared by
the student in conjunction with his or her advisor and should be approved by the student, advisor, and department chair at least one year prior to graduation. Students should meet with their advisor regularly to discuss their progress. Course of Study forms can be obtained from the advisor, the department office, or online at: www.cwu.edu/biology/forms-and-information.

## Student Scholarly Activities

The department is student oriented and provides a diversity of laboratory and field experiences. Students are encouraged to participate in a variety of activities.

- Research activities: Students are encouraged to seek out a faculty member who is engaged in active research that complements the student's career goals. Students who begin research early and continue it through their career in the department gain a better understanding of their profession and are more competitive in the job market or in graduate school admissions.
- Field program: The department believes in the importance of exposing students to biological field experiences. In addition to those provided by regular courses, the department offers summer field courses and trips to biologically interesting areas during breaks between quarters.

## Student Organizations

Biology Club: All biology students are encouraged to join the Biology Club. This student-run organization meets regularly to discuss academic planning and career opportunities in biology. The club performs service activities and plans recreational outings. See its website at www.cwu.edu/biology.

Beta Beta Beta: BBB is the undergraduate National Biological Sciences Honorary Society. Students maintaining a high-grade point average ( 3.0 or higher) are encouraged to apply.

Various organizations for students interested in health professions (medicine, dentistry, etc.) are available to provide information, support, and opportunities for service.

## Fees

Laboratory or field fees are assessed for many of the department's lab courses. These fees are used as partial support for purchasing lab materials or providing transportation costs.

## General Consideration for Biology Majors and Minors

- The biological sciences department must approve each student's program at least one academic year preceding graduation
- CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. PHYS 111 has a prerequisite of high school algebra and trigonometry. PHYS 181 has a prerequisite or corequisite of MATH 172, 173, and 272. BIOL 360 has a prerequisite of MATH 153.
- Credits earned in CHEM 181, 181LAB, and PHYS 111 will be allowed in partial fulfillment of the natural science breadth requirements as well as the requirements of the biology major or minor.
- A maximum of 15 credits in BIOL 295, BIOL 490, BIOL 295 and BIOL 496 may be included in the major (as electives in the BS degrees).
- A major in biological sciences incorporates classes from mathematics and other sciences. A full year of introductory biology and introductory chemistry is required for enrollment in upper-division biology classes. The introductory chemistry sequence (CHEM $181,182,183$ ) is pre- or co-requisite to the introductory biology series (BIOL 181, 182, 183). Students are urged to complete these two introductory series in their first year or as early in their academic career as possible.

## Graduation Requirements

- You must have a cumulative GPA of at least 2.25 in your major.
- End-of-major assessment must be completed, usually in conjunction with BIOL 499S. This requirement helps to assess whether the department has fulfilled its instructional objectives and provides us with information that will enable us to continuously improve our programs and courses.
- Application for the bachelor's degree must be filed by the second Friday of the quarter preceding the quarter in which the degree is to be received. Complete instructions and deadlines are available in Registrar Services.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/biology or by contacting the department directly.

## Biology Major, BA

The BA degree program is designed for students preparing to incorporate biology into broader careers such as teaching, health sciences (PA, nursing, pre-PT), business, or law. It is also the appropriate major for students seeking endorsement in teaching high school biology.

A BS is recommended for students who anticipate pursuing a graduate degree in biology, health programs (MD, DO, DVM, DDS, Pharm D.) or biology careers that might require training in a greater depth of biological subdisciplines. See a faculty advisor in the Biology Department as soon as possible to develop a course of study and to determine which degree program to pursue.

## Teaching Endorsement:

This major partially satisfies the criteria for a teaching endorsement in Biology (5-12), qualifying students to teach biology at the high school, middle, or junior high levels. Students who successfully complete the Biology BA and STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program
courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the biology teaching advisor as soon as possible to develop a course of study.

Required Courses Credits: 45

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 499S - Senior Seminar Credits: (1)
- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182-General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)
- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)

Select from the following for 18-26 credits:

- 1 course from the Biological Diversity Group Credits: (4-5)
- 1 course from the Ecology Group Credits: (4-5)*
- 1 course from the Evolution Group Credits: (4-6)*
- 1 course from the Molecular/Cell Group Credits: (35)*
- 1 course from the Structure/Function Group Credits: (3-6)
(*NOTE: Courses can only be counted once.)

Total Credits: 63-71

Biological Diversity Group

- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 323 - Microbiology Credits: (5)
- BIOL 341 - Plant Taxonomy Credits: (5)
- BIOL 344 - Dendrology Credits: (4)
- BIOL 351 - General Entomology Credits: (5)
- BIOL 352 - Parasitology Credits: (5)
- BIOL 421 - General Virology Credits: (5)
- BIOL 443 - Mycology Credits: (5)
- BIOL 444 - Algae and Bryophytes Credits: (5)
- BIOL 445 - Field Mycology Credits: (5)
- BIOL 450 - Ichthyology Credits: (4)
- BIOL 451 - Herpetology Credits: (4)
- BIOL 452 - Ornithology Credits: (4)
- BIOL 453 - Mammalogy Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Ecology Group

- BIOL 360 - General Ecology Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)
- AND BIOL 377LAB - Regional Natural History Credits: (3)
- BIOL 420 - Environmental Microbiology Credits: (5)
- BIOL 461 - Community Ecology Credits: (3)
- BIOL 462 - Wildlife and Fisheries Ecology Credits: (5)
- BIOL 463 - Limnology Credits: (5)
- BIOL 464 - Terrestrial Plant Ecology Credits: (5)
- BIOL 466 - Conservation Biology Credits: (5)
- BIOL 467 - Biological Field Techniques Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Evolution Group

- BIOL 353 - Integrative Anatomy Credits: (6)
- BIOL 421 - General Virology Credits: (5)
- BIOL 465 - Biology of Animal Behavior Credits: (4)
- BIOL 470 - Mechanisms of Evolution Credits: (5) (NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Molecular and Cell Group

- BIOL 323 - Microbiology Credits: (5)
- BIOL 354 - Developmental Biology Credits: (5)
- BIOL 421 - General Virology Credits: (5)
- BIOL 422 - Immunology Credits: (5)
- BIOL 423 - Techniques in Immunology and Virology Credits: (5)
- BIOL 425 - Molecular Biotechnology Credits: (5)
- BIOL 430 - Cell Biology Credits: (5)
- BIOL 431 - The Cell Biology of Cancer Credits: (3)
- BIOL 431LAB - The Cell Biology of Cancer Lab Credits: (2)
- BIOL 441 - Plant Physiology Credits: (5)
- BIOL 457 - Fundamentals of Neuroscience Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Structure/Function Group

- BIOL 343 - Plant Anatomy Credits: (5)
- BIOL 353 - Integrative Anatomy Credits: (6)
- BIOL 354 - Developmental Biology Credits: (5)
- BIOL 355 - Human Anatomy and Physiology I Credits: (5)
- AND BIOL 356 - Human Anatomy and Physiology II Credits: (5)
- BIOL 422 - Immunology Credits: (5)
- BIOL 423 - Techniques in Immunology and Virology Credits: (5)
- BIOL 426 - Medical Microbiology Credits: (3)
- BIOL 426LAB - Medical Microbiology Laboratory Credits: (2)
- BIOL 441 - Plant Physiology Credits: (5)
- BIOL 454 - Histology Credits: (3)
- BIOL 455 - Integrative Animal Physiology Credits: (5)
- BIOL 457 - Fundamentals of Neuroscience Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

## Biology BS, Biology Teaching Specialization

This major satisfies the criteria for an endorsement in biology and qualifies students to teach biology at the high school, middle school, or junior high levels. Students should consider working toward endorsement in a second area such as chemistry, Earth science, physics, middle-level science, or middle-level mathematics. Students taking this major are required to apply to the Teacher Certification Program and complete the Professional Education Program requirements offered through the Department of Educational Foundations and Curriculum, with the exception of EFC 416 and EFC 350 ( 39 total credits required). Students completing this program are required to demonstrate knowledge, skill, and disposition proficiency through a program portfolio prior to student teaching. Students must pass the WEST-E exam for biology to receive a biology endorsement.

Students consult with the appropriate biology advisor for approval of their BS program and electives, which must be submitted for approval to the biological sciences department at least one academic year preceding graduation. All students in the BS biology major must complete all BS core requirements, plus additional specific requirements. Additionally, students will need to choose a specified number of courses from different groupings of upper-division courses. A maximum of 15 credits in BIOL 295, BIOL 490, BIOL 495, and BIOL 496 may be included in the major. CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. BIOL 181 has a pre or co-requisite of CHEM 181.

Biology Teaching Core Requirements Credits: (39)

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 492 - Laboratory Experience in Teaching Biological Sciences Credits: (2)
- SCED 301 - Interdisciplinary Science and Engineering Inquiry Credits: (5)
- SCED 324 - Science Education in Middle and Secondary Schools I Credits: (3)
- SCED 325 - Science Education in Middle and Secondary Schools II Credits: (3)
- SCED 487 - Teaching Middle and Secondary Science Seminar Credits: (2)

General Chemistry and Laboratory Credits: (23)

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)
- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- CHEM 362 - Organic Chemistry II Credits: (3)

Additional Required Courses Credits: 20-30

- 1 course from the Biological Diversity Group Credits: (4-5) BIOL 323, Microbiology recommended.
- 1 course from the Ecology Group Credits: (4-5) BIOL 360, General Ecology recommended.
- 1 course from the Evolution Group Credits: (4-5) BIOL 470, Mechanisms of Evolution recommended.
- 1 course from the Molecular and Cell Group Credits: (5) BIOL 430, Cell Biology or BIOL 435, Molecular Biotechnology recommended.
- 1 course from the Structure/Function Group Credits: (3-10) BIOL 353, BIOL 355, and/or BIOL 356 recommended.

Biological Diversity Group

- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 323 - Microbiology Credits: (5)
- BIOL 341 - Plant Taxonomy Credits: (5)
- BIOL 344 - Dendrology Credits: (4)
- BIOL 351 - General Entomology Credits: (5)
- BIOL 352 - Parasitology Credits: (5)
- BIOL 421 - General Virology Credits: (5)
- BIOL 443 - Mycology Credits: (5)
- BIOL 444 - Algae and Bryophytes Credits: (5)
- BIOL 445 - Field Mycology Credits: (5)
- BIOL 450 - Ichthyology Credits: (4)
- BIOL 451 - Herpetology Credits: (4)
- BIOL 452 - Ornithology Credits: (4)
- BIOL 453 - Mammalogy Credits: (5) (NOTE: Courses are listed in multiple groups; a course may only count in one area.)

## Biology BS, Biomedical Science Specialization

The biomedical science specialization will serve students that are interested in pursuing careers in human health (medicine, dentistry, optometry, physical therapy, pharmacy) and veterinary medicine. This specialization allows for the study of human biology, together with a core of fundamental physical science principles (chemistry and physics). This specialization will allow students to apply these physical principals to the study of biological systems, which is an essential requirement of professional health programs in medicine, dentistry, optometry, physical therapy, pre-pharmacy and physician assistant programs. The biomedical science specialization offers individualized academic plans to help each student achieve his or her goals in the biomedical field.

Students consult with the appropriate biology advisor for approval of their BS program and electives, which must be submitted for approval to the biological sciences department at least one academic year preceding graduation. All students in the BS biology major must complete all BS core requirements, plus additional specific requirements. Additionally, students will need to choose a specified number of courses from different groupings of upper-division courses. A maximum of 15 credits in BIOL 295, BIOL 490, BIOL 495, and BIOL 496 may be
included in the major. CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. BIOL 181 has pre or co-requisite of CHEM 181.

## Biology Core Requirements

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 499S - Senior Seminar Credits: (1)

General Chemistry and Laboratory Credits: (15)

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Total Core Credits: 40

Select from the following sequences Credits: 15

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113- Introductory Physics III with Laboratory Credits: (5) OR
- PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- PHYS 122 - Introductory Physics for Life Sciences II Credits: (5)
- PHYS 123 - Introductory Physics for Life Sciences III Credits: (5) OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182 - General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)

Additional Required Courses Credits: 19-28

- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- CHEM 362 - Organic Chemistry II Credits: (3)
- 3 courses* from the Ecology, Evolution, Molecular/Cell and/or Structure/Function Groups Credits: (11-20)
(*NOTE: Courses must come from three different groups.)

Department-Approved Electives Credits: 17-26

Total Credits: 100

Ecology Group

- BIOL 360 - General Ecology Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)

## Biology BS, Ecology and Evolutionary Biology Specialization

Ecology is the study of how organisms interact with their physical and biological environment. Evolution considers how
populations change over time to generate the rich diversity of life on earth and is the unifying theory of biology. The ecology and evolutionary specialization is designed for students broadly interested in basic and applied biology, natural resource management, agriculture, ecological restoration, conservation biology, disease dynamics, animal behavior, and biological research. Students following this specialization will gain experience in natural history, field research, and experimental design. Potential careers may be found in federal, state, and tribal agencies, or private environmental consulting firms, research laboratories, and natural history museums. Students interested in graduate study should work closely with their advisor to tailor this specialization to their particular field of interest.

Students consult with the appropriate biology advisor for approval of their BS program and electives, which must be submitted for approval to the Biological Sciences Department at least one academic year preceding graduation. All students in the BS Biology major must complete all BS core requirements, plus additional specific requirements. Additionally, students will need to choose a specified number of courses from different groupings of upper division courses. A maximum of 15 credits in BIOL 295, BIOL 490, BIOL 495, and BIOL 496 may be included in the major. CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. BIOL 181 has a pre or co-requisite of CHEM 181.

Biology Core Requirements

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183-General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 499S - Senior Seminar Credits: (1)

General Chemistry and Laboratory Credits: (15)

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Total Core Credits: 40

Additional Required Courses Credits: 15

- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- MATH 170 - Intuitive Calculus Credits: (5)
- OR MATH 172 - Calculus I Credits: (5)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- OR PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- OR PHYS 181-General Physics I with Laboratory Credits: (5)

Select from the following for 19-30 credits.

- 1 course from the Biological Diversity Group Credits: (4-5)
- 1 course from the Ecology Group Credits: (4-5)*
- 1 course from the Evolution Group Credits: (4-5)*
- 1 additional course from the Ecology OR Evolution Group Credits: (4-5)*
- 1 additional course from the Molecular/Cell OR Structure/Function Group Credits: (3-10)
(*NOTE: Courses can only be counted once.)
Department-Approved Electives Credits: 15-26
Total Credits: 100
Biological Diversity Group
- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 323 - Microbiology Credits: (5)
- BIOL 341 - Plant Taxonomy Credits: (5)
- BIOL 344 - Dendrology Credits: (4)

College and Department Information

Biological Sciences Department
College of the Sciences

## Biology BS, General Biology Specialization

The BS Biology major offers undergraduate students a degree program with depth of training in the biological sciences and supporting fields. This program prepares students for immediate entrance into careers in biological sciences or for graduate work (for preparation for teaching high school biology, see biology teaching specialization).

Students consult with the appropriate biology advisor for approval of their BS program and electives, which must be submitted for approval to the biological sciences department at least one academic year preceding graduation. All students in the BS Biology major must complete all BS core requirements, plus additional specific requirements. Additionally, students will need to choose a specified number of courses from different groupings of upper division courses. A maximum of 15 credits in BIOL 295, BIOL 490, BIL 495 and BIOL 496 may be included in the major. CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. BIOL 181 has a pre or co-requisite of CHEM 181.

## Biology Core Requirements

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 499S - Senior Seminar Credits: (1)

General Chemistry and Laboratory Credits: (15)

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Total Core Credits: 40

Additional Required Courses Credits: 10

- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- OR PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- OR PHYS 181-General Physics I with Laboratory Credits: (5)

Select from the following for 20-30 credits.

- 1 course from the Biological Diversity Group Credits: (4-5)
- 1 course from the Ecology Group Credits: (4-5)*
- 1 course from the Evolution Group Credits: (4-5)*
- 1 course from the Molecular/Cell Group Credits: (5)*
- 1 course from the Structure/Function Group Credits: (3-10)
(*NOTE: Courses can only be counted once.)

Department-Approved Electives Credits: 20-30

Total Credits: 100

Biological Diversity Group

- BIOL 322 - Introductory Microbiology Credits: (5)

(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

College and Department Information

Biological Sciences Department
College of the Sciences

## Biology BS, Molecular and Cell Biology Specialization

Molecular and Cell Biology is the study of fundamental processes that form the basis of biological life and the techniques used to study these processes. The study of molecular and cell biology facilitates understanding of a wide variety of disciplines, including genetics, developmental biology, physiology, and evolutions of organisms. The goal of the MCB emphasis is to prepare graduates to be competitive in applications for entry into graduate degree programs, professional programs in the biomedical fields, or jobs in biomedical/agricultural research labs in government and industry.

Students consult with the appropriate biology advisor for approval of their BS program and electives, which must be submitted for approval to the Biological Sciences Department at least one academic year preceding graduation. All students in the BS Biology major must complete all BS core requirements, plus additional specific requirements. Additionally, students will need to choose a specified number of courses from different groupings of upper division courses. A maximum of 15 credits in BIOL 295, BIOL 490, BIOL 495, and BIOL 496 may be included in the major. CHEM 181 has a prerequisite of high school chemistry and qualification for MATH 153. BIOL 181 has a pre or co-requisite of CHEM 181.

Biology Core Requirements

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 499S - Senior Seminar Credits: (1)

General Chemistry and Laboratory Credits: (15)

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183-General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Total Core Credits: 40

Additional Required Courses Credits: 21

- BIOL 425 - Molecular Biotechnology Credits: (5)
- BIOL 430 - Cell Biology Credits: (5)
- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- CHEM 362 - Organic Chemistry II Credits: (3)
- CHEM 431 - Biochemistry I Credits: (3)

Select from the following for 12-19 credits.

- 1 course from the Molecular/Cell Group Credits: (5)
- 2 courses* from the Ecology, Evolution, and/or Structure/Function Groups Credits: (7-14)
(*NOTE: Courses must come from two different groups.)

Department-Approved Electives Credits: 20-27

Total Credits: 100

## Ecology Group

- BIOL 360 - General Ecology Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)
- AND BIOL 377LAB - Regional Natural History Credits: (3)
- BIOL 420 - Environmental Microbiology Credits: (5)
- BIOL 461 - Community Ecology Credits: (3)
- BIOL 462 - Wildlife and Fisheries Ecology Credits: (5)
- BIOL 463 - Limnology Credits: (5)
- BIOL 464 - Terrestrial Plant Ecology Credits: (5)
- BIOL 466 - Conservation Biology Credits: (5)
- BIOL 467 - Biological Field Techniques Credits: (5) (NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Evolution Group

- BIOL 353 - Integrative Anatomy Credits: (6)
- BIOL 421 - General Virology Credits: (5)
- BIOL 465 - Biology of Animal Behavior Credits: (4)
- BIOL 470 - Mechanisms of Evolution Credits: (5) (NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Molecular and Cell Group

- BIOL 323 - Microbiology Credits: (5)
- BIOL 354 - Developmental Biology Credits: (5)
- BIOL 421 - General Virology Credits: (5)
- BIOL 422 - Immunology Credits: (5)
- BIOL 423 - Techniques in Immunology and Virology Credits: (5)
- BIOL 425 - Molecular Biotechnology Credits: (5)
- BIOL 430 - Cell Biology Credits: (5)
- BIOL 431 - The Cell Biology of Cancer Credits: (3)
- BIOL 431LAB - The Cell Biology of Cancer Lab Credits: (2)
- BIOL 441 - Plant Physiology Credits: (5)
- BIOL 457 - Fundamentals of Neuroscience Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Structure/Function Group

- BIOL 343 - Plant Anatomy Credits: (5)
- BIOL 353 - Integrative Anatomy Credits: (6)
- BIOL 354 - Developmental Biology Credits: (5)
- BIOL 355 - Human Anatomy and Physiology I Credits: (5)
- AND BIOL 356 - Human Anatomy and Physiology II Credits: (5)
- BIOL 422 - Immunology Credits: (5)
- BIOL 423 - Techniques in Immunology and Virology Credits: (5)
- BIOL 426 - Medical Microbiology Credits: (3)
- BIOL 426LAB - Medical Microbiology Laboratory Credits: (2)
- BIOL 441 - Plant Physiology Credits: (5)
- BIOL 454 - Histology Credits: (3)
- BIOL 455 - Integrative Animal Physiology Credits: (5)
- BIOL 457 - Fundamentals of Neuroscience Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

Electives
Additionally, courses from the following group may also be used as electives:

Biological Diversity Group

- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 323 - Microbiology Credits: (5)
- BIOL 341 - Plant Taxonomy Credits: (5)
- BIOL 344 - Dendrology Credits: (4)
- BIOL 351 - General Entomology Credits: (5)
- BIOL 352 - Parasitology Credits: (5)
- BIOL 421 - General Virology Credits: (5)
- BIOL 443 - Mycology Credits: (5)
- BIOL 444 - Algae and Bryophytes Credits: (5)
- BIOL 445 - Field Mycology Credits: (5)
- BIOL 450 - Ichthyology Credits: (4)
- BIOL 451 - Herpetology Credits: (4)
- BIOL 452 - Ornithology Credits: (4)
- BIOL 453 - Mammalogy Credits: (5)
(NOTE: Courses are listed in multiple groups; a course may only count in one area.)

## Registered Microbiologists

With guidance from their advisor, students following the molecular and cell biology specialization will be eligible to become registered microbiologists (National Registry of Microbiologists, American Academy of Microbiology) upon completing the following requirements:

1. A minimum of a baccalaureate degree in biological science with 30 quarter credits in microbiology courses.
2. Acceptable experience equivalent to one year of fulltime work in a microbiology laboratory related to the
specialty area in which certification is sought. Experience must have been gained within the immediate past three years. Certification as a conditional registrant is offered to individuals who possess the academic qualifications for registered microbiologist, but who lack the required year of fulltime laboratory experience.

College and Department Information

## Biology: Teaching Secondary Minor

This minor is restricted to students working on a teaching major in chemistry, earth science, middle-level science teaching or physics if not the chosen designated science area. Students completing this minor are required to demonstrate proficiency of student learning outcomes through a program portfolio prior to student teaching. Students may satisfy the biology reaching requirement by either taking BIOL 492 or through an
independent live science teaching experience. In addition, students must pass the WEST-E exam for biology to receive a biology endorsement.

## Required Courses

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183-General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 321 - Genetics Credits: (5)
- BIOL 360 - General Ecology Credits: (5)
- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Total Credits: 44

## Career and Technical Education Teacher Preparation Certificate

This two-year competency block certificate program is intended for business or industry professionals who are interested in obtaining a career and technical teaching certificate. The program will provide the tools necessary for success in the classroom.

During the program participants will complete a mentored teaching experience or practicum each year. The program is offered through the office of Continuing Education in collaboration with Occupational Education.

## Prerequisites:

1. Current Career and Technical Education Probationary Teaching Certificate, OR
2. 6,000 hours paid occupational experience in the area you wish to teach, and fingerprint clearance from both the Washington State Patrol and the FBI must be on file at the office of Superintendent of Public Instruction (OSPI).
3. Successful completion of all three sections in the Washington Educator Skills Test - Basic (WEST-B). Test scores must be submitted prior to completing the program in order to receive CWU's recommendation for career and technical education teacher certification, OR
4. Washington State Residency Permit or professional teacher certification.

Included in each year of the program is a 70 -hour practicum. Passing grades in all courses grants the individual the competencies in general and specific safety requirement.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/family-consumer/career-technical-education-teacher-preparation-program or by contacting the department directly.

## Career and Technical Education Certificate

Included in each year of the program is a 70 -hour practicum. Passing grades in all courses grants the individual the competencies in general and specific safety requirement.

Required Courses
Block 1:

- CTE 310A - Career and Technical Education Teaching Methods Credits: (3-5) Must be taken for 4 credits.
- CTE 310B - Career and Technical Education Occupational Analysis Credits: (3-5)
Must be taken for 3 credits.
- CTE 310C - Career and Technical Education Course Organization and Curriculum Design Credits: (3-5) Must be taken for 5 credits.

Block 2:

- CTE 311A - Career and Technical Education Coordination Techniques of Cooperative Education Credits: (3-5)
Must be taken for 3 credits.
- CTE 311B - History and Philosophy of Career and Technical Education Credits: (3-5) Must be taken for 3 credits.
- CTE 311C - Career and Technical Education Student and Professional Leadership Development Credits: (3-5)
Must be taken for 4 credits.
- CTE 311D - Career and Technical Education School Law and Issues Related to Abuse Credits: (2-5) Must be taken for 2 credits.

Total Credits: 24

## Department Information

The department offers three majors. In each major, courses in the first two years emphasize fundamental topics in chemistry, mathematics, and physics. Students then choose advanced courses in chemistry and related areas to complete the requirements in their major.

These majors provide opportunities for practical experience in chemistry. Students are encouraged to do research on campus with a faculty member, and to participate in the department's seminar program. Two minors are offered to supplement career related fields.

## Department Standards

Students must have earned a grade of C- or higher in all prerequisites to be admitted to a course. To graduate, all chemistry majors are required to achieve at least a 2.0 cumulative GPA and a 2.25 GPA in courses required for the major. To receive a minor in chemistry, students are required to achieve a 2.25 gpa in courses required for the minor.

## Lab Fees

All chemistry labs have fees associated with them that must be paid when registering for the course.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/chemistry or by contacting the department directly.

## Chemistry Major, BA

This BA degree program is designed for students preparing to incorporate chemistry into broader careers such as teaching, health sciences (PA, nursing, pre-PT), industry, business, and/or law. It is also the appropriate major for students seeking endorsement in teaching high school chemistry.

A BS is recommended for students who anticipate pursuing a graduate degree in chemistry, health programs (MD, DO, DVM, DDS, Pharm D, etc.) or chemistry careers that might require training in a greater depth of chemistry subdisciplines. See a faculty advisor in the Chemistry Department as soon as possible to develop a course of study and to determine which degree program to pursue.

## Teaching Endorsement Requirements:

This major partially satisfies the criteria for a teaching endorsement in Chemistry (5-12), qualifying students to teach Chemistry at the high school, middle, or junior high levels. Students who successfully complete the Chemistry BA and STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the chemistry teaching advisor as soon as possible to develop a course of study.

Chemistry BA Core Requirements
General Chemistry and Laboratory Credits: 15

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)

## Chemistry Major, BS

The bachelor of science major is designed for students who plan a career in chemistry or related fields. The program prepares students for further study in graduate programs, or to enter the workplace directly. The BS degree is certified by the American Chemical Society if the nine department-approved electives come from a designated set of upper-division courses within chemistry. Consult your major advisor about departmentapproved electives.

Students are recommended to take MATH 273 before taking CHEM 381.

Chemistry BS Core Requirements
General Chemistry and Laboratory: Credits 15

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- AND CHEM 183LAB - General Chemistry Laboratory III Credits: (1)
- OR CHEM 193LAB - General Chemistry III Honors Laboratory Credits: (1)

Organic Chemistry: Credits 13

- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- CHEM 362 - Organic Chemistry II Credits: (3)
- CHEM 363 - Organic Chemistry III Credits: (3)
- CHEM 363LAB - Organic Chemistry Laboratory II Credits: (2)

Total Core Credits: 28
Required Courses
Quantitative Analysis Credits: 5

- CHEM 332 - Quantitative Analysis Credits: (3)
- CHEM 332LAB - Quantitative Analysis Laboratory Credits: (2)

Upper-Division Chemistry Credits: 14

- CHEM 350 - Inorganic Chemistry Credits: (3)
- CHEM 431 - Biochemistry I Credits: (3)
- CHEM 431LAB - Biochemistry Laboratory Credits: (2)
- CHEM 452 - Instrumental Analysis Lecture Credits: (3)
- CHEM 452LAB - Instrumental Analysis Laboratory Credits: (2)
- CHEM 488 - Colloquium Credits: (1)

Physical Chemistry Credits: 15

- CHEM 381 - Physical Chemistry (Thermodynamics) Credits: (5)
- CHEM 382 - Physical Chemistry (Quantum Chemistry) Credits: (3)
- CHEM 382LAB - Integrated Physical/Inorganic Laboratory I Credits: (2)
- CHEM 383 - Physical Chemistry (Quantum, Statistical Mechanics) III Credits: (4)
- CHEM 383LAB - Integrated Physical/Inorganic Laboratory II Credits: (1)

Introductory, General or Life Sciences Physics Credits: 15

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113 - Introductory Physics III with Laboratory Credits: (5) OR
- PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- PHYS 122 - Introductory Physics for Life Sciences II Credits: (5)
- PHYS 123 - Introductory Physics for Life Sciences III Credits: (5) OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182-General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)

Calculus Credits: 15

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 272 - Multivariable Calculus I Credits: (5)

Department-Approved Electives Credits: 9
Total Credits: 101

## Chemistry Major BS, Biochemistry Specialization

This specialization is designed for students who plan a career in biochemistry or a related health science area such as medicine or dentistry. Majors may pursue further graduate studies, a career in biotechnology or a related industry.

Students are recommended to take MATH 273 before taking CHEM 381.

Chemistry BS Core Requirements
General Chemistry and Laboratory: Credits 15

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- AND CHEM 183LAB - General Chemistry Laboratory III Credits: (1)
- OR CHEM 193LAB - General Chemistry III Honors Laboratory Credits: (1)

Organic Chemistry: Credits 13

- CHEM 361 - Organic Chemistry I Credits: (3)
- CHEM 361LAB - Organic Chemistry Laboratory I Credits: (2)
- CHEM 362 - Organic Chemistry II Credits: (3)
- CHEM 363 - Organic Chemistry III Credits: (3)
- CHEM 363LAB - Organic Chemistry Laboratory II Credits: (2)

## Total Core Credits: 28

Required Courses Credits: 82

- BIOL 321 - Genetics Credits: (5)
- CHEM 350 - Inorganic Chemistry Credits: (3)
- CHEM 488 - Colloquium Credits: (1)

Calculus Credits: 15

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 272 - Multivariable Calculus I Credits: (5)

General Biology Credits: 15

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)

Quantitative Analysis Credits: 5

- CHEM 332 - Quantitative Analysis Credits: (3)
- CHEM 332LAB - Quantitative Analysis Laboratory Credits: (2)

Physical Chemistry Credits: 10

- CHEM 381 - Physical Chemistry (Thermodynamics) Credits: (5)
- CHEM 382 - Physical Chemistry (Quantum Chemistry) Credits: (3)
- CHEM 382LAB - Integrated Physical/Inorganic Laboratory I Credits: (2)

Biochemistry Credits: 13

- CHEM 431 - Biochemistry I Credits: (3)
- CHEM 431LAB - Biochemistry Laboratory Credits: (2)
- CHEM 432 - Biochemistry II Credits: (3)
- CHEM 433 - Biochemistry III Credits: (3)
- CHEM 433LAB - Biochemistry Lab II Credits: (2)

Introductory, General or Life Sciences Physics Credits: 15

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)

## Professors

César García, PhD, information sciences
James L. Gaudino, PhD, communication studies

## Associate Professors

Cynthia Mitchell, MBA, operations management and finance Maria Sanders, MFA, film editing

## Assistant Professors

Kevin Brett, MA, communication and society
Francesco Somaini, PhD, media studies

## Lecturers

Michael Caldwell, MFA, film and video studies
Yong Cao, ABD, communication
Emily DuPlessis, MA, communication
Jamie Gilbert, MEd, non-profit organization management
Jennifer Green, MA, cultural anthropology
Jillene Krause, ABD, communication studies
Joshua Nelson, ABD, communication studies
Melissa Johnson, MA, English, film studies
Terri Reddout, MS, communication

Patrick Smith, MFA, film and media production
Toby Staab, MEd, education
Arrington Stoll, PhD, communication
Nicholas Temple, PhD, communication studies
Jon Ward, MA, film and video studies

## Staff

Bianca Bailey, secretary senior

## Department Information

The Department of Communication prepares students to become active participants in communicating with and the shaping of modern culture in a global society. The department emphasizes student-centered instruction in gathering and disseminating written, spoken, and visual information, as well as course work in the processes, effects, and theories of human communication. The department is committed to a liberal education in written, oral, visual, and convergent media communication, as well as to training in diverse professional fields.

## Department Standards

## Admission Requirements

Admission to the Department of Communication majors in Digital Journalism, Communication Studies and Public Relations is selective. Students need to complete the application form, attach a copy of their AR Report, and submit these documents to the Department of Communication office in Bouillon Hall 232A. Only students with a minimal overall grade point average of 2.4 (Digital Journalism) or 2.7 (Communication Studies and Public Relations) will be accepted. Should students wish to change majors within the department, they must reapply to the new major.

## Completion Requirements

Once admitted to the major, students must take COM 201 and COM 207 as soon as possible. An overall average of B in these two foundational courses is required. In all other courses counted toward fulfilling major requirements, a minimum grade of C- is required. Students must also maintain an overall 2.4 (Digital Journalism) or 2.7 (Communication Studies and Public Relations) grade point average. No more than 8 credits may be counted twice in fulfilling an internal or external minor.

## Financial Obligations

Production courses required for broadcast journalism and/or film and video studies have associated lab fees.

Communication Foundation Core Requirements
COM 201 - Introduction to Mass Communication Credits: 5
COM 207 - Introduction to Human Communication Credits: 5
Total Core Credits: 10

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offerings can be found at the department website: www.cwu.edu/communication or by contacting the department directly.

## Communication Studies Major, BA

The communication studies major begins with a traditional liberal arts perspective, infuses an international/intercultural perspective, and then focuses on practical application of communication knowledge and skill. The major is intended for students who wish to be at home in a wide range of situations and cultures and who value the role of communication in creating effective relationships locally and globally. The major is also an effective foundation for advanced study (academic or professional). Students must complete the two communication foundation courses (COM 201 and COM 207) with an overall average of B , in order to graduate from the major.

Communication Foundation Core Requirements

- COM 201 - Introduction to Mass Communication Credits: (5)
- COM 207- Introduction to Human Communication Credits: (5)

Total Communication Foundation Core Credits: 10

Required Courses

- COM 251 - Small Group Dynamics Credits: (4)
- COM 253 - Interpersonal Communication Credits: (4)
- COM 302 - Intercultural Communication Credits: (4)
- COM 345 - Business and Professional Speaking Credits: (4)
- COM 350 - Persuasion and Culture Credits: (4)
- COM 365 - Organizational Communication Credits: (4)
- COM 380 - Non-Verbal Communication Credits: (4)
- COM 401 - Communication Theory Credits: (4)
- COM 450 - Advanced Public Speaking Credits: (4)
- COM 451 - Communication Analysis and Research Credits: (4)
- COM 485 - Senior Seminar Credits: (4)
- COM 489 - Portfolio Assessment Credits: (1)

Total Required Course Credits: 45

Collaboration Requirement - minimum of 4 credits

Students are required to take at least one upper division course ( 300 level or above) in a department outside the Communication Department. Collaboration course must be approved by major advisor.

Specialization or Study Abroad

## Study Abroad Option

Twelve (12) pre-approved credits from CWU or participating international institution.

Non-Study Abroad Specialization Option
Twelve (12) pre-approved credits: You must take at least eight (8) credits from Intercultural/International Communication or at least eight (8) credits from Organizational Communication.

Intercultural and International Communication

- COM 362 - Conflict and Communication Credits: (4)
- COM 402 - Gender Communication Credits: (4)
- COM 407 - Advanced Intercultural Communication Credits: (4)
- COM 490 - Cooperative Education Credits: (1-12) (May be repeated up to 4 times)

Organizational Communication

- COM 375 - Interviewing Principles and Techniques Credits: (4)
- COM 403 - Family Communication Credits: (4)
- COM 465 - Communication and Organizational Leadership Credits: (4)
- COM 490 - Cooperative Education Credits: (1-12) (Must be taken for 4 credits)

Specialization or Study Abroad Total Credits: 12
Department-approved upper-division electives in COM Credits: 4

May include COM 315.

Total Credits: 75

## Digital Journalism Major BA, Broadcast Journalism Specialization

In today's environment of converging media, successful journalists need the necessary skills and concepts to tell meaningful stories for a variety of outlets. In this major, students learn how to conceive ideas and collect and present information using words, pictures, and sounds to craft news stories that are accurate, fair, clear, and compelling. Whether destined for print, online or broadcast presentation, the focus is on preparing students to research, report and communicate news and nonfiction stories that engage audiences and make a difference in people's lives. Students will learn how to build an online platform for their journalism and how to engage with their audience. Students will also understand the ethical, legal,
historical and societal environment of journalism and the fundamental role media plays in our social, political and economic systems. A specialization in journalistic reporting and writing or broadcast journalism is required.

## Program Requirements

Students must complete the two communication foundation courses (COM 201 and COM 207) with an overall average of B, in order to graduate from the major.

Communication Foundation Core Requirements

- COM 201 - Introduction to Mass Communication Credits: (5)
- COM 207 - Introduction to Human Communication Credits: (5)

Total Communication Foundation Core Credits: 10

Digital Journalism Core

Digital Journalism Core Requirements Credits: (21)

- COM 226 - Introduction to Writing and Reporting for Digital Journalism Credits: (5)
- COM 303- Online and Social Media Strategies Credits: (5)
- COM 321 - Visual Storytelling Credits: (5)
- COM 489 - Portfolio Assessment Credits: (1)
- COM 490 - Cooperative Education Credits: (1-12) (Must take at least 5 credits total)

Select two from the following - Credits: (8)

- COM 333 - Communication Ethics Credits: (4)
- COM 369 - Mass Media and Society Credits: (4)
- COM 382 - History of American Journalism Credits: (4)
- COM 460 - Communication Law Credits: (4)

Total Digital Journalism Core Credits: 29

Broadcast Journalism Specialization

The broadcast journalism specialization builds professional skills and ethical awareness in broadcast reporting and video production, from a general knowledge of journalism and mass media studies. Courses are offered in broadcast news writing, studio and field production, and news producing and directing. Students will also get on-the-job education and training in a broadcast internship. Rigorous and demanding, this program is designed to provide a blend of theory and hands-on training in on-air and behind-the-scenes operations, which are required for graduates to enjoy successful careers in a highly competitive industry. Students will put those skills to use on CentralNewsWatch, Central's weekly student-run newscast, and also have the option of putting those skills to use at The Observer, Central's weekly student-run newspaper, and at Pulse, Central's twice-quarterly student lifestyle magazine.

Required Courses Credits: (24)

- COM 310 - Writing and Reporting for Broadcast Journalism Credits: (5)
- COM 322 - Introduction to Studio Production Credits: (4)
- COM 322LAB - Introduction to Studio Production Lab Credits: (1)
- COM 341 - Introduction to Field Production Credits: (4)
- COM 341LAB - Introduction to Field Production Lab Credits: (1)
- COM 342 - Broadcast News Producing Credits: (4)
- Advisor-approved Electives Credits: (5)

Select from the following - Credits: (12)
Must take at least 6 credits of CentralNewsWatch or
CentralNewsWatch Management.

- COM 442 - CentralNewsWatch Reporting Credits: (3)
- COM 446 - Pulse Credits: (2)
- FILM 452 - Applied Studio Production Credits: (1-2)
- COM 462 - CentralNewsWatch Management Credits: (3)
- COM 468 - Observer Credits: (1-3)

Total Specialization Credits: 36
Total Credits: 75

- COM 321 - Visual Storytelling Credits: (5)
- COM 489 - Portfolio Assessment Credits: (1)
- COM 490-Cooperative Education Credits: (1-12) (Must take at least 5 credits total)

Select two from the following - Credits: (8)

- COM 333 - Communication Ethics Credits: (4)
- COM 369 - Mass Media and Society Credits: (4)
- COM 382 - History of American Journalism Credits: (4)
- COM 460 - Communication Law Credits: (4)

Total Digital Journalism Core Credits: 29

Journalistic Writing and Reporting Specialization

The journalistic writing and reporting specialization teaches students the skills, concepts and perspectives they need to be successful in print and online media. Students will learn how to conceive story ideas, gather information, write and edit stories, incorporate digital and multimedia elements into those stories, and present those stories for print and/or online publication. Students will put those skills to use on The Observer, Central's weekly student-run newspaper, and also have the option of putting those skills to use at Pulse, Central's twice-quarterly student lifestyle magazine, and at Newswatch, Central's weekly student-run newscast. They will also get on-the-job education and training in a print or online internship.

## Required Courses

- COM 308 - Public Affairs Reporting and Writing Credits: (5)
- COM 347 - Copy Editing Credits: (4)
- COM 464 - Nonfiction Multimedia Storytelling Credits: (5)
- COM 466 - Investigative Reporting and Writing Credits: (3)
- COM 466LAB - Investigative Reporting and Writing Lab Credits: (2)

Select one from the following - Credits: (4)

- COM 408 - Feature Writing Credits: (4)
- COM 409 - Magazine Freelancing Credits: (4)
- COM 486 - Advanced Journalism Seminar Credits: (4)

Select from the following - Credits: (12)
Must take at least 6 credits of Observer.

- COM 442 - CentralNewsWatch Reporting Credits: (3)
- COM 446 - Pulse Credits: (2)
- COM 468 - Observer Credits: (1-3)
- COM 478 - Advanced Newspaper Editing Credits: (3-6)

Total Specialization Credits: 35
Total Credits: 74

College of Arts and Humanities

## Public Relations Major, BA

Public relations has become an indispensable part of any organization, company, institution, or government trying to create a body of public opinion to support its mission, vision, or values. Understood as a management function in modern organizations in the corporate world, this same professional level has been adopted by NGOs, non-profit organizations, and even governments and countries as a whole. This new scenario offers plenty of opportunities for multifaceted public relations practitioners with skills in written and interpersonal communication, research, negotiation, leadership, creativity, logistics, and problem solving.

Students must complete the two communication foundation courses (COM 201 and COM 207) with an overall average of B, in order to graduate from the major.

Communication Foundation Core Requirements

- COM 201 - Introduction to Mass Communication Credits: (5)
- COM 207 - Introduction to Human Communication Credits: (5)

Total Communication Foundation Core Credits: 10

Required Courses

- COM 208 - Introduction to Public Relations Writing Credits: (4)
- COM 270 - Introduction to Public Relations Credits: (4)
- COM 345 - Business and Professional Speaking Credits: (4)
- COM 370 - Advanced Public Relations Writing Credits: (4)
- COM 470 - Public Relations Strategies Credits: (4)
- COM 475 - Public Relations Management Credits: (4)
- COM 489 - Portfolio Assessment Credits: (1)
- COM 490 - Cooperative Education Credits: (1-12) (must be taken for 5 credits)
- MKT 360 - Principles of Marketing Credits: (5)

Select eight (8) credits in media from the following:

- COM 303- Online and Social Media Strategies Credits: (5)
- COM 442 - CentralNewsWatch Reporting Credits: (3)
- COM 446 - Pulse Credits: (2)
- COM 468 - Observer Credits: (1-3)
- COM 478 - Advanced Newspaper Editing Credits: (3-6)
- COM 481 - Central Communication Agency Credits: (2)
- COM 483 - Advanced Central Communication Agency Credits: (3)

Select eight (8) credits in public relations specializations from the following:

- COM 371 - Event Planning and Management Credits: (4)
- COM 472 - Global Public Relations Credits: (4)
- COM 473 - Crisis Communication Management Credits: (4)
- COM 487 - Advanced Public Relations Seminar Credits: (4)

Select fourteen (14) pre-approved upper-division elective credits from the following:

Student may choose additional COM course with advisor preapproval. Credits cannot be counted twice in the major and electives.

- COM 300 - Media Research Credits: (5)
- COM 302 - Intercultural Communication Credits: (4)
- COM 305 - Advertising Copywriting Credits: (4)
- COM 312 - Introduction to Non-Profit Leadership Credits: (4)
- COM 315 - Studies in Communication Credits: (1)
- COM 321 - Visual Storytelling Credits: (5)
- COM 333 - Communication Ethics Credits: (4)
- COM 347 - Copy Editing Credits: (4)
- COM 348 - Publication Design Credits: (4)
- COM 350 - Persuasion and Culture Credits: (4)
- COM 362 - Conflict and Communication Credits: (4)
- COM 365 - Organizational Communication Credits: (4)
- COM 369 - Mass Media and Society Credits: (4)
- COM 371 - Event Planning and Management Credits: (4)
- COM 375 - Interviewing Principles and Techniques Credits: (4)
- COM 380 - Non-Verbal Communication Credits: (4)
- COM 388 - Advertising Planning Credits: (4)
- COM 401-Communication Theory Credits: (4)
- COM 402 - Gender Communication Credits: (4)
- COM 403 - Family Communication Credits: (4)
- COM 427 - Grant Writing Credits: (4)
- COM 460 - Communication Law Credits: (4)
- COM 465 - Communication and Organizational Leadership Credits: (4)
- COM 472 - Global Public Relations Credits: (4)
- COM 473 - Crisis Communication Management Credits: (4)
- COM 481-Central Communication Agency Credits: (2)
- COM 483 - Advanced Central Communication Agency Credits: (3)
- COM 487 - Advanced Public Relations Seminar Credits: (4)

Total Credits: 75

## Communication Minor

The communication minor introduces students to the study of communication within a modern social and cultural context.

Students in teacher education must meet with the department chair and the certification director to determine the course of study necessary for endorsement.

Required Courses

- COM 201 - Introduction to Mass Communication Credits: (5)
- COM 207 - Introduction to Human Communication Credits: (5)

Department-approved Electives Credits: (18)

Total Credits: 28

College and Department Information

Communication Department
College of Arts and Humanities

## Non-profit Organization Management Minor (COM)

The minor in non-profit organization management is an interdisciplinary minor designed to provide an understanding of the organization, financing and management issues in non-profit organizations. It is designed to complement majors in artistic,
advocacy and educational endeavors. The minor provides practical, hands-on skills as well as discussion of the issues facing non-profit organizations.

Required Courses: Credits (13)

- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- COM 312 - Introduction to Non-Profit Leadership Credits: (4)
- COM 427 - Grant Writing Credits: (4)

Select 12 credits from at least two prefixes from the following electives:

- ANTH 360 - Introduction to Museum Studies Credits: (4)
- ANTH 361 - Museum Exhibit Design Credits: (4)
- COM 208 - Introduction to Public Relations Writing Credits: (4)
- COM 270 - Introduction to Public Relations Credits: (4)
- COM 315 - Studies in Communication Credits: (1)
- COM 348 - Publication Design Credits: (4)
- COM 362 - Conflict and Communication Credits: (4)
- COM 365- Organizational Communication Credits: (4)
- COM 370 - Advanced Public Relations Writing Credits: (4)
- COM 371 - Event Planning and Management Credits: (4)
- COM 375 - Interviewing Principles and Techniques Credits: (4)
- COM 487 - Advanced Public Relations Seminar Credits: (4)
- SOC 365 - Minority Groups Credits: (5)
- SOC 442 - Social Welfare Policy Credits: (5)
- SOC 445 - Social Inequality Credits: (5)
- SOC 459 - Organizations Credits: (5)
- SOC 460 - Community Structure and Organization Credits: (5)
- TH 350 - Theatre and Arts Management I Credits: (4)
- TH 351 - Theatre and Arts Management II Credits: (4)
- TH 360 - Stage Management Credits: (3)

Choose one from the following: Credits (5)

- ANTH 490 - Cooperative Education Credits: (1-12)
- ART 490 - Cooperative Education Credits: (1-12)
- COM 490 - Cooperative Education Credits: (1-12)
- MUS 490 - Cooperative Education Credits: (1-12)
- TH 490 - Cooperative Education Credits: (1-12)

Total Credits: 30

College and Department Information

Communication Department
College of Arts and Humanities

## Organizational Communication Minor

The minor in organizational communication is designed to complement a broad spectrum of majors leading to careers in government, education, social and community services.
Emphasis is placed on an understanding of the basic nature of communication in organizations, and on the fundamental knowledge and skills necessary for effective communication in organizations at the interpersonal small group, and public (large group) levels.

Required Courses

- COM 251 - Small Group Dynamics Credits: (4)
- OR COM 302 - Intercultural Communication Credits: (4)
- COM 345 - Business and Professional Speaking Credits: (4)
- COM 365 - Organizational Communication Credits: (4)
- COM 375 - Interviewing Principles and Techniques Credits: (4)
- COM 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits)
Department-Approved Electives Credits: (4)
Total Credits: 25

College and Department Information
Communication Department
College of Arts and Humanities

## Non-profit Organization Management Certificate (COM)

[^3]Select 8 credits at least two prefixes from the following electives:

- ANTH 360 - Introduction to Museum Studies Credits: (4)
- ANTH 361 - Museum Exhibit Design Credits: (4)
- COM 208 - Introduction to Public Relations Writing Credits: (4)
- COM 270 - Introduction to Public Relations Credits: (4)
- COM 315 - Studies in Communication Credits: (1)
- COM 348 - Publication Design Credits: (4)
- COM 362 - Conflict and Communication Credits: (4)
- COM 370 - Advanced Public Relations Writing Credits: (4)
- COM 371 - Event Planning and Management Credits: (4)
- COM 487 - Advanced Public Relations Seminar Credits: (4)
- SOC 365 - Minority Groups Credits: (5)
- SOC 442 - Social Welfare Policy Credits: (5)
- SOC 445 - Social Inequality Credits: (5)
- SOC 459 - Organizations Credits: (5)
- SOC 460 - Community Structure and Organization Credits: (5)
- TH 350 - Theatre and Arts Management I Credits: (4)
- TH 351 - Theatre and Arts Management II Credits: (4)
- TH 360 - Stage Management Credits: (3)

Total Credits: 21

College of Arts and Humanities

## Professional Writing Certificate (COM)

Professional Writing Certificate

The professional writing certificate allows students to develop their writing skills for professional and business environments. It is delivered entirely online to serve professionals already working in careers as well as students planning to begin professional or business careers. Students will learn the rhetorical requirements for specific forms of written communication, including letters, memos, reports, proposals, promotional materials, and press releases. They will also learn to edit their own writing for clarity, correctness, and style.

## Required Courses

- ENG 301 - Rhetoric for Professional Writers Credits: (5)
- ENG 310 - Technical Writing Credits: (4)
- COM 347 - Copy Editing Credits: (4)
- COM 370 - Advanced Public Relations Writing Credits: (4)

Total Credits: 17

College and Department Information

Communication Department
College of Arts and Humanities

## Radio Broadcasting Certificate

A specialized certificate program designed to be completed within 1-academic school year. The program provides an overview of the practice, technology, production and promotion/sales of Radio Broadcasting. Topics include On-air presentation skills, radio board operation, audio production, radio news, radio production, call screening, radio promotions, programming, voice over, and interviewing.

Students trained via the nationwide music scheduling software certification Music Master, Inc.. Students learn the trade while being trained on broadcast industry standard equipment, approaching tasks in a laboratory environment, going through industry standard certification, and having industry guest lecturers and/or speakers.

## Admission Requirements

Eligibility
The total number of applicants admitted may be limited. The following requirements must be met:

- A minimum overall college GPA of 2.5
- Completed the following; COM 201 (Mass Media), COM 202 Law and Ethics of the First Amendment and FILM 215, Production Technology Skills, Audio Tech, or equivalent
- Work experience may substitute for the above academic prerequisites and is subject to evaluation by the advisor

## Graduation Requirements

Obtain a passing grade of C - or higher in each course within the Certificate Program.

## Program Requirements

Students are required to apply for admission into the program.
Students are also required to understand, speak and write conversational English. Students must have a basic understanding of computers.

Prerequisites
Work experience may substitute for academic prerequisites and is subject to evaluation by the advisor.

- COM 201 - Introduction to Mass Communication Credits: (5)
- COM 202 - The First Amendment: Rights and Responsibilities Credits: (5)
- FILM 215 - Production Technology Skills Credits: (1) (Must take subtitle Audio Tech for 1 credit)

## Required Courses

- COM 204 - Radio Studies Credits: (2)
- COM 205 - Radio Production Skills Credits: (4)
- COM 304 - Radio Programming Application Credits:
(5) (Must take for 15 credits)
- COM 404 - Radio Ratings and Revenue Credits: (2)

Total Credits: 34

## Faculty and Staff

Chair
Christos Graikos, PhD

## Professors

Razvan Andonie, PhD, computational intelligence, machine learning, parallel/distributed computing, big data analytics, data mining
Christos Graikos, PhD, image/video processing, analysis, compression and transmission
Boris Kovalerchuk, PhD, artificial intelligence, visual big data analytics, machine learning, data mining, computer vision, simulation, computer architecture, soft computing

## Associate Professors

Donald Davendra, PhD, optimization, evolutionary algorithms, manufacturing systems, chaos control, data analytics

## Assistant Professors

Adriano Cavalcanti, PhD, biomedical computing, mobile technology, robotics/nanorobotics, computer graphics Arne Leitert, PhD , algorithmic graph theory, data structures and algorithms, large scale network analysis
Szilárd VAJDA, PhD, machine learning, medical image processing, document analysis, data analytics

## Staff

Chris Stone, secretary senior
Zachary Geesaman, systems analyst
Megan McConnell, advisor, recruiter

## Department Information

The Department of Computer Science (CS) offers a degree program leading to the Bachelor of science in computer science. The department also jointly offers a program with the industrial engineering technology (IET) department in the College of Education and Professional Studies in computer engineering technology. Information related to the computer engineering technology program can be found in the IET section of the catalog.

The field of computer science can trace its beginnings and much of its foundation to both mathematics and engineering. Because of this, studies in computer science range from theory through experimental techniques to engineering methodology. The purpose of the computer science curriculum is to expose students to aspects of each of these disciplines and foster an appreciation and understanding of them. To accomplish this, students are exposed to the broad theoretical basis of computer science as well as a strong laboratory component. The laboratory experience is more than simple programming. Rather, it is through the laboratories that students are introduced to both the experimental and the design aspects of computer science.

Using this philosophy as a base, the CS department has designed a curricular model that seeks to increase relevance to the real world. In particular, the senior project, a capstone course seriesCS 480 and 481-adopts a theme that expands upon the experimental and design approach of typical computer science curricula. This capstone series addresses the creativity and productivity elements required for business and industry applications today. Students become engaged in projects that investigate each stage of transforming a creative idea into a productivity-enhancing system in a realistic context.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/computer-science or by contacting the department directly.

## Computer Science Major, BS

In order to expose computer science majors to a broad theoretical base while emphasizing the laboratory experience, students will complete the CS core courses. To add depth and flexibility to their academic programs, with major advisor, students will work out a focus area and choose the elective courses approved by the department. A specific focus may be developed in many areas of computer science; examples include: software engineering, intelligent systems, computational science, computer graphics, visualization and computer vision, human-computer interaction, big data analytics, and cybersecurity.

## Standards for Admission and Continuation

Admission to the computer science major or minor is not selective, however, progress in the major/minor is dependent upon earning certain grades in prerequisite courses. In order to continue in any CS course above 301 with the exception of 311 , a student must receive a B- grade or higher in each of the CS courses and a C grade or higher in each of the General

Education Academic Writing courses and required Math courses. Applications will be accepted through the last day of classes (i.e., the week before finals) of the fall, winter, and spring quarters for admission the following quarter.

The computer science department believes that advising is one of the keys to success in an undergraduate program. To that end, majors and minors are required to meet with a computer science advisor every term in order to register. Pre-admission students are also encouraged to meet with their designated computer science advisor each term. Advisors and advising times are listed with the CS office.

CS Pre-admission Requirements Credits: 17
The minimum grade for each CS course listed below is B- and C for all others. Students must also complete General Education Academic Writing I and II with a minimum grade of C in each.

- CS 110 - Programming Fundamentals I Credits: (4)
- CS 111 - Programming Fundamentals II Credits: (4)
- CS 301 - Data Structures Credits: (4)
- MATH 172 - Calculus I Credits: (5)

Required Courses Credits: 69
The minimum grade for each CS course listed below is B- and C for all others.

- CS 112 - Foundations of Computer Science Credits: (4)
- CS 302 - Advanced Data Structures and File Processing Credits: (4)
- CS 311 - Computer Architecture I Credits: (4)
- CS 312 - Computer Architecture II Credits: (4)
- CS 325-Technical Writing in Computer Science Credits: (3)
- CS 361 - Principles of Language Design I Credits: (4)
- CS 362 - Principles of Language Design II Credits:
(4)
- CS 380 - Introduction to Software Engineering Credits: (4)
- CS 392 - Lab Experience in Teaching Computer Science Credits: (1)
- CS 420 - Database Management Systems Credits: (4)
- CS 427 - Algorithm Analysis Credits: (4)
- CS 446 - User Interface Design and Development Credits: (4)
- CS 470 - Operating Systems Credits: (4)
- CS 480 - Advanced Software Engineering Credits:
(4)
- CS 481 - Software Engineering Project Credits: (4)
- CS 489 - Senior Colloquium Credits: (1)
- CS 492 - Laboratory Experience in Teaching Computer Science Credits: (1-2)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 330 - Discrete Mathematics Credits: (5)

Department-Approved Electives Credits: 20

Electives must be chosen with the guidance of a computer science advisor and must form a coherent focus area. The minimum grade for each CS course is B - and C for all others.

- Additional CS courses (excluding CS 490, CS 495, and CS 496) Credits: (12)
- Additional department-approved electives Credits: (8)

Total Credits: 106

College and Department Information

Computer Science Department
College of the Sciences

## Applied Computer Science Minor

This minor is designed for students who wish to integrate a computer science component into their curriculum. This minor is appropriate for any student who wishes to include an enhanced technical computer science background as part of their overall curriculum.

Required Courses Credits: 22

- BUS 221 - Introductory Business Statistics Credits: (5)
- OR MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- CS 110 - Programming Fundamentals I Credits: (4)
- CS 111 - Programming Fundamentals II Credits: (4)
- CS 301 - Data Structures Credits: (4)
- MATH 130 - Finite Mathematics Credits: (5)

Department-Approved Electives - Credits: 12-14
At least one course will be in computer science. The other electives will be computer related and may be selected from the student's major with the approval of an advisor.

Total Credits: 34-36

College and Department Information

Computer Science Department
College of the Sciences

## Computer Science Minor

This minor is designed for students who wish to investigate and basic core of the computer science discipline. This minor is appropriate for any student, including those in teacher education, seeking to enhance their technical computer science background.

Required Courses

- CS 110 - Programming Fundamentals I Credits: (4)
- CS 111 - Programming Fundamentals II Credits: (4)
- CS 301 - Data Structures Credits: (4)
- CS 311 - Computer Architecture I Credits: (4)
- MATH 130 - Finite Mathematics Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- MATH 260 - Sets and Logic Credits: (5)

The Craft Brewing Program provides students with an in-depth understanding of the brewing industry. The BS in Craft Brewing is built upon a strong foundation in science and is focused on providing students with content, experience, and skills in brewing science, analytical laboratory techniques, quality assurance, and management. Additionally, courses incorporate hands-on and inquiry-based learning opportunities through case studies, pilot brewing, field trips, industry speakers, and research activities. The program prepares graduates for a career in the brewing production, quality assurance, brewery management, beer merchandising, distribution, brewing technology, packaging, safety, sanitation, sensory evaluation, and entrepreneurship. This is an interdisciplinary program involving departments and faculty across the university that is administered in the College of the Sciences.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/craft-brewing/ or by contacting the department directly.

## Craft Brewing, BS

The Craft Brewing Program provides students with an in-depth understanding of the brewing industry. The BS in Craft Brewing is built upon a strong foundation in science and is focused on providing students with content, experience, and skills in brewing science, analytical laboratory techniques, quality assurance, and management. Additionally, courses incorporate hands-on and inquiry-based learning opportunities through case studies, pilot brewing, field trips, industry speakers, and research activities. The program prepares graduates for a career in the brewing production, quality assurance, brewery management, beer merchandising, distribution, brewing technology, packaging, safety, sanitation, sensory evaluation, and entrepreneurship. This is an interdisciplinary program involving departments and faculty across the university that is administered in the College of the Sciences.

## Pre-Admission Requirements

Students wishing to attain full admission to the BS in Craft Brewing must meet the following requirements:

- Successful completion of CHEM 111 Introduction to Chemistry, CHEM 111LAB Chemistry Laboratory, CHEM 112 Introduction to Organic Chemistry, CHEM 112LAB Introduction to Organic Chemistry Laboratory, CHEM 113 Introduction to Biochemistry, CHEM 113LAB Introduction to Biochemistry Laboratory, MATH 153 or its equivalent, ECON 201 Principles of Economics Micro, PHYS 111 Introductory Physics, PHYS 112 General Physics, with a C (2.0) or higher in each course before being admitted to the major.
- Overall minimum 2.5 GPA will be required for admission.
- Students must fill out an application that includes an essay of motivation and goals.
- Upon admittance to the program students must agree to sign a written statement regarding professional conduct and responsibility.
- Student must be at least 21 years old before enrolling in courses that may involve tasting beer (CRBW 317 Brewing Processes and Biochemistry (5), CRBW 350 Sensory Analysis for Brewing (5), CRBW 495 Brewing Research Methods (5), CRBW 496 Brewing Special Topics (3), CRBW 498 Brewing Research (5), CRBW 499 Brewing Seminar (2).
Students are highly encouraged to also obtain a minor or degree in Biology, Chemistry, Administrative Management, Industrial Technology, Safety and Health Management and complete at least five credits of CRBW 490, Cooperative Education.

## Special Requirements

Students will be expected to spend significant time outside the classroom working on assignments and projects. Some sessions may meet on Saturdays.

## Additional Information

The requirement for CHEM 111, 111LAB, Introduction to Chemistry and Laboratory, may be met by satisfactorily completing CHEM 181, 181LAB, 182, 182LAB, and 183, 183LAB General Chemistry and Laboratory. The requirement for CHEM 112, 112LAB, Introduction to Organic Chemistry
and Laboratory, may be met by satisfactorily completing CHEM 361, 361LAB, 362, Organic Chemistry and Laboratory. The requirement for CHEM 113, 113LAB, Introduction to Biochemistry, may be met by satisfactorily completing CHEM 431, 431LAB and 432, Biochemistry and Laboratory.

Required Courses

Basic and Breadth Requirement Courses Credits: 10

- ECON 201 - Principles of Economics Micro Credits: (5)

Choose one of the following mathematics courses:

- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- MATH 170 - Intuitive Calculus Credits: (5)
- MATH 172 - Calculus I Credits: (5)

Professional Core Requirement Credits: 31

- ADMG 201 - Introduction to Business Credits: (3)
- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- CHEM 112 - Introduction to Organic Chemistry Credits: (4)
- CHEM 112LAB - Introduction to Organic Chemistry Laboratory Credits: (1)
- CHEM 113 - Introduction to Biochemistry Credits: (4)
- CHEM 113LAB - Introduction to Biochemistry Laboratory Credits: (1)
- SHM 325 - Manufacturing Safety and Health Credits: (3)

Select 10 credits from the following sequences:

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182-General Physics II with Laboratory Credits: (5)

Required Advanced Craft Brewing Core Courses Credits: 31

- CRBW 312 - Brewing Microbiology Credits: (4)
- CRBW 317- Principles and Biochemistry of Brewing Credits: (4)
- CRBW 450 - Sensory Analysis for Brewing Credits: (5)
- CRBW 470 - Current Topics in Brewing Credits: (16)
- CRBW 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits)
- OR CRBW 495 - Brewing Research Methods Credits: (5) (Must be taken for 5 credits)
- CRBW 499 - Seminar Credits: (1-5) (Must be taken for 2 credits)
- CRBW 360 - Brewing Process Technology Credits: (3)
- RMT 320 - Topics in Strategy for the Craft Brewing Industry Credits: (5)

Total Credits: 72

College and Department Information

Craft Brewing Program
College of the Sciences

## Craft Beer Trade Certificate

The Craft Brewing Certificate is an interdisciplinary certificate program designed to be completed in one academic year sequence. The certificate program provides an overview of the science, technology, and sales/merchandising aspects of the craft beer brewing industry. Topics include principles of malting and brewing, brewing process technology, brewing microbiology, and topics strategy for the craft brewing industry. Students learn about the trade using a variety of approaches including lab work, hands on experiences, lectures, field trips, and industry speakers.

Pre-admission Requirements Credits: 10

- MATH 153 - Pre-Calculus Mathematics I Credits: (5)

And one from the following:

- CHEM 101 - Chemistry and Planet Earth Credits: (5) OR
- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1) OR
- CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)

## Admission Requirements

Students must be 21 years of age or older to enroll in the program and must apply for acceptance into the program through an application that is separate from the university. The application for the program can be found at www.cwu.edu/sciences/craft-brewing.

## Special Requirements

Students will be expected to spend significant time outside the classroom working on assignments and projects. Some sessions may meet on Saturdays. In order to receive the certificate, students must earn a grade of C or above in each of the four courses. If students are conditionally admitted without meeting
the pre-requisites, they must fulfill the pre-requisites before being awarded the certificate.

Required Courses Credits: 16

- CRBW 312 - Brewing Microbiology Credits: (4)
- CRBW 317- Principles and Biochemistry of Brewing Credits: (4)
- RMT 320 - Topics in Strategy for the Craft Brewing Industry Credits: (5)
- CRBW 360 - Brewing Process Technology Credits: (3)

Total Credits: 26

## Department Information

In order to be certified in the state of Washington, a student must complete the courses required in an endorsement area as well as the Professional Education Program. The Curriculum, Supervision, and Educational Leadership Department provides the courses and experiences necessary to complete the Professional Education Program. For information directly regarding the Alternative Pathways to Teaching Program please visit www.cwu.edu/teacher-certification/about.

## Department Standards

All students completing an educational endorsement must maintain a 3.0 GPA or higher for the last 45 graded credits. Failure to maintain this level of achievement may result in suspension or expulsion from the Teacher Certification Program. Students must also earn a minimum grade of C in all required Professional Education Program courses.

## Admission Requirements

Students may not enroll in Professional Education Program courses other than EFC 210, EFC 310, and PSY 314 until they have been fully admitted into the School of Education Teacher Certification Program. Please see the admission requirements for the School of Education Teacher Certification Program at the Teacher Certification website, www.cwu.edu/~cert.

## Exit Requirements

Students admitted into the School of Education are required to present a complete electronic portfolio demonstrating their content, pedagogical, and professional knowledge, skills, and dispositions as a partial fulfillment of their graduation requirements. Please see the exit requirements for the Teacher Certification Program.

## Pre-admission Observation Experience

In special circumstances, this experience may be completed concurrent with the first three weeks of EFC 210. However, because it will generally not be possible for students to find placements and complete their observation within this time, students are strongly encouraged to complete their Preadmission Observation Experience prior to enrolling in EFC 210.

## Student Teaching

Students must complete a minimum of 16 quarter credits of student teaching on an all-day basis for one quarter. To qualify for certification to teach in more than one specialization, students must meet all requirements listed in the catalog for each specialization. All prerequisites in the course description for
student teaching must be completed.

1. One quarter in residence at CWU is required before a student may be assigned to student teaching, unless an exception is approved by the chair of the Department of Educational Foundations and Curriculum.
2. Students must be endorsed for student teaching by their major and minor departments. The endorsement requires completion of 75 percent of the major and minor areas prior to student teaching. See major and minor departments for advising.
3. Most student teaching assignments will be made at centers outside Kittitas County.
4. While student requests for choice of student teaching centers and grade levels will be considered, final responsibility for student teaching placement rests with the director of field experiences.
5. Student teachers wishing to enroll in additional coursework during their student teaching experience must obtain the approval of the director of field experiences.
6. A minimum GPA of 3.0 for the last 45 quarter credits is required prior to applying for student teaching.
7. Fingerprint clearance from both the Washington State Patrol and the FBI must be on file in the office of the dean of the College of Education and Professional Studies (CEPS) prior to applying for student teaching. Clearance must be valid for the entire period in which students will be in the classroom.
8. Applications for certification must be on file in the office of the dean of CEPS one quarter prior to student teaching.
9. At the time of application submission, students must provide proof of purchase of $\$ 1 \mathrm{M}$ of liability insurance for student teaching, valid for the quarter in which student teaching will occur.
10. At the time of application submission, students must provide West-E results or proof of having registered for a West-E test date that will occur prior to the first day of student teaching.

## Professional Education Program

The purpose of the Professional Education Program is to prepare prospective teachers to become facilitators of learning within the school and community. The Professional Education Program curriculum provides opportunities to acquire the pedagogical knowledge and skills that allow students to demonstrate a positive impact on $\mathrm{P}-12$ student learning. To this end, the program offers information about and experience in integrating research and pedagogy constructs for a spectrum of diverse learning situations.

See important information above under Pre-admission Observation Experience and Student Teaching.

Students should enroll for EFC 330 prior to their junior year.
Students should check the university catalog for course descriptions and pre-requisite information. Some courses must be taken in sequence. Students should consult their advisor for assistance in developing an academic plan.

## Required Courses

EDBL 401 - Principles and Practices for Educating
Linguistically Diverse Students 3
OR
EDBL 430 - Sheltering Instruction for Linguistically Diverse
Students (3)
EDSE 302 - Introduction to Students with Exceptionalities 3
EFC 210 - Seminar 1
EFC 310 - Orientation to Teaching 3
EFC 315 - Educational Assessment 3
EFC 320 - Multicultural Education 3
EFC 330 - Field Experience 2
EFC 340 - Methods of Instruction 3
EFC 350 - Classroom Management 3
EFC 416 - Educational Technology 3
EFC 440 - Education Law 3
EFC 480 - Student Teaching 16
PSY 314 - Human Development and the Learner 4
Total Credits: 50

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/csel/ or by contacting the department directly.

## Instructional Foundations, BA

This degree program is designed to meet the needs of students who wish to have a background in instructional pedagogy, but who do not wish to complete the requirements for teaching certification. Students who complete the program will be prepared to work in settings that require expertise in the foundations of education, such as training programs in business and industry, service programs at educational institutions, private child care facilities, etc.

The student will select a focus area, which must be approved by the department. The focus area will be a cohesive set of courses, which will be designed to provide the student with the knowledge and skills required to take a leadership role in an education-related organization. The practicum will be done in the focus area after all other course work is completed.

Students must achieve a grade of C or higher in all courses in the major and must have a cumulative grade point average of 3.0 or higher in the major in order to graduate.

Admission to the program requires the following:

1. A passing score on each section of the Washington Educator Skills Test - Basic (WEST-B). See www.west.nesinc.com to register and for additional information.
2. A cumulative GPA of 3.0 or higher.
3. Completion of each of the following with a grade of C
or higher.
a. ENG 101
b. ENG 102
c. MATH 101, 153, 154, 164, 170, 172, or FIN 174.
4. Proof of purchase of the College LiveText Edu Solutions software program.

Required Courses

- EDCS 492 - Practicum Credits: (1-15) (Must be taken for 15 credits)
- EFC 210 - Seminar Credits: (1)
- EFC 310 - Orientation to Teaching Credits: (3)
- EFC 315 - Educational Assessment Credits: (3)
- EFC 320 - Multicultural Education Credits: (3)
- EFC 330 - Field Experience Credits: (2)
- EFC 340 - Methods of Instruction Credits: (3)
- EFC 416 - Educational Technology Credits: (3)
- ENG 310-Technical Writing Credits: (4)
- PSY 314 - Human Development and the Learner Credits: (4)

Department-Approved Focus Area Electives Credits: 19

Total Credits: 60

## Professional Education Program

The purpose of the Professional Education Program is to prepare prospective teachers to become facilitators of learning within the school and community. The Professional Education Program curriculum provides opportunities to acquire the pedagogical knowledge and skills that allow students to demonstrate a positive impact on P-12 student learning. To this end, the program offers information about and experience in integrating research and "best practice" based pedagogical constructs, for a spectrum of diverse learning situations.

Students should enroll for EFC 330 prior to their junior year. Student teaching is completed at one of the approved offcampus locations.

Check the University catalog for course descriptions and prerequisites information. Some courses must be taken in sequence. Consult your education advisor for assistance in developing an academic plan.

## Required Courses

- EDBL 401 - Principles and Practices for Educating Linguistically Diverse Students Credits: (3)
- OR EDBL 430 - Sheltering Instruction for Linguistically Diverse Students Credits: (3)
- EDSE 302 - Introduction to Students with Exceptionalities Credits: (3)
- EFC 210 - Seminar Credits: (1)
- EFC 310 - Orientation to Teaching Credits: (3)
- EFC 315 - Educational Assessment Credits: (3)
- EFC 320 - Multicultural Education Credits: (3)
- EFC 330 - Field Experience Credits: (2)
- EFC 340 - Methods of Instruction Credits: (3)
- EFC 350 - Classroom Management Credits: (3)
- EFC 416 - Educational Technology Credits: (3)
- EFC 440 - Education Law Credits: (3)
- EFC 480 - Student Teaching Credits: (16)
- PSY 314 - Human Development and the Learner Credits: (4)

Total Credits: 50

College of Education and Professional Studies

## Accessibility Studies Minor

The Accessibility Studies Minor provides an interdisciplinary opportunity to learn about the challenges facing people with disabilities and limitations, estimated to be nearly a fifth of the population. The Accessibility Studies Minor documents the graduate's demonstration of competence in recognizing where, when, and how to accommodate such needs. Competence includes facilitating accessible transitions and employment for people with disabilities and limitations, approached from different perspectives of employers, social service agencies, commercial enterprises, and the people requiring access themselves. This competence is attractive to employers who must all comply with legislation, such as the Americans with Disabilities Act, intended to protect entitlement to activities of independent living in all environments- work, home, school, shopping, medical, leisure, and virtual.

Accessibility Studies add practical depth to all pre-professional degrees, such as Business Administration; Human Resource Management; Supply Chain Management; Marketing; Public Policy; Non-Profit Organization Management; Public Health; Social Services; Safety and Health Management; Recreation and Tourism; Family and Child Life; Web Design and Management; Physical Rehabilitation Therapy; Paramedicine; Emergency Medical Technician; Communication; Graphic Design; Professional and Creative Writing; American Sign Language; Theatre Art Design and Production; Museum Studies; Anthropology; Interdisciplinary Studies in Social Sciences; Applied Computer Science; Law and Justice; Psychology; Library Information Science; Instructional Foundations.

## Admission Requirements

Admission to the program requires an application approved by the Accessibility Studies Program. There are no prerequisites for the introductory course, ASP 305 Accessibility and User Experience.

## Graduation Requirements

Successful completion of required courses with a minimum of C in all courses.

## Program Requirements

The minor degree in Accessibility Studies requires the four core courses of 15 credits plus an additional 5 credits of programapproved electives in application and issues courses.

The minor requires a capstone course in which the student investigates a real-world context and designs a practical solution to an accessibility problem for that context. The placement must be approved as part of the capstone project approval.
Placement is flexible, e.g. via an ASP internship or practicum or independently arranged without additional credit. Completion of the capstone also includes public presentation, which although flexible must also be arranged through and approved by ASP faculty.

Required Courses Credits: 15

- ASP 305 - Accessibility and User Experience Credits: (3)
- ASP 325 - Universal Design Credits: (4)
- ASP 435 - Accessible Information Design Credits: (5)
- ASP 485 - Accessibility Studies Capstone Credits: (3)

Department-Approved Electives Credits: 5

- ASP 365 - Assistive Technology: Tactile Graphics Credits: (3)
- ASP 490 - Accessibility Studies Internship Credits: (1-12)
- ASP 492 - Advanced Practicum in Accessibility Studies Credits: (1-15)
- ASP 498 - Special Topics in Accessibility Credits: (16)

OR Program-approved electives. The list of approved electives is extensive. Please consult an Accessibility Studies Program advisor regarding the eligibility of any course that would provide an opportunity to apply the knowledge and skills of accessibility competence. Up to five (5) credits may be courses required for a concurrent major.

Total Credits: 20

## Accessibility Studies Certificate

The Accessibility Studies Certificate provides an interdisciplinary opportunity to learn about the challenges facing people with disabilities and limitations, estimated to be nearly a fifth of the population. The Accessibility Studies Certificate documents the graduate's demonstration of competence in recognizing where, when, and how to accommodate such needs. Competence includes facilitating accessible transitions and employment for people with disabilities and limitations, approached from the different perspectives of employers, social service agencies, commercial enterprises, and the people requiring access themselves. This competence is attractive to employers who must all comply with legislation, such as the Americans with Disabilities Act, intended to protect entitlement to activities of independent living in all environments- work, home, school, shopping, medical, leisure, and virtual. The

Accessibility Studies certificate is a professional development opportunity of value to most fields.

Additional courses focused on application and issues of accessibility may be taken, such as:

## ASP 465 Tactile Graphics

ASP 490 Accessibility Studies Internship
ASP 492 Accessibility Studies Practicum
ASP 498 Topics in Accessibility Studies

## Admission Requirements

Admission to the program requires an application approved by the Accessibility Studies Program. There are no prerequisites for the introductory course, ASP 305 Accessibility and User Experience.

## Graduation Requirements

Successful completion of required courses with a minimum of C in all courses.

## Program Requirements

The certificate in Accessibility Studies requires the four core courses of 15 credits.

Required Courses

- ASP 305 - Accessibility and User Experience Credits: (3)
- ASP 325 - Universal Design Credits: (4)
- ASP 435 - Accessible Information Design Credits: (5)
- ASP 485 - Accessibility Studies Capstone Credits: (3)

Total Credits: 15

## Department Information

Positions of responsibility in today's world are usually held by individuals who have the capacity to analyze complex problems and make intelligent decisions. Learning economics will help students think logically and improve their ability to use economic concepts to analyze "real world" problems and opportunities. In addition to preparation for business and government agency employment, an economics major is excellent preparation for law schools, master's of business administration programs, and graduate programs in economics, agricultural economics, and natural resource management. The economics department offers a Bachelor of Science degree in economics with specializations in managerial economics, general economics, and economic and business forecasting. Economics minors are offered to complement accounting, business administration, and other majors.

The BS economics major is comprised of the following components:

- Pre-admission courses providing necessary theoretical and quantitative skills to pursue studies in economics
- Core courses in both micro and macro-economic theory
- A choice of supporting courses for each of the three economics major specializations
The following objectives apply to all individuals pursuing a BS in economics:
- Students completing an economics degree will possess the tools which enable them to analyze and understand macro and micro economic problems and policies.
- Students will possess qualifications and knowledge which will help them to find employment in fields related to economics.
- Students will acquire and be able to use basic tools to enable them to carry out quantitatively oriented tasks in their employment or their field of graduate studies.
- Students completing the program should possess the communication and economic skills desirable in their future employment or graduate studies.

## Admission Requirements

Admission to an Economics major requires admission to the University.

The following requirements must be met for entry into an Economics major in the College of Business:

- Completion of 30 credits (If a student is a transfer student, credits must be transferable)
- Must be in good academic standing
- At least a 2.25 collegiate GPA
- Completion of ENG 101 and ENG 102 with a C- or higher, or equivalent
Students seeking entry to the College without these requirements may be granted pre-major standing.

International students whose native language is not English must meet one of the following English proficiency requirements:

A score of 71 or above on the Internet-based TOEFL or 525 or above on the paper-based TOEFL ( 195 for computer based, 71 for internet based), OR

A score of 6.0 or above on the International English Language Testing System (IELTS) exam, OR

A 3.0 (B grade) or above in each two college-level English composition courses from an accredited United States college or university. Contact the Office of Admissions to find out what courses are acceptable.

Students who have met all of the above requirements will be admitted unless the number of applicants exceeds available space. In that case, acceptance will be competitive.

## Previous or Transfer Coursework Policy

Business courses taken to fulfill the requirements for an undergraduate or graduate degree from the CWU College of Business must have been taken within the last 10 years at the time of graduation. Exceptions may be made, but must be approved prior to acceptance into the College of Business by the department chair and dean or designee.

Students wishing to have credits from non-United States institutions considered for transfer into the College of Business for any major or minor must have their transcripts evaluated through outside credential evaluators who are members of the National Association of Credential Evaluation Services (NACES), such as the Foundation for International Services (FIS), the World Education Service (WES), or Educational Perspectives. Students who intend to pursue the CPA may instead decide to use the NABSA (National Association of State Boards of Accountancy) international evaluation services since it is a requirement of the CPA. Credits for current students participating in a CWU study abroad program will be evaluated by the Office of the Registrar.

Equivalent lower-division (100-200 level) courses may be transferred toward meeting the foundation course requirements for any BS degree in the college. Upper-division (300-400 level) courses may be transferred toward meeting the major requirements only with the approval of the department chair and the college dean (or designee).

## Academic Jeopardy Policy

The College of Business is committed to the success of its students. If a student that has been admitted to the College of Business is deemed to be in academic jeopardy, the College of Business may place restrictions on the student. A student is considered in academic jeopardy for the following reasons:

- On academic warning or probation
- Frequently withdraws from class
- Repeating coursework to be successful
- Has less that a 2.5 (2.499 and below) in any of the required GPAs for graduation.
- CWU GPA
- Collegiate GPA (CWU and all transfer coursework combined)
- Major GPA
- Upper-division coursework in the major GPA
- Accounting majors: upper-division

Accounting coursework GPA

The College of Business may do the following in response to an Academic Jeopardy situation:

- Limit College of Business coursework in future quarters
- Require academic advising with both faculty and/or professional advisors
- Require academic success plans
- Double majors or double specialization students may be limited to one major plan in the College of Business
If a student is unable to improve academically while receiving intensive advising and support or does not actively participate in required advising, the student may be subjected to the College of Business Separation Policy.

## Separation Policy

If a student that has been admitted to the College of Business is placed on academic warning, probation, suspension, has repeat academic course withdrawals, or academic performance below the necessary grade point averages required to graduate, then the student's admission into the College of Business may be rescinded. Students may also be rescinded for violations of the College of Business Statement of Conduct and Code of Honor, or for engaging in Prohibited Student Conduct as defined by Washington Administrative Code (see WAC 106-125-020). Once rescinded, the student will be denied readmission to the College of Business for one year following which a written petition for readmission must be presented at least 30 days prior to the start of the quarter in which readmission is desired. The decision to readmit will be based on meeting current admission standards, analysis of the entire academic record, as well as any other sources of information deemed appropriate. Readmission is not guaranteed.

## Service to Other Majors

Students majoring in programs outside CB who are required to take courses in this college for either their major or minor will be eligible to enroll on a space-available basis. These students will be given priority over other non-college majors wishing to enroll in courses. All students must have taken prerequisites for courses prior to enrollment.

## Transfer Credits and Prior Learning Assessment

Equivalent lower-division (100-200 level) courses may be transferred toward meeting the pre-admission requirements. Upper-division (300- to 400-level) courses may also be transferred toward meeting the business core and specialization requirements, but only with the approval of the department chair and the college dean (or designee).

## Admission Information

A cumulative grade point average of 2.5 in the economics foundation requirements must be achieved with a minimum grade of C- (1.70) in each course. The credit/no credit option will not be accepted for any of these courses. The student must have earned a minimum cumulative GPA of 2.0 in all collegiate study. These criteria also apply to equivalent courses transferred from other institutions. Applicants must have also completed ENG 101 and 102.

Students who have met all the above requirements will be admitted unless the number of eligible applicants exceeds available spaces. In that case, acceptance will be competitive,
based on a selection index. Students who have not met all of the above requirements may be admitted provisionally by permission of the college dean or designee.

## Graduation Requirements for all Department Specializations

A cumulative grade point average of 2.25 in the above courses must be achieved with a minimum grade of C - in each course. The credit/no credit option will not be accepted for any of these courses. The student must have earned a minimum cumulative GPA of 2.25 in all collegiate study. These criteria also apply to equivalent courses transferred from other institutions.

## Graduation Requirements for Economics I and II Minors

A cumulative grade point average of 2.25 in the above courses must be achieved with a minimum grade of C - in each course. The credit/no credit option will not be accepted for any of these courses. The student must have earned a minimum cumulative GPA of 2.25 in all collegiate study. These criteria also apply to equivalent courses transferred from other institutions.

## Repeat Policy

Business administration courses may be repeated only once.

## Economics BS, Economic and Business Forecasting Specialization

The Economic and Business Forecasting curriculum provides background for careers in economic and business data analysis, economic forecasting, budget analysis, and business analytics, among others. Topics include researching and analyzing micro and macro-economic trends, forecasting them into the future, and analyzing the determinants of business pricing policies, in order to better inform decision makers in development of optimal business and economic policies.

## Economics Requirements and Foundation Core

The following objectives apply to all individuals pursuing a BS in economics:

- Students completing an economics degree will possess the tools which enable them to analyze and understand macro and micro economic problems and policies.
- Students will possess qualifications and knowledge which will help them to find employment in fields related to economics.
- Students will acquire and be able to use basic tools to enable them to carry out quantitatively oriented tasks in their employment or their field of graduate studies.

Business courses taken to fulfill the requirements for an undergraduate or graduate degree from the CWU College of Business must have been taken within the last 10 years at the time of graduation. Exceptions may be made but must be approved prior to acceptance into the College of Business by the department chair and dean or designee.

Students wishing to have credits from non-United States institutions considered for transfer into the College of Business for any major or minor must have their transcripts evaluated through outside credential evaluators who are members of the National Association of Credential Evaluation Services (NACES), such as the Foundation for International Services (FIS), the World Education Service (WES), or Educational Perspectives. Students who intend to pursue the CPA may instead decide to use the NABSA (National Association of State Boards of Accountancy) international evaluation services since it is a requirement of the CPA. Credits for current students participating in a CWU study abroad program will be evaluated by the Office of the Registrar.

Equivalent lower-division (100-200 level) courses may be transferred toward meeting the foundation course requirements for any BS degree in the college. Upper-division (300-400 level) courses may be transferred toward meeting the major requirements only with the approval of the department chair and the college dean (or designee).

## Academic Jeopardy Policy

The College of Business is committed to the success of its students. If a student that has been admitted to the College of Business is deemed to be in academic jeopardy, the College of Business may place restrictions on the student. A student is considered in academic jeopardy for the following reasons:

- On academic warning or probation
- Frequently withdraws from class
- Repeating coursework to be successful
- Has less that a 2.5 (2.499 and below) in any of the required GPAs for graduation.
- CWU GPA
- Collegiate GPA (CWU and all transfer coursework combined)
- Major GPA
- Upper-division coursework in the major GPA
- Accounting majors: upper-division Accounting coursework GPA
The College of Business may do the following in response to an Academic Jeopardy situation:
- Limit College of Business coursework in future quarters
- Require academic advising with both faculty and/or professional advisors
- Require academic success plans
- Double majors or double specialization students may be limited to one major plan in the College of Business

If a student is unable to improve academically while receiving intensive advising and support or does not actively participate in required advising, the student may be subjected to the College of Business Separation Policy.

## Separation Policy

If a student that has been admitted to the College of Business is placed on academic warning, probation, suspension, has repeat academic course withdrawals, or academic performance below the necessary grade point averages required to graduate, then the student's admission into the College of Business may be rescinded. Students may also be rescinded for violations of the College of Business Statement of Conduct and Code of Honor, or for engaging in Prohibited Student Conduct as defined by Washington Administrative Code (see WAC 106-125-020). Once rescinded, the student will be denied readmission to the College of Business for one year following which a written petition for readmission must be presented at least 30 days prior to the start of the quarter in which readmission is desired. The decision to readmit will be based on meeting current admission standards, analysis of the entire academic record, as well as any other sources of information deemed appropriate. Readmission is not guaranteed.

## Service to Other Majors

Students majoring in programs outside CB who are required to take courses in this college for either their major or minor will be eligible to enroll on a space-available basis. These students will be given priority over other non-college majors wishing to enroll in courses. All students must have taken prerequisites for courses prior to enrollment.

## Transfer Credits and Prior Learning Assessment

Equivalent lower-division (100-200 level) courses may be transferred toward meeting the pre-admission requirements. Upper-division (300- to 400-level) courses may also be transferred toward meeting the business core and specialization requirements, but only with the approval of the department chair and the college dean (or designee).

## Repeat Policy

Business administration courses may be repeated only once.

## Foundation Core Requirements

- BUS 102 - Business Computer Skills Credits: (4)
- BUS 221 - Introductory Business Statistics Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)
- ECON 130 - Foundations for Business Analytics Credits: (5)
- OR MATH 130 - Finite Mathematics Credits: (5)

Select one from the following for 5 credits:

- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- MATH 170 - Intuitive Calculus Credits: (5)
- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)

Foundation Core Requirements Total Credits: 29

## Managerial Economics Specialization

This specialization is for students with an interest in both public and private sector employment and preparation for law school. Highly recommended supporting courses: MATH 170 or MATH 172. The managerial economics specialization can be used as part of a double major. See your advisor for details.

Required Courses Credits: 48

- ACCT 251 - Financial Accounting Credits: (5)
- ACCT 252 - Managerial Accounting Credits: (5)
- BUS 241 - Legal Environment of Business Credits: (5)
- BUS 301 - Contemporary Approaches to Personal and Professional Development Credits: (3)
- COM 301 - Public Speaking for Business and Organizations Credits: (2)
- ECON 352 - Managerial Economics Credits: (5)
- ECON 401 - Intermediate Microeconomic Analysis Credits: (5)
- ECON 402 - Intermediate Macroeconomic Analysis Credits: (5)
- ECON 406 - Business Analytics Credits: (5)
- ENG 311 - Business Writing Credits: (3)
- FIN 370 - Introductory Financial Management Credits: (5)

Department-Approved Electives Credits: 20

- 300- to 400-level economics courses (except ECON 396, ECON 490, ECON 496) Credits: (15)
- Other 300- to 400 -level accounting, business administration, and economics courses Credits: (5)

Total Specialization Credits: 68
Total Credits: 97

## Economics Minor I

This minor is designed to accompany the business administration and accounting majors. Prior approval of electives by the economic advisor is required.

Required Courses

- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)

Additional Credits - Credits: 15

- Other 300-400 level economics courses with departmental approval excluding ECON 406 and ECON 490. Credits: (15)

Total Credits: 25
Additional Graduation Requirements
A cumulative grade point average of 2.25 in the above courses must be achieved with a minimum grade of C - in each course. The credit/no credit option will not be accepted for any of these courses. The student must have earned a minimum cumulative GPA of 2.25 in all collegiate study. These criteria also apply to equivalent courses transferred from other institutions.

## Business Analytics Minor or Certificate

The business analytics minor and certificate provides opportunities to College of Business and actuarial science majors to develop additional skills in descriptive, predictive, and prescriptive business analytics. Required courses introduce students to relevant modelling and statistical methods, and management science techniques, teaching them how to analyze business and economic data with a goal of obtaining insights needed for informed business decision making. Elective courses allow students to apply their business analytics skills to various business disciplines including accounting, economics, marketing, supply chain management, and management information systems, by taking courses focused on field specific data and software applications.

## Admission Requirements

Admission to a College of Business major or actuarial science major.

## Graduation Requirements

Students must earn a cumulative grade point average of 2.25 in courses allowed in fulfilling the business analytics minor and certificate requirements.

Required Courses Credits: 10

- ECON 406 - Business Analytics Credits: (5)
- MIS 386 - Management Information Systems Credits: (5)

Department-Approved Electives Credits: 15
(Must choose at least two disciplines)

- ACCT 305-Cost Accounting Credits: (5)
- ACCT 455 - Accounting Information Systems Credits: (5)
- ACCT 461 - Fraud Examination Credits: (5)
- ECON 325 - Introduction to Forecasting Credits: (5)
- ECON 424 - Introduction to Econometrics Credits: (5)
- ECON 426 - Economic Research Credits: (5)
- MIS 320 - Business Process Analysis and Systems Credits: (5)
- MIS 446 - Systems Analysis and Design in Business Credits: (5)
- MIS 460 - Applied Business Analytics Credits: (5)
- MKT 376 - Foundations of Digital Marketing Credits: (5)
- MKT 469 - Market Research Credits: (5)
- MKT 470 - Marketing Problems and Policy Credits: (5)
- SCM 425 - Procurement and Supply Management Credits: (5)
- SCM 425A - Enterprise Purchasing and Materials Management Systems Lab Credits: (1)
- SCM 435 - Supply Chain Operations Credits: (5)
- SCM 435A - Enterprise Production Planning and Execution Systems Lab Credits: (1)

Total Credits: 25

Tina Clark, administrative assistant
Nancy Schnebly, secretary lead

## Department Information, Standards, and Requirements

Major and/or minor programs in the Education, Development, Teaching and Learning (EDTL) department include early childhood education, elementary education, bilingual education/teaching English as a second language, literacy and special education. Additionally, the EDTL department contributes to the middle-level teaching programs in mathematics (see mathematics in the catalog) and science teaching (see science education in the catalog).

In addition to a listed major and/or minor, students must maintain full admission status in the School of Education and successfully complete all certification requirements to qualify for the Washington State teaching certificate. The early childhood education major and minor offer options in which these requirements do not apply (see descriptions below). Students completing a special education major or minor must complete EDCS 424 if they are pursuing a secondary disciplinespecific teaching major (or EDLT 308 for those also seeking an elementary-specific teaching major) as part of the Professional Education Program. All students completing a secondary discipline-specific program must complete EDCS 424. All other education department majors or minors do not require the completion of this course. Also, at least 75 percent of the endorsable major or minor must be completed prior to EDCS 442, Student Teaching.

All students seeking a teacher certification endorsement must maintain a 3.0 GPA or higher for the last 45 graded credits. Students must also earn a minimum grade of " C " in all required major, minor, and Professional Education Program courses.

## Special Education Majors

The special education majors offered are specifically designed to prepare teachers for meeting the diverse competencies required for teaching individuals with disabilities. Students electing special education teaching must follow one of the outlined programs. EDSE 302 must be taken prior to or concurrently with EDSE 311.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/teaching-learning/ or by contacting the department directly.

# Early Childhood Education Major, BA 

(with Washington State Teacher Certification)

This major is intended to prepare students to become birth through grade 3 teaching specialists. As it is less than a 60 -credit major it requires a minor or second major. Students who elect to complete this major for a teacher certification endorsement in early childhood education are strongly advised to simultaneously complete the elementary education major (see a department advisor as to how this may be effectively accomplished). Students seeking the teacher certification endorsement in early childhood education must complete Teacher Certification and Professional Education Program requirements. Successful completion of EDEC 492 and EDEC 493 (minimum of 12 credits) is expected before student teaching. Majors and minors will complete program as a learning cohort (beginning fall or winter quarter) EDEC 492 and EDEC 493 concurrently and then either course may be repeated individually. Candidates must be fully admitted to the major prior to beginning the six-quarter cohort sequence. Students enrolling in any course with a field experience must have a current WSP and FBI fingerprint and background clearance on file with CWU. Please check with the CWU Teacher Certification Office (Black Hall, room 228; 509-963-2660) regarding clearance.
(without Washington State Teacher Certification)
A student may complete the Early Childhood Education major without gaining entry to the Teacher Certification Program or completing the Professional Education Program. Under such circumstances a teacher certification endorsement in early childhood will not be granted. This option exists for those individuals who wish to work with young children in birth-age 8 settings that do not require teacher certification. Candidates must be fully admitted to the major or minor prior to beginning the six-quarter cohort sequence. While full application to the Teacher Certification Program is not required, students enrolling in any Early Childhood Education Program class that has a field experience, must have current WSP/FBI fingerprint and background clearance. Please check with the CWU Teacher Certification Office (Black Hall, room 228; 509-963-2660) regarding clearance.

Required Courses

- EDEC 306-Professional Growth and Expectations Credits: (2)
- EDEC 307 - Equity, Culture, and Anti-bias in ECE Credits: (3)
- EDEC 312 - Childhood Learning Credits: (3)
- EDEC 313 - Materials and Manipulatives in ECE Credits: (3)
- EDEC 314 - Learning through Play Credits: (3)
- EDEC 321 - Curriculum I Credits: (3)
- EDEC 322 - Parent Involvement Credits: (3)
- EDEC 411 - Curriculum II Credits: (3)

## Elementary Education Major, BA

This major satisfies the Washington State teacher education endorsement for elementary (K-8) education (2014). There is not an option to complete this major without completing all state teacher certification requirements.

Students who complete this major will be endorsed to teach in regular, self-contained elementary classrooms.

## Admission Requirements

Students may take the first 2 quarters of courses as outlined in the program of study. To continue with the Elementary Education Major, students must be fully admitted to the CWU Teacher Certification Program and have completed prerequisites MATH 164 and MATH 226.

## Graduation Requirements

Candidates must complete all major courses with a C or better, maintain a cumulative GPA of at least 3.0, and meet all requirements of the Teacher Certification Program for Washington State Teacher Certification.

Introduction to the Teaching Profession Credits: 15

Home, school, and community are emphasized as learning environments and their role in supporting the learning process.

- ELEF 212 - Introduction to Teaching in Elementary Schools Credits: (3)
- ELEM 292 - Lab I: Introduction to the Teaching Profession Credits: (1)

## Middle-level Humanities Teaching Major, BA

The middle-level humanities teaching major is designed for students who are seeking teaching careers in teaching English language arts and social studies (economics, history, geography, social studies and civics) at the middle-level grades (5-8). The coursework provides experiences in the humanities subject content areas and instructional pedagogy including field experiences that are designed to prepare teacher certification and content endorsement. The middle-level humanities teaching major does not require a minor for the degree program. Students in the middle-level humanities teaching major must be admitted to the Teacher Certification Program and complete the Professional Education Program sequence ( 50 credits) coursework as part of the teacher certification process.

## Required Courses

- EDEL 476 - Integrated Humanities at the Middle-level Grades Credits: (5)
- EDEL 477 - Middle School Students and Their Environment Credits: (4)
- EDEL 478 - Developmentally Responsive Curriculum in the Middle Grades Credits: (3)
- EDEL 493 - Professional Educators Field Experience Credits: (1-15) (Must be taken for 3 credits)
- EDLT 324 - Literacy Across the Curriculum Credits: (3)
- ENG 247 - Multicultural Literature Credits: (5)
- ENG 320 - English Grammar Credits: (5)
- ENG 429 - Teaching Writing in Middle-level Humanities Credits: (5)
- ENG 488 - Teaching Portfolio Credits: (2)
- ENG 492 - Practicum Credits: (3)
- HIST 101 - World History to 1500 Credits: (5)
- HIST 143 - United States History to 1865 Credits: (5)
- HIST 301 - Pacific Northwest History Credits: (5)
- POSC 210 - American Politics Credits: (5)

Select one from the following for 5 credits:

- ECON 101 - Economic Issues Credits: (5)
- ECON 102 - World Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)

Select one from the following for 5 credits:

- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 208 - Our Human World Credits: (5)

Upper-Division World History to 1600

## Select one from the following for 5 credits:

- HIST 313 - History of Rome 500 B.C. to 500 A. D. Credits: (5)
- HIST 315 - Muslim Middle East (Put on Reserve 9/16/16.) Credits: (5)
- HIST 325 - Renaissance and Reformation Credits: (5)
- HIST 370 - Medieval European History Credits: (5)
- HIST 383 - East Asian Civilization Credits: (5)
- HIST 422 - Roman and Medieval Britain Credits: (5)
- HIST 473 - Russia to 1881 Credits: (5)

Upper-Division United States History to 1900
Select one from the following for 5 credits:

- HIST 339 - Colonial British America Credits: (5)
- HIST 341 - The Constitution and the New Republic, 1783-1800 Credits: (5)
- HIST 440 - The American Revolution Credits: (5)
- HIST 442 - Jefferson, Jackson, and American Growth, 1800-1848 Credits: (5)
- HIST 443 - The West in American History Credits: (5)

## Bilingual Education/Teaching English as a Second Language Minor

This minor satisfies the endorsement requirements for bilingual education and English Language Learner. This minor serves the goals and requirements of students wishing to teach in classrooms characterized by cultural and linguistic diversity. The Bilingual Education/TESL minor leads to K-12 endorsements in bilingual education and English Language Learners. Students must demonstrate proficiency in a nonEnglish language in order to meet the bilingual education minor requirements. This is to be demonstrated by passing the foreign language examination assessment required by the State of Washington at the proficiency levels required for Bilingual Education candidates.

## Admission Requirements

Candidates must be conditionally admitted to the CWU Teacher Certification program or have a signed non-certification waiver letter on file before admission to program. Candidates may take EDBL 312: Foundations of Bilingual Education, or EDBL 438: Teaching ESL before admission to program.

## Graduation Requirements

Before graduation, candidates must pass the foreign language examination assessment required by the State of Washington at the required proficiency level.

## Required Courses

- EDBL 312 - Foundations in Bilingual Education Credits: (3)
- EDBL 318 - Family, Community, and Culture in Education Credits: (3)
- EDBL 430 - Sheltering Instruction for Linguistically Diverse Students Credits: (3)
- EDBL 433 - Educational Linguistics Credits: (3)
- EDBL 435 - Bilingual Education in the Content Areas Credits: (3)
- EDBL 438 - Teaching English as a Second Language Credits: (3)
- EDBL 439-Assessment of Linguistically Diverse Students Credits: (3)
- EDBL 440 - Development of Literacy with Linguistically Diverse Students Credits: (3)
- EDBL 492 - Practicum Credits: (1-15) (Must be taken for 3 credits) (Four EDBL courses must be completed before EDBL 492 admission)

Total Credits: 27

College and Department Information
Education, Development, Teaching and Learning Department College of Education and Professional Studies

## Early Childhood Education Minor

(with Washington State Teacher Certification)
This minor is intended to prepare the students to become a birth through grade 3 teacher. Students who elect to complete this minor with a teaching endorsement in early childhood education are strongly advised to simultaneously complete the elementary education major (see a department advisor as to how this may be effectively accomplished). Students seeking the teacher certification endorsement in early childhood education must complete Teacher Certification and Professional Education Program requirements and courses ( 50 credits). Candidates must be fully admitted to the minor prior to beginning the six-quarter cohort sequence. All students in the ECE program must have WSP/FBI background and fingerprint clearance. Please check with the CWU Teacher Certification Office (Black Hall, room 228; 509-963-2660) regarding clearance.
(without Washington State Teacher Certification)
A student may complete this minor without gaining entry to the Teacher Certification Program or completing the Professional Education Program. Under such circumstances a teacher certification endorsement in early childhood will not be granted. This option exists for those individuals who wish to work with young children in an infancy/toddler/preschool setting. Candidates must be fully admitted to the minor prior to beginning the six-quarter cohort sequence. All students in the ECE program must have WSP/FBI background and fingerprint clearance. Please check with the CWU Teacher Certification Office (Black Hall, room 228; 509-963-2660) regarding clearance.

## Required Courses

- EDEC 306 - Professional Growth and Expectations Credits: (2)
- EDEC 307-Equity, Culture, and Anti-bias in ECE Credits: (3)
- EDEC 312 - Childhood Learning Credits: (3)
- EDEC 313 - Materials and Manipulatives in ECE Credits: (3)
- EDEC 314 - Learning through Play Credits: (3)
- EDEC 321 - Curriculum I Credits: (3)
- EDEC 322 - Parent Involvement Credits: (3)
- EDEC 411 - Curriculum II Credits: (3)
- EDEC 412 - Responsible Childhood Assessment Credits: (3)
- OR EFC 315 - Educational Assessment Credits: (3)
- EDEC 422 - Classroom Management in an ECE Classroom Credits: (3)
- OR EFC 350 - Classroom Management Credits: (3)
- EDEC 424-Curriculum III Credits: (3)

Total Credits: 32

## Educating Highly Capable Learners Minor

The educating highly capable learners minor is designed for students and certified teachers who are seeking additional endorsement in working with highly capable (gifted and talented) students in the P-12 educational system. While the minor does not result in an initial Washington State Endorsement, it does qualify for an "Add-on" endorsement that can be attached to an existing Washington State Teaching certificate. Teacher Education Candidates seeking a primary initial endorsement (i.e. Early Childhood Education, Elementary Education, etc.) that requires a minor can add the educating highly capable learners minor to complete the BA in education degree. However, the candidate will not be eligible for the highly capable endorsement until the initial teaching certificate
has been awarded. Practicing teachers and teacher education candidates at K-12 levels can add this minor to develop a broader spectrum of developmental understanding and strategies for working with highly gifted and talented learners.

Teacher education candidates in the Educating Highly Capable Learners Minor Program must be admitted to Teacher Certification Program or currently hold a valid teaching certificate.

Required Courses

- EDEL 401 - Foundations/Philosophy for Teaching Highly Capable Learners Credits: (2)
- EDEL 405 - Societal and Cultural Perceptions of Giftedness Credits: (3)
- EDEL 410 - Identification of Highly Capable Learners Credits: (2)
- EDEL 415 - Learning Environments for Highly Capable Learners Credits: (3)
- EDEL 425 - Curriculum Development/ModificationHighly Capable Learners Credits: (3)
- EDEL 430 - Individual Development of Highly Capable Learners Credits: (3)
- EDEL 435 - Introduction to Project-Based Learning (PBL) Credits: (2)
- EDEL 450 - Planning and Instruction I: Highly Capable Learners Credits: (3)
- EDEL 455 - Planning and Instruction II: Highly Capable Learners Credits: (3)
- EDEL 493 - Professional Educators Field Experience Credits: (1-15)

Total Credits: 30

## Literacy Minor

The literacy minor, with campus and field experiences, is designed to prepare literacy teachers and strengthen background preparation of elementary teachers.

EDLT 308 is a prerequisite for admittance to the minor (EDLT courses) except for EDLT 324. All EDLT courses require acceptance into the TCP. The minor should be commenced in the junior year.

EDLT 409 is a prerequisite for EDLT 493.
EDLT 493 also requires permission of the department (designated as the instructor of EDLT 493).

Permission for EDLT 493 will not be granted until 5 required courses in the literacy minor, excluding EDLT 308 is completed or will be completed the quarter prior to enrollment.

## Required Courses

- EDLT 308 - Literacy I Credits: (3) (prerequisite for EDLT minor courses)
- EDLT 409 - Literacy II Credits: (5) (prerequisite for EDLT 493)
- EDLT 324 - Literacy Across the Curriculum Credits: (3)
- EDLT 410-Teaching Word Recognition Skills Credits: (3)
- EDLT 411 - Teaching Comprehension Credits: (3)
- EDLT 412 - Assessment of Literacy Skills and Processes Credits: (3)
- EDLT 413 - Methods and Materials for Literacy Instruction Credits: (3)
- EDLT 414 - Teaching Literacy in a Multi-Cultural, Multi-Lingual Setting Credits: (3)
- EDLT 418 - Literacy and Linguistics Credits: (3)
- EDLT 493 - Literacy Practicum Credits: (6) (Requires department permission. A minimum of 5 required literacy minor courses, excluding prerequisites, must be completed for permission)

Total Credits: 35

College and Department Information

Education, Development, Teaching and Learning Department College of Education and Professional Studies

## Middle-level English Minor (NonEndorsement)

The middle-level English minor is designed for students who are seeking teaching careers at the elementary or middle school level. While this minor does not result in a Washington State middle-level humanities endorsement which requires both the English and social studies content areas, it does provide additional training and expertise in the English and language arts content areas. Candidates seeking the elementary endorsement (K-8) can add this minor to provide an English/language arts content focus area to the generalist teaching degree. Teacher candidates at the middle-level and secondary-level can add this minor to broaden specialized content areas as the first step in adding middle-level humanities (English language arts and social studies) endorsement.

Required Courses

- EDEL 476 - Integrated Humanities at the Middle-level Grades Credits: (5)
- EDEL 477 - Middle School Students and Their Environment Credits: (4)
- EDEL 478 - Developmentally Responsive Curriculum in the Middle Grades Credits: (3)
- EDLT 324 - Literacy Across the Curriculum Credits: (3)
- ENG 247 - Multicultural Literature Credits: (5)
- ENG 303 - Principles of English Studies Credits: (5)
- ENG 320 - English Grammar Credits: (5)
- ENG 429 - Teaching Writing in Middle-level Humanities Credits: (5)
- ENG 488 - Teaching Portfolio Credits: (2)
- ENG 492 - Practicum Credits: (3)

Total Credits: 40

College and Department Information
Education, Development, Teaching and Learning Department College of Education and Professional Studies

## Middle-level Social Studies Minor (Non-Endorsement)

The middle-level social studies minor is designed for students who are seeking teaching careers at the elementary or middle school level. While this minor does not result in a Washington State middle-level humanities endorsement, which requires both the English and social studies content areas, it does provide additional training and expertise in the social studies, history, economics, civics, and geography content areas. Candidates seeking the elementary endorsement (K-8) can add this minor to provide a social studies content focus area to the generalist teaching degree. Teacher candidates at the middle-level and secondary-level can add this minor to broaden specialized content areas as the first step in adding middle-level humanities (English language arts and social studies) endorsement.

## Required Courses

- EDEL 476 - Integrated Humanities at the Middle-level Grades Credits: (5)
- EDEL 477 - Middle School Students and Their Environment Credits: (4)
- EDEL 478 - Developmentally Responsive Curriculum in the Middle Grades Credits: (3)
- EDEL 493 - Professional Educators Field Experience Credits: (1-15) (Must be taken for 3 credits)

Select from the following: Credits (15)

- HIST 101 - World History to 1500 Credits: (5)
- HIST 143 - United States History to 1865 Credits: (5)
- HIST 301 - Pacific Northwest History Credits: (5)
- POSC 210 - American Politics Credits: (5)

Select from the following: Credits (5)

- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 208 - Our Human World Credits: (5)

Select from the following: Credits (5)

- ECON 101 - Economic Issues Credits: (5)
- ECON 102 - World Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)

Select from the following: Credits (5)

## Upper-division World History to 1600

- HIST 313 - History of Rome 500 B.C. to 500 A. D. Credits: (5)
- HIST 315 - Muslim Middle East (Put on Reserve 9/16/16.) Credits: (5)
- HIST 325 - Renaissance and Reformation Credits: (5)
- HIST 370 - Medieval European History Credits: (5)
- HIST 383 - East Asian Civilization Credits: (5)
- HIST 422 - Roman and Medieval Britain Credits: (5)
- HIST 473 - Russia to 1881 Credits: (5)

Upper-division United States History to 1900

- HIST 339 - Colonial British America Credits: (5)
- HIST 341 - The Constitution and the New Republic, 1783-1800 Credits: (5)
- HIST 434 - American Indian History to 1795 Credits: (5)
- HIST 438 - American Indian History since 1795 Credits: (5)
- HIST 440 - The American Revolution Credits: (5)
- HIST 442 - Jefferson, Jackson, and American Growth, 1800-1848 Credits: (5)
- HIST 443 - The West in American History Credits: (5)
- HIST 444 - Sectionalism, Civil War, and Reconstruction Credits: (5)
- HIST 450 - Exploring U.S. Cultural History Credits: (5)
- HIST 454 - American Environmental History Credits: (5)

Total Credits: 45

Education, Development, Teaching and Learning Department College of Education and Professional Studies

## Special Education Minor

The special education programs offered are specifically designed to prepare teachers for meeting the diverse tasks required in teaching individuals with disabilities. The minor may serve as a "pre-endorsement" plan for those wishing to add the special education endorsement at a later date. See a special education advisor for your individualized pre-endorsement plan.

## Required Courses

- EDSE 310 - Introduction to Special Education Credits: (4)
- EDSE 311 - Foundations of Special Education Credits: (1)
- EDSE 410-Behavior Management for Students with Disabilities Credits: (3)
- EDSE 411 - Assessment of Students with Disabilities Credits: (4)
- EDSE 422 - Teaching Strategies, Curriculum, and Materials for Students with Disabilities Credits: (5)
- EDSE 423 - Instructional Practices/Strategies in Literacy and Math for Students with High Incident Disabilities Credits: (4)
- EDSE 431 - Individualized Educational Programs for Students with Disabilities Credits: (4)
- EDSE 432 - Strategies for Working with Students with Low Incidence Disabilities Credits: (3)
- EDSE 433 - Pre-school for Students with Developmental Delays Credits: (3)
- EDSE 460 - Collaboration with Parents, Paraprofessionals, and Community Agencies Credits: (4)

Total Credits: 35

## Teaching English as a Second Language (TESL) Minor

This minor satisfies the endorsement for English Language Learner. This minor prepares students to teach in classrooms where linguistically diverse students are enrolled. While the bilingual/TESL minor leads to a bilingual education endorsement, the TESL minor leads to an English Language Learners endorsement. Students must complete, or have already completed, one year of study in a foreign or second language or the equivalent (at either the high school or university level).

## Admission Requirements

Candidates must be conditionally admitted to the CWU Teacher Certification program or have a signed non-certification waiver letter on file before admission to program. Candidates may take EDBL 312: Foundations of Bilingual Education, or EDBL 438: Teaching ESL before admission to program.

## Program Requirements

EDBL 492 requires that four (4) required program courses be completed before enrollment.

## Required Courses

- EDBL 312 - Foundations in Bilingual Education Credits: (3)
- EDBL 318 - Family, Community, and Culture in Education Credits: (3)
- EDBL 430 - Sheltering Instruction for Linguistically Diverse Students Credits: (3)
- EDBL 433 - Educational Linguistics Credits: (3)
- EDBL 438 - Teaching English as a Second Language Credits: (3)
- EDBL 439-Assessment of Linguistically Diverse Students Credits: (3)
- EDBL 440 - Development of Literacy with Linguistically Diverse Students Credits: (3)
- EDBL 492 - Practicum Credits: (1-15) (Must be taken for 3 credits) (Four EDBL courses must be completed before EDBL 492 admission)

Department-Approved Electives Credits: 3

Total Credits: 27

## Global Literacy Development Certificate

#### Abstract

Students in the Global Literacy Development Certificate Program will gain knowledge of best practices in literacy development and effective communication strategies. They will be prepared to support professionals in creating and supporting literacy programs in communities across cultures and around the world. This certificate program will be offered at the Ellensburg campus and on-line.

## Required Courses

- COM 365-Organizational Communication Credits: (4)
- EDLT 317 - Early Literacy (On reserve as of 9/16/15) Credits: (3)
- EDLT 321-Teaching Children's Literature Credits: (3)
- EDLT 414 - Teaching Literacy in a Multi-Cultural, Multi-Lingual Setting Credits: (3)
- EDLT 418 - Literacy and Linguistics Credits: (3)
- EDLT 498 - Special Topics Credits: (1-6)
- EDLT 499 - Seminar Credits: (1-5)

Total Credits: 18

Shelley Spencer, department manager
Jeff Wilcox, instructional and classroom support technician

## Department Overview

The Department of Engineering Technologies, Safety, and Construction offers BS and BAS degree programs in various technologies.

## Accrediting Information

The Construction Management program is fully accredited by the American Council for Construction Education (ACCE).

The B.S. in Electronics Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

The B.S. in Mechanical Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET, http://www.abet.org.

## Department Information

Some programs have specific admission requirements and admission deadlines. Specific information for each program can be found on the program Web site.

Students should seek advising from their program advisor prior to registration each quarter.

Courses with an additional fee are identified in the special course fee section of the student handbook published by the registrar.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/engineering or by contacting the department directly.

# Construction Management Major, BS 

## Co-Coordinators

David Carns, MS
P. Warren Plugge, PhD

## Advisors

David Martin, MS
Michael Whelan, PhD
This major prepares the graduate for management positions in the construction industry. Students must be accepted into the major prior to taking upper-division CMGT courses. See www.cwu.edu/engineering for details. Students pursuing this degree should work closely with their program advisor to ensure that prerequisites for entry into the major have been satisfied.

Construction management students have the choice to concentrate on one of two different construction types; general building or heavy civil construction.

## Admission Requirements

Admission to the program is competitive; refer to construction management handbook on the program website
(www.cwu.edu/engineering/construction-management).

## Exit Requirements

Students are required to complete the Associate Constructor exam administered by American Institute of Constructors and achieve a minimum score of 60 percent to graduate with a BS in construction management.

- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)

## Electronics Engineering Technology Major, BS

Advisors<br>Lad Holden, MT<br>Greg Lyman, MS

The technologists graduating from this program are applications oriented, building upon a background of mathematics, science, and technology. They interface with engineers at the product level and produce practical, workable results quickly, install and operate technical systems, devise hardware and software from proven concepts, develop and produce products, service machines, programs, and systems, manage production facilities and work groups, and provide support for technical systems' hardware and software.

Students pursuing this degree should work with the department. Due to the number of hours required, some students may find that this program requires additional time to complete.

Core Requirements - Credits: 68

- CS 110 - Programming Fundamentals I Credits: (4)
- EET 221 - Basic Electricity Credits: (3)
- EET 221LAB - Basic Electricity Laboratory Credits: (1)
- EET 271 - Digital Circuits Credits: (4)
- EET 312 - Basic Electronics Credits: (4)
- EET 323 - Active Linear Circuits Credits: (4)
- EET 325 - Electrical Networks Credits: (4)
- EET 343 - Process Control Credits: (4)
- EET 372 - Advanced Digital Circuits Credits: (4)
- EET 373 - Introduction to Embedded Programming Credits: (4)
- EET 374 - Microprocessors Credits: (4)
- EET 376 - Advanced Microprocessors Credits: (4)
- EET 426 - Advanced Electrical Network Credits: (4)
- EET 452 - Computer Networks Credits: (4)
- ETSC 241 - Programmable Logic Controller Applications Credits: (4)
- ETSC 242 - Instrumentation Credits: (4)
- ETSC 265 - Three-dimensional Modeling Credits: (4)
- ETSC 301 - Engineering Project Cost Analysis Credits: (4)

Pre-Approved Elective Sequences - Credits: 16
Select two of the following sequences.

- CS 111 - Programming Fundamentals II Credits: (4)
- AND CS 301 - Data Structures Credits: (4) OR
- EET 332 - Generation of Electrical Power Credits: (4)
- AND EET 433-Transmission and Distribution of Electrical Power Credits: (4) OR
- EET 377 - Advanced Robotics and Automation Credits: (4)
- AND EET 477 - Industrial Robotics and Automation Credits: (4) OR
- ETSC 490 - Cooperative Education Credits: (1-12) (Must be taken for 8 credits.)

Mathematics Requirement - Credits: 13-15

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)

Select one from the following:

- MATH 260 - Sets and Logic Credits: (5)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- MATH 330 - Discrete Mathematics Credits: (5)
- MATH 376 - Differential Equations I Credits: (3)

Physics Requirement - Credits: 15

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113 - Introductory Physics III with Laboratory Credits: (5)
OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182-General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)
(CHEM 181/181LAB may be substituted for PHYS 112 or PHYS 182)

Speech Requirement - Credits: 3-5

## Select one from the following:

- COM 207 - Introduction to Human Communication Credits: (5)
- COM 345 - Business and Professional Speaking Credits: (4)
- ETSC 389-Technical Presentations Credits: (3)

Written Communications Requirement - Credits: 3-5

## Select one from the following:

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- CS 325-Technical Writing in Computer Science Credits: (3)
- ENG 310 - Technical Writing Credits: (4)

Capstone Sequence - Credits: 10

- EET 487 - Senior Project Management Credits: (2)
- EET 487LAB - Senior Project Management Laboratory Credits: (2)
- EET 488 - Senior Project Quality Credits: (2)
- EET 488LAB - Senior Project Quality Laboratory Credits: (2)
- EET 489 - Senior Technical Presentations Credits: (2)

Department-Approved Electives - Credits: 0-6

- Technical Electives approved by your advisor.

Total Credits: 134

This major prepares the graduate for leadership positions in industry and technical distribution. The program applies algebra, trigonometry, and the physical sciences to industrial systems. Students select 40-41 credits by advisement in an area of technical interest. Areas of interest may include technology (general), industrial distribution, industrial electronics, industrial manufacturing, industrial supervision, power systems, cast metals, metal fabrication, non-destructive testing, wood production, or other technical areas by departmental advisement. With departmental approval, transfer students from technical programs may elect to use their technical degree as the elective area of interest.

Students pursuing this degree should work closely with their department advisor to assure that they have met the prerequisites for the upper-division electives.

## Required Courses

- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1) OR
- CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- EET 221 - Basic Electricity Credits: (3)
- EET 221LAB - Basic Electricity Laboratory Credits: (1)
- EET 271 - Digital Circuits Credits: (4)
- ETSC 160 - Computer-Aided Design and Drafting Credits: (4)
- ETSC 241 - Programmable Logic Controller Applications Credits: (4)
- ETSC 242 - Instrumentation Credits: (4)
- ETSC 301 - Engineering Project Cost Analysis Credits: (4)
- ETSC 380 - Quality Control Credits: (4)
- ETSC 385 - Product Design and Development Credits: (4)
- ETSC 442 - Alternative Energy Resources and Technology Credits: (5)
- ETSC 455 - Engineering Project Management Credits: (4)
- ETSC 490 - Cooperative Education Credits: (1-12) (Must be taken for 4 credits)
- IT 101 - Computer Applications Credits: (3)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- MET 310 - Hydraulics/Pneumatics Credits: (4)
- MET 345 - Lean Manufacturing Credits: (4)
- MET 351 - Metallurgy/Materials and Processes Credits: (4)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- SHM 325-Manufacturing Safety and Health Credits: (3)

Select one of the following Credits: 4-5

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- OR ENG 310-Technical Writing Credits: (4)

Total Required Courses Credits: 82-83
Technical Specialization

- Courses by advisement.

Total Specialization Credits: 27-29

Total Credits: 109-112

# Mechanical Engineering Technology Major, BS 

## Coordinator

Craig Johnson, PhD

## Advisors

Roger Beardsley, MS
Charles Pringle, MS
The bachelor of science degree in mechanical engineering technology (MET) has specializations in mechanical or manufacturing technology. The major provides a broad foundation in the practical application of mechanical engineering principles. Graduates concentrating in mechanical technology may pursue one of the following career paths: machine and product design, product and system evaluation, plant operation and management, technical sales, field service, environmental quality control, and energy production. Graduates specializing in manufacturing technology are prepared to enter career paths as tool designers, tool and production planners, numerical control programmers, machine planners, computerassisted machine planners, manufacturing process analysts, quality assurance, and technical field representatives.

Those students who are interested in taking advanced engineering courses after graduation should complete the general physics sequence, (PHYS 181, 182, 183) and mathematics through differential equations.

Students pursuing the MET degree should work with the departmental advisor to ensure that the prerequisites for the upper-division electives have been met. Due to the number of hours in this program, some students may find that this program requires additional time to complete.

# Safety and Health Management Major, BS 

## Coordinator

Sathyanarayanan Rajendran, PhD, CSP

## Advisors

Allen Sullivan, PhD
Michael Andler, senior lecturer

## Program Information

The mission of the CWU Safety and Health Management (SHM) Program is to prepare our graduates to be safety and health professionals who have the technical proficiency to help create injury and incident-free workplace. The safety and health field includes many industries, functions, and occupations. Graduates from the curriculum have a history of high employment rates and competitive starting salaries.

The BS in safety and health management is the primary program for the student seeking a baccalaureate degree leading to a career in safety and health management.

## Admission Requirements

SHM pre-major applications are accepted throughout the academic year. Major applications are accepted during spring quarter, and students officially start in the fall quarter. Admission to the program is based upon a review of completed prerequisite courses, and application materials. Please see the program application at www.cwu.edu/engineering.

Admission to any course requires a grade of C or higher in each prerequisite listed. Students who do not meet the prerequisite grade requirement will be dropped from the course.

A student is expected to complete each course used to fulfill a degree program requirement with a grade of C or higher. Students must complete all CWU basic and breadth requirements prior to beginning 400 -level SHM coursework.

Required Basic and Breadth Requirement Courses Credits: 30

- BIOL 201 - Human Physiology Credits: (5)
- MATH 130 - Finite Mathematics Credits: (5)
- PHYS 106 - Physics Inquiry Credits: (5)
- PSY 101 - General Psychology Credits: (5)

Choose one of the following mathematics courses: (5)

- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)

Choose one of the following chemistry courses: (5)

- CHEM 101 - Chemistry and Planet Earth Credits: (5) OR
- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
OR
- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)

Required Courses Credits: 35-37

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- BUS 241 - Legal Environment of Business Credits: (5)
- COM 345 - Business and Professional Speaking Credits: (4)
- HED 210 - Drugs and Health Credits: (3)
- HRM 381-Management of Human Resources Credits: (5)

Choose one of the following statistics courses: (5)

- BUS 221 - Introductory Business Statistics Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)

Choose one of the following management courses: (4-5)

- MGT 380 - Organizational Management Credits: (5)
- PSY 456 - Industrial and Organizational Psychology Credits: (4)

Choose one of the following project management courses: (4-5)

- ADMG 374 - Project Management Credits: (5)
- ETSC 455 - Engineering Project Management Credits: (4)

Required Core Courses Credits: 60

- SHM 301 - Fundamentals of Safety and Health Management Credits: (3)
- SHM 323 - Construction Safety and Health Credits: (3)
- OR SHM 325-Manufacturing Safety and Health Credits: (3)
- SHM 351 - Incident Analysis Credits: (3)
- SHM 352 - Systems and Design Credits: (3)
- SHM 353 - Risk and Insurance Credits: (4)
- SHM 371 - Emergency Planning and Preparedness Credits: (4)
- SHM 375-Transportation and Fleet Safety Credits: (4)
- SHM 377 - Hazardous Materials Management Credits: (4)
- SHM 379 - Facility and Building Safety Credits: (4)
- SHM 471 - Fundamentals of Industrial Hygiene Credits: (4)
- SHM 472 - Ergonomics Credits: (3)
- SHM 474 - Safety and Health Management Systems Credits: (4)
- SHM 477 - Environmental Management Credits: (4)
- SHM 480 - Safety and Health Laboratory Credits: (2)
- SHM 481 - Evolving Issues in Safety and Health Management Credits: (2)
- SHM 485 - Safety and Health Management Capstone Credits: (3)
- SHM 490 - Cooperative Education Credits: (1-12) (Must be taken for at least 6 credits)

Department-approved Elective Course Credits: 4-5

Total Credits: 129-132

## Technology Education Broad Area Major, BS

This bachelor of science teaching major satisfies the endorsement for technology education.

Students selecting this major must have a basic background in woods, metals, drafting, and mathematics through trigonometry. ETSC 430 is a prerequisite for student teaching. Students taking this major are required to apply to the Teacher Certification Program and complete the Professional Education Program requirements offered through the Department of Educational Foundations and Curriculum.

Pre-admission Requirements Credits: 15

- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)

## Required Courses

- CTE 410 - Career and Technical Education School to Work Programs Credits: (4)
- EET 271 - Digital Circuits Credits: (4)
- ETSC 145 - Machine Woodworking Credits: (4)
- ETSC 160 - Computer-Aided Design and Drafting Credits: (4)
- ETSC 265 - Three-dimensional Modeling Credits: (4)
- ETSC 277 - Introduction to Robotics Credits: (4)
- ETSC 385 - Product Design and Development Credits: (4)
- ETSC 430 - Methods of Teaching Technology Education Credits: (3)
- ETSC 433 - Technology Education Laboratory Planning Credits: (3)
- ETSC 435 - Technology Education Exit Assessment Credits: (1)
- ETSC 442 - Alternative Energy Resources and Technology Credits: (5)
- MET 255 - Machining Credits: (4)
- MET 310 - Hydraulics/Pneumatics Credits: (4)
- MET 345 - Lean Manufacturing Credits: (4)
- MET 357 - Welding/Fabrication Credits: (4)
- MET 382 - Plastics and Composites Credits: (4)
- SHM 325 - Manufacturing Safety and Health Credits: (3)

Department-Approved Electives Credits: 7-10

Total Credits: 85-88

Professional Education Program Credits: 50

Professional Education Program

Total Credits: 135-138

## Technology Education Major, BS

## Coordinator

Scott Calahan, MEd
This bachelor of science teaching major satisfies the endorsement for technology education.

Students selecting this major must also select a minor or other education endorsement. ETSC 430 is a prerequisite for student teaching. Students taking this major are required to apply to the Teacher Certification Program and complete the Professional Education Program requirements offered through the Department of Educational Foundations and Curriculum.

Pre-admission Requirements Credits: 15

- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)

Required Courses

- CTE 410 - Career and Technical Education School to Work Programs Credits: (4)
- EET 271 - Digital Circuits Credits: (4)
- ETSC 145 - Machine Woodworking Credits: (4)
- ETSC 160 - Computer-Aided Design and Drafting Credits: (4)
- ETSC 265 - Three-dimensional Modeling Credits: (4)
- ETSC 277 - Introduction to Robotics Credits: (4)
- ETSC 385 - Product Design and Development Credits: (4)
- ETSC 430 - Methods of Teaching Technology Education Credits: (3)
- ETSC 433 - Technology Education Laboratory Planning Credits: (3)
- ETSC 435 - Technology Education Exit Assessment Credits: (1)
- ETSC 442 - Alternative Energy Resources and Technology Credits: (5)
- MET 255 - Machining Credits: (4)
- MET 310 - Hydraulics/Pneumatics Credits: (4)
- MET 345 - Lean Manufacturing Credits: (4)
- MET 357 - Welding/Fabrication Credits: (4)

Total Credits: 71

Additional Information

The ETSC department strongly suggests for a student to be more competitive in the job market, the following additional courses should be taken.

- MET 382 - Plastics and Composites Credits: (4)
- SHM 325 - Manufacturing Safety and Health Credits: (3)

Professional Education Program Credits: 50

# Construction Safety Minor 

Advisor<br>P. Warren Plugge, PhD

## Program Information

The construction safety minor provides a broad coverage of construction management issues that affect safety and health performance during construction work. Enrollment in upperdivision CMGT courses is based upon space availability.

Admission to any course requires a grade of C or higher in each prerequisite listed. Students who do not meet the prerequisite grade requirement will be dropped from the course. Students are expected to complete each course used to fulfill a program requirement with a grade of C or higher.

## Admission Requirements

The construction safety minor is only available to BS Safety and Health Management majors. Applications are accepted throughout the academic year. Please see the program application available on the Web at www.cwu.edu/engineering for additional information.

## Required Courses

- BUS 241 - Legal Environment of Business Credits: (5)
- CMGT 265 - Construction Documents Credits: (3)
- CMGT 346 - Construction Methods and Materials Credits: (4)
- OR CMGT 347-Heavy Civil Methods and Materials Credits: (4)
- CMGT 442 - Building Mechanical Systems Credits: (3)
- OR CMGT 443-Heavy Civil Utilities Credits: (3)
- CMGT 444 - Codes, Contracts, and Specifications Credits: (4)
- OR CMGT 445 - Heavy Civil Contract Law Credits: (4)
- ETSC 490 - Cooperative Education Credits: (1-12) (Must be taken for at least 3 credits)
- SHM 323 - Construction Safety and Health Credits: (3)

Total Credits: 25

## Risk Management Minor

The Risk Management Minor (RMM) will provide in-depth knowledge needed to assess and respond to the numerous hazard (insurable) risks faced by all organizations. The RMM will help prepare students for exciting careers within their major, by helping the students build a strong foundation in the science of risk management. The RMM will help students gain practical skills to avoid, reduce, and manage risk, and to develop and implement a balanced hazard risk financing strategy using retention, transfer, and hybrid strategies.

## Admission Requirements

Risk Management Minor (RMM) applications are accepted during the spring quarter, and the students start in the fall quarter. Any CWU student interested in improving their career opportunities can obtain the RMM. For details about the RMM application procedures, contact the Safety and Health Management Program Director.

## Graduation Requirements

Students must earn a cumulative grade point average of 2.0 (on a scale of 4.0) in courses allowed in fulfilling the Risk
Management Minor requirements.

## Program Requirements

A minimum grade of " C " is required in each of the courses used to satisfy the Risk Management Minor.

## Required Courses

- SHM 301 - Fundamentals of Safety and Health Management Credits: (3)
- SHM 353 - Risk and Insurance Credits: (4)
- SHM 454 - Risk Management Principles and Practices Credits: (4)
- SHM 455 - Risk Assessment and Treatment Credits: (4)
- SHM 456 - Risk Financing for Safety and Health Management Credits: (4)
- SHM 482 - Evolving Issues in Risk Management Credits: (1)

Total Credits: 20

## Robotics and Automation Minor

The robotics and automation minor provides students with an introduction to hardware, software, and manufacturing concepts regarding industrial automation.

## Admission Requirements

Students need ETSC Departmental permission to enter the program.

## Graduation Requirements

Student must earn a 2.25 cumulative GPA in the minor courses.

## Program Requirements

Contact the ETSC department for program requirement details.

## Required Courses

- EET 221 - Basic Electricity Credits: (3)
- EET 221LAB - Basic Electricity Laboratory Credits: (1)
- EET 377 - Advanced Robotics and Automation Credits: (4)
- EET 477 - Industrial Robotics and Automation Credits: (4)
- ETSC 241 - Programmable Logic Controller Applications Credits: (4)
- ETSC 242 - Instrumentation Credits: (4)
- ETSC 277 - Introduction to Robotics Credits: (4)

Total Credits: 24

## Safety and Health Management Minor

## Advisors

Sathyanarayanan Rajendran, PhD, CSP
Allen Sullivan, PhD
Michael Andler, senior lecturer

## Program Information

The safety and health management minor is designed for students who are interested in safety and health in the workplace. The program provides course options for the student to tailor the program to their specific career interests. Course selections should best fit the student's major program. Admission to any course required a grade of C or higher in each prerequisite listed. Students who do not meet the prerequisite grade requirement will be dropped from the course. Students are expected to complete each course used to fulfill a degree program requirement with a grade of C or higher.

## Admission Requirements

The safety and health management minor is not available to students majoring in either the BS safety and health management or BAS occupational safety and health programs. Applications are accepted during the spring quarter, and the students will start in the fall quarter. Please see the program application for preferences and evaluation available at www.cwu.edu/engineering.

## Required Courses

- SHM 301 - Fundamentals of Safety and Health Management Credits: (3)
- SHM 323-Construction Safety and Health Credits: (3)
- OR SHM 325-Manufacturing Safety and Health Credits: (3)
- SHM 351 - Incident Analysis Credits: (3)

## Traffic Safety Education Minor

Advisor<br>Scott Calahan, MEd (Summer On)

Students desiring an endorsement to teach traffic safety education in the public schools are required to take SED 382, SED 481, SED 482 and SED 484. These courses are taught concurrently during the six-week summer session.

## Required Courses

- SED 382 - Driver Task Analysis Credits: (3) Required for state endorsement.
- SED 481-Teaching Traffic Safety Education: Classroom and Simulation Instruction Credits: (3) Required for state endorsement.
- SED 482 - Teaching Traffic Safety Education: In Car Credits: (5)

Required for state endorsement.

- SED 484 - Safety Program Supervision Credits: (3) Required for state endorsement.
- SHM 375 - Transportation and Fleet Safety Credits: (4)

Total Credits: 18

## Faculty and Staff

Chair
George Drake, PhD

## Professors

Liahna Armstrong, PhD, American literature, popular culture, film
Bobby Cummings, PhD, rhetoric, English education, computer composition
George Drake, PhD, British literature, literary theory
Loretta Gray, PhD, applied linguistics, composition, TESOL
Charles Xingzhong Li, PhD, linguistics, TESOL, linguistic approaches to literature
Lisa Norris, MFA, creative writing
Paulus Pimomo, PhD, British literature, post-colonial studies Christopher Schedler, PhD, American and multicultural literature
Christine Sutphin, PhD, Victorian literature, English novel, women's literature
Katharine Whitcomb, MFA, creative writing

## Assistant Professor

Michelle O'Brien, PhD , postcolonial lit, critical race, interdisciplinary gender, and transnational/transpacific literary studies
Cynthia Pengilly, PhD , rhetoric and technical communication
Zachary VandeZande, PhD, creative writing-fiction
Joshua Welsh, PhD, rhetoric, scientific and technical communication
Maya Zeller, MFA, creative writing

## Emeritus Professors

Patricia Callaghan, DA, rhetoric, world literature, English education
Toni Culjak, PhD, American, world and multicultural literature,
film
Philip B. Garrison, MA, non-fiction, poetry writing, world, and Chicano literature
Karen Gookin, MA, general education, technical writing
Mark W. Halperin, MFA, poetry writing, folk literature, modern poetry
Virginia Mack, PhD , general education, Irish literature
Teresa Martin, PhD, English education, women's literature
Steven Olson, PhD, American literature, film
Joseph Powell, MFA, creative writing, modern poetry
Gerald J. Stacy, PhD, English Renaissance literature
John L. Vifian, PhD 18th century literature, English novel

## Department Information

The Department of English offers undergraduate and graduate courses in American, British, and world literature, English language and linguistics, English education, film study, and professional and creative writing. The study of English helps students to develop and enhance skills in critical analysis and written and oral communication. English program graduates pursue a variety of careers, including business, education, government, law, publishing, and writing.

## Departmental Honors in English

The honors program in English recognizes the superior scholarship of qualified majors. To qualify for the program, students must have a minimum GPA of 3.4 overall and 3.7 in English and be recommended by three faculty members. In addition to their regular course of study, qualified students complete an individual study course culminating in an honors paper. A student whose honors paper is accepted will graduate
with departmental honors in English. For additional details, consult the department website.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/english or by contacting the department directly.

## English Language and Literature Major, BA

The study of literature trains students in reflective reading, theoretically based inquiry, critical analysis, and effective verbal and written expression. Students are taught to analyze literary works as representations of literary genres and in historical and cultural contexts as well as to examine literary influence and explore literature through the lens of critical theory. Majors are expected to complete English 302 and English 303 during their first quarter in the major.

Required Courses

- ENG 302 - Poetry and Poetics Credits: (5)
- ENG 303 - Principles of English Studies Credits: (5)
- ENG 320 - English Grammar Credits: (5)
- ENG 363 - Shakespeare Credits: (5)
- ENG 489 - Senior Colloquium Credits: (2)

Select two literary forms courses - Credits: 10

- ENG 380 - Studies in Drama Credits: (5)
- ENG 453 - Studies in Fiction Credits: (5)
- ENG 454 - Studies in Nonfiction Credits: (5)
- ENG 455 - Studies in Poetry (Put on Reserve 9/16/16.) Credits: (5)

Select one language and linguistics course- Credits: 5

- ENG 304 - English Linguistics Credits: (5)
- ENG 423 - History of the English Language Credits: (5)

Select two literature and history courses - Credits: 10

- ENG 371 - Literature and History I Credits: (5)
- ENG 372 - Literature and History II Credits: (5)
- ENG 373 - Literature and History III Credits: (5)
- ENG 374 - Literature and History IV Credits: (5)

Select one critical studies course - Credits: 5

- ENG 415 - Critical Studies in American Literature Credits: (5)
- ENG 417 - Critical Studies in World Literature Credits: (5)
- ENG 419 - Critical Studies in British Literature Credits: (5)

Select two literature and culture courses - Credits: 10

- ENG 330-African American Literature Credits: (5)
- ENG 331 - Latina/o Literature Credits: (5)
- ENG 332 - American Indian Literature Credits: (5)
- ENG 333 - Asian American Literature Credits: (5)
- ENG 334 - American Indian Oral and Nonfiction Literature Credits: (5)
- ENG 335 - Women's Literature Credits: (5)

Department-Approved Electives - Credits: 10
Select 10 credits of English literature, language, writing or film studies (Elective credits may be taken from any English literature, language, or film studies course at the 300 level or above. No more than 5 credits of film studies may be counted as elective credits in the English language and literature major. One 200 -level course (up to 5 credits) may be counted as an elective.)

Total Credits: 72

College and Department Information

College of Arts and Humanities

## English Language Arts Teaching Major, BA

This major satisfies the endorsement for English/language arts. Majors must complete the Teacher Certification Program requirements for secondary certification available through the Department of Education Foundations and Curriculum. Majors are expected to complete ENG 302 and ENG 303 prior to enrolling in other upper-division major requirements. English $422,430,488$ and 492 are required prior to student teaching. English 430, 488 and 492 must be taken concurrently. All other major requirements must be completed before enrollment in or taken concurrently with ENG 488. Enrollment in ENG 488 is by permission.

## Required Courses

- ENG 222 - Multicultural Literature for Teachers Credits: (5)
- ENG 302 - Poetry and Poetics Credits: (5)
- ENG 303 - Principles of English Studies Credits: (5)
- ENG 304 - English Linguistics Credits: (5)
- ENG 320 - English Grammar Credits: (5)
- ENG 363 - Shakespeare Credits: (5)
- ENG 422 - Teaching Young Adult Literature Credits: (5)

Prerequisite: admission to Teacher Education Program and 15 credits of professional sequence.

- ENG 430 - Teaching Writing in the Secondary School Credits: (5)
Prerequisite: EDCS 311 and 28 credits in English.
- ENG 488 - Teaching Portfolio Credits: (2) Requires concurrent enrollment in ENG 430 and ENG 492.
- ENG 492 - Practicum Credits: (3)

Requires concurrent enrollment in ENG 430 and ENG 488.

Select one literary forms course - Credits: 5

- ENG 380 - Studies in Drama Credits: (5)
- ENG 453 - Studies in Fiction Credits: (5)
- ENG 454 - Studies in Nonfiction Credits: (5)
- ENG 455 - Studies in Poetry (Put on Reserve 9/16/16.) Credits: (5)

Select two literature and history courses - Credits: 10

- ENG 371 - Literature and History I Credits: (5)
- ENG 372 - Literature and History II Credits: (5)
- ENG 373 - Literature and History III Credits: (5)
- ENG 374 - Literature and History IV Credits: (5)

Select one writing course - Credits: 5

- ENG 263 - Introduction to Creative Writing Credits: (5)
- ENG 364 - Fiction Writing Credits: (5)
- ENG 365 - Poetry Writing Credits: (5)
- ENG 366 - Creative Nonfiction Writing Credits: (5)

Select one critical studies course Credits: 5

- ENG 415 - Critical Studies in American Literature Credits: (5)
- ENG 417 - Critical Studies in World Literature Credits: (5)
- ENG 419 - Critical Studies in British Literature Credits: (5)

Total Credits: 70

Professional Education Program Credits: 50

## English Professional and Creative Writing, BA

#### Abstract

The major combines a liberal arts background in literature with specialized writing courses in creative writing (fiction, poetry, creative nonfiction, screenwriting), business writing, professional writing, scientific and technical writing, editing, and publishing.

Required Courses

- ENG 263 - Introduction to Creative Writing Credits: (5)
- OR ENG 264 - Introduction to Creative Writing and the Environment Credits: (5)
- OR ENG 265 - Introduction to Creative Writing as "Mindfulness, Health and Well-Being" Credits: (5)
- ENG 301 - Rhetoric for Professional Writers Credits: (5)
- ENG 302 - Poetry and Poetics Credits: (5)
- ENG 303 - Principles of English Studies Credits: (5)
- ENG 320 - English Grammar Credits: (5)
- ENG 323 - Writing and Editing for Publication Credits: (5)
- ENG 489 - Senior Colloquium Credits: (2)

Total Required Courses Credits: 32

Approved Writing Electives
Select 27 credits from a combination of creative writing, professional writing and editing, and practicum courses. At least 2 credits must be practicum credits and at least one 400 -level creative writing or professional writing and editing elective class is required.

Creative Writing Courses:

- ASP 435 - Accessible Information Design Credits: (5)
- COM 409 - Magazine Freelancing Credits: (4)
- FILM 267 - Screenwriting Fundamentals Credits: (4)
- OR ENG 267 - Screenwriting Fundamentals Credits: (4)
- FILM 357 - Writing for Serial Media Credits: (4)
- OR ENG 357 - Writing for Serial Media Credits: (4)
- FILM 457 - Narrative Screenwriting II Credits: (5)
- ENG 311 - Business Writing Credits: (3)
- ENG 364 - Fiction Writing Credits: (5)
- ENG 365 - Poetry Writing Credits: (5)
- ENG 366 - Creative Nonfiction Writing Credits: (5)
- ENG 368 - Multi-Genre Writing Workshop Credits: (5)
- ENG 369 - Variable Topics Writing Workshop Credits: (5)
- ENG 464 - Advanced Fiction Writing Credits: (5)
- ENG 465 - Advanced Poetry Writing Credits: (5)
- ENG 466 - Advanced Creative Nonfiction Writing Credits: (5)
- ENG 468 - Contemporary Writers Colloquium Credits: (5)
- ENG 473 - Grant Writing: Theory and Practice Credits: (5)
- TH 330 - Introduction to Playwriting Credits: (4)

Practicum Courses:

- COM 446 - Pulse Credits: (2)
- COM 468 - Observer Credits: (1-3)
- ENG 484 - Manastash: Literary Editing Credits: (3)
- ENG 485 - Manastash: Literary Design and Production Credits: (2)
- ENG 490 - Cooperative Education Credits: (1-12)
- ENG 493 - Online Practicum Credits: (3-5)

Professional Writing and Editing Courses:

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- COM 208 - Introduction to Public Relations Writing Credits: (4)
- COM 347 - Copy Editing Credits: (4)
- COM 348 - Publication Design Credits: (4)
- ENG 310 - Technical Writing Credits: (4)
- ENG 311 - Business Writing Credits: (3)
- ENG 404 - Advanced Technical Writing Credits: (5)
- ENG 472 - Research Methods for Workplace Writers Credits: (5)
- IT 248 - Web Fundamentals Credits: (4)
- IT 288 - Business Presentation Applications Credits: (2)
- LAJ 410 - Legal Writing Credits: (4)

Total Approved Writing Electives Credits: 27

Literature Course Credits: 5
Select one course from the following:

- ENG 330 - African American Literature Credits: (5)
- ENG 331 - Latina/o Literature Credits: (5)
- ENG 332 - American Indian Literature Credits: (5)
- ENG 333 - Asian American Literature Credits: (5)
- ENG 334 - American Indian Oral and Nonfiction Literature Credits: (5)
- ENG 335 - Women's Literature Credits: (5)
- ENG 363 - Shakespeare Credits: (5)
- ENG 371 - Literature and History I Credits: (5)
- ENG 372 - Literature and History II Credits: (5)
- ENG 373 - Literature and History III Credits: (5)
- ENG 374 - Literature and History IV Credits: (5)
- ENG 380 - Studies in Drama Credits: (5)
- ENG 453 - Studies in Fiction Credits: (5)
- ENG 454 - Studies in Nonfiction Credits: (5)

Literature, Linguistics, and Film Electives Credits: 10

Select 10 additional credits of literature, linguistics, and film studies courses at or above the 300 -level. No more than 5 credits of film may be counted as elective credits in the professional and creative writing major.

Total Credits: 74

College and Department Information

College of Arts and Humanities

## Creative Writing Minor

This minor allows students to develop their craft in poetry, fiction, creative nonfiction and other genres through workshops led by faculty who are practicing writers.

## Required Courses

- ENG 302 - Poetry and Poetics Credits: (5)

Select 20 credits of creative writing courses:

- ENG 263 - Introduction to Creative Writing Credits: (5)
- OR ENG 264 - Introduction to Creative Writing and the Environment Credits: (5)
- OR ENG 265 - Introduction to Creative Writing as "Mindfulness, Health and Well-Being" Credits: (5)
- ENG 267 - Screenwriting Fundamentals Credits: (4)
- OR FILM 267 - Screenwriting Fundamentals Credits: (4)
- ENG 357 - Writing for Serial Media Credits: (4)
- OR FILM 357 - Writing for Serial Media Credits: (4)
- ENG 364 - Fiction Writing Credits: (5)
- ENG 365 - Poetry Writing Credits: (5)
- ENG 366 - Creative Nonfiction Writing Credits: (5)
- ENG 368 - Multi-Genre Writing Workshop Credits: (5)
- ENG 369 - Variable Topics Writing Workshop Credits: (5)
- ENG 464 - Advanced Fiction Writing Credits: (5)
- ENG 465 - Advanced Poetry Writing Credits: (5)
- ENG 466 - Advanced Creative Nonfiction Writing Credits: (5)
- ENG 468 - Contemporary Writers Colloquium Credits: (5)
- TH 313 - Writing for Theatre for Young Audiences Credits: (3)
- TH 330 - Introduction to Playwriting Credits: (4)

Select one literature course at the 300-level or above - Credits: 5

Total Credits: 30

College of Arts and Humanities

## English Language and Literature Minor

As with the English major, the English minor trains students in reflective reading, theoretically based inquiry, critical analysis, and effective verbal and written expression. The skills developed in the English minor readily complement a wide variety of majors across the university.

## Required Courses

- ENG 302 - Poetry and Poetics Credits: (5)
- ENG 303 - Principles of English Studies Credits: (5)

Department-approved electives - Credits: 20

Select 20 credits of literature or language courses at the 300level or above.

Total Credits: 30

College and Department Information

English Department
College of Arts and Humanities

## Linguistics Minor

The linguistics minor allows students to gain a broader understanding of language and language acquisition. It draws on multiple disciplines and complements a wide range of majors.

Required Courses Credits: 15

- ENG 304 - English Linguistics Credits: (5)
- ENG 320 - English Grammar Credits: (5) and one from the following:
- ENG 432 - Phonetics and Phonology Credits: (5)
- ENG 437 - Pedagogical Grammar and Discourse Credits: (5)

Select 10 credits approved electives from the following or other courses by advisement Credits: 10

- ANTH 180 - Language and Culture Credits: (5)
- ANTH 381 - Language in Culture Credits: (4)
- ANTH 382 - Descriptive Linguistics Credits: (4)
- ANTH 384 - Language and Gender Credits: (4)
- COM 302 - Intercultural Communication Credits: (4)
- EDBL 433 - Educational Linguistics Credits: (3)
- EDBL 438 - Teaching English as a Second Language Credits: (3)
- EDBL 440 - Development of Literacy with Linguistically Diverse Students Credits: (3)
- ENG 423 - History of the English Language Credits: (5)
- ENG 435 - Linguistics, Literature, and TESOL Credits: (5)
- ENG 496 - Individual Study Credits: (1-6)
- WL 481 - Methods and Materials for Language Teaching Credits: (4)
- WL 482 - Second- and Foreign-language Acquisition (On reserve as of 9/16/15) Credits: (4)
- WL 483 - Sociolinguistics Credits: (4)

Total Credits: 25

## Technical Writing Minor

The interdisciplinary minor in technical writing provides students a focused understanding of technical writing, editing, and design skills for the workplace. It can be completed entirely online to serve professionals already working in careers as well as students planning to begin professional or technical careers. The minor provides practical, hands-on skills as well as opportunities for service learning with real-world clients. Note: Students in the Professional and Creative Writing major may not enroll in the Technical Writing Minor.

## Admission Requirements

Admission to the program requires an application approved by the English Department.

## Graduation Requirements

Successful completion of required and elective courses with a minimum of C in all courses.

Required Courses Credits: 9

- ENG 310 - Technical Writing Credits: (4)
- ENG 404 - Advanced Technical Writing Credits: (5)

Information Design Credits: 5

Choose one from the following:

- ASP 435 - Accessible Information Design Credits: (5)
- ENG 315 - Visual Rhetoric and Document Design Credits: (5)

Department-Approved Electives Credits: 11-15

Choose three of the following writing courses:

- ASP 305 - Accessibility and User Experience Credits: (3)
- ASP 325 - Universal Design Credits: (4)
- ASP 435 - Accessible Information Design Credits: (5)
- ENG 301 - Rhetoric for Professional Writers Credits: (5)
- ENG 315 - Visual Rhetoric and Document Design Credits: (5)
- ENG 456 - Studies in Rhetoric Credits: (5) (No more than 5 credits of ENG 456 may be applied to the minor)
- ENG 472 - Research Methods for Workplace Writers Credits: (5)
- ENG 473 - Grant Writing: Theory and Practice Credits: (5)
- IT 248 - Web Fundamentals Credits: (4)

Total Credits: 25-29

## Professional Writing Certificate (ENG)

Professional Writing Certificate

The professional writing certificate allows students to develop their writing skills for professional and business environments. It is delivered entirely online to serve professionals already working in careers as well as students planning to begin professional or business careers. Students will learn the rhetorical requirements for specific forms of written communication, including letters, memos, reports, proposals, promotional materials, and press releases. They will also learn to edit their own writing for clarity, correctness, and style.

Required Courses

- ENG 301-Rhetoric for Professional Writers Credits: (5)
- ENG 310 - Technical Writing Credits: (4)
- COM 347 - Copy Editing Credits: (4)
- COM 370 - Advanced Public Relations Writing Credits: (4)

## Director

Pamela McMullin-Messier, PhD

## Program Information

The Environmental Studies Program at CWU was established in the 1970s to provide an interdisciplinary approach to the study of environmental issues. The program is administered through the College of the Sciences and has options for both a major (BS) in five areas of specialization and a minor. The program core features team-taught courses including General Education courses that are taught by faculty from multiple disciplines.

## Bachelor of Science

## Environmental Sciences Major

The major in environmental sciences provides students with an interdisciplinary understanding of the natural science of environmental issues as well as the social science context of the intersection of social, cultural, political, and economic factors that contribute to policy and planning decisions. Through this major, students will gain the necessary professional and technical skills for entry into successful environmental careers or for graduate studies in environmental fields. The major offers five specialization options in environmental biology, environmental chemistry, environmental geology, environmental geography, and environmental policy.

## Requirements for Major (BS) in Environmental Sciences

The requirements for the major in environment sciences have three parts:

- Foundational courses in supporting disciplines. Some of these courses also serve as prerequisites for courses within the specializations. These foundational courses must be completed before students enroll in ENST 304.
- A core requirement consisting of seven interdisciplinary ENST courses, two upper-level electives, and a culminating experience outside of the classroom (research, internship, service learning, or study abroad).
- A specialization consisting of 6-8 courses that focus on a specific area of study.
- A minimum 2.0 GPA for program credits, earning at least a C- in all ENST core courses.

## Requirements for a double major with BS in environmental sciences

The following double major combinations will have the environmental sciences specialization course requirements waived for the BS degree in environmental sciences; all environmental sciences foundation and core course requirements must be completed. Required courses for the first degree major may not be used to fulfill upper-division environmental sciences elective requirements (7-10 credits).

Bachelor Degree (Disciplinary)
Bachelor Degree (Environmental Sciences)
BS Biology
BS Environmental Sciences: Environmental Biology
Specialization
BS Chemistry
BS Environmental Sciences: Environmental Chemistry Specialization

BS Environmental Geological Sciences
BS Environmental Sciences: Environmental Geology Specialization

BA Geography
BS Environmental Sciences: Environmental Geography Specialization

BS Public Policy
BS Environmental Sciences: Environmental Policy Specialization

The interdisciplinary major in public policy (BS) may be combined with the environmental sciences specialization in environmental policy by completing the specific course requirements for both majors. Students who combine majors in public policy and environmental sciences with a specialization in environmental policy will earn a BS degree in public policy and a BS degree in environmental sciences. As some public policy requirements and electives count toward both degrees or majors, the additional coursework needed to fulfill the requirements of the second degree or major may be as low as 19 credits.

Students may complete more than one specialization within the environmental sciences major. To be eligible for a second specialization, a minimum of 20 unique credits must be completed; unique means credits that have not already been used towards another environmental sciences specialization.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/environmental or by contacting the department directly.

BS Public Policy

BS Environmental Sciences: Environmental Policy Specialization

The interdisciplinary major in public policy (BS) may be combined with the environmental sciences specialization in environmental policy by completing the specific course requirements for both majors. Students who combine majors in public policy and environmental sciences with a specialization in environmental policy will earn a BS degree in public policy and a BS degree in environmental sciences. As some public policy requirements and electives count toward both degrees or majors, the additional coursework needed to fulfill the requirements of the second degree or major may be as low as 19 credits.

Students may complete more than one specialization within the environmental sciences major. To be eligible for a second specialization, a minimum of 20 unique credits must be completed; unique means credits that have not already been used towards another environmental sciences specialization.

## Foundational Courses Credits: 25

Please refer to general and major advisors and ENST advising worksheet(s) to select required and/or requisite courses for the specialization(s).

Biology Credits: (5)

Select one from the following:

- BIOL 101 - Fundamentals of Biology Credits: (5)
- BIOL 181 - General Biology I Credits: (5)
- BIOL 200 - Plants in the Modern World Credits: (5)

Chemistry Credits: (5)

Select one from the following:

- CHEM 101 - Chemistry and Planet Earth Credits: (5)
- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)

Economics Credits: (5)
Select one from the following:

- ECON 101 - Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)

Geoscience Credits: (5)
Select one from the following:

- GEOL 101 - Introduction to Geology Credits: (4)
- OR GEOL 103-Geology of Washington Credits: (4)
- OR GEOL 108 - Earth and Energy Resources Credits: (4)
- AND GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOG 107 - Our Dynamic Earth Credits: (5)

Social Science Credits: (5)
Select one from the following:

- ANTH 130 - Cultural Worlds Credits: (5)
- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 208 - Our Human World Credits: (5)
- SOC 107 - Principles of Sociology Credits: (5)

Core Courses Credits: 33-35

- ENST 201 - Earth as an Ecosystem Credits: (5)
- OR ENST 202 - Environment and Society Credits: (5)
- ENST 300-Applied Environmental Sciences Credits: (5)
- ENST 303 - Environmental Management Credits: (5)
- ENST 304 - Environmental Methods and Analysis Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- OR ENST 360 - Environmental Justice Credits: (5)
- ENST 444 - Environmental Policy Formulation Credits: (4)
- ENST 487 - End-of-Major Capstone Credits: (1)

Culminating Experience Credits: (3-5)
Select one or a combination of the following (internship, research, service-learning, or study abroad experience):

- ENST 490 - Cooperative Education Credits: (1-12)
- ENST 495 - Senior Research Credits: (3-5) OR (other 495 Senior Research)
- UNIV 304 - International Sustainable Development Credits: (5)
- UNIV 309 - Civic Engagement Credits: (2)

Department-Approved Upper-Level Electives: Credits: 8-10
Select two of the following courses. Note: these courses cannot be used to fulfill specialization requirements.

- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- ANTH 440 - Ecology and Culture Credits: (4)
- OR GEOG 440 - Ecology and Culture Credits: (4)
- BIOL 302 - Sustainability and Environmental Change Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)
- AND BIOL 377LAB - Regional Natural History Credits: (3)
- OR GEOL 377 - Regional Natural History Credits: (2)
- AND GEOL 377LAB - Regional Natural History Credits: (3)
- BUS 389 - Sustainable Business Credits: (5)
- CMGT 452 - LEED in Sustainable Construction Credits: (4)
- ECON 462 - Environmental and Resource Economics Credits: (5)
- ECON 463 - Energy Economics Credits: (5)
- ENST 310 - Energy and Society Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- ENST 360 - Environmental Justice Credits: (5)
- ENST 455 - Environmental Literature Credits: (3)
- ENST 460 - Environmental Law Credits: (5)
- OR GEOG 445 - Environmental Law Credits: (5)
- GEOG 373 - Water Resources Credits: (4)
- GEOG 388 - Weather and Climate Credits: (5)
- GEOG 441 - Climate Change: Human and Biophysical Dimensions Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOG 456 - Recreation Geography Credits: (5)
- GEOL 302 - Oceans and Atmosphere Credits: (4)
- GEOL 380 - Natural Hazards Credits: (5)
- GEOL 441 - Climate Variability and Climate Change Credits: (5)
- HIST 454 - American Environmental History Credits: (5)
- IEM 301 - Energy Management Credits: (5)
- IEM 330-Geopolitics of Fossil Fuels Credits: (5)
- IEM 302 - Energy, Environment, and Climate Change Credits: (4)
- PHIL 306 - Environmental Ethics Credits: (5)
- PHIL 314 - American Wilderness Philosophy Credits: (5)
- POSC 344 - Environmental Politics Credits: (5)
- PSY 413 - Conservation Psychology Credits: (4)
- PUBH 320 - Environmental Health Credits: (4)
- RTE 330 - Sustainable Resources for Recreation and Tourism Credits: (3)
- SOC 380 - Social Ecology Credits: (5)

Total Environmental Sciences Core Credits: 66-70

Environmental Biology Specialization
Note: BIOL 181 and CHEM 181/181LAB are required as foundational courses for this specialization.

- BIOL 182 - General Biology II Credits: (5)
- BIOL 183-General Biology III Credits: (5)
- BIOL 213 - Introductory Biostatistics Credits: (4)
- BIOL 360 - General Ecology Credits: (5)
- CHEM 182 - General Chemistry II Credits: (4)
- AND CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- AND CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Choose one field course from the following: Credits: 4-5

- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)
- AND BIOL 377LAB - Regional Natural History Credits: (3)
- BIOL 461 - Community Ecology Credits: (3)
- AND BIOL 461LAB - Community Ecology Laboratory Credits: (2)
- BIOL 462 - Wildlife and Fisheries Ecology Credits: (5)
- BIOL 463 - Limnology Credits: (5)
- BIOL 464 - Terrestrial Plant Ecology Credits: (5)
- BIOL 466 - Conservation Biology Credits: (5)
- BIOL 467 - Biological Field Techniques Credits: (5)

Specialization Subtotal Credits: 33-34
Total Credits: 99-104

# Environmental Sciences BS, Environmental Geography Specialization 

## Environmental Sciences Core and Requirements

#### Abstract

The major in environmental sciences provides students with an interdisciplinary understanding of the natural science of environmental issues as well as the social science context of the intersection of social, cultural, political, and economic factors that contribute to policy and planning decisions. Through this major, students will gain the necessary professional and technical skills for entry into successful environmental careers or for graduate studies in environmental fields. The major offers five specialization options in environmental biology, environmental chemistry, environmental geology, environmental geography, and environmental policy.

## Requirements for Major (BS) in Environmental Sciences

The requirements for the major in environment sciences have three parts:

- Foundational courses in supporting disciplines. Some of these courses also serve as prerequisites for courses within the specializations. These foundational courses must be completed before students enroll in ENST 304.
- A core requirement consisting of seven interdisciplinary ENST courses, two upper-level electives, and a culminating experience outside of the classroom (research, internship, service learning, or study abroad).
- A specialization consisting of 6-8 courses that focus on a specific area of study.
- A minimum 2.0 GPA for program credits, earning at least a C- in all ENST core courses.

## Requirements for a double major with BS in environmental sciences

The following double major combinations will have the environmental sciences specialization course requirements waived for the BS degree in environmental sciences; all environmental sciences foundation and core course requirements must be completed. Required courses for the first degree major may not be used to fulfill upper-division environmental sciences elective requirements (7-10 credits).

Bachelor Degree (Disciplinary)
Bachelor Degree (Environmental Sciences)
BS Biology
BS Environmental Sciences: Environmental Biology Specialization

## BS Chemistry

BS Environmental Sciences: Environmental Chemistry Specialization

BS Environmental Geological Sciences
BS Environmental Sciences: Environmental Geology
Specialization
BA Geography
BS Environmental Sciences: Environmental Geography Specialization

## BS Public Policy <br> BS Environmental Sciences: Environmental Policy Specialization

The interdisciplinary major in public policy (BS) may be combined with the environmental sciences specialization in environmental policy by completing the specific course requirements for both majors. Students who combine majors in public policy and environmental sciences with a specialization in environmental policy will earn a BS degree in public policy and a BS degree in environmental sciences. As some public policy requirements and electives count toward both degrees or majors, the additional coursework needed to fulfill the requirements of the second degree or major may be as low as 19 credits.

Students may complete more than one specialization within the environmental sciences major. To be eligible for a second specialization, a minimum of 20 unique credits must be completed; unique means credits that have not already been used towards another environmental sciences specialization.

## Foundational Courses Credits: 25

Please refer to general and major advisors and ENST advising worksheet(s) to select required and/or requisite courses for the specialization(s).

Biology Credits: (5)

Select one from the following:

- BIOL 101 - Fundamentals of Biology Credits: (5)
- BIOL 181 - General Biology I Credits: (5)
- BIOL 200 - Plants in the Modern World Credits: (5)

Chemistry Credits: (5)
Select one from the following:

- CHEM 101 - Chemistry and Planet Earth Credits: (5)
- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)

Economics Credits: (5)
Select one from the following:

- ECON 101 - Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)

Geoscience Credits: (5)

Select one from the following:

- GEOL 101 - Introduction to Geology Credits: (4)
- OR GEOL 103 - Geology of Washington Credits: (4)
- OR GEOL 108 - Earth and Energy Resources Credits: (4)
- AND GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOG 107 - Our Dynamic Earth Credits: (5)

Social Science Credits: (5)
Select one from the following:

- ANTH 130 - Cultural Worlds Credits: (5)
- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 208 - Our Human World Credits: (5)
- SOC 107 - Principles of Sociology Credits: (5)

Core Courses Credits: 33-35

- ENST 201 - Earth as an Ecosystem Credits: (5)
- OR ENST 202 - Environment and Society Credits: (5)
- ENST 300-Applied Environmental Sciences Credits: (5)
- ENST 303 - Environmental Management Credits: (5)
- ENST 304 - Environmental Methods and Analysis Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- OR ENST 360 - Environmental Justice Credits: (5)
- ENST 444 - Environmental Policy Formulation Credits: (4)
- ENST 487 - End-of-Major Capstone Credits: (1)

Culminating Experience Credits: (3-5)
Select one or a combination of the following (internship, research, service-learning, or study abroad experience):

- ENST 490-Cooperative Education Credits: (1-12)
- ENST 495 - Senior Research Credits: (3-5) OR (other 495 Senior Research)
- UNIV 304 - International Sustainable Development Credits: (5)
- UNIV 309 - Civic Engagement Credits: (2)

Department-Approved Upper-Level Electives: Credits: 8-10
Select two of the following courses. Note: these courses cannot be used to fulfill specialization requirements.

- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- ANTH 440 - Ecology and Culture Credits: (4)
- OR GEOG 440 - Ecology and Culture Credits: (4)
- BIOL 302 - Sustainability and Environmental Change Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BIOL 377 - Regional Natural History Credits: (2)
- AND BIOL 377LAB - Regional Natural History Credits: (3)
- OR GEOL 377 - Regional Natural History Credits: (2)
- AND GEOL 377LAB - Regional Natural History Credits: (3)
- BUS 389 - Sustainable Business Credits: (5)
- CMGT 452 - LEED in Sustainable Construction Credits: (4)
- ECON 462 - Environmental and Resource Economics Credits: (5)
- ECON 463 - Energy Economics Credits: (5)
- ENST 310 - Energy and Society Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- ENST 360 - Environmental Justice Credits: (5)
- ENST 455 - Environmental Literature Credits: (3)
- ENST 460 - Environmental Law Credits: (5)
- OR GEOG 445 - Environmental Law Credits: (5)
- GEOG 373 - Water Resources Credits: (4)
- GEOG 388 - Weather and Climate Credits: (5)
- GEOG 441 - Climate Change: Human and Biophysical Dimensions Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOG 456 - Recreation Geography Credits: (5)
- GEOL 302 - Oceans and Atmosphere Credits: (4)
- GEOL 380 - Natural Hazards Credits: (5)
- GEOL 441 - Climate Variability and Climate Change Credits: (5)
- HIST 454 - American Environmental History Credits: (5)
- IEM 301 - Energy Management Credits: (5)
- IEM 330 - Geopolitics of Fossil Fuels Credits: (5)
- IEM 302 - Energy, Environment, and Climate Change Credits: (4)
- PHIL 306 - Environmental Ethics Credits: (5)
- PHIL 314 - American Wilderness Philosophy Credits: (5)
- POSC 344 - Environmental Politics Credits: (5)
- PSY 413 - Conservation Psychology Credits: (4)
- PUBH 320 - Environmental Health Credits: (4)
- RTE 330 - Sustainable Resources for Recreation and Tourism Credits: (3)
- SOC 380 - Social Ecology Credits: (5)

Total Environmental Sciences Core Credits: 66-70
Environmental Geography Specialization
Note: GEOG 107 AND GEOG 208 are required as foundational courses for this specialization. GEOG 107 is a prerequisite to most courses listed below. Additional prerequisites are noted with asterisks.

Physical Geography Courses Credits: 10
Choose two of the following:

- GEOG 361 - Soils Credits: (5)
- GEOG 382 - Hydrology Credits: (5)
- GEOG 386-Geomorphology Credits: (5)
- GEOG 387 - Biogeography Credits: (5)
- GEOG 388 - Weather and Climate Credits: (5)
- GEOG 453 - Riparian and Wetlands Analysis Credits: (5)
- GEOG 483 - Snow Credits: (5)

Techniques Courses Credits: 10

Choose two of the following:

- GEOG 303 - GIS and Data Management Credits: (5) *
- GEOG 325 - Field Methods in Geography Credits: (5)
- GEOG 330 - Airphoto Interpretation Credits: (5) *
- GEOG 404 - GIS Analysis Credits: (5) ***
- GEOG 409 - Quantitative Methods in Geography Credits: (5)
- GEOG 430 - Remote Sensing Credits: (5) **
* requires prerequisite of GEOG 301.
** requires corequisite or prerequisite of GEOG 330
or GEOL 210 or consent of instructor.
*** requires prerequisite of GEOG 303.
Resource Courses Credits: 8-10

Choose two of the following:

- GEOG 373 - Water Resources Credits: (4)
- GEOG 441 - Climate Change: Human and Biophysical Dimensions Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOG 449 - Environmental Hazard Analysis and Management Credits: (5)
- GEOG 455 - Pyrogeography Credits: (4)
- GEOG 456 - Recreation Geography Credits: (5)
- GEOG 458 - People, Parks, and Protected Areas Credits: (4)

Geography Electives Credits: 5

Choose one from the following:

- GEOG 450 - Arid Environments Credits: (5)
- GEOG 451 - Mountain Environments Credits: (5)
- GEOG 452 - Coastal Environments Credits: (5)
- GEOG 454 - Forest Environments Credits: (5)
- GEOG 479 - Geography of the West Credits: (1-12)

Specialization Subtotal Credits: 33-35

Total Credits: 99-105

## Total Environmental Sciences Core Credits: 66-70

Environmental Policy Specialization

Note: ECON 201 is required as a foundation course.

Core Policy - Credits: 18
The following courses are required for the specialization:

- ECON 462 - Environmental and Resource Economics Credits: (5)
- ENST 460 - Environmental Law Credits: (5)
- POSC 320 - Public Administration Credits: (5)
- POSC 325 - Introduction to Public Policy Credits: (3)

Research Tools - Credits: 5

Select one of the following courses:

- BUS 221 - Introductory Business Statistics Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)
- SOC 364 - Data Analysis in Sociology Credits: (5)

Department-Approved Electives - Credits: 7-10

Select two of the following courses:

- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- BUS 389 - Sustainable Business Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- ENST 360 - Environmental Justice Credits: (5)
- GEOG 303 - GIS and Data Management Credits: (5)
- GEOG 305 - Introduction to Land Use Planning Credits: (5)
- GEOG 346 - Political Geography Credits: (4)
- GEOG 373 - Water Resources Credits: (4)
- GEOG 381 - Urban Geography Credits: (4)
- GEOG 440 - Ecology and Culture Credits: (4)
- OR ANTH 440 - Ecology and Culture Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOG 443 - Energy Policy Credits: (5)
- GEOG 456 - Recreation Geography Credits: (5)
- GEOL 380 - Natural Hazards Credits: (5)
- HIST 454 - American Environmental History Credits: (5)
- IEM 330 - Geopolitics of Fossil Fuels Credits: (5)
- PHIL 306 - Environmental Ethics Credits: (5)
- POSC 318 - Political Parties and Interest Groups Credits: (5)
- POSC 344 - Environmental Politics Credits: (5)
- POSC 429 - Research Seminar in Public Policy Credits: (3-5)
- PSY 413 - Conservation Psychology Credits: (4)

Specialization Subtotal Credits: 30-33

Total Credits: 96-103

College and Department Information

Environmental Studies Program
College of the Sciences

## Environmental Studies Minor

The environmental studies minor is designed to serve undergraduate education and environmental literacy, with an emphasis on research and community service. The Environmental Studies program's priority is primarily geared towards providing a large number of students with the opportunity to assess the nature, scope, and complexities of present and impending environmental problems. Other objectives include the provision of public education programs on environmental issues and the stimulation of interdisciplinary research on environmental problems. The development of expertise as an environmental specialist requires specialized work and can be pursued through exploring the environmental sciences major.

## Program Requirements

The minor requires that students finish with a minimum 2.0 GPA for the 25-30 program credits; students must also earn at least a C-in ENST courses.

Required Courses Credits: 15

- ENST 201 - Earth as an Ecosystem Credits: (5)
- OR ENST 202 - Environment and Society Credits: (5)
- ENST 300-Applied Environmental Sciences Credits: (5)
- ENST 303 - Environmental Management Credits: (5)

Upper-Level ENST Electives Credits 7-10

Select two from the following courses:

- ENST 304 - Environmental Methods and Analysis Credits: (5)
- ENST 310 - Energy and Society Credits: (5)
- ENST 330 - Environmental Leadership and Advocacy Credits: (5)
- ENST 360 - Environmental Justice Credits: (5)
- ENST 444 - Environmental Policy Formulation Credits: (4)
- ENST 455 - Environmental Literature Credits: (3)

Department-Approved Elective Credits: 3-5

Students participating in the ENST minor are welcome to propose an environment-related upper-division elective course in consultation with the ENST Director. This elective course must be taken in a department outside of the student's major.

Students are encouraged to explore upper-level electives from the ENST specializations and can choose one of the following courses:

- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- ANTH 440 - Ecology and Culture Credits: (4)
- BIOL 302 - Sustainability and Environmental Change Credits: (5)
- BIOL 362 - Biomes of the Pacific Northwest Credits: (4)
- BUS 389 - Sustainable Business Credits: (5)
- ECON 462 - Environmental and Resource Economics Credits: (5)
- ECON 463 - Energy Economics Credits: (5)
- GEOG 373 - Water Resources Credits: (4)
- GEOG 388 - Weather and Climate Credits: (5)
- GEOG 441 - Climate Change: Human and Biophysical Dimensions Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOL 302 - Oceans and Atmosphere Credits: (4)
- GEOL 380 - Natural Hazards Credits: (5)
- HIST 454 - American Environmental History Credits: (5)
- IEM 301 - Energy Management Credits: (5)
- IEM 302 - Energy, Environment, and Climate Change Credits: (4)
- IEM 330 - Geopolitics of Fossil Fuels Credits: (5)
- PHIL 306 - Environmental Ethics Credits: (5)
- PHIL 314 - American Wilderness Philosophy Credits: (5)
- POSC 344 - Environmental Politics Credits: (5)
- PSY 413 - Conservation Psychology Credits: (4)
- PUBH 320 - Environmental Health Credits: (4)
- RTE 330 - Sustainable Resources for Recreation and Tourism Credits: (3)
- SOC 380 - Social Ecology Credits: (5)

Total Credits: 25-30

Robert Perkins, EdD, recreation, tourism and events

## Department Information

The Department of Family and Consumer Sciences' programs lead to baccalaureate degrees in apparel, textiles and
merchandising, family and consumer sciences, career and technical education teaching, family studies, global wine studies, and recreation tourism, and events.

Students may complete a minor in any of the following areas: apparel textiles and merchandising as well as apparel design, family and consumer sciences, family and consumer sciences education, family studies, program development, recreation management, tourism management, wine trade and tourism, sustainable tourism, and event planning.

## Admission Policy for Family and Consumer Sciences

- A completed Family and Consumer Sciences (FCS) major application form must be signed by a program advisor after an initial advising meeting. The advisor will submit it to the FCS chair for approval.
- Freshmen are encouraged to apply.
- Students seeking a major or minor should see specific requirements in the appropriate program section of this catalog.
- For information on teacher certification for marketing education or business education, contact Professor Kim Bartel or Professor Rob Perkins.

## Global Wine Studies

This Interdisciplinary Program provides students with a broad understanding of the global wine industry. The program prepares graduates for careers in winery and vineyard management, wine merchandising, wholesale, retail, ecommerce, distribution, marketing, import/export, hospitality, entrepreneurship, consulting, and more.

In the major, students complete 50 major core credits to acquire a broad base of knowledge and skills related to wine, wine business issues, and the global wine industry. Students also complete a minor, 25 to 36 credits, in one of several complementary academic areas. Students will also gain valuable experience by participating in a required international field experience and an internship with a wine-related business, either in the U.S. or abroad.

## Admission Requirements

Students must complete the pre-admission requirements prior to admission into the degree program. An overall minimum 2.5 GPA will be required for admission. Students must fill out an application that includes an essay of motivation and goals. Upon approval of the application, an in-person or telephone interview will be conducted between the advisor for the global wine studies major and the prospective student. Permission of the major advisor is required. Upon admittance to the program students must agree to sign a written statement regarding professional conduct and responsibility.

Student must be at least 21 years old before enrolling in courses that involve tasting wine (GWS 302 - Fundamentals of Viticulture and Enology, GWS 304 - Wine Marketing and Branding, GWS 406 - Professional Wine Analysis, GWS 408 Advanced Sensory Analysis and GWS 410 - Wine Faults.)

## Special Requirements

Students will be expected to spend significant amounts of time outside the classroom on projects, field trips, and assignments. Students must earn a cumulative GPA of 2.7 in the global wine studies core courses.

## Financial Obligations

Because this is a self-supported program: no tuition waiver programs apply. Additional course fees and continuing education tuition apply. Tuition for GWS classes may be higher than regular CWU tuition.

## Recreation and Tourism

The Recreation and Tourism Program (RT) prepares students for positions in one of the top three industries in Washington State and the world's number-one industry. Professional positions are numerous. The following list is a sampling of the types of professional positions currently held by RT graduates: city parks and recreation director, recreation manager, front office and training manager, director of youth programs, guest services manager, and winery marketing manager, among others.

To be admitted to a major or minor in the RT program, students must meet the admission and exit requirements for majors and minors in the Department of Family and Consumer Sciences. To graduate, majors and minors must meet the department graduation requirements.

## Special Requirements

- The elective area will include 14 credits of RT prefix courses. Elective courses must be pre-approved by an advisor prior to registration for course(s).
- Students are required to complete 6 credits of RT 292 Practicum and 12 credits RT 490 Cooperative Education/ Internship. An additional 4 credits of RT 292 or 8 credits of RT 490 may be applied to the elective area with prior advisor approval.
- Students should plan to complete RT 490 Cooperative Education during the summer term.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/family-consumer or by contacting the department directly.

## Family and Consumer Sciences Major, BA

The BA in family and consumer sciences comprises a general introduction to the broad areas of family and consumer sciences and, with an appropriate minor, can provide students with a well-rounded preparation for life or for further advanced study. This major requires a minor or double major. Students must have a cumulative GPA of at least 2.3 for full admission to this major and a 2.5 GPA for graduation.

## Required Courses

- ATM 355 - Consumer Textiles Credits: (4)
- FCS 371 - Real World Finance Credits: (3)
- FCS 472 - Life Management Credits: (5)
- FCL 232 - Child Development Credits: (3)
- FCL 234 - Contemporary Families Credits: (4)
- FCL 336 - Parent Education and Guidance Credits: (4)
- FCL 337 - Human Sexuality Credits: (4)
- FCS 205 - FCS Entry Assessment Credits: (1)
- FCS 405 - FCS Exit Assessment Credits: (1)
- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- NUTR 240 - Introduction to Foods Credits: (2)
- FCS 367 - Family Housing Credits: (3)
- NUTR 240LAB - Introduction to Foods Laboratory Credits: (2)

Choose two of the following: Credits 6

- ATM 280 - Basic Sewing Techniques Credits: (3)
- FCL 235 - Relationships and Personal Development Credits: (3)
- FCS 166 - Applied Creativity Credits: (3)
- FCS 320 - Program Management and Planning Credits: (4)

Total Credits: 51

## Apparel, Textiles and Merchandising Major, BS

The Apparel, Textiles and Merchandising Program is designed to help you gain the knowledge you need to recognize industry trends, analyze market and consumer behavior, and evaluate retail needs in the diverse, fast-paced, and ever-changing fashion industry. Students will build a well-rounded base knowledge about textile and apparel products, merchandising strategies, product development, production processes, trends, consumers and sustainability. Field experiences allow students to network with industry professionals and study abroad opportunities are highly encouraged. Students gain additional hands-on professional experience during summer internships. Quarterly meetings with the faculty advisor assures the student is academically on track to achieve their professional goals.

## Admission Requirements

To be admitted to a major in the Apparel, Textiles and Merchandising Program, a student must have a cumulative GPA of 2.3 (or be a freshman or transfer).

## Graduation Requirements

A minimum grade of C- must be earned in each course counted toward fulfilling major requirements.

Required Courses Credits: 67

- ATM 251 - Style Principles: Body to Store Credits: (3)
- ATM 270 - Digital Presentation Techniques Credits: (4)
- ATM 280 - Basic Sewing Techniques Credits: (3)
- ATM 281 - Socio-cultural Aspects of Apparel Credits: (4)
- ATM 285 - Buying and Merchandising Math Credits: (4)
- ATM 289 - Northwest Field Experience in Apparel and Textiles Credits: (3)
- ATM 301 - Introduction to the Fashion Industry Credits: (4)
- ATM 353 - Apparel Manufacturing Credits: (5)
- ATM 355 - Consumer Textiles Credits: (4)
- ATM 379 - ATM Internship Planning Credits: (1)
- ATM 381 - Fashion Show Production Credits: (2)
- ATM 389 - Fashion Trend Analysis Credits: (3)
- ATM 452 - History of Fashion Credits: (4)
- ATM 487 - Fashion Merchandising Exit Assessment Credits: (1)
- ATM 489 - Merchandise Buying and Planning Credits: (4)
- ATM 492 - Apparel, Textiles and Merchandising Practicum Credits: (1-10) (Must be taken for 8 credits.)
- RTE 419-Applied Research and Evaluation Credits: (3)
- IT 258 - Spreadsheet Applications Credits: (3)
- RMT 330 - Principles of Retailing Credits: (4)

Department-Approved Electives - Credits 12
Total Credits: 79

## Business and Marketing Education Major, BS

This bachelor of sciences teaching major satisfies the endorsement for business and marketing education teaching for career and technical education. It is designed for students who are seeking teaching careers in business and marketing education at the secondary grade levels (7-12). The coursework provides experiences in the business and marketing education content areas and instructional pedagogy including field experiences that are designed to prepare teacher certification and content endorsement. Students in the business and marketing education major must be admitted to the Teacher Certification Program and complete the Professional Education Program sequence coursework as part of the Teacher Certification Program.

Program Requirements and Pre-admission Requirements
Students wishing to obtain a teaching certificate in business and marketing education will:

- Complete the business and marketing career and technical education teaching major
- Successfully complete CTE 310 before being fully admitted to the major
- Have a university-level cumulative GPA of at least 2.3 for full admission to this major and a 3.0 minimum cumulative GPA in the major to exit the program and to graduate from CWU with teacher certification
- Earn a minimum grade of C in each course counted toward fulfilling major requirements
- Apply, be accepted into, and complete the Teacher Certification Program
- Student teach in a CTE -approved program
- Hold a valid first aid card with CPR
- Complete 2,000 hours of paid work experience in the last six years
- Provide documentation of occupational safety

Required to take the Professional Education Program for 50 credits.

Required Courses

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- BME 346 - Basic Accounting for Business and Marketing Education Credits: (5)
- BME 450-Curriculum Development for Business and Marketing Education Credits: (4)
- BME 451 - Methods and Materials for Teaching Information Technology Credits: (3)
- BME 452 - Methods and Materials for Teaching Basic Business and Marketing Credits: (3)
- BUS 241 - Legal Environment of Business Credits: (5)
- CS 101 - Computer Basics Credits: (4)
- OR IT 101 - Computer Applications Credits: (3)
- CTE 310 - Introduction to Career and Technical Education Credits: (3)
- CTE 410 - Career and Technical Education School to Work Programs Credits: (4)
- CTE 460 - Business and Marketing Education Exit Assessment Credits: (4)
- ECON 101 - Economic Issues Credits: (5)
- FCS 220 - Leadership in Human Development Credits: (4)
- FCS 320 - Program Management and Planning Credits: (4)
- FCS 379 - Professional Development and Internship Planning Credits: (3)
- IT 260 - Integrated Information Technology Application Projects Credits: (5)
- RTE 420 - Program Promotion and Advertising Credits: (5)

# Family and Child Life Major BS, Child Life Specialization 

Family and Child Life Core

The bachelor of science family and child life major is an interdisciplinary study of interpersonal and family relationships and their impact on child development. Family and child life majors are actively engaged in community involvement and practical application of knowledge.

Family and child life majors in both specializations must complete a practicum experience that includes 360 total hours ( 12 academic credits) of field related service within the community. Students are encouraged to apply for the major early in their academic careers to allow for proper planning and placement in the family and child life practicum.

Students wishing to declare a major in family and child life must be incoming freshman or have a cumulative GPA of 2.7. Family and child life majors must maintain a cumulative GPA of 2.7 or higher to remain in the major and must earn a " C " or higher in all courses used to satisfy the family and child life major.

## Family and Child Life Core Requirements

- FCL 101 - Skills for Marriage and Intimate Relationships Credits: (4)
- FCL 234 - Contemporary Families Credits: (4)
- FCL 235 - Relationships and Personal Development Credits: (3)
- FCL 320 - Theories of Family Dynamics Credits: (4)
- FCL 336 - Parent Education and Guidance Credits: (4)
- FCL 344 - Foundations of Marriage and Family Therapy Credits: (4)
- FCL 405 - Professional Obligations and Responsibilities Credits: (4)
- FCL 419 - Research in Family and Child Life Credits: (4)
- FCL 434 - Diversity in Families Credits: (4)
- FCL 492 - Family and Child Life Practicum Credits: (1-6) (Must be taken for a total of 12 credits.)
- FCL 495 - Undergraduate Research Credits: (1-6) (Must be taken for 1 credit)

Child Life Specialization
The child life specialization applies child development theory to the practice of helping children and families through traumatic events, specifically related to hospitalization. The curriculum meets the recommendations of the Association of Child Life Professionals and includes several courses taught by Certified Child Life Specialists. Graduates are well prepared for career opportunities that involve work with children, or to pursue a child life internship and child life graduate study required to become a certified child life specialist.

## Required Courses - Credits: 34

- FCL 232 - Child Development Credits: (3)
- FCL 438 - Attachment Theory and Practice Credits: (4)
- FCL 339 - Adolescence and Emerging Adulthood Credits: (4)
- FCL 414 - Coping with Grief and Loss Credits: (4)
- FCL 415 - Therapeutic Play Credits: (4)
- FCL 416 - Child Life I: Child Life Scope of Practice Credits: (4)
- FCL 417 - Pediatric Diagnoses and Medical Terminology Credits: (4)
- FCL 418 - Child Life II: Impact of Child Hospitalization Credits: (4)
- FCL 432 - Theories in Child Development Credits: (3)

Department-Approved Electives - Credits: 11

- ANTH 353 - Childhood and Culture Credits: (4)
- FCL 310 - Family Issues in the 21st Century Credits: (4)
- FCL 333 - Culture and Marriage Credits: (4)
- FCL 334 - Family Problems and Mediation Credits: (4)
- FCL 335 - Divorce and Remarriage Credits: (3)
- FCL 337 - Human Sexuality Credits: (4)
- FCL 403 - Family Communication Credits: (4)
- FCL 435 - Family Gerontology Credits: (4)
- FCL 439 - Families and Public Policy Credits: (4)
- FCL 440 - Teaching for Family and Child Life Credits: (1-3) (Repeatable up to 6 credits)
- PHIL 308 - Medical Ethics Credits: (5)
- SOC 320 - Death and Dying Credits: (5)

## Family and Consumer Sciences Career and Technical Education Teaching Major, BS

#### Abstract

This bachelor of sciences teaching major satisfies the endorsement for family and consumer sciences teaching for career and technical education.

## Special requirements:

Students wishing to obtain a teaching certificate in family and consumer sciences education will:

- Complete the family and consumer sciences career and technical education teaching major
- Successfully complete FCSG 205 before being fully admitted to the major
- Have a university-level cumulative GPA of at least 2.3 for full admission to this major and a 3.0 minimum cumulative GPA in the major to exit the program and to graduate from CWU with teacher certification
- Earn a grade of C or higher in each course counted toward fulfilling major requirements
- Apply, be accepted into, and complete the Teacher Certification Program
- Student teach in a CTE-approved program
- Hold a valid first aid card with CPR
- Complete 2,000 hours of paid work experience in the last six years
- Provide documentation of occupational safety

## Required Courses

- ATM 355 - Consumer Textiles Credits: (4)
- CTE 410 - Career and Technical Education School to Work Programs Credits: (4)
- CTE 422 - Impact of Education Reform on Career and Technical Education Credits: (2)
- FCL 232 - Child Development Credits: (3)
- FCL 234 - Contemporary Families Credits: (4)
- FCL 336 - Parent Education and Guidance Credits: (4)
- FCL 337 - Human Sexuality Credits: (4)
- FCS 371 - Real World Finance Credits: (3)
- FCS 472 - Life Management Credits: (5)
- FCSE 326 - Curriculum in Career and Technical Education for Family and Consumer Sciences Credits: (4)
- FCSE 426 - Methods and Materials of Teaching Family and Consumer Sciences Credits: (3)
- FCSE 451 - Methods and Materials of Teaching FCS Laboratory Course Content Credits: (3)
- FCS 205 - FCS Entry Assessment Credits: (1)
- FCS 405 - FCS Exit Assessment Credits: (1)
- FCS 367 - Family Housing Credits: (3)

## Global Wine Trade, BS

This Interdisciplinary Program provides students with a broad understanding of the global wine industry. The program prepares graduates for careers in winery and vineyard management, wine merchandising, wholesale, retail, ecommerce, distribution, marketing, import/export, hospitality, entrepreneurship, consulting, and more.

In the major, students complete 52 major core credits to acquire a broad base of knowledge and skills related to wine, wine business issues, and the global wine industry. Students also complete a minor in one of several complementary academic areas. Students will also gain valuable experience by participating in a required international field experience and an internship with a wine-related business, either in the U.S. or abroad.

## Admission Requirements

Students must complete the pre-admission requirements prior to admission into the degree program. An overall minimum 2.5 GPA will be required for admission. Students must fill out an application that includes an essay of motivation and goals. Upon approval of the application, an in-person or telephone interview will be conducted between the advisor for the global wine studies major and the prospective student. Permission of the major advisor is required. Upon admittance to the program students must agree to sign a written statement regarding professional conduct and responsibility.

Students must be 18 years of age to apply for the major. It should be understood that all classroom courses involving tasting will require students to taste and spit (Washington State legislation RCW 66.20.010 (12) a-f).

## Course Requirements

Students will be expected to spend significant amounts of time outside the classroom on projects, field trips, and assignments. Students must earn a cumulative GPA of 2.7 in the global wine studies core courses.

## Tuition

Global Wine Trade (GWT) course tuition is the same as the regular CWU tuition for undergraduates. Some courses have lab fees to cover additional costs.

Pre-admission Requirements (15 credits)

- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- GEOG 101 - World Regional Geography Credits: (5)

Choose one of the following courses (5 credits)

- HUM 101 - Exploring Cultures in the Ancient World Credits: (5)
- HUM 102 - Exploring Cultures From 16th through 19th Centuries Credits: (5)
- HUM 103 - Exploring Cultures in Modern and Contemporary Societies Credits: (5)

Global Wine Studies Core Courses (52 credits)

- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- GWT 302 - Fundamentals of Viticulture and Enology Credits: (4)
- GWT 303 - Major Wine Regions of the World Credits: (4)
- GWT 304 - Wine Marketing and Branding Credits: (4)
- GWT 402 - Issues in Viticulture and Enology Credits: (4)
- GWT 403 - The Global Wine Industry Credits: (4)
- GWT 404 - The International Wine Trade Credits: (5)
- GWT 406 - Professional Wine Analysis Credits: (3)
- GWT 408 - Advanced Sensory Analysis Credits: (4)
- GWT 410 - Wine Faults Credits: (3)
- GWT 412 - Advanced Wine Regions Credits: (3)
- GWT 490 - Cooperative Education Credits: (1-12) (6 credits required)
- GWT 492 - Field Experience Credits: (3) (study abroad)

Total Credits: 67

Select a minor through advisement with GWS faculty.

## Recreation, Tourism and Events BS, Event Management Specialization

Recreation, Tourism and Events Core

The Recreation, Tourism and Events Program (RTE) prepares students for positions in one of the top three industries in Washington state and the world's number-one industry. Professional positions are numerous. The following list is a sampling of the types of professional positions currently held by RTE graduates: city parks and recreation director, recreation manager, front office and training manager, director of youth programs, guest services manager, and winery marketing manager, general manager, event and meeting planner, marketer,
entrepreneur, among others.

## Admission Requirements

To be admitted to a major or minor in Recreation Tourism and Events, a student must have a cumulative GPA of 2.3 (or be a freshman or transfer).

## Program Requirements

A minimum grade of C- must be earned in each course counted toward fulfilling major and minor requirements.

Students should plan to complete their Senior Practicum education during the summer term.

Elective courses must be pre-approved by an advisor prior to registration for course(s). The elective UNIV 304 International Sustainable Development ( 5 credits) is an on-line course tied to an international travel experience in which the student volunteers through GIVE in community projects in Nicaragua, Tanzania, or Thailand. See UNIV 304 in course lists for full description.

## Recreation, Tourism and Events Core Requirements

- FCS 220 - Leadership in Human Development Credits: (4)
- RTE 419 - Applied Research and Evaluation Credits: (3)
- RTE 201 - Introduction to Recreation and Tourism Credits: (3)
- RTE 210 - Student Leadership Credits: (1-3) (Must be taken for 2 credits.)
- OR RTE 294 - RTE Participatory Leadership Credits: (1-3) (Must be taken for 2 credits.)
- RTE 230 - Program and Event Budgeting Credits: (2)
- RTE 292 - Practicum Credits: (1-3) (Must be taken for 4 credits.)
- RTE 351 - On-Line Strategies for RTE Credits: (3)
- RTE 355 - Sustainable Tourism: Contemporary Issues Credits: (2)
- RTE 420 - Program Promotion and Advertising Credits: (5)
- RTE 484 - Legal Liability and Risk Management Credits: (4)
- RTE 492 - Senior Practicum Credits: (1-10) (Must be taken for 10 credits.)

Total Core Credits: 42

Event Management Specialization
The event management specialization prepares students for positions in special events coordination and operation, lodging sales and marketing, convention centers, destination marketing organizations, tourism planning, recreation and sports centers, and many others.

The Recreation, Tourism and Events Program (RTE) prepares students for positions in one of the top three industries in Washington State and the world's number-one industry. Professional positions are numerous.

- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- OR BME 146 - Basic Accounting Credits: (5)
- OR RTE 430-Grants, Sponsorship, and Fundraising for RTE Credits: (5)
- FCS 379 - Professional Development and Internship Planning Credits: (3)
- HRM 381-Management of Human Resources Credits: (5)
- RTE 331 - Sustainable Events: Best Practices Credits: (3)
- RTE 373D - Convention and Meeting Management Credits: (5)
- RTE 374 - Festivals and Events Credits: (4)
- RTE 405 - Hospitality Catering Credits: (3)
- RTE 485 - Events Administration Credits: (4)

Department-Approved Electives - Credits: 15

Choose from the following courses:

- COM 312 - Introduction to Non-Profit Leadership Credits: (4)
- COM 345 - Business and Professional Speaking Credits: (4)
- RTE 222 - Recreation Programming and Activities Credits: (3)
- RTE 337 - Tour and Interpretive Program Development Credits: (3)
- RTE 371 - Tourism Essentials Credits: (3)
- RTE 373E - Resort Management Credits: (5)
- RTE 377 - The Gaming and Casino Industry Credits: (3)
- RTE 379 - Cruise Line Industry Credits: (3)
- RTE 452 - Regional Wine Tourism Credits: (4)
- RTE 498 - Special Topics Credits: (1-6)
- UNIV 304 - International Sustainable Development Credits: (5)
- OR, any other advisor approved RTE course.

Total Specialization Credits: 47
Total Credits: 89

Family and Consumer Sciences Department College of Education and Professional Studies

## Apparel Design Minor

A minor in apparel design is administered jointly by the Apparel, Textiles and Merchandising Program and theatre arts department. It is designed to enable students with career interests in this field to gain experience in the competency areas expected of apparel designers. This minor allows the student to learn to apply the basic principles of design and creativity in developing apparel. Students will study the application of artistic and creative design elements, selection, and use of fabrics and textiles, and the techniques for transforming design concepts into garments in order to create a final sale-able product for a target market.

To be admitted to a minor in Apparel Design, a student must have a cumulative GPA of 2.3 (or be a freshman or transfer). A minimum grade of C - must be earned in each course counted toward fulfilling major and minor requirements.

## Required Courses

- ATM 270 - Digital Presentation Techniques Credits: (4)
- ATM 280 - Basic Sewing Techniques Credits: (3)
- OR TH 261 - Costume Technology Credits: (3)
- ATM 301 - Introduction to the Fashion Industry Credits: (4)
- ATM 355 - Consumer Textiles Credits: (4)
- ATM 388 - Advanced Fashion Design Credits: (3)
- OR TH 361 - Stage Costuming Credits: (3)
- ATM 389 - Fashion Trend Analysis Credits: (3)
- ATM 488 - Fashion Line Development Credits: (3)
- TH 140 - Introduction to Theatre Design Credits: (3)
- TH 461 - Costume Design Credits: (4)
- TH 465 - Costume and Fashion Drawing Credits: (3)

Total Credits: 34

College and Department Information

Family and Consumer Sciences Department
College of Education and Professional Studies

## Apparel, Textiles and Merchandising Minor

The minor in apparel, textiles and merchandising is designed for those students wanting some expertise in the apparel industry to strengthen their majors in business, marketing, communication, advertising, graphic design, theatre arts, event planning, accounting, retail management, etc. Students are exposed to various aspects of merchandising, trend analysis, textiles, buying, sustainability, and fashion event planning. Completing the minor will contribute to future career competitiveness and broaden opportunities.

## Admission Requirements

To be admitted to a minor in Apparel, Textiles and Merchandising, a student must have a cumulative GPA of 2.3 (or be a freshman or transfer).

## Graduation Requirements

A minimum grade of C- must be earned in each course counted toward fulfilling minor requirements.

## Required Courses

- ATM 270 - Digital Presentation Techniques Credits: (4)
- ATM 281 - Socio-cultural Aspects of Apparel Credits: (4)
- ATM 301 - Introduction to the Fashion Industry Credits: (4)
- ATM 355 - Consumer Textiles Credits: (4)
- ATM 381 - Fashion Show Production Credits: (2)
- ATM 389 - Fashion Trend Analysis Credits: (3)

Total Credits: 21

College and Department Information

Family and Consumer Sciences Department
College of Education and Professional Studies

## Child Development Minor

A minor in child development is designed for students who want some expertise in child development to improve their ability to work with children or parents in their chosen profession. Students majoring in psychology, early childhood education, special education, sociology, social services, public health, law and justice, physical and health education, and recreation and tourism may benefit from the child development minor. Students in the minor will learn about theories of child development; cutting-edge research about how children develop in multiple domains, with a focus on how development occurs in the context of family, community, and culture; and skills for practical application of child development. Completing the minor will enhance students' competitiveness for jobs involving interaction with children in a variety of disciplines.

## Pre-Admission Requirements

Students wishing to declare a minor in Child Development must be incoming freshmen, transfer students, or have a cumulative GPA of 2.5. Child Development minors must maintain a cumulative GPA of 2.5 or higher to remain in the minor.

## Required Courses

- FCL 232 - Child Development Credits: (3)
- FCL 336 - Parent Education and Guidance Credits: (4)
- FCL 438 - Attachment Theory and Practice Credits: (4)

Department-approved Electives Credits: 15-16

- FCL 339 - Adolescence and Emerging Adulthood Credits: (4)
- FCL 414 - Coping with Grief and Loss Credits: (4)
- FCL 415 - Therapeutic Play Credits: (4)
- FCL 416 - Child Life I: Child Life Scope of Practice Credits: (4)
- FCL 417 - Pediatric Diagnoses and Medical Terminology Credits: (4)
- FCL 418 - Child Life II: Impact of Child Hospitalization Credits: (4)
- FCL 432 - Theories in Child Development Credits: (3)

College and Department Information

Family and Consumer Sciences Department
College of Education and Professional Studies

## Event Management Minor

This minor will give the student a solid understanding of special event programming and management. It will also provide experiential learning opportunities through event production. Students in various majors including global wine studies, business, the arts, communication and others may find this minor a beneficial supplement.

## Requirements

To be admitted to a major or minor in Recreation Tourism and Events, a student must have a cumulative GPA of 2.3 (or be a freshman or transfer). A minimum grade of C- must be earned course counted toward fulfilling major and minor requirements.

Required Courses

- RTE 230 - Program and Event Budgeting Credits: (2)
- RTE 373D - Convention and Meeting Management Credits: (5)
- RTE 374 - Festivals and Events Credits: (4)
- RTE 405 - Hospitality Catering Credits: (3)
- RTE 484 - Legal Liability and Risk Management Credits: (4)
- RTE 492 - Senior Practicum Credits: (1-10) (Must be taken for 4 credits.)

Total Credits: 29-30

College and Department Information

## Wine Trade and Tourism Minor

This cross-disciplinary program prepares individuals for employment in many areas of the wine industry, including tourism, hospitality services, retailing, wine sales, marketing, and tasting room and event management.

## Admission Requirements

Admission to the minor requires admission to the Wine Trade Professional Certificate Program. Students must be 21 years of age or older and must apply for acceptance into the program. Permission of the GWS certificate advisor is required.

## Financial Obligations

Because the Global Wine Study (GWS) courses are in a selfsupported program no tuition waiver programs apply for GWS courses. Additional course fees and continuing education tuition apply. Tuition for GWS classes may be higher than regular CWU tuition. Tuition for the RTE courses will be at the regular CWU tuition rate and waivers can be applied to the RTE courses.

## Required Courses

- GWT 302 - Fundamentals of Viticulture and Enology Credits: (4)
- GWT 303 - Major Wine Regions of the World Credits: (4)
- GWT 304 - Wine Marketing and Branding Credits: (4)
- GWT 406 - Professional Wine Analysis Credits: (3)
- GWT 452 - Regional Wine Tourism Credits: (4)
- OR RTE 452 - Regional Wine Tourism Credits: (4)
- GWT 454 - Wine Tourism Applications Credits: (4)
- OR RTE 454 - Wine Tourism Applications Credits: (4)
- RTE 371 - Tourism Essentials Credits: (3)
- RTE 374 - Festivals and Events Credits: (4)

Total Credits: 30

Family and Consumer Sciences Department
College of Education and Professional Studies

## Child Development Certificate

The child development certificate provides students with knowledge and practical skills to work with children from birth through emerging adulthood. Students in the program will learn about theories of child development; cutting-edge research about how children develop in multiple domains, with a focus on how development occurs in the context of family, community, and culture; and skills for practical application of child development. The certificate is designed for matriculated and
non-matriculated students who want to enhance their expertise in child development to improve their ability to work with children or parents in their chosen profession.

## Required Courses

- FCL 232 - Child Development Credits: (3)
- FCL 336 - Parent Education and Guidance Credits: (4)
- FCL 339 - Adolescence and Emerging Adulthood Credits: (4)
- FCL 415 - Therapeutic Play Credits: (4)
- FCL 432 - Theories in Child Development Credits: (3)
- FCL 438-Attachment Theory and Practice Credits: (4)

Total Credits: 22

College and Department Information

Family and Consumer Sciences Department
College of Education and Professional Studies

## Professional Sommelier Certificate

#### Abstract

This certificate program focuses on learning the techniques involved in becoming a Sommelier. A Sommelier works in the dining aspects of the beverage industry including pairing food with wine, beer, spirits and other beverages along with managing the beverage component of a dining establishment. This certificate covers beverage and food pairing, wine service techniques and beverage management, cost and pricing structures, developing beverage lists, and includes a professional tasting component to cover wine, beer, spirits and other beverages. Graduates are prepared for food and beverage related careers in the dining and hospitality industry. Students will be expected to spend significant amounts of time outside the classroom working on projects, field trips and assignments.

## Admission Requirements

Students must be 18 years of age to apply for the certificate. It should be understood that all classroom courses involving tasting will require students to taste spit (Washington State legislation RCW 66.20.010 (12) a-f).

## Tuition

Global Wine Studies (GWS) course tuition is the same as the regular CWU tuition for undergraduates. Some courses have lab fees to cover additional costs.

## Required Courses

- GWT 303 - Major Wine Regions of the World Credits: (4)
- GWT 405-Beverage and Food Pairing for the Sommelier Credits: (4)
- GWT 407 - Beverage Management and Service for the Sommelier Credits: (4)
- GWT 409 - Applied Professional Tasting Analysis (Put on Reserve 9/16/16.) Credits: (4)

Total Credits: 16

## Wine Trade Professional Certificate

This certificate program focuses on the business and trade aspects of the wine industry. Topics covered include the business of wine, world wine regions, trade structures, wine marketing, wine merchandising, viticulture, winemaking, wine styles, and professional evaluation techniques. Graduates are prepared for wine-related careers in sales and merchandising, distribution, marketing, import/export, consulting, hospitality, and more.

This certificate program is a 10 -week, intensive program and all four courses must be taken. Students will be expected to spend significant amounts of time outside the classroom working on projects, field trips, and assignments. Students must obtain a grade of B- or above in all four courses to receive the certificate.

## Admission Requirements

Students must be 18 years of age to apply for the certificate. It should be understood that all classroom courses involving tasting will require students to taste and spit (Washington State legislation RCW 66.20.010 (12) a-f).

## Course Requirements

Students will be expected to spend significant amounts of time outside the classroom working on projects, filed trips, and assignments. Students must earn a cumulative GPA of 2.7 in the global wine studies core courses.

## Tuition

Global Wine Studies (GWS) course tuition is the same as the regular CWU tuition for undergraduates. Some courses have lab fees to cover additional costs.

## Required Courses

- GWT 302 - Fundamentals of Viticulture and Enology Credits: (4)
- GWT 303 - Major Wine Regions of the World Credits: (4)
- GWT 304 - Wine Marketing and Branding Credits: (4)
- GWT 406 - Professional Wine Analysis Credits: (3)

## Program Information

The Film program is an innovative, interdisciplinary, undergraduate program leading to a BA in Film or a minor in Production, Cinema Studies, or Screenwriting.

In the BA program, students are provided the opportunity to pursue a course of study that encompasses the scholarly study of film as well as the production and technical aspects of the moving image and writing for the screen. The program employs a scholarly, creative, and professional approach to the study of film and seeks to help each student discover his or her talent as an independent critic, artist, and communicator.

The Film BA is designed to build specific skills in media production from a strong foundation of general knowledge in film. Students can choose from a range of courses that offer both introductory as well as more advanced study in all aspects of mediated storytelling, from writing and producing to directing, cinematography, and editing. The program emphasizes exploration of the student's personal creative voice through hands-on productions.

All students begin by making short programs, then progress to more complex productions while learning the collaborative nature of film/video production through crew experiences. Students are encouraged to experiment with traditional narrative structures, documentary, and multi-camera production, as the
curriculum allows and their interests dictate.
To complete the learning experience and help students prepare for the job market, all students pursuing the major are strongly encouraged to take advantage of internship opportunities and are required to compile a portfolio and capstone project.

## Admission Requirements

A Film major or minor can be selected by students using the normal major or minor declaration process and with assistance from a faculty advisor. Any student who has a minimum CWU grade point average of 2.4 or higher may be admitted to this program. Admission is dependent upon the number of slots available.

## Graduation Requirements

Students must maintain a 2.4 CWU GPA or higher with a minimum grade of C - in all courses counted toward fulfilling the film major or minor requirements.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/film or by contacting the department directly.

## Film Major, BA

## Cinema Studies Minor

Students wishing to explore the history, theory, and criticism of film and television in addition to their major course of study, are encouraged to minor in cinema studies. In this minor, students examine the role of cinema as a unique twentieth-century art form and as an influence on cultural practices of enduring social significance.

## Admission Requirements

The cinema studies minor is open only to non-film majors.

## Graduation Requirements

Students must maintain a 2.4 GPA or higher with a minimum grade of C - in all courses counted toward fulfilling the cinema studies minor requirements.

## Required Courses

- FILM 250 - Introduction to Film Credits: (5)
- ENG 342 - Cinema Studies I: Early American Film History Credits: (4)
- OR FILM 342 - Cinema Studies I: Early American Film History Credits: (4)
- ENG 343 - Cinema Studies II: Modern American Film History Credits: (4)
- OR FILM 343-Cinema Studies II: Modern American Film History Credits: (4)
- ENG 344 - Cinema Studies III: Film Theory Credits: (5)
- OR FILM 344- Cinema Studies III: Film Theory Credits: (5)
- ENG 360 - Cinema Studies IV: Survey of World Cinema Credits: (5)
- OR FILM 360 - Cinema Studies IV: Survey of World Cinema Credits: (5)
- ENG 460 - Cinema Studies V: Advanced World Cinema Credits: (5)
- OR FILM 460 - Cinema Studies V: Advanced World Cinema Credits: (5)
- FILM 492 - Practicum Credits: (2)

Choose two of the following:

- ENG 461 - Studies in Film and Culture Credits: (5)
- OR FILM 461 - Studies in Film and Culture Credits: (5)
- ENG 462 - Studies in Film and/or Television Genres Credits: (5)
- OR FILM 462-Studies in Film and/or Television Genres Credits: (5)
- ENG 463 - Studies in the Film Auteur Credits: (5)
- OR FILM 463 - Studies in the Film Auteur Credits: (5)

Total Credits: 40

## Film Production Minor

For students who would like to study film production as a supplement to a major in another area, the Film Production minor offers a solid foundation in techniques and approaches to cinematic storytelling. Minors will graduate with a useful set of skills and vocabulary in writing, directing, editing, and camera operation.

## Admission Requirements

A Film major or minor can be selected by students using the normal major or minor declaration process and with assistance from a faculty advisor. Any student who has a minimum CWU grade point average of 2.4 or higher may be admitted to this program. Admission is dependent upon the number of slots available.

## Graduation Requirements

Students must maintain a 2.4 CWU GPA or higher with a minimum grade of C - in all courses counted toward fulfilling the film major or minor requirements.

## Required Courses

- FILM 216 - Basic Audio Technology Credits: (1)
- FILM 217 - Basic Editing: Final Cut Pro Credits: (1)
- FILM 221 - Color Correction Credits: (1)
- FILM 250 - Introduction to Film Credits: (5)
- FILM 267 - Screenwriting Fundamentals Credits: (4)
- OR ENG 267 - Screenwriting Fundamentals Credits: (4)
- FILM 340 - Production I Credits: (5)
- FILM 350 - Production II Credits: (5)
- FILM 380 - Production III Credits: (4)
- FILM 453 - Wildcat Films Credits: (3)

Select one from the following: (4 credits)

- FILM 342 - Cinema Studies I: Early American Film History Credits: (4)
- OR ENG 342 - Cinema Studies I: Early American Film History Credits: (4)
- FILM 343 - Cinema Studies II: Modern American Film History Credits: (4)
- OR ENG 343-Cinema Studies II: Modern American Film History Credits: (4)

Select one from the following: (5 credits)

- FILM 344 - Cinema Studies III: Film Theory Credits: (5)
- OR ENG 344-Cinema Studies III: Film Theory Credits: (5)
- FILM 360 - Cinema Studies IV: Survey of World Cinema Credits: (5)
- OR ENG 360 - Cinema Studies IV: Survey of World Cinema Credits: (5)

## Total Credits: 38

## Screenwriting Minor

The screenwriting minor offers students already majoring in film the opportunity to develop more advanced skills in cinematic storytelling, theoretical approaches to screenwriting, adaptation of other media to the screen and screenwriting for nontraditional story structures. Under the mentorship of faculty, screenwriting minors will spend considerable time writing and rewriting scripts, which will be added to a library of scripts available for development and production by students in the program.

This minor is open only to Film majors.

## Graduation Requirements

Students must maintain a 2.4 GPA or higher with a minimum grade of C- in all courses counted toward fulfilling the screenwriting minor requirements.

Required Courses

- FILM 327 - Scriptwriter in Development and Production Credits: (4)
- FILM 356 - Writing for Screen Genre Credits: (4)
- ENG 357 - Writing for Serial Media Credits: (4)
- OR FILM 357 - Writing for Serial Media Credits: (4)
- ENG 460 - Cinema Studies V: Advanced World Cinema Credits: (5)
- OR FILM 460 - Cinema Studies V: Advanced World Cinema Credits: (5)
- FILM 492 - Practicum Credits: (2)

Take three times for a total of 15 credits:

- FILM 470 - The Writer's Room Credits: (5)

Total Credits: 34

## Bachelor of Science in Business Administration Program

The Department of Finance and SCM and the Department of Management jointly support the bachelor of science in business administration and business minor. The department offers coursework leading to the bachelor of science in business administration (BSBA) degree. In addition to the university general education requirements, the BSBA major is comprised of three principal components:

Foundation courses that provide foundation knowledge and skills needed for further study in business

Business core courses that build on the foundation group and focus on decision making in the main functional areas of business

Specialization courses that allow for advanced study in one of the functional areas.

Students select a 25 -credit specialization within the BSBA program in one of seven areas: finance, general business, human resource management, leadership and management, marketing management, personal financial planning or supply chain management.

## Program Goals for BSBA

The departments have identified overall educational outcomes related to knowledge, values, and skills for all BSBA graduates. Following are the outcomes for the bachelor of science in business administration (BSBA) programs:

1. Knowledge-based educational outcomes. Upon completion of the BSBA program, students should:

- Have a working knowledge of business administration that will aid them in private, government, or non-profit careers and/or prepare them for additional study

2. Values-based educational outcomes. Upon completion of the BSBA program, students should:

- Comprehend ethical issues and be able to apply an ethical decision-making framework to business decisions

3. Skills-based educational outcomes. Upon completion of the BSBA program, students should:

- Function effectively when in teams both as a leader and as a member
- Demonstrate effective oral communication skills
- Demonstrate effective written communication skills
- Apply quantitative and qualitative critical thinking skills to develop, access, and use information to analyze business problems and propose feasible solutions

## Additional BSBA Graduation Requirements

The following special rules apply to students seeking the BSBA major:

- Students must earn a minimum cumulative GPA of 2.25 in the 99 - to 100 -credit in-the-major coursework to be eligible for a degree. In addition, the department requires a minimum GPA of 2.25 in the 59- to 60credit upper-division component of the in-the-major total.
- Transfer students must complete at least 40 College of Business credits at CWU to be eligible for the BSBA degree, including MGT 489. Additionally, students seeking a Human Resource Management specialization must complete HRM 486 at CWU and students seeking a Marketing specialization must complete MKT 470 at CWU.
- The BSBA program requires a single specialization of at least 25 credits. Occasionally a student requests a second specialization. To be eligible for a second specialization, a minimum of 20 unique credits must be completed. Unique in this sense means the credits have not been used as part of any other BSBA specialization.

## Repeat Policy

Business administration courses may be repeated only once.

## College of Business Admission Requirements

For information on admission requirements, please go to: College of Business.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/finance-supply or by contacting the department directly.

## Supply Chain Management, BAS

Supply Chain Management (SCM) builds and prepares students for careers as analysts, decision makers and managers in any and all segments of an organization's supply, production distribution chain. Students who complete this program will have a fundamental understanding of the systematic, integrated nature of the creation and delivery of goods and services, and the manner in which the supply, production and distribution chain includes or involves other internal and external entities. Students will be able to solve problems and make decisions in this environment by using concepts from other business administration areas, computing and analytical skills, and appropriate quantitative and qualitative models.

The bachelor of applied science in supply chain management (BAS-SCM) is designed for students with any applied or technical school degree to gain a baccalaureate degree in a timely fashion. This degree requires significant study in general education at the upper-division level.

## Admission Requirements

Applicants for the BAS Supply Chain Management must meet the following requirements prior to admission.

- Completion of an applied or technical degree from a community or technical college with a minimum GPA of 2.25 .
- A world language is not required.
- Students applying to this program must meet with an advisor for the College of Business for a full evaluation of credits and requirements prior to be admitted to the program.
Application forms are available in the department offices. The completed form must be accompanied by transcripts that reflect all prior college work. Admission shall be based on grades earned in the admission requirement courses.

A minimum grade of "C-" (1.7) in each course. The credit/no credit option will not be accepted for any of these courses. These criteria apply to equivalent courses transferred from other institutions. The applicant must have earned a minimum grade point average of 2.0 in all collegiate study.

Students who have met all of the above requirements will be admitted unless the number of applicants exceeds available
space. In that case, acceptance will be competitive, based on a selection index.

## Graduation Requirements

The following special rules apply to students seeking the BAS Supply Chain Major:

- Students must earn a minimum cumulative GPA of 2.25 in the major courses.

Admission Requirements Credits: 39

Admission shall be based on grades earned in the following courses:

- ACCT 251 - Financial Accounting Credits: (5)

## Business Administration BS (BSBA), Supply Chain Management Specialization

Supply Chain Management (SCM) builds on the business core and prepares students for careers as analysts, decision makers and managers in any and all segments of the organization's supply, production and distribution chain. Students who
complete this program will have a fundamental understanding of the systematic, integrated nature of the creation and delivery of goods and services, and the manner in which the supply, production and distribution chain includes or involves other internal and external entities. Students will be able to solve problems and make decisions in this environment by using concepts from accounting, economics and other business administration areas, computing and analytical skills, and appropriate quantitative and qualitative models.

## Program Goals for BSBA

The departments have identified overall educational outcomes related to knowledge, values, and skills for all BSBA graduates. Following are the outcomes for the bachelor of science in business administration (BSBA) programs:

1. Knowledge-based educational outcomes. Upon completion of the BSBA program, students should:

- Have a working knowledge of business administration that will aid them in private, government, or non-profit careers and/or prepare them for additional study

2. Values-based educational outcomes. Upon completion of the BSBA program, students should:

- Comprehend ethical issues and be able to apply an ethical decision-making framework to business decisions

3. Skills-based educational outcomes. Upon completion of the BSBA program, students should:

- Function effectively when in teams both as a leader and as a member
- Demonstrate effective oral communication skills
- Demonstrate effective written communication skills
- Apply quantitative and qualitative critical thinking skills to develop, access, and use information to analyze business problems and propose feasible solutions

## Additional BSBA Graduation Requirements

The following special rules apply to students seeking the BSBA major:

- Students must earn a minimum cumulative GPA of 2.25 in the 99- to 100-credit in-the-major coursework to be eligible for a degree. In addition, the department requires a minimum GPA of 2.25 in the $59-$ to 60 credit upper-division component of the in-the-major total.
- Transfer students must complete at least 40 College of Business credits at CWU to be eligible for the BSBA degree, including MGT 489. Additionally, students seeking a Human Resource Management specialization must complete HRM 486 at CWU and students seeking a Marketing specialization must complete MKT 470 at CWU.
- The BSBA program requires a single specialization of at least 25 credits. Occasionally a student requests a second specialization. To be eligible for a second specialization, a minimum of 20 unique credits must be completed. Unique in this sense means the credits
have not been used as part of any other BSBA specialization.

## Repeat Policy

Business administration courses may be repeated only once.

## Personal Financial Planning, BS

Personal Financial Planning (PFP) prepares graduates to become fee-for service professional planners with strong ethical standards who work with families and individuals developing specific budget, asset management, and related planning processes. The program design and content also meets educational requirements to sit for the Certified Financial Planning Board of Standards, Inc. accreditation examination.

## Graduation Requirements

Additional Personal Financial Planning BS Graduation Requirements
The following special rules apply to students seeking the Personal Financial Planning BS major:

- Students must earn a minimum cumulative GPA of 2.25 in the 99-to 100- credit in-the-major coursework to be eligible for a degree. In addition, the Department requires a minimum GPA of 2.25 in the 59 - to 60 credit upper-division component of the in-the-major total.
- Transfer students must complete at least 40 College of Business credits at CWU to be eligible for the BS degree.

## Repeat Policy

Business administration and Personal Financial Planning courses may be repeated only once.

Foundation Courses Credits: 34

Finance and Supply Chain Management Department College of Business

## Business Minor (MGT)

The business minor provides students with an introduction to several key areas of business administration. Business minors are only available to students with declared majors. Declaration forms with instructions, are available online and, in department and center offices. Students must earn a cumulative grade point average of 2.25 in courses allowed in fulfilling the business administration minor requirements.

Business Minor Core

## Required Courses

- ACCT 252 - Managerial Accounting Credits: (5)
- OR ACCT 301-Accounting Skills for Non-Business Majors Credits: (5)
- BUS 241-Legal Environment of Business Credits: (5)
- BUS 374 - Personal Investments Credits: (5)
- OR ECON 201 - Principles of Economics Micro Credits: (5)
- HRM 381-Management of Human Resources Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- MGT 380 - Organizational Management Credits: (5)

Total Credits: 30

College and Department Information

Management Department
College of Business

## Finance Minor

The finance minor provides students in business, economics, accounting and actuarial sciences with grounding in key financial principles and practices. Finance minors are only available to students who are currently pursuing a major in business, accounting or actuarial sciences. Declarations forms, with instructions, are available online, in department and in center offices. Students must earn a cumulative grade point average of 2.25 in courses allowed in fulfilling the finance minor requirements.

## Required Courses

- ECON 202 - Principles of Economics Macro Credits: (5)
- ECON 330 - Money and Banking Credits: (5)
- FIN 370 - Introductory Financial Management Credits: (5)
- FIN 470 - Intermediate Financial Management Credits: (5)
- FIN 475 - Investments Credits: (5)

Total Credits: 25

College and Department Information
Finance and Supply Chain Management Department College of Business

## Supply Chain Management Minor

The minor program provides the opportunity for the student to gain knowledge and skills in the full spectrum of supply chain activities-supplier relationships, purchasing management, operations and inventory management, logistics and transportation, quality management, and information technology. Typical job titles include: purchasing/supply manager, procurement manager, materials manager, demand planner, logistics analyst as well as others.

## Additional Notes:

This program is open to current accounting, economics, finance, management and marketing students, and CWU students in other academic programs who have completed the necessary pre-requisite courses. The courses in the minor may be used as part of the BS Business Administration Program.

Required Courses

- ECON 130 - Foundations for Business Analytics Credits: (5)
- OR MATH 130 - Finite Mathematics Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- SCM 310 - Supply Chain Management Credits: (5)
- SCM 425 - Procurement and Supply Management Credits: (5)
- SCM 435 - Supply Chain Operations Credits: (5)
- SCM 475 - Global Trade and Supply Chain Management Credits: (5)

Select a minimum of 5 credits from the following:

- ACCT 305-Cost Accounting Credits: (5)
- BUS 490 - Cooperative Education Credits: (1-12)
- MGT 484 - International Management Credits: (5)
- SCM 302 - Supply Chain Bootcamp Credits: (2)
- SCM 420 - Lean/Six Sigma Processes Credits: (5)
- SCM 450 - Logistics and Transportation Credits: (5)

Total Credits: 35

College and Department Information

Finance and Supply Chain Management Department College of Business

## Lean Six Sigma Greenbelt Certificate

The courses in Lean Six Sigma Greenbelt Certificate provide students with the necessary concepts, skills, techniques and experiences to improve operating processes and quality in all sectors of profit and not-for-profit organizations in a manufacturing, services or administrative environment.

## Admission Requirements

## Additional Notes:

This program is open to current accounting, economics, finance, management and marketing students, CWU students in other academic programs who have completed certificate course prerequisites and persons in other fields who have completed program prerequisite courses. The courses in the certificate program may be used as part of the BS Business Administration program. A cumulative GPA of 3.0 must be earned in the program to be eligible for the certificate.

Prerequisite Credits: 5

- BUS 221 - Introductory Business Statistics Credits: (5)

## Required Courses Credits: 10

- SCM 420 - Lean/Six Sigma Processes Credits: (5)
- SCM 492 - Lean Six Sigma Practicum Credits: (5)

Total Credits: 15

Finance and Supply Chain Management Department College of Business

## Personal Financial Planning Certificate

[^8]
## Program Requirements

Students must complete 35 credits of the Personal Financial Planning Certificate in residency.

## Additional Notes

This certificate program is directed toward graduates and working adults.

Required Courses

- ACCT 251 - Financial Accounting Credits: (5)
- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- ACCT 303-Tax Planning for Personal Finance Credits: (5)
- PFP 310 - Introduction to the Financial Planning Profession Credits: (5)
- PFP 440 - Estate Planning Credits: (5)
- PFP 450 - Insurance and Risk Management Credits: (5)
- PFP 460 - Retirement Planning Credits: (5)
- PFP 475 - Financial Planning Investments Credits: (5)
- PFP 480 - Financial Planning Capstone Credits: (5)

Total Credits: 40

## Supply Chain Management Certificate

The certificate program provides the opportunity for professionals to gain knowledge and skills in the full spectrum of supply chain activities-supplier relationships, purchasing management, operations and inventory management, logistics and transportation, quality management, and information technology. Typical job titles include: purchasing/ supply manager, procurement manager, materials manager, contracts manager, purchasing agent, senior buyer and buyer/planner.

## Program Requirements

Students must complete 25 credits of the supply chain management certificate in residency.

A cumulative GPA of 3.0 must be earned in the program to be eligible for the certificate.

## Additional Notes

This certificate program is directed toward graduates and working adults. Current students in accounting, economics, finance, management, marketing and those in other academic programs are encouraged to pursue a minor in supply chain management.

## Required Courses

- SCM 310 - Supply Chain Management Credits: (5)
- SCM 425 - Procurement and Supply Management Credits: (5)
- SCM 435 - Supply Chain Operations Credits: (5)
- SCM 475 - Global Trade and Supply Chain Management Credits: (5)

Select a minimum of 5 credits from the following:

- ACCT 305-Cost Accounting Credits: (5)
- BUS 490 - Cooperative Education Credits: (1-12)
- MGT 484 - International Management Credits: (5)
- SCM 302 - Supply Chain Bootcamp Credits: (2)
- SCM 310A - Enterprise Sales and Distribution Systems Lab Credits: (1)
- SCM 420 - Lean/Six Sigma Processes Credits: (5)
- SCM 425A - Enterprise Purchasing and Materials Management Systems Lab Credits: (1)
- SCM 435A - Enterprise Production Planning and Execution Systems Lab Credits: (1)
- SCM 450 - Logistics and Transportation Credits: (5)

## Faculty and Staff

Chair
John Bowen, PhD

## Professors

John Bowen, PhD, economic geography, transportation geography, Asia
Anthony Gabriel, PhD, hydrology, lake and river ecosystems, coastal and wetlands management
Robert Hickey, PhD, environmental impacts, coastal zones, GIS, Australia
Karl Lillquist, PhD, physical geography, geomorphology, soils, environmental change in arid and alpine watersheds

## Associate Professors

Elvin E. Delgado, PhD, political ecology, energy and capitalism, political economy and nature, critical resource geography, health geography
Jennifer Lipton, PhD, cultural ecology, remote sensing, climate change, Latin America
Michael Pease, water resources, watershed planning and
analysis, environmental law
Craig Revels, PhD , cultural-historical geography, landscape, Latin America
Megan Walsh, PhD, biogeography, paleoecology, NW fire history, climate change

## Assistant Professors

Sterling Quinn, PhD, GIS-geographic information systems, crowdsourced data, critical cartography, Latin America

## Senior Lecturers

Holly English, MS, environmental policy and energy resources Elaine Glenn, MS, political geography, world regional geography, Middle East, Russia

## Emeritus Faculty

Dee Eberhart, MA
Kenneth Hammond, PhD
James Huckabay, PhD
Nancy Hultquist, PhD
Robert Kuhlken, PhD
John Ressler, PhD
Morris Uebelacker, PhD

## Staff

David Cordner, instructional and classroom support technician III
Monica Reece-Bruya, secretary senior

## Department Information

An understanding of geography is integral to an educated person's ability to live and act effectively in today's changing world. Abroad range of human, environmental, and technological factors are at work shaping the future of our planet, and it is the mission of the department of geography to prepare students to be active participants in that emerging future. Geography's traditional concern with human-environment interactions, the interrelationships between places, and the associated impacts and problems of these processes provides important insights into today's complex societal challenges. the department emphasizes critical thinking and applied approaches to analysis, while providing our graduates with the skills necessary to deal with issues at scales ranging from local to global.

Courses in the department of geography introduce students to world regions such as Asia and Latin America while also providing a fuller understanding for the patterns and relationships of our home region, the Pacific Northwest. We emphasize field learning and a holistic approach to the physical and societal characteristics of places. Majors in geography hone their written, verbal, and map communication skills while gaining proficiency in specialized tools such as geographic information systems (GIS) and remote sensing technology. Skills in geospatial analysis are useful in addressing a wide range of problems, from choosing a location for a neighborhood coffee shop to minimizing damage from wildfire to assessing the likely impacts of climate change.

The department maintains a state-of-the-art lab for instruction in GIS, air photo interpretation, remote sensing, and quantitative methods. Students also learn from and collaborate with faculty members in the department's well-equipped soils, paleoecology, and hydrology labs. The department also encourages students to connect their geography training with related university
programs, especially those in which the department is an active participant, including : Environmental Studies, Energy Studies, Asia Studies, Latin American Studies, International Studies and Programs, and the Resource Management Graduate Program.

Upon graduation, geography majors work in a wide range of careers, with particular success in geospatial data analysis (e.g. computer mapping and GIS), urban and regional planning, and employment in local, state, and federal government agencies. In addition, the interdisciplinary nature of geography provides many other opportunities for our majors, including graduate school.

All students who wish to major in geography must:

1. Have a 2.25 minimum GPA in all coursework taken up to the time of admission
2. Apply for acceptance into the geography major
3. Upon acceptance into the program, meet with their assigned advisor to develop a major contract
4. Earn a C- or higher grade in each of the courses in their major contract

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/geography or by contacting the department directly.

## Geography Major, BA

This major of 65 credits offers students the greatest flexibility and is suited for students with interests outside of the specializations listed below. In consultation with a departmental advisor, students may choose a specialization and design a program of component courses which best fits specific career goals and aspirations. In addition to the core requirements, students pursuing this option must take a set of departmentapproved electives that includes an upper-division course from each of five subfields. To satisfy the overall major requirement, at least 8 of the credits must be in 400-level geography courses in addition to Geography 489 - Geography Capstone.

## Geography Core

## Admission to the Major

All students who wish to major in geography must:

1. Have a 2.25 minimum GPA in all coursework taken up to the time of admission
2. Apply for acceptance into the geography major
3. Upon acceptance into the program, meet with their assigned advisor to develop a major contract
4. Earn a C- or higher grade in each of the courses in their major contract

Core Requirements

- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 107 - Our Dynamic Earth Credits: (5)
- GEOG 208 - Our Human World Credits: (5)
- GEOG 301 - Introduction to GIS and Maps Credits: (4)
- GEOG 250 - Resource Exploitation and Conservation Credits: (4)
- GEOG 489 - Geography Capstone Credits: (2)

Total Core Requirement Credits: 25

Department-approved Electives

Must include one upper-division geography course in each of the five subfields: regional, physical, human, resource, and techniques.

Total Electives Credits: 40

Total Credits: 65

College and Department Information
Geography Department
College of the Sciences

## Geography BS, Environmental and Resource Geography Specialization

This specialization engages students in courses that primarily use field and laboratory techniques to study Earth's environmental systems and the human dimensions of resource use and allocation. The curriculum is designed to provide majors with an applied approach for developing data collection and analysis skills, as well as an ability to evaluate the societal and physical dimensions of environmental sustainability. This specialization places a strong emphasis on understanding human-environmental interactions, including climate change, hazards, and watershed and landscape dynamics in aquatic, mountain, arid, and forest environments, particularly the Pacific Northwest. Students who complete this specialization will be prepared for careers in natural resource management and are likely to be employed by federal, state, and tribal agencies, as well as private consulting firms. Students interested in graduate study in the field of environmental geography or resource management should work closely with their advisor to tailor this specialization to their particular field of interest.

## Geography Core

## Admission to the Major

All students who wish to major in geography must:

1. Have a 2.25 minimum GPA in all coursework taken up to the time of admission
2. Apply for acceptance into the geography major
3. Upon acceptance into the program, meet with their assigned advisor to develop a major contract
4. Earn a C- or higher grade in each of the courses in their major contract

College of the Sciences

## Geography BS, GIScience Specialization

This GIScience specialization recognizes the increasing importance of spatial information in understanding and managing environmental and human systems, providing majors training in the processing, display, and analysis of geographical data. Students develop familiarity with the theoretical underpinnings of spatial analytical tools and techniques as well as their application to real-world problems. Issues pertaining to the collection, management, analysis, and dissemination of spatial information are covered through courses in GIS, aerial photo interpretation, remote sensing, and quantitative analysis. Graduates of the program will be well-prepared for employment as managers and analysts of spatial information, including positions in business, governmental agencies, and private consulting, as well as graduate study and advanced professional certification.

- GEOG 370 - Geography of South America Credits: (4)
- GEOG 371 - Geography of Europe Credits: (4)
- GEOG 372 - Geography of Russia Credits: (4)
- GEOG 375 - Geography of Asia Credits: (4)
- GEOG 381 - Urban Geography Credits: (4)

Physical Geography (one course required):

- GEOG 361 - Soils Credits: (5)
- GEOG 382 - Hydrology Credits: (5)
- GEOG 386 - Geomorphology Credits: (5)
- GEOG 387 - Biogeography Credits: (5)
- GEOG 388 - Weather and Climate Credits: (5)
- GEOG 453 - Riparian and Wetlands Analysis Credits: (5)
- GEOG 483 - Snow Credits: (5)

Human-Environment Relationships (one course required):

- GEOG 305 - Introduction to Land Use Planning Credits: (5)
- GEOG 306 - Transportation Geography and Planning Credits: (4)
- GEOG 373 - Water Resources Credits: (4)
- GEOG 381 - Urban Geography Credits: (4)
- GEOG 422 - Geography of Food and Agriculture Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- GEOG 449 - Environmental Hazard Analysis and Management Credits: (5)
- GEOG 455 - Pyrogeography Credits: (4)
- GEOG 456 - Recreation Geography Credits: (5)
- GEOG 458 - People, Parks, and Protected Areas Credits: (4)

Culminating Experience Credits: 4

- GEOG 417 - Advanced GIS Credits: (4)

Department-Approved Electives Credits: 12
(minimum 12 credits total)

- CS 111 - Programming Fundamentals II Credits: (4)
- CS 250 - Web Development Technologies I Credits: (4)
- CS 351 - Web Development Technologies II Credits: (4)
- ENG 310-Technical Writing Credits: (4)
- GEOG 485 - Topics in GIS or Remote Sensing Credits: (1-5)
- GEOG 490 - Cooperative Education Credits: (1-12) (May be taken for 1-6 credits)
- GEOG 494 - Applied GIS Project Credits: (2-6)
- GEOG 496 - Individual Study Credits: (1-6)
- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- Other computer science classes, with approval from the Geography Chair.

NOTE: GEOG 490 and GEOG 496 must employ a spatial technique and be approved by the Geography Chair.

Total Specialization Credits: 58-61
Total Credits: 83-86

College and Department Information
Geography Department
College of the Sciences

## Public Policy BS

Public policy is a science dedicated to study of the policies and laws implemented by governments to address the needs of contemporary society. The bachelor of science in public policy is an interdisciplinary program aimed at exploration and analysis of the historical legacies as well as the contemporary forces that frame the policy making process. Because the world is increasingly pluralistic, public policy at CWU is not freestanding and must be combined with another major, frequently economics, environmental studies, geography, public health, political science, or sociology (students combining public policy and geography, political science, public health, or sociology will receive a bachelor of science degree in public policy and a bachelor of arts degree in geography or political science, public health, or sociology).

Public Policy Core Credits: 34-36

- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)
- ECON 332 - Public Finance Credits: (5)
- ENST 202 - Environment and Society Credits: (5)
- OR GEOG 250 - Resource Exploitation and Conservation Credits: (4)
- IT 238 - Introduction to Cyberwarfare Credits: (4)
- OR SOC 459 - Organizations Credits: (5)
- PUBH 209 - Consumer Health Credits: (4)
- OR PUBH 250 - Introduction to Health Policy and Systems Credits: (3)
- POSC 320 - Public Administration Credits: (5)
- POSC 325 - Introduction to Public Policy Credits: (3)

Research Tool Elective Credits: 4-5
Select one from the following:

- BUS 221 - Introductory Business Statistics Credits: (5)
- GEOG 303 - GIS and Data Management Credits: (5)
- GEOG 409 - Quantitative Methods in Geography Credits: (5)
- LAJ 400 - Research Methods in Criminal Justice Credits: (4)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)
- SOC 364 - Data Analysis in Sociology Credits: (5)

Department-Approved Electives Credits: 12-15

Electives in economics, environmental studies, geography, information technology and management, law and justice, political science, public health, or sociology.

Total Credits: 50-56

College and Department Information

Geography Department
College of the Sciences

## Energy Studies Minor

Students interested in investigating energy issues are encouraged to pursue the following interdisciplinary minor which provides:

1. An introduction to the technical concepts and language relevant to energy.
2. An investigation of current and projected energy use patterns and their associated environmental conflicts.
3. A study of the legal, institutional and economic factors that influence energy policy.
With the approval of the director of energy studies, the student will select appropriate electives to meet personal and professional goals.

## Required Courses

- ENST 310 - Energy and Society Credits: (5)
- GEOG 442 - Alternative Energy Credits: (5)
- OR ETSC 442 - Alternative Energy Resources and Technology Credits: (5)
- GEOG 443 - Energy Policy Credits: (5)
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)

Select one from the following - Credits: 5

- ECON 101 - Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ETSC 101 - Modern Technology and Energy Credits: (5)

Select one from the following - Credits: 4-5

- CMGT 452 - LEED in Sustainable Construction Credits: (4)
- ECON 462 - Environmental and Resource Economics Credits: (5)
- SCED 301 - Interdisciplinary Science and Engineering Inquiry Credits: (5)

Select 2 credits of Cooperative Education - Credits: 2

- BIOL 490 - Cooperative Education Credits: (1-12)
- ENST 490 - Cooperative Education Credits: (1-12)
- GEOG 490 - Cooperative Education Credits: (1-12)
- ETSC 490 - Cooperative Education Credits: (1-12)

## Total Credits: 31-32

College and Department Information

Geography Department
College of the Sciences

## Geography Minor

All students who wish to minor in geography must:

1. Apply for acceptance into the geography minor;
2. Have a 2.25 minimum GPA in all coursework taken up to the time of admission;
3. Earn a C- or higher grade in each of the courses required for the minor.

Required Courses

- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 107 - Our Dynamic Earth Credits: (5)
- GEOG 208 - Our Human World Credits: (5)
- GEOG 250 - Resource Exploitation and Conservation Credits: (4)
- GEOG 301 - Introduction to GIS and Maps Credits: (4)
- Any upper-division geography courses Credits: (7)

Total Credits: 30

College and Department Information

Geography Department
College of the Sciences

## Geographic Information Systems (GIS) Certificate

The GIS certificate provides recognition for students completing the required number of GIS-related classes at a high level of competence (minimum average GPA of 2.7). Certification will provide students with a powerful tool to assist their future job searches.

## Required Courses Credits: 19

- GEOG 301 - Introduction to GIS and Maps Credits: (4)
- GEOG 303 - GIS and Data Management Credits: (5)
- GEOG 330 - Airphoto Interpretation Credits: (5)
- OR GEOG 411 - GIS Programming Credits: (5)
- GEOG 404 - GIS Analysis Credits: (5)
- GEOG 430 - Remote Sensing Credits: (5)

Department-Approved Electives Credits: 8

Choose from the following courses:

- CS 110 - Programming Fundamentals I Credits: (4)
- GEOG 330 - Airphoto Interpretation Credits: (5) (if not taken to fulfill core requirements)
- GEOG 409 - Quantitative Methods in Geography Credits: (5)
- GEOG 411 - GIS Programming Credits: (5) (if not taken to fulfill core requirements)
- GEOG 417 - Advanced GIS Credits: (4)
- GEOG 430 - Remote Sensing Credits: (5)
- GEOG 485 - Topics in GIS or Remote Sensing Credits: (1-5)
- GEOG 490 - Cooperative Education Credits: (1-12) (with a GIS focus)
- GEOG 494 - Applied GIS Project Credits: (2-6)
- GEOG 496 - Individual Study Credits: (1-6) (with a GIS focus)
(Individual study classes must have a GIS focus. Online classes may count toward 496 credit at a rate of 30 hours of online class work $=1$ credit.)
- Other Electives as approved by the director

Total Credits: 27

## Faculty and Staff Chair

Chris Mattinson, PhD

## Professors

Wendy A. Bohrson, PhD , volcanology, isotope geochemistry, igneous petrology
Lisa L. Ely, PhD, geomorphology, paleohydrology, and quaternary geology
Carey Gazis, PhD, environmental geochemistry, stable isotope geochemistry, and hydrogeology
Jeffrey Lee, PhD, active and regional tectonics, structural geology
Timothy I. Melbourne, PhD, seismology, continental dynamics

## Associate Professors

Anne Egger, PhD, Earth science education and structural geology
Audrey Huerta, PhD , geodynamics, climate, and mountain building
Susan Kaspari, PhD , climate and environmental variability and glaciochemistry
Chris Mattinson, PhD , metamorphic petrology, geochronology, tectonics

## Assistant Professors

Breanyn MacInnes, PhD, sedimentary geology, coastal geomorphology
Walter Szeliga, PhD, geophysics and GPS geodesy

## Faculty Research Associates

Beth Pratt-Sitaula, PhD, earth science education and geomorphology
Paul Winberry, PhD, glacier dynamics, seismology

## Lecturers

Keegan Fengler, MS, earthquakes
Winston Norrish, PhD, petroleum geology

## Emeritus Professors

Robert D. Bentley, PhD, structural geology, igneous and metamorphic petrology, regional geology of the Pacific Northwest
James Hinthorne, PhD, mineralogy, geochemistry, spatial information systems

## Staff

Rex Flake, tiltmeter engineer, PANGA network engineer and geologist
Angela Halfpenny, engineering technician
Moriah Kauer, fiscal specialist
V. Marcelo Santillan, scientific programmer and GPS data analyst
Craig Scrivner, systems analyst
Nick Zentner, geology outreach and education director

## Department Information

Geosciences encompass the scientific study of the origin and evolution of the earth. Energy, mineral and water resources, geologic hazards, pollution of natural waters, and earthquake prediction are just a few of the pressing societal concerns that are addressed by geoscientists. The geological sciences program has two major parts: (1) solid-earth geosciences, such as rocks, minerals, deformation, and tectonic evolution of the Earth's crust; and (2) Earth processes over the last 10,000 years, such as active faulting, environmental geochemistry, hydrogeology and
water resources, geologic hazards, seismology, surface processes, and volcanology. Field, laboratory, and computer skills are essential to the study of the geological sciences. Research in the geosciences is active and varied, with faculty and students interacting closely. BS and BA degrees are offered in geology and a BS degree in environmental geological sciences. A BA in Earth sciences is also offered and is intended for future secondary school teachers. Minors in geology and Earth sciences are also available to supplement careers in other fields.

Students who declare a major in geology must register with the department and work out a specific program of study with the chairperson or an assigned advisor. Course programs can be tailored to the student's needs and interests with the aid of an academic advisor. Other course requirements may be modified in cases where past performance indicates superior ability. Students must be evaluated for math placement upon declaration of the major with the goal of establishing proficiency at the MATH 154 level early in the major program.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/geology/ or by contacting the department directly.

## Geology Major, BA

The BA degree is designed for students preparing to incorporate geosciences into broader careers such as teaching, educational outreach, resource management, environmental planning, business, or law. It is the appropriate major for students seeking an endorsement in teaching high school Earth science. The BA degree may be an appropriate prerequisite for some graduate programs, but a BS is recommended for students who anticipate pursuing a graduate degree or career in the geological sciences.

The BA in Geology pairs well with minors or double majors in communication, computer science, energy studies, environmental studies, museum studies (anthropology), science education K-8, and any other study that requires fundamental scientific skills with an emphasis on communication.

## Teaching Endorsement

This major partially satisfies the criteria for a teaching endorsement in Earth Science (5-12), qualifying students to teach Earth science at the high school, middle, or junior high levels. Students who successfully complete the Geology BA and STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the geology/Earth science teaching advisor as soon as possible to develop a course of study.

## Environmental Geological Sciences Major, BS

This major in environmental geological sciences focuses on the interactions between solid Earth and the atmosphere and hydrosphere, including ground water, soils, and climate. The BS program builds on a solid foundation in allied sciences and math and prepares students for graduate school and a variety of careers in the environmental and geological sciences, including environmental consulting and water resources.

Required Courses Credits: (56)

College and Department Information
Geological Sciences Department
College of the Sciences
Geology Major, BS

The BS in geology prepares students for graduate school and careers in solid-earth geosciences and other scientific fields. The program includes required courses across the breadth of the geosciences and allows for focused study in Earth structure and tectonics, hazards and resources, Earth materials or climate and surface processes. The core required geoscience courses build on a solid foundation in allied sciences and math and culminate in a capstone field mapping experience, thus preparing students for graduate school and a variety of careers in the geosciences, including geotechnical consulting and in Washington. The BS degree is also appropriate for students who wish to continue in other quantitative scientific fields or directions (e.g., medical school).

Required Courses Credits: 52

- GEOL 101 - Introduction to Geology Credits: (4)
- OR GEOL 103 - Geology of Washington Credits: (4)
- OR GEOL 107 - Earth's Changing Surface Credits: (4)
- OR GEOL 108 - Earth and Energy Resources Credits: (4)
- OR SCED 102 - Integrated Earth and Space Science Credits: (5)
- GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOL 200 - Earth's Evolution and Global Change Credits: (5)
- GEOL 210 - Introduction to Geologic Field Methods Credits: (4)
- GEOL 305 - Quantitative Reasoning for Geoscientists Credits: (4)
- GEOL 320 - Rocks and Minerals Credits: (5)
- GEOL 346 - Mineralogy Credits: (5)
- GEOL 360 - Structural Geology Credits: (5)
- GEOL 370 - Sedimentology and Stratigraphy Credits: (5)
- GEOL 384 - Ocean, Atmosphere and Climate Interactions Credits: (4)
- GEOL 487 - End-of-major Review Seminar Credits: (1)
- GEOL 489 - Geologic Field Methods Credits: (6-12)

Department-Approved Electives Credits: 17-20
Select at least four department-approved electives that total at least 17 credits. The groups of courses shown below are meant to offer guidance to students who wish to specialize in a subdiscipline or take courses across the breadth of the geological sciences. Up to 4 credits of department-approved seminars and research may count towards elective units as well.

Climate and Surface Processes

- GEOL 377 - Regional Natural History Credits: (2)
- AND GEOL 377LAB - Regional Natural History Credits: (3)
- GEOL 386-Geomorphology Credits: (5)
- GEOL 423 - The Cryosphere Credits: (5)
- GEOL 441 - Climate Variability and Climate Change Credits: (5)
- GEOL 474 - Quaternary Geology Credits: (4)

Earth Materials

- GEOL 475 - Petrography and Petrogenesis Credits: (5)
- GEOL 476 - Advanced Sedimentology Credits: (4)
- GEOL 478 - Volcanology Credits: (5)

## Geology Minor

The geology minor allows students to pursue their interests within the department's course offerings and can be combined with virtually and other major. It may be particularly useful for students in anthropology, biology, chemistry, computer science, economics, geography, history, physics, or science education.

Required Courses ( 15 credits)

- GEOL 101 - Introduction to Geology Credits: (4)
- OR GEOL 103 - Geology of Washington Credits: (4)
- OR GEOL 107 - Earth's Changing Surface Credits: (4)
- OR GEOL 108 - Earth and Energy Resources Credits: (4)
- OR SCED 102 - Integrated Earth and Space Science Credits: (5)
- GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOL 200 - Earth's Evolution and Global Change Credits: (5)
- GEOL 320 - Rocks and Minerals Credits: (5)

Elective Courses (18-20 credits)
Select a set of department-approved electives in geological sciences that total 18-20 credits.

Total Credits: 33-35

Nicole Stendell-Hollis, PhD, MS, RDN, obesity, nutrition and chronic disease

## Staff

Bryan Contreras, MS, instructional classroom support technician- clinical physiology and exercise science Lucinda Engel, instructional classroom support technician- food science
Vacant, Program Coordinator, EMS-Paramedicine
Jan Clark, secretary supervisor

## Department Information

The Department of Nutrition, Exercise, and Health Sciences
prepares students in a variety of professions that focus on the physical and functional abilities of humans. Human functioning is the overriding theme of all curricula offerings. In addition to didactic aspects, many classes provide experiential learning through structured laboratories, practicums, and internships. All programs provide opportunities to interact with faculty and to participate in both undergraduate and graduate research.

## Health Sciences offers the following undergraduate degrees:

Bachelor of Science: Clinical Physiology
Bachelor of Science: Exercise Science
Bachelor of Science: FSN-Dietetics Specialization
Bachelor of Science: FSN-Foods and Nutrition Specialization

## Bachelor of Science: Paramedicine

Public Health Major - Community Health Specialization
Public Health Major - Pre-nursing in Public Health
Specialization
Public Health - Community Health Education Minor
Health Sciences offers the following supporting minors:
Exercise Science
Athletic Training
Nutrition
Food Service Management

## Health Sciences offers the following certificate programs:

## Paramedic

Emergency Medical Technician
Dietetic Internship (Accredited by the Academy of Nutrition and Dietetics Accreditation Council for Education in Nutrition and Dietetics (ACEND)

Health Sciences offers the following graduate degrees - (For details: See Graduate Studies and Research section)
Master of Science: Exercise Science
Master of Science: Nutrition

## Admission Requirements

To be admitted to a major or minor, all students must:

- Meet with an advisor in the specific program of interest. Because of the variety of options and the preadmission requirements of programs, it is advisable to meet with an advisor early to plan the program schedule and to facilitate timely graduation.
- Complete specific pre-admission requirements (see individual programs).
- Complete and file a major application with the department office, signed by the academic advisor and the program director. Application forms can be obtained from the advisor or the department office.
- Complete and file with the department office, a program of study that lists the required and elective courses necessary for program completion. Course of study forms can be obtained from the academic advisor.

## Student Scholarly Activities:

The department is student oriented and all programs provide a wide range of laboratory and field experiences as part of specific degree requirements and degree options. Students who engage early in optional learning experiences gain a better understanding of their profession, are more competitive in the
job market, and increase their chances for graduate school admission.

## Student Organizations:

Exercise Science Club: All EXSC students are required to join the EXSC Club. This student-run organization meets regularly to discuss academic planning and career opportunities, performs service activities, and plans recreational outings.

Nutrition Science Club: The NSC provides opportunities for students to use their knowledge and skills in performing service activities, learn about career opportunities, discuss academic planning, and engage in recreational activities.

EMT Club: The EMT Club is a student organization that is purposed to provide basic life support services to on-campus activities as a means of first-line-response. The EMT Club is comprised of current students that are certified emergency medical technicians. The EMT Club is supervised by a faculty member of the Paramedic Program and is provided the necessary emergency medical equipment and continuing education to provide essential emergency medical services.

## Fees:

Additional fees are assessed for many of the department's laboratory and field experience courses. These fees are used to partially support materials purchased and transportation costs.

## Graduation Requirements

- Satisfactory completion of all requirements of the university and of the specific degree program of study.
- Application for the bachelor's degree must be filed by the second Friday of the quarter preceding the quarter in which the degree is to be received. Instructions and deadlines are available through Registrar Services.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/health-science or by contacting the department directly.

## Clinical Physiology Major, BS

## Program Director

Vincent M. Nethery, PhD

## Faculty

Timothy Burnham PhD
Leonardo D'Acquisto, EdD
James DePaepe, PhD
Eric Foch, PhD
Vincent Nethery, PhD
Kelly Pritchett, PhD, RDN
Robert Pritchett, PhD
Karen Roemer, PhD
The bachelor of science - clinical physiology specifically
prepares students to enter graduate or specialized postbaccalaureate professional programs in critical high-demand, health-care arenas including physical and occupational therapy, physicians' assistants, cardiopulmonary rehabilitation, sports medicine-athletic training, chiropractic medicine, and others. This degree also prepares students for advanced graduate study in integrated human and exercise physiology. Most clinical health-care professions require education beyond the bachelor degree level. Additional courses may be needed to satisfy all prerequisites for admission eligibility to some graduate and professional programs.

## A grade of $\mathbf{C}$ or higher is required in all pre-admission,

 required courses, and elective courses in this major.Pre-admission Requirements

- CHEM 111 - Introduction to Chemistry Credits: (4)
- CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- OR CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
AND
- CHEM 112 - Introduction to Organic Chemistry Credits: (4)
- CHEM 112LAB - Introduction to Organic Chemistry Laboratory Credits: (1)
- OR CHEM 182-General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
AND
- CHEM 113 - Introduction to Biochemistry Credits: (4)
- CHEM 113LAB - Introduction to Biochemistry Laboratory Credits: (1)
- OR CHEM 183-General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)
AND
- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- OR PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- OR PHYS 181 - General Physics I with Laboratory Credits: (5)

Pre-admission Total Credits: 20

Required Courses

- BIOL 305 - Human Anatomy and Physiology for Health-Related Majors I Credits: (5)
- BIOL 306 - Human Anatomy and Physiology for Health-Related Majors II Credits: (5)
- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EXSC 353 - Physical and Orthopedic Assessment Credits: (4)
- EXSC 370 - Biomechanics Credits: (5)
- EXSC 450 - Physiology of Exercise Credits: (4)
- EXSC 450LAB - Physiology of Exercise Laboratory Credits: (1)
- EXSC 456 - Clinical Physiology Credits: (5)
- EXSC 470 - Clinical Biomechanics Credits: (3)
- EXSC 493 - Clinical Field Experience Credits: (1-15) (minimum of 12 credits)
- EXSC 495B - Practicum: Clinical Credits: (2)

## Total Required Courses Credits: 56

Choose from the following electives:

- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 323 - Microbiology Credits: (5)
- BIOL 353 - Integrative Anatomy Credits: (6)
- EMS 443 - Myocardial Disease and Basic Electrocardiography Credits: (4)
- EMS 444 - Twelve-lead Electrocardiography Credits: (4)
- EXSC 438 - Therapeutic Exercise Credits: (3)
- EXSC 446 - Sports Nutrition Credits: (3)
- EXSC 452 - Therapeutic Modalities Credits: (3)
- NUTR 433 - Macronutrients Credits: (3)
- NUTR 443 - Metabolism and Micronutrients Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113 - Introductory Physics III with Laboratory Credits: (5)
- PHYS 122 - Introductory Physics for Life Sciences II Credits: (5)
- PHYS 123 - Introductory Physics for Life Sciences III Credits: (5)
- PHYS 182-General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)
- PSY 313 - Developmental Psychology Credits: (4)
- PSY 314 - Human Development and the Learner Credits: (4)
- PSY 362 - Introductory Statistics Credits: (5)
- PSY 421 - Human Neuroanatomy Credits: (4)
- PSY 449 - Abnormal Psychology Credits: (4)
- PSY 478 - Behavioral Neuroscience Credits: (4)

Total Elective Credits: 24

Total Credits: 100

# EMS Paramedicine Major, BS 

## Program Director

Keith A. Monosky, PhD, MPM, EMT-P
Medical Program Director
Jackson Horsley, MD

## Program Coordinator

Vickie Ostrow

## Faculty

Robert Carlson, BA, EMT-P
Steve Chrisman, MS, EMT-P
Rich Elliot, MBA, EMT
Liesl Jones
Dan Limmer, NREMT-P
Keith A. Monosky, PhD, MPM, EMT-P
James Pierce, EMT-P
Lenny Ugaitafa, BS, EMT-P
The EMS paramedicine major is designed for students who plan to become a certified pre-hospital professional in emergency medical services. The paramedicine major provides the graduate with the requisite skill sets for entry-level competence in advanced life support emergency medical services, as well as superior skills in advanced life support and leadership abilities in emergency medical services.

The delivery format includes classroom lectures, group discussions, laboratory skills training, hospital clinical experience with observations and practice, field internships, educational internships, administrative internships, pre-hospital research, and simulated scenario-based exercises of complex patient condition which willfully prepare the student for occupations in advanced emergency medical services. This nationally-accredited program meets all of the national curriculum and Washington State standards.

In addition to general admissions, all applicants must meet specific entrance criteria (including a current EMT certification) and be approved by the paramedic selection committee before being admitted into the program. Admission to CWU does not assure entry into the paramedicine major.

Advanced Standing is an option for currently certified and practicing paramedics to earn their Bachelor of Science degree and EMS Paramedicine. This option is made available only for currently certified paramedics that received their education from accredited institutions and that reside in a state that participates in online instruction with Washington state.

Upon acceptance into the Advanced Standing status of the online EMS Paramedicine program, the student shall be awarded up to 44 credits in experiential learning in the major. The explanation of requirements and the substitution of major courses are listed at www.cwu.edu/health-science/paramedicine.

Completion of the major listed below and other degree requirements leads to the bachelor of science in paramedicine and eligibility to take the National Registry EMTs examination for paramedic certification. For students not seeking a degree, a certification option is available.

Required Courses for Entry:

- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EMS 440-Medical Mathematics and Terminology Credits: (2)

Required Courses

- EMS 335 - Paramedicine I Credits: (4)
- EMS 335LAB - Advanced Clinical Practice I Credits: (2)
- EMS 336 - Paramedicine II Credits: (4)
- EMS 336LAB - Advanced Clinical Practice II Credits: (2)
- EMS 337 - Paramedicine III Credits: (3)
- EMS 337LAB - Advanced Clinical Practice III Credits: (2)
- EMS 350-Paramedicine Instructional Methodologies Credits: (2)
- EMS 430 - Problem-Based Learning I Credits: (4)
- EMS 431 - Problem-based Learning II Credits: (4)
- EMS 441-General Pharmacology for Paramedics Credits: (3)
- EMS 443 - Myocardial Disease and Basic Electrocardiography Credits: (4)
- EMS 444 - Twelve-lead Electrocardiography Credits: (4)
- EMS 451 - Advanced Trauma Care Credits: (3)
- EMS 455 - Introduction to Pathophysiology Credits: (3)
- EMS 459 - Emergencies in Pediatric/Geriatric Care Credits: (3)
- EMS 460 - Research in EMS I Credits: (3)
- EMS 461 - Research in EMS II Credits: (3)
- EMS 465 - Educational Methodologies in EMS Credits: (3)
- EMS 470 - Current Topics in Emergency Medicine Credits: (3)
- EMS 475 - EMS Response to Terrorism Credits: (3)
- EMS 480 - Financial Analysis of EMS Systems Credits: (3)
- EMS 481- Quality Improvement and Administration of EMS Credits: (3)
- EMS 482 - Systems Analysis of EMS Credits: (4)
- EMS 485 - Strategic Planning for EMS Credits: (3)
- EMS 488 - Health Policy in EMS Credits: (3)
- EMS 489 - Leadership in EMS Credits: (3)
- EMS 493A - Paramedicine Internship I Credits: (3)
- EMS 493B - Paramedicine Internship II Credits: (4)
- EMS 493C - Paramedicine Internship III Credits: (5)

## Total Credits: 105

Karen Roemer, PhD
The Bachelor of Science in Exercise Science prepares students to enter career areas that guide healthy human functioning across the general health to athletic performance spectrum. Potential employment encompasses corporate health-wellness programs, private health-fitness organizations, nonprofit/community activity centers, institutional recreation centers, athlete identification and development programs, personal training, and specialty strength and conditioning coaching.

## Grade Requirement

A grade of " C " or higher is required for all courses in major and minor programs.

Required Courses Credits: 68

- BIOL 201 - Human Physiology Credits: (5)
- EXSC 254 - Foundations of Fitness Credits: (3)
- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EXSC 352 - Assessment and Treatment of Athletic Injuries Credits: (4)
- EXSC 371 - Movement Analysis Credits: (5)
- EXSC 446 - Sports Nutrition Credits: (3)
- EXSC 450 - Physiology of Exercise Credits: (4)
- EXSC 450LAB - Physiology of Exercise Laboratory Credits: (1)
- EXSC 455 - Fitness Assessment and Exercise Prescription Credits: (4)
- EXSC 455LAB - Fitness Assessment and Exercise Prescription Laboratory Credits: (1)
- EXSC 471 - Sports Biomechanics Credits: (3)
- EXSC 480 - Science of Resistance Exercise Credits: (4)
- EXSC 490 - Cooperative Education Credits: (1-12) (Must be taken for 12 credits)
- EXSC 495A - Practicum: Fitness Centers/Clubs Credits: (2)
- OR EXSC 495C - Practicum: Management Credits: (2)
- EXSC 495D - Practicum: Laboratory Assessment Credits: (2)
- NUTR 101 - Introduction to Human Nutrition Credits: (5)

Department-Approved Electives Credits: 28

- BUS 401 - Business Boot Camp Credits: (1)
- COM 345 - Business and Professional Speaking Credits: (4)
- MGT 380-Organizational Management Credits: (5)
- MGT 394 - Legal Considerations in Sport Business Credits: (5)
- MGT 395 - Leadership in Business Organizations Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- MKT 370 - Sports Marketing and Sponsorship Credits: (5)
- MKT 371 - Sponsorship and Promotion in Sport Business Credits: (5)
- MKT 372 - Revenue Generation and Finance in Sport Business Credits: (5)
- NUTR 350 - Weight Management Credits: (3)
- PSY 401 - Psychology of Sport Credits: (4)

Total Credits: 96

## Food Science and Nutrition BS, Dietetics Specialization

Food Science and Nutrition Core

## Program Director

David Gee, PhD

## Faculty

Ethan Bergman, PhD, RDN
David Gee, PhD
Susan Hawk, PhD, RDN
Dana Ogan, MS, RDN, CD
Kelly Pritchett, PhD, RDN, CSSD
Nicole Stendell-Hollis, PhD, RDN
The bachelor of science in food science and nutrition prepares students for employment or advanced study in one of several professions in the broad area of foods and nutrition. To complete degree requirements, students must complete the required core courses listed below. Students must also complete courses listed in their chosen specialization (foods and nutrition, dietetics, nutrition science).

## Admission Requirements

Students wishing to attain full admission to the BS in food science and nutrition major must meet the following requirements:

- Successful completion of NUTR 101, Introduction to Human Nutrition, NUTR 240, Introduction to Foods and NUTR 240LAB, Introduction to Foods Laboratory with a grade of $B(3.0)$ or higher.
- Students must receive a grade of $C(2.0)$ or higher in all of the other major courses.
In addition to the requirements listed above, students wishing to enter any of the food science and nutrition specializations must successfully complete CHEM 111, Introduction to Chemistry, CHEM 111LAB, Chemistry Laboratory or CHEM 181, General Chemistry I and CHEM 181LAB, General Chemistry
Laboratory I, and MATH 100C, Intermediate Algebra, or their equivalents, before being admitted to the major. Students must consult with a major advisor for approval of the program specialization.

Students are highly encouraged to complete at least five credits of NUTR 490, Cooperative Education.

Core Requirements

- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- NUTR 240 - Introduction to Foods Credits: (2)
- NUTR 240LAB - Introduction to Foods Laboratory Credits: (2)
- NUTR 344 - Medical Nutrition Therapy I Credits: (3)
- NUTR 345 - Nutrition and the Lifecycle Credits: (5)
- NUTR 350 - Weight Management Credits: (3)
- NUTR 447 - Community Nutrition Credits: (3)

Select either:

- EDCS 312 - Educational Statistics Credits: (4)
- OR PSY 362 - Introductory Statistics Credits: (5)

Total Core Credits: 27-28
Dietetics Specialization

The dietetics specialization is a program accredited by the Accreditation Council Education in Nutrition and Dietetics (ACEND). In addition to those classes required for the Dietetics Specialization, ANTH 130 and PSY 101 are required to meet the knowledge requirements set forth by ACEND, 120 South Riverside Plaza Ste. 2000, Chicago, IL 60606-6995, 312-8990040, ext, 5400). ACEND is a specialized accrediting body recognized by the Council on Post-Secondary Accreditation and the United States Department of Education. Completion of this program qualifies the student to apply for admission to an ACEND accredited Supervised Practice Experience, also known as a dietetic internship. Following this the student is eligible to sit for the registration examination. Passing the registration exam qualifies the graduate to become a registered dietitian nutritionist (RDN).

Prior to being admitted into the dietetics specialization, students shall apply to the BS in food science and nutrition major with a specialization in foods and nutrition and must then complete the core requirements plus the following courses:

- BIOL 201 - Human Physiology Credits: (5)
- CHEM 111 - Introduction to Chemistry Credits: (4)
- AND CHEM 111LAB - Introductory Chemistry Laboratory Credits: (1)
- OR CHEM 181 - General Chemistry I Credits: (4)
- AND CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 112 - Introduction to Organic Chemistry Credits: (4)
- CHEM 112LAB - Introduction to Organic Chemistry Laboratory Credits: (1)
- CHEM 113 - Introduction to Biochemistry Credits: (4)
- CHEM 113LAB - Introduction to Biochemistry Laboratory Credits: (1)
- NUTR 343 - Foods and Nutrition Professionalism Credits: (1)

Total Pre-Specialization Requirement Credits: 21
Additional Courses

In addition to successfully completing all of the prespecialization courses, applicants to this specialization must have CWU/Transfer combined GPA of at least 3.0 at the time of application and a GPA in all of the pre-major classes of 3.0. Students planning on entering the dietetics specialization are encouraged to declare their major in the BS food science and nutrition with a foods and nutrition specialization as early in their studies as possible so that they may be assigned a major advisor and receive proper advising in this field.

- BIOL 220 - Introductory Cell Biology Credits: (5)
- BIOL 322 - Introductory Microbiology Credits: (5)
- OR BIOL 323 - Microbiology Credits: (5)
- NUTR 340 - Management of Food Resources Credits: (2)
- NUTR 340LAB - Management of Food Resources Laboratory Credits: (1)
- NUTR 342 - Quantity Food Production and Service Credits: (4)
- NUTR 342LAB - Quantity Food Production and Service Laboratory Credits: (1)
- NUTR 347 - Nutrition Education and Counseling Credits: (4)
- NUTR 433 - Macronutrients Credits: (3)
- NUTR 440 - Experimental Foods Credits: (2)
- NUTR 440LAB - Experimental Foods Laboratory Credits: (1)
- NUTR 442 - Nutrition Assessment Laboratory Credits: (2)
- NUTR 443 - Metabolism and Micronutrients Credits: (5)
- NUTR 444 - Medical Nutrition Therapy II Credits: (3)
- NUTR 445 - Experimental Food Research Credits: (1)
- NUTR 445LAB - Experimental Food Research Laboratory Credits: (1)
- NUTR 446 - Sports Nutrition Credits: (3)
- NUTR 448 - Food Service Systems Management Credits: (4)

Total Additional Course Credits: 47

Total Credits: 95-96

Additional Information

Students wishing to apply for admission into an ACENDaccredited dietetic internship must be successfully admitted to the Dietetics Specialization, complete the major requirements plus the following two courses: ANTH 130, Introduction to Cultural Anthropology (5) OR ANTH 357, Medical Anthropology: Cross-Cultural Perspectives on Health and Healing (4), and PSY 101, General Psychology (5). These courses may also meet breadth requirements at Central Washington University.

The requirement for CHEM 111, 111LAB, Introduction to Chemistry and Laboratory, may be met by satisfactorily completing CHEM 181, 181LAB, 182, 182LAB, and 183, 183LAB General Chemistry and Laboratory. The requirement for CHEM 112, 112LAB, Introduction to Organic Chemistry and Laboratory, may be met by satisfactorily completing CHEM 361, 361LAB, 362, and 363 Organic Chemistry and Laboratory. The requirement for CHEM 113, 113LAB, Introduction to Biochemistry, may be met by satisfactorily completing CHEM 431, 431LAB and 432, Biochemistry and Laboratory. The requirement for BIOL 201, Human Physiology, may be met by satisfactorily completing BIOL 355, 356, Human Anatomy and Physiology. Students interested in applying to nursing programs following the completion of this degree should take BIOL 355 and BIOL 356 instead of BIOL 201.

Select either:

- EDCS 312 - Educational Statistics Credits: (4)
- OR PSY 362 - Introductory Statistics Credits: (5)

Total Core Credits: 27-28

Foods and Nutrition Specialization
The foods and nutrition specialization prepares students for a wide variety of careers in the food and nutrition industry including food processing companies (quality assurance and product development positions), food distributors, food brokerage companies, restaurant and institutional food service, pharmaceutical sales, and nutrition positions not requiring being a registered dietitian. It is highly recommended that students discuss possible minors with their academic advisor that would complement this specialization and enhance employment opportunities. Possible minors include food service management, exercise science, community health education, business, and administrative management. Students interested in applying to nursing programs following the completion of this degree are recommended to take BIOL 355 and BIOL 356, Human Anatomy and Physiology, instead of BIOL 201, Human Physiology and BIOL 220, Introductory Cell Biology, plus BIOL 322, Introductory Microbiology.

## Required Courses

# Public Health BS, Population Health Specialization 

Public Health Core

## Program Director

Rebecca Pearson, PhD, MPH

## Program Information

The public health profession focuses on preventing disease, addressing inequities and developing policies and programs that help communities achieve optimal health and well-being. Our program aims to educate and empower the emerging generation of public health leaders. The Bachelor of Science in Public Health prepares students for graduate work or careers in the field and exposes them to evidence-based research and practice experiences.

## Admission Requirements

To be admitted to the public health program a student must meet with and be signed in by a member of the public health faculty.

## Graduation Requirements

Students seeking the Bachelor of Science in Public Health must earn a grade of C or higher in all core public health courses.

## Program Requirements

Public health majors will complete the core coursework and select a specialization in either Population Health or PreNursing. All majors are also required to complete a 400 -hour internship experience.

Special Requirements (other than departmental)
ENG 101 and ENG 102 must be completed prior to enrollment in PUBH 240.

## Public Health Core Requirements

- PUBH 230 - Foundations of Public Health Credits: (3)
- PUBH 240 - Writing in Public Health Credits: (3)
- PUBH 250 - Introduction to Health Policy and Systems Credits: (3)
- PUBH 310 - Community Health Credits: (3)
- PUBH 311 - Cross Cultural Practices for Health and Medicine Credits: (4)
- PUBH 317 - Global Health Issues and Solutions Credits: (4)
- PUBH 320 - Environmental Health Credits: (4)
- PUBH 324 - Infectious and Non-infectious Disease Credits: (4)
- PUBH 375 - Theories of Health Behavior Credits: (4)
- PUBH 380 - Epidemiology Credits: (4)
- PUBH 422 - Community Health Promotion and Education Credits: (4)
- PUBH 445 - Professionalism in Public Health Credits: (1)
- PUBH 460 - Public Health Ethics Credits: (3)
- PUBH 470 - Population Health Assessment and Research Credits: (5)
- PUBH 471 - Program Planning Credits: (4)
- PUBH 472 - Program Implementation and Evaluation Credits: (4)
- PUBH 490 - Cooperative Education Credits: (1-12) (Must be taken for 10 credits)

Total Core Credits: 67
Population Health Specialization

Population health represents the area of study and practice focusing on the determinants and distribution of health across different groups of individuals. Understanding issues and situations that harm people's potential for health, well-being, and quality of life enables public health professionals to develop effective strategies to improve outcomes. The population health specialization prepares students for graduate study or career work with a variety of populations through diverse course offerings.

Department-Approved Specialization Electives

## Students must complete a minimum of 23 credits from the following list of electives:

(Students may also seek advisor approved electives outside of this list)

- HED 210 - Drugs and Health Credits: (3)
- HED 387 - Principles of Fitness and Stress Management Credits: (3)
- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- NUTR 318 - The Politics of Food and Health Credits: (3)
- OR PUBH 318 - The Politics of Food and Health Credits: (3)
- PUBH 209 - Consumer Health Credits: (4)
- PUBH 351 - Community Building Strategies for Public Health Credits: (4)
- PUBH 370 - Contemporary Issues in Public Health Credits: (4)
- PUBH 409-Community Mental Health Issues and Strategies Credits: (3)
- PUBH 412 - Aging and Public Health Credits: (3)
- PUBH 413 - Health Disparities in Rural and Frontier Communities Credits: (3)
- PUBH 420 - Women's Health Issues Credits: (4)
- PUBH 424 - Maternal and Child Health Credits: (3)
- PUBH 440 - Public Health Communication Credits: (3)
- PUBH 448 - Sexual Health Credits: (4)
- PUBH 465 - Undergraduate Research Preparation for Public Health Credits: (2)
- PUBH 475-Community Health Administration Credits: (3)
- PUBH 479 - Senior Seminar in Public Health Credits: (1)
- PUBH 480 - Grant Seeking and Administration in Public Health Credits: (3)

# Public Health BS, Pre-Nursing Specialization 

Public Health Core

## Program Director

Rebecca Pearson, PhD, MPH

## Program Information

The public health profession focuses on preventing disease, addressing inequities and developing policies and programs that help communities achieve optimal health and well-being. Our program aims to educate and empower the emerging generation of public health leaders. The Bachelor of Science in Public Health prepares students for graduate work or careers in the field and exposes them to evidence-based research and practice experiences.

## Admission Requirements

To be admitted to the public health program a student must meet with and be signed in by a member of the public health faculty.

## Graduation Requirements

Students seeking the Bachelor of Science in Public Health must earn a grade of C or higher in all core public health courses.

## Program Requirements

Public health majors will complete the core coursework and select a specialization in either Population Health or PreNursing. All majors are also required to complete a 400 -hour internship experience.

## Special Requirements (other than departmental)

ENG 101 and ENG 102 must be completed prior to enrollment in PUBH 240.

Public Health Core Requirements

- PUBH 230 - Foundations of Public Health Credits: (3)
- PUBH 240 - Writing in Public Health Credits: (3)
- PUBH 250 - Introduction to Health Policy and Systems Credits: (3)
- PUBH 310 - Community Health Credits: (3)
- PUBH 311 - Cross Cultural Practices for Health and Medicine Credits: (4)
- PUBH 317-Global Health Issues and Solutions Credits: (4)
- PUBH 320 - Environmental Health Credits: (4)
- PUBH 324 - Infectious and Non-infectious Disease Credits: (4)
- PUBH 375 - Theories of Health Behavior Credits: (4)
- PUBH 380 - Epidemiology Credits: (4)
- PUBH 422 - Community Health Promotion and Education Credits: (4)
- PUBH 445 - Professionalism in Public Health Credits: (1)
- PUBH 460 - Public Health Ethics Credits: (3)
- PUBH 470 - Population Health Assessment and Research Credits: (5)
- PUBH 471 - Program Planning Credits: (4)
- PUBH 472-Program Implementation and Evaluation Credits: (4)
- PUBH 490 - Cooperative Education Credits: (1-12) (Must be taken for 10 credits)

Total Core Credits: 67

Pre-Nursing Specialization
The pre-nursing specialization allows future professionals to enter nursing school with a solid background in public health theory and practice. CWU does not offer a degree program in nursing, but offers prerequisite courses suited for admission to professional nursing programs available across Washington.

IMPORTANT: Students MUST take responsibility for understanding current requirements of their chosen nursing program before applying to it. It is recommended and expected that students considering nursing careers will contact advisors at nursing programs of interest and ensure their own readiness for admission. Please note that CHEM 111 and CHEM 111LAB are pre-requisites for CHEM 112; students must seek information from specific departments regarding scheduling of these and other science courses. Note too that PSY 101 is a prerequisite for PSY 313; students pursuing the pre-nursing specialization are responsible for understanding requirements for enrollment in specific courses. Students choosing the pre-nursing specialization should take CHEM 111 and CHEM 111LAB at their earliest opportunity; additionally, students choosing the pre-nursing specialization are advised to choose PSY 101 as a
general education fulfillment, given that it is a prerequisite for PSY 313.

Specialization Required Courses

- BIOL 220 - Introductory Cell Biology Credits: (5)
- BIOL 322 - Introductory Microbiology Credits: (5)
- BIOL 355 - Human Anatomy and Physiology I Credits: (5)
- BIOL 356 - Human Anatomy and Physiology II Credits: (5)
- CHEM 112 - Introduction to Organic Chemistry Credits: (4)
- CHEM 112LAB - Introduction to Organic Chemistry Laboratory Credits: (1)
- CHEM 113 - Introduction to Biochemistry Credits: (4)
- CHEM 113LAB - Introduction to Biochemistry Laboratory Credits: (1)
- PSY 313 - Developmental Psychology Credits: (4)
- PSY 362 - Introductory Statistics Credits: (5) NOTE: CHEM 111 and CHEM 111LAB are prerequisites for CHEM 112; PSY 101 is a prerequisite for PSY 313; thus, 10 additional credits beyond those in the major itself are required for students pursuing this specialization.

Total Required Specialization Credits: 49

Total Credits: 116

College and Department Information

Health Sciences Department
College of Education and Professional Studies

## Exercise Science Minor

This minor is designed primarily for those individuals who major in disciplines such as nutrition, biology, physical education, public health, and business. Courses in this minor may also be used to satisfy requirements in other major programs. For information, please contact Tim Burnham, tim.burnham@cwu.edu.

Required Courses Credits: 20

- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EXSC 371 - Movement Analysis Credits: (5)
- EXSC 450 - Physiology of Exercise Credits: (4)
- EXSC 450LAB - Physiology of Exercise Laboratory Credits: (1)

Select from two of the following: Credits: 4-8

- EXSC 446 - Sports Nutrition Credits: (3)
- EXSC 455 - Fitness Assessment and Exercise Prescription Credits: (4)
- EXSC 455LAB - Fitness Assessment and Exercise Prescription Laboratory Credits: (1)
- EXSC 471 - Sports Biomechanics Credits: (3)
- PSY 401 - Psychology of Sport Credits: (4)

Total Credits: 24-28

College and Department Information

Health Sciences Department
College of Education and Professional Studies

## Food Service Management Minor

This minor is designed primarily for students earning degrees in business administration or in tourism management that will allow them better access to careers in food service management. Courses in this 26- to 27 -credit minor may also be used to satisfy requirements in other major programs. This minor may not be used for students earning a BS degree in food science and nutrition or a BAS in food service management.

Required Courses: Credits (22)

- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- NUTR 240 - Introduction to Foods Credits: (2)
- NUTR 340 - Management of Food Resources Credits: (2)
- NUTR 342 - Quantity Food Production and Service Credits: (4)
- NUTR 448 - Food Service Systems Management Credits: (4)
- NUTR 490 - Cooperative Education Credits: (1-12) (Must be taken for at least 5 credits)

Department-approved electives Credits (4-5)

- MGT 380- Organizational Management Credits: (5)
- NUTR 240LAB - Introduction to Foods Laboratory Credits: (2)
- NUTR 340LAB - Management of Food Resources Laboratory Credits: (1)
- NUTR 342LAB - Quantity Food Production and Service Laboratory Credits: (1)
- NUTR 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits)

Total Credits: 26-27

College and Department Information

Health Sciences Department
College of Education and Professional Studies

## Nutrition Minor

This program is designed primarily for those individuals in other majors who desire a more in-depth study of nutrition. This program is intended for students in majors such as exercise science, family studies, physical and health education, and public health. This minor may also be of interest for students in pre-professional programs including pre-medicine, pre-dentistry, pre-veterinary, and pre-physical therapy. Courses in this minor may also be used to satisfy requirements in other major programs.

Students wishing to attain full admission to the minor must meet the following requirements: Successful completion of NUTR 101 - Introduction to Human Nutrition, NUTR 240 -
Introduction to Foods, and NUTR 240LAB- Introduction to Foods Laboratory with a grade of B (3.0) or higher. Students must receive a grade of $\mathrm{C}(2.0)$ or higher in all other minor courses.

## Required Courses

- NUTR 101 - Introduction to Human Nutrition Credits: (5)
- NUTR 240 - Introduction to Foods Credits: (2)
- NUTR 240LAB - Introduction to Foods Laboratory Credits: (2)
- NUTR 340 - Management of Food Resources Credits: (2)
- NUTR 340LAB - Management of Food Resources Laboratory Credits: (1)
- NUTR 345 - Nutrition and the Lifecycle Credits: (5)
- NUTR 350 - Weight Management Credits: (3)

Department-approved Electives - Credits: (3-5)

- NUTR 436 - Theory and Treatment of Eating Disorders Credits: (3)
- NUTR 347 - Nutrition Education and Counseling Credits: (4)
- NUTR 446 - Sports Nutrition Credits: (3)
- NUTR 447 - Community Nutrition Credits: (3)
- NUTR 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits)

Total Credits: 23-25

College and Department Information

Health Sciences Department
College of Education and Professional Studies

## Physical-Rehabilitation Therapy Minor

The minor provides knowledge and skills related to physicalrehabilitative therapies: however, additional course work in
specialized programs is required to obtain certification and licensure in order to practice. Students interested in becoming certified and licensed should contact the professional associations of interest for additional information. This minor may be of interest for students in a wide variety of preprofessional healthcare programs. Courses in this minor may also be used to satisfy requirements in other major programs. For information, please contact Vince Nethery, netheryv@cwu.edu.

Required Courses (a grade of C or higher is required in all courses in this minor)

- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EXSC 352 - Assessment and Treatment of Athletic Injuries Credits: (4)
- EXSC 353 - Physical and Orthopedic Assessment Credits: (4)
- EXSC 370 - Biomechanics Credits: (5)
- EXSC 438 - Therapeutic Exercise Credits: (3)
- EXSC 446 - Sports Nutrition Credits: (3)
- EXSC 450 - Physiology of Exercise Credits: (4)
- EXSC 450LAB - Physiology of Exercise Laboratory Credits: (1)
- EXSC 452 - Therapeutic Modalities Credits: (3)
- EXSC 470 - Clinical Biomechanics Credits: (3)

Total Credits: 40

College and Department Information

Health Sciences Department
College of Education and Professional Studies

## Public Health Minor

The minor in public health is an excellent supporting option for individuals interested in the health and human services fields. Students will gain insight into public health settings, approaches, and processes. Students from a wide variety of majors may find a public health minor useful. A public health minor may be particularly well suited for students studying communication, economics, law and justice, nutrition, pre-medicine, psychology, or sociology.

Required Courses Credits: 17

- PUBH 230 - Foundations of Public Health Credits: (3)
- PUBH 250 - Introduction to Health Policy and Systems Credits: (3)
- PUBH 310 - Community Health Credits: (3)
- PUBH 311 - Cross Cultural Practices for Health and Medicine Credits: (4)
- PUBH 375 - Theories of Health Behavior Credits: (4)

Department-Approved Electives Credits: 12
Students may choose any 12 credits of advisor approved PUBH credits.

Total Credits: 29

## Department Information

The history faculty offers courses leading to bachelor of arts and master of arts.

Students who declare a major in history must register with the department.

## History Honors Program

The Department awards Honors status to qualified history majors. To qualify for the program, students must meet the following requirements:

- A history major (small plan, large plan or History Social Studies Teaching)
- A GPA of 3.5 in history courses and 3.25 overall
- A year of 200- or 300-level coursework in a foreign language OR a credited study abroad trip
- An honors research paper (30-page minimum) on a historical topic. This paper may be started in HIST 481 or another upper division history class and may require additional independent study credits to complete. A committee of three faculty members will judge whether the paper meets departmental standards for honors. A Douglas Honors College thesis with a faculty mentor in the history department will also count for this requirement.
Students who complete the above requirements will graduate with departmental honors. Please contact the department chair for more information.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/history or by contacting the department directly.

## History Major (Large Plan), BA

(Note: It is recommended that students who plan to enter graduate school should complete two years of a world language at the college level.)

Required Courses
Lower-Division Credits: 20

Select 20 credits from the following:
World Civilization

- HIST 101 - World History to 1500 Credits: (5)
(Western civilization may be substituted)
- HIST 102 - World History: 1500-1815 Credits: (5)
(Western civilization may be substituted)
- HIST 103 - World History Since 1815 Credits: (5) (Western civilization may be substituted)

United States History

- HIST 143 - United States History to 1865 Credits: (5)
- HIST 144 - United States History Since 1865 Credits: (5)

Upper-Division Credits: 54

- HIST 302 - Historical Methods Credits: (5) (Students must earn a minimum grade of C as a major requirement)
- HIST 481 - Senior Thesis Credits: (4) (Students must earn a minimum grade of C as a major requirement)
- Upper-division United States History Credits: (5)
- Upper-division European History Credits: (5)
- Upper-division African, Asian, Middle Eastern, or Latin American History Credits: (10)
- Upper-division History Electives Credits: (25)

Total Credits: 74

## History Social Studies Teaching, BA

This major satisfies the endorsements for history and social studies. This major is designed for students in the secondary Teacher Training Program. Students taking this major are required to apply to the Teacher Certification Program and complete the Professional Education Program requirements offered through the Department of Educational Foundations and Curriculum.

## Required Courses

- HIST 301 - Pacific Northwest History Credits: (5)
- HIST 302 - Historical Methods Credits: (5) (Students must earn a minimum grade of C as a major requirement)
- HIST 421 - Methods and Materials in the Social Studies, Secondary Credits: (5) (Prior completion of EFC 340 recommended. Students must be admitted to the Teacher Preparation Program prior to enrolling in this course).
- HIST 481 - Senior Thesis Credits: (4) (Students must earn a minimum grade of C as a major requirement)
- POSC 210 - American Politics Credits: (5)

Select from the following - Credits: 20

- HIST 101 - World History to 1500 Credits: (5) (Western civilization may be substituted)
- HIST 102 - World History: 1500-1815 Credits: (5) (Western civilization may be substituted)
- HIST 103 - World History Since 1815 Credits: (5) (Western civilization may be substituted)
- HIST 143 - United States History to 1865 Credits: (5)
- HIST 144 - United States History Since 1865 Credits: (5)

Select from the following - Credits: 15

- Upper-division U.S. History Credits: (5)
- Upper-division European History Credits: (5)
- Upper-division African, Asian, Middle Eastern, or Latin American History Credits: (5)

Select from the following - Credits: 5

- ECON 101 - Economic Issues Credits: (5)
- ECON 102 - World Economic Issues Credits: (5)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)

Select from the following - Credits: 5

- ANTH 107 - Being Human: Past and Present Credits: (5)
- SOC 101 - Social Problems Credits: (5)
- SOC 107 - Principles of Sociology Credits: (5)

Select from the following - Credits: 4-5

- GEOG 101 - World Regional Geography Credits: (5)
- GEOG 107 - Our Dynamic Earth Credits: (5)
- GEOG 304 - Economic Geography Credits: (5)
- GEOG 308 - Cultural Geography Credits: (4)
- GEOG 346 - Political Geography Credits: (4)

Select from the following - Credits: 4-5

- GEOG 273 - Geography of Rivers Credits: (5)
- GEOG 352 - Geography of North America Credits: (4)
- GEOG 355 - Geography of the Pacific Northwest Credits: (4)
- GEOG 366 - Geography of the Middle East Credits: (4)

# Individual Studies <br> Program 

College of the Sciences
Ellensburg
Dean Hall, room 130
509-963-1866

## Program Director

Alena Yastchenko

## Program Information

This academic program provides an opportunity for students to develop, with the assistance of a faculty advisor(s), a unique interdisciplinary program of study. Each program of study must be comprised of a coherent curriculum that supports student's stated professional and education goals. Individual Studies majors may be assigned the BA or BS degree as deemed appropriate. The Individual Studies designation and the title of the major will be noted on the diploma and the student's academic transcript (i.e., BS Individual Studies: Aviation Safety).

## Admission Requirements

Applicants must have completed 60 credit hours of study with a minimum 2.5 cumulative GPA and be in academic good standing. All proposal materials must be submitted to the associate dean of the College of the Sciences at least three quarters prior to anticipated graduation. Proposals are subject to review and approval of an advisory committee which meets quarterly.

## Application Procedures

Students wishing to apply to the Individual Studies major must submit a proposal to include an application form with proposed degree title, a statement of purpose, an explanation of the primary learning goals of the major, a listing of courses comprising the major, and support from a faculty liaison. The course of study should include a minimum of 60 credits including at least two separate subject areas; 30 of the credits must be upper division. The proposal will be developed under the guidance of a faculty member during the required IS 200Introduction to Individual Studies course.

## Degree Requirements

Students must earn a minimum grade of $C$ - in each course counted toward fulfilling major requirements and the overall GPA in the major must be a 2.5 .

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found by contacting the department directly.

## BS-ITAM Program Overview

The Bachelor of Science in Information Technology and Administrative Management (ITAM) provides a degree path for students with five high demand specializations needed by the modern workforce.

1. Network Administration and Management Specialization
2. Web and Database Administration and Management Specialization
3. Retail Management and Technology Specialization
4. Administrative Management Specialization
5. Cybersecurity Specialization

The ITAM curriculum, designed by subject matter experts with guidance from industry professionals, addresses the current demand for tech-savvy individuals who are also able to effectively lead and motivate teams, manage projects, and integrate technological solutions. Students completing this major will take a core set of courses and select one of the five specialization areas. The BS-ITAM is comprised of two complementing areas creating synergy.

1. All BS-ITAM specializations are complemented by a core foundation of relevant and current humancentered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications.
2. The specializations feature advanced study in high demand areas of IT management.

## BS-ITAM Program Admission Requirements

Students are encouraged to apply for their ITAM major early in their university studies, even as soon as their first quarter. Once enrolled in the ITAM program students will begin working with a knowledgeable ITAM advisor to design their academic course of study at CWU and make sure they are fulfilling all of the requirements for successful degree completion. Application forms are available in the Ellensburg campus department or on the ITAM website. www.cwu.edu/it-management.

## BS-ITAM Graduation Requirements

The following requirements apply to students seeking the BSITAM degree:

Students must earn a minimum cumulative GPA of 2.3 in the ITAM coursework to be eligible for the degree.

Students must earn a minimum grade of C- in each course.

## Course Fees

Most ITAM courses that use hardware and software resources are assessed a course fee of $\$ 25$ or $\$ 50$, depending on the required technology.

## List of Specializations for the BS-ITAM

Students seeking the BS-ITAM take a common set of core courses of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications. Additionally, students complete a specialization within the BSITAM degree:

1. Network Administration and Management Specialization
2. Web and Database Administration and Management Specialization
3. Retail Management and Technology Specialization
4. Administrative Management Specialization
5. Cybersecurity Specialization

## Network Administration and Management Specialization

Students in this specialization design, construct, and manage the network infrastructure vital to modern business operations. They can make appropriate recommendations for hardware and software, communicate technical information clearly to a variety of audiences, effectively lead teams, and stay current with emerging trends in a rapidly advancing technological environment. The advanced networking administration and management courses are complemented by a core foundation of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, professional selling, customer relationship management, as well as hard skills in database management, web development, and computer applications. Graduates secure positions as network administrators, network analysts, network managers, data communication analysts, network operations analysts, network specialists, network technicians, computer support specialists, and user support specialists.

## Web and Database Administration and Management Specialization

Majors in this specialization gain the skills to plan, lead, and
manage the digital profiles of modern enterprises. Balancing concerns of visual design, user experience, hardware capabilities, and emerging technological developments, these graduates are ready to stand at the nexus of web development teams and maximize their capacity for creativity, innovation, adaptation, and efficiency. The advanced web and database courses are complemented by a core foundation of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, professional selling, customer relationship management, as well as hard skills in computer networking and computer applications. Graduates secure positions as web administrators, database administrators, web designers, database developers, web page developers, database managers, and web masters.

## Retail Management and Technology Specialization

This specialization trains the entrepreneurs and management professionals who develop and grow organizations across multiple channels. Students learn all sides of the retail environment from business basics to marketing and selling products, customer relationship management, branding, and the nuances of e-commerce. The advanced retail management technology courses are complemented by a core foundation of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, professional selling, as well as hard skills in database management, web development, computer networking, and computer applications. Graduates pursue careers in retail environments that infuse information technology in areas such as omni channels, management, selling, distribution and logistics, purchasing, operations, merchandising, buying, entrepreneurship, and small business ownership.

## Administrative Management Specialization

This specialization develops leaders ready to meet the administrative needs of any organization by combining technical knowledge with skills in leadership and supervision, effective business practices, project management, and communication. Administrative management majors become skilled problemsolvers and innovators, adapting to the changing needs of modern enterprise. The advanced administrative management courses are complemented by a core foundation of relevant and current human-centered skills in business communications, financial management, ethics, professional selling, customer relationship management, as well as hard skills in database management, web development, computer networking, and computer applications. The need for graduates with these skills crosses all types of business including agriculture, construction, finance, and retail, government, manufacturing and not-forprofits.

## Cybersecurity Specialization

Students will gain knowledge specific to the detection, protection, and recovery from attacks to an organization's information assets. Gaining skills in the growing employment area of network security combined with the management and soft-skills classes, graduates achieve a competitive edge in the IT marketplace. The advanced cybersecurity courses are complemented by a core foundation of relevant and current human-centered skills in project management, business communications, financial management, ethics, professional selling, customer relationship management, as well as hard skills
in database management, web development, computer networking, and computer applications. Graduates secure careers as a cybersecurity specialist, information security officer, information assurance analyst, information security relationship analyst, cybersecurity analyst, and information technology specialist. The need for cybersecurity experts spans all organizations including: public utility companies, national security agencies, food and water suppliers, financial services, and companies with intellectual property to protect.

## ITAM Minors or Certificates

The information technology and administrative management minors and certificates provide recognition for students who complete the specified minor or certificate courses. Such recognition will benefit students in gaining professional employment or advancing in their current professional positions.

Each of our seven minors will complement any major field, helping CWU students stand out from the crowd and be competitive in today's job market. Applied, relevant skill sets develop individuals ready to handle the challenges of modern global industry.

Application forms for minors and certificates can be obtained in the Ellensburg campus department or on the ITAM web site at www.cwu.edu/it-management.

## Minors or certificates are available in the following areas:

- Administrative Management
- Cybersecurity
- Innovation through IT
- Modern IT Applications
- Project Management
- Retail Management and Technology
- Structures of Data Analytics for IT Managers
- Web Design and Management

A minimum GPA of 2.3 in the minor and certificate courses must be achieved with a minimum grade of C - in each course.

## Bachelor of Applied Science

Information Technology and Administrative Management Providing students with management, leadership, critical thinking skills is the primary purpose of the BAS-ITAM degree. Students learn the soft-skills to excel in managing people, projects or departments. A curriculum rich in communication and problem-solving skills, the program complements any professional/technical degree with timely and relevant skills to qualify students for leadership roles in their technical area.

## BAS-ITAM Program Admission Requirements

Applicants for the BAS-ITAM must meet the following admission requirements before admittance to the program:

- Completion of an applied or technical degree with at least 40 credits in an applied/technical area from a community college or technical college.
- Minimum GPA of 2.3.
- A world language is not required.

BAS-ITAM Graduation Requirements

- Minimum overall GPA of 2.3.
- Completion of CWU Basic and Breadth Requirements, except the world language and computing requirements.
- Completion of the BAS-ITAM core requirement courses and one of the BAS-ITAM specialization list of courses with a minimum grade of C - in each course.

## List of Specializations for BAS-ITAM program

Students seeking the BAS-ITAM program take a common set of core courses. Additionally, students entering the BAS-ITAM program must choose a specialization and complete the CWU General Education program. Students choose from three unique specializations:

1. Administrative Management
2. Cybersecurity
3. Information Technology Management

## ITAM BAS, Administrative Management Specialization

 Qualify to work in any business environment where leadership and information processing is required. With classes such as Project Management, Customer Relationship Management, Financial Analysis, and Advanced Spreadsheet Applications, you will have the skills to manage in any administrative capacity. Industries like healthcare, manufacturing, education, retail, and even non-profit organizations are asking for employees with this educational background. Any completed professional/technical associate degree will satisfy the admission requirement.
## ITAM BAS, Cybersecurity Specialization

Learn to detect, protect, and recover from attacks to an organization's information assets. Public utility companies, national security agencies, food and water suppliers, financial services, and companies with intellectual property to protect are now hiring experts in this area. The skills to detect and recover from cyber-attacks, coupled with the team leadership, effective communication, and project management skills of the BAS core, will provide a thorough knowledge base for managers and technology leaders concerned with the operation and management of cybersecurity systems. Because of the technical IT skills classes involved in this specialization, a computerrelated associate degree is suggested for admission.

## ITAM BAS, Information Technology Specialization

Managing in an IT department or organization requires team leadership, project management, effective communication, and critical thinking skills. Those soft-skills when combined with the hard skills from an associate degree in network security, computer support technology, wireless technology, server support, CAD technology, etc. give students the best opportunity for advancement in their field. With specialization classes directed specifically to management in the IT environment, students have the best opportunity for furthering their careers. Requires a professional/technical associate degree with at least 40 credits in computer-related classes for admission.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/it-management or by contacting the department directly.

## ITAM BAS, Administrative Management Specialization

## ITAM-BAS Program and Core Requirements

Providing students with management, leadership, critical thinking skills is the primary purpose of the ITAM-BAS degree. Students learn the soft-skills to excel in managing people, projects or departments. A curriculum rich in communication and problem-solving skills, the program complements any professional/technical degree with timely and relevant skills to qualify students for leadership roles in their technical area.

## ITAM-BAS Program Admission Requirements

Applicants for the ITAM-BAS must meet the following admission requirements before admittance to the program:

- Completion of an applied or technical degree with at least 40 credits in an applied/technical area from a community college or technical college.
- Minimum GPA of 2.3.
- A world language is not required.

## ITAM-BAS Graduation Requirements

- Minimum overall GPA of 2.3.
- Completion of CWU Basic and Breadth Requirements, except the world language and computing requirements.
- Completion of the ITAM-BAS core requirement courses and one of the ITAM-BAS specialization lists of courses with a minimum grade of C - in each course.

## List of Specializations for ITAM-BAS program

Students seeking the ITAM-BAS program take a common set of core courses. Additionally, students entering the ITAM-BAS program must choose a specialization and complete the CWU General Education program. Students choose from three unique specializations:

1. Administrative Management
2. Cybersecurity
3. Information Technology Management

Administrative Management Specialization: Qualify to work in any business environment where leadership and information processing is required. With classes such as Project Management, Customer Relationship Management, Financial Analysis, and Advanced Spreadsheet Applications, you will have the skills to manage in any administrative capacity. Industries like healthcare, manufacturing, education, retail, and even non-profit organizations are asking for employees with this educational background. Any completed professional/technical associate degree will satisfy the admission requirement.

Cybersecurity Specialization: Learn to detect, protect, and recover from attacks to an organization's information assets. Public utility companies, national security agencies, food and water suppliers, financial services, and companies with intellectual property to protect are now hiring experts in this area. The skills to detect and recover from cyber-attacks, coupled with the team leadership, effective communication, and project management skills of the BAS core, will provide a
thorough knowledge base for managers and technology leaders concerned with the operation and management of cybersecurity systems. Because of the technical IT skills classes involved in this specialization, a computer-related associate degree is suggested for admission.

Information Technology Specialization: Managing in an IT department or organization requires team leadership, project management, effective communication, and critical thinking skills. Those soft-skills when combined with the hard skills from an associate degree in network security, computer support technology, wireless technology, server support, CAD technology, etc. give students the best opportunity for advancement in their field. With specialization classes directed specifically to management in the IT environment, students have the best opportunity for furthering their careers. Requires a professional/technical associate degree with at least 40 credits in computer-related classes for admission.

## ITAM BS, Administrative Management Specialization

## ITAM-BS Program and Core Requirements

## ITAM-BS Program Overview

The Bachelor of Science in Information Technology and Administrative Management (ITAM) provides a degree path for students with five high demand specializations needed by the modern workforce.

1. Network Administration and Management Specialization
2. Web and Database Administration and Management Specialization
3. Retail Management and Technology Specialization
4. Administrative Management Specialization
5. Cybersecurity Specialization

The ITAM curriculum, designed by subject matter experts with guidance from industry professionals, addresses the current demand for tech-savvy individuals who are also able to
effectively lead and motivate teams, manage projects, and integrate technological solutions. Students completing this major will take a core set of courses and select one of the five specialization areas. The ITAM-BS is comprised of two complementing areas creating synergy.

1. All ITAM-BS specializations are complemented by a core foundation of relevant and current humancentered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications.
2. The specializations feature advanced study in high demand areas of IT management.

## ITAM-BS Program Admission Requirements

Students are encouraged to apply for their ITAM major early in their university studies, even as soon as their first quarter. Once enrolled in the ITAM program students will begin working with a knowledgeable ITAM advisor to design their academic course of study at CWU and make sure they are fulfilling all of the requirements for successful degree completion. Application forms are available in the Ellensburg campus department or on the ITAM website. www.cwu.edu/it-management.

## ITAM-BS Graduation Requirements

The following requirements apply to students seeking the ITAM-BS degree: Students must earn a minimum cumulative GPA of 2.3 in the ITAM coursework to be eligible for the degree. Students must earn a minimum grade of "C-" in each course.

## Course Fees

Most ITAM courses that use hardware and software resources are assessed a course fee of $\$ 25$ or $\$ 50$, depending on the required technology.

## List of Specializations for the ITAM-BS

Students seeking the ITAM-BS take a common set of core courses of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications. Additionally, students complete a specialization within the ITAM-BS degree:

1. Network Administration and Management Specialization
2. Web and Database Administration and Management Specialization
3. Retail Management and Technology Specialization
4. Administrative Management Specialization
5. Cybersecurity Specialization

## ITAM-BS Core Requirements

- ADMG 201 - Introduction to Business Credits: (3)
- ADMG 271 - Business Math Applications Credits: (4)
- ADMG 302 - Financial Analysis for Administrative and IT Support Credits: (5)
- ADMG 371-Administrative Management Credits: (4)
- ADMG 372 - Leadership and Supervision Credits: (4)
- ADMG 374 - Project Management Credits: (5)
- ADMG 385 - Business Communications and Report Writing Credits: (5)
- IT 101 - Computer Applications Credits: (3)
- IT 238 - Introduction to Cyberwarfare Credits: (4)
- IT 248 - Web Fundamentals Credits: (4)
- IT 260 - Integrated Information Technology Application Projects Credits: (5)
- IT 301 - Information Technology Security, Privacy, and Ethics Credits: (3)
- IT 351 - Computer Networks Credits: (4)
- IT 468 - Projects in Database Credits: (4)
- RMT 340 - Principles of Selling Credits: (4)
- RMT 366 - Customer Relationship Management Credits: (4)
- RMT 379 - IT Management Career Planning Credits: (1)
- RMT 490 - Cooperative Education Credits: (1-12) (Must be taken for 8-12 credits, typically during the summer quarter.)
- OR ADMG 490- Cooperative Education Credits: (1-12)
- OR IT 490-Cooperative Education Credits: (1-12)

ITAM-BS Total Core Credits: 74-78

Administrative Management Specialization

Administrative management specialization students become qualified business professionals prepared to pursue careers that apply a blend of management, administrative, and information technology skills in contemporary administrative and information technology environments. The administrative manager supervises office employees, designs office work systems, maintains internal and external communication systems, and compiles meaningful reports from information processing. Their knowledge of IT tools complemented by the soft skills (emotional intelligence and leadership) qualifies them to seek employment in positions requiring the management of data, projects, people, and organizational change. The need for graduates with these skills crosses all types of business including agriculture, construction, finance, retail, government, manufacturing and not-for-profits.

## Required Courses

4. Administrative Management Specialization
5. Cybersecurity Specialization

The ITAM curriculum, designed by subject matter experts with guidance from industry professionals, addresses the current demand for tech-savvy individuals who are also able to effectively lead and motivate teams, manage projects, and integrate technological solutions. Students completing this major will take a core set of courses and select one of the five specialization areas. The ITAM-BS is comprised of two complementing areas creating synergy.

1. All ITAM-BS specializations are complemented by a core foundation of relevant and current humancentered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications.
2. The specializations feature advanced study in high demand areas of IT management.

## ITAM-BS Program Admission Requirements

Students are encouraged to apply for their ITAM major early in their university studies, even as soon as their first quarter. Once enrolled in the ITAM program students will begin working with a knowledgeable ITAM advisor to design their academic course of study at CWU and make sure they are fulfilling all of the requirements for successful degree completion. Application forms are available in the Ellensburg campus department or on the ITAM website. www.cwu.edu/it-management.

## ITAM-BS Graduation Requirements

The following requirements apply to students seeking the

ITAM-BS degree: Students must earn a minimum cumulative GPA of 2.3 in the ITAM coursework to be eligible for the degree. Students must earn a minimum grade of "C-" in each course.

## Course Fees

Most ITAM courses that use hardware and software resources are assessed a course fee of $\$ 25$ or $\$ 50$, depending on the required technology.

## List of Specializations for the ITAM-BS

Students seeking the ITAM-BS take a common set of core courses of relevant and current human-centered skills in management, leadership, project management, business communications, financial management, ethics, personal selling, and CRM as well as hard skills in database management, web development, computer networking, and computer applications. Additionally, students complete a specialization within the ITAM-BS degree:

1. Network Administration and Management Specialization
2. Web and Database Administration and Management Specialization
3. Retail Management and Technology Specialization
4. Administrative Management Specialization
5. Cybersecurity Specialization

ITAM-BS Core Requirements

- ADMG 201 - Introduction to Business Credits: (3)
- ADMG 271 - Business Math Applications Credits: (4)
- ADMG 302 - Financial Analysis for Administrative and IT Support Credits: (5)
- ADMG 371-Administrative Management Credits: (4)
- ADMG 372 - Leadership and Supervision Credits: (4)
- ADMG 374 - Project Management Credits: (5)

## ITAM BS, Project Management Specialization

Students will gain knowledge specific to managing projects. Graduates in this high-demand field of project management will gain skill and knowledge that, when combined with the softskills classes, will give you the competitive edge in the marketplace. Project management skills are not specific to any industry and are sought after by many organizations.

Soft Skills

- management and leadership
- project management
- business communications
- financial management
- ethics
- professional selling
- customer relationship management Hard Skills
- managing projects through all stages or the project management lifecycle
- managing project budgets, schedules, and resources
- managing project risk, quality, and procurement
- developing WBS and reporting project performance
- implementing project management maturity practices

## Program Information

The geopolitical conflicts over energy resources during the last decades have transformed the current energy landscapes at regional, national and global scales. These shifts in energy landscapes have made the management of energy resources more complex, the development of energy policy more important and controversial, and the innovation of energy technology front-page news. Whether it is finding new traditional sources of energy (e.g., oil, coal and natural gas) or developing alternative courses of energy (e.g., wind, solar, hydro power, geothermal) we need to understand that the world is so embedded in conventional sources of energy that policies and decisions regarding alternative sources of energy depend greatly on what happens in the fossil fuel market.

An interdisciplinary and integrated understanding of energy resources is integral to finding comprehensive solutions to the management of energy systems in today's rapidly changing world. A broad range of human, environmental, political, economic, and technological factors are at work shaping the future of current energy landscapes, and it is the mission of the Institute of Integrated Energy Studies (I2ES) to prepare students to be active participants in that emerging future. In doing so, the I2ES emphasizes critical thinking and applied approaches to analysis, while providing graduates with the skills necessary to deal with energy issues at scales ranging from local to global.

The bachelor of science in Integrated Energy Management (IEM) take these factors in consideration and provides students with an interdisciplinary education experience that includes the integration of both traditional fossil fuel-based and greener alternative energy. Students enrolled in the IEM degree program will be able to choose from three specializations: (1) integrated energy policy; (2) integrated energy business; and (3) integrated power systems. Courses in the BS in IEM introduce students to energy systems and resources, while at the same time providing a comprehensive understanding for the social, political, economic and environmental processes that shape energy systems. We emphasize field learning experience and an integrative approach to energy management. Majors in IEM hone their written, verbal, and analytical communication skills as part of their interdisciplinary education. Students also learn from and collaborate with faculty members supporting the Institute for Integrated Energy Studies.

Select students will have the opportunity to engage in a creditbaring business-hosted extended (up to six months) cooperative education/apprenticeships with participating businesses. This applied learning experience happens in a student's junior or senior year and allows for the student to: (1) put in practice what they have learned in the classroom; (2) receive credit towards their degree; and (3) receive specialized training from a company that they may work for after graduation.

No other university in the state offers this particular type of interdisciplinary education in response to current and future
professional work place needs. Upon graduation, majors in IEM will be qualifies to work in a wide range of careers, including: energy policy, energy management services, inspection field technician, contact specialists, supply chain management of energy technologies, energy business, utility locator supervisor, energy plant manager, energy forecasting, and employment in private, public and non-for-profit organizations at local, state, and federal government agencies.

## Admission Requirements

Applications are accepted throughout the academic year. Admission to the program is based upon a review of completed prerequisite courses and application materials. Please see the program application at www.cwu.edu/energy.

A student must have a 2.25 minimum GPA in all coursework taken previous to application for admission.

Admission to any course requires a grade of C or higher in each prerequisite listed. Students who do not meet the prerequisite grade requirement will be dropped from the course.

A student is expected to complete each course used to fulfill a degree program requirement with a grade of C or higher. Students must complete all CWU foundation and core requirements prior to beginning 400-level coursework.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/energy or by contacting the department directly.

Additional
Students graduate from Central Washington University and earn
a Bachelor of Science in Integrated Energy Management making them experts of integrated energy in the global economy.

Foundational Courses Credits: 29

- ECON 201 - Principles of Economics Micro Credits: (5)
- GEOG 107 - Our Dynamic Earth Credits: (5)
- GEOG 250 - Resource Exploitation and Conservation Credits: (4)
- IEM 103 - Introduction to Energy and Science Inquiry Credits: (5)

Select one from the following for 5 credits:

- ECON 130 - Foundations for Business Analytics Credits: (5)
- MATH 130 - Finite Mathematics Credits: (5)

## Select one from the following for 5 credits:

- MATH 153 - Pre-Calculus Mathematics I Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)
- MATH 170 - Intuitive Calculus Credits: (5)
- MATH 172 - Calculus I Credits: (5)

Core Courses Credits: 39-40

- ECON 463 - Energy Economics Credits: (5)
- GEOG 301 - Introduction to GIS and Maps Credits: (4)
- GEOG 442 - Alternative Energy Credits: (5)
- IEM 301 - Energy Management Credits: (5)
- IEM 302 - Energy, Environment, and Climate Change Credits: (4)
- IEM 330-Geopolitics of Fossil Fuels Credits: (5)
- IEM 489 - Integrated Energy Management Capstone Credits: (2)

Select one of the following Method courses for 5 credits:

- BUS 221 - Introductory Business Statistics Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)

Select one of the following Communication courses for $\mathbf{4 - 5}$ credits:

- ADMG 385 - Business Communications and Report Writing Credits: (5)
- COM 345 - Business and Professional Speaking Credits: (4)
- ENG 310-Technical Writing Credits: (4)

Total Core Credits: 68-69
Integrated Energy Business Specialization

Integrated Energy Business specializes in training students in the areas of marketing, supply chain logistics, and economics as it relates to energy production distribution and consumption.

Required Courses Credits: 20

- ACCT 301-Accounting Skills for Non-Business Majors Credits: (5)
- MGT 380-Organizational Management Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- SCM 310 - Supply Chain Management Credits: (5)

Department-Approved Electives Credits: 15
Select 15 credits from the following OR, with approval, IEM 290 and IEM 490:

## Choose two of the following:

- ECON 310 - International Economics Credits: (5)
- ECON 330 - Money and Banking Credits: (5)
- ECON 352 - Managerial Economics Credits: (5)
- ECON 355 - Economics of Labor Credits: (5)
- SCM 420 - Lean/Six Sigma Processes Credits: (5)
- SCM 425 - Procurement and Supply Management Credits: (5)
- SCM 435 - Supply Chain Operations Credits: (5)
- SCM 475 - Global Trade and Supply Chain Management Credits: (5) Choose one from the following:
- MGT 477 - Global Leadership and Culture Credits: (5)
- MKT 364 - Marketing Promotion Management Credits: (5)
- MKT 365 - International Marketing Credits: (5)

OR

- IEM 290 - Cooperative Education Credits: (1-10)
- IEM 490-Cooperative Education Credits: (1-12)

Specialization Total Credits: 35
Total Credits: 103-104

## Program Information

Interdisciplinary studies-social sciences major is for students whose primary interest in the social sciences requires interdisciplinary programs and course selections which are not possible within single academic programs or established curricula. Program offers students an opportunity to devise an approved, coherent program of study with an academic advisor fulfilling academic or career goals and includes prerequisites consistent with the 300-400-level major coursework. Since the program is a student-designed, interdisciplinary major, course selections will vary. Students in the interdisciplinary studies major must take courses in at least three disciplines within the major.

## Admission Requirement

Applicants must have completed 60 credit hours of study with a minimum 2.25 cumulative GPA and be in academic good standing for admission.

## Additional Degree Requirements

Application to the program must be completed at least three quarters prior to anticipated graduation. Students must earn a minimum grade of C- in each course in an approved interdisciplinary studies major plan and achieve a minimum 2.25 GPA in the major. Courses in a student's minor or second major may not be included in the interdisciplinary studies major plan without advisor's consent. Students will enroll in IDS 489 no earlier than 2 quarters following successful completion of IDS 289.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/interdisciplinary-studiessocialsciences or by contacting the department directly.

## Interdisciplinary Studies-Social Sciences, BS

## Program Information

Interdisciplinary studies-social sciences major is for students whose primary interest in the social sciences requires
interdisciplinary programs and course selections which are not possible within single academic programs or established curricula. Application to the program must be completed at least three quarters prior to anticipated graduation. Students must earn a minimum grade of C - in each course in an approved interdisciplinary studies major plan and achieve a minimum 2.25 GPA in the major. Courses in a student's minor or second major may not be included in the interdisciplinary studies major plan without advisor's consent. Students will enroll in IDS 489 no earlier than 2 quarters following successful completion of IDS 289.

Interdisciplinary Studies-Social Sciences 62-Credit Major

## Required Courses

- $\quad 52-53$ credits must be taken from the list of courses approved for the social science major. Students in the interdisciplinary studies-social sciences major must take courses in at least three disciplines within the major and no more that 10 credits of lower division coursework may be included. No more than 15 credits may be numbered 490 .
- IDS 289 - Introduction to the Major Credits: (1)
- IDS 389 - Academic and Career Exploration Credits: (3)
- IDS 489 - Senior Portfolio Project Credits: (1)

Research Methods in the Social Sciences (4-5) Credits

Choose one of the following approved courses:

- ANTH 444 - Ethnographic Field Methods Credits: (4)
- LAJ 400 - Research Methods in Criminal Justice Credits: (4)
- PSY 300 - Research Methods in Psychology Credits: (5)
- SOC 363 - Methods of Social Research Credits: (5) or as approved by program director.

Total Credits: 62

Interdisciplinary Studies-Social Sciences 47-Credit Major

Required Courses

- 37-38 credits must be taken from the list of courses approved for the social sciences major. Students in the interdisciplinary studies - social sciences major must take courses in at least three disciplines within the major and no more than 10 credits of lower division coursework may be included. No more than 10 credits may be numbered 490 .
- In addition, a 47-credit major must complete either a traditional departmental minor or a second major.
- IDS 289 - Introduction to the Major Credits: (1)
- IDS 389 - Academic and Career Exploration Credits: (3)
- IDS 489 - Senior Portfolio Project Credits: (1)

Research Methods in the Social Sciences (4-5) Credits

Choose one of the following approved courses:

- ANTH 444 - Ethnographic Field Methods Credits: (4)
- LAJ 400 - Research Methods in Criminal Justice Credits: (4)
- PSY 300 - Research Methods in Psychology Credits: (5)
- SOC 363 - Methods of Social Research Credits: (5) or as approved by program director.

## Total Credits: 47

Rachel Gordon, project manager
Roslyn (Roz) Moes, international student advisor
Kathy Gallentine, international student advisor
Brianna Drakos, SEVIS coordinator
Partick Smith, fiscal specialist II
Vacant, program coordinator

## Program Information

The Office of International Studies and Programs (OISP) coordinates all internationally related activities on campus. This includes maintaining institutional linkages, facilitating faculty exchanges, recruiting international students, providing study abroad/exchange, and academic advising for both international students and American students, promoting English language acquisition through the Asia University America Program (AUAP), and the University English as a Second Language program (UESL), and collaborating with the academic deans and departments in support of the overall internationalization of the university curriculum.

OISP provides a variety of services to all segments of the university in order to meet the diverse needs of CWU's students, faculty, international students, research scholars, and professors. The following services are offered through the OISP: study abroad/exchange advising (SAEP), advising to international students, English language training through the UESL program,
and a unique English language and cultural learning experience for Japanese students from Asia University in Japan through AUAP.

## Institutional Linkages

Central and the Office of International Studies and Programs (OISP) maintain active inter-institutional and organizational relationships with the following universities: Anhui University, China; Gunma Prefectural Women's University, Japan; Herzen State Pedagogical University, Russia; University of Pecs, Hungary; various countries in the International Student Exchange Program; Mexico; Kyoto University of Foreign Studies, Japan; Beijing Jiaotong University, China; Queensland University of Technology, Australia; Charles Darwin
University, Australia; Griffith University, Australia; Macquarie University, Australia; University of Shimane, Japan; Shimane Women's Junior College, Japan; Takushoku University, Japan; University of Hull, United Kingdom; Universidad Austral de Chile, Chile; Pukyong National University, Korea; Kyundong University, Korea; Ewha Women's University, Korea; various countries in the AHA International; Beijing University, China; Universidad Anahuac del Sur, Mexico; Universite de Pau et des Pays de l'Adour, France; College Consortium for International Studies, various countries; American Institute for Foreign Studies, various countries; Centro de Investigaciones en Medio Ambiente y Salud (CIMAS), Ecuador; University of Washington Cadiz Program, Spain; Universidad Autonoma de Guadalajara, Mexico; Asia University, Japan; American Pacific University, Vietnam and Napier University, Scotland.

Active student and faculty exchange opportunities exist between CWU and these institutions.

## International Students and Scholars

International students and scholars receive academic advising, advocacy, and immigration regulations and procedures assistance through OISP. Support services are available to all international students including those here for language training in the UESL department, to take part in an academic year exchange, or to obtain a bachelor or master's degree, in International, and Area Studies.

## International and Area Studies

CWU offers Chinese, French, German, Japanese, Russian, and Spanish language courses. Students studying a language are encouraged to have international experience in order to learn more about the cultural context of the language. Regular degree programs are offered in world languages with specializations in Chinese, French, German, Japanese, Russian, and Spanish. The world language broad area major may include studying abroad in a country where the target language is taken.

Students can internationalize their undergraduate education by completing a major or minor in Asia Studies and/or Latino and Latin American Studies Program. There is also a minor in International Studies. These programs of study are interdisciplinary and incorporate courses in anthropology, art, economics, geography, history, languages, philosophy, and political science. Other area-focused courses are also available throughout the academic year.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/international-programs or by contacting the department directly.

## International Studies Minor

## Assistant Director, SAEP

Steven Cook, International Center, room 108

## Program Information

The international studies minor program goals are to provide a structured interdisciplinary opportunity for students to develop the analytical skills necessary to understand and evaluate the contemporary international system; to facilitate research and creative activities that focus on international issues; to provide opportunities to directly engage in meaningful cross-national interactions; and to encourage the apprehension of the fundamental commonalities as well as rich diversities that characterize the modern world system.

## Required Courses

- ECON 102 - World Economic Issues Credits: (5)
- GEOG 101 - World Regional Geography Credits: (5)
- POSC 270 - International Relations Credits: (5)

International Studies Courses

- INTL 110-465 - International Studies Credits: (3)

Electives Credits: 18

Students must complete at least four of the following courses with no more than two from any one department:

- ANTH 130 - Cultural Worlds Credits: (5)
- ANTH 356 - Gender Roles in Cross-cultural Perspective Credits: (4)
- ANTH 446 - Anthropology of Globalization Credits: (4)
- COM 302 - Intercultural Communication Credits: (4)
- ECON 310 - International Economics Credits: (5)
- ENG 360 - Cinema Studies IV: Survey of World Cinema Credits: (5)
- GEOG 304 - Economic Geography Credits: (5)
- MGT 384 - Introduction to International Business Credits: (5)
- POSC 372 - Politics of Globalization Credits: (5)
- POSC 373 - International Politics of the Pacific Rim Credits: (5)
- POSC 375 - The Middle East and International Politics Credits: (5)
- POSC 378 - International Political Economy Credits: (5)
- POSC 470 - Contemporary Issues in International Relations Credits: (3-5)
- PUBH 317-Global Health Issues and Solutions Credits: (4)
- SOC 326 - Social Demography Credits: (5)
- SOC 371 - Globalization Credits: (5)
- WGSS 498 - Special Topics Credits: (1-6)
- WLC 311 - Popular Cultures of the World Credits: (5)

## Other Electives

- INTL 198-498 - Special Topics Credits: (1-6)
- INTL 290/490 - Cooperative Education Credits: (1-6)

Total Credits: 36

## Program Information

The Asia University America Program (AUAP) is a study abroad program for freshman and sophomore students from Asia University in Tokyo, Japan. Two groups of students come to CWU each year for five months. The program is presently ongoing at two other universities in the northwest: WWU and EWU. AUAP provides students from Asia University the opportunity to improve their English skills and experience university life in the U.S. Students attend 18 hours of AUAP classes per week following the required curriculum from Asia

University.

## International Study Courses

INTL courses are offered only in university-approved study abroad/exchange programs. Courses may be offered and repeated for credit under different titles.

## Program Information

Education Abroad provides students the opportunities to combine academic and cultural learning and, in so doing, challenge previous knowledge and assumptions, gain new perspectives on their field of study, access classes or materials unavailable at CWU and gain skills necessary in the $21^{\text {st }}$ century workplace. Multiple recent studies have shown US employers place a high value on intercultural skills and cultural competency.

Programs are available in a variety of majors, destinations, durations and types, including internships and service-learning in addition to more traditional study programs. See the office website or come to our office for more information.

Study Abroad and Exchange Programs offers more than 150 international programs in 50 countries and over 170 exchange locations within the U.S. International internships are also available. Programs range in length from 10 days to one year. Programs grant academic credit that can be applied to major, minor, or breadth requirements with departmental approval. World language proficiency is not required and many programs offer coursework in English.

## SAEP Standards

- Minimum GPA 2.5 or higher; 2.0 for international internships.
- Minimum sophomore standing for most programs; freshman standing for some faculty-led programs.
- Must be in good academic and disciplinary standing.
- Program-specific eligibility criteria are available on the SAEP website at www.cwu.edu/internationalprograms/saep.

## Financial Obligations

Exempt from CWU tuition. Program-specific fees apply. For more information, see the SAEP website at www.cwu.edu/internationalprograms/saep.
Most types of financial aid apply toward program costs. Aid may be increased if necessary depending on student aid eligibility.

## Program Information

The UESL Program consists of a year-round intensive English program and short-term special programs. The year-round program focuses on language instruction and academic preparation for international students. Conditional undergraduate admission to CWU is an option through the UESL program. The program provides practical training for English department graduate students and an opportunity for American students to be conversation partners. Short-term special programs can be arranged for specific groups.

## Program Information

The Latino and Latin American Studies Program (LLAS) seeks to engage CWU students, faculty, staff, and local communities in a study of Latino and Latin American experiences, peoples, and cultures. The LLAS minor provides students with broad, interdisciplinary training in the economic, social, political, and cultural realities of Latino and Latin American peoples. The minor will be extremely valuable for those pursuing careers in business, government, social work, law and justice, and teaching that require engagement with Latino communities in the United States, as well as for those who wish to travel and work in Latin America. Moreover, the Latino and Latin American Studies minor may also serve as preparation for graduate study in multiple academic or professional fields.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/latino-latin-american or by contacting the department directly.

## Latino and Latin American Studies Minor

## General Program Information

The Latino and Latin American Studies Program (LLAS) seeks to engage CWU students, faculty, staff, and local communities in a study of Latino and Latin American experiences, peoples, and cultures. The LLAS minor provides students with broad, interdisciplinary training in the economic, social, political, and cultural realities of Latino and Latin American peoples. The minor will be extremely valuable for those pursuing careers in business, government, social work, law and justice, and teaching that require engagement with Latino communities in the United States, as well as for those who wish to travel and work in Latin America. Moreover, the Latino and Latin American Studies minor may also serve as preparation for graduate study in multiple academic or professional fields.

## Requirements for minors in Latino and Latin American Studies

- Prerequisite: Spanish, Portuguese, or French language equivalent to the end of the first year (153).
- An average GPA of 2.0 is required in all program courses.

Required Course Credits: 5

- LLAS 102 - An Introduction to Latino and Latin American Studies Credits: (5)

Department-Approved Electives Credits: 20

A total of 20 approved elective credits in at least three different disciplines at the 300 level or above is required from the below list. Courses taken through CWU exchange or study-abroad programs in a Latin American university may be applied for minor program credit. Courses that do not appear on the approved list but contain significant Latino and Latin American content may be used for minor program credit, upon approval of the LLAS director(s).

List of Approved CWU Courses (By Department/Program)
(a) Anthropology

- ANTH 346-Cultures of Latin America and the Caribbean Credits: (4)
(b) Economics
- ECON 101 - Economic Issues Credits: (5)
- ECON 102 - World Economic Issues Credits: (5)

## Latin American Business Certificate

#### Abstract

The certificate in Latin American Business prepares students for working within an emerging economy orientated toward Latin American. It combines an overview of the nuances of the regional economy with an introduction to Latin American's cultural and historical development. Topics will include an introduction to Latin American culture and philosophy, corporate-government relations, twentieth-century history, regional development, and business strategies. It can be supplemented with study abroad opportunities and language study (French, Spanish, Portuguese).

There are two tracks: one for College of Business majors and one for non-business majors.

Required Courses Credits: 14

- COM 471 - Corporate Communication in Latin America Credits: (4) (No prerequisites required for the Latin American Business Certificate)
- ECON 101 - Economic Issues Credits: (5)
- OR ECON 102 - World Economic Issues Credits: (5)
- OR ECON 201 - Principles of Economics Micro Credits: (5)
- LLAS 102 - An Introduction to Latino and Latin American Studies Credits: (5) (online)

Track for Business Majors Credits: 8-10
Choose two of the following courses:

- HIST 321 - Latin America Through Film, Art, and Music Credits: (5)
- OR HIST 328 - Modern Latin America Credits: (5) OR
- GEOG 368 - Geography of Middle America Credits: (4)
- OR GEOG 370-Geography of South America Credits: (4)
- OR SPAN 310 - Hispanic Civilizations and Cultures Credits: (5)

Track for Non-Business Majors Credits: 10
Choose two of the following courses:

- MGT 380 - Organizational Management Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- HRM 381 - Management of Human Resources Credits: (5)

Total Credits: 22-24

Mattias Olshausen, MLIS, MA history; research and instruction

## Program Information

At all times, students at Central have access to the library's 1.3 million books, films, government documents, and maps in print, microfiche, microfilm, and online electronic formats. The main library and two branch libraries at the University Centers at Des Moines and Lynnwood maintain subscriptions to over 20,000 newspapers, magazines, and journals in print and online full-text electronic formats, as well as audio recordings in CD, LP, and cassette formats and videos in DVD and VHS formats. The libraries participate in the resource-sharing service with the Orbis Cascade Alliance that provides our students with access to more than 25 million information items. The libraries' OneSearch make this available to students from any networked computer, whether on or off campus.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.lib.cwu.edu or by contacting the department directly.

## Library and Information Science Minor

The minor in library and information science is designed to provide students with an understanding of the methods and means of gathering, organizing, and disseminating information. The minor is appropriate for any students who wish to gain a greater understanding of the field of library and information science. This program does not qualify participants for a Washington State Library Media (P-12) endorsement.

## Graduation Requirements

All students in the minor will be required to complete 20 credit hours in the core curriculum. Students may choose courses within the remaining curriculum areas depending on their specific interests. Students must maintain a 2.0 GPA in the program courses.

Required Courses Credits: 20

- LIS 110 - Research Fundamentals Credits: (1)
- LIS 201 - Foundations of Library and Information Science Credits: (3)
- LIS 245 - Research Methods in the Digital Age Credits: (4)
- LIS 310 - Information Literacy and User Services Credits: (3)
- LIS 314-Technology in Library and Information Science Credits: (3)
- LIS 414 - Organization of Knowledge Credits: (3)
- LIS 490 - Library and Information Science Internship Credits: (1-12) (Must be taken for 3 credits)

Management Courses Credits: 3-4

Select one of the following courses:

- ANTH 362 - Museum Curation and Management Credits: (4)
- LIS 412 - Library Management and Leadership Credits: (3)

Collection Management Credits: 3
Select one of the following courses:

- LIS 410 - Collection Development Credits: (3)
- LIS 411 - Introduction to Archives Credits: (3)

Reader Content Advisory Credits: 3-5

College and Department Information

Library Science Program

## Library and Information Science Certificate

The certificate in library and information science is designed to provide students with an understanding of the methods and means of gathering, organizing, and disseminating information. The certificate is appropriate for any students who wish to gain a greater understanding of the field of library and information science without completing an undergraduate minor and or nonmatriculated students already employed as a library paraprofessional.

## Graduation Requirements

All students in the certificate program will be required to complete 8 credit hours in the core curriculum. Students may choose four courses within the remaining curriculum areas depending on their specific interests.

## Required Courses Credits: 8

- LIS 110 - Research Fundamentals Credits: (1)
- LIS 201 - Foundations of Library and Information Science Credits: (3)
- LIS 245 - Research Methods in the Digital Age Credits: (4)

Department-Approved Electives Credits: 12
Select four of the following:

- LIS 298 - Special Topic Credits: (1-6)
- LIS 310 - Information Literacy and User Services Credits: (3)
- LIS 314 - Technology in Library and Information Science Credits: (3)
- LIS 398 - Special Topic Credits: (1-6)
- LIS 410 - Collection Development Credits: (3)
- LIS 411 - Introduction to Archives Credits: (3)
- LIS 412 - Library Management and Leadership Credits: (3)
- LIS 414 - Organization of Knowledge Credits: (3)
- LIS 498 - Special Topic Credits: (1-6)

Total Credits: 20

The Department of Finance and SCM and the Department of Management jointly support the bachelor of science in business administration and business minor. The department offers coursework leading to the bachelor of science in business administration (BSBA) degree. In addition to the university general education requirements, the BSBA major is comprised of three principal components:

Foundation courses that provide foundation knowledge and skills needed for further study in business

Business core courses that build on the foundation group and focus on decision making in the main functional areas of business

Specialization courses that allow for advanced study in one of the functional areas.

Students select a 25 -credit specialization within the BSBA program in one of seven areas: finance, general business, human resource management, leadership and management, marketing management, personal financial planning or supply chain management.

## Program Goals for BSBA

The departments have identified overall educational outcomes related to knowledge, values, and skills for all BSBA graduates. Following are the outcomes for the bachelor of science in business administration (BSBA) programs:

1. Knowledge-based educational Outcomes. Upon completion of the BSBA program, students should:

- Have a working knowledge of business administration that will aid them in private, government, or non-profit careers and/or prepare them for additional study

2. Values-based educational outcomes. Upon completion of the BSBA program, students should:

- Comprehend ethical issues and be able to apply an ethical decision-making framework to business decisions

3. Skills-based educational outcomes. Upon completion of the BSBA program., students should:

- Function effectively when in teams both as a leader and as a member
- Demonstrate effective oral communication skills
- Demonstrate effective written communication skills
- Apply quantitative and qualitative critical thinking skills to develop, access, and use information to analyze business problems and propose feasible solutions
Transfer Credits and Prior Learning Assessment
Equivalent lower-division (100-200 level) courses may be transferred toward meeting the pre-admission requirements. Upper-division (300- to 400-level) courses may also be transferred toward meeting the business core and specialization requirements, but only with the approval of the department chair and the college dean (or designee).

## Repeat Policy

Business administration courses may be repeated only once.

## Additional BSBA Graduation Requirements

The following special rules apply to students seeking the BSBA major:

- Students must earn a minimum cumulative GPA of 2.25 in the 99 - to 100 -credit in-the-major coursework to be eligible for a degree. In addition, the department requires a minimum GPA of 2.25 in the 59 - to $60-$ credit upper-division component of the in-the-major total.
- Transfer students must complete at least 40 credits at CWU to be eligible for the BSBA degree, including MGT 489. Additionally, students seeking a Human Resource Management specialization must complete HRM 486 at CWU and students seeking a Marketing specialization must complete MKT 470 at CWU.
- The BSBA program requires a single specialization of at least 25 credits. Occasionally a student requests a second specialization. To be eligible for a second specialization, a minimum of 20 unique credits must be completed. Unique in this sense means the credits have not been used as part of any other BSBA specialization.

Business Core Total Credits: 39-41

General Business Specialization Courses
This specialization is intended for the student who wishes to tailor a "unique" set of specialization courses to his or her needs or for the student who desires a broad-based "generalist" track within the business administration major. Twenty-five upper division elective credits are required including at least 20 credits must be business (BUS), finance (FIN), human resource management (HRM), management (MGT), marketing (MKT), management information systems (MIS), or supply chain management (SCM) courses. The remaining five credits may be accounting (ACCT) or economics (ECON). The student is limited to 10 credits from any one area and the specialization must include at least 10 credits of 400 -level courses, which cannot include BUS 490 as any of the 10 credits at the 400level. No more than 5 credits of the specialization may be BUS 490.

Total Specialization Credits: 25
College of Business Capstone

Erica Holley, PhD
Todd Weber, PhD
Students pursuing the HRM specialization will deal with fundamental organizational processes that must be developed and managed for continuous improvement by both HR specialists and by all managers in general. Thus, the study of HR takes on a dual emphasis. First, by pursuing an HR specialization, students will be thoroughly trained to focus decision-making as it pertains to the acquisition, utilization, development and retention of employees. Alternatively, the study of HRM is also applicable as a strong supplement to other specializations or majors.

## Program Goals for BSBA

The departments have identified overall educational outcomes related to knowledge, values, and skills for all BSBA graduates. Following are the outcomes for the bachelor of science in business administration (BSBA) programs:

1. Knowledge-based educational outcomes. Upon completion of the BSBA program, students should:

# Business Administration BS (BSBA), Leadership and Management Specialization 

Advisors:<br>James Avey, PhD<br>Wendy Cook, PhD<br>Erica Holley, PhD<br>William Provaznik, PhD<br>Todd Weber, PhD<br>Keke Wu, PhD

The leadership and management specialization emphasizes building the skills, insights and knowledge that professionals need to succeed in a business context. Students will improve their ability to manage themselves as well as influence others as they learn to identify valuable goals and work to reach them. Courses will feature relevant concepts and theories and present opportunities to deploy this knowledge in practical situations to build a solid foundation of leadership and management ability. The program is designed to give students a portfolio of established and cutting-edge principles to draw from over their career.

## Program Goals for BSBA

The departments have identified overall educational outcomes related to knowledge, values, and skills for all BSBA graduates. Following are the outcomes for the bachelor of science in business administration (BSBA) programs:

1. Knowledge-based educational outcomes. Upon completion of the BSBA program, students should:

Total Credits: 29-31

## Human Resource Management Minor

#### Abstract

The human resource management minor is designed to augment the student's undergraduate degree with a focused examination of the role of human resources in business operations. Students will explore the application of training and development, staffing and employee relations, and test development issues as they apply specifically to the role of human resource managers. Students will take a sampling of courses offered as a part of the College of Business' Human Resource Specialization, as well as business-relevant, organizational psychology courses. The human resource management minor will provide curriculum to prepare students for a career in human resource management as generalists, specialists and managers.

Required Courses Credits: 9

- HRM 381 - Management of Human Resources Credits: (5)
- PSY 456 - Industrial and Organizational Psychology Credits: (4)

Elective Courses (choose 3 of the possible 4) Credits: 14-15

- HRM 442 - Training and Development Credits: (5)
- HRM 445-Organizational Staffing Credits: (5)
- HRM 479 - Employee Relations Credits: (5)
- PSY 444 - Tests and Measurements Credits: (4)

Total Credits: 23-24

College and Department Information

## Sport Business Minor

The sport business minor is designed to augment the student's undergraduate degree with a focused examination of the sport business industry. Students will explore the application of marketing, management, law, finance and other business principles as they apply specifically to the sport industry. The sport certificate will provide curriculum to prepare students for a career in corporate, professional, intercollegiate or amateur sport organizations.

Students must achieve a C- or higher in all courses to earn the Sport Business Minor.

Required Courses Credits: 15

- MGT 380- Organizational Management Credits: (5)
- OR MGT 382 - Principles of Management Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- OR MKT 362 - Essential Marketing Concepts Credits: (5)
- MKT 370 - Sports Marketing and Sponsorship Credits: (5)

Electives Courses: Choose a minimum of 15 credits from the following: Credits: 15-16

- BUS 401 - Business Boot Camp Credits: (1)
- MGT 394 - Legal Considerations in Sport Business Credits: (5)
- MGT 395 - Leadership in Business Organizations Credits: (5)
- MKT 371 - Sponsorship and Promotion in Sport Business Credits: (5)
- MKT 372 - Revenue Generation and Finance in Sport Business Credits: (5)

Total Credits: 30-31
College and Department Information

Management Department
College of Business

## Sport Business Certificate

The sport business certificate is designed to augment the student's College of Business degree with a focused examination of the sport business industry. Students will explore the application of marketing, management, law, finance, and other business principles as they apply specifically to the sport industry. The sport certificate will provide curriculum to prepare students for a career in corporate, professional, intercollegiate or amateur sport organizations.

Students must achieve a C- or higher in all courses to earn the sport business certificate.

Required Courses Credits: 15

- MGT 380- Organizational Management Credits: (5)
- OR MGT 382 - Principles of Management Credits: (5)
- MKT 360 - Principles of Marketing Credits: (5)
- OR MKT 362 - Essential Marketing Concepts Credits: (5)
- MKT 370 - Sports Marketing and Sponsorship Credits: (5)

Electives Courses: Choose a minimum of 15 credits from the following: Credits: 15-16

- MGT 394 - Legal Considerations in Sport Business Credits: (5)
- MGT 395 - Leadership in Business Organizations Credits: (5)
- MKT 371 - Sponsorship and Promotion in Sport Business Credits: (5)
- MKT 372 - Revenue Generation and Finance in Sport Business Credits: (5)
- BUS 401 - Business Boot Camp Credits: (1)

Total Credits: 30-31

## Faculty and Staff

Chair
Stuart Boersma, PhD

## Professors

Christine Black, PhD, mathematics education (Westside)
Stuart F. Boersma, PhD, differential geometry, general relativity Yvonne Chueh, PhD, actuarial science, statistics
Timothy Englund, PhD, group theory, representation theory, statistics
James D. Harper, PhD, harmonic analysis
Dominic Klyve, PhD, computational number theory, history of mathematics, statistics

Scott M. Lewis, PhD, mathematics education, history of mathematics
Aaron Montgomery, PhD, topology, algebra
Mark Oursland, EdD, mathematics education

## Associate Professors

James Bisgard, PhD, analysis
Jonathan Fassett, PhD, topology, dynamical systems
Kathryn Temple, PhD, actuarial science, probability

## Assistant Professors

Peter Klosterman, PhD, mathematics education
Jean Marie Linhart, PhD, applied mathematics
Sooie-Hoe Loke, PhD, mathematics
Janet Shiver, PhD, mathematics education
Brandy Wiegers, PhD, applied mathematics

## Senior Lecturers

Jim Miller, MAT, mathematics
Richard Trudgeon, MA, administration and curriculum

## Lecturers

Molly Andaya, MAT, mathematics
Tim Brown, MAT, mathematics
Jamie Fife, MAT, mathematics
Mathew Pruis, PhD. Advance data analytics and data science
Stephen Stein, PhD, educational administration
Tyler Suronen, MS, mathematics
Drewcilla Walter, MS, mathematics

## Staff

Brenda Bland, secretary supervisor

## Department Information

Mathematics is an expanding and evolving body of knowledge as well as a way of perceiving, formulating, and solving problems in many disciplines. The subject is a constant interplay between the worlds of thought and application. The student of mathematics will find worthy challenges and the subsequent rewards in meeting them.

The general student will find preparatory courses in pre-calculus mathematics and traditional mathematics courses such as calculus, linear algebra, geometry, abstract algebra, and analysis. Also, more specialized courses in discrete mathematics, number theory, and the history of mathematics are offered. Special needs of computer science majors, elementary education majors, and general education requirements are also met by courses in the mathematics department.

For those desiring concentrated work in mathematics, the mathematics department offers four programs leading to bachelor's degrees. A bachelor of arts or bachelor of science in mathematics prepares the student as a mathematician for industry or graduate work. A bachelor of arts in secondary teaching prepares the student to teach at the junior, middle, or high school levels. A bachelor of science in mathematics with an actuarial science specialization prepares the student to work as an actuary or in applied statistics. A mathematics minor and a secondary teaching minor are also available.

One graduate degree is offered: the master of arts for teachers. This is described in the graduate section of the catalog.

All programs (major, minor, including electives) must be on file
and approved by the department at least one academic year preceding graduation.

## Admission and Placement Notes

Enrollment in MATH 100C, MATH 101, MATH 102, MATH 130, and MATH 164 requires a satisfactory score on one of the following tests: SAT, ACT, COMPASS Test, or the Intermediate Assessment Test.
The scores on the SAT or ACT tests must have been achieved within the last three years before math placement. The student with insufficient test scores is encouraged to enroll in developmental classes. For more information drop by the Math Center in Hertz Hall, room 101 or call 509-963-1834.
Students who wish to enroll in pre-calculus (MATH 153 or MATH 154) or calculus (MATH 170 or MATH 172) and who have not had the necessary prerequisite course at a college or university must take the mathematics placement test. Students will be placed in accordance with their results on this test as determined by the mathematics department. Students may be placed into pre-calculus I (MATH 153) if they received a B or higher in a one-year high school calculus course. See the mathematics department for more details.
Admission to any mathematics course having prerequisites requires either a suitable math placement test score or a grade of 2.0 or higher in each listed prerequisite to that course.

## Admission Requirements for Mathematics Teaching Secondary Program

Admission to the mathematics teaching secondary major or certificate program is selective. A cumulative grade point average of 2.50 is required in the pre-admission courses listed below. Further, students must successfully complete MATH 272 and MATH 265 by spring quarter of the academic year of their acceptance into the program. A completed application must include the standard major application form and a mathematics-advisor-approved graduation plan.

Students planning to major or take the certificate in secondary mathematics teaching must first take MATH 172, MATH 173, MATH 265, and MATH 272; be accepted as a mathematics education major or accepted into the certificate program; and be preliminary accepted into the Professional Education Program to enroll in MATH 299E, Orientation Seminar: Secondary Mathematics, fall quarter.

Students interested in the Secondary Mathematics Teaching Program need to meet with a mathematics education advisor during their first quarter at CWU. Students taking this major are required to complete the Professional Education Program with the exception of EFC 315, EFC 330, EFC 340, EFC 350, and EFC 416 ( 37 total credits required).

## Pre-admission Requirements

Applicants for admission into the Secondary Mathematics Teaching Program:

Must have completed English and Math basic skills courses or have completed an AA degree.

Must have completed MATH 272 and MATH 265, with a grade of C or higher, before enrolling MATH 299E.
Must be preliminarily accepted into the Professional Education Program.

## Admission Requirements for Mathematics Major and Minor

 Admission to any major in the mathematics department will be considered after the first two quarters of calculus are taken (MATH 172 and MATH 173). Transfer students with the calculus background will generally take and successfully complete ( 2.0 or higher) 10 hours of math beyond calculus to be admitted to a major. Application forms are available from the mathematics department office. Students must meet with an advisor in the mathematics department before being considered for major or minor. In addition, students must earn a minimum grade of C in any course that fulfills a major or minor requirement.
## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/math or by contacting the department directly.

## Mathematics: Middle-Level Education, BA

This major partially satisfies the criteria for a teaching endorsement in Middle Level Mathematics (4-9), qualifying students to teach mathematics at the middle school or junior high levels. Students are encouraged to seek a second major or minor in an approved area. The coursework provides experiences in mathematics content and pedagogy. The major addresses the recommendations from the Mathematical Association of America, the American Mathematical Society, and the Washington State competencies for middle level math teachers.

This major requires completion of all Teacher Certification and Professional Education Program requirements. The STEM Teaching Program (44 credits) serves as an alternative to the Professional Education Program. Students must be admitted to an approved teacher preparation program and have successfully completed Math 130 and Math 154 prior to acceptance into this major. Students who successfully complete the Mathematics: Middle Level Education, BA and an approved teacher preparation program are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and minor courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the middle level mathematics teaching advisor as soon as possible to develop a course of study.

## Admission Requirements

Admission to the middle level mathematics major will be considered after all prerequisites are met. Students must have a GPA of 3.0 or higher and must have earned a C or higher in any course taken in the MLM major and an approved teacher education program including prerequisite courses.

## Graduation Requirements

Students must complete all courses in the major and an approved Teacher Certification and Professional Education Program which may be the STEM Teaching Program with a C or higher and must maintain a GPA of 3.0 or higher.

## Program Requirements

Students must complete all courses in the major and an approved teacher preparation program with a C or higher and must maintain a GPA of 3.0 or higher.

Prerequisites Credits: 10

Students must complete Math 130 and Math 154 before being admitted to the major. Students with appropriate placement scores may test out of the classes.

- MATH 130 - Finite Mathematics Credits: (5)
- MATH 154 - Pre-Calculus Mathematics II Credits: (5)

Required Courses Credits: 40

- MATH 170 - Intuitive Calculus Credits: (5)
- MATH 206 - Mathematics for Teachers: Number and Operations Credits: (4)
- MATH 226 - Mathematics for Teachers: Geometry and Measurement Credits: (4)
- MATH 232 - Discrete Modeling for Middle-level Teachers Credits: (4)
- MATH 306 - Middle-level Mathematics Standards Review Credits: (2)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- MATH 316 - Mathematics for Teachers: Proportional Reasoning and Algebra Credits: (4)
- MATH 405 - Probability and Statistics for Teachers Credits: (4)
- MATH 406 - Algebra for Teachers Credits: (4)
- MATH 456 - Geometry for Teachers Credits: (4)

Total Credits: 50

STEM Teaching Program Credits: 44-50 (or Professional Education Program)

STEM Teaching Program
Professional Education Program

Total Credits: 94-100

College of the Sciences

## Mathematics: Secondary Education, BA

This major is the most efficient pathway for students seeking teaching endorsement in secondary mathematics.

Admission Requirements for BS Mathematics Majors,
Mathematics Minor and and BA Mathematics: Secondary Education
Admission to any of the above majors in the mathematics department will be considered after the first two quarters of calculus are taken (MATH 172 and MATH 173). Students with credit for MATH 173 should contact the Mathematics Department to meet with a faculty advisor. Application forms are available from the mathematics department office. Students must meet with a mathematics faculty advisor before being considered for the mathematics majors or minor. Students must earn a minimum grade of C in any course that fulfills a major or minor requirement.

## Additional Requirements for Mathematics: Secondary Education

The Mathematics: Secondary Education BA, Mathematics (Small Plan) BS, or Applied Mathematics BS Majors partially satisfy the criteria for teaching endorsement in Mathematics (512), qualifying students to teach mathematics at the high school, middle, or junior high levels. Students who successfully complete one of these three majors with the listed elective restrictions and the STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the secondary mathematics teaching advisor as soon as possible to develop a course of study.

## Graduation Requirements

Students must earn an C or higher in each course in the major.

## Required Courses

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 314 - Probability and Statistics Credits: (5)
- MATH 332 - Discrete Models Credits: (4)
- MATH 355 - College Geometry I Credits: (4)
- MATH 360 - Algebraic Structures I Credits: (3)
- MATH 361 - Algebraic Structures II Credits: (3)
- MATH 376 - Differential Equations I Credits: (3)
- MATH 410A - Advanced Statistical Methods I Credits: (4)
- MATH 430 - Introduction to Theory of Numbers Credits: (3)
- MATH 455 - College Geometry II Credits: (3)

Total Credits: 61

STEM Teaching Program Credits: 44-50 (or Professional Education Program)

STEM Teaching Program
Professional Education Program

Total Credits: 105-111

## Actuarial Science Major, BS

An actuary is a business professional who uses specialized skills from probability, statistics and economics to define, analyze, and solve financial and social problems. Actuaries create and manage insurance programs that reduce the adverse financial impact of both expected and unexpected events, such as illnesses, accidents, death, or catastrophes. In addition, actuaries design healthcare and pension plans, making sure there are sufficient resources to pay health and retirement benefits while charging participants a fair price. Actuaries are also in demand in the growing enterprise risk management field, helping companies analyze and hedge risks.

The bachelor of science in actuarial science is listed below and is designed to prepare a student in both the mathematics and business areas necessary for success in the rigorous but rewarding actuarial profession.

## Admission Requirements

Completion of MATH 172 and MATH 173 with grades of C or higher.

## Graduation Requirements

All courses in the major must be completed with grades of C or higher.

Required Courses

- ACCT 251 - Financial Accounting Credits: (5)
- OR ACCT 301-Accounting Skills for Non-Business Majors Credits: (5) (ACCT 301 recommended.)
- CS 105-The Logical Basis of Computing Credits: (4)
- OR CS 110 - Programming Fundamentals I Credits: (4)
- CS 367 - Advanced Visual Basic Programming Credits: (4)
- ECON 201 - Principles of Economics Micro Credits: (5)
- ECON 202 - Principles of Economics Macro Credits: (5)
- FIN 370 - Introductory Financial Management Credits: (5)
- FIN 475 - Investments Credits: (5)
- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)

## Applied Mathematics Major, BS

The applied mathematics major is intended primarily for students interested in applications of mathematics to other disciplines.

Admission Requirements for Mathematics Major and Minor Admission to any major in the mathematics department will be considered after the first two quarters of calculus are taken (MATH 172 and MATH 173). Transfer students with the calculus background will generally take and successfully complete ( 2.0 or higher) 10 hours of math beyond calculus to be admitted to a major. Application forms are available from the mathematics department office. Students must meet with an advisor in the mathematics department before being considered for major or minor. In addition, students must earn a minimum grade of C in any course that fulfills a major or minor requirement.

## Required Courses Credits: 70

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 299S - Seminar - Math Major Orientation Credits: (4)
- MATH 314 - Probability and Statistics Credits: (5)
- MATH 365 - Linear Algebra II Credits: (4)
- MATH 371 - Advanced Calculus Credits: (4)
- MATH 376 - Differential Equations I Credits: (3)
- MATH 377 - Differential Equations II Credits: (3)
- MATH 475 - Mathematical Modeling Credits: (4)
- MATH 476 - Numerical Methods and Analysis I Credits: (4)
- MATH 477 - Numerical Methods and Analysis II Credits: (4)
- MATH 499S - Senior Seminar Credits: (2)

Choose one of the following two options:

- MATH 335-Combinatorics and Graph Theory Credits: (4)
- MATH 351 - Point Set Topology Credits: (4)

Department-Approved Electives Credits: 6

Mathematics department-approved electives numbered 300 or higher including courses from departments that apply mathematics (such as biology, chemistry, computer science, economics, engineering, finance, geological science, mathematics or physics). No more than 2 credits in MATH 407 may be applied.

Total Credits: 76

## Mathematics Major, BS (Large Plan)

[^11]calculus background will generally take and successfully complete ( 2.0 or higher) 10 hours of math beyond calculus to be admitted to a major. Application forms are available from the mathematics department office. Students must meet with an advisor in the mathematics department before being considered for major or minor. In addition, students must earn a minimum grade of C in any course that fulfills a major or minor requirement.

## Required Courses

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 299S - Seminar - Math Major Orientation Credits: (4)
- MATH 314 - Probability and Statistics Credits: (5)
- MATH 335 - Combinatorics and Graph Theory Credits: (4)
- MATH 351 - Point Set Topology Credits: (4)
- MATH 365 - Linear Algebra II Credits: (4)
- MATH 371 - Advanced Calculus Credits: (4)
- MATH 376 - Differential Equations I Credits: (3)
- MATH 377 - Differential Equations II Credits: (3)
- MATH 461 - Abstract Algebra I Credits: (4)
- MATH 462 - Abstract Algebra II Credits: (4)
- MATH 471 - Advanced Analysis I Credits: (4)
- MATH 472 - Advanced Analysis II Credits: (4)
- MATH 499S - Senior Seminar Credits: (2)

Math Electives - Credits: 20

Electives Courses: 207, 320, 337, 372, 398, or any 400-level MATH course (excluding MATH 405, 406, 486, 490, 491, 499E). At most 4 credits total can be from MATH 207 and 407.

Total Credits: 98

College and Department Information

Mathematics Department
College of the Sciences

## Mathematics Major, BS (Small Plan)

The small plan major is intended primarily for students completing a double major.

## Admission Requirements for Mathematics Major and Minor

 Admission to any major in the mathematics department will be considered after the first two quarters of calculus are taken (MATH 172 and MATH 173). Transfer students with the calculus background will generally take and successfullycomplete ( 2.0 or higher) 10 hours of math beyond calculus to be admitted to a major. Application forms are available from the mathematics department office. Students must meet with an advisor in the mathematics department before being considered for major or minor. In addition, students must earn a minimum grade of C in any course that fulfills a major or minor requirement.

Required Courses

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 299S - Seminar - Math Major Orientation Credits: (4)
- MATH 335 - Combinatorics and Graph Theory Credits: (4)
- MATH 351 - Point Set Topology Credits: (4)
- MATH 365 - Linear Algebra II Credits: (4)
- MATH 371 - Advanced Calculus Credits: (4)
- MATH 499S - Senior Seminar Credits: (2)

At least two courses from the following - Credits: 8

- MATH 461 - Abstract Algebra I Credits: (4)
- MATH 462 - Abstract Algebra II Credits: (4)
- MATH 471 - Advanced Analysis I Credits: (4)
- MATH 472 - Advanced Analysis II Credits: (4)

Math Electives - Credits: 8

Electives Courses: 207, 320, 337, 372, 376, 377, 398, or any 400-level MATH course (excluding MATH 405, 406, 486, 490, 491, 499S). At most 4 credits total can be from MATH 207 and 407.

Applications of Math Electives - Credits: 6

Math department-approved electives in Application oriented courses, numbered 300 or higher (could be in Math, Physics, Econ, Finance, Chemistry, Biology)

Total Credits: 73

College and Department Information

Mathematics Department
College of the Sciences

## Mathematics Minor

## Program Requirements

Students must earn a minimum grade of C in any course that fulfills a major or minor requirement.

## Required Courses Credits: 10

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)

Department-Approved Electives Credits: 12

- At least 12 credits of electives in mathematics, which MUST include at least one of MATH 260 or MATH 265. Credits: (12)
- MATH 260 - Sets and Logic Credits: (5)
- MATH 265 - Linear Algebra I Credits: (4)
- MATH 272 - Multivariable Calculus I Credits: (5)
- MATH 273 - Multivariable Calculus II Credits: (5)
- MATH 311 - Statistical Concepts and Methods Credits: (5)
- MATH 314 - Probability and Statistics Credits: (5)
- MATH 330 - Discrete Mathematics Credits: (5)
- MATH 335 - Combinatorics and Graph Theory Credits: (4)
- MATH 351 - Point Set Topology Credits: (4)
- MATH 376 - Differential Equations I Credits: (3) Other MATH courses, numbered 200 or higher, may be used to satisfy the elective requirements, subject to approval of the mathematics department.

Total Credits: 22

See website for how these programs may be used for educational and career purposes

## Director

Lucinda Carnell

## Staff

Marna Carroll, faculty coordinator
Kristina Owens, program coordinator

## Program Information

The Ronald E. McNair Scholars Program at CWU is funded by a grant from the Department of Education under the TRIO Programs.
This is an academically rigorous program, not a scholarship. The program is designed to provide underrepresented (low-income and first-generation, and/or ethnic minority) students with the training and opportunity to prepare for and successfully apply to
graduate school programs. To this end, admitted scholars are required to complete graduate school preparation seminars. The goal of the program is for scholars to attain their doctorates and teach at universities.

A cornerstone of this program is the linking of scholars with faculty mentors. Students are expected to complete a summer research internship under the supervision of a research mentor. Scholars also have the option of a teaching internship during one academic quarter and/or pursuing a leadership development track during their second year as a McNair Scholar.

CWU students are encouraged to apply to the McNair Scholars Program as sophomores or juniors and are selected on the basis of their academic excellence, career objectives and faculty recommendations.

## Admission Requirements

Students must meet the following eligibility requirements:
Be a U.S. citizen or permanent resident;
Be a low-income student who is also a first-generation college student; or must be a member of a group that is underrepresented in graduate education (African American, American Indian/Alaskan Native, Hispanic/Latino, or Native Hawaiian/Pacific Islander);
Be currently enrolled as an undergraduate in a degree program at CWU
Must have completed 90 quarter credits by the time you begin the McNair Scholars Program
Must have at least one year remaining before graduation
Must have a minimum cumulative GPA of 2.9 and a major GPA of at least 3.1
Must express a desire to attain a PhD
Complete an application, complete with form, two letters of recommendation, and a personal statement. Application materials and deadlines are available on the program website.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/menair-scholars or by contacting the department directly.

## Department Information

The Department of Military Science's courses are designed to prepare scholars, athletes, and junior leaders for commissioning in the U.S. Army. Students who complete the Military Science Program and meet commissioning requirements will be eligible for a commission as a second lieutenant in the U.S. Army, Army Reserve, or Army National Guard. The on-campus instructional program is designed to fit into the regular academic schedule of the university and is taught by Army professors and instructors.

The academic program consists of military science, leadership labs, and off-campus summer training. Academic studies include courses in basic military tactics, principles of leadership, officership, communication, personnel and logistics management, staff management procedures, physical conditioning, land navigation, and military law. Various training activities are scheduled each quarter to further familiarize the student with the ROTC Program.

Textbooks and uniform items are furnished through the Department of Military Science. The MSL 100 and MSL 200 classes are open to any student to explore their military interests and are non-contractual. Advancement to MSL 300 and MSL 400 courses to complete a minor in military science is by permission only.

Upon completion of the military science core (OPTION 1, 2, or 3 ; see below) requirements, leadership development and assessment course, and receipt of a bachelor's degree, students seeking an officer commission are able to select full-time employment (active Army) or part-time employment through the Army National Guard or the Army Reserve.

Additional information concerning the Military Science Program may be obtained by writing: Central Washington University, Military Science, Peterson Hall, 400 E. University Way, Ellensburg, Washington 98926-7569, stopping by the military science department in Peterson Hall, room 202, calling 509-9633518 , or by visiting the military science website at www.cwu.edu/~roo/.

Post Bachelor's Degree Fellowships: Graduating seniors may compete for several fully-funded Army graduate fellowships.

Transfer Students: Students transferring from other institutions, including community colleges considering entrance in the Military Science Program must make an appointment for a departmental interview for candidacy and scholarships.

Graduate Students: Graduate students interested in obtaining a commission as a second lieutenant should contact the Department of Military Science in Peterson Hall for academic planning and application.

Veterans: Veterans are encouraged to contact one of the military science academic advisors for information and outline of benefits available while participating in the ROTC program.

Scholarships: ROTC scholarships pay tuition and required fees. They're awarded on merit-academic achievements, extracurricular activities, and personal interviews. Four-, threeand two-year scholarships are available each academic year to qualified students. Applications can be obtained from the military science department.

Stipends: All fully contracted cadets receive a stipend (\$300 freshman, $\$ 350$ sophomore, $\$ 450$ junior, $\$ 500$ senior) for each academic month plus an allowance for books and other educational items. Non-scholarship students can receive the stipend as a contracted cadet during their last two years.

Special Training Opportunities: Summer training opportunities are through the Department of the Army Schools. The available schools include: airborne (parachute) training, air assault training, Northern Warfare School, and special forces.
Additionally, Cadet Troop Leadership Training (CTLT) is also available to all cadets who have completed the military science minor core, been accepted in the military science minor, completed the MSL 301, 302, and 303 courses of study, and the leader development and assessment course. CTLT provides leadership experience in an active Army unit for two weeks prior to returning for the senior year of college study. CTLT is available in the U.S., Europe, and the Pacific Rim. Specialized training opportunities are by permission only.

## Prerequisites for Advancement to the Military Science Minor

Admission into the MSL minor will be based upon an overall grade point average (GPA) of 2.5 .
The department chair may admit a limited number of students with GPAs under 2.5.
Students seeking the military science minor must complete all application requirements prior to declaring military science as a minor.
Complete the core requirements with a GPA of 3.0 or higher.
The Department of Military Science reserves the right to modify these requirements in special cases.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the
department website: www.cwu.edu/army or by contacting the department directly.

## Military Science Minor

Participation in this minor is contingent upon completion of the ROTC core (Option 1, 2 or 3) listed above and acceptance as a contracted student in the advanced course in the Army ROTC program. Application may be made at the military science department, Peterson Hall.

Military Science Minor Core

## Option 1

No military obligation is incurred under Option 1 or Option 3.

## Required Courses

- MSL 101 - Foundations of Officership Credits: (1)
- MSL 102 - Basic Leadership Credits: (2)
- MSL 103 - Advanced Leadership Credits: (2)
- MSL 201 - Individual Leadership Studies Credits: (2)
- MSL 202 - Leadership and Teamwork Credits: (2)
- MSL 211 - Land Navigation Credits: (2)

Military Science Core Total Credits: 11
Option 2

Required Courses

- Select 3 credits from the list of approved electives Credits: (3)
- MSL 292 - Leader's Training Course, Internship Credits: (8) (This course can be taken as non-credit)

Military Science Core Total Credits: 11
Option 3

No military obligation is incurred under Option 1 or Option 3.
Verification of completion of prior military service initial entry program. This option is by permission only. See department for further information.

## Required Courses

- HIST 314 - Military History of the United States Credits: (5)
- MSL 301 - Leadership and Problem-Solving Credits: (3)
- MSL 302 - Leadership and Ethics Credits: (3)
- MSL 303 - Leadership and Small Group Tactics Credits: (3)
- MSL 401 - Leadership and Management Credits: (4)
- MSL 402 - Officership Credits: (4)
- MSL 403 - Officership II Credits: (2)

Select from the following - Credits: 2-5

- CS (Computer Science), Any Course Credits: (4-5)
- IT 101 - Computer Applications Credits: (3)

Total Credits: 26-29

## Faculty and Staff

Interim Chair
Nikolas Caoile, DMA

## Interim Associate Chair

Bret Smith, PhD

## Professors

Joseph Brooks, MM, clarinet, saxophone, woodwind methods
Chris Bruya, MM, jazz studies
Mark Goodenberger, MM, percussion
John Harbaugh, MME, trumpet, jazz studies
Mark Lane, MM, music education, band
Carrie Rehkopf-Michel, MM, violin, chamber music, Kairos
String Quartet
John Michel, MM, cello, chamber music, pedagogy, Kairos
String Quartet
Hal Ott, DM, flute, literature
John F. Pickett, DM, piano, literature, pedagogy
Vijay Singh, MAT, jazz studies, choir, voice
Jeffrey Snedeker, DMA, french horn, music history
Gary Weidenaar, DMA, choir, conducting, music education

## Associate Professors

Gayla Blaisdell, PhD, voice, opera
Nikolas Caoile, DMA, orchestra, conducting
Daniel Lipori, DMA, music history, bassoon, double reed methods
Bret Smith, PhD, music education, string pedagogy

## Assistant Professors

Martin Kennedy, DMA, theory, composition
John Neurohr, DMA, trombone, brass pedagogy, brass literature Lewis Norfleet, MM, bands, music education, conducting

Mark Samples, PhD, musicology, general education
Melissa Schiel, DMA, voice, pedagogy

## Lecturers

Tor Blaisdell, MM, voice
Laura Goben, BM oboe
Teresa Harbaugh, MM, class piano
Aaron Hirsch, MM, orchestra, conducting
Anna Jensen, MM, string bass
David McLemore, MM, tuba, euphonium, history of jazz
Kirsten Neurohr, DMA, theory, music appreciation
Adam Pelandini, MM, saxophone
Scott Peterson, DMA, men's choir
Barbara Pickett, MM, piano, class piano
Michelle Rahn, DMA, viola
Maria Roditeleva-Wibe, PhD, music history, theory, world music
Leslie Schneider, MM, music education
Emelie Spencer, MM, voice, theory
Norm Wallen, MM, theory

## Staff

Marcie Brown, program assistant
Allen Larsen, hall manager, audio technician, web manager
Teresa Larsen, secretary supervisor
Shannon Martin, fiscal specialist
Kirsten Neurohr, interim advisor/recruiter
Harry Whitaker, piano technician

## Mission

The Department of Music is a community of artists, scholars, and educators dedicated to achieving the highest standards of musical knowledge, performance, and teaching. The department is committed to preparing students for careers in music, providing the opportunity to become literate, skilled, knowledgeable, and confident music educators, performers, and practitioners, able to influence and enrich the musical lives of the communities in which they serve. The department provides opportunities for the general student to study music as an essential part of a liberal arts education and engage in artistic experiences, serve as a leader for K-12 music education, and provides opportunities for the general public to experience music performances of the highest quality in a broad range of styles and genres.

## Vision

The Department of Music will be recognized and respected for its challenging curriculum and supportive environment, for the excellence of its student, ensemble and faculty performances in a broad range of styles and genres, and for the fulfillment of its motto: "Where teaching is a performing art."

## Core Values

As a community of practicing musicians and scholars, we believe that the department's mission is best realized when we:

- Hold each student's greatest good as our primary concern
- Provide models of the highest ethical and moral standards
- Deem outstanding teaching to be the most important attribute of the faculty
- Implement a rigorous curriculum in each degree program
- Regard each degree program as equally valid, with no program intrinsically superior to any other
- Create an intellectually and emotionally safe environment in which students can learn, develop and mature
- Respect and embrace diversity in all its forms
- Respond creatively and thoughtfully to the inevitable changes of the fluid society in which we live

## Accreditation

The department is an institutional member of the National Association of Schools of Music (NASM).

## Admission Requirements

All entering students who plan to pursue either a major or minor in the music department must audition for acceptance into the program before a faculty committee. See the department's website for audition information.

## Common Exit Requirements

All music majors must pass a keyboard proficiency exam as a graduation requirement. Music education majors will not be scheduled for student teaching until this proficiency is completed.

## Standards

Music education majors must meet the standards for acceptance into the Teacher Certification Program.

## Required Participation:

- All entering music majors with no previous college music theory credits must pass an online exam in music fundamentals as a prerequisite for MUS 144, the first quarter of the theory sequence (fee required).
- All entering music majors with college credits in music theory must take an in-house diagnostic theory exam, which will be given during the transfer student orientation sessions and before the fall quarter begins. Credit for previous college theory courses may be given based on the results of this exam. Details about both exams can be found on the department website.
- All music majors must enroll in a large ensemble appropriate to their major performance area during each quarter of enrollment as a full-time student. Enrollment in either Women's Choir or Men's Choir can be substituted for enrollment in a choral large ensemble for a maximum of three quarters.

## Graduation Requirements

- All music majors must pass the required piano proficiency exam. MUS 154A (Piano Class III) must be retaken until this requirement is fulfilled.
- All music majors must attend four (4) convocations and an average of eight (8) recitals/concerts for each quarter, (Fall, Winter, and Spring) that they are in residence.

## Departmental Honors

Consult the department website for information about the departmental honors program.

## Certification Programs

Students enrolled in music education degree programs will be concurrently enrolled in the Teacher Certification Program through the College of Education and Professional Studies, and upon completion of all requirements will be recommended to Washington's Office of the Superintendent of Public Instruction (OSPI) for the Residency Teacher Certificate with endorsement in K-12 Choral, General, and/or Instrumental Music. The department also offers post-baccalaureate students the opportunity to earn teaching certification in these three endorsement areas. To enter the post-baccalaureate certification program, a baccalaureate degree in music is required. Candidates must be fully admitted to the Teacher Certification Program and be admitted by the Department of Music after application and transcript review. Recommendation for certification requires completion of all courses listed in the CWU curricular requirements for the Bachelor of Music: Music Education specialization with a "C" grade or above. Consultation with the faculty music education specialist and department advisor is mandatory for students entering the postbaccalaureate program.

## Department Fees

All fees are billed to students' accounts.

- $\quad \$ 15$ fee for each MUS 154 (Class Instruction) course (all sections except B and H ).
- $\quad \$ 125$ fee for 1 credit and $\$ 250$ fee for 2 credits each quarter of enrollment in MUS 164, 264, or 364 (Individual applied instruction).
- $\quad \$ 250$ fee each quarter of enrollment in MUS 464 (Individual applied instruction).
- $\quad \$ 125$ fee for 2 credits and $\$ 250$ fee for 4 credits each quarter of enrollment in MUS 564 and 664 (Individual applied instruction).
- $\quad \$ 125$ fee each quarter of enrollment in X71 (Secondary applied instruction).
- $\quad \$ 40$ fee each quarter for students enrolled in Vocal Jazz I
- $\quad \$ 50$ fee for each scheduled student recital
- $\quad \$ 15$ fee for each MUS 252, 253, and 254 (Class Instrumental Methods) course
- $\quad \$ 5$ annual locker fee (Optional if you choose to get a locker)
- $\quad \$ 5$ fee for students enrolled in Percussion Ensemble
- $\quad \$ 25$ university tech fee covers use of electronic equipment used in all music courses. Part-time students enrolled in theory, class piano, composition, or electronic music courses will be assessed this fee.

## Applied Music (Individual Lessons)

Student advancement through performance levels (164-464) is determined by jury examination. This is done at the end of the quarter when a level change is attempted. Students studying at the 364 level must present a one-half recital as a graduation requirement. Students studying at the 464 level must present at least a full recital as a graduation requirement. See the Undergraduate Handbook for policies regarding applied music study. The handbook is available on the department website at www.cwu.edu/~music. Applied music requirements differ according to the degree.

## Ensemble Participation

Participation in performance ensembles is an essential part of the music major experience. Rehearsing and performing as part of a band, orchestra, or choir provides many benefits. It develops musical listening and performing skills, expands knowledge of repertoire, including contemporary and traditional works, provides the opportunity to learn the style characteristics of historical periods and elements of musical structures, and promotes cohesiveness in the musical community.

For future music directors and educators, the ensemble directors serve as models of how to develop such ensembles and how to utilize efficient and productive rehearsal techniques. To ensure that all music majors derive full benefit of this experience, participation in a large ensemble (defined below) appropriate to the major performing area is required of all music majors every quarter in residence as a full-time student, regardless of the number of credits required in each degree.

When circumstances justify not being in a large ensemble, a large ensemble participation waiver form, available in the music department office and signed by the applied instructor/advisor and ensemble director, must be submitted for approval by the department chair.

Only the following are designated as large ensembles: Wind Ensemble, MUS 266/466; Choir, MUS 267/467; Chamber Choir, MUS 268/468; Orchestra, MUS 277/477; Marching and Concert Band, MUS 287/487 (fall quarter only); Concert Band, MUS 288/488. Enrollment in either Women's Choir or Men's Choir can be substituted for enrollment in a choral large ensemble for a maximum of three quarters.

## Bachelor of Music - Composition Major

Bachelor of music in composition is intended for students whose primary interest is in composition and for those who intend to pursue graduate work in music theory or composition. Audition requirement: Submit 2 or 3 short contrasting compositions and demonstrate proficiency on a primary instrument. (Formal declaration of a major in composition cannot occur until the end of the first-year theory sequence 146 and 146A with the grade of at least a B- in all theory courses. Students must also, complete MUS 120, and have instructor.) Transfer students may bypass MUS 120 with permission based upon composition knowledge, submissions, and a successful audition on their primary instrument. It will normally take transfer students three years to complete the degree requirements.

## Bachelor of Music - Music Education with Specializations

All students majoring in music education will work with the department Advising Specialist and faculty music education specialist during the program. At the end of the sophomore year, students will meet individually with members of the music education faculty to review academic status and progress toward program completion. All music education majors must pass the required piano proficiency examination prior to endorsement for student teaching. Students in this major must apply for admission into the Teacher Certification Program housed in the College of Education and Professional Studies. This is typically done at the beginning of the student's second year. Transfer students should apply prior to or during their first quarter on campus. Students are required to complete the Professional Education Program requirements offered through the College of Education and Professional Studies.

## Music Courses

Performance activities are designated by the following code:
A. Piano
B. Voice
C. Strings
D. Woodwinds
E. Brass
G. Percussion

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/music or by contacting the department directly.

## Music Major, BA

## BA Music Core Requirements

Music Theory - Credits: 21

Students must pass an online fundamental exam with 75\% (\$10 fee) or take and pass ( $75 \%$ ) an online fundamental course ( $\$ 99$ fee) to enroll in MUS144. Students must take a placement exam to waive any of the following courses. Concurrent enrollment of the following is required: (MUS 144, 144A, 152A), (MUS 145, 145A, 153A), and (MUS 146, 146A, 154A). A grade of C or better is required in both the written and aural components to continue in the theory sequence.

- MUS 144 - Theory 1 Credits: (3)
- MUS 144A - Aural Skills 1 Credits: (1)
- MUS 145 - Theory 2 Credits: (3)
- MUS 145A - Aural Skills 2 Credits: (1)
- MUS 146 - Theory 3 Credits: (3)
- MUS 146A - Aural Skills 3 Credits: (1)
- MUS 244 - Theory 4 Credits: (3)
- MUS 245 - Theory 5 Credits: (3)
- MUS 246 - Theory 6 Credits: (3)

Class Piano - Credits: 3

A waiver of this requirement can be obtained by demonstrating sufficient keyboard skills to designated piano faculty members.

- MUS 152A - Class Piano I Credits: (1)
- MUS 153A - Class Piano II Credits: (1)
- MUS 154A - Class Piano III Credits: (1)

Music History - Credits: 11

- MUS 359 - Survey of Music in Cross-cultural Perspectives Credits: (2)
- MUS 372 - Music History 1 Credits: (3)
- MUS 373 - Music History 2 Credits: (3)
- MUS 374 - Music History 3 Credits: (3)

Total Core Credits: 35

Required Courses

Ensembles - Credits: 12

- Large Ensemble (minimum) Credits: (12) Only the following are designated as large ensembles: MUS 267-467 (choir), MUS 268-468 (chamber choir), MUS 266-466 (wind ensemble), MUS 277-477 (orchestra), MUS 287-487 (marching and concert band-fall quarter only), and MUS 288-488 (symphonic band).

Applied Music - Credits: 9-12

- Individual Instruction - (MUS 164, 264, and 364) Credits: (9-12) (NOTE: at least one credit of 364 must be completed on primary instrument)

Upper-division Music Theory - Credits: 3

- MUS 340 - Form and Analysis Credits: (3)

Conducting - Credits: 3

- MUS 341 - Conducting I Credits: (3)

Upper-division Music History - Credits: 3

Choose one:

- MUS 356 - Jazz Styles Credits: (3)
- MUS 382 - Survey of Chamber Music Credits: (3)
- MUS 384 - Survey of Choral Music Credits: (3)
- MUS 385 - Survey of Opera Credits: (3)
- MUS 386 - Survey of 20th-century Music Credits: (3)

Additional Courses - Credits: 2-5

- MUS 495 - Senior Project Credits: (2)
- Music Electives Credits: (0-3)

Total Credits: 70

## Music Education Major BM, Broad Area Specialization

Choral Music, General Music, and Instrumental Music Endorsements

Students taking this major must apply and be fully admitted to the Teacher Certification Program through the College of Education and Professional Studies. In addition to the degree requirements of the Bachelor of Music: Music Education Major, students must also successfully complete the Professional Education Program housed in the School of Education.

All students majoring in music education will be reviewed and counseled by the Music Education Committee at the end of the sophomore year. The purpose of these reviews is to assist the student in developing all the skills necessary to be an effective music educator.

In order to receive departmental approval to student teach, the student must receive a satisfactory evaluation in all areas of music study. All music education majors must pass the required piano proficiency examination prior to application for student teaching.

This major satisfies the requirements for the Washington Residency Teacher Certificate with endorsements in Choral Music (K-12), General Music (K-12), and Instrumental Music (K-12) as established by the Office of the Superintendent of Public Instruction (OSPI). To qualify for student teaching, the following courses must be completed: MUS 323, MUS 325, MUS 329, MUS 341, and MUS 342. Students completing the program requirements (including passing the edTPA during student teaching and the WEST-E in each endorsement area) will be recommended to OSPI for certification.

Music Education, BM, Core Requirements

Music Theory - Credits: 21
Students must pass an online fundamental exam with $75 \%$ (\$10 fee) or take and pass ( $75 \%$ ) an online fundamental course ( $\$ 99$ fee) to enroll in MUS144. Students must take a placement exam to waive any of the following courses. Concurrent enrollment of the following is required: (MUS 144, 144A, 152A), (MUS 145, 145A, 153A), and (MUS 146, 146A, 154A). A grade of C or better is required in both the written and aural components to continue in the theory sequence.

- MUS 144 - Theory 1 Credits: (3)
- MUS 144A - Aural Skills 1 Credits: (1)
- MUS 145-Theory 2 Credits: (3)
- MUS 145A - Aural Skills 2 Credits: (1)
- MUS 146 - Theory 3 Credits: (3)
- MUS 146A - Aural Skills 3 Credits: (1)
- MUS 244 - Theory 4 Credits: (3)
- MUS 245 - Theory 5 Credits: (3)
- MUS 246 - Theory 6 Credits: (3)

Class Piano - Credits: 3

A waiver of this requirement can be obtained by demonstrating sufficient keyboard skills to designated piano faculty members.

- MUS 152A - Class Piano I Credits: (1)
- MUS 153A - Class Piano II Credits: (1)
- MUS 154A - Class Piano III Credits: (1)

Ensembles - Credits: 22

- Only the following are designated as large ensembles: MUS 267-467 (Choir), MUS 268-468 (Chamber Choir), MUS 266-466 (Wind Ensemble), MUS 277-

477 (Orchestra), MUS 287-487 (marching and concert band-fall quarter only), and MUS 288-488 (Symphonic Band).

## Applied Music - Credits: 11

- Individual Instruction - Credits (11) MUS 164, 264, and 364 (at least 2 credits of 364 are required)
- MUS 300 - Recital Performance Credits: (1) (Must be concurrently enrolled in 364)

Conducting - Credits: 6

- MUS 341 - Conducting I Credits: (3)
- MUS 342 - Conducting II Credits: (3)

Music History - Credits: 11

- MUS 359 - Survey of Music in Cross-cultural Perspectives Credits: (2)
- MUS 372 - Music History 1 Credits: (3)
- MUS 373 - Music History 2 Credits: (3)
- MUS 374 - Music History 3 Credits: (3)

Total Core Credits: 75

Required Courses Credits: 13

- MUS 240 - Diction in Singers I (Intro to IPA, Italian, Latin, English) Credits: (2)
- MUS 241 - Diction for Singers 2 (Advanced IPA and German) Credits: (2)
- OR MUS 242 - Diction for Singers 3 (Advanced IPA and French) Credits: (2)
- MUS 323 - Choral Music Education Credits: (3)
- MUS 329 - General Music Methods Credits: (3)
- MUS 425B - Pedagogy, Vocal Credits: (3)

Upper-Division Music Theory Credits: 3

Choose one course from the following:

- MUS 340 - Form and Analysis Credits: (3)
- MUS 422 - Orchestration Credits: (3)
- MUS 485 - Choral Arranging Credits: (3)

Choral Music Total Credits: 91

# Music Education Major BM, Instrumental Music Specialization 

Instrumental Music and General Music Endorsements

Students taking this major must apply and be fully admitted to the Teacher Certification Program through the College of Education and Professional Studies. In addition to the degree requirements of the Bachelor of Music: Music Education Major, students must also successfully complete the Professional Education Program housed in the School of Education.

All students majoring in music education will be reviewed and counseled by the Music Education Committee at the end of the sophomore year. The purpose of these reviews is to assist the student in developing all the skills necessary to be an effective music educator.

In order to receive departmental approval to student teach, the student must receive a satisfactory evaluation in all areas of music study. All music education majors must pass the required piano proficiency examination prior to application for student teaching.

This major satisfies the requirements for the Washington Residency Teacher Certificate with endorsements in Instrumental Music (K-12) and General Music (K-12) as established by the Office of the Superintendent of Public Instruction (OSPI). To qualify for student teaching, the following courses must be completed: MUS 325, MUS 329, MUS 341, and MUS 342. Students completing the program requirements (including passing the edTPA during student teaching and the WEST-E in each endorsement area) will be recommended to OSPI for certification.

## Non-profit Organization Management Minor (MUS)

## (See catalog under communication department for details)

The minor in non-profit organization management is an interdisciplinary minor designed to provide an understanding of the organization, financing and management issues in non-profit organizations. It is designed to complement majors in artistic, advocacy and educational endeavors. The minor provides practical, hands-on skills as well as discussion of the issues facing non-profit organizations.

Total Credits: 30

Karen Turcotte, MA, philosophy and world religions, women/gender and religion, philosophy of humor

## Lecturers

Nathan Carpenter, PhD, ancient Greek philosophy, ethics Michael Fletcher, PhD, history of modern philosophy (Kant), philosophy of mind, logic and critical thinking, history of Western philosophy
Michael Hundley, PhD, world religions, ancient religious, Hebrew Bible

## Staff

Lynn Thompson, secretary senior

## Department Information

The original meaning of the word philosophy is "the love of wisdom." Philosophy therefore represents an ongoing process of critical and speculative inquiry into questions representing people's deepest concerns, such as the meaning of existence, the nature of reality, and the grounds of human conduct. The religious studies is a path of inquiry into the nature of religion, its pervasive role in human life, and its contribution to understanding human existence. The program is comparative in nature but complemented by a philosophical component focused on religion and unique electives designed to accommodate student interests.

Students may choose either a 50 - or 60 -credit major. In order to graduate, a student who completes the 50 -credit major must also have a minor or second major in another discipline. A student who completes the 60 -credit major is not required to have a minor or second major.

## Maximum Credit Overlap

No more than 10 credits of coursework counting toward any of the department's major or minor programs may also be counted toward one of the department's other programs.

Departmental Honors in Philosophy and Religious Studies The honors program in Philosophy and Religious Studies recognizes the exceptional scholarship of qualified students in either the Philosophy or the Religious Studies major. To qualify, students must have completed at least 25 credits in their major or specialization and have a minimum GPA of 3.0 overall and 3.5 in their major coursework.

In addition to their normal coursework, students seeking departmental honors must take one additional upper division course in their program, complete a superior thesis (PHIL 497 or RELS 497: Honors Thesis) to be evaluated by a second reader from the departmental faculty, and make an oral presentation. Students graduating with honors will have that accomplishment recorded on their transcripts.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/philosophy or by contacting the department directly.

# Philosophy Major, BA (50 or 60 credits) 

## Philosophy Major, BA (50 or 60 credits)

Students may choose either a 50 -credit major or a 60 -credit major. In order to graduate, a student who completes the $50-$ credit major must also have a minor or second major in another discipline. A student who completes the 60 -credit major is not required to have a minor or second major.

## Departmental Honors in Philosophy

The honors program in Philosophy recognizes the exceptional scholarship of qualified students in the Philosophy major. To qualify, students must have completed at least 25 credits in their major and have a minimum GPA of 3.0 overall and 3.5 in their major coursework.

In addition to their normal coursework, students seeking departmental honors must take one additional upper division course in their program, complete a superior thesis (PHIL 497: Honors Thesis) to be evaluated by a second reader from the departmental faculty, and make an oral presentation. Students graduating with honors will have that accomplishment recorded on their transcripts.

## Religious Studies Major, BA (50 or 60 credits)

The Religious Studies major is a path of inquiry into the nature of religion, its pervasive role in human life, and its contribution to understanding human existence. The program is comparative in nature but complemented by a philosophical component focused on religion and unique electives designed to accommodate student interests. Students may choose either a $50-$ or 60 -credit major. In order to graduate, a student who completes the 50 -credit major must also have a minor or second major in another discipline. A student who completes the 60credit major is not required to have a minor or second major.

Departmental Honors in Philosophy and Religious Studies The honors program in Philosophy and Religious Studies recognizes the exceptional scholarship of qualified students in either the Philosophy or Religious Studies major. To qualify, students must have completed at least 25 credits in their major and have a minimum GPA of 3.0 overall and 3.5 in their major coursework.

In addition to their normal coursework, students seeking departmental honors must take one additional upper division course in their program, complete a superior thesis (RELS 497:

Honors Thesis) to be evaluated by a second reader from the departmental faculty, and make an oral presentation. Students graduating with honors will have that accomplishment recorded on their transcripts.

Required Courses Credits: 35

- RELS 101 - World Religions Credits: (5)
- RELS 102 - Food, Sex, and the Other: Everyday Religion and Morality Credits: (5)
- OR RELS 103 - World Mythologies Credits: (5)
- PHIL 352 - Greek and Roman Philosophy Credits: (5)
- OR RELS 403 - Buddhist Thought and Practice Credits: (5)
- RELS 376 - Contemporary Religious Thought Credits: (5)
- RELS 494 - Undergraduate Thesis Preparation Credits: (2)
- RELS 495 - Undergraduate Thesis Credits: (3)
- OR RELS 497 - Honors Thesis Credits: (3)

## Select One - Eastern Tradition

- PHIL 345 - Chinese Philosophy Credits: (5)
- RELS 351 - Religions of China and Japan Credits: (5)
- RELS 352 - Religions of India Credits: (5)
- RELS 401 - The Daoist Tradition Credits: (5)

## Ethics Minor

A minor in ethics enables students to develop a strong sense of moral responsibility and critical skills for moral reflection. It consists of required courses in global ethics or current ethical
issues, coursework in philosophical ethics, as well as interdisciplinary electives. It also includes a capstone project to help students develop their ethical ability and awareness through service learning, a research or creative project. Such a minor can be combined with, and serve as enrichment to, any major program. As a result of completing the minor, students will be able to:

Identify and implement major moral theories from diverse traditions
Demonstrate an understanding of the cultural and historical embeddedness of ethical theories
Evaluate moral issues from a plurality of perspectives
Develop a capacity for critical moral reasoning
Analyze and evaluate the effectiveness of given moral theories in dealing with contemporary ethical problems
Learn to account for one's conduct within a larger community
Develop a sensitivity to the central moral issues in a given discipline and the capacity to act in a morally responsible manner

Required Courses Credits: (7)

- PHIL 104 - Moral Controversies Credits: (5)
- PHIL 485 - Capstone Project Credits: (2)

Courses in Philosophical Ethics Credits: (10)

Choose two courses from the following:

- PHIL 302 - Ethical Theory Credits: (5)
- PHIL 304 - Business Ethics Credits: (5)
- PHIL 306 - Environmental Ethics Credits: (5)
- PHIL 308 - Medical Ethics Credits: (5)
- PHIL 465 - Advanced Ethics Credits: (5)

Electives Credits: (8-10)
No more than 5 credits can be taken from one discipline.

- COM 202 - The First Amendment: Rights and Responsibilities Credits: (5)
- COM 333 - Communication Ethics Credits: (4) (for COM majors only)
- IT 301 - Information Technology Security, Privacy, and Ethics Credits: (3)
- LAJ 401 - Ethics, Diversity, and Conflict in Criminal Justice Credits: (4) (For LAJ majors only)
- MSL 302 - Leadership and Ethics Credits: (3) (For military science majors only)
- PHIL 325 - Women and Philosophy Credits: (5)
- PHIL 345 - Chinese Philosophy Credits: (5)
- PHIL 357 - Philosophy of Race Credits: (5)
- PHIL 309 - Ethics through Film (Put on reserve 9/16/17) Credits: (5)
- POSC 452 - The Constitution and Human Rights Credits: (5)
- POSC 475 - International Human Rights Credits: (5)
- RELS 353 - Judaism Credits: (5)
- RELS 354-Christianity Credits: (5)
- RELS 355 - Islam Credits: (5)
- RELS 376 - Contemporary Religious Thought Credits: (5)
- RELS 401 - The Daoist Tradition Credits: (5)
- RELS 403 - Buddhist Thought and Practice Credits: (5)
- SOC 320 - Death and Dying Credits: (5)
- SOC 354 - Minority Experience Credits: (5)

OR other ethics-related courses as approved by minor advisor.
Special topics courses, cooperative education credit, and independent study courses may also count towards elective credit.

Total Credits: 25-27

## Department Information

The mission of the Department of Physical Education, School Health, and Movement Studies is to promote health and active lifestyles. The vision of the Department is to create highly recognized and respected academic programs in which students gain the knowledge, skills, and dispositions to be successful in their profession. This mission and vision and the following core values help to guide program decisions within the department:

- Professional environment based on ethical behavior, respect, and integrity
- Quality of life through health promotion, healthy communities, and active lifestyles
- Student focused learning environment based on respect, relevance, and rigor
- Social justice and diversity

Proudly, graduates of each major program in the department are highly qualified to enter careers in physical education and school health or public health.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/peshms or by contacting the department directly.

## Dance Major, BA

Students may apply to the major during fall, winter, or spring term. Students planning to enter this major will experience a comprehensive dance education with opportunities for cultural enrichment, choreography, performance and teaching in a variety of genres. Students can pair this major with a variety of
minors to enhance their marketability. The following additional requirements also apply.

## Admission Requirements

- A number of classes in the major are offered on a rotating basis every other year. Consequently, students must work with their advisor in planning their schedule of course work in order to progress to completion of the major in 4 years.
- All students applying to the major must successfully complete 6 credits in any of the required core courses, including one technique class, before admission to the Dance major.
- All students upon admittance to the program will attend a technique placement class to determine their class level.

For more information visit our Department web site: www.cwu.edu/dance/

## Graduation Requirements

Completion of Major requirements with a GPA 3.0 or higher.
All students completing this program are required to demonstrate knowledge, skills, and professional dispositions through a Capstone project before completion of the major.

Students must receive a letter grade of C or higher for all courses in the major and students who receive less than a C grade in any class that is a prerequisite for others will not be permitted to continue in the major.

## Program Requirements

All Dance major candidates must have a minimum of 3 credits in Dance Performance in order to complete the major.

All Dance major candidates must attend one professional conference in their field of study while pursuing the major.

This major satisfies the Washington State endorsement for K-12 health/fitness.

## Admission Description and Requirements

This major is designed for students interested in teaching physical education and school health education for grades K-12. Students will receive experiences in physical education and health education content, pedagogy, movement applications, and practicums in the major. Students taking this major for teaching are required to apply to the Teacher Certification Program and complete the Professional Education Program requirements offered through the Department of Educational Foundations and Curriculum. The following additional requirements also apply:

- Classes in this major are organized over six consecutive quarters and must be taken in sequence.
- Students must receive a letter grade of " C " or higher for all courses in the major and students who receive less than a " C " grade in any class that is a prerequisite for others will not be permitted to continue in the major.
- Students must pass the WEST E exam in health and fitness to receive a K-12 WA endorsement.
- All students completing this program are required to demonstrate knowledge, skill, and disposition proficiencies through a program portfolio prior to student teaching.
- Students may also graduate with a non-teaching BS degree in physical education and school health.
- Professional dress requirements apply to many classes in this major. Students must comply with these requirements to participate in the program.

See the physical education, school, and public health website for more information: www.cwu.edu/~pesph.

For the major application procedure, contact the physical education and school health program director.

Sport Management BS, Recreation Management Specialization

The Recreation Management specialization prepares students for entry-level supervisory and managerial positions with municipal parks and recreation departments, non-profit agencies such as YMCAs and Boys and Girls Clubs, armed forces recreation, university recreation and intramural sports, camping and outdoor recreation. In addition, entrepreneurial skills are developed for those interested in starting their own business. The Recreation Specialization prepares students for positions in one of the top industries in Washington State and the Nation. Career opportunities are numerous.

Students must maintain a 2.75 (on a scale of 4.0 ) as a minimum cumulative grade point average (GPA) in the Recreation Management coursework and achieve a minimum grade of " C " in each of the courses.

Sport Management, BS

## Program Director

Brian McGladrey, Ph.D., CSCS

## Program Description

The major in Sport Management is designed for students interested in pursuing a career in the sports industry. The sports industry in the U.S. now generates revenues that exceed $\$ 200$ billion annually. Accordingly, the number and type of career opportunities associated with sport continues to grow. Classroom learning, combined with experiential learning gained through practicums and internships, will allow students who earn a Bachelor of Science in Sport Management to position themselves for success in entry-level positions in a variety of sport-related occupations.

Examples of potential careers in sport management include:

- Collegiate Coaching = coaching, recruiting, summer camps
- Interscholastic Coaching = coaching
- Youth Coaching/Leadership = coaching, league director
- Professional Sports Teams = ticket sales, marketing,
- Collegiate Athletics = athletics director, public relations, compliance
- City/Community Recreation $=$ administration, league director, promotions
- Athletic Facilities = management, membership marketing/sales
- Collegiate Recreation = management, student services, facilities

## Sport Management Emphasis Areas

Students choosing to major in Sport Management will complete a "core" of coursework, and choose to specialize in one of the following emphasis areas:

- Sport Coaching
- Sport Business
- Physical Activity Programming

## Admission Requirements

Students must complete SPM 101-Contemporary Sport
Management before applying to the program. For the major application procedure, contact the Sport Management Program Director.

## Graduation Requirements

Students must maintain a 2.75 (on a scale of 4.0) as a minimum cumulative grade point average (GPA) in the major's coursework.

## Program Requirements

Students must choose one from three Sport Management specializations: (1) Sport Coaching; (2) Sport Business; or (3) Physical Activity Programming. A minimum grade of "C" is required in each of the major's courses.

Required Core Courses

- ACCT 301 - Accounting Skills for Non-Business Majors Credits: (5)
- PE 448 - Coaching and Competitive Ethics Credits: (3)
- PE 453 - Psychological and Sociological Foundations of Coaching Credits: (3)
- SPM 101-Contemporary Sport Management Credits: (3)

Department-Approved Electives Credits: 9

Select from the following:

- HPE 443 - Sex, Drugs and Going Pro: Issues in Professional Sports Credits: (3)
- HPE 444 - The Promise and Pitfalls in Interscholastic Athletic Programs Credits: (3)
- HPE 445 - The Good, Bad and Ugly of Intercollegiate Sports Credits: (3)
- PE 321 - Football Coaching Credits: (3)
- PE 323 - Basketball Coaching Credits: (3)
- PE 325 - Baseball Coaching Credits: (3)
- PE 326-Theory of Coaching Soccer Credits: (3)
- PE 330 - Volleyball Coach Credits: (3)

Total Specialization Credits: 27

Total Credits: 62

## Dance Performance Minor (PESHMS)

## Program Director

Therese Young
The dance performance minor is an interdisciplinary minor administered jointly by the dance and theatre arts faculty designed for students who wish to broaden their academic background and receive a well-rounded dance education, thus preparing them in the area of dance performance in a wide variety of settings. Students will develop competencies in choreography, rhythmic concepts, and dance production.

## Program Requirements

Minimum of one-year participation in DNCE 112 Dance Performance (Orchesis Dance Company). By audition.

## Required Courses Credits: 26-27

- DNCE 101 - Modern Technique I Credits: (2)
- DNCE 102 - Modern Technique I Credits: (2)
- DNCE 103 - Modern Technique I Credits: (2)
- DNCE 112 - Dance Performance Credits: (1)
- DNCE 161 - Cultural History of Dance Credits: (4)
- DNCE 204 - Ballet Technique II Credits: (2)
- DNCE 205 - Ballet Technique II Credits: (2)
- DNCE 206 - Ballet Technique II Credits: (2)
- DNCE 300 - Dance Composition Credits: (3)
- DNCE 311 - Music for Dance - Rhythms and Resources Credits: (3)
- OR TH 215 - Music Fundamentals I Credits: (3)
- DNCE 402 - Dance Production Credits: (4)
- OR TH 301 - Production Application Credits: (3)

Department-Approved Electives Credits: 10

Choose any of the following for a minimum of 10 credits: Only one credit courses may be repeated.

- DNCE 121 - Tap Dance I Credits: (1)
- DNCE 122 - Tap Dance II Credits: (1)
- DNCE 130 - American Style Ballroom Dance I Credits: (1)
- DNCE 131 - American Style Ballroom Dance II Credits: (1)
- DNCE 132 - American Style Ballroom Dance III Credits: (1)
- DNCE 133 - International Standard Ballroom Dance I Credits: (1)
- DNCE 134 - International Standard Ballroom Dance II Credits: (1)
- DNCE 135 - International Standard Ballroom Dance III Credits: (1)
- DNCE 136 - International Latin Ballroom Dance I Credits: (1)
- DNCE 137 - International Latin Ballroom Dance II Credits: (1)
- DNCE 138 - International Latin Ballroom Dance III Credits: (1)
- DNCE 141 - Jazz Dance I Credits: (1)
- DNCE 142 - Jazz Dance II Credits: (1)
- DNCE 143 - Jazz Dance III Credits: (1)
- DNCE 150 - Mat Pilates Credits: (1)
- DNCE 155 - Pointe and Variations Credits: (1)
- DNCE 156 - Partnering Credits: (1)
- DNCE 201 - Modern Technique II Credits: (2)
- DNCE 202 - Modern Technique II Credits: (2)
- DNCE 203 - Modern Technique II Credits: (2)
- DNCE 304 - Ballet Technique III Credits: (2)
- DNCE 305 - Ballet Technique III Credits: (2)
- DNCE 306 - Ballet Technique III Credits: (2)
- DNCE 401 - Choreography Credits: (4)
- TH 252 - Stage Dance Credits: (1)
- TH 352 - Stage Dance II Credits: (2)

Total Credits: 36-37

College and Department Information

Physical Education, School Health, and Movement Studies Department

## Physical Activity and Recreation Programming Minor

Physical Activity and Recreation Programming Minor Core

## Program Directors

Heidi Henschel Pellett, EdD, physical education and school health

Barbara Masberg, PhD , recreation and tourism

## Program Advisors

Debra D'Acquisto, MA, physical activity
Robert Perkins, EdD, recreation and tourism
This interdisciplinary physical activity and recreation programming minor is designed for students who want to instruct and direct activities in various settings, such as, parks and recreation, nonprofit organizations, cruise lines, resorts, and other active lifestyle organizations.

## Admission Requirements

Applications are accepted throughout the academic year. To be admitted to the minor, all students must have a cumulative grade point average of a 2.75 . For the application procedure, contact a program director in Physical Education and School Health or Recreation and Tourism to complete a specific application form. All courses in the minor require a grade of a C or higher.

## Required Courses

- PESH 341 - Characteristics of Effective Physical Education Teaching Credits: (3)
- PESH 343 - Pedagogical Application of Teaching Styles and Systematic Reflection Credits: (3)
- PESH 356 - Teaching Lifelong Physical Activity Pursuits Credits: (3)
- PESH 456 - Facilitating and Leading Adventure Activities in the Schools Credits: (2)
- RTE 484 - Legal Liability and Risk Management Credits: (4)

Select from one of the following Credits: (3)

- RTE 222 - Recreation Programming and Activities Credits: (3)
- OR Choose three (3) Physical Activity Courses from the following categories:
PEID (1), PEF (1), PEAQ (1) PETS (1), PED (1)
Select from one of the following Credits: (3-4)
- FCS 220 - Leadership in Human Development Credits: (4)
- PESH 330 - Positive Youth Development in Physical Activity Credits: (3)

Select from one of the following Credits: (2-4)

- RTE 293- Outdoor Leadership Training Credits: (2)
- RTE 300 - Challenge Course Leadership Credits: (4)
- RTE 360 - Outdoor Survival Credits: (3)
- RTE 431 - Recreation Administration of Retreats and Camps Credits: (3)

Select from one the following Credits: (3-5)

- RTE 381 - Recreational Sports Management Credits: (3)
- RTE 382 - Community Recreation Credits: (3)
- RTE 487 - Outdoor Recreation Issues Credits: (3)

Choose certifications totaling Credits: (3)

- EMS 245 - Advanced First Aid and Emergency Response Credits: (3)
- PE 115 - Beginning Climbing Credits: (1)
- PE 116 - Intermediate Climbing Credits: (1)
- PE 220 - Climbing Wall Instructor Credits: (2)
- PEAQ 221 - Lifeguard Training Credits: (3)
- PEAQ 320 - Water Safety Instructor Credits: (3)

Total Credits: 29-34

## Physical Education - Dance: Teaching Minor

This minor satisfies the endorsement competencies for dance in Washington State. Students must be fully admitted to the Teacher Certification Program to pursue coursework for a Dance Education minor.

Students will be required to complete technique classes in those areas of dance frequently taught in a K-12 setting. Additionally, students will develop competencies in dance composition \& choreography, rhythmic concepts, dance production, and teaching.

## Required Courses

- DNCE 101 - Modern Technique I Credits: (2)
- DNCE 102 - Modern Technique I Credits: (2)
- DNCE 103 - Modern Technique I Credits: (2)
- DNCE 104 - Ballet Technique I Credits: (2)
- DNCE 105 - Ballet Technique I Credits: (2)
- DNCE 106 - Ballet Technique I Credits: (2)
- DNCE 161 - Cultural History of Dance Credits: (4)
- DNCE 300 - Dance Composition Credits: (3)
- DNCE 309 - Teaching Methods: Recreational Dance Credits: (3)
- DNCE 311 - Music for Dance - Rhythms and Resources Credits: (3)
- DNCE 314 - Dance for Children Credits: (3)
- DNCE 355 - Principles of Functional Alignment for Dance Credits: (3)
- DNCE 402 - Dance Production Credits: (4)

Total Credits: 35

## Program Coordinator

Brian McGladrey, PhD

## Program Information

The Sport Coaching minor will provide appropriate training to students interested in entering the coaching
profession. Typically, students who complete this minor enter the coaching field at the youth, high school, or collegiate levels, either in paid positions or as volunteers. The Sport Coaching program's curriculum satisfies the "initial 30-hour requirement" of the Washington Interscholastic Activities Association's (WIAA) Coaching Standards program. Additionally, coursework is designed to meet the competencies as outlined by the National Council for Accreditation of Coaching Education
(NCACE) in its "National Standards for Sport Coaches." The content of the core coursework includes the scientific and practical competencies that athletes, administrators, parents, and the public should expect of coaches; it provides prospective coaches with the knowledge and skills necessary to become competent and effective coaches.

## Admission Requirements

Students wishing to declare Sport Coaching as a minor will need to meet with the Sport Coaching Program Director and complete a CWU program application.

## Program Requirements

Students must achieve a letter grade of C or higher for each of the courses in the minor. Additionally, students will need to complete a fingerprinting process (background check) and CPR certification prior to registering for PE 495 - Field Work in Sport Coaching.

## Required Courses

- HED 205 - Drugs and Sport Credits: (3)
- PE 365 - Foundations of Coaching Credits: (3)
- PE 448 - Coaching and Competitive Ethics Credits: (3)
- PE 453 - Psychological and Sociological Foundations of Coaching Credits: (3)
- PE 495 - Field Work in Sport Coaching Credits: (3)
- PESH 358 - Applications of Resistance, Core, and Cardiovascular Training Credits: (3)
- PESH 458 - Diagnosis and Analysis of Human Movement Credits: (3)

## Electives

Select a minimum of 6 credits from the following:

- EXSC 350 - Gross Anatomy Credits: (3)
- EXSC 350LAB - Gross Anatomy Laboratory Credits: (2)
- EXSC 351 - Physiology Credits: (4)
- EXSC 351LAB - Physiology Laboratory Credits: (1)
- EXSC 352 - Assessment and Treatment of Athletic Injuries Credits: (4)
- PE 321 - Football Coaching Credits: (3)
- PE 323 - Basketball Coaching Credits: (3)
- PE 325 - Baseball Coaching Credits: (3)
- PE 326 - Theory of Coaching Soccer Credits: (3)
- PE 330 - Volleyball Coach Credits: (3)
- PE 346 - Administration of Athletes Credits: (3)
- PE 521 - Advanced Football Coaching Credits: (3)
- PE 523 - Advanced Basketball Coaching Credits: (3)

Total Credits: 27

Addison Wenger, instructional and classroom technician III Peter Zencak, instructional and classroom technician IV

## Department Information

## Overview

Physics is the study of the universe and its elements-from the interaction of subatomic particles and investigations in nanoscale science, to the motion of everyday objects, to the evolution of galaxies. Physics involves discovering the fundamental rules that describe matter and energy on every scale, hence it is the basic science that underlies all the natural sciences.

Most businesses want people who can analyze complex situations and solve problems. CWU physics majors learn these skills along with computational and electronics skills. The physics curriculum includes theoretical courses as well as laboratory classes and hands-on research that provide the practical training relevant to both graduate school or professional work in science and engineering. Recent acquisitions of state-of-the-art instrumentation in astronomy, acoustical physics, and lasers enrich students' experience in the laboratory and research setting. Students also have the opportunity to participate in programs outside the formal courses offered by participating in the department's award-winning Physics Club and Astronomy Club. The CWU physics program offers a BS degree, a BA degree (which doubles as our teaching degree), and engineering opportunities through our dual-degree physics/engineering program.

## Department Standards

All students must meet with the physics chair to map out a fouryear plan. The student can then select a faculty advisor. All faculty members are physics major advisors. Most upper-level physics courses are offered every other year. Thus, students who wait too long to meet with an advisor may have their graduation delayed. All physics majors must complete a physics major portfolio.

## Honors Designation

The honors designation in physics recognizes the academic excellence of its majors. Students in the department's BA and BS programs are eligible for this designation and all physics majors are urged to consider applying. The honors designation in physics is offered in collaboration with Sigma Pi Sigma, the National Physics Honors Society. Please contact the physics department chair for more information.

## Dual-degree Physics/Engineering Program

This dual-degree program enables a student to receive a baccalaureate degree in physics from CWU and a bachelor of science from an appropriate engineering institution in a respective engineering discipline. The total length of time for both degrees is expected to be about five years, with approximately three years at CWU (dating from enrollment in MATH 172) and approximately two years at the engineering institution. At CWU, students must complete a minimum of 135 credits, including all general education requirements. Additional courses may be required depending on the specific engineering discipline. Be sure to consult the appropriate dual-degree engineering advisor for details.

In order to receive the baccalaureate degree from CWU, dualdegree students must also complete the remaining credits (to total a minimum of 180 credits) in engineering at the Engineering Institution and transfer these credits to CWU. The remaining credits must include the appropriate number of 300level or above from the Engineering Institution to satisfy CWU graduation requirements. This transfer of credits and awarding of the baccalaureate degree by CWU can take place as soon as the student earns the necessary credits.

## Special Requirements:

Early consultation with the physics department chair is mandatory to ensure that specific additional requirements of particular engineering curricula are also satisfied. It is solely the student's responsibility to apply and gain admission to the Engineering Institution. It is also the individual student's
responsibility to submit an official transcript of the work completed after leaving CWU and to request awarding of the baccalaureate degree in physics.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/physics or by contacting the department directly.

## Dual-degree Physics/Engineering Program

This dual-degree program enables a student to receive a baccalaureate degree in physics from CWU and a bachelor of science from an appropriate engineering institution in a respective engineering discipline. The total length of time for both degrees is expected to be about five years, with approximately three years at CWU (dating from enrollment in MATH 172) and approximately two years at the engineering institution. At CWU, students must complete a minimum of 135 credits, including all general education requirements. Additional courses may be required depending on the specific engineering discipline. Be sure to consult the appropriate dual-degree engineering advisor for details.

In order to receive the baccalaureate degree from CWU, dualdegree students must also complete the remaining credits (to total a minimum of 180 credits) in engineering at the Engineering Institution and transfer these credits to CWU. The remaining credits must include the appropriate number of $300-$ level or above from the Engineering Institution to satisfy CWU graduation requirements. This transfer of credits and awarding of the baccalaureate degree by CWU can take place as soon as the student earns the necessary credits.

## Special Requirements:

Early consultation with the physics department chair is mandatory to ensure that specific additional requirements of particular engineering curricula are also satisfied. It is solely the student's responsibility to apply and gain admission to the Engineering Institution. It is also the individual student's responsibility to submit an official transcript of the work completed after leaving CWU and to request awarding of the baccalaureate degree in physics.

College of the Sciences

## Physics Major, BA

The BA program is for students wanting a broad liberal arts education with an emphasis in physics and is the appropriate major for students interested in teaching high school physics. It may be a suitable foundation for students who are planning a career not usually regarded as physics, such as business
education, law, medicine, writing, environmental concerns, public safety, or computer programming.

## Teaching Endorsement

This major partially satisfies the criteria for a teaching endorsement in Physics (5-12), qualifying students to teach physics at the high school, middle, or junior high levels. Students who successfully complete the Physics BA and STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the physics teaching advisor as soon as possible to develop a course of study.

## Teaching Endorsement Requirements:

This major satisfies the criteria for an endorsement in physics and qualifies students to teach physics at the high school, middle, or junior high levels. Students taking this major for endorsement are required to take the Science and Mathematics Teaching Minor. See the physics teaching advisor as early as possible to develop a graduation plan. Students completing this program are required to demonstrate proficiency of student learning outcomes through a program portfolio prior to student teaching. In addition to the above requirements, students must pass the NES exam for physics to receive a physics endorsement. Students should seriously consider working toward endorsement in a second area, such as biology, chemistry, earth science, middle-level science, middle-level mathematics, secondary mathematics or science.

Required Courses

- MATH 265 - Linear Algebra I Credits: (4)
- PHYS 317 - Modern Physics I Credits: (4)
- PHYS 318 - Modern Physics II Credits: (4)
- PHYS 331-Laboratory Practices and Techniques Credits: (3)
- PHYS 333 - Experimental Physics I Credits: (3)
- PHYS 361 - Computational Physics Credits: (4)
- PHYS 363-Optics Credits: (4)
- PHYS 489 - Senior Assessment Credits: (1)
- PHYS 495 - Undergraduate Research Credits: (1-2)

General Physics - Credits: 15

- PHYS 181 - General Physics I with Laboratory Credits: (5)
- PHYS 182 - General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)

General Chemistry - Credits: 10

- CHEM 181 - General Chemistry I Credits: (4)

## Physics Major, BS

Those interested in receiving an advanced degree in physics or engineering may choose the bachelor of science degree in physics. The bachelor of science degree is designed for individuals planning careers in physics and related technical fields or in areas where knowledge of basic scientific principles is necessary. Incoming freshman prepared to take calculus their first quarter at CWU should be able to complete the bachelor of science degree in four years.

## Physics Core Requirements

General Chemistry Credits: 10

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182 - General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)

## Physics Major BS, Biophysics Specialization

Biophysics is the application of the principles and tools of physics to the study of biological systems. Biophysicists contribute to the understanding of a wide range of interdisciplinary scientific subfields including biotechnology, quantitative molecular and cellular biology, medical physics, neuroscience and biomechanics. The goal of the Physics B.S. with Biophysics specialization is to prepare graduates to be competitive in applications for entry into graduate degree programs in biophysics, physics, and related fields; jobs in government research labs; and private sector employment in areas such as biotechnology. Depending on math preparation, students should be able to complete the Bachelor of Science degree, with Biophysics specialization, in four years at CWU.

## Physics Core Requirements

General Chemistry Credits: 10

- CHEM 181 - General Chemistry I Credits: (4)

## Physics Minor

The physics minor is an excellent complement to a variety of other science majors. It is also ideal for students who want to reinforce a liberal arts major with a technical background.

Students taking this minor to obtain a teaching endorsement can receive a teaching endorsement in physics only if the following requirements are met:

- The student will also earn a certification in Biology, Chemistry, Earth Science, Middle Level Science, or Secondary Mathematics.
- The student passes the NES exam for Physics.

Upper-division Physics - Credits: 8

- PHYS 317 - Modern Physics I Credits: (4)
- PHYS 363 - Optics Credits: (4)

Lower-division Physics - Credits: 15

Choose one of the lower-division course sequences.

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113 - Introductory Physics III with Laboratory Credits: (5)
OR
- PHYS 121 - Introductory Physics for Life Sciences I Credits: (5)
- PHYS 122 - Introductory Physics for Life Sciences II Credits: (5)
- PHYS 123 - Introductory Physics for Life Sciences III Credits: (5) OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182 - General Physics II with Laboratory Credits: (5)
- PHYS 183 - General Physics III with Laboratory Credits: (5)

Calculus - Credits: 10

- MATH 172 - Calculus I Credits: (5)
- MATH 173 - Calculus II Credits: (5)

Department-approved Upper-division Electives: 3-5 credits
Total Credits: 36-38

Todd M. Schaefer, PhD, American politics, public opinion,
congress, campaigns and elections, African politics, American presidency
Rex Wirth, PhD , public administration and public policy, international politics, Western Europe
Bang-Soon Yoon, PhD, comparative politics, public policy, women and politics, Korean politics, East Asia politics, globalization studies

## Associate Professor

Gilberto Garcia, PhD, Latino politics and studies, Latin American politics, comparative politics, and U.S.-Mexico border relations

## Emeritus Professor

Robert C. Jacobs, PhD, American law and politics

## Senior Lecturer

Stefanie Wickstrom, PhD, environmental justice and politics, identity politics, social movements and environmental history

## Staff

TBA, secretary senior

## Department Information

The department provides an opportunity for students to become knowledgeable about the general subject matter of political science, while also offering a variety of courses that can provide depth in an area of the student's interest. Flexibility in the selection of courses is stressed.
The department requires all political science majors to participate in the end-of-major assessment exercise at the conclusion of their senior year. Information on the assessment requirement may be obtained from the department's main office. Students must earn a grade of C- or higher in order for that course to count in their political science major.

## Political Science Honors

Political science majors will qualify for honors at graduation with an overall GPA of 3.00 and a GPA of 3.50 in all political science courses.
Students may choose either a 47 -credit major or a 62 -credit major. Those who have a second major or who have a minor in another discipline may opt for the 47-credit major.

## Political Science Core Requirements

POSC 101 - Introduction to Politics 5
POSC 210 - American Politics 5
POSC 260 - Comparative Politics 5
POSC 270 - International Politics 5
Political Science Core Total Credits: 20

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/political-science or by contacting the department directly.

## Political Science Major, BA (47 credits) ( 62 credits)

Students may choose either a 47 -credit major or a 62 -credit major. Those who have a second major or who have a minor in another discipline may opt for the 47-credit major.

## Required Courses

Political Science Core Requirements

- POSC 101 - Introduction to Politics Credits: (5)
- POSC 210 - American Politics Credits: (5)
- POSC 260 - Comparative Politics Credits: (5)
- POSC 270 - International Relations Credits: (5)

Political Science Core Total Credits: 20

Additional Required Courses

- POSC 489 - Senior Assessment Credits: (2)

Select from the following: 5 Credits

- POSC 481 - Early Political Thought Credits: (5)
- POSC 482 - Early Modern Political Thought Credits: (5)
- POSC 483 - Recent Political Thought Credits: (5)
- POSC 485 - American Political Thought and Culture Credits: (5)

Electives Credits: 20-35

Select from any other courses in this department. (Any transfer political science electives must be approved by the department.)

- 47-credit major (20)
- 62-credit major (35)

Total Credits: 47-62

College and Department Information

See website for how this program may be used for educational and career purposes.

## Program Director

Lori K. Sheeran, PhD, anthropology, Dean Hall, room 335

## Professors

Dan Beck, PhD, biology, ecology and behavior
Kara I. Gabriel, PhD, psychology, experimental psychology, biopsychology
Lori K. Sheeran, PhD, anthropology, primate behavior, primate conservation, biological anthropology
Lixing Sun, PhD, biology, ecology and evolution of animal behavior (especially communication systems), chemical ecology
R. Steven Wagner, PhD , biology, conservation population genetics, molecular evolution

## Associate Professors

Matthew Altman, PhD , philosophy, applied ethics (including environmental ethics and ethics and animals), 19th century philosophy, ethics, social and political philosophy, philosophy of art, philosophy of law
Ralf Greenwald, PhD, psychology, general cognition, human neurophysiology, working memory, attention, language

## Assistant Professor

Jessica A. Mayhew, PhD, anthropology, primate social behavior and socio-cognition, great apes, play behavior
Mary Radeke, PhD, psychology, child-language development, neuropsychology, experimental psychology
Rodrigo Renteria-Valencia, PhD, anthropology, environmental anthropology

## Lecturers

Sofia Blue, PhD, anthropology, primatology, signal systems in nonhuman primates, research methodology

Mary Lee Jensvold, PhD, primatology, primate cognition, chimpanzee behavior
JB Mulcahy, MS, primatology, primate captive care, chimpanzee behavior

## Staff

Penelope Anderson, secretary senior

## Program Information

This program provides majors with interdisciplinary perspectives on the behavior and ecology of nonhuman primates in both captive and free-living settings. It serves as background for graduate study in the behavior, ecology, or phylogeny of primates, as well as for care-giving careers with primates living in laboratories, zoos, or other captive facilities. Lab fees required for PRIM 220, PRIM 320, and ANTH 416.

A double major is REQUIRED with the PBE degree. Students must complete the requirements for the PBE major as well as the requirements for a 45-plus-credit major in anthropology, biology, or psychology. Students interested in the major should contact the program office as soon as possible for further information, application forms, and assignment of an advisor. PBE majors are expected to meet with their advisor at least once a quarter.

## Special Programs

The program sponsors and is affiliated with a wide range of onand off-campus activities that provide students with opportunities to conduct faculty-mentored scientific projects or internships.

The PBE library in room 204 Dean Hall houses several hundred books, articles, and DVDs/videotapes related to primatology. The room includes a TV, DVD player, and four computer work stations.

The PBE program has available for student use one video camera, two digital cameras, two DVD players, one television, observational software (The Observer), and two PDAs for using this software at remote locations. The Observer software can also be used on two desktop computers.

Students and faculty who have been approved to conduct research at CHCI may have access to resources housed there. These include an extensive library of articles, books, videos, and DVDs, and more than 20 years of archived video footage collected from the chimpanzees living there. CHCI also houses several VCRs, TVs, DVD players, video cameras, and computers that students can use in research projects conducted at CHCI. Access is considered on a case-by-case basis in consultation with the director and associate director of CHCI.

The Anthropological Genetics Laboratory in room 232A Dean Hall is equipped for performing DNA extractions, PCR (Polymerase Chain Reaction) amplification, genotyping, and DNA sequencing. Software for analyzing genetic data and performing phylogenetic analysis is also available.

The anthropology department owns casts of fossil and living nonhuman primates. These span a variety of taxa including prosimians, monkeys, and apes. Access is considered on a case-by-case basis in consultation with the anthropology faculty.

The PBE program is affiliated with the Conservation and Biodiversity Field School in China, which is coordinated through the CWU Office of International Study and Programs.

Students can develop faculty-mentored internship experiences based at CHCI, the Woodland Park Zoo, and other sites.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/primate or by contacting the department directly.

## Primate Behavior and Ecology Major, BS

This program provides majors with interdisciplinary perspectives on the behavior and ecology of nonhuman primates in both captive and free-living settings. It serves as background for graduate study in the behavior, ecology, or phylogeny of primates, as well as for care-giving careers with primates living in laboratories, zoos, or other captive facilities.

A double major is REQUIRED with the PBE degree. Students must complete the requirements for the PBE major as well as the requirements for a 45-plus-credit major in anthropology, biology, or psychology. Students interested in the major should contact the program office as soon as possible for further information, application forms, and assignment of an advisor. PBE majors are expected to meet with their advisor at least once a quarter.

## Required Courses

Introductory Level: Credits: 10

- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- PSY 101-General Psychology Credits: (5)

Choose one from the following: Credits: 5
*Course selection by advisement depending upon second major.

- BIOL 101 - Fundamentals of Biology Credits: (5)
- BIOL 181 - General Biology I Credits: (5)

Choose one from the following: Credits: 5
*Course selection by advisement depending upon second major.

- BIOL 182 - General Biology II Credits: (5)
- BIOL 200 - Plants in the Modern World Credits: (5)
*Course selection by advisement depending upon second major.
- BIOL 183 - General Biology III Credits: (5)
- BIOL 201 - Human Physiology Credits: (5)

Core Requirements
*Course selection by advisement depending upon second major.

- ANTH 313 - Primate Social Behavior Credits: (4)
- ANTH 380 - Non-Verbal Communication Credits: (4)
- ANTH 411 - Primate Conservation Credits: (4)
- OR PHIL 306 - Environmental Ethics Credits: (5)
- ANTH 413 - Research Methods in Primatology Credits: (5)
- OR PSY 300-Research Methods in Psychology Credits: (5)
- PRIM 450 - Primate Behavior and Ecology Capstone Credits: (1)

Choose one from the following: Credits: 4

- ANTH 410 - Biological Anthropology: Theoretical and Research Issues Credits: (4)
- ANTH 411 - Primate Conservation Credits: (4)
- ANTH 499 - Seminar Credits: (1-5)
- BIOL 499 - Seminar Credits: (1-5)
- PSY 442 - Evolutionary Psychology Credits: (4)
- PSY 499 - Seminar Credits: (1-5)

Choose one from the following: Credits: 4-5
*Course selection by advisement depending upon second major.

- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- ANTH 440 - Ecology and Culture Credits: (4)
- BIOL 302 - Sustainability and Environmental Change Credits: (5)
- BIOL 360 - General Ecology Credits: (5)

Choose one from the following: Credits: 4-5
*Course selection by advisement depending upon second major.

- BIOL 213 - Introductory Biostatistics Credits: (4)
- PSY 362 - Introductory Statistics Credits: (5)

Choose one from the following: Credits: 4-5
*Course selection by advisement depending upon second major.

- BIOL 465 - Biology of Animal Behavior Credits: (4)
- PSY 301 - Learning Credits: (5)

Choose one from the following: Credits: 3-5

- PRIM 220 - Procedures in Captive Primate Care Credits: (1)
- PRIM 490 - Cooperative Education Credits: (1-12)
- PRIM 495A - Directed Research in Primatology Credits: (1-5)
- PRIM 495C - CHCI Directed Research Credits: (110)
- OR Other Research

Choose two of the following: Credits: 8

- ANTH 412 - Monkeys of the Neotropics Credits: (4)
- ANTH 416 - Apes Credits: (4)
- ANTH 418 - Monkeys of Asia and Africa Credits: (4)

Total Credits: 70-76

College and Department Information

Primate Behavior and Ecology Program
Anthropology and Museum Studies Department
College of the Sciences

## Captive Primate Care Certificate

CWU undergraduate students or non-matriculated students are eligible to enroll in the proposed certificate program. Certificate coursework can be used toward other degree requirements (as applicable) except ANTH 201 Grade 1 Animal Technician (1 unit), which can only be counted toward the certificate. Completion of the certificate will provide students with all skills and experiences listed by the International Primatological Society for "Animal Technician," and some skills and experiences listed for "Senior Animal Technician." This expertise may assist students in future job searches in captive primate care based at zoos, sanctuaries, and/or laboratories.

## Required Courses Credits: 9

- ANTH 201 - Grade 1 Animal Technician Credits: (1)
- ANTH 313 - Primate Social Behavior Credits: (4)
- OR ANTH 412 - Monkeys of the Neotropics Credits: (4)
- PRIM 450 - Primate Behavior and Ecology Capstone Credits: (1)
- PRIM 490 - Cooperative Education Credits: (1-12) (Must be taken for 3 credits.)

Department-approved Applied Field Electives Credits: 8-9
Choose 8-9 credits from the following list of courses:

- ANTH 110 - Bones, Apes, and Genes: Exploring Biological Anthropology Credits: (5)
- ANTH 316 - History and Theory of Molecular Anthropology Credits: (4)
- ANTH 352 - Anthropology of Environmental Issues Credits: (4)
- ANTH 411 - Primate Conservation Credits: (4)
- ANTH 413 - Research Methods in Primatology Credits: (5)
- ANTH 416 - Apes Credits: (4)
- ANTH 418 - Monkeys of Asia and Africa Credits: (4)
- BIOL 101 - Fundamentals of Biology Credits: (5)
- BIOL 453 - Mammalogy Credits: (5)
- BIOL 465 - Biology of Animal Behavior Credits: (4)
- BIOL 466 - Conservation Biology Credits: (5)
- PRIM 220 - Procedures in Captive Primate Care Credits: (1)
- PRIM 490 - Cooperative Education Credits: (1-12)
- PSY 413 - Conservation Psychology Credits: (4)
- PSY 449 - Abnormal Psychology Credits: (4) Elective courses may have pre- or co-requisites.

Total Credits: 17-18

## Faculty and Staff <br> Chair <br> Stephanie Stein, PhD

## Assistant Chair

Stephen B. Schepman, PhD

## Professors

Terry L. DeVietti, PhD, physiological and experimental psychology
Kara I. Gabriel, PhD, general experimental psychology, spatial skills, risk-taking, biopsychology
Susan D. Lonborg, PhD, health psychology, substance abuse, clinical and research ethics, career development, gender, social networking
Megan D. Matheson, PhD, nonhuman primate social behavior, evolutionary psychology, self-injurious behavior, comparative psychology
Stephen B. Schepman, PhD, organization development, work motivation, personality theories, social psychology, statistics Anthony J. Stahelski, PhD, industrial/organizational psychology, social psychology, small group interaction, leadership, cults and extremist groups, aggression and violence, terrorism

Stephanie Stein, PhD, school psychology, curriculum-based measurement, behavior disorders in children, lifespan development, psychopathology

## Associate Professors

Marte Fallshore, PhD , environmental decision-making, psychology of law, learning, memory, statistics, cognition Ralf Greenwald, PhD , cognitive brain dynamics, event-related potentials, critical thinking, psychology of video gaming, general cognitive psychology
Heath Marrs, EdD, school psychology, educational psychology, response to intervention, gender issues in education Jeffrey M. Penick, PhD, mental health counseling, group counseling, counseling supervision, adult aging and development, health psychology
Danielle Polage, PhD, cognitive psychology, psychology and law, memory, eyewitness testimony, lying and jury deliberation Terrence J. Schwartz, PhD, educational psychology, counseling psychology, statistical analysis
Wendy A. Williams, PhD, applied behavior analysis, general experimental psychology, adults with autism, canine behavior, single-subject research

## Assistant Professors

Sara Bender, PhD, psychotic disorders, clinical expectations related to recovery, efficacy of online learning, cybersupervision
Heidi Perez, PhD, school psychology, efficacy of school-based interventions, graduate student success, social-emotional functioning and behavior in children
Tonya Buchanan, PhD, experimental psychology, social psychology, implicit and explicit attitudes, power, interpersonal perceptions, deception
Sadie Lovett, PhD, applied behavior analysis, derived stimulus relations, verbal behavior, instructional design, rehabilitation Richard Marsicano, PhD , academic and behavioral interventions, intervention adherence, performance feedback, and response to intervention
Meaghan Nolte, PhD , mindfulness, addictions treatment, counselor training, identity, epistemological development Liane Pereira, PhD, youth mental health, human development, social determinants of health, educational psychology
Mary Radeke, PhD , use of facial cues in personality assessment, conversation development in young children, personality traits, technology in the classroom, primate communication Fred Washburn, PhD, counselor development, supervision readiness, assessing counselor competency, counselor pedagogy

## Senior Lecturers

Mark Soelling, PhD, counseling psychology, psychology and the law, psychopharmacology
Elizabeth Haviland, PhD , counseling psychology, counseling supervision, multicultural counseling

## Lecturers

Christopher Beeman, PhD , behavioral neuroscience, biology of long term memory, teaching in psychology, neuroscience outreach
Cristina Bistricean, MS, high-functioning autism, behavior in rehab/nursing facilities, anxiety, intrusive thoughts Joshua Buchanan, PhD, self-conscious emotion, emotion expression, judgment and decision-making, coordination, psychology of video games

## Staff

Debbie Thomas, secretary supervisor
Loretta Ney, secretary lead
Chris Buchanan, engineering technician III

## Department Information

The psychology department offers an important behavioral science component of the university's liberal arts curriculum. As part of the General Education program, courses in psychology broaden the student's knowledge about behavior, cognition, and emotion. Through our major and minor programs, students can develop an understanding of the perspectives, content, and methods of the science and practice of psychology and prepare for graduate study.

## Admission Requirements

Prior to admission to the psychology major, students must meet the following requirements:

Completion of PSY 101 with a grade of C or higher GPA of 2.25 or higher in college coursework

Students wishing to apply for admission to the psychology major or minor are required to register with the department and be advised by a member of the department faculty. Students may register as pre-majors in psychology if they wish to join the major but have not yet met the admission requirements. The department reserves the right to change requirements as circumstances warrant. Application forms may be obtained from the department office or on the department website.

## Exit Requirements

Students are required to have a 2.5 GPA within the major area to receive the degree.
Senior psychology majors are required to complete the department's end-of-major examination in the quarter before graduating. Students should register for the examination in the department office. The purpose of this requirement is to enable us to assess whether the department has fulfilled its instructional objectives and to provide us with information that will enable us continuously to improve our programs and courses. In PSY 200 Introduction to the Major (taken after applying to the psychology major), students will learn about the portfolio requirements that will be due in PSY 489 Senior Assessment. One of the PSY 489 portfolio requirements is a minimum of ten hours of service learning and/or research assistant experience. This requirement can be met any time prior to the end of PSY 489.

## Departmental Honors

The eligibility requirements for admission to the Department of Psychology honors program include the following:

1. Admission to the program: The student must be a psychology major, at least a junior but not more than a first quarter senior and have completed core courses with a GPA of at least 3.25 in those courses and have an overall cumulative GPA of 3.0. The student must apply in writing to the department chair, with a supporting letter of recommendation from a member of the faculty who agrees to supervise the student's work to completion.
2. Requirements and Procedures: The student will register for 4-6 credits in PSY 497, Undergraduate

Honors Thesis. In consultation with the supervising faculty member, the student chooses a three-person faculty committee. Plans for the honors project, generally an empirical research study, must be approved by the entire committee. The project will culminate in a written research report and a formal defense of the thesis.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/psychology or by contacting the department directly.

## Psychology Major, BA (45 credits)

Students seeking a BA degree must complete one year of college/university study or two years of high school study of a single world language.

The 45 -credit major is intended for students who are interested in careers that would combine a background in psychology with work in fields such as social work, family studies, business, forensics, primate behavior, and other fields for which training in behavioral science would be useful. Students in the 45 -credit major are required to complete either a minor or a double major. This major would also be useful for students who intend to go directly into the work force following graduation. If a student decided later to pursue graduate school, the core courses in the 45 -credit major may transfer into the 60 -credit major.

Required Courses for the 45 -credit major

- PSY 101 - General Psychology Credits: (5)
- PSY 200 - Introduction to the Major Credits: (1)
- PSY 300 - Research Methods in Psychology Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)
- PSY 489 - Senior Assessment Credits: (2)

Select at least one course from each of the following groups:
Group I

- PSY 301 - Learning Credits: (5)
- PSY 303-Analysis of Everyday Behavior Credits: (4)

## Group II

- PSY 310 - Multicultural Psychology and Social Justice Credits: (4)
- PSY 313 - Developmental Psychology Credits: (4)
- PSY 346 - Social Psychology Credits: (4)

Group III

- PSY 445 - Clinical, Counseling, and Community Psychology Credits: (5)
- PSY 449 - Abnormal Psychology Credits: (4)
- PSY 453 - Theories of Personality Credits: (5)

Group IV

- PSY 420 - Psychology of Language Credits: (4)
- PSY 460 - Cognitive Psychology Credits: (5)

Group V

- PSY 450 - Sensation and Perception Credits: (4)
- PSY 478 - Behavioral Neuroscience Credits: (4)

Elective Credits: 4-7

May include a maximum of five lower division credits.
In addition to the classes listed above, other 300 and 400 -level psychology classes may also qualify for elective credits.

Total Credits: 45

College and Department Information

Psychology Department
College of the Sciences

## Psychology Major, BA (60 credits)

The 60 -credit major is intended to provide a foundation for professional careers and/or graduate training in psychology. It requires substantial coursework in the methodological, statistical, and content areas of psychology, while still allowing for individualized student interests and choice. Students enrolled in the 60-credit major also have the opportunity to receive credit toward their degree for participation in professional development and research experiences.

Required Courses for the 60 -credit major

- PSY 101 - General Psychology Credits: (5)
- PSY 200 - Introduction to the Major Credits: (1)
- PSY 300 - Research Methods in Psychology Credits: (5)
- PSY 362 - Introductory Statistics Credits: (5)
- PSY 363 - Intermediate Statistics and Research Methods Credits: (5)
- PSY 489 - Senior Assessment Credits: (2)

Select at least one course from each of the following groups:

Group I

- PSY 301 - Learning Credits: (5)
- PSY 303 - Analysis of Everyday Behavior Credits: (4)

Group II

- PSY 310 - Multicultural Psychology and Social Justice Credits: (4)
- PSY 313 - Developmental Psychology Credits: (4)
- PSY 346 - Social Psychology Credits: (4)

Group III

- PSY 445 - Clinical, Counseling, and Community Psychology Credits: (5)
- PSY 449 - Abnormal Psychology Credits: (4)
- PSY 453 - Theories of Personality Credits: (5)

Group IV

- PSY 420 - Psychology of Language Credits: (4)
- PSY 460 - Cognitive Psychology Credits: (5)

Group V

- PSY 450 - Sensation and Perception Credits: (4)
- PSY 478 - Behavioral Neuroscience Credits: (4)

Elective Credits: 14-17

May include a maximum of five lower division credits. In addition to the classes listed above, other 300 and 400-level psychology classes may also qualify for elective credits.
**Not more than 10 hours of PSY 295 and PSY 495 combined may be applied to a psychology major.

Total Credits: 60

College and Department Information

## Psychology Department

College of the Sciences

## Psychology Minor

## Core Courses Credits: (10)

- PSY 101 - General Psychology Credits: (5)
- PSY 300 - Research Methods in Psychology Credits: (5)

Students who have taken the research methods course required for their major in law and justice, sociology, or IDS-social sciences do not have to take PSY 300
for the psychology minor. However, they do need to replace the credits from PSY 300 with any five upper division psychology credits not otherwise allocated to the minor. The student must have a minimum of 30 psychology credits to complete the minor.

Choose two courses from the following list: Credits (8-10)

- PSY 301 - Learning Credits: (5)
- OR PSY 303-Analysis of Everyday Behavior Credits: (4)
- PSY 313 - Developmental Psychology Credits: (4)
- OR PSY 314 - Human Development and the Learner Credits: (4)
- PSY 346 - Social Psychology Credits: (4)
- PSY 420 - Psychology of Language Credits: (4)
- PSY 445 - Clinical, Counseling, and Community Psychology Credits: (5)
- PSY 449 - Abnormal Psychology Credits: (4)
- PSY 450 - Sensation and Perception Credits: (4)
- PSY 453 - Theories of Personality Credits: (5)
- PSY 456 - Industrial and Organizational Psychology Credits: (4)
- PSY 460 - Cognitive Psychology Credits: (5)
- PSY 478 - Behavioral Neuroscience Credits: (4)

Any upper-division psychology course can be used as an elective. Credits: (10-12)

In addition to the classes listed above, other 300 - and 400 -level psychology classes may also qualify for elective credit.

Total Credits: 30

## Department Information

The primary function of the science education department is preparing people to teach science. Coursework in science pedagogy is offered for students in the Teacher Certification Programs as well as for teachers in the schools. The science education department works with science departments in the design and operation of degree programs for students who are preparing to teach in the secondary schools. We believe that students learn via the active construction of knowledge. To facilitate that process, all of our instruction follows the learning cycle model.

Our program seeks to help students become facilitators of learning in a diverse world. To that end, the science education department has the following goals for an effective science teacher:

- Demonstrate an ability to individually and collaboratively engage in inquiry and integrate the nature of science
- Explain and apply fundamental science content concepts, principles, and methods
- Demonstrate an ability to effectively facilitate learning for all students
- Create safe, effective learning environments that support inquiry, collaboration, intellectual risk-taking, ethical decision-making, and student construction of knowledge
- Demonstrate an ability to assess teaching and learning outcomes using multiple methods, effectively evaluate teaching and learning effectiveness, and improve practice based on reflection and data
- Demonstrate an ability to make science personally and socially relevant to individual and community by incorporating current events within collaborative and social networks
Students seeking endorsement for certification to teach a specialized science at the high school level must satisfactorily complete the teaching major within the specific science department. Students desiring to become middle or junior high
school specialized teachers of science are encouraged to obtain a teaching major in one or more of the following areas: biology, chemistry, Earth sciences, middle-level science or physics. All students are advised to work toward a second major or minor endorsement.

All students enrolled in science majors leading to certification are required to have an approved schedule on file with a science education advisor as early as possible and before endorsement for student teaching.

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/science-education or by contacting the department directly.

## Science: Middle-Level Education, <br> BA

This major partially satisfies the criteria for a teaching endorsement in Middle-Level Science (4-9), qualifying students to teach science at the middle school or junior high levels. It may also be appropriate for students preparing to teach in informal science education settings, such as museums. Students who successfully complete the Science: Middle-Level Education, BA and STEM Teaching Program (an alternative to the Professional Education Program) are eligible to apply for Washington State teacher certification. Teacher certification candidates must receive a C grade or higher in all major and STEM Teaching Program courses, have a GPA of at least 3.0 for either the last 45 graded quarter credits or overall CWU/transfer cumulative, and meet all Washington State teacher certification requirements. See the middle-level science education advisor as soon as possible to develop a course of study.

## Admission Requirements

Mathematics competency equivalent to MATH 153
Note: Admission to the Teacher Certification Program is a separate process from admission to the major and is required for those pursuing public school teacher certification.

## Graduation Requirements

Note: See Teacher Certification Program graduation requirements for students pursuing public school teacher certification.

## Program Requirements

Candidates must have valid WSP and FBI fingerprint clearance and liability in order to complete any course that requires the candidate to be working with P -12th grade children on or off campus. The fingerprint clearance must be valid through the duration of the course. Fingerprint clearance must appear in the Office of Superintendent of Public Instruction (OSPI) Fingerprinting Database to be accepted.

For students pursuing public school teacher certification:

Successful completion of program portfolio required before student teaching.

Successful completion of the NES exam in middle grades general science and the edTPA required for teacher certification.

Required Courses Credits: 37-38

- SCED 101 - Integrated Life Science Credits: (5)
- CHEM 106 - Chemistry Inquiry Credits: (5)
- SCED 102 - Integrated Earth and Space Science Credits: (5)
- PHYS 101 - Introductory Astronomy I Credits: (5)
- OR PHYS 102 - Introduction to Astronomy Credits: (4)
- PHYS 106 - Physics Inquiry Credits: (5)
- SCED 311 - Science Concepts for Teachers Credits: (5)
- SCED 320 - Genetics and Cell Biology Concepts Credits: (5)
- SCED 354 - Science, Society and the Teaching Community Credits: (3)

Department-Approved Electives Credits: 7-8
Science content approved electives at the 300-level or higher. One can be a MATH course.

Total Credits: 45-46

## Science Education - Broad Area Science Teaching Minor

This minor is restricted to students working on a program aimed at teaching biology, chemistry, earth science, or physics. Science teaching majors must complete the appropriate courses in the three disciplines shown below that are outside their major. For example, a biology teaching major would need to fulfill the chemistry, earth science and physics requirements. Students interested in this minor need to see a science education advisor as soon as possible. This program may result in students taking more than four years to complete their degree. Students completing this minor are required to demonstrate knowledge, skill, and disposition proficiency of student learning outcomes through a program portfolio prior to student teaching. Students must pass the NES exam for General Science to receive the science endorsement.

Required Courses
(Complete all three areas not covered in major program)

- BIOL 181 - General Biology I Credits: (5)
- BIOL 182 - General Biology II Credits: (5)
- BIOL 183 - General Biology III Credits: (5)

Chemistry Credits: 15

- CHEM 181 - General Chemistry I Credits: (4)
- CHEM 181LAB - General Chemistry Laboratory I Credits: (1)
- CHEM 182-General Chemistry II Credits: (4)
- CHEM 182LAB - General Chemistry Laboratory II Credits: (1)
- CHEM 183 - General Chemistry III Credits: (4)
- CHEM 183LAB - General Chemistry Laboratory III Credits: (1)

Earth Science Credits: 13-14

- GEOL 101LAB - Introductory Geology Laboratory Credits: (1)
- GEOL 302 - Oceans and Atmosphere Credits: (4)

Select Either:

- GEOL 101 - Introduction to Geology Credits: (4)
- GEOL 103 - Geology of Washington Credits: (4)

Select Either:

- PHYS 101 - Introductory Astronomy I Credits: (5)
- PHYS 102 - Introduction to Astronomy Credits: (4)

## Physics Credits: 15

- PHYS 111 - Introductory Physics I with Laboratory Credits: (5)
- PHYS 112 - Introductory Physics II with Laboratory Credits: (5)
- PHYS 113- Introductory Physics III with Laboratory Credits: (5)
OR
- PHYS 181-General Physics I with Laboratory Credits: (5)
- PHYS 182-General Physics II with Laboratory Credits: (5)
- PHYS 183-General Physics III with Laboratory Credits: (5)

Total Credits: 43-45

College and Department Information

Science Education Department
College of the Sciences

This minor is open to students in any education major, as well as to other students as appropriate. This minor does not lead to an endorsement, but it will prepare students to be science leaders in the elementary school.

Required Courses

- SCED 101 - Integrated Life Science Credits: (5)
- SCED 102 - Integrated Earth and Space Science Credits: (5)
- SCED 103 - Integrated Physical Science Credits: (5)
- SCED 215 - STEM Outreach Field Experience Credits: (1-2) (Must be taken for 2 credits)
- OR STP 201 - Inquiry Approaches to Teaching Credits: (2)
- SCED 322 - Science Education in the Elementary School Credits: (4)
- OR ELEM 342-Teaching Elementary Science Inquiry Credits: (4)
- SCED 354 - Science, Society and the Teaching Community Credits: (3)
- SCED 422 - Advanced Teaching Strategies in Elementary Science Credits: (3)

Total Credits: 28

College and Department Information
Science Education Department
College of the Sciences

## STEM Teaching Program

The STEM Teaching Program prepares students to teach science, mathematics, or computer science at the middle school, junior high, or high school levels. To take the STEM Teaching Program, students must also be enrolled in one of the approved majors listed below. To qualify for the Washington State Residency Teaching Certificate, students must, in addition to successfully completing the STEM Teaching Program and their approved major degree, demonstrate proficiency in student learning outcomes through a program portfolio and pass the NES exam and the Teacher Performance Assessment (edTPA) in their endorsement area. Certification eligibility is monitored by the Teacher Certification Office in the School of Education. See the STEM Teaching Program advisor as soon as possible for more information and to develop a course of study.

## Approved major degrees:

Biology Major, BA or BS for endorsement in Biology (5-12)
Chemistry Major, BA or BS for endorsement in Chemistry (512)

Computer Science, BS for endorsement in Computer Science (K-12)

Geology Major, BA or BS for endorsement in Earth Science (512)

Physics Major, BA or BS for endorsement in Physics (5-12)
Mathematics: Secondary Education, BA for endorsement in Mathematics (5-12)

Mathematics: BS for endorsement in Mathematics (5-12)
Mathematics: Middle Level Education, BA for endorsement in Middle Level Mathematics (4-9)

Science: Middle Level Education, BA for endorsement in Middle Level Science (4-9)

## Admission Requirements

Full admittance to the Teacher Certification is required to enroll in STP 303 (Knowing and Learning).

## Graduation Requirements

- No grade lower than a C in major, minor and STEM Teaching Program courses
- Minimum GPA of 2.5 in major, minor and STEM Teaching Program courses
- Minimum GPA of 3.0 for last 45 graded quarter credits (the total may exceed 45 if an entire quarter is needed to achieve the minimum 45) or overall CWU/transfer cumulative.

## Program Requirements

- Fingerprint Clearance - Candidates must have valid WSP and FBI fingerprint clearance in order to complete any course that requires the candidate to be working with P-12th grade children on or off campus. The fingerprint clearance must be valid through the duration of the course. Fingerprint clearance must appear in the Office of Superintendent of Public Instruction (OSPI) Fingerprinting Database to be accepted.
- Liability Insurance

Required Courses

- EFC 480 - Student Teaching Credits: (16)
- STP 201 - Inquiry Approaches to Teaching Credits: (2)
- AND STP 202 - Inquiry Based Lesson Design Credits: (2)
- OR STP 300 - Inquiry Approaches to Teaching and Lesson Design Credits: (4)
- STP 303 - Knowing and Learning Credits: (4)
- STP 304 - Classroom Interactions 1 Credits: (4)
- STP 305 - Classroom Interactions 2 Credits: (4)
- STP 306 - Project-Based Instruction Credits: (3)
- STP 307A - Functions and Modeling for STEM Teaching Credits: (3)
- OR STP 307B - Functions and Modeling for Secondary Mathematics Credits: (3) OR
- STP 307C - Computer Science for STEM Teaching Credits: (3)
- STP 308 - Perspectives on Science, Mathematics and STEM Education Credits: (3)
- STP 309 - Research Methods Credits: (3)

Total Credits: 44

## Faculty and Staff <br> Chair

Eric Cheney, PhD

## Professors

Eric Cheney, PhD, deviance and social control, economic sociology, organizations, statistics and urban sociology Delores Cleary, PhD, criminology, the life-course, American society, minorities, ethnic studies, American Indian issues Judith Hennessy, PhD, social welfare and poverty, gender, sociology of work, sociology of family
Nelson Pichardo, PhD, ethnic studies, social movements

## Associate Professors

Michael Harrod, PhD, social psychology, criminology theory, intimate partner violence, statistics, research methods Pamela McMullin-Messier, PhD, demography, aging, collective action, social justice, environmental studies, family, gender, and sexuality
Michael Mulcahy, PhD, political sociology, political economy, organizations, theory

## Assistant Professors

Tracey Hoover, PhD, gender and identity, feminist movements and theory, family and socialization, and media
Sarah Samblanet, PhD, social inequality, statistics, gender
Griff Tester, PhD, gender, social inequality, aging, health
Baiqing (Cythnia) Zhang, PhD, criminology, statics

## Lecturers

Connie Robinson, PhD , historical sociology, political sociology, social movements, race, ethnicity and nation
Jessica Strawn, MA, criminology and communities, juvenile rehabilitation, social welfare

## Staff

Kelly Zakel-Larson, secretary supervisor

## Department Information

The Department of Sociology provides opportunities for students to understand the conceptual and methodological tools used by sociologists to understand society. Students will be encouraged to: 1) see society as concrete day-to-day behavior of human beings; 2) grasp the relationship between history, society, and the individual's life; 3) realize that social patterns are tools for the accomplishment of human ends and not necessarily
unalterable facts of life; and 4) develop the ability to critically analyze social phenomena.

## Department Standards

Students who major in sociology and social services are required to register with the department, at which time an advisor will be selected. In order to develop a program of study, students are required to meet once a quarter with their advisor. Further information on specific courses, the faculty, and career opportunities are available in the department office.

## Exit Requirements

Students are required to have a 2.3 cumulative grade point average for all majors.

## Honors in Sociology and

## Social Services

1. The sociology department's honors program is designed for students who wish to explore a particular research problem in depth.

## 2. Admission to the program

The student must:
(a) Have a 3.50 or higher cumulative GPA in sociology courses
(b) Be at least a junior
(c) Have a faculty member sponsorship; the faculty member would submit student's name to the department for admission

## 3. Requirements

The student is required to:
(a) Maintain a 3.5 or higher GPA in sociology coursework (including any approved outside electives) applied to the sociology degree
(b) Enroll in SOC 495 beginning fall quarter of the senior year (minimum of 10 credits over the course of that year)
(c) Complete a research project under the supervision of a faculty
(d) Participate in a public presentation of the research project (such as SOURCE, a professional conference, or other departmental-approved venues)
4.Those who fail to maintain a 3.5 GPA in the major, or who fail to participate in a public presentation will not receive honors.

## Sociology Core Requirements

Required Courses
SOC 107 - Principles of Sociology 5
SOC 350 - Social Theory I 5
SOC 363 - Methods of Social Research 5
SOC 364 - Data Analysis in Sociology 5
SOC 489 - Senior Seminar 1
Sociology Core Total Credits: 21

## Program Outcomes

For information on program outcomes, please go
to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the
department website: www.cwu.edu/sociology or by contacting the department directly.

## Sociology Major, BA (45 credits)

The Sociology major is an exciting discipline with expanding opportunities for a wide range of career paths. Sociology is a valuable liberal arts major for students planning careers in a wide variety of fields including social research, criminology, demography, social psychology, public administration, gerontology, education, social work and market research. It provides a useful background for those planning to enter law, business, medicine, community planning, and politics.

Students may choose either a 45 -credit major or a 60 -credit major.

## Graduation Requirement

In order to graduate, a student who completes the 45 -credit major must also have a minor or second major in another discipline.
(NOTE: Students admitted to the sociology major cannot also have a sociology minor, however, they may have a social services minor. Likewise, students admitted to the social services major cannot also have a social services minor, but they may have a sociology minor.)

Required Courses - Credits: 22

- SOC 107 - Principles of Sociology Credits: (5)
- SOC 300 - Introduction to the Major Credits: (1)
- SOC 350 - Social Theory I Credits: (5)
- SOC 363 - Methods of Social Research Credits: (5)
- SOC 364 - Data Analysis in Sociology Credits: (5)
- SOC 489 - Senior Seminar Credits: (1)

Select one course from each of the following categories Credits: 15

Deviance, Law and Social Control

- SOC 343 - Child Abuse Credits: (5)
- SOC 344 - Juvenile Delinquency Credits: (5)
- SOC 345 - Deviance Credits: (5)
- SOC 346 - Criminology Credits: (5)
- SOC 348 - Women and Crime Credits: (5)
- SOC 349 - Law and Society Credits: (5)
- SOC 352 - Punishment and Corrections Credits: (5)
- SOC 447 - White-collar and Organization Crime Credits: (5)

Inequality and Social Change

- SOC 325 - Aging Credits: (5)
- SOC 326 - Social Demography Credits: (5)
- SOC 354 - Minority Experience Credits: (5)

College of the Sciences

## Sociology Major, BA (60 credits)

A sociology major provides many distinctive perspectives on the world, generating new ideas and critiquing the old. Sociology addresses the most pressing issues of our time and is a rapidly expanding field whose potential is increasingly tapped by those who craft policies and create programs. Sociologists understand social inequality, patterns of behavior, forces for social change and resistance, and how social systems work. Sociology is an exciting discipline with expanding opportunities for a wide range of career paths and is a valuable liberal arts major for many career paths.

Students may choose either a 45 -credit major or a 60 -credit major. In order to graduate, a student who completes the 45credit major must also have a minor or second major in another discipline.
(NOTE: Students admitted to the sociology major cannot also have a sociology minor; however, they may have a social services minor. Likewise, students admitted to the social services major cannot also have a social services minor, but they may have a sociology minor.)

Required Courses - Credits: 22

- SOC 107 - Principles of Sociology Credits: (5)
- SOC 300 - Introduction to the Major Credits: (1)
- SOC 350 - Social Theory I Credits: (5)
- SOC 363 - Methods of Social Research Credits: (5)
- SOC 364 - Data Analysis in Sociology Credits: (5)
- SOC 489 - Senior Seminar Credits: (1)

Select at least one course from each of the following categories Credits: 15

Deviance, Law and Social Control

- SOC 343 - Child Abuse Credits: (5)
- SOC 344 - Juvenile Delinquency Credits: (5)
- SOC 345 - Deviance Credits: (5)
- SOC 346 - Criminology Credits: (5)
- SOC 348 - Women and Crime Credits: (5)
- SOC 349 - Law and Society Credits: (5)

- SOC 425 - Sociology of Education Credits: (5)
- SOC 459 - Organizations Credits: (5)

Department-Approved Electives - Credits: 23
A maximum of 5 credits of 100 -level electives and up to 5 credits of 200-level electives may be counted toward the major. PSY 363, Intermediate Statistics and Research Methods are an approved elective.

Total Credits: 60

College and Department Information
Sociology Department
College of the Sciences

## Social Services Major, BS

The social service major is designed for students interested in working in the human services delivery systems. Students are required to have a strong grounding in sociology as well as the applied field of social services. The coursework introduces students to critical issues in the field and offers students the opportunity to work within agencies in the community.

The major requirements are such that students are encouraged to organize their program of study to include a minor in an area of interest or specialization outside of sociology. Some areas that fit well with this major include psychology, ethnic studies, family studies, gerontology, women's studies, community health, and the like.

## Sociology Required Courses Credits: 22

***SOC 107 is a prerequisite for SOC 350 and SOC 445.

- SOC 107 - Principles of Sociology Credits: (5)
- SOC 300 - Introduction to the Major Credits: (1)
- SOC 350 - Social Theory I Credits: (5)
- SOC 363 - Methods of Social Research Credits: (5)
- SOC 364 - Data Analysis in Sociology Credits: (5)
- SOC 489 - Senior Seminar Credits: (1)

[^12]- SOC 301 - Introduction and History of Social Service Agencies Credits: (5)
- SOC 310 - Social Service Methods and Casework Credits: (5)
- SOC 442 - Social Welfare Policy Credits: (5)
- SOC 445 - Social Inequality Credits: (5)
- SOC 490 - Cooperative Education Credits: (1-12) (Must be taken for 4 credits.)

Department-Approved Electives Credits: 20
Choose 20 credits of upper-division sociology electives.
***Additional credits in SOC 490 may count towards graduation.

- SOC 320 - Death and Dying Credits: (5)
- SOC 325 - Aging Credits: (5)
- SOC 327 - Health and Society Credits: (5)
- SOC 343 - Child Abuse Credits: (5)
- SOC 344 - Juvenile Delinquency Credits: (5)
- SOC 354 - Minority Experience Credits: (5)
- SOC 356 - Sociology of Gender Credits: (5)
- SOC 357 - Sociology of Families Credits: (5)
- SOC 365 - Minority Groups Credits: (5)
- SOC 376 - Sociology of the Military and Veterans in U.S. Society Credits: (5)
- SOC 386 - Seminar on Racism Credits: (5)
- SOC 415 - Urban Sociology Credits: (5)
- SOC 425 - Sociology of Education Credits: (5)
- SOC 446 - Sociology of Immigration Credits: (5)
- SOC 460 - Community Structure and Organization Credits: (5)

Total Credits: 66

## Ethnic Studies Minor

Ethnic studies is a minor offered by the Sociology department that explores the multiple issues associated with race/ethnicity in the U.S. The central mission is to increase the understanding of the history and dynamics of race/ethnicity to prepare students for working in and interacting with an increasingly diverse and globalized world. Minor offers classes exploring the concept of race, the experiences of various racial/ethnic groups in the U.S. as well as whiteness studies.

## Required Courses Credits:15

- ETS 354 - Minority Experiences Credits: (5)
- OR SOC 354 - Minority Experience Credits: (5)
- OR SOC 365 - Minority Groups Credits: (5)
- SOC 109- Social Construction of Race Credits: (5)
- SOC 386 - Seminar on Racism Credits: (5)

Ethnic Studies Courses Credits: 3-6

Department-Approved Electives Credits: 9-15
Total Credits: 27-36

Mail Stop 7519
www.cwu.edu/step

## Contact

Toni Snowden
STEP Coordinator
STEP@cwu.edu

The Science Talent Expansion Program (STEP) is an innovative program designed to prepare and retain students in majors and careers in science, technology, engineering, and mathematics (STEM) fields. STEP consists of an integrated sequence of classes, enrichment activities, and student research opportunities through which students gain hands-on experience in modern scientific research methods, explore theme-based interdisciplinary scientific issues, and develop mentoring relationships with CWU STEM faculty.

Application to STEP is open to new freshman and transfer students with an interest in and aptitude for STEM fields.

STEP freshman participate in a three-quarter-long series of courses known as the STEP Freshman Science Seminar (STEP 101, STEP 102, and STEP 103). Completion of these three courses satisfies one of the Natural Sciences General Education Program requirements. Students who successfully complete the STEP Freshman Science Seminar series will be eligible to apply for and participate in the STEP Sophomore Bridging Program. The STEP Sophomore Bridging Program provides the opportunity for students in their sophomore year to participate in undergraduate research or serve as a Teaching Assistant in various STEM courses. Those students who have already had some college-level experience are invited to apply directly to the STEP Transfer Bridging Program and will take two STEP courses, STEP 301 in the fall and STEP 302 in the winter. Upon completion of these courses, transfer students will have the opportunity to apply for positions in the STEP Transfer Bridging Program.

The Science Talent Expansion Program at CWU involves faculty members from several academic departments: Anthropology; Biological Sciences; Chemistry; Computer Science; Geography; Geological Science; Engineering Technologies, Safety, and Construction Management; Mathematics; and Physics. More information about the program
and participating faculty members is available on the STEP website.

George W. Bellah, 3rd, MFA, movement, performance, stage combat, Asian drama
Terri Brown, PhD, head of music theatre, history, literature and music theatre
David Brown, MM, musical director, music theory
Marc Haniuk, MFA, resident scenic designer

## Assistant Professors

Patrick Dizney, MFA, voice, performance
Emily Rollie, PhD, theatre studies/education

## Senior Lecturer

Jerry Dougherty, MFA, stage and production management

## Lecturers

David Barnett, MFA, McConnell stage manager, scene shop manager, technical director
Meredith Magoun, MFA, costume design and technology
M. Catherine McMillen, BA, costume shop manager, wigs and makeup
Ligon, Nick, MFA, lighting shop manager
Lindsey, Natashia, PhD, dramaturg/history/literature
Esquivel, Ramón, MFA, theatre education/playwriting
Joseph Sasnett, BFA, voice instructor
Megan Smith, BFA, dance instructor, choreographer
Jason Tucholke, MFA, sound design and technology

## Staff

Manuel Bonilla, fiscal technician II
Mary Makins, secretary senior

## Department Information

The Department of Theatre Arts offers comprehensive study in the varied facets of theatre arts as they relate to theatre production. Coursework prepares students for rigorous and rewarding work within Central Theatre Ensemble (CTE), the production arm of the program, leading to professional work in the entertainment industry. Based on a professional model of theatre, CTE offers students the opportunity to thrive in all aspects of theatre production in a safe and mentoring environment, working in state-of-the-art venues supported by fully equipped shops and studios.

## Admission Requirements

A cumulative grade point average of 2.7 (B-) in the pre-major required courses must be achieved with a minimum grade of "C+" (2.3) in each course. The applicant must have earned a minimum cumulative GPA of 2.0 in all other collegiate study.

Pre-major required courses:

- TH 107 - Introduction to Theatre Credits: (4)
- TH 144 - Foundations of Acting Credits: (3)
- TH 166 - Theory of Play Production Credits: (3)

## BFA Specializations

Admission to the BFA is by audition/interview only.
Auditions/interviews are held each year, in late February and early March. See the Auditions Procedures Page www.cwu.edu/theatre/node/2479/\#8.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/theatre or by contacting the department directly.

## Theatre Studies, BA

A perfect choice for the theatre artist, the Theatre Studies, BA allows for advanced study in a variety of areas allowing students to become a well-rounded theatre artist who can go on to a focused study in graduate school or a variety of careers in the field. The theatre studies degree is also a great choice for the student who has a number of interests and needs the flexibility to explore several options.

The Department of Theatre Arts offers students a variety of emphasis areas to choose from to ensure that each participant receives specialized attention in the theatre discipline of their choice. By focusing on an emphasis, students can build skills and acquire the training to build strong resumes and portfolios in order to pursue professional jobs or advanced degrees.

## Admission Requirements

Students applying to the major must submit a major application form.

## Theatre Arts Core Requirements

The Theatre Arts programs are designed to prepare knowledgeable, skilled graduates who will successfully compete in an increasingly competitive field. Students will also learn to assess, explain, and interpret the many roles and responsibilities inherent in the world of the professional theatre artist, and beyond. They will understand how to use the skills they develop in other career paths related to their degree.

## Admission Requirements

BA students apply directly to the department through the onestep online application, after admitted to the institution. No audition is required.

- For a student new to the institution: The theatre arts application should be completed following admission to the university, and one week prior to enrolling in courses.
- For a continuing CWU student: The theatre arts application can be competed at any time.
BFA students audition/interview through our online prescreening web-based program, GetAcceptd.com. Information on the audition/interview process can be found at the department website.

Students seeking a theatre minor apply directly to the department through the one-step online application, after enrollment at the institution.

Theatre Arts Core Requirements
Students in all theatre arts programs must earn a grade of "C+" (2.3) or higher in Theatre Arts Core Requirement courses.

- TH 107 - Introduction to Theatre Credits: (4)
- TH 166 - Theory of Play Production Credits: (3)
- TH 363 - Theatre History I Credits: (4)
- TH 364 - Theatre History II Credits: (4)
- TH 365 - Theatre History III Credits: (4)

Lab Component - Credits: 4

All theatre students completing programs which share the Theatre Arts Core Requirements are required to complete at least four (4) lab assignments.

Complete four (4) credits of the following:

- TH 393 - Theatre Laboratory Credits: (1)
- TH 493 - Theatre Laboratory Credits: (1)

Production Component - Credits: 3
All theatre majors are required to complete at least one backstage assignment.

Choose one from the following:

- TH 301 - Production Application Credits: (3)
- TH 401 - Production Application Credits: (3)

Theatre Arts Core Total Credits: 26

Required Courses Credits: 18

- TH 144 - Foundations of Acting Credits: (3)
- TH 261 - Costume Technology Credits: (3)
- TH 267 - Scene Technology Credits: (3)
- TH 268 - Lighting Technology Credits: (3)
- TH 488 - Introduction to Dramaturgy Credits: (3)
- TH 495 - Senior Research Project Credits: (3)

Choose any of the following for a total of 8 credits:

- TH 375 - Asian Drama Credits: (4)
- TH 377 - Staging Gender Credits: (4)
- TH 380 - Studies in Drama Credits: (5)
- TH 382 - Diverse Experiences in American Drama Credits: (4)

Choose any of the following for a total of 3 credits:

- TH 140 - Introduction to Theatre Design Credits: (3)
- TH 145 - Foundations of Acting II Credits: (3)
- TH 329 - Directing I Credits: (3)
- TH 360 - Stage Management Credits: (3)

Choose any of the following for a total of 9 credits:

- TH 201 - Dance Production Application Credits: (13)
- TH 202 - Performance Studio Credits: (1-3)
- TH 301 - Production Application Credits: (3)
- TH 302 - Performance Application Credits: (3)
- TH 303 - Management Application Credits: (3)
- TH 401 - Production Application Credits: (3)
- TH 402 - Performance Application Credits: (3)
- TH 403 - Management Application Credits: (3)

College of Arts and Humanities

## Musical Theatre, BFA

The Musical Theatre, BFA program is designed to prepare knowledgeable, skilled graduates who will compete in an increasingly competitive field. Students will also learn to assess, explain, and interpret the many roles and responsibilities inherent in the world of the professional theatre artist. They will also understand how to use the skills they have developed in other career paths related to their degree.

## Admission Requirements

Admission to the program is by audition/interview only. Auditions/interviews begins with an online screening process that culminates in program admission being offered in early spring for the fall cohort.

See the Auditions Procedures
Page http://www.cwu.edu/theatre/auditions.

## Program Requirements

In addition to the department core courses, Musical Theatre
BFA candidates must maintain a cumulative GPA of 3.0 in
Theatre Arts with a minimum grade of "B-" (2.7) in each course within Musical Theatre.

Meeting this standard is reviewed as part of the annual jury.

## Theatre Education, BFA

The BFA program is designed to prepare knowledgeable, skilled graduates who will compete in an increasingly competitive field. Students will also learn to assess, explain, and interpret the many roles and responsibilities inherent in the world of the educational theatre artist. They will also understand how to use the skills they have developed in other career paths related to their degree.

This major satisfies the Washington State endorsement standards for Theatre. For marketability students should have a
minor leading to endorsement in an additional subject area. This pre-professional training program includes the Professional Education Program and full admission to the teacher certification program offered through the School of Education.

## Admission Requirements

Student will be admitted through a comprehensive application process at the sophomore level (after reaching 45 credits), or higher, and must have a minimum cumulative GPA of 3.0 in all collegiate work.

Student must also meet the standards for full admission to the School of Education Professional Education Program.

## Graduation Requirements

A passing score on each section of the Washington Educator Skills Test - Basic (WEST-E) for Theatre.

## Program Requirements

BFA candidates must maintain a cumulative GPA of 3.0 in Theatre Arts with a minimum grade of "B-" (2.8) in each course.

Student must also meet the standards for full admission to the School of Education Professional Education Program.

Theatre Endorsement Component Areas
The Theatre Education BFA curriculum is designed to not only meet state endorsement standards for Theatre but will provide one of the strongest teacher candidate preparation programs in the state. This pre-professional training program will prepare students for careers in K-12 as well as educational programming with regional theatres.

## Basic Skills Component Credits: 32

- TH 107 - Introduction to Theatre Credits: (4)
- TH 140 - Introduction to Theatre Design Credits: (3)
- TH 144 - Foundations of Acting Credits: (3)
- OR TH 244 - Basic Acting I Credits: (3)
- TH 166 - Theory of Play Production Credits: (3)
- TH 278 - Creative Drama in the Classroom Credits: (3)

## Dance Performance Minor (TH)

## Program Director

Therese Young
The dance performance minor is an interdisciplinary minor administered jointly by the dance and theatre arts faculty designed for students who wish to broaden their academic background and receive a well-rounded dance education, thus preparing them in the area of dance performance in a wide variety of settings. Students will develop competencies in choreography, rhythmic concepts, and dance production.

## Program Requirements

Minimum of one-year participation in DNCE 112 Dance Performance (Orchesis Dance Company). By audition.

Required Courses Credits: 26-27

- DNCE 101 - Modern Technique I Credits: (2)
- DNCE 102 - Modern Technique I Credits: (2)
- DNCE 103 - Modern Technique I Credits: (2)
- DNCE 112 - Dance Performance Credits: (1)
- DNCE 161 - Cultural History of Dance Credits: (4)
- DNCE 204 - Ballet Technique II Credits: (2)
- DNCE 205 - Ballet Technique II Credits: (2)
- DNCE 206 - Ballet Technique II Credits: (2)
- DNCE 300 - Dance Composition Credits: (3)
- DNCE 311 - Music for Dance - Rhythms and Resources Credits: (3)
- OR TH 215 - Music Fundamentals I Credits: (3)
- DNCE 402 - Dance Production Credits: (4)
- OR TH 301 - Production Application Credits: (3)

## Department-Approved Electives Credits: 10

Choose any of the following for a minimum of 10 credits: Only one credit courses may be repeated.

- DNCE 121 - Tap Dance I Credits: (1)
- DNCE 122 - Tap Dance II Credits: (1)
- DNCE 130 - American Style Ballroom Dance I Credits: (1)
- DNCE 131 - American Style Ballroom Dance II Credits: (1)

## Non-profit Organization Management Minor (TH)

(See catalog under communication department for details)
The minor in non-profit organization management is an interdisciplinary minor designed to provide an understanding of the organization, financing and management issues in non-profit organizations. It is designed to complement majors in artistic,
advocacy and educational endeavors. The minor provides practical, hands-on skills as well as discussion of the issues facing non-profit organizations.

Total Credits: 30

College and Department Information

Theatre Arts Department
College of Arts and Humanities

## Theatre Arts Minor

The theatre arts minor offers an opportunity for students to study theatre while pursuing a degree in another discipline. This minor is often added to enhance study in art, music, politics, and interior design, among others.

Required Courses Credits: 13

- TH 107 - Introduction to Theatre Credits: (4)
- TH 144 - Foundations of Acting Credits: (3)
- TH 166-Theory of Play Production Credits: (3)

Select 3 credits of production participation from the following:

- TH 201 - Dance Production Application Credits: (13)
- TH 202 - Performance Studio Credits: (1-3)
- TH 301 - Production Application Credits: (3)
- TH 302 - Performance Application Credits: (3)
- TH 303 - Management Application Credits: (3)
- TH 393 - Theatre Laboratory Credits: (1)
- TH 401 - Production Application Credits: (3)
- TH 402 - Performance Application Credits: (3)
- TH 403 - Management Application Credits: (3)
- TH 493 - Theatre Laboratory Credits: (1)

Department-Approved Electives Credits: 17

Theatre electives as approved by advisor.
Total Credits: 30

College and Department Information

Theatre Arts Department
College of Arts and Humanities

## International Theatre Experience Certificate

The certificate focuses on theatre as a means of cultural expression and exploration and is designed to enhance existing curriculum, not program-build. Students increase their
knowledge base and vocabulary in theatre-making and theatre appreciation through experiencing alternative cultural practices and perspectives. These experiences build upon the students' understanding of theatre performance, theatre craft/design and dramatic literature.

Note: This certificate requires additional travel fees that will be collected as part of the TH 278: International Theatre Experience: Planning course. These additional travel fees, that vary, will be published as the programs are offered and are based on variable such as: the travel experiences, locations, and time abroad.

Complete the following for at least 2 credits:

- TH 294 - International Theatre Experience Preparation Credits: (1)

Complete the following for at least 6 credits:

- TH 494 - International Theatre Experience Credits: (1-5) (topic vary based on travel experience)

Complete at least 7 credits of department-approved electives.

A list of suggested electives will accompany the announcement of each Travel Experience (TH 494).

Total Credits: 15

## University and Enrichment Program

## Undergraduate Studies

## First Area-Skill Building

The first area includes the UNIV 101, 102, and 103 courses.
These courses are ancillary courses that enable students to build skills needed to succeed at CWU. These courses allow students to learn about the General Education program, graduation requirements, develop skills for academic and social success, learn about major and minor programs, and how to approach developing an appropriate career. UNIV 101 is a required course for all students who have 45 or fewer transfer credits.

## Second Area-Skill Exploration and Enrichment

The second area is the enrichment program, which includes UNIV 297, 497, and 597. These courses are designed to encourage student exploration and intellectual enrichment and are only offered during summer quarter. Enrichment courses are not intended to substitute for either general education requirements or major or minor requirements. These courses are a part of a student's enrollment planning-specifically as free
electives. Only eight enrichment course credits can be counted toward a student's elective degree requirements.

## Third Area-Skill Practice and Engagement

The third area is the civic engagement program, which includes UNIV 109, 295, 308, and 309. These courses are designed to help students explore and engage in career interests while meeting community needs.

# William O. Douglas Honors College 

Ellensburg<br>Language and Literature Bldg., room 103<br>Mail Stop 1445<br>509-963-1445<br>Fax: 509-963-1206<br>www.cwu.edu/douglas-honors<br>\section*{Executive Director}<br>Anne Cubilie, PhD<br>\section*{Associate Director}<br>Vacant<br>Assistant Director<br>Christina Denison, MEd<br>\section*{Staff}<br>Nicole Ciraulo, secretary

The William O. Douglas Honors College (DHC) is Central's interdisciplinary program for academically talented students. The program is divided into two parts: a core curriculum and an upper-division scholarship experience. The core curriculum is composed of a series of courses that emphasize how the arts, humanities, sciences, and social sciences converge in considering historically important questions. The upper-division scholarship experience involves additional, advanced courses and a culminating research project either in the arts and humanities or in the sciences. DHC also sponsors cultural field trips, guest lectures, and a number of other extracurricular activities.

The college is named for U.S. Supreme Court Justice William O. Douglas, a native of Yakima, Washington, and a great supporter of higher education. Following Justice Douglas' example, the DHC encourages intellectual breadth, academic curiosity, and the application of scholarship to pressing social issues.

Students wishing to apply should contact the DHC office to find out about minimum qualifications and the application process. Students may apply to the honors college at any point in their college career.

DHC students must maintain a high level of academic achievement. A DHC student is in good standing when his or her cumulative grade point average (GPA) is 3.0 or higher. If a first-year DHC student's cumulative GPA falls below 3.0 and
remains below 3.0 for two consecutive quarters, the student shall be placed on academic warning for one quarter. After the first year, a DHC student will be placed on academic warning if his or her cumulative GPA falls below 3.0 for one quarter. Any student placed on warning shall be suspended from the DHC if his or her cumulative GPA is not 3.0 or above the quarter following the warning. The DHC director has the discretion to waive and/or modify these standards for individual students as long as such modification does not affect the academic integrity of the DHC, as determined by the DHC director. A student who has been suspended from the DHC may reapply only if his or her cumulative GPA reaches 3.0 or higher.

For additional information, visit the DHC website (www.cwu.edu/douglas-honors), stop by the office (Language and Literature Building, room 103), or call 509-963-1445.

## Douglas Honors College

The William O. Douglas Honors College (DHC) is Central's interdisciplinary program for academically talented students. The program is divided into two parts: the core curriculum (general education) and upper-division honors. The Core Curriculum is composed of a series of courses that emphasize how the arts, humanities, sciences, and social sciences converge in considering important questions. Upper Division Honors involves additional, advanced courses and a culminating research or creative project. DHC also sponsors cultural field trips, guest lectures, and a number of other extracurricular activities.

The college is named for U.S. Supreme Court Justice William O. Douglas, a native of Yakima, Washington, and a great supporter of higher education. Following Justice Douglas' example, the DHC encourages intellectual breadth, academic curiosity, and the application of scholarship to pressing social issues.

Students wishing to apply should contact the DHC office to find out about minimum qualifications and the application process. Students may apply to the honors college at any point in their college career.

DHC students must maintain a high level of academic achievement. All DHC students are held to the academic and behavioral standards as set forth in the DHC Student Code of Conduct. A DHC student is in good academic standing when his or her cumulative grade point average (GPA) is 3.0 or higher. If a first-year DHC student's cumulative GPA falls below 3.0 and remains below 3.0 for two consecutive quarters, the student shall be placed on academic warning for one quarter. After the first year, a DHC student will be placed on academic warning if his or her cumulative GPA falls below 3.0 for one quarter. Any student whose cumulative GPA is below 3.0 at time of graduation will not receive honors recognition from the DHC. The DHC director has the discretion to waive and/or modify these standards for individual students as long as such modification does not affect the academic integrity of the DHC, as determined by the DHC director. A student who has been suspended from the DHC for violating the DHC Student Code of Conduct may reapply; however, re-admittance is not guaranteed.
(www.cwu.edu/douglas-honors), stop by the office (Language and Literature Building, room 103), or call 509-963-1900.

Required Courses Credits: 56
Basic and Breadth Requirements (Core Curriculum)

- DHC 140 - Humanistic Understanding I Credits: (5)
- DHC 141 - Humanistic Understanding II Credits: (5)
- DHC 150 - Aesthetic Experience I Credits: (5)
- DHC 151 - Aesthetic Experience II Credits: (5)
- DHC 160 - Physical and Biological Systems I Credits: (5)
- DHC 161 - Physical and Biological Systems II Credits: (5)
- DHC 250 - Social and Behavioral Dynamics I Credits: (5)
- DHC 251 - Social and Behavioral Dynamics II Credits: (5)
- DHC 260 - Cultural Studies I Credits: (5)
- DHC 261 - Cultural Studies II Credits: (5)
- DHC 270 - Integrated Learning Credits: (5)
- UNIV 101 - Transition to CWU Credits: (1)

Advising Seminar
In accordance with university requirements, DHC students must take UNIV 101: Academic Advising Seminar as part of their general education coursework. Preferably, students taking UNIV 101 should take the section designated specifically for DHC students.

## World Language

DHC applicants are normally expected to have met the competence requirements for world language prior to acceptance. Students who have not done so will be required to take classes through World Language 153.

## Mathematics

DHC applicants are normally expected to have met the competence requirements for mathematics prior to acceptance. Students have met the math competency requirement if they passed Calculus in high school. Students who have not done so will be required to take classes through MATH 154 or placement in MATH 172 or higher or take MATH 101H.

## Upper-Division Honors

The upper-division honors involves additional, advanced courses and a culminating research or creative project. Students may enroll in upper-division honors at any time, with or without the DHC core curriculum.

Arts and Sciences Honors Credits: 15

For additional information, visit the DHC website

A student who completes the upper-division honors courses as well as a thesis/capstone project will earn the title Arts and Sciences Scholar.
*Students in the sciences may substitute four (4) research credits for DHC 480.

- DHC 301 - Honors Seminar: Elements of Research Credits: (2)
- DHC 380 - History of Science Credits: (4)
- DHC 401 - Honors Capstone Seminar Credits: (3)
- DHC 480 - Interdisciplinary Senior Seminar Credits: (4)
- DHC 497 - Honors Thesis and/or Creative Project Credits: (2)

## Douglas Honors College Scholar

A student who completes both the core curriculum and upperdivision honors will be designated a Douglas Honors College Scholar by the university.

## Interdisciplinary Honors Minor

A student who completes the following course regimen (34 credits) earns a DHC minor.

Select from the following: Credits: 5

- DHC 140 - Humanistic Understanding I Credits: (5)
- DHC 141 - Humanistic Understanding II Credits: (5)

Select from the following: Credits: 5

- DHC 150 - Aesthetic Experience I Credits: (5)
- DHC 151 - Aesthetic Experience II Credits: (5)

Select from the following: Credits: 5

- DHC 160 - Physical and Biological Systems I

Credits: (5)

- DHC 161 - Physical and Biological Systems II Credits: (5)

Select from the following: Credits: 5

- DHC 250 - Social and Behavioral Dynamics I Credits: (5)
- DHC 251 - Social and Behavioral Dynamics II Credits: (5)

Select from the following: Credits: 5

- DHC 260-Cultural Studies I Credits: (5)
- DHC 261 - Cultural Studies II Credits: (5)
- DHC 270 - Integrated Learning Credits: (5)
- DHC 380 - History of Science Credits: (4)

Total Credits: 34

## Director

Judith Hennessy, PhD

## Program Information

Women's, gender, and sexuality studies cultivates a critical awareness of the contributions of women and the impact of gender in our lives, both historically and in the contemporary world. Our interdisciplinary scope includes examining these issues from the perspective of politics, anthropology, sociology, psychology, history, philosophy, art, and literature. The objectives of the program are:

1. To explore existing knowledge about women and gender in a variety of disciplines
2. To critically assess the traditional disciplines in the light of new data concerning women and gender
3. To provide an academic foundation for students planning careers in women's studies or related fields
4. To promote research about women and gender within existing disciplines

Women's, gender, and sexuality studies offers an interdisciplinary minor as described below. With approval of the women's, gender, and sexuality studies director, the student will select appropriate electives to meet personal and professional goals.

With faculty advisement, interested students may construct individualized majors in women's, gender, and sexuality studies through the individual studies program for BA or BS major.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/women-gender or by contacting the department directly.

## Women's, Gender, and Sexuality Studies, BA

Women's, gender and sexuality studies cultivates a critical awareness of the contributions of women and the impact of gender and sexuality in our lives, both historically and in the contemporary world. Our interdisciplinary scope includes examining these issues from the perspective of politics, anthropology, sociology, psychology, history, philosophy, artistic expression, and literature. The objectives of the program are:

1. To explore existing knowledge about women, gender, and sexuality across a variety of disciplines
2. To critically assess the traditional disciplines in the light of new data concerning women, gender and sexuality.
3. To provide an academic foundation for students planning careers in diverse organizations; companies; and communities; women's, gender and sexuality studies, or related fields
4. To promote research about women, gender, and sexuality within existing disciplines

Required Courses Credits: 28

- WGSS 201 - Introduction to Women's, Gender, and Sexuality Studies Credits: (5)
- WGSS 250 - Introduction to Queer Studies Credits: (5)
- WGSS 326 - Intersections of Gender, Race, Class, and Sexualities Credits: (5)
- WGSS 340 - Gender and Sexuality in a Global Context Credits: (5)
- WGSS 351 - Feminist Theory Credits: (5)
- WGSS 489 - Women's, Gender, and Sexuality Studies Senior Capstone Credits: (3)

Department-Approved Electives Credits: 18-20
At least two (2) courses from the Humanities/Arts division and two (2) courses from the Social/Natural Science division with no more than 10 credits from any one discipline.

Humanities/Arts, Education and Professional Studies (Choose at least two courses)

- COM 402 - Gender Communication Credits: (4)
- ENG 335 - Women's Literature Credits: (5)
- HIST 334 - History of Gender and Sexuality in Africa from Pre-colonial Times to the Present Credits: (5)
- PHIL 325 - Women and Philosophy Credits: (5)

## Women's, Gender, and Sexuality Studies Minor

#### Abstract

Women's, Gender, and Sexuality Studies minor is an interdisciplinary minor designed to help students cultivate a critical awareness of gender and sexuality in their lives and an increasingly complex world.

Required Courses

- WGSS 201 - Introduction to Women's, Gender, and Sexuality Studies Credits: (5)

Department-Approved Electives Credits: 20
(select 20 credits, with no more than 10 credits in a single department)

- ANTH 356 - Gender Roles in Cross-cultural Perspective Credits: (4)
- ANTH 384 - Language and Gender Credits: (4)
- COM 402 - Gender Communication Credits: (4)
- ENG 335 - Women's Literature Credits: (5)
- PUBH 448 - Sexual Health Credits: (4)
- HIST 334 - History of Gender and Sexuality in Africa from Pre-colonial Times to the Present Credits: (5)
- HIST 344 - American Manhood in Historical Perspective Credits: (5)
- HIST 346 - Women in American History Credits: (5)
- LAJ 403 - Sexual Minorities, the Law, and Justice Credits: (4)
- LAJ 453 - Domestic Violence Issues Credits: (4)
- PHIL 325 - Women and Philosophy Credits: (5)
- POSC 311 - Women and Politics Credits: (5)
- PSY 312 - Queer Theory and Sexuality Credits: (4)
- PSY 483 - Psychology of Gender Credits: (4)
- SOC 348 - Women and Crime Credits: (5)
- SOC 356 - Sociology of Gender Credits: (5)
- SOC 357 - Sociology of Families Credits: (5)
- TH 377 - Staging Gender Credits: (4)
- SOC 358 - Sociology of Sexualities Credits: (5)
- SOC 359 - U.S. Feminist Movements Credits: (5)
- WGSS 250 - Introduction to Queer Studies Credits: (5)
- WGSS 490 - Cooperative Education Credits: (112)

Total Credits: 25

## Department Information

The Department of World Languages and Cultures offers BA degrees in French, Japanese, Russian, and Spanish and minors in ASL, Chinese, French, German, Japanese, Russian, and Spanish. Spanish has two streams: Heritage and Second Language Learner.

For non-majors or minors, the first-and second-year sequences are designed to provide basic proficiency in a world language. The department recommends that all majors include some organized study abroad where their major language is spoken, but there is no requirement for study abroad in any of the programs.

The World Languages and Cultures Department's Core Values are:

Lifelong Learning; Cross-cultural Communication, and Global Citizenship.

All WLC programs and courses adhere to these values.

## Admission to Department Programs

Students planning to major or minor must meet with an advisor in the World Languages and Cultures department for details about admission requirements and to complete an application form.

## Departmental Standards

Students in the majors and minors must earn a minimum grade of $\mathrm{C}+$ in each course used for their program/s.

## Core Course Requirements

Only courses numbered 200 and above will count toward a major or minor. Students may contact the department to request placement testing if they have prior instruction in any of the languages. For students with sufficient preparation, the 200level sequence may be waived through our placement exam or credit by examination. Please note that Spanish CLEP test scores may be used to complete General Education and/or graduation requirements but may not be used to fulfill course requirements for Spanish majors or minors. Students planning to study abroad must see their advisor prior to departure to ensure the applicability of the proposed course of study. All upperdivision classes not listed as requirements are approved electives.

## Program Outcomes

For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website: www.cwu.edu/foreign-language or by contacting the department directly.

## French Major, BA

This major requires a minor. Study abroad is recommended but not required for this major.

The French Major program offers small and focused classes taught by expert faculty. Students develop language proficiency and in-depth knowledge of culture through coursework that covers France and the francophone world, including Canada, North and Sub-Saharan Africa, and the Caribbean. This major is an asset to students who seek careers in education, international business, translation and interpretation, hospitality and tourism, foreign services, and more.

## Required Courses

## Second-year French Credits: 15

- FR 251 - Second-year French Credits: (5)
- FR 252 - Second-year French Credits: (5)
- FR 253 - Second-year French Credits: (5)

Department-approved French Electives Credits: 30

Total Credits: 45

College of Arts and Humanities

## Japanese Major, BA - Small Plan

This major requires a minor. Study abroad is recommended but not required for this major.

The Japanese Small Plan Major program guides students through the process of learning Japanese, and in doing so, fosters an appreciation of Japanese culture and history. In a broad sense, our program endeavors to help our students develop expanded intellectual horizons, an understanding of themselves, and improved communication and thinking skills, all through the study of the Japanese language. With Japanese, students can find careers in the electronics and film industries, education, business, tourism, the military, the Foreign Service, and other areas. The US Government designates Japanese as a "critical" language. ROTC students may be eligible to receive scholarships or other benefits if they select this major.

## Required Courses

Second-year Japanese Credits: 15

- JAPN 251 - Second-year Japanese Credits: (5)
- JAPN 252 - Second-year Japanese Credits: (5)
- JAPN 253 - Second-year Japanese Credits: (5)

Composition, Grammar and Conversation Credits: 10

- JAPN 361 - Composition, Grammar and Conversation I Credits: (5)
- JAPN 362 - Composition, Grammar and Conversation II Credits: (5)
(including those from study abroad institutions)

Total Credits: 45

College and Department Information

World Languages and Cultures Department
College of Arts and Humanities

## Russian Studies Major, BA

This major requires a minor. Study abroad is recommended but not required for this major.

The Russian major program offers classes in Russian language as well as Russian culture; e.g. film, history, and society. Russian is not only the language of the largest country in the world but is also spoken in 15 countries across Eastern Europe and Central Asia by over 160 million people. Consider taking Russian for careers in the government, Foreign Service, military, journalism, international NGOs and business, education, and tourism. The US Government designates Russian as a "critical" language. ROTC students may be eligible to receive scholarships or other benefits if they select this major.

## Required Courses

Second-year Russian Credits: 15

- RUSS 251 - Second-year Russian Credits: (5)
- RUSS 252 - Second-year Russian Credits: (5)
- RUSS 253 - Second-year Russian Credits: (5)

Advanced Russian Credits: 8

- RUSS 341 - Advanced Russian I Credits: (4)
- RUSS 342 - Advanced Russian II Credits: (4)

Advanced Composition and Grammar Credits: 4

- RUSS 441 - Advanced Composition and Grammar Credits: (4)

Topics in Russian Language Credits: 4
Variable topics (2 courses of 2 credits each)

- RUSS 445 - Topics in Russian Language Credits: (2)

Department-approved Russian Electives Credits: 14

Total Credits: 45

College and Department Information

World Languages and Cultures Department
College of Arts and Humanities

## Spanish Major, BA

This major requires a minor.
There are two streams connected with this major, one for Second Language Learners (students who do not speak Spanish at home), and one for Heritage Students (students with some linguistic familiarity with Spanish in the home).

Study abroad is recommended but not required for this major.
The Spanish major offers small and student-centered classes. Students develop language proficiency and in-depth knowledge of a culture through coursework that covers Spain, Latin America, and the U.S. Latino population. A solid background in Spanish language and culture is an asset to students who seek careers in education, international business, translation and interpretation, hospitality and tourism, and more. Because Spanish is the second language of the U.S., having a degree in Spanish also automatically enhances any other career choice.

The Heritage stream offers differentiated second and third year courses especially designed for students who have some prior understanding of the Spanish language, having interacted with it in the home. Students will interact with others who share a similar linguistic and cultural background, as well as learn about the cultures and literatures of the Hispanic world.

## Admission Requirements

Eligibility for 2nd-year Spanish is a requirement for entrance to the major.

## Required Courses

## Second-year Spanish Credits: 15

- SPAN 251 - Second-year Spanish Credits: (5)
- SPAN 252 - Second-year Spanish Credits: (5)

## American Sign Language Minor

The ASL minor is designed for students who wish to develop advanced level proficiency in American Sign Language. Offering small, focused classes, that cover language, culture, education, and literature, this minor is of benefit to socialminded careers that reach and assist deaf people, like teaching, interpreting, and working in the health-care sectors or
government agencies. There is currently a high demand of people proficient in ASL in the U.S.

Required Courses

- ASL 251 - Second-year American Sign Language Credits: (5)
- ASL 252 - Second-year American Sign Language Credits: (5)
- ASL 253 - Second-year American Sign Language Credits: (5)
- ASL 301 - American Sign Language Literature Credits: (5)
- ASL 310 - Deaf Culture Credits: (5)
- ASL 343 - Deaf Education Credits: (5)

Total Credits: 30

## Chinese Minor

The Chinese minor offers small and focused courses of language instruction by a native mandarin speaker, and proposes elective courses in Chinese history, culture, or languages. Students are encouraged to study abroad to achieve medium proficiency but may complete the minor on campus. Please contact the department for which courses are available as electives in any given year. In today's global and transnational world, Chinese is one of the most popular and necessary languages, and students with a Chinese minor may also profit from taking CWU's Asia Pacific Studies program. With a minor in Chinese, students can find careers in translation and interpretation, education, business, tourism, the military, the Foreign Service, and other areas. The US Government designates Chinese as a "critical" language. ROTC students may be eligible to receive scholarships or other benefits if they select this minor.

Only courses at the 200-level or above may count towards the minor.

## Required Courses

Second-year Chinese Credits: 15

- CHIN 251 - Second-year Chinese Credits: (5)
- CHIN 252 - Second-year Chinese Credits: (5)
- CHIN 253 - Second-year Chinese Credits: (5)

Department-approved Chinese Electives Credits: 12
Total Credits: 27

## French Minor

The French Studies minor offers small and focused classes taught by expert faculty. Students develop language proficiency and in-depth knowledge of culture through coursework that covers France and the francophone world, including Canada, North and Sub-Saharan Africa, and the Caribbean. This major is an asset to students who seek careers in education, international business, translation and interpretation, hospitality and tourism, foreign services and more.

Only courses at the 200-level or above may count towards the minor.

Required Courses

Second-year French Credits: 15

- FR 251 - Second-year French Credits: (5)
- FR 252 - Second-year French Credits: (5)
- FR 253 - Second-year French Credits: (5)

Department-approved French Electives Credits: 12

Total Credits: 27

## German Minor

The German minor offers small, focused, and student-centered classes in language, language use, and creative expression. Students also gain in-depth knowledge of culture though coursework that covers Germany, Switzerland, and Austria. Students are encouraged to study abroad to achieve proficiency but may complete the minor on campus. Please contact the department for which courses are available as electives in any given year. A minor in German is an asset to students who seek careers in education, international business, translation and interpretation, hospitality and tourism, the military, and more.

Only courses at the 200-level or above may count towards the minor.

Required Courses

## Second-year German Credits: 15

- GERM 251 - Second-year German Credits: (5)
- GERM 252 - Second-year German Credits: (5)
- GERM 253 - Second-year German Credits: (5)

Department-approved German electives Credits: 12

Total Credits: 27

## Japanese Minor

The Japanese minor guides students through the process of learning Japanese, and in doing so, fosters an appreciation of Japanese culture and history. With Japanese, students can find careers in the electronics and film industries, education, business, tourism, the military, the Foreign Service, and other areas. The US Government designates Japanese as a "critical" language. ROTC students may be eligible to receive scholarships or other benefits if they select this minor.

Only courses at the 200-level or above may count towards the minor.

Required Courses
Second-year Japanese Credits: 15

- JAPN 251 - Second-year Japanese Credits: (5)
- JAPN 252 - Second-year Japanese Credits: (5)
- JAPN 253 - Second-year Japanese Credits: (5)

Composition, Grammar and Conversation Credits: 10

- JAPN 361 - Composition, Grammar and Conversation I Credits: (5)
- JAPN 362 - Composition, Grammar and Conversation II Credits: (5)

Department-Approved Electives Credits: 5

Total Credits: 30

## Spanish Minor

There are two streams connected with this minor, one for Second Language Learners (students who do not speak Spanish at home), and one for Heritage Students (students with some linguistic familiarity with Spanish in the home).

The Spanish minor (for Second Language Learners) offers small and student-centered classes. Students develop language proficiency and in-depth knowledge of cultures through coursework that covers Spain, Latin America, and the U.S. Latino population.

The Spanish minor (for Heritage students) offers differentiated second and third year courses, especially designed for students who have some understanding of the Spanish language having interacted with it in the home. Students will interact with others who share a similar linguistic and cultural background, as well as learn about the cultures and literatures of the Hispanic world.

A solid background in Spanish language and culture is an asset to students who seek careers in education, international business, translation and interpretation, hospitality and tourism, and more. Because Spanish is the second official language of the U.S. having a degree in Spanish also automatically enhances any other career choice.

Only courses at the 200-level or above may count towards the minor.

## Admission Requirements

Eligibility for 2nd-year Spanish is a requirement for entrance to the minor.

## Required Courses

Second-year Spanish Credits: 15

- SPAN 251 - Second-year Spanish Credits: (5)
- SPAN 252 - Second-year Spanish Credits: (5)
- SPAN 253 - Second-year Spanish Credits: (5)

## Global Cultural Training Certificate

The Global Cultural Training Certificate equips students with valuable skills for working in a multicultural professional environment in a globalized market through a blend of theoretical (COM 302, WLC 427), applied (global culture electives in World Languages and Cultures), and experiential learning (WLC 490). It also equips students with skills that will enrich their personal lives and help them become ethical and global-minded citizens prepared to build lives for themselves in a world where diversity and interconnectedness are the norm. The Global Cultural Training Certificate provides in-depth focus and training on a specific skill set that will enhance the students' experience and add value to any number of CWU majors.

Required Courses Credits: 14

- COM 302 - Intercultural Communication Credits: (4)
- WLC 427 - Cross-Cultural Competence in a Globalized World Credits: (5)
- WL 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits)

Department-Approved Electives Credits: 5
Choose one from the following:

- FR 200 - Introduction to French Culture Credits: (5)
- JAPN 311 - Manga and Anime: Japanese Visual Culture Credits: (5)
- RUSS 200 - The Art of the Protest: Censorship and Resistance in Russian Culture Credits: (5)
- WLC 250 - Language and Power Credits: (5)
- WLC 311 - Popular Cultures of the World Credits: (5)

Total Credits: 19

## Spanish Translation and Interpretation Certificate

A certificate in Spanish Translation and Interpretation which will develop and augment the training and skills you obtain in the Minor or Major. Two of the courses [SPAN 442 and SPAN 443] currently serve as electives for the minor or major. The
remaining two courses [SPAN 454 and SPAN 492 or WL 490] are specific to the certificate. Together, these courses will provide you with training in specified terminology, and practical, hands-on experience in providing translation and interpretation services in medical, legal, and academic situations for needful members of the Central Washington region.

## Admission Requirements

Spanish majors and minors must have completed SPAN 341 with a C+ or above. All other students (both matriculated and non-matriculated) must demonstrate equivalent level of proficiency and receive departmental permission.

## Required Courses

- SPAN 442 - Spanish Translation and Interpretation Credits: (5)
- SPAN 443-Advanced Spanish Translation Credits: (5)
- SPAN 454 - Medical and Legal Spanish for Translators and Interpreters Credits: (5)
- SPAN 492 - Practicum in Spanish Translation and Interpretation Credits: (5)
- OR WL 490 - Cooperative Education Credits: (1-12) (Must be taken for 5 credits.)

Total Credits: 20

## YESS (Yearlong <br> Exploration of Social Sciences Program)

The Yearlong Exploration of Social Sciences (YESS) is an innovative program designed to prepare and retain students in majors and careers in the social sciences. YESS consists of an integrated sequence of classes, enrichment activities in service learning, and student research opportunities through which students gain hands-on experience in modern social science research methods, explore theme-based interdisciplinary social scientific issues, and develop mentoring relationships with CWU social science faculty.

Application to YESS is open to new first-year students with an interest in social science fields.

First year students enrolled in YESS will participate in a three-quarter-long series of courses known as the YESS Social Science Perspectives and Research Seminar (YESS 101, YESS 102, and YESS 103). Completion of these three courses satisfies one of the General Education Program requirements.

The Yearlong Exploration of the Social Sciences program at CWU involves faculty members from social science academic departments: Anthropology; Geography; Interdisciplinary Studies: Social Sciences Program; Law and Justice; Political Science; Psychology; and Sociology. More information about the program and participating faculty members is available on the YESS website: www.cwu.edu/yess.

Program Outcomes
For information on program outcomes, please go to: www.cwu.edu/mission.

## Course Offerings

Frequency of course offering information can be found at the department website or by contacting the department directly.

Yearlong Exploration of Social Sciences Program (YESS)
Courses

- YESS 101 - YESS Social Science Perspectives and Research I Credits: (2)
- YESS 102 - YESS Social Science Perspectives and Research II Credits: (2)
- YESS 103 - YESS Social Science Perspectives and Research III Credits: (1)

## Course Descriptions

ABS 110. Expressive Black
Culture: African American
Literary Traditions from
Folklore to Rap (5).
Interdisciplinary exploration of perspectives in African
American folk culture, from
oral expressions originating in
Africa and developed during
slavery to contemporary rap
and stand-up comedy. Course explores the worldwide contribution of black oral performative art. AH-
Literature and Humanities.
Course will be offered every year (Fall, Winter and Summer).
Upon successful completion of this course, the student will be able to:
Examine and identify African American cultural traditions as they are expressed through literature, oral tradition, art, and performance. Synthesize understanding of the development of African American expressive culture from its origins in Africa through its adaptations and transformations in the United States, to its appropriation and globalization.
Analyze forms of African American cultural expression and compare with student's own linguistic, conceptual and normative presuppositions. Examine ways in which linguistic, religious, philosophical, and historical circumstances have shaped both Black identity and social construction of African Americans by dominant cultures. Develop connections between concepts learned in course and topics that can be delivered to community.
Analyze the values, perspectives and attitudes of the dominant culture relative to contemporary African American expressive culture as an alternative cultural space where Blacks exercise power and resist institutional
"manageability and intelligibility."

Identify methods African
Americans used historically to advocate for social justice at local, national, and international levels. Analyze ways equality and inequality are institutionalized in social, political, economic and organizational structures. Connect personal experiences to issues of social justice within African American communities.
Develop the ability to articulate issues and processes, pertaining to African
Americans and the African
Diaspora, that cross
international boundaries.
Determine credibility of
information sources and understand elements that might temper this credibility.
ABS 210. Intro to the African
American Odyssey: Socio-
Economic and Political
Forces Shaping Black
Experience (5).
Examination of African
Americans as (1) members of the nation they helped to build; and (2) members of a distinct culture that shapes and is shaped by local, national and global socio-economic and political forces. Course will be offered every year (Winter, Spring).
Upon successful completion of this course, the student will be able to:
Articulate how African
Americans have gained access to or have been denied citizenship based on analyses of social, cultural, economic and political processes, issues, and events
Explain how social, psychological, and cultural experiences create value in African American communities. Analyze the relationship between the development of the African American experience and the community, citizenship, politics, and/or government
Describe how historical, social, economic, and cultural
developments have affected African American communities, including Slavery, Abolition, Civil War, Emancipation, Reconstruction, WW I \& II, The Great Migration, The Great Depression, Civil Rights movement, Black Power, the election of Barrack Obama and Black Lives Matter movement. Develop connections between concepts learned in course and topics that can be delivered to the local community. Apply what has been learned in class to address local pushback to active civil rights movements (for example, Black Lives Matter).
Identify methods African Americans used historically to advocate for social justice at local, national, and international levels. Analyze ways equality and inequality are institutionalized in social, political, economic and organizational structures. Develop the ability to articulate issues and processes, pertaining to African Americans, that cross international boundaries. Determine credibility of information sources and understand elements that might temper this credibility.
ABS 298. Special Topics (1-
6). May be repeated if subject is different.
ABS 299. Seminar (1-5). May be repeated if subject is different.
ABS 300. Black Diaspora Studies: Afro-Latin America and Afro-Caribbean
Cultures (5). Examines communities developing from displacement of Africans during colonization of the New World and the impact of these communities on Latin America and the Caribbean.
Upon successful completion of this course, the student will be able to:
Conduct field work in cultural studies focusing on the Black Diaspora communities.

Identify and describe Black Diaspora communities in Latin America and the Caribbean. Demonstrate their understanding of how communities developed from the displacement of Africans during the colonization of the New World and the impact of these communities on cultures of Latin America and the Caribbean.
ABS 302. Hip Hop as Global
Culture (5). This course examines Africana and black diasporic connections through popular culture using hip hop music. Hip hop allows us to study and understand contemporary history of black youth in Africa, Europe, and North America.
Upon successful completion of this course, the student will be able to:
Describe the historical processes that led to the rise and spread of hip hop music across the world. Identify the social, political, economic and cultural characteristics of hip hop in Africa, Europe and North America
Analyze and synthesize primary and secondary sources related to the origins and spread of hip hop music to all parts of the world in order to put forward well-supported argument on their own Explain the interaction of hip hop with other cultures by preparing clearly-written and clearly presented argument, including a thesis and sufficient historical evidence Describe the various variegated forms of hip hop across the world and identify differing explanations of hip hop as an agent of social change and the connections between cause and effect in the discipline of history
ABS 305. 20th Century Black Women's Literature (Put on reserve 9/16/16) (4). This seminar reads poetry, fiction, memoir, and criticism by and about black American women from 1919 to the 1990s. (Put
on reserve 9/16/16. Last taught in 2012. Will go inactive 8/24/19.) Prerequisite: ENG 101.

Upon successful completion of this course, the student will be able to:
Describe the various variegated forms of hip hop across the world and identify differing explanations of hip hop as an agent of social change and the connections between cause and effect in the discipline of history
Identify the critical and theoretical concerns of black female authors, particularly in relation to questions of history and memory, narrative and resistance.
Identify and evaluate the impact of larger historical events in the United States on the literature of black American women. Analyze the genre choices authors make and themes on which they focus when writing about the black female experience.
ABS 308. African American Folklore (5). This course focuses on various elements of African American Folklore; including, but not limited to folktales, folk life, music, dance, and material culture. Upon successful completion of this course, the student will be able to:
Identify and discuss the development of the study of African American Folklore from its formal inception to today.
Describe the most popular definitions of Folklore and
"folk", as well as methods of data collection in folklore. Describe how Folklore is used by individuals and groups to identify themselves and others. Illustrate the difference between comparative methods used by Folklorists and those used by other fields of study. Distinguish linguistic specificities in Oral Traditions such as dialect, grammar and syntactical variations, and regional vocabulary.

Analyze, discuss and identify the structure and function of various types of African American Oral Traditions. Identify and discuss the persistence of African American Folklore as it exists through customs, medicines, food ways, music, dance, games and material culture. Implement the requirements, methodology and best practices for conducting Folklore field research.
ABS 309. Race and Sports: Freedom, Power, and Difference (4). Sports in the United States present a fascinating paradox: while athletics offers many young people of diverse backgrounds unparalleled opportunities for self-advancement, intercollegiate and professional sports in many respects reproduce or intensify prevailing images and stereotypes around race, difference, and identity. Upon successful completion of this course, the student will be able to:
Analyze how sports shape and reinforce definitions of race, gender, sexuality, and social status in American society. Explain the impact of African American athletes on collegiate and professional sports organizations.
Delineate the commodification of the African American athlete in intercollegiate and professional sports Explain how African American athletes have used sports as a vehicle for protest, assimilation, and social mobility.
ABS 396. Individual Study
(1-6). May be repeated if subject is different.
ABS 397. Honors (1-12). Prerequisite: admission to department honors program. ABS 398. Special Topics (16). May be repeated for credit. ABS 399. ABS Seminar (3-5). With faculty mentoring and direction, students conduct in depth study of issues and events impacting African
descendants in the United States, the Caribbean, Latin America, and other areas of the African Diaspora. Students present research and projects to SOURCE, academic meetings, ABS faculty, and student audiences. Prerequisite: ABS 210.

ABS 400. Race and
Literature (4). Course reviews theory and use of "race" in the construction of knowledge and in English canonical texts. Upon successful completion of this course, the student will be able to:
Examine the cultural and ideological base of the idea of "races" in human history. Analyze and interrogate the reconstruction and production of knowledge under the political and institutional power structures of colonialism and slavery.
Identify specific areas where the politics of "race, constitute the production and experience of art, literature, and humanistic knowledge.
ABS 496. Individual Study (1-6). May be repeated if subject is different.
ABS 497. Honors (1-12). Prerequisite: admission to department honors program.
ABS 498. Special Topics (1-
6 ). May be repeated if subject is different.
ABS 499. Seminar (1-5). May
be repeated if subject is different.

## ACCT 251. Financial

Accounting (5). An
introduction to the theory and
practice of accounting and financial reporting. Topics include the accounting cycle, financial statements, and corporate accounting for assets, liabilities, equities, revenues and expenses.
Upon successful completion of this course, the student will be able to:
Provide definitions for key terms
Prepare the journal entries to record transactions
Prepare the journal entries to
adjust the accounting records

Prepare financial statements from the accounting worksheet (trial balance)
Prepare the journal entries to close the temporary accounts Calculate and interpret key financial ratios using the balance sheet and income statements
Demonstrate knowledge of periodic and perpetual inventory system Demonstrate knowledge of multiple inventory methods Demonstrate ability to work with petty cash and cash transactions
Demonstrate knowledge of uncollectible account transactions
Demonstrate knowledge of fixed assets and intangible assets
Demonstrate knowledge of corporate transactions
ACCT 252. Managerial
Accounting (5). An
introduction to the use of accounting information by managers. Topics included the use of accounting information for planning and control, performance evaluation, decision making, and the statement of cash flows, along with financial statement analysis. Prerequisite: C- or higher in ACCT 251.
Upon successful completion of this course, the student will be able to:
Provide definitions for key terms
Calculate inventory costs in a manufacturing environment. Demonstrate knowledge of cost accounting systems.
Demonstrate knowledge of cost behavior
Demonstrate knowledge of cost-volume-profit (CVP) analysis.
Demonstrate knowledge of a simple budget situation for a company
Demonstrate knowledge of standard costs
Demonstrate knowledge of decentralized operations Demonstrate ability to make short-term decisions

Demonstrate knowledge of capital investment decisions ACCT 296. Individual Study (1-6).
ACCT 298. Special Topics (1-
6). May be repeated if subject is different.
ACCT 299. Seminar (1-5).
May be repeated if subject is different.
ACCT 301. Accounting Skills for Non-Business Majors (5).
An overview of accounting, tax, and finance from the viewpoint of the financial statement user. Students will learn basic financial language and analysis skills for assessing enterprise performance. Customized topics for students in various majors. Course will be offered every year (Fall, Winter, Spring and Summer).
The course is recommended for any individuals not majoring in accounting or business. This course is not open to accounting or business administration majors. Upon successful completion of this course, the student will be able to:
Outline the basic financial statements, explain their purposes, and describe how people use them to assess the performance and the value of for-profit and not-for-profit enterprises.
Prepare a financial analysis of a public company in your field of study or an industry of interest to you. Calculate key financial ratios, formulate questions on the basis of these ratios, and explain how they can be used to solve business problems.
Describe the politcal origins and social implications of accounting and tax regulation, and the importance of ethical decision-making. Describe the concept of internal controls and give examples.
Describe the basic principles of personal and corporate taxation and perform basic tax calculations.
Distinguish between debt and equity financing, describe the rights of creditors and
shareholders (owners), and explain the pros and cons of financing a business with debt versus equity.
Demonstrate how managerial accounting information, such as fixed and variable costs, can be used to solve business problems and create value for various constituents.
ACCT 303. Tax Planning for Personal Finance (5).
Examines the topic of income tax planning and forecasting for individual clients and small business owners. Uses a case study approach to integrate the material and apply it to personal financial planning situations. Emphasizes the evaluation of financial alternatives. Course will be offered every year. Course will not have an established scheduling pattern. Prerequisite: a grade of C or higher in ACCT 251 or ACCT 301.

Upon successful completion of this course, the student will be able to:
Compare and contrast the fundamental components of the income tax system including filing forms, filing status, income, exemptions, exclusions, deductions, adjustments, credits, and tax rates.
Explain how a progressive income tax system works and contrast it with other tax systems
Differentiate between the organizational form and the tax treatment of income, expenses, payroll and wage taxes for sole proprietorships, partnerships, LLPs, LLCs, S- corps and Ccorps.
Explain the basic income tax compliance rules for trusts and estates including when a return is required and how it is filed. Contrast the trust and estate income tax rules with personal income tax rules.
Explain how a client will report income and appropriate deductions from a trust or estate on his income tax return.

Differentiate between tax avoidance and tax evasion. Identify income shifting techniques (transfer and timing) and explain how income shifting benefits a taxpayer.
Compare the cash flow impact of receiving tax- exempt or tax-sheltered income to taxable income.
Explain how deduction clustering results in a lower tax liability.
Distinguish between different
investment strategies that can be used to manage tax liability; e.g., tax loss harvesting, bond swaps, etc.
Differentiate between the taxation of capital gains and ordinary income, including the difference in applicable tax rates.
Explain the special rules regarding capital gains and losses on a principal residence. Explain the tax implications of supporting an elderly parent or adult child.
Select the appropriate credit/deduction to use for post-secondary education costs.

## ACCT 305. Cost Accounting

(5). Economics of cost accounting; industrial analysis, production control through costs, types of cost systems, and burden application. Prerequisites: a grade of C or higher in ACCT 251 and ACCT 252, and a pre-major or major or minor or certificate student in a College of Business program; or admission to the MPA program.
Upon successful completion of this course, the student will be able to:
Provide definitions for key terms.
Calculate inventory costs in a manufacturing environment. Demonstrate knowledge of cost accounting systems. Demonstrate knowledge of cost behavior.
Demonstrate knowledge of cost- volume-profit (CVP) analysis.

Demonstrate knowledge of a simple budget situation for a company.
Demonstrate knowledge of standard costs.
Demonstrate knowledge of decentralized operations. Demonstrate ability to make short-term decisions Demonstrate knowledge of capital investment decisions

## ACCT 340. Income Tax

Accounting I (5). Introduction to income taxation of corporations, partnerships, and individuals with an emphasis on tax compliance, planning, and computer-based tax research. Formerly ACCT 346, students may not receive credit for both. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: a grade of C or higher in
ACCT 251 and ACCT 252, and a pre-major or major or minor or certificate student in a College of Business program. Upon successful completion of this course, the student will be able to:
Recognize how tax systems are designed and how the legislative, executive, and judicial branches influence the design and implementation of U.S federal tax laws. Locate and interpret primary authoritative sources of tax information using web-based services.
Apply U.S. tax law to meet compliance requirements. Identify and analyze the impact of U.S. income taxation on corporate financial reporting. Apply U.S. tax law to identify tax planning opportunities. Communicate the results of research, compliance, and planning efforts, to audiences with different levels of expertise.

## ACCT 350. Intermediate

Accounting I (5). An in-depth study of financial accounting theory and practice. The first of a three-course intermediate sequence, this course is intended for the student who requires more than principles level accounting coverage.

Prerequisite: a grade of C or higher in ACCT 251 and ACCT 252, and a pre-major or major or minor or certificate student in a College of Business program; or admission to the MPA program.
Upon successful completion of this course, the student will be able to:
Demonstrate intermediate-level competency in practicing all phases of the accounting cycle. Demonstrate intermediate-level competency in the accounting for specific topics designated for this first of a three-course intermediate sequence. These topics are:
The demand for and supply of financial accounting information Financial reporting: its conceptual framework; Review of a company's accounting system; The balance sheet and statement of shareholders' equity
The income statement and the statement of cash-flows;
Time value of money; Cash and receivables; Inventories: cost, measurement and cost flow assumptions; Inventories: special valuation issues.
Identify ethical dilemmas that likely will confront the accounting professional. With reference to the topics listed in outcome two above, demonstrate intermediate-level competency in the application of U.S. accounting standards and the integration of international accounting standards.

## ACCT 351. Intermediate

Accounting II (5). The second of a three-course intermediate sequence, this course continues ACCT 350, covering complex topics in accounting and financial reporting. Prerequisite: a grade of C or higher in ACCT 350, and a pre-major or major or minor or certificate student in accounting; or admission to the MPA program.

Upon successful completion of this course, the student will be able to:
Demonstrate intermediate-level competency in practicing all phases of the accounting cycle. Demonstrate intermediate-level competency in the accounting for specific topics designated for this second of a threecourse intermediate sequence. These topics are: current liabilities and contingent obligations property, plant, and equipment: acquisition and subsequent investments depreciation, depletion, impairment, and disposal of property, plant and equipment intangibles
investments and long-term receivables
Time value of money;
Cash and receivables;
financing liabilities: bonds and long-term notes payable contributed capital Identify ethical dilemmas that likely will confront the accounting professional. With reference to the topics specified in Learner Outcome 2 above, demonstrate intermediate-level competency in the application of U.S. accounting standards and the integration of international accounting standards.
ACCT 352. Intermediate
Accounting III (5). The third of a three-course intermediate sequence, this course continues ACCT 351, covering complex topics in accounting and financial reporting. Also included are special topics and existing/emerging issues. Prerequisite: a grade of C or higher in ACCT 351, and a pre-major or major or minor or certificate student in
accounting; or admission to the MPA program.
Upon successful completion of this course, the student will be able to:
Demonstrate intermediate-level competency in practicing all phases of the accounting cycle. Demonstrate intermediate-level competency in the accounting
for specific topics designated for this second of a threecourse intermediate sequence. These topics are: Retained earnings and earnings per share
Advanced issues in revenue recognition
Accounting for income taxes Accounting forpost- retirement benefits
Accounting for leases
More in-depth examination of the statement of cash flows Accounting for changes and errors
Identify ethical dilemmas that likely will confront the accounting professional. With reference to the topics specified above in Learner Outcome 2, demonstrate intermediate-level competency in the application of U.S. accounting standards and the integration of international accounting standards.
ACCT 396. Individual Study (1-6).
ACCT 397. Honors (1-12).
Prerequisite: admission to department honors program.
ACCT 398. Special Topics (16). May be repeated if subject is different.
ACCT 399. Seminar (1-5).
May be repeated if subject is different.
ACCT 405. Advanced Cost
Accounting (5). This course reviews, enhances, and extends concepts learned in ACCT 305. The focus is on assessing the information needs of end users in the organization, then creating reports (including Excel workbooks) to address those needs. ACCT 405 and ACCT 505 are layered courses; students may not receive credit for both. Prerequisites: a grade of C or higher in ACCT 305 and admission to the accounting major AND completion of the College of Business Foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH 170 or MATH 172 or MATH 173 and ECON 201) with a minimum C - grade in
each course and a minimum collegiate GPA of 2.25 .
Upon successful completion of this course, the student will be able to:
Reinforce and enhance knowledge of traditional first course (ACCT 305) topics. Management accountant's role
Different costs for different purposes
Cost-volume-profit analysis
Job (order)costing
Activity-based costing
andmanagement
Master budget
Responsibility accounting Flexible budgets and direct cost variances
Flexible budgets and overhead cost variances
Inventory costing and capacity analysis
Determining how costs behave
Decision making and relevant
information
Process costing
Extend knowledge and
demonstrate intermediate-level competence with second course (ACCT 405) concepts.
Pricing decisions and cost management
Balanced scorecard and strategic profitability analysis Customer profitability and sales variance analysis
Allocation of support department costs
Cost allocation related to joint products and by-products
Accounting for spoilage,
rework and scrap
Balanced scorecard related to
quality and theory of
constraints
Inventory management and JIT
planning and control
Cost of capital and capital
budgeting
Transfer pricing
Performance measurement
Practice basic/intermediate
Excel spreadsheet management
accounting applications related to:
Master budgeting
Cash budgeting
Cost of capital estimation
Capital budgeting
Process costing cost of
production reports

Variance analysis
ACCT 430. Governmental and Non-profit Accounting
(5). Accounting and budgetary controls for governmental units and non-profit service organizations, including educational institutions (from school districts to universities) and hospitals. Emphasis is on the advantages, uses, disadvantages, and differences in fund accounting. ACCT 430 and ACCT 530 are layered courses; students may not receive credit for both. Prerequisites: (a grade of C or higher in ACCT 351 or concurrent enrollment in ACCT 351 with a cumulative CWU GPA greater than 3.0); AND admission to the accounting major AND completion of the college of business foundation courses
(ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH 170 or MATH 172
or MATH 173 and ECON 201)
with a minimum grade of C - in each course and a minimum collegiate GPA of 2.25 . Upon successful completion of this course, the student will be able to:
Develop and implement accounting and financial management procedures appropriate for governmental entities. The focus is on state governments and the political subdivisions thereof. Develop and implement accounting and financial management procedures for non- government assisted not-for-profit organizations. The focus is on volunteer health and welfare organizations, such as the American Red Cross. Develop and implement accounting and financial management procedures for selected special non-for-profit entities: public/private colleges and universities, and public/private hospitals and other health care providers. Develop audit procedures for governmental and nonprofit entities.

ACCT 441. Advanced Tax 1:
Individual (5). Study of principles of federal income taxation of
individuals. Focuses is on individual income tax compliance, such as gross income, deductions, credits, property transactions, retirement income, alternative minimum tax, and selfemployment tax. ACCT 441 and ACCT 541 are layered courses; students may not receive credit for both. Formerly ACCT 446, students may not receive credit for both. Course will be offered every year (Fall, Spring).
Prerequisites: a grade of C or higher in ACCT 340 and (a) admission to a Tax Certificate Program or (b) admission to the accounting major AND completion of the College of Business Foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH 170 or MATH 172 or MATH 173 and ECON 201) with a minimum C - grade in each course and a minimum collegiate GPA of 2.25 . Upon successful completion of this course, the student will be able to:
Locate and interpret primary and secondary authoritative sources of tax information using web-based services. Apply U.S. tax law to meet compliance requirements Apply U.S. tax law to identify tax planning opportunities Communicate the results of research, compliance, and planning efforts, to audiences with different levels of expertise.
ACCT 442. Advanced Tax 2: Corporations and other entities (5). Study of principles of federal income taxation of corporations and pass-through and their investors. Coverage includes formation, distributions, withdrawals, and dissolution. Course introduces income tax issues concerning estates, trusts, exempt organizations, retirement plans,
and farmers. ACCT 442 and ACCT 542 are layered courses; a student may not receive credit for both. Course will be offered every year (Winter). Prerequisite: Completion of ACCT 303 or ACCT 340 with a minimum grade of C .
Upon successful completion of this course, the student will be able to:
List the preliminary actions and documents necessary to prepare income tax returns for business entities, trusts, and estates
Compute and define all types of business income
Distinguish the tax treatment of C corporations, S corporations, Partnerships, Trusts, and Estates
Summarize the various retirement plans available to employees
Apply the law as it relates to tax credits and deductions available to businesses Classify property exchanges as voluntary, involuntary, taxable, or tax-free
Identify the most common tax planning strategies available to businesses
Identify and apply key tax provisions applicable to farmers
Recall the process to apply for tax-exempt treatment Evaluate a tax-exempt organization's compliance with tax filing requirements Evaluate a trust or estate's compliance with tax filing requirements
ACCT 443. Advanced Tax 3: Practice and Procedure (5).
Study of rules of conduct and ethics in tax practice, such as competency, conflicts of interest, penalties, and sanctionable acts. Coverage of federal tax procedure, statute of limitations, notions of evidence, and record maintenance. ACCT 443 and
ACCT 543 are layered courses; students may not receive credit for both. Course will be offered every year (Spring).
Prerequisite: Completion of a
foundation tax course
equivalent to ACCT 303 or
ACCT 340 with a minimum
grade of C .
Upon successful completion of
this course, the student will be able to:
Explain what constitutes
practice before the IRS
List the categories of professionals authorized to practice before the IRS, their
respective rights and
responsibilities
Identify sanctionable acts by
tax practitioners
Apply rules of professional conduct and applicable penalties
Demonstrate mastery of key provisions in Treasury
Department Circular 230
Protect Private Taxpayer
Information through proper handling and storage Maintain records according to professional rules and best practice standards
Experience the process of representing a taxpayer before the IRS using multiple scenarios.
ACCT 450. Advanced
Accounting (5). Accounting theory and practice for business, combinations and consolidated financial statements, foreign currency transactions and translation, partnerships, and advanced special topics. ACCT 450 and ACCT 550 are layered courses; students may not receive credit for both. Prerequisites: a grade of C or higher in ACCT 351 and admission to the accounting major AND completion of the College of Business Foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH 170 or MATH 172 or MATH 173 and ECON 201) with a minimum C - grade in each course and a minimum collegiate GPA of 2.25 .
Upon successful completion of this course, the student will be able to:
Students will be able to prepare consolidated financial statements (includes outside
ownership and intra-entity asset transactions)
Students will be able to work with foreign currency transactions hedging
Students will be able to translate foreign currency financial statements Students will be able to prepare financial statements for partnerships
ACCT 455. Accounting Information Systems (5). Accounting information system development process and related information systems technologies. Includes the application, control, and audit of accounting information systems. ACCT 455 and ACCT 555 are layered courses; students may not receive credit for both. Prerequisites: a grade of C or higher in ACCT 350, and admission to accounting major and completion of the College of Business Foundation courses (ACCT 251, ACCT 252, BUS 221, BUS 241, ECON 130, ECON 201, MATH 153) with a minimum C- grade in each course and a minimum cumulative GPA of 2.25 . Upon successful completion of this course, the student will be able to:
Students will be able to explain the objectives and processes of each accounting transaction cycle and interpret flowcharts and other graphical documentation of those cycles. Students will be able to explain the objectives and processes of each accounting transaction cycle and interpret flowcharts and other graphical documentation of those cycles. Students will be able to identify the key components and processes of manual and computerized accounting information systems. Students will be aware of current issues and emerging technologies that affect the evolution of accounting information systems in a global economy mediated by networked digital technologies.

ACCT 460. Auditing (5).
Auditor's functions and responsibilities. Evaluation of the system of internal control, the determination of appropriate auditing procedures, and the extent of their application. Prerequisites: (a grade of C or higher in ACCT 352 or concurrent enrollment in ACCT 352 with a cumulative CWU GPA greater than 3.0); AND admission to the accounting major AND completion of the college of business foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS
241 and MATH 153 or MATH
154 or MATH 170 or MATH
172 or MATH 173 and ECON
201) with a minimum grade of

C - in each course and a
minimum collegiate GPA of 2.25 .

Upon successful completion of this course, the student will be able to:
Provide definitions for key audit terms
Prepare narratives and flowcharts to document systems and determine the nature of audit tests
Determine and prepare appropriate audit evidence and documentation
Identify the types of audit
reports and opinions
Distinguish ethical from
unethical behavior in the audit environment
ACCT 461. Fraud
Examination (5). Detection and prevention of financial statement fraud and other forms of business fraud. ACCT 461 and ACCT 561 are layered courses; students may not receive credit for both. Prerequisites: a grade of C or higher in ACCT 351 and admission to the accounting major AND completion of the College of Business Foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH
170 or MATH 172 or MATH 173 and ECON 201) with a minimum C- grade in each
course and a minimum collegiate GPA of 2.25.. Upon successful completion of this course, the student will be able to:
Be able to explain each element of the fraud triangle Be able to identify the types of fraud from different scenarios
Be able to interview an individual suspected of fraud and request a signed confession Be able to properly collect and preserve fraud examination evidence for trial
Be able to prepare a fraud report

## ACCT 475. International

Accounting (5). Explores the formulation and application of accounting principles in other industrialized countries. Particular emphasis directed toward the harmonization of accounting principles between the U.S. and other countries. ACCT 475 and ACCT 575 are layered courses; students may not receive credit for both. Prerequisites: a grade of C or higher in ACCT 351 and admission to the accounting major AND completion of the College of Business
Foundation courses (ACCT
251 and ACCT 252 and BUS
221 and BUS 241 and MATH
153 or MATH 154 or MATH
170 or MATH 172 or MATH
173 and ECON 201) with a
minimum C- grade in each
course and a minimum
collegiate GPA of 2.25 .
Upon successful completion of this course, the student will be able to:
Explain the nature and scope of international accounting Identify the role that political, cultural, social, legal, and economic variables play in the development and practice of accounting in an international environment
Analyze the financial impact of foreign currency exposure, taxation, and transfer pricing issues.
Explain the financial impact of significant differences between GAAP and IFRS

Reformat and restate financial statements from US GAAP to IFRS and vice versa
ACCT 484. Professional Writing and Speaking for the Accountant (5). Develop written and verbal communications skills for practical application in public, private, and governmental accounting fields. Includes interviewing techniques, preparation and presentation of group and individual reports, and preparation of resumes, letters, memos, and work papers. ACCT 484 and ACCT 584 are layered courses; students may not receive credit for both. Prerequisites: (a grade of C or higher in ACCT 351
AND admission to the accounting major AND completion of the college of business foundation courses (ACCT 251 and ACCT 252 and BUS 221 and BUS 241 and MATH 153 or MATH 154 or MATH 170 or MATH 172 or MATH 173 and ECON 201) with a minimum grade of C - in each course and a minimum collegiate GPA of 2.25 . Upon successful completion of this course, the student will be able to:
Be able to communicate about
professional issues in a manner that is appropriate. For different audiences;
Be able to use computers for perform career-oriented tasks. Be able to discuss the professional responsibilities and challenges in various career paths.
ACCT 490. Cooperative
Education (1-12). An
individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. (Student should have an overall GPA greater than a cumulative 2.0 in order to get internship credit.) Note: While ACCT 490 can nolonger be used as an
accounting elective in the accounting major, it can still be used toward the 20 hours of internship credit allowed by the university and for the 225 -hour requirement for the CPA examination. May be repeated for credit. Grade will either be S or U. Prerequisites: prior approval and admission to the accounting major.

## ACCT 492. Volunteer

Income Tax Assistance (2).
Preparation of tax returns of low income taxpayers, including tax return preparation training. Grade will either be S or U. ACCT 492
and ACCT 592 are layered courses; a student may not receive credit for both. Course
will be offered every year (Winter). May be taken concurrently with ACCT 303 or ACCT 340. Prerequisites: ACCT 303 or ACCT 340 and admission to the accounting major or a Tax Certificate; or permission of the department chair.
Upon successful completion of this course, the student will be able to:
Provide definitions for key tax terms
Prepare simple individual income tax returns
ACCT 493. Applied
Accounting Techniques (3). Under direct supervision of the instructor, assist in answering accounting students' questions and aid in completion of homework for a minimum of six hours weekly. Other tasks as assigned. Grade will either be $S$ or $U$. Prerequisite: admission to the accounting major.
ACCT 496. Individual Study
(1-6). May be repeated for credit. Prerequisite: admission to the accounting major.
ACCT 497. Honors (1-12). Prerequisite: admission to department honors program.
ACCT 498. Special Topics (16). May be repeated for credit under a different subtitle. Prerequisite: admission to the accounting major.

ACCT 499. Seminar (1-5).
Repeatable for credit under different subtitle. Prerequisite: admission to the accounting major.
ADMG 201. Introduction to
Business (3). Functions, practices, and organization of the business enterprise. Course
will be offered every year (Fall, Winter, Spring, and Summer).
Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the purpose of business and where it fits in the field of IT management and any industry career
Identify careers and opportunities in selling. Identify the functional areas of business and how they interrelate.
Demonstrate understanding of the impact of legal, social, economic, and entrepreneurial aspects of business on the business environment. Demonstrate the importance of international business.
Demonstrate the various forms of business organizations - sole proprietorships, partnerships, corporations, and cooperatives and how they operate. Demonstrate basic understanding of the ethical and legal issues in business.
ADMG 271. Business Math
Applications (4). Business and merchandising mathematics applications. Course will be offered every year (Fall, Winter, Spring, and Summer). Upon successful completion of this course, the student will be able to:
Apply percentages to specific business decisions. Calculate discounts, markups, and markdowns. Calculate payroll taxes. Interpret interest, promissory notes, future and present values.
Calculate finance charges, APR, and finance charge rebates.

Interpret mortgage payments, closing costs, and housing ratios.
Interpret life, property, and vehicle insurance.
Employ business statistics and prepare data presentations.
ADMG 298. Special Topics (1-6). May be repeated if subject is different.
ADMG 299. Seminar (1-5).
May be repeated if subject is different.
ADMG 302. Financial Analysis for Administrative and IT Support (5). This course addresses the financial analysis functions necessary for an administrative and IT support manager to complete requested financial documents. Administrative and IT support staff must understand the basis of financial accounting.
Prerequisites: ADMG 271 and junior standing.
Upon successful completion of this course, the student will be able to:
Define accounting terminology and concepts.
Analyze and develop income statements as they pertain to the organization as a whole, but more, specifically the income statement within the administrative and IT managers reporting functions. Analyze and develop balance sheets as they pertain to the organization as a whole, but more specifically the balance sheet as it pertains to IT department.
Explain and interpret cash flow analysis as it pertains to the IT or administrative manager and his/her specific department. Develop profitability ratios, leverage rations, liquidity rations, efficiency rations, and ration relationships as they pertain to the IT department and development of IT department related reports. Explain and analyze return on investment (understanding how to determine ROI and the role it plays in IT project
management).
Interpret leading versus
lagging indicators as
specifically related to the IT
and administrative.
ADMG 371. Administrative Management (4).
Administrative management techniques and practices. Upon successful completion of this course, the student will be able to:
Define the functions of administrative management and describe typical activities performed in each of these functional areas
Describe the six guiding principles of management Distinguish between centralized and decentralized management authority Define problem-solving and list the main factors in the problem-solving environment and their relationships
Develop an effective orientation program for new employees
Describe and develop an effective program for selection of new employees
Describe government regulations that influence the employment process Explain several theories of motivation
Identify the objectives of salary
administration programs
Perform a salary program
Explain the major
characteristics of the trends in labor-management relations Identify major office personnel problems and corrective approaches
Identify the process to improve office communication
ADMG 372. Leadership and
Supervision (4). Develop
leadership techniques and behavioral traits to improve productivity of supervisors and leaders in the workplace, and enhance interpersonal skills for career success.
Upon successful completion of this course, the student will be able to:
Apply major leadership theories (e.g. situational, transformational)
Articulate and Identify differences between management and leadership

Identify personal traits and characteristics associated with effective leaders applied to actual leadership scenarios Assess, explore, apply, and synthesize personal leadership traits and skills, and general professionalism potential Apply, and evaluate mechanisms that enhance positive morale and motivational effectiveness Apply the mechanisms that enhance effectiveness in building, motivating, and leading teams Apply the responsibilities and limits of leadership on supporting and encouraging an ethical organizational and/or working culture
Identify and document the relationships and differences between organizational mission, vision, core values, strategic planning, and assessment
Assess and apply change theory related to organizations (e.g. Kotter, The Four Frames) Observe and facilitate the application of techniques for facilitating effective persuasion, problem-solving, and conflict resolution in relation to interpersonal communication skills with direct reports, co-workers, and supervisors
Articulate the benefits of cultural competency and diversity in the workplace
Apply, articulate, and evaluate
progressive discipline guidelines
Develop and document a
Professional Development Plan
ADMG 373. Training and
Development for
Administrative and IT
Support (4). This course provides students with an overview of the employee training and development process--a key component to employee success. Development and delivery of a training program will be the outcome of this course.
Prerequisite: AMDG 371 and
junior standing or above.

Upon successful completion of this course, the student will be able to:
Identify principles of training and training cycles Design a training program utilizing frameworks based on organizational needs Identify the types of training, and advantages and disadvantages of various training delivery methods Implement and teach to various learning styles in training presentations
Conduct a training sessions and measure the effectiveness of training through after action review
Identify and explain the advantages of training methods such as mentorships, career development plans
ADMG 374. Project Management (5).
Development of skills in the core project management areas; scope management, time management, cost management, quality management. Formerly IT 374, students may not receive credit for both. Prerequisite: junior standing or above.
Upon successful completion of this course, the student will be able to:
Develop project management
(PM) skills and knowledge
Apply and demonstrate
concepts/tools/skills associated
with PM
Develop
planning/organization/manage ment skills
Develop writing skills
Develop teamwork skills
Develop presentation skills
ADMG 385. Business
Communications and Report
Writing (5). Planning and writing skills for business letters, memoranda, employment, and reports. Prerequisites: ENG 102 or a direct transfer degree, and junior standing or above. Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of composing and writing
effective styles of business correspondence.
Demonstrate proper use of language mechanics, including grammar, spelling, and punctuation as applied in business communications. Demonstrate an understanding of letter and memoranda formats.
Demonstrate an understanding of effective resume, application letter, and follow-up letter styles.
Demonstrate an understanding of researching and writing a business report. Develop interpersonal and group communication skills.
ADMG 396. Individual Study (1-6). May be repeated if subject is different.
ADMG 397. Honors (1-12).
Prerequisite: admission to department honors program.
ADMG 398. Special Topics
(1-6). May be repeated if subject is different.
ADMG 399. Seminar (1-5). May be repeated if subject is different.
ADMG 410. Comparative Global Studies in ITAM I (4).
This course offers the student an opportunity to study and experience various industries operating in another country or region with an emphasis on global information technology, retail management, entrepreneurship, and leadership. Acceptance to study abroad trip. Course will not have an established scheduling pattern. Grade will either be $S$ or $U$. Permission by department.
Upon successful completion of this course, the student will be able to:
Using theories of leadership, compare and contrast leadership and management styles between the U.S. and the foreign countries. In particular, hypothesize WHY you think
the U.S. and foreign countries have developed their particular style of leadership and management.

Identify at least 5 differences between B2C in the U.S. and B 2 C in the foreign country. Identify at least 2 forms of IT used in the foreign country that have not been widely adopted in the U.S. You can also identify at least 2 forms of IT used in the U.S. that have not been widely adopted in the foreign country. Identify at least 5 differences between B2B and B2C
communications in the U.S. and B2B and B2C communications in the foreign country.
Extrapolate from your understanding of the history of the foreign country how that history has affected both business and non-business relationships.
ADMG 412. Comparative
Global Studies in ITAM II
(4). This course offers the student an opportunity to study and experience cultural differences and similarities in another country or region from the perspective of IT and administrative management. Acceptance to study abroad trip. Grade will either be S or U. Permission by department. Course will not have an established scheduling pattern. Upon successful completion of this course, the student will be able to:
Using the LESCANT model, analyze culture and communication patterns of a foreign country. Summarize the cultural differences between the U.S. and the foreign countries.
Summarize these differences in both the business environment and the cultural (non-business) environment.
Based on an understanding of the U.S. and the foreign
countries, hypothesize the differences in diversity, particularly gender, age, and disability diversity. Learn at least 5 common terms in the language of the foreign countries.
State the differences between the U.S. and foreign countries
economic and political systems (current or historical) and how those systems effect business.
ADMG 424. Administrative Management Policy (4).
Administrative management policies dealing with technology and innovation; the analysis, decision making, implementation, and control of these policies; the intent and core competencies of an organization; and the competitive integration of technology.
Prerequisites: ADMG 371, ADMG 385 and senior standing.
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of contemporary issues in strategic administrative management and organizational policy. Demonstrate knowledge of the framework for strategy through the process of analysis, decision making, implementation, and control. Evaluate the intent and core competencies of an organization. Analyze the resources and capabilities necessary to complete in the domestic and international environment. Discuss how the culture and constant change impacts administrative management. Demonstrate understanding of the ethical and legal issues in strategic administrative management.
ADMG 471. Leading Change
(4). An in-depth study of organizational dynamics, as applied to organization-wide interventions, designed to improve organizational functioning and to implement change in the organization. The course will include techniques for developing and improving organizations through organizational assessment and diagnosis of culture and processes.
Prerequisites: ADMG 371,
ADMG 372, and senior status.

Upon successful completion of this course, the student will be able to:
Use the LESCANT model to analyze culture and communication patterns of a foreign country. Summarize the cultural differences between the U.S. and the foreign countries. Summarize differences in both the business environment and the cultural (non-business) environment
Based on an understanding of the U.S. and the foreign countries, hypothesize the differences in diversity, particularly gender, age, and disability diversity. Learn at least 5 common terms in the language of the foreign countries.
State the differences between the U.S. and foreign countries economic and political systems (current or historical) and how those systems effect business.
ADMG 474. Executing Project Management I (4).
This course introduces students to the principles defined by the Institute Project Management Body of Knowledge
(PMBOK). Students will examine the PM process groups of initiating, planning and executing while developing a project plan. Prerequisite: ADMG 374. Upon successful completion of this course, the student will be able to:
Explain the difference between process groups and knowledge areas.
Apply the project planning steps in the appropriate order. Analyze methods for managing project scope.
Apply best practices for managing project schedule. Evaluate the critical path of a project.
Demonstrate cost management through project estimating and budgeting.
ADMG 475. Executing
Project Management II (4).
This course is a continuation of Executing Project Management

- I. Students will explore
quality, human resources, communications, risk and procurement as they continue to build their project plan. Prerequisite: ADMG 474.
Upon successful completion of this course, the student will be able to:
Determine methods for managing quality in a project. Develop a human resources plan.
Evaluate effective team building techniques for project teams.
Discuss the importance of leadership to the success of a project.
Demonstrate effective project communications.
Evaluate project risks and mitigation plans.
Conduct project procurement analysis.
ADMG 476. Managing
Project Uncertainty (4).
Students will learn to handle various forms of project uncertainty. An emphasis will be placed on handling uncertainty across the entire project. Students will work through problems with an emphasis on real-world solutions. Prerequisite: ADMG 475.

Upon successful completion of this course, the student will be able to:
Evaluate how project risk impacts projects in both positive and negative ways.
Apply multiple strategies for identifying, classifying, mitigating, and responding to project risks using both qualitative and quantitative analysis.
Examine how quality influences successful project outcomes.
Evaluate best practices for improving quality within projects.
Demonstrate best practice strategies for project procurement that seek to eliminate negative project risk and improve project quality. Demonstrate how change control can be used to mitigate project uncertainty.

ADMG 477. Project
Performance Reporting (4).
Students will prepare various project performance reports reflective of the status of the project throughout the project lifecycle. An emphasis will be placed on earned value techniques for reporting project performance. Students will learn techniques for effectively presenting complex project data. Course will be offered every year. Course will not have an established scheduling pattern. Prerequisite: ADMG 475.

Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of earned value management. Apply earned value management techniques to prepare and deliver project status reports.
Demonstrate the ability to use project management software to prepare project status reporting.
Prepare and deliver complex project data and reports using various software tools and techniques.
ADMG 479. Project
Management Maturity (4).
Students will assess project management maturity processes through the use of established industry best practices. Course will be offered every year. Course will not have an established scheduling pattern. Prerequisite: ADMG 475. Upon successful completion of this course, the student will be able to:
Apply project management maturity models to evaluate project organizations.
Apply Agile project processes to a given scenario.
Demonstrate how to manage a project across all the project lifecycle.
Evaluate team performance and team building techniques Describe and apply the PMI Code of Ethics and Professional Responsibility to given project scenarios.

ADMG 485. Managerial Communications (3). Advanced written, oral, and non-verbal business communications including proposals, crisis management, international communication, international/domestic etiquette, meeting management, conflict resolution, negotiation, and collaboration. Department reactivated 9/16/15. Prerequisite: ADMG 385. Upon successful completion of this course, the student will be able to:
Create written correspondence;
letters, memos, email, and reports
Demonstrate ability to prepare
and present a persuasive speech
Recognize the basics of business proposals and how they are evaluated Recognize differences in cultural communication patterns
Determine how to adapt business communications for effective international communication Recognize the basics of media and crisis communication Demonstrate strategies for building and maintaining successful communication with employees and customers
ADMG 490. Cooperative Education (1-12). An individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. Offered summers only. Departmental consent. May be repeated for credit. Grade will either be $S$ or $U$. Prerequisite: RMT 379.
ADMG 491. Workshop (1-6). May be repeated for credit under different subtitle.
ADMG 496. Individual Study (1-6). By permission. May be repeated for credit.

ADMG 497. Honors (1-12).
Prerequisite: admission to department honors program.
ADMG 498. Special Topics
(1-6). By permission. May be repeated for credit under different subtitle.
ADMG 499. Seminar (1-5).
By permission. May be repeated for credit under different subtitle.
ADMG 493A.
Undergraduate Research Practicum (Put on reserve as of $9 / 16 / 15$.) (1-3). Conduct research under direct supervision of a professor with specific learning agreement required. $\mathrm{ADMG} / \mathrm{IT} / \mathrm{RMT}$ 493A are cross-listed courses; students may not receive credit for more than one. May be repeated for a total of 3 credits. Grade will either be S or U . Put on reserve as of $9 / 16 / 15$. Will go inactive $8 / 24 / 18$.
Prerequisite: permission of department chair.
ADMG 493B. Undergraduate
Assistant Practicum (Put on
reserve as of 9/16/15.) (1-3).
Assist in monitoring, supervising, supporting, and tutoring instruction under direct supervision of a professor with specific learning agreements required. ADMG/IT/RMT 493B are equivalent courses; students may only receive credits for one. May be repeated for a total of 3 credits. Grade will either be S or U . Put on reserve as of $9 / 16 / 15$. Will go inactive $8 / 24 / 18$. Prerequisite: permission of department chair.
AFRO 101. Foundations of the USAF (1). A survey course briefly overviewing Air Force structure, missions, organizations, officership, professionalism, and an introduction to communicative skills.
Upon successful completion of this course, the student will be able to:
Identify the concepts involved in war

List the roles the Air Force fills within the military/political aspects of war. List the career opportunities available to an Air Force Officer.
List the benefits afforded members of the military Identify productive life skills Demonstrate basic oral and written communication skills
AFRO 102. Foundations of the USAF (1). A survey course briefly overviewing Air Force structure, missions, organizations, officership, professionalism, and an introduction to communicative skills.
Upon successful completion of this course, the student will be able to:
Identify the concepts involved in war
List the roles the Air Force fills within the military/political aspects of war.
List the career opportunities available to an Air Force Officer.
List the benefits afforded members of the military Identify productive life skills Demonstrate basic oral and written communication skills AFRO 103. Foundations of the USAF (1). A survey course briefly overviewing Air Force structure, missions, organizations, officership, professionalism, and an introduction to communicative skills.
Upon successful completion of this course, the student will be able to:
Identify the concepts involved in war
List the roles the Air Force fills within the military/political aspects of war.
List the career opportunities available to an Air Force Officer.
List the benefits afforded members of the military Identify productive life skills Demonstrate basic oral and written communication skills
AFRO 201. The Evolution of USAF Air and Space Power
(1). Through historical
examples, we examine the development of Air Force capabilities and missions to demonstrate the evolution of today's USAF air and space power.
Upon successful completion of this course, the student will be able to:
State the key terms and definitions used to describe air and space power
List the events, leaders, and technical developments surrounding the evolution of USAF aerospace power. Demonstrate basic verbal and written communication skills. Identify the Air Force Core Values and examples of their use throughout the evolution of USAF aerospace power.
AFRO 202. The Evolution of USAF Air and Space Power
(1). Through historical examples, we examine the development of Air Force capabilities and missions to demonstrate the evolution of today's USAF air and space power.
Upon successful completion of this course, the student will be able to:
State the key terms and definitions used to describe air and space power List the events, leaders, and technical developments surrounding the evolution of USAF aerospace power. Demonstrate basic verbal and written communication skills. Identify the Air Force Core Values and examples of their use throughout the evolution of USAF aerospace power.
AFRO 203. The Evolution of USAF Air and Space Power
(1). Through historical examples, we examine the development of Air Force capabilities and missions to demonstrate the evolution of today's USAF air and space power.
Upon successful completion of this course, the student will be able to:
State the key terms and definitions used to describe air and space power

List the events, leaders, and technical developments surrounding the evolution of USAF aerospace power. Demonstrate basic verbal and written communication skills. Identify the Air Force Core Values and examples of their use throughout the evolution of USAF aerospace power.
AFRO 296. Individual Study
(1-3). May be repeated for credit.
AFRO 298. Special Topics (1-
6). May be repeated for credit under different subtitle.
AFRO 299. Seminar (1-5).
May be repeated if subject is different.
AFRO 301. Air Force
Leadership Studies (3).
Provides leadership, management fundamentals, professional knowledge, Air
Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer.
Upon successful completion of this course, the student will be able to:
Apply listening, speaking, and writing skills in Air Force peculiar formats and situations with accuracy, clarity, and appropriate style.
Explain selected concepts, principles, and theories of quality Air Force leadership and management. Discuss selected individual leadership skills and personal strengths and weaknesses as applied in an Air Force environment.
Describe selected Air Force
officer's duties and
responsibilities as a
subordinate leader.
Explain the responsibility and authority of an Air Force officer.
Explain the Air Force officer's responsibilities in the counseling and feedback process.
Discuss and apply the concepts of ethical behavior.
AFRO 302. Air Force Leadership Studies (3).
Provides leadership,
management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer.
Upon successful completion of this course, the student will be able to:
Apply listening, speaking, and writing skills in Air Force peculiar formats and situations with accuracy, clarity, and appropriate style.
Explain selected concepts, principles, and theories of quality Air Force leadership and management.
Discuss selected individual leadership skills and personal strengths and weaknesses as applied in an Air Force environment.
Describe selected Air Force officer's duties and responsibilities as a subordinate leader. Explain the responsibility and authority of an Air Force officer.
Explain the Air Force officer's responsibilities in the counseling and feedback process.
Discuss and apply the concepts of ethical behavior.
AFRO 303. Air Force
Leadership Studies (3).
Provides leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and the communication skills required of an Air Force junior officer.
Upon successful completion of this course, the student will be able to:
Apply listening, speaking, and writing skills in Air Force peculiar formats and situations with accuracy, clarity, and appropriate style. Explain selected concepts, principles, and theories of quality Air Force leadership and management.
Discuss selected individual leadership skills and personal strengths and weaknesses as
applied in an Air Force environment.
Describe selected Air Force
officer's duties and
responsibilities as a subordinate leader. Explain the responsibility and authority of an Air Force officer.
Explain the Air Force officer's responsibilities in the counseling and feedback process.
Discuss and apply the concepts of ethical behavior.

## AFRO 350. Four-week

Summer Field Training (3).
Organization, operation, and mission of an Air Force base; physical conditioning; applied leadership training and evaluation; marksmanship; survival orientation; and field exercises. May be repeated for credit. Grade will either be S or U.

Upon successful completion of this course, the student will be able to:
Identify background, history, organization, operational concepts and practices, and key terms of the U.S. Air Force -
"Air Force Orientation". Identify effective leadership styles, traits, and practical techniques - "Leadership Training".
Identify background and history of U.S. Air Force
officers - "Officership
Training".
Identify physical fitness requirements of training and operational U.S. Air Force environments - "Physical Training". Identify miscellaneous information and requirementsofthefieldtraininge nvironment - "Miscellaneous". Identify effective personal hygiene techniques -
"Miscellaneous".
AFRO 396. Individual Study
(1-6). May be repeated if subject is different.
AFRO 397. Honors (1-12).
Prerequisite: admission to department honors program.

AFRO 398. Special Topics (1-
6). May be repeated for credit under different subtitle.
AFRO 399. Seminar (1-5).
May be repeated if subject is different.
AFRO 401. National Security
Affairs and Preparation for
Active Duty (3). Examines national security process, regional studies, advanced leadership ethics, Air Force Doctrine, officership, military justice, and preparation for active duty.
Upon successful completion of this course, the student will be able to:
Summarize the basic elements of national security policy and process
Explain the air and space power functions and competencies
Discuss selected roles of the military in society and current issues affecting the military profession
Explain selected provisions of the military justices' system Apply listening, speaking, and writing skills using Air Force peculiar formats and situations with accuracy, clarity and appropriate style Describe factors that facilitate a smooth transition from civilian to military life Explain the responsibility, authority, and functions of an Air Force commander
AFRO 402. National Security Affairs and Preparation for
Active Duty (3). Examines national security process, regional studies, advanced leadership ethics, Air Force Doctrine, officership, military justice, and preparation for active duty.
Upon successful completion of this course, the student will be able to:
Summarize the basic elements of national security policy and process
Explain the air and space power functions and competencies
Discuss selected roles of the military in society and current
issues affecting the military profession
Explain selected provisions of the military justices' system Apply listening, speaking, and writing skills using Air Force peculiar formats and situations with accuracy, clarity and appropriate style
Describe factors that facilitate a smooth transition from civilian to military life Explain the responsibility, authority, and functions of an Air Force commander
AFRO 403. National Security Affairs and Preparation for
Active Duty (3). Examines
national security process, regional studies, advanced leadership ethics, Air Force Doctrine, officership, military justice, and preparation for active duty.
Upon successful completion of this course, the student will be able to:
Summarize the basic elements of national security policy and process
Explain the air and space power functions and competencies
Discuss selected roles of the military in society and current issues affecting the military profession
Explain selected provisions of the military justices' system
Apply listening, speaking, and writing skills using Air Force peculiar formats and situations with accuracy, clarity and appropriate style
Describe factors that facilitate a smooth transition from civilian to military life Explain the responsibility, authority, and functions of an Air Force commander
AFRO 496. Individual Study (1-3). May be repeated for credit.
AFRO 497. Honors (1-12).
Prerequisite: admission to department honors program.
AFRO 498. Special Topics (1-
6). May be repeated for credit under different subtitle.
AFRO 499. Seminar (1-5).
May be repeated if subject is different.

AFRO 101LAB. GMC
Leadership Laboratory (2).
Practical experience in Air
Force customs and courtesies, physical fitness, drills, ceremonies, and opportunities available to commissioned officers. Grade will either be $S$ or U . Two hours weekly plus mandatory physical training. Co-requisite: AFRO 101. Upon successful completion of this course, the student will be able to:

## "AFROTC Orientation"

 Identify AFROTC ranks and insignias, chains of command, honor code, and training principles."Air Force Orientation" Identify Air Force ranks and insignias, chains of command, dress/grooming standards, and traits of the officer environment.
"Customs and Courtesies". Demonstrate proper US flag and Air Force customs and courtesies
"Drill and Ceremonies"
Demonstrate basic drill position and movement. Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Leadership, Followership, and Teamwork". Identify leadership principles. Demonstrate followership principles.
Willingly participate in
teamwork activities.
"Esprit de Corps"
Willingly participate in esprit
de corps activities.
"Weight and Fitness
Standards"
Demonstrate compliance with
Air Force weight and fitness standards.

## AFRO 102LAB. GMC

Leadership Laboratory (2).
Practical experience in Air
Force customs and courtesies, physical fitness, drills, ceremonies, and opportunities available to commissioned officers. Two hours weekly plus mandatory physical
training. Grade will either be S or U. Co-requisite: AFRO 102. Upon successful completion of this course, the student will be able to:
"AFROTC Orientation" Identify AFROTC ranks and insignias, chains of command, honor code, and training principles.
"Air Force Orientation" Identify Air Force ranks and insignias, chains of command, dress/grooming standards, and traits of the officer
environment.
"Customs and Courtesies". Demonstrate proper US flag and Air Force customs and courtesies
"Drill and Ceremonies"
Demonstrate basic drill
position and movement.
Demonstrate Air Force formal
dining, awards, and flag
ceremonies.
Demonstrate parade
procedures.
"Leadership, Followership, and Teamwork".
Identify leadership principles.
Demonstrate followership principles.
Willingly participate in teamwork activities.
"Esprit de Corps"
Willingly participate in esprit
de corps activities.
"Weight and Fitness
Standards"
Demonstrate compliance with
Air Force weight and fitness standards.
AFRO 103LAB. GMC
Leadership Laboratory (2).
Practical experience in Air
Force customs and courtesies, physical fitness, drills, ceremonies, and opportunities available to commissioned officers. Two hours weekly plus mandatory physical training. Grade will either be S or U. Co-requisite: AFRO 103. Upon successful completion of this course, the student will be able to:
"AFROTC Orientation" Identify AFROTC ranks and insignias, chains of command, honor code, and training principles.
> "Air Force Orientation" Identify Air Force ranks and insignias, chains of command, dress/grooming standards, and traits of the officer environment.
> "Customs and Courtesies". Demonstrate proper US flag and Air Force customs and courtesies
> "Drill and Ceremonies" Demonstrate basic drill position and movement. Demonstrate Air Force formal dining, awards, and flag ceremonies.
> Demonstrate parade procedures.
> "Leadership, Followership, and Teamwork".
> Identify leadership principles.
> Demonstrate followership
> principles.
> Willingly participate in
> teamwork activities.
> "Esprit de Corps"
> Willingly participate in esprit
> de corps activities.
> "Weight and Fitness
> Standards"
> Demonstrate compliance with
> Air Force weight and fitness
> standards.
> AFRO 201LAB. GMC
> Leadership Laboratory (2).
> Practical experience in Air
> Force customs and courtesies, drills, ceremonies, giving military commands, and preparation for field training. Two hours weekly plus mandatory physical training. Grade will either be S or U . Co-requisite: AFRO 201.
> Upon successful completion of this course, the student will be able to:
> "Training Principles" Comprehend and demonstrate principles of the AFOATS
> Training Guide.
> "Dress, Appearance, and Grooming"
> Identify and demonstrate proper Air Force dress, appearance, and grooming standards.
> "Customs and Courtesies"
> Demonstrate proper Air Force
> customs and courtesies.
> "Drill and Ceremonies"

Demonstrate advanced drill position and movement. Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Drill and Ceremonies"
Demonstrate advanced drill position and movement. Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Esprit de Corps" Willingly participate in esprit de corps activities.
"Field Training Preparation"
Identify Field Training emotional stresses.
Demonstrate road guard procedures.
Demonstrate Field Training decorum.
Demonstrate dorm maintenance procedures.
"Weight and Fitness
Standards"
Demonstrate compliance with
Air Force weight and fitness standards.

## AFRO 202LAB. GMC

Leadership Laboratory (2).
Practical experience in Air
Force customs and courtesies, drills, ceremonies, giving military commands, and preparation for field training. Two hours weekly plus mandatory physical training. Grade will either be S or U . Co-requisite: AFRO 202.
Upon successful completion of this course, the student will be able to:
"Training Principles" Comprehend and demonstrate principles of the AFOATS Training Guide.
"Dress, Appearance, and Grooming"
Identify and demonstrate proper Air Force dress, appearance, and grooming standards.
"Customs and Courtesies" Demonstrate proper Air Force customs and courtesies.
"Drill and Ceremonies" Demonstrate advanced drill position and movement.

Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Drill and Ceremonies"
Demonstrate advanced drill position and movement.
Demonstrate Air Force formal
dining, awards, and flag
ceremonies.
Demonstrate parade procedures.
"Esprit de Corps"
Willingly participate in esprit
de corps activities.
"Field Training Preparation"
Identify Field Training emotional stresses.
Demonstrate road guard procedures.
Demonstrate Field Training
decorum.
Demonstrate dorm
maintenance procedures.
"Weight and Fitness
Standards"
Demonstrate compliance with
Air Force weight and fitness
standards.
AFRO 203LAB. GMC
Leadership Laboratory (2).
Practical experience in Air
Force customs and courtesies, drill and ceremonies, giving military commands, and preparation for field training. Two hours weekly plus mandatory physical training. Grade will either be S or U .
Co-requisite: AFRO 203.
Upon successful completion of this course, the student will be able to:
"Training Principles"
Comprehend and demonstrate
principles of the AFOATS
Training Guide.
"Dress, Appearance, and
Grooming"
Identify and demonstrate proper Air Force dress, appearance, and grooming standards.
"Customs and Courtesies" Demonstrate proper Air Force customs and courtesies.
"Drill and Ceremonies"
Demonstrate advanced drill position and movement.

Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Drill and Ceremonies"
Demonstrate advanced drill position and movement.
Demonstrate Air Force formal dining, awards, and flag ceremonies.
Demonstrate parade procedures.
"Esprit de Corps"
Willingly participate in esprit de corps activities. "Field Training Preparation" Identify Field Training emotional stresses. Demonstrate road guard procedures.
Demonstrate Field Training decorum.
Demonstrate dorm maintenance procedures.
"Weight and Fitness
Standards"
Demonstrate compliance with
Air Force weight and fitness
standards.

## AFRO 301LAB. POC

Leadership Laboratory (2).
Students plan, organize, coordinate, and direct cadet corps activities, enhancing communication, management, and other leadership skills.
Three hours weekly plus mandatory physical training. Grade will either be S or U . Course will be offered every year (Fall). Co-
requisite: AFRO 301.
Upon successful completion of this course, the student will be able to:
"Esprit de Corps"
Develop esprit de corps through participation in group activities
Demonstrate the ability to work within a group to accomplish a goal
"Cadet Mentoring Program"
Define the styles of a mentor
List the rules of mentoring
"Health and Wellness"
Identify the components of the
AF fitness assessment
Identify healthy lifestyle
choices
"Customs and Courtesies"

Demonstrate proper Air Force customs and courtesies.
"Dress, Appearance, and Grooming"
Identify and demonstrate proper Air Force dress, appearance, and grooming standards.
"Drill and Ceremonies"
Demonstrate Air Force formal
dining, awards, and flag
ceremonies.
Demonstrate parade procedures.
"Leadership and Management"
Demonstrate leadership and management skills.
Demonstrate feedback
principles and evaluate the
performance of subordinates.
"Feedback and Performance
Evaluation Skills"
Provide performance feedback and evaluation to cadet wing subordinates.
"Commander's Call"
Construct and brief Cadet
Corps on mandatory topics as
directed by Higher
Headquarters
"Physical Training"
Value the importance of physical training
"Professional Officer Course
Cadet"
Perform leadership position in cadet wing
AFRO 302LAB. POC
Leadership Laboratory (2). Students plan, organize, coordinate, and direct cadet corps activities, enhancing communication, management, and other leadership skills. Three hours weekly plus mandatory physical training. Grade will either be S or U . Course will be offered every year (Winter). Corequisite: AFRO 302.
Upon successful completion of this course, the student will be able to:
"Esprit de Corps"
Develop esprit de corps through participation in group activities
Demonstrate the ability to work within a group to accomplish a goal
"Cadet Mentoring Program"
Define the styles of a mentor

List the rules of mentoring
"Health and Wellness"
Identify the components of the
AF fitness assessment
Identify healthy lifestyle
choices
"Customs and Courtesies"
Demonstrate proper Air Force
customs and courtesies.
"Dress, Appearance, and Grooming"
Identify and demonstrate proper Air Force dress, appearance, and grooming standards.
"Drill and Ceremonies"
Demonstrate Air Force formal dining, awards, and flag
ceremonies.
Demonstrate parade procedures.

## AIS 101. American Indian

Culture before European
Contact (5). An
interdisciplinary approach explores the lifeways and environments of American Indians prior to European contact and settlement. Sources of pre-contact information consist of the archaeological, oral history, and paleoenvironmental records. SB-Perspectives on Cultures and Experiences of U.S. (W). Course will be offered every year (Fall).
Upon successful completion of this course, the student will be able to:
Identify basic principles and institutions that underlie American Indian society and their cultures (e.g., settling Americas, adaptations to changing environments, origin of agriculture, emergence of complex social systems.) Use archaeology, ethnohistory, and American Indian Oral history to describe theories about individuals, social processes, social networks, and cultural processes (e.g., adaptation to climate change, creation and maintenance of trade and exchange systems). Analyze American Indian cultural adaptations and oral histories containing their perspectives using anthropological and archaeological theory and research.
Articulate ways that precontact American Indian social diversity shapes attitudes and values affecting modern views
of Native American society and culture, past and present. Explain how human actions impact issues of sustainability at the
individual/community/organiza tion/societal levels by applying archaeological and oral tradition methods of inquiry. Demonstrate knowledge about how American Indian food getting systems and traditional ecological knowledge affected sustainability of their lifeways using archaeological, anthropological and oral tradition to evaluate the validity of arguments and research.
AIS 102. American Indians in the Contact Period (5). An
interdisciplinary study of the lifeways and environments of American Indians during the period of European contact. Sources of contact period information come from the archaeological, American Indian and European written and oral history records. SBPerspectives on Cultures and Experiences of U.S. (W). Course will be offered every year (Winter).
Upon successful completion of this course, the student will be able to:
Read and respond in oral and written form to literary and historical sources from both indigenous and colonial perspectives, understanding the importance of perspective, bias and audience to the production and reception of those sources (HUM 1).
Identify and synthesize patterns in American and global past that are reflected in our current world, making connections between past and present (HUM 2).
Recognize and analyze alternate ways of articulating and interpreting the human experience, particularly indigenous viewpoints as well as self-serving colonial and national narratives, along with different disciplinary perspectives that have framed
and shaped history and current cultural perceptions (HUM 3). Identify and challenge preconceived notions of the past, in particular national and tribal identities in the context of alternative (multiple indigenous) perspectives and experiences (HUM 4). Analyze the ways in which historically and culturally distinct contexts shaped lives, beliefs, and experiences in the past, and how these are different from contemporary ones (HUM 5).
AIS 103. Contemporary American Indian Experience
(5). An interdisciplinary approach explores the emergence of contemporary
American Indians after AD 1890 with an emphasis on social, political, and cultural aspects. Sources of information about this period come from written and oral history. SBPerspectives on Cultures and Experiences of U.S. (W). Course will be offered every year (Spring).
Upon successful completion of this course, the student will be able to:
Describe how historical, social, economic, and/or cultural developments have socially and culturally affected indigenous communities in North America. (CC\&C 4) Analyze problems and challenges facing indigenous and other marginalized communities and articulate the how awareness of such social inequalities leads to formulating more informed local, regional and national identities and definitions of citizenship. (CC\&C 1)
Explain how an understanding of social, economic, cultural and political issues facing American Indian communities leads to a greater appreciation for cultural diversity and how this diversity enhances the value of local, regional and national communities. (CC\&C 2)

Analyze relationships between American Indian and other
communities, including national governments, as well as dominant colonial cultures. Particularly, identify how indigenous perspectives and experiences impact political and government policy at multiple levels, as well as articulations or cultural and national identity. (CC\&C 3)
AIS 296. Individual Study (16).

AIS 298. Special Topics (1-6).
May be repeated if subject is different.
AIS 299. Seminar (1-5). May
be repeated if subject is different.
AIS 320. American Indian Philosophy (Put on reserve 9/16/17) (5). The course examines philosophy indigenous to North America through native and non-native historical and contemporary sources; explores the interplay of native and non-native philosophical concepts and the influence of indigenous
American roots on contemporary American philosophy. (Put on reserve $9 / 16 / 17$. Will go inactive 8/24/2020.)
Upon successful completion of this course, the student will be able to:
Give examples of current issues impacting American Indian society.
Identify the historical and cultural conditions in and through which the Native American pragmatism emerges and describe the interplay between the native and nonnative philosophical concepts Compare and contrast the distinct agendas and methodologies of non-native and native pragmatism. Extract, evaluate, and assess significant concepts and argumentation from primary texts
Identify practical issues in Native American pragmatism.
AIS 321. American Indian Spirituality (5). Introduction to American Indian spirituality with emphasis on myths, rituals, and beliefs; including
historical, economic, political and legal issues that influence the ways of American Indian spiritual practice; Ghost Dance, Native American Church, etc. Upon successful completion of this course, the student will be able to:
Explain the importance of spirituality in the everyday lives and communities of among the diverse cultural traditions of contemporary American Indians Identify tribal arts, music, dance, poetry, literature and architecture within the social, cultural and spiritual context of American Indian communities. Delineate the economic, political and legal restrictions that have been and continue to be placed upon the practice of American Indian culture. Demonstrate how the oral tradition can provide guidance and leadership within the spiritual context of the American Indian community. Explain the role of folklore and mythology in Indian society. Illustrate the differences between cyclical and linear concepts of time and its significance in Indian Culture. Analyze the relationship between nature, identity and power in Indian Culture. Explain and instantiate the American Indian emphasis upon ritual and the, social dimensions of spirituality.
AIS 396. Individual Study (16). May be repeated if subject is different.
AIS 397. Honors (1-12).
Prerequisite: admission to department honors program.
AIS 398. Special Topics (1-5).
AIS 399. Seminar (1-5). May
be repeated if subject is different.
AIS 490. Cooperative
Education (1-12). An
individualized contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student-learning plan, cooperating employer supervision, and faculty
coordination. By permission. May be repeated for credit. Grade will either be S or U AIS 491. Workshop (1-6). Occasional workshops will be offered to provide a context for American Indian artists/scholars to teach. May be repeated for credit. Grade will either be S or U .
AIS 496. Individual Study (16).

AIS 497. Honors (1-12).
Prerequisite: admission to department honors program.
AIS 498. Special Topics (1-5).
AIS 499. Seminar (1-5). May
be repeated if subject is different.
ANTH 107. Being Human: Past and Present (5).
Exploration of being human throughout the world from the earliest human ancestors to today using archaeological, biological, cultural and linguistic anthropology methods and perspectives. SBFoundations of Human Adaptations and Behavior. Course will be offered every year (Fall, Winter, Spring). Upon successful completion of this course, the student will be able to:
Identify basic principles and institutions that underlie human cultures (e.g., language, race, marriage, social inequality)
Describe theories about social and cultural processes (e.g., social control, functionalism) Explain and apply methods to investigate and analyze cultures across space and time (e.g., participant observation, archaeology)
Analyze human behavior using theory and research (e.g., fossil record and archaeology discoveries) Articulate ways that cultural diversity affects attitudes and values through concepts such as social identity, cultural relativism, race, and ethnocentrism.
Analyze issues related to public health, wellbeing, and sustainability over human history (e.g., paleopathology,
dietary change, cultural collapse) from interdisciplinary approaches (e.g., evolution, archaeology)
Explore anthropological, archaeological, and evolutionary approaches that address our understanding of long-term humanenvironmental balance and societal health
ANTH 110. Bones, Apes, and
Genes: Exploring Biological
Anthropology (5). Exploration
of the field of biological anthropology, including humankind's evolutionary relationships to other primate forms, the human fossil record, and on-going evolutionary processes impacting on the human species. NS-Patterns and Connections Natural World. Course will be offered every year (Fall, Winter, Spring, Summer).
Upon successful completion of this course, the student will be able to:
Consider and discuss how discoveries in and research on human evolution contribute to our lives and our roles as citizens.
Generate and test hypotheses regarding the evolutionary relationships among various fossil hominins (humans), using fossil ages, geographic and ecological locations, and anatomy.
Compare various primate species to explore what is unique to humans and what humans share with other primate species and mammals more broadly.
Describe and analyze the diverse body of evidence that contributes to and informs modern evolutionary theory (e.g., the systems of genetics, behavior, paleoanthropology). Apply quantitative information to critique evolutionary explanations for characteristics of past and modern hominin (human) populations (e.g., maintenance of balanced hemoglobin polymorphisms in malarial regions-aspects of ecology select for evolution of
specific characteristics, evolution of bipedalism). Discuss human evolution now, considering where our species came from, our species' features, how we populated earth, and our recent evolutionary challenges.
ANTH 120. Archaeology: Science of the Past (5). Introduction to the concepts, methods, and development of archaeology, as well as key discoveries from the ancient world. Illustrations of how fields of science are combined to uncover past human achievements and diverse cultures. SB-Foundations of Human Adaptations and Behavior (W). Course will be offered every year (Fall, Winter, Spring). Upon successful completion of this course, the student will be able to:
Describe how archaeology contributes to our lives by providing a deep historical background to humanity and exposure to different cultures and ways of living. Recognize social, political, and ethical implications of archaeological research, particularly considering heritage management, ownership of the past, and ethical responsibilities to descendants.
Formulate questions that can be addressed by archaeological inquiry, and ways of evaluating validity of archaeological knowledge (i.e. epistemology). Apply quantitative reasoning to solve archaeological problems. Explore archaeological methods and approaches (e.g., studies of paleodiet or paleoenvironment) as they address our understanding of long-term humanenvironmental balance and societal health or cultural collapse (e.g., implications of origins of agriculture) Analyze issues related to longterm past public health, wellbeing, and sustainability (e.g., paleopathology, dietary change, cultural collapse) from
interdisciplinary approaches (e.g., environmental archaeology)

## ANTH 130. Cultural Worlds

(5). The cross-cultural and holistic study of humans worldwide, including the analysis of race, gender, power, kinship, globalization, and the role of symbols in social life. Students will also examine their own world through anthropological lenses. SB-Perspectives on World Cultures.
Upon successful completion of this course, the student will be able to:
Define, differentiate, and identify interconnections between notions of culture, society and nature. Define key theories, quantitative and qualitative methods, and ethical considerations of cultural anthropology.
Employ theories and methods of cultural anthropology to formulate new perspectives on current issues and global problems.
Employ theories and methods of cultural anthropology to formulate new perspectives on current issues and global problems.
Understand human diversity by comparing cultural practices and beliefs, social organization, and adaptations across cultures, based on knowledge about specific cultures.
Discuss the construction of race, class, gender, sexuality, and ethnicity; and evaluate their intersectionality. Analyze processes underlying the production of social inequality in local, national, and global contexts. Identify and critically discuss processes of globalization, and connections between local and global issues, with attention to social and environmental impacts of the global economic system.
Critically examine and challenge boundaries of own ethnocentrism and positionality

Justify the value of cultural diversity as it relates to issues in everyday life, as well as at local, national, and global scales.

## ANTH 137. Race, Power and

 the American Dream (5).This class constitutes an anthropological exploration of race in the United States by examining structural inequality in relation to the ideas and experiences reflected in what is popularly called The American Dream. Course will be offered every year (Fall, Spring, and Summer).
Upon successful completion of this course, the student will be able to:
Explain race as a social construct.
Describe an historical overview of racism in the United States
Identify the different components of "the American Dream".
Examine racial stereotypes as social indexes.
Deconstruct the notion of white privilege.
Articulate the relation between class and race.
Describe social power.
Discuss how social inequality is produced.
Reflect about individual racial position.
Recognize the significance of differing racial experiences.
Evaluate the impact of race in today's world.
Generate common-ground with respect to differing social experiences.
Advocate for a critical approach to race and racism in the United States.
ANTH 180. Language and Culture (5). This course is an introduction to the scientific and anthropological study of language, concerning its structure and function as an omnipresent system in communication, cognition, and socialization, and its relationship with culture, society, and power. Course will be offered every year (Winter, Spring, Summer).

Upon successful completion of this course, the student will be able to:
Describe how critical language is to cultural adaptation and intellectual development, and how unique language is to human socialization. Examine your own beliefs in and attitude toward languages, dialects, and accents used in a community and elsewhere.
Apply linguistic tools and techniques to language description: phonetically transcribe words, delineate and justify the internal structure of words, group linguistic elements into classes, and explain differences of meaning. Explain the linguistic concepts and realize that all human languages are creative, have a grammar, change over time, and culturally transmitted. Analyze human speech acts, norms, or discourses using linguistic theories and methods.

## ANTH 201. Grade 1 Animal

Technician (1). Course covers
skills of Grade 1 Animal
Technician with a focus on primates. Standards follow those of the International Primatological Society and include maintenance of primates' physical environment and USDA standards for management. Grade will be S or U.
Upon successful completion of this course, the student will be able to:
Define USDA nutritional requirements for captive nonhuman primates. Define OSHA standards for animal caregivers.
List reasons for maintaining daily logs of animal behaviors and notable events. Describe hygiene standards and health and safety considerations for human and nonhuman primates, including potential for cross-species disease transmission.
Recall USDA standards for enclosure design for primates.

Review the use of speciestypical behaviors in animal management.
Discuss how social housing impacts on captive primates' health and well-being. Create enrichment activity for captive primate.
Evaluate professional standards for maintaining captive primates.
ANTH 296. Individual Study
(1-6). By permission. May be repeated for credit.
ANTH 298. Special Topics (1-6).
ANTH 299. Seminar (1-5).
May be repeated if subject is different.
ANTH 301. Anthropology: Principles and Assessment
(2). Principles and assessment course for majors: current topics and careers, research, funding; development of assessment portfolios and individual program plans. Required for all BA and BS anthropology majors at admission.
Upon successful completion of this course, the student will be able to:
Have both a broad understanding and set of specific knowledge that will facilitate a successful undergraduate career in anthropology and prepare them for post-Baccalaureate efforts in anthropology.
Be familiar with the requirements and opportunities that face undergraduates in the CWU department of anthropology.
Know their areas of strength and weakness and areas of special interest within the field of anthropology by taking the departmental assessment exam.

## ANTH 310.

Research/Laboratory in Biological Anthropology (1-
2). Laboratory research
analysis of biological anthropology materials. May be taken concurrently with and as a supplement to other 300level courses in biological anthropology. The course may
be repeated for a cumulative
maximum of 8 credits. No more than 10 credits of ANTH 310 and ANTH 485 are allowed to fulfill BA or BS requirements. Meets anthropology subfield Biological Anthropology (B). Prerequisite: previous college work in biological anthropology or other natural sciences, and permission of instructor.
ANTH 311. Advanced Biological Anthropology: Principles of Human Evolution (4). Analysis and interpretation of major principles of modern biological anthropology from an evolutionary perspective: genetics, population genetics, ecology, comparative anatomy and human paleontology. Meets anthropology subfield Biological Anthropology (B). Course will be offered every year (Spring).
Upon successful completion of this course, the student will be able to:
List, describe, and discuss genetics and evolutionary theory as these are used in biological anthropology. Apply their knowledge of evolutionary dynamics to problems and scenarios taken from fossil and living human populations.
Apply evolutionary principles to a specific problem related to human evolution using either modern populations or extinct fossil forms.

## ANTH 312. Human Origins:

The Fossil Evidence (4). The
fossil record of hominins.
Basic data and interpretation.
Meets anthropology subfield
Biological Anthropology (B).
Course will be offered on even numbered years (Fall).
Upon successful completion of this course, the student will be able to:
List, describe, and discuss the major hominin fossil sites, fossil specimens, and extinct and living hominins from the late Miocene through the Holocene epochs.

Discuss the principal methods of data collection and analysis used in paleoanthropology. Practice methods of laboratory data collection to interpret fossil hominins.
Apply knowledge of phylogeny and taxonomy to compare and contrast fossil hominins.
ANTH 313. Primate Social
Behavior (4). Survey of field studies of nonhuman primates relevant to the study of human social systems and adaptation. Meets anthropology subfield Biological Anthropology (B). Course will be offered every year (Fall).
Upon successful completion of this course, the student will be able to:
Locate career information posted on Primate Info Net, Identify major primate researchers, their findings, and how these findings have shaped primatology.
Identify primary literature and authoritative websites in primatology.
Interpret primary literature and incorporate this information into poster text.
Classify primates to order, family, genus, and species levels.
Construct the social organization and natural history of the best-known primate species.
Summarize the theoretical and methodological approaches of primatologists trained as anthropologists, psychologists, or biologists.
ANTH 314. Human Variation (4). Survey of genetic, physiological, and morphological diversity of modern human populations, with a focus on how humans' biological variation interacts with culture to enable adaptation to various ecological settings. NSApplications Natural Science. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: sophomore standing or above.

Upon successful completion of this course, the student will be able to:
Demonstrate how genetic research has shaped modern medical science.
Recognize how biological anthropology developed as a discipline, and how humans are studied as part of the natural world.
Identify various human body shapes and physiological adaptations and match them to diverse environments. Critique the interrelationships among morphological, physiological, and genetic variation in human populations and traditional race concepts. Calculate a population's observed and expected allele frequencies.
Find and evaluate information
on human genetic conditions (e.g., cancer).

Analyze the contributions of genes, life choices, and culture on health outcomes (e.g., cancer risk, obesity). Critique the biological bases for race and gender as they are applied to human classifications.
Apply biological concepts learned in this class regarding human variation to understandings of race and gender.
Problematize the social dynamics of group inclusion and exclusion based on biology, race, gender, and ethnicity.
Challenge the effects of race and gender as cultural constructs historically and in the present.
ANTH 315. Forensic Skeletal
Analysis (4). A survey of the human skeleton and techniques of human skeletal analysis. Identification of age, sex, and other traits in modern and extinct populations. Meets anthropology subfield
Biological Anthropology (B).
ANTH 316. History and Theory of Molecular Anthropology (4). This seminar will include readings from important studies that
have influenced the field of biological anthropology including the areas of human origins, phylogeny and dispersal. Prerequisite: ANTH
311 or by permission of the instructor.
Upon successful completion of this course, the student will be able to:
Critically read a peer- reviewed article, summarize the content and lead a class discussion. Identify the various types of molecular data used in studies that have contributed to our understanding of human evolution.
Trace the history of the application of molecular techniques to the study of human evolution.
ANTH 318. Introduction to
Forensics (4). This course explores the subject matter and methods forensic investigators use when searching and recovering evidence from crime scenes.We examine approaches to forensics across multiple disciples including anthropology, biological sciences, chemistry, law and justice, geological sciences, physics, psychology, and sociology. The goal is to provide a broad overview for students interested in exploring forensic careers. ANTH 318 and LAJ 318 are crosslisted courses; students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Identify major developments in the history of forensic science Identify specialized fields which contribute to the forensic investigation Describe the ethical issues facing the forensic scientist Employ forensic examination and comparison techniques on evidence
Demonstrate procedures associated with crime scene processing
Demonstrate proficiency in writing
Summarize court decisions concerning scientific evidence

Appraise current literature, materials and developments regarding scientific evidence
ANTH 320.
Research/Laboratory in Archaeology (Put on reserve
9/16/17) (2). Analysis of archaeological materials. Minimum of 4 hours laboratory per week. No more than 10 credits of ANTH 320 and ANTH 486 allowed to fulfill
BA or BS requirements. Meets
anthropology subfield
Archaeology (A). (Put on
reserve $9 / 16 / 17$. Will go
inactive $8 / 24 / 2020$.)
Prerequisite: ANTH 120.
ANTH 321. Archaeological
Methods (4). Introduction to methods used by
archaeologists, with an emphasis on laboratory methods for analysis of chipped stone, ceramics, faunal remains, and other archaeological materials. Meets anthropology subfield Archaeology (A).
Upon successful completion of this course, the student will be able to:
Define archaeological data and describe the appropriate means of statistical description and inference
Describe the fundamental components of archaeological research design
Describe the diversity of methodological approaches and techniques to archaeological investigations
Engage in and report on independent archaeological research
ANTH 322. World Prehistory
(4). Old and New World prehistory from late Pliocene to the early historic period, including the ecology and development of huntinggathering, agriculture and state-level societies. ANTH 322 and HIST 322 are crosslisted courses; students may not receive credit for both. Meets anthropology subfield Archaeology (A).
ANTH 323. Field
Archaeology (3-6).
Identification, mapping and
recording of archaeological sites; techniques of excavation. Grade will be either S or U .
Meets anthropology subfield
Archaeology (A). Prerequisite:
ANTH 120.
ANTH 324. North American
Archaeology (4). Prehistoric cultures of North America, with emphasis on adaptation to changing environments. Meets anthropology subfield Archaeology (A).
Upon successful completion of this course, the student will be able to:
Identify the diversity of regional cultural developments in North America
Identify broad pan-regional trends in North American culture history.
Compare and contrast ecological settings at the end of the Pleistocene and throughout the Holocene across North America.
Use deductive analytical skills to investigate a mystery artifact from North America.
ANTH 325. Prehistory of the Pacific Northwest (4).
Prehistoric cultures of Washington State and adjoining regions. Meets anthropology subfield Archaeology (A).
Upon successful completion of this course, the student will be able to:
Identify the diversity of regional cultural developments in the Pacific Northwest. Identify broad pan-regional trends in the Pacific Northwest culture history.
Compare and contrast ecological settings at the end of the Pleistocene and throughout the Holocene across the Pacific Northwest.
Use deductive analytical skills to investigate an archaeological site in the Pacific Northwest.
ANTH 333. Culture and Marriage (4). The reciprocal relationships between the biophysical and cultural components in mating, nurturing and sexual access. Cross-cultural patterns in marriage. ANTH 333 and FCL

333 are cross-listed courses; students may not receive credit for both. Meets anthropology subfield Cultural Anthropology (C).

ANTH 340. Ethnography of China (Put on reserve $9 / 16 / 17$ ) (4). This course is designed to explore China from the perspectives of general cultural patterns and ethnicity. ANTH 340 and AST 340 are cross-listed courses; students may not receive credit for both. (Put on reserve 9/16/17. Will go inactive $8 / 24 / 2020$.) Upon successful completion of this course, the student will be able to:
Tell what ethnic identifications are in China and to state the key ethnic and political problems concerning Tibet, Xinjiang and Inner Mongolia. Describe the steady, multiethnic formation of China throughout history by a complex process of cultural diffusion, population move, and violent action.
Provide an underlying geopolitical explanation of the policy of the Chinese government towards the minority peoples in its frontier regions and towards its national security. Procure concepts and tools for presenting the forms of interethnic relations through what happened and what is going on in multiethnic China. Specify how the Chinese 'autonomous' solutions to the ethnic minorities work and fail. Increase experience in reading and writing about ethnic groups and cultures.
ANTH 341. Native American

## Cultures of the Pacific

 Northwest (4). Ecological settings and cultural adaptations of Pacific Northwest Native Americans in historical and contemporary contexts. Culture change and continuity, language, religion, resource management, and tribal sovereignty. Meets anthropology subfield Cultural Anthropology (C).Upon successful completion of this course, the student will be able to:
Understand the ecological settings, cultural adaptations and diversity of aboriginal peoples of the Northwest Coast and the Columbia Plateau. Demonstrate how contemporary Indian cultures have persisted and adapted within the context of the Pacific Northwest's changing social and economic setting. Recognize how the cultural values of non-natives regarding gender, race and "civilization" have influenced, often unconsciously, descriptions and knowledge of Pacific Northwest Indians. Demonstrate how American Indians have retained and reasserted their cultural traditions and tribal sovereignty.
ANTH 342. Hispanic Cultures of the Western U.S. (On reserve as of 9/16/15) (4).
This course provides an overview of Hispanic cultures in the American Southwest, California and the Pacific Northwest. Culture change and maintenance through language, religion and an economic resource base are highlighted.
Meets anthropology subfield Cultural Anthropology (C). Put on reserve as of $9 / 16 / 15$. Will go inactive $8 / 24 / 18$.
ANTH 343. Culture and
Power in Africa (4).
Anthropological study power in precolonial African societies, ideological and cultural dimensions of social inequality and social struggle, classical social anthropology and contemporary analysis of war, genocide, refugee movement, and political consciousness. Meets anthropology subfield Cultural Anthropology (C).
Upon successful completion of this course, the student will be able to:
Identity and differentiate anthropological models of African cultures

Evaluate relations between ritual, politics, kinship and social organization in African societies Demonstrate understanding of local social dynamics within the operations of global economic systems; Identify and differentiate models of ethnic relations in African societies;
ANTH 344. Cultures of Asia
(4). Setting and cultural adaptation of the peoples of Asia. Representative groups from cultural regions of East Asia and Central/Inner Asia. Meets anthropology subfield Cultural Anthropology (C).
ANTH 345. Cultures of Southeast Asia and Oceania
(4). Setting and cultural adaptation of the peoples of Southeast Asia and Oceania. Meets anthropology subfield Cultural Anthropology (C).
ANTH 346. Cultures of Latin America and the Caribbean (4). Survey of anthropological research on cultures of Latin America and the Caribbean in historical and contemporary contexts. Meets anthropology subfield Cultural Anthropology (C).

Upon successful completion of this course, the student will be able to:
Identify similarities and differences between students' own life experiences and social and cultural realities in Latin America
Explain and critique at least three different theoretical approaches to the study of Latin American societies. Evaluate research on diversity in Latin America using one or more theoretical frameworks. Synthetize specific cultural, historical and political transformation of Latin America
ANTH 347. Native American Cultures of North America
(4). Ecological settings and cultural adaptations of North American Native Americans in historical and contemporary contexts. Culture change and continuity, language, religion,
resource management and tribal sovereignty. Meets anthropology subfield Cultural Anthropology (C). Upon successful completion of this course, the student will be able to:
Understand the ecological settings, cultural adaptations and diversity of Native American societies of North America.
Demonstrate bow contemporary Native cultures have persisted and adapted within the historical context of colonization, and throughout changing social, political and economic settings in the United States and Canada. Recognize how the cultural values of non-natives regarding gender, race and "civilization" have influenced, often unconsciously, representations, descriptions, and knowledge of Native American peoples and cultures.
Demonstrate how Native Americans have retained and reasserted their cultural traditions and tribal sovereignty, and the legal bases for these efforts.

## ANTH 351. Visual

 Anthropology (4). Provides methodological, theoretical and practical background to produce and evaluate imagery in films and video; guidelines and practice of image presentation/manipulation in anthropological and social contexts. ANTH 351 and COM 351 are cross-listed courses; students may not receive credit for both. Meets anthropology subfield Cultural Anthropology (C). Prerequisites: ANTH 130 or ART 225 or COM 321 or COM 330.ANTH 352. Anthropology of Environmental Issues (4).
Anthropological approaches to environmental issues and debates, from climate change to the availability of clean water and beyond. Students use critical thinking in assessing the role of culture nationally and internationally in current environmental issues. Meets
anthropology subfield Cultural Anthropology (C).
Upon successful completion of this course, the student will be able to:
Use holistic anthropological perspectives in assessing the role of culture in current environmental issues in both the U.S. and internationally. Distinguish between cultural beliefs about the environment and the impact of economic/political factors. Identify and compare the role of diverse cultural models for environmental issues and associated solutions proposed. Students will participate in presentations comparing alternative cultural models for environmental issues and solutions.
ANTH 353. Childhood and
Culture (4). Cross-cultural comparison of children's lives in different societies.
Exploration of developmental paradigms and comparison of ideas about what childhood is and how children become competent in different societies.
Upon successful completion of this course, the student will be able to:
Demonstrate understanding of concepts that influence cultural understandings of childhood, such as culture, ethnocentrism, human universals, cultural relativism.
Identify cultural assumptions about children and childhood as evidenced in ethnographic writing and in their own culture.
Explain and critique at least
two Euro-American
developmental theories from a cross- cultural perspective. Demonstrate understanding of political and economic factors that influence the status and role of children in society. Describe characteristics of U.S. childhood in comparison to other cultures.
ANTH 354. Anthropology of
Religion (4). A cross-cultural analysis of religion, cosmology and world view. Meets
anthropology subfield Cultural Anthropology (C).
ANTH 355. Culture, Person, Self (4). A cross-cultural analysis of the relationship of individuals to cultural beliefs and practices. Meets anthropology subfield Cultural Anthropology (C).
Upon successful completion of this course, the student will be able to:
Understand historical and current perspectives on the interaction of culture, person and self.
Know the major theoretical arguments about the relationship between psychological and cultural processes in relation to culture, person and self.
Know the major issues that have informed the field of psychological anthropology, such as personality development, the influence of culture on psychological development, theories of mental health and illness in relation to cultural context. Have in-depth knowledge of a current topic in the field of psychological anthropology.
ANTH 356. Gender Roles in Cross-cultural Perspective
(4). Bio-cultural factors affecting human gender roles. Meets anthropology subfield Cultural Anthropology (C).
ANTH 357. Medical
Anthropology: Crosscultural Perspectives on Health and Healing (4).
Emphasizes cultural and biological factors influencing health maintenance in human populations and cross-cultural perspectives on illness, healing and the provision of health care. Meets anthropology subfield Cultural Anthropology (C).

ANTH 358. Culture and Politics in a Global Economy (Put on reserve 9/16/17) (4).
Comparative perspectives on cultural processes of change within the global economic system. Meets anthropology subfield Cultural Anthropology
(C). (Put on reserve 9/16/17. Will go inactive $8 / 24 / 2020$.)
ANTH 359. Survey of Music in Cross-cultural
Perspectives (2). An
introduction to ethnomusicology: the cultural context of music with emphasis on Africa, Asia, Native North and South America, Oceania. ANTH 359 and MUS 359 are cross-listed courses; students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Discuss and examine specific issues pertaining to the nature of musical creation. Define ethnomusicological terms and concepts. Identify geographical distribution of musical phenomena and the stratification of music in society.
Aurally recognize and classify stylistic characteristics and write in a scholarly manner about various ethnic traditions and genres.
Identify the intellectual, personal, emotional, and political problems associated with intercultural musical contexts.
Recognize both the diversity and universality of the world's music.
ANTH 360. Introduction to Museum Studies (4).
Concepts relating to museums in society: history, ethics, philosophy, administration, legislation and education. Meets anthropology subfield Cultural Anthropology (C).
ANTH 361. Museum Exhibit
Design (4). Principles of design applied to visual presentation of material culture, ideas and concepts through educational exhibits.
ANTH 362. Museum Curation and Management
(4). Application of techniques of environmental security, restoration and preservation in the management of museum collections.
ANTH 363. Culture and
Economy (4). This course
considers global perspectives on production, distribution, exchange, and consumption by examining classical works in political economy and economic anthropology, as well as recent research that explores the relationships between capitalism and other economic systems. Students will examine how systems of subsistence, exchange, and distribution operate within diverse cultural, social, and environmental contexts. They will interrogate the relationships between important contemporary issuespoverty, homelessness, and food insecurity, for exampleand global capitalism. Course will be offered on odd numbered years (Winter Quarter).
Upon successful completion of this course, the student will be able to:
Recognize and describe key theories about economics and human nature
Illustrate how key theories in economic anthropology help us to understand their own consumptive practices. Connect diverse modes of production, distribution, and consumption to social and environmental relationships.
ANTH 380. Non-Verbal
Communication (4).
Fundamentals of non-verbal communication including codes, relationship to biology and culture, usage, and interrelationships. ANTH 380 and COM 380 are cross-listed courses. Meets anthropology subfield Linguistics (L). Upon successful completion of this course, the student will be able to:
Identify channels of non-verbal communication
Integrate the contribution of biology and culture to nonverbal behavior Identify the role of non-verbal communication in interactions. Identify meaning of non-verbal communication in contemporary US culture.

ANTH 381. Language in
Culture (4). Language as a culture trait. Influence of language on other human institutions. Includes psycholinguistics, sociolinguistics, ethnographic semantics, and multilingualism in its sociocultural setting. Meets anthropology subfield Linguistics (L).
ANTH 382. Descriptive
Linguistics (4). Introduction to the basic concepts and mechanics of formal linguistic analysis. Meets anthropology subfield Linguistics (L).
ANTH 384. Language and Gender (4). This course is designed to guide students to explore the active and rapidly expanding field of gender studies and language research dealing with how biological and cultural awareness of sexes are reflected in speech. ANTH 384 and WGSS 384 are crosslisted courses; students may not receive credit for both. Meets anthropology subfield Linguistics (L).
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of how language participates in gender practice and how language encodes attitudes about gender Examine issues of method and analytic practice in language and gender research Define concepts and tools for understanding of the patterns of human communication based on gender differences toward explaining dominance of a certain gender via language
Describe gender inequities and sexually- oriented expressions in language and with the adjustments being made to rectify them Identify how different genders pursue conversational strategies to establish status and authority and how different ethnic backgrounds can complicate communication between men and women

Locate sexual inequalities in language and the role of language in nurturing and identifying gender differences in society
ANTH 396. Individual Study
(1-6). May be repeated if subject is different.
ANTH 397. Honors (1-12).
Prerequisite: admission to department honors program.
ANTH 398. Special Topics
(1-6). May be repeated if subject is different.
ANTH 399. Seminar (1-5).
May be repeated if subject is different.

## ANTH 410. Biological

Anthropology: Theoretical and Research Issues (4).
Exploration of the theoretical underpinnings of biological anthropology, their expression in current research topics in the field, and the transition from earlier approaches to their current implementation. Seminar structure. May be repeated for a total of 8 credits. Meets anthropology subfield Biological Anthropology (B) and Seminar (S). Prerequisites: ANTH 110 and an additional 5 units of biological anthropology. Upon successful completion of this course, the student will be able to:
Demonstrate their exposure and command of the current and primary literature in biological anthropology. Critique methods used by biological anthropologists. Describe and apply the theories used to interpret data in biological anthropology. Develop competence in research and writing skills Develop competence in speaking skills

## ANTH 411. Primate

Conservation (4). A seminar
that focuses on conservation issues of particular relevance for non-human primates, including deforestation, bushmeat hunting, and pet trade; and on conservation strategies, including reintroduction, captive management, and ecotourism.

ANTH 411 and PRIM 511
are cross-listed courses;
students may not receive credit for both. Meets anthropology subfield Biological
Anthropology (B) and Seminar
(S). Prerequisites: ANTH 110 and ANTH 313.
Upon successful completion of this course, the student will be able to:
Identify conservation issues impacting nonhuman primates. Demonstrate knowledge of general conservation biology. Develop expertise on one conservation issue selected by the student.
Develop presentation and speaking skills.
ANTH 412. Monkeys of the Neotropics (4). An overview of Neotropical monkey evolution, ecology, and behavior in wild and captive settings. Focuses on species ranging in Mexico, Central America, and South America. Meets anthropology subfield Biological Anthropology (B). Course will be offered on even numbered years (Spring). Upon successful completion of this course, the student will be able to:
Examine the physical morphology, geographic distributions, and evolutionary histories of primates living in Mexico, Central America, and South America.
Compare/contrast the ecological and social aspects of Neotropical primate species and examine how ecology, sociality, and behavior are interrelated.
Organize and summarize the current research on Neotropical primate biology, behavior, ecology, and evolution. Evaluate the human-primate relationship in the wild and captivity, the issues that accompany field research and maintaining captive populations, and the resulting effects of both on primate conservation.
ANTH 413. Research
Methods in Primatology (5).
Review of methods used in
collection and analysis of primatological data, including hypothesis development, delineation of variables, subject sampling, data collection techniques, data analysis, and captive versus field settings for research projects. ANTH 413 and PRIM 513 are layered courses; students may not receive credit for both. Prerequisite: junior or senior standing or permission of instructor.
Upon successful completion of this course, the student will be able to:
Use the scientific process. Design a research project. Assess the advantages of disadvantages of various data collection methodologies (e.g., scan sampling, focal animal sampling).
Select an appropriate analytical framework for a research question.
Write a research report.
ANTH 414. Forensic Anthropology: Cold Case Analysis (6). The course explores the recovery and examination of skeletal remains through practical experience in the recovery of buried remains. Students will plan, manage, and conduct a forensic skeletal analysis of a cold case. Findings will be presented. May be repeated for credit. Meets anthropology subfield Biological Anthropology (B).
Prerequisites: ANTH 110, ANTH 310, ANTH 315, and permission of the instructor. Upon successful completion of this course, the student will be able to:
Critically analyze and discuss
the fate of postmortem remains in light of the manner/cause of death as well as the disposal environment
Deliver a report on forensic case analysis
Prepare a forensic case report in an appropriate style and format.
Effectively present an expert report of a forensic skeletal
case analysis under courtroom conditions.
Demonstrate how laboratory investigation is undertaken in a forensic case.
Conduct a thorough search of evidence involved in a mock burial.

## ANTH 415. Forensic Anthropology: Theoretical

 and Applied Issues (4). An indepth and critical analysis of journal articles pertaining to forensic anthropology, osteology, and archaeology. An examination of archaeological techniques that can be adapted to forensic and medico-legal investigations. Meets anthropology subfield Biological Anthropology (B). Prerequisites: ANTH 110, ANTH 310, ANTH 315, and permission of the instructor. Upon successful completion of this course, the student will be able to:Describe how bioarcheology techniques are used in the investigation of crimes Evaluate the wide range of forensic anthropology expertise applied during international human rights (genocide) investigations Critically evaluate forensic osteology casework with respect to the suitability of the methods employed Undertake literature search and submit relevant literature in relation to assigned forensic skeletal case.
Critically analyze and discuss the fate of postmortem remains in light of the manner of death as well as the disposal environment
ANTH 416. Apes (4). An overview of small- and largebodied ape evolution, ecology, and behavior in wild and captive settings. ANTH 416 and PRIM 516 are layered courses; a student may not receive credit for both. Meets anthropology subfield Biological Anthropology (B). Course will be offered on on odd numbered years (Spring). Prerequisite: ANTH 313.

Upon successful completion of this course, the student will be able to:
Examine the physical morphology, geographic distributions, and evolutionary histories of the large- and small-bodied apes. (UG/G) Compare/contrast the ecological and social aspects of large- and small-bodied ape species and examine how ecology, sociality, and behavior are interrelated. (UG/G)
Organize and summarize the current research on ape biology, behavior, ecology, and evolution. (UG/G)
Assess the current literature on ape cognition and culture relative to biology, ecology, and phylogeny. (UG/G) Evaluate the human-ape relationship in the wild and captivity, the issues that accompany field research and maintaining captive populations, and the resulting effects of both on ape conservation. (G)
ANTH 418. Monkeys of Asia and Africa (4). An overview of Old World monkeys' evolution, ecology, and behavior in wild and captive settings. Focuses on species ranging in Africa and Asia. Meets anthropology subfield Biological Anthropology (B). Course will be offered on even numbered years (Winter). Upon successful completion of this course, the student will be able to:
Examine the physical
morphology, geographic
distributions, and evolutionary
histories of African and Asian
monkeys.
Compare/contrast the
ecological and social aspects of Old World monkey species and examine how ecology, sociality, and behavior are interrelated.
Organize and summarize the current research on Old World monkey biology, behavior, ecology, and evolution.

Evaluate the conservation status of endangered Old World monkeys.
ANTH 419. Lemurs and Lorises (4). An overview of the evolution, ecology, and behavior of lemurs and lorises living in wild and captive settings. Meets anthropology subfield Biological Anthropology (B). Course will be offered on odd numbered years (Winter).
Upon successful completion of this course, the student will be able to:
Examine the physical morphology, geographic distributions, and evolutionary histories of lemurs and lorises. Compare/contrast the ecological and social aspects of lemur and loris species and examine how ecology, sociality, and behavior are interrelated
Organize and summarize the current research on the biology, behavior, ecology, and evolution of lemurs and lorises. Evaluate the conservation status of endangered lemurs and lorises.
ANTH 421. Archaeological
Theory (4). Discussion of research problems in data collection, analysis, and interpretation. Meets anthropology subfield Archaeology (A) and Seminar (S). Prerequisite: ANTH 120.

ANTH 425. Zooarchaeology
(4). Mammalian osteology and methods in the analysis of animal bones from archaeological sites. Meets anthropology subfield Archaeology (A). Prerequisites: ANTH 120 and either ANTH 110LAB or BIOL 183.
ANTH 426. Stone Tool
Analysis (4). The theory, method, and technique of stone tool analysis are presented so that students can undertake a research project analyzing a stone tool assemblage. Meets anthropology subfield
Archaeology (A).
Prerequisites: ANTH 120 or ANTH 323.

Upon successful completion of this course, the student will be able to:
Identify essential elements of stone tool analysis.
Describe stone tool research for an archaeological region. Define and list the main points of primary literature on stone tool analysis.
ANTH 427. Environmental
Archaeology (4). Analyses of sediments and plant and animal remains from archaeological sites are used to explore relationships between humans and their environments. Case studies combine natural and physical sciences to study long-term change in landscapes and ecosystems. ANTH 427/527 and GEOG 427/527 are cross-listed courses; students may not receive credit for more than one. Graduate credit requires an additional research paper to be specified in syllabus. Meets anthropology subfield
Archaeology (A).
Prerequisites: ANTH 120 or
GEOG 107.

## ANTH 432. Heritage

Preservation (4). Students will discuss the merits of preserving heritage buildings and landscapes, and question what is deemed worth of heritage designation. Techniques will be developed for investigating a building's history and experience gained in writing proposals and policies to preserve heritage resources. ANTH 432 and GEOG 432 are cross-listed courses; students may not receive credit for both. Prerequisite: GEOG 305 or enrollment in REM Program or permission of instructor.
Upon successful completion of this course, the student will be able to:
Document an individual building's history, including its owners, uses, values, remodels, and situation.
Prepare a nomination for historic designation of either a structure or a district. Identify architectural styles found in the Pacific Northwest
specifically, and North America in general. Contextualize local buildings and districts in the broader cultural, social, and economic conditions that framed their development.
ANTH 440. Ecology and
Culture (4). Investigation into interdependent environmental and human cultural systems. Traditional agroecologies and subsistence strategies; contemporary problems of resource management, social equity, political ecology, and sustainable development. ANTH 440 and GEOG 440 are cross-listed courses, students may not receive credit for both. Meets anthropology subfield Cultural Anthropology (C) and Seminar (S). Upon successful completion of this course, the student will be able to:
Identify and describe differing adaptive strategies among human populations.
Demonstrate knowledge of how environmental management is mediated through culture. Demonstrate sophisticated knowledge of one cultural ecology issue of the students choice.
Demonstrate general knowledge of contemporary issues relevant to cultural ecology (e.g. land degradation, land tenure, sustainable development).
ANTH 444. Ethnographic Field Methods (4). Methods used in ethnographic field work. Meets anthropology subfield Cultural Anthropology (C) and Seminar (S).

ANTH 446. Anthropology of
Globalization (4). Critically examines current theories of globalization in anthropology. Course includes selected ethnographic research on topics including global flows of people, material, ideas, identities, global political structures, and local accommodation and resistance. Meets anthropology subfield

Cultural Anthropology (C) and Seminar (S).
Upon successful completion of this course, the student will be able to:
Analyze ethnographic data in a global structural model Identify and describe global political structures
Apply anthropological theories of globalization to ethnographic data Evaluate several theoretical models of globalization
ANTH 449. Contemporary
Native American Cultures
and Issues (4). Analysis of contemporary Native North American cultures and issues, including tribal sovereignty, resource management, education, religion, economic, and health status, cultural continuity, and adaptation. ANTH 449 and SOC 449 are cross-listed courses; students may not receive credit for both. Meets anthropology subfield Cultural Anthropology (C) and Seminar (S).

Prerequisites: either AIS 103 or ANTH 341 or ANTH 347 or SOC 366 or permission of instructor.
Upon successful completion of this course, the student will be able to:
Identify how imposed contemporary
reservation/reserve systems have impacted Native cultures in North America. Identify major US political and legal policies that define Native American "reserved rights".
Demonstrate a recognition of how non-native cultural values have influenced the various types of knowledge of contemporary American Indians
Critically assess key issues influencing at least two of the following: Indian education, Native American health; contemporary resource management and economic development; religious freedom and contemporary practices; Pan-Indianism

Research and critically assess the key issues influencing major contemporary issues facing a single Native American tribal group or confederated groups.
ANTH 451. History and Theory of Anthropology (4).
Content and developmental history of anthropological theories and methods. Meets anthropology subfield Cultural Anthropology (C) and Seminar (S). Prerequisite: 20 units of anthropology courses.

## ANTH 458. Senior

Comprehensive Survey (4).
Advanced comprehensive survey of the field of anthropology as to its content and intent. Specifically designed for majors preparing for graduate work.
Prerequisite: admission to an anthropology major plan.
ANTH 460. Meaning in a Material World (4). This course will introduce students to theoretical concepts within the anthropology of material culture that will enable them to develop critical analyses of objects. Course will be offered on odd numbered years (Spring Quarter).
Upon successful completion of this course, the student will be able to:
Recognize and describe key theoretical concepts within the anthropology of material culture that help us understand objects as imbued with social, cultural, political, and economic meanings.
Apply material culture theories to objects encountered in everyday life.
Compare and contrast social, cultural, political, and economic perspectives of material culture. Assemble a theoretical framework for understanding a category or collection of objects.
Critique an analysis of material culture.

## ANTH 463. Learning in

Museums (4). This course will provide students with the foundational theory necessary
for planning, writing, and implementing museum educational programs. Course will be offered on even numbered years (Winter). Upon successful completion of this course, the student will be able to:
Identify broad developments in museum interpretation and education in theory and practice.
Employ museum education strategies in an interpretive context.
Analyze how museum education programs can incorporate the needs of diverse audiences.
Propose a museum education program that would strengthen museum-community partnerships.
Design a museum education program that incorporates knowledge of community/ target audience. Evaluate museum education programs using knowledge learned from readings, lectures, and discussions.
ANTH 480. Survey of Linguistics (Put on reserve as of $9 / 16 / 15$.) (4). Linguistic concepts and the relation between linguistics and other fields of study. Open to seniors and graduate students only. ANTH 480 and ENG 480 are cross-listed courses; students may not receive credit for both. Meets anthropology subfield Linguistics (L). Put on reserve as of $9 / 16 / 15$. Will go inactive $8 / 24 / 18$. Prerequisite: senior standing.
ANTH 483. Sociolinguistics
(4). Concepts and methods of sociolinguistic analysis in first and second languages. Will examine differences among cultures in the relationship between language usage and inequality. ANTH 483 and WL 483 are cross-listed courses; students may not receive credit for both. Meets anthropology subfield Linguistics (L).
Prerequisites: either ANTH
180, ANTH 381, ENG 180, or WL 481.

ANTH 485. Method and Theory in Biological Anthropology (1-8). Methods and techniques, research problems, data collection, analysis, interpretation. Laboratory orientation. No more than 10 credits of ANTH 310 and ANTH 485 are allowed to fulfill BA or BS requirements. May be repeated up to 8 credits. Meets anthropology subfield Biological Anthropology (B). Prerequisite: introductory plus 5 upper-division credits in biological anthropology or corresponding coursework in the biological sciences. Upon successful completion of this course, the student will be able to:
Learn bow to design a research project in biological anthropology.
Find primary literature in biological anthropology. Write a research report. Publicly present the results or their research.
ANTH 486. Advanced
Methods in Archaeology (1-
8). Archaeological research design; planning and supervision of laboratory and field operation; preparation of reports for publication. May be repeated up to 8 credits. No more than 10 credits of ANTH 320 and ANTH 486 allowed to fulfill BA or BS requirements. Meets anthropology subfield Archaeology (A). Prerequisite: 5 upper-division credits in archaeology.
ANTH 487. Field Linguistics (1-8). A laboratory oriented course providing both demonstration and practicum in recording, transcription, and structure of languages. Tapes and field derived data. May be repeated up to 8 credits. Meets anthropology subfield
Linguistics (L).
ANTH 488. Advanced
Research in Cultural
Anthropology (1-8). May be
repeated up to 8 credits. Meets anthropology subfield Cultural Anthropology (C).
Prerequisites: ANTH 130 and 5
upper-division credits in cultural anthropology.
ANTH 490. Cooperative
Education (1-12). An individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student-learning plan, cooperating employer supervision, and faculty coordination. By permission. May be repeated for credit. Grade will either be S or U .
ANTH 491. Workshop (1-6).
May be repeated for credit.
ANTH 492. Anthropological
Teaching Experience (1-2).
May be repeated for credit.
Grade will either be S or U .
ANTH 493. Anthropological Field Experience (1-8). Individual or group off-campus experience in the field study of anthropological phenomena. May be repeated for credit.

## ANTH 494. Applied GIS

Project (2-6). GIS projects in anthropology, biology, geography, geology, resource management. ANTH 494, GEOG 494, and GEOL 494 are cross-listed courses. ANTH 496. Individual Study (1-6). By permission. May be repeated for credit. Grade will either be S or U .
ANTH 497. Forensics
Capstone (1). A capstone course designed to assess student mastery of fundamental knowledge of forensics through submission of a portfolio of work collected throughout the program, and explore future opportunities. ANTH 497 and LAJ 497 are crosslisted; students may not receive credit for both. Prerequisite: senior standing.
ANTH 498. Special Topics (1-6).
ANTH 499. Seminar (1-5). ANTH 321LAB. Archaeological Methods Laboratory (2). Hands-on application of typical methods used in archaeological investigations, with an emphasis on laboratory techniques for studying
chipped stone, ceramics, faunal remains, and other archaeological materials. Meets anthropology subfield Archaeology (A). Co- or prerequisite: ANTH 321. Upon successful completion of this course, the student will be able to:
Demonstrate understanding of several key archaeological survey methods
Demonstrate understanding of several key archaeological excavation methods Demonstrate understanding of several key methods of chipped stone tool laboratory analysis Demonstrate understanding of key methods for laboratory analysis of other archaeological materials ART 103. Art Appreciation (4). Art Appreciation is an introduction to artistic styles, periods of art, and artistic techniques and processes. It introduces students to the visual components of art, and considers the cultural, economic, and societal significance of art. AHAesthetic Experience. Course will be offered every year (Fall, Winter, Spring and Summer).
Upon successful completion of this course, the student will be able to:
Correctly use the terminology
of art aesthetics and art history. Clearly communicate ideas regarding art.
Identify artistic styles of major historical periods in art. Distinguish and analyze a variety of techniques and formal visual elements of works of art in different media, and across cultures, from an objective foundation.
ART 150. Introduction to
Drawing (3). Introduction to observational drawing. Students will learn to see, interpret, and accurately render objects while exploring a variety of traditional drawing media and techniques. Class meets five hours per week.

Upon successful completion of this course, the student will be able to:
Reproduce a realistic likeness of a three-dimensional object or objects on a flat surface Memorize basic drawing terminology
Use multiple drawing media Practice sight measuring Repeat techniques covered in class in order to enhance comprehension Practice problem solving strategies
ART 170. Two-Dimensional
Design (3). Fundamental exploration of two-dimensional design, with emphasis on the elements and principles of design, skill acquisition, and the development of creative problem solving in design. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Memorize the visual elements and principles of twodimensional design and other design-based terminology
Express creative design-based problem-solving skills Demonstrate competence with a variety of two-dimensional art media
Recognize and practice professional craftsmanship Identify the visual elements and principles of design in their own work and the work of others
Demonstrate technical competence and safety with design tools
ART 171. Three-Dimensional
Design (3). Fundamental
exploration of threedimensional design, with emphasis on the elements and principles of design, skill acquisition, and the development of creative problem solving in design. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Memorize the visual elements and principles of three-
dimensional design and other design-based terminology
Express creative design-based problem-solving skills
Demonstrate competence with
a variety of three-dimensional art media
Recognize and practice professional craftsmanship Identify the visual elements and principles of design in their own work and the work of others
Demonstrate technical proficiency and safety with design tools
ART 172. Computer Fundamentals in Art and
Design (3). This course introduces the use of digital media from the artist's perspective, covering basic skills in MAC OS, Windows, the Adobe Creative Suite, and Microsoft Office. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Demonstrate competence with the Macintosh Operating System
Solve basic digital image editing and retouching problems
Solve basic graphic illustration and design problems Create a document using word processing software Prepare and present artwork using presentation software Create art catalog database using database and spreadsheet software
ART 225. Beginning
Photography (4). Introduction to 35 mm black and white filmbased photography. Emphasis on technical skill development, applied printmaking techniques, and creative problem-solving. Course meets 5 hours per week.
Upon successful completion of this course, the student will be able to:
Operate a 35 mm film camera and process film Identify and apply compositional elements in image creation

Indicate knowledge of historical and contemporary technical and conceptual approaches to photography Describe their own technical and conceptual processes Demonstrate photographic printmaking skills
Practice proficiency in using appropriate photographic vocabulary to analyze work
ART 226. Beginning Photography: Digital (Put on reserve as of $9 / 16 / 15$.) (5).
This course surveys the beginning conceptual and technical tools required to navigate digital photography. Six hours of studio per week. Put on reserve as of 9/16/15. Will go inactive $8 / 24 / 18$. Upon successful completion of this course, the student will be able to:
Define camera controls and visualize image-making within the camera's frame. Create compositions that addressing line, form, emotive content, value, and texture as appropriate for a Digital SLR. Create pictures to review digital files within an image browser program, in which they evaluate contrast, density, and white balance controls. Develop an appropriate digital assessment management system, wherein they define appropriate keyword lists Identify terms appropriate to visual culture and digital photography.
Initiate artist statements that describe how conceptual ideas and techniques apply to project work.
Produce a final portfolio for the web and as a print portfolio.
ART 235. Ancient and
Medieval Art (3). A historical survey of at of the western world from ancient art through art of the Medieval era. Upon successful completion of this course, the student will be able to:
Demonstrate a comprehension
of the basic movements and developments in the history of
art of the ancient and medieval eras
Analyze various works of art; identify their formal elements; define their intrinsic character Identify how works of art express the ideals and values of their respective civilizations and historical periods Distinguish major works of art by identifying artists, periods, national origins, titles and/or subject matter, and their significance to the history of art
Use the terminology of art history

## ART 236. Renaissance <br> through Mid-19th-century

Art (3). A historical survey of art of the western world from the Renaissance to Impressionism. Class meets four hours per week. Prerequisite: ART 235. Upon successful completion of this course, the student will be able to:
Demonstrate a comprehension of the basic movements and developments in the history of art of the 14th through mid19th centuries
Analyze various works of art; identify their formal elements; define their intrinsic character Identify how works of art express the ideals and values of their respective civilizations and historical periods Distinguish major works of art by identifying artists, periods, national origins, titles and/or subject matter, and their significance to the history of art
Use the terminology of art history
Use appropriate language to clearly communicate ideas regarding art
ART 237. Impressionism through Postmodernism (3).
A historical survey of art of the western world from
Impressionism through
Postmodernism. Class meets four hours per week.
Prerequisites: ART 235 and 236.

Upon successful completion of this course, the student will be able to:
Demonstrate a comprehension of the basic movements and developments in the history of Impressionism through Postmodernism
Analyze various works of art; identify their formal elements; define their intrinsic character Identify how works of art express the ideals and values of their respective civilizations and historical periods Distinguish major works of art by identifying artists, periods, national origins, titles and/or subject matter, and their significance to the history of art
Use the terminology of art history
Use appropriate language to clearly communicate ideas regarding art
ART 241. Beginning Wood
Design (4). Introduction to wood as an artistic and design medium. Emphasis on visual communication utilizing basic shaping and finishing processes. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Indicate knowledge of the unique properties of various hardwoods
Demonstrate proficiency using hand tools and machinery Apply creative problemsolving and critical thinking skills
Design works that incorporate conceptual content
ART 246. Beginning Jewelry/
Metals (4). Design and construction of jewelry and small-scale metal objects. Emphasis on technical skill development, applied technique, conceptual problems and introduction to contemporary work. Class meets five hours per week. Upon successful completion of this course, the student will be able to:
Demonstrate familiarity and proficiency in a variety of
machine-assisted and chemical processes
Demonstrate knowledge of issues relating to studio safety Demonstrate proficiency in the process of joining metal through soldering Design and produce complex small-scale, open and closed three-dimensional forms Incorporate conceptual content, including strategies of abstraction, narrative and personal expression Practice proficiency in using the critical languages of art and design to analyze work
ART 250. Figure Drawing
(3). Further continuation of the skills, methods, and media from ART 150, with an emphasis on the study of anatomy on drawing the clothed and nude human form.
Class meets five hours per week. Prerequisite: ART 150.
Upon successful completion of this course, the student will be able to:
Reproduce a realistic likeness of the human figure on a flat surface
Demonstrate proficiency in multiple drawing media Locate and identify elements of human anatomy
Apply accurate sight
measuring in drawing the human figure
Employ techniques covered in class in order to enhance comprehension
Apply problem solving strategies

## ART 251. Beginning

Illustration (4). Introduction
to illustration using a variety of media and industry standard software. Class meets five hours per week. Formerly ART 351; students may not receive credit for both. Prerequisites:
ART 150, and ART 170, and ART 172.
Upon successful completion of this course, the student will be able to:
Create children's book illustrations Create spot illustrations that are suitable for printed or digital publications

Use basic computer software techniques to create illustrations.
Design basic contour drawing templates suitable for scanning Demonstrate proficiency in a variety of media
Create illustrations in a variety of styles
ART 260. Beginning Painting
(4). An introduction to a
variety of painting techniques. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Identify basic painting media and tools
Demonstrate knowledge of color mixing techniques and fundamentals of color theory Apply underpainting techniques and various glazing procedures
Demonstrate knowledge of building canvas stretcher frames and preparing canvases Apply techniques of blending and modeling objects to create volume and space Demonstrate knowledge of issues relating to studio and material safety

## ART 262. Beginning

Watercolor (4). An
introduction to painting, utilizing watercolor and other water-based media. Class meets five hours per week. Upon successful completion of this course, the student will be able to:
Demonstrate competence in traditional water based media and surfaces
Recognize and apply a variety of application techniques Memorize basic terminology specific to water based media Choose the correct combination of brushes and techniques in order to produce a desired visual effect Demonstrate the effects of transparency on color Apply professional craftsmanship in their studio practice
ART 265. Beginning
Ceramics (4). Beginning instruction in ceramics with a
focus on hand-building and wheel-throwing techniques, including concept development and historic, contemporary, and multi-cultural approaches to the medium. Class meets five hours per week. Upon successful completion of this course, the student will be able to:
Indicate knowledge of historical and contemporary technical and conceptual approaches to hand built and thrown ceramics Demonstrate knowledge of issues relating to studio safety Demonstrate proficiency in the process of joining slabs of clay, coil building and the manipulation of wheel thrown forms
Incorporate conceptual content, including strategies of abstraction, narrative and personal expression
ART 274. Beginning
Typography (4). History and application of typography as a tool for visual communication using industry standard software. Class meets five hours per week. Prerequisite: ART 170.
Upon successful completion of this course, the student will be able to:
Identify typographic form and its visual characteristics Recognize type styles that are appropriate to a specific client, product or message
Design single page layouts using type only
Design a book ready for print Use letter and line spacing in headlines and body text Prepare and present a graphic design portfolio
ART 280. Beginning
Sculpture (4). Introduction to the studio experience in sculpture. Emphasis is on the fundamental materials and basic methods of sculpture. Class meets five hours per week.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in the sculptural processes of
addition, subtraction, substitution and mold making Recognize the elements of design as related to the organization of threedimensional form Demonstrate knowledge of issues relating to studio safety Discuss knowledge of historical and contemporary sculpture
ART 282. Computer Art I
(5). Use of computer systems and web software as tools for creative expression.
Prerequisite: ART 170.
Upon successful completion of this course, the student will be able to:
Develop web authoring skills appropriate for web software to create page layouts, links, roll
overs, site maps, and templates Learn web authoring skills appropriate for web software to create images and animations for the web.
Fabricate web imagery to express a concept.
Create a portfolio of electronic art appropriate for viewing on the web.
ART 283. Beginning Graphic Interface Design (4). Design of graphic interfaces for web pages and applications using principles of visual organization and composition. Class meets five hours per week. Prerequisite: ART 172 and ART 274.
Upon successful completion of this course, the student will be able to:
Identify and analyze experience-based problems through a user-centered lens Explore various previsualization methods as they apply to the basic foundation of interactivity
Apply paper prototyping and user testing to gain an understanding of creating usercentered design solutions Create a complete userinterface simulation Apply design competence to user-centered design challenge Develop branding and logo designs

ART 285. Printmaking I (5).
Exploration of techniques and history of prints, with an emphasis on relief printmaking. Six hours of studio per week. Prerequisites: ART 150 and ART 170. Upon successful completion of this course, the student will be able to:
Identify printmaking materials and equipment: Press, plates (lino./wood), cutting tools. Inks and papers.
Demonstrate safe studio practices for tools and presses. Demonstrate the history of printing processes and the social impact of printmaking in art and society.
Demonstrate techniques of relief prints (lino./wood cut) monoprints, collographs as well as processes for full-color printing.
Introduce print portfolio as a resource tool for students.
ART 296. Individual Study (1-6). By permission. May be repeated for credit.
ART 298. Special Topics (16).

ART 299. Seminar (1-5).
ART 300. Papermaking (Put on reserve as of $9 / 16 / 15$.) (4).
Hand papermaking techniques, exploring historical and contemporary works/methods. Watermarking, pigmentation, moldmaking, with emphasis on sheetforming and fiber preparation. May be repeated for credit. Put on reserve as of $9 / 16 / 15$. Will go inactive 8/24/18.
Upon successful completion of this course, the student will be able to:
Prepare fibers for papermaking, including a variety of fiber sources (linters, raw pulp, and plant fibers) and beating techniques (by hand, and using the Hollander Beater).
Produce consistent, archival quality paper sheets.
Design and produce a personal watermark for sheet forming. Prepare color pulps, through dye and pigmentation processes.

Research and discuss historical and technical aspects of hand papermaking.
Work safely with the materials and equipment in the paper studio.

## ART 324. History of

Photography (4). An historical survey of photography from its beginnings to the present, focusing on interrelationships between photography and other visual arts, changing technologies, and contributions of major photographers and art movements. Prerequisite: junior standing.
Upon successful completion of this course, the student will be able to:
Identify the processes used to produce photographic images and discuss each in terms of its inherent aesthetics
Define and correctly use relevant terms Apply research and critical thinking skills to analyze the relationship between photography and other visual arts
Synthesize and summarize information from a variety of sources regarding style, technique and intentions that distinguish particular photographers
Identify and formulate a set of criteria to visually analyze a photographic image Appraise significance of photographic medium in relation to visual culture
ART 330. Art in the Elementary School (4). Content and methodology for teaching art in the elementary school. Prerequisite: conditional or full admission to the Teacher Certification Program.
ART 332. Art Curriculum and Field Experience (4).
Developing discipline-based art education curriculum for the elementary and middle school, as well as preparing curriculum to teach Friday children's art classes. Prerequisite: ART 330 and current WSP/FBI fingerprint clearance.

ART 333. Art, Design, and
Popular Culture (4). An exploration of artistic eras from a cultural perspective. focus is on the relationship of the fine arts, architecture and design to the historical era in which works were created. The course explores the ways in which art influences and is influenced by its cultural and social context. Course will be offered every year (Spring). Upon successful completion of this course, the student will be able to:
Identify and distinguish artistic styles of major historical periods in art
Use appropriate language to clearly communicate ideas regarding art, design and culture
Synthesize and summarize information from a variety of sources regarding Concepts that distinguish particular movements in art and how they relate to and interact with the cultures, and cultural issues, that created them
Apply research and critical thinking skills to analyze how works of art and design form an integral cultural element within the broader framework of social, cultural, economic and/or political processes from an objective foundation Evaluate readings in order to assemble a body of relevant information regarding social and cultural realities of particular artistic eras and how they relate to local, national, and international communities
ART 341. Intermediate
Wood Design (4). Design and fabrication of furniture forms. Emphasis on creative form development utilizing sophisticated fabrication and finishing processes. Class meets five hours per week. Prerequisite: ART 241.
Upon successful completion of this course, the student will be able to:
Design and create furniture forms

Apply creative problem solving and critical thinking skills related to studio furniture design and fabrication Demonstrate proficiency in shaping, fabricating and finishing wood and woodbased materials
Design works that incorporate conceptual content Demonstrate knowledge of issues relating to studio, tools and material, safety
ART 350. Mixed-media
Drawing (4). Continued
exploration in drawing with emphasis on mixed-media processes. Class meets five hours per week. Prerequisite: ART 250.
Upon successful completion of this course, the student will be able to:
Apply traditional and mixed media processes to create work using narrative,
representational and/or abstract imagery
Demonstrate the ability to develop content and context through preliminary drawings Demonstrate knowledge of issues relating to studio and material safety
Examine contemporary artists
whose work makes use of traditional and experimental media
Students will use correct vocabulary to communicate theoretical approaches to drawings
ART 351. Intermediate
Illustration (4). Continues exploration of illustration stressing development of personal expression in variety of media and industry standard software. Class meets five hours per week. Formerly ART 451; students may not receive credit for both. Prerequisite: ART 251 and permission. Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in the use of advanced illustration software
Apply an awareness of visual elements of global cultures

Demonstrate proficiency incorporating text and image Demonstrate proficiency using a variety of illustration media
ART 362. Intermediate
Watercolor (4). Further development of the techniques and skills acquired in ART 262, with emphasis on personal expression. Class meets five hours per week. Prerequisite: ART 262.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in water based media Compare and contrast application techniques Express personal style Experiment with nontraditional surfaces Apply professional craftsmanship in their studio practice
ART 368. Ceramic Materials and Effects (Put on reserve as of $9 / 16 / 15$. ) (5). This course covers an investigation into materials and their effects in the media of ceramics. Glaze calculation and testing along with clay body tests will be the main focus of this course. Low fire, midrange and high-fire temperatures will also be addressed. May be repeated up to 10 credits. Put on reserve as of $9 / 16 / 15$. Will go inactive $8 / 24 / 18$. Prerequisite: ART 265.

Upon successful completion of this course, the student will be able to:
Use a triple beam scale to weigh out materials. Identify a flux, refractory, and glass former.
Mix a low fire, midrange and high fire clay body.
Tabulate the quantity of materials in a glaze or lay formula and bring it into unity, (100\%).
Correctly identify a variety of standard glazes and categorize them as high or low fire.
ART 370. Beginning Layout and Design (4). Application of two and three-dimensional design principles and theoretical concepts to layout
and design using industry standard software. Class meets five hours per week.
Acceptance into the BFA graphic design major via portfolio review. Prerequisites: ART 150, and ART 171, and ART 172, and ART 274 and permission.
Upon successful completion of this course, the student will be able to:
Create thumbnail sketches with revisions for design layout
Create original photography and illustration for use within their design projects Use the modular grid system to create visual relationships between image and typography Demonstrate proficiency with industry standard design technology
Design a logo/brand for a client
Prepare and present a graphic design portfolio
ART 371. Intermediate
Layout and Design (4).
Continued work in design composition with emphasis on the application of letter, forms, color, image and concept using industry standard software. Class meets five hours per week. Prerequisite: ART 370.
Upon successful completion of this course, the student will be able to:
Create thumbnail sketches with revisions for advanced design layout
Create original images for use within their design projects Use the modular grid system to create complex visual relationships between image and typography
Prepare digital files for offset printing
Design a variety of promotional materials for a client
Prepare and present a revised graphic design portfolio
ART 372. Beginning Design and Production (4). Design composition with emphasis on production techniques, as well as the application of type, image and concept using industry standard software.

Class meets five hours per week. Prerequisite: ART 371. Upon successful completion of this course, the student will be able to:
Assess the needs of a client and create a variety of designs for the client
Create original photography and illustration for use within their design projects Demonstrate proficiency in the preparation of designs for offset printing
Select refined ideas from thumbnail sketches Assemble and present a revised graphic design portfolio
ART 374. History of Graphic
Design (4). A historical survey of the graphic arts from their beginning to the present.
ART 382. Computer Art II
(Put on reserve 9/16/16) (5).
Exploration of several software programs and computer output devices for creation of electronic art. (Put on reserve 9/16/16. Last taught in 2012.
Will go inactive $8 / 24 / 19$.)
Upon successful completion of this course, the student will be able to:
Develop advanced computer skills appropriate for creating filters, palettes, layers, animations, and other advanced visual effects.
Demonstrate diverse proficiency with output options
from print, film, web, digital camera and scanners, and/or video output.
Fabricate an installation or web site to express a conceptual concept.
Demonstrate advanced creative skills incorporating the conceptual as well as technical tools.
ART 383. Intermediate
Graphic Interface Design (4).
Further exploration of graphic
interface design for web pages and applications using principles of visual organization and composition. Class meets five hours per week. Prerequisite: ART 283 and permission.

Upon successful completion of this course, the student will be able to:
Utilize and focus on usability as a key aspect of web design Use various pre-visualization and planning methods as they apply to web design Identify and interpret design components of web pages Apply design proficiency to graphic interface design for the web
Identify and utilize professional practices of web design
Demonstrate proficiency in the use of Adobe Muse software
ART 389. Contemporary
Concepts in Art (Put on reserve as of $9 / 16 / 15$ ) (4).
Exploration of the contextual, formal, and philosophic meanings of current art movements and theories in regards to their relevance and place in contemporary art practice. Put on reserve as of $9 / 16 / 15$. Will go inactive 8/24/18.
ART 396. Individual Study (1-6). May be repeated if subject is different.
ART 397. Honors (1-12). Prerequisite: admission to department honors program.
ART 398. Special Topics (16).

ART 399. Seminar (1-5). May be repeated if subject is different.
ART 414. Recent Art (4). The visual arts of the last 25 years, including the traditional forms of painting, sculpture and architecture, and newer forms including video, computer, and performance art. Prerequisite:
ART 237.

## ART 416. International

Experience in Art,
Architecture, and Design (4).
An in-class and on-site study
of art, architecture and design which provides firsthand experience of art and culture of countries that have had an enormous impact on history. May be repeated up to 8 credits. By permission of instructor. Course will be offered every year (Winter).

Upon successful completion of this course, the student will be able to:
Identify, define and differentiate major works of art, various movements and developments that most clearly express the ideals and values of relevant artistic eras' cultural perspectives
Distinguish and analyze the variety of techniques and formal visual elements of individual works of art, architecture and design Evaluate and interpret various works of art in relation to the context and historical background in which they were created
Synthesize, summarize and assess information from a variety of sources regarding concepts that define and distinguish the movements and traditions of art, architecture and design
Summarize ways in which art has been a significant element of human society throughout history
Examine and interpret the geographical and cultural context of significant works of art, architecture and design
ART 420. American Art and Architecture (4). A study of art and architecture in America from the Colonial era to today. Contributions of Americans to world art, the role of art in American life and the work of canonical artists and architects are stressed. Recognition of major and styles is emphasized. Prerequisite: junior standing or higher. Upon successful completion of this course, the student will be able to:
Distinguish and analyze the variety of techniques and formal visual elements of individual works of art in different media. Evaluate and interpret various works of art in relation to the context and historical background in which they were created.
Identify, define and
differentiate the various styles
that most clearly express the ideals and values of American society from the colonial period to the present. Identify artists, titles of works, stylistic period and significance of major works of art and architecture.
Define and correctly use artist terms relevant to the artistic periods studied.
Synthesize, summarize and assess information from a variety of sources regarding concepts that define and distinguish the movements and traditions in American art.

## ART 425. Advanced

 Photography (4).Development of a personal portfolio with emphasis on developing conceptual ideas through research, planning, and experimentation. Class meets five hours per week. May be repeated up to 16 credits. Prerequisites: ART 325A, and ART 325B, and ART 325C. Upon successful completion of this course, the student will be able to:
Design and manage a longterm photography project Create a portfolio that demonstrates technical expertise and utilizes original conceptual content Evaluate current scholarship regarding the photograph as contemporary art
Apply advanced-level, critical analysis to photographic images
Create and prepare submissions for professional exhibition opportunities ART 430. Components of Art Education (Put on reserve 9/16/17) (4). Content and strategies for teaching aesthetics, art criticism, art history, and art production in art education; writing, implementing, and assessing quality art lessons. (Put on
reserve 9/16/17. Will go
inactive $8 / 24 / 2020$.)
Prerequisite: ART 330.
ART 432. Art in Secondary
School (Put on reserve
9/16/17) (4). Current
philosophies and curriculum in
the secondary school; objectives, planning, methods of teaching and evaluation. (Put on reserve 9/16/17. Will go inactive $8 / 24 / 2020$.)
Prerequisite: ART 430.
ART 441. Advanced Wood
Design (4). Advanced design and fabrication of furniture forms, with emphasis on research and development utilizing advanced or innovative fabrication and finishing processes. Class meets five hours per week. May be repeated up to 16 credits. Prerequisite: ART 341. Upon successful completion of this course, the student will be able to:
Design and create advanced unique studio furniture Apply advanced creative problem solving and critical thinking skills related to studio furniture design and fabrication Demonstrate expertise in shaping, fabricating and finishing wood and woodbased materials Design advanced works that incorporate conceptual content Demonstrate knowledge of issues relating to studio, tools and material, safety

## ART 446. Advanced

 Jewelry/Metals (4). Advanced exploration of personal expression in jewelry and/or metals. Emphasis on selfdirection, conceptual and technical mastery and professionalization of practice. Class meets five hours per week. May be repeated up to 16 credits. Prerequisites: ART 346A, and ART 346B, and ART 346C or by permission after having taken two of these three courses. Upon successful completion of this course, the student will be able to:Create works that demonstrates expertise in advanced Jewelry/Metals processes Demonstrate knowledge of issues relating to studio, tools and material, safety Formulate and present proposals for a cohesive body of self- directed work

Evaluate and modify project plans to create a body of work Write a cohesive statement about their creative work and professional record Create visual portfolio, seek and enter juried exhibition opportunities
ART 450. Advanced Drawing
(4). Further development of skills in drawing with emphasis on building a cohesive body of work. Class meets five hours per week. May be repeated up to 16 credits. Prerequisite: ART 250.
Upon successful completion of this course, the student will be able to:
Create a cohesive body of work that communicates advanced concepts Clearly articulate complex ideas regarding advanced concepts in painting
Students will use correct vocabulary to communicate theoretical concepts of drawing Create projects using monotypes, image transfers and mixed media processes Examine various contemporary artists whose work is primarily based in drawing media
ART 460. Advanced Painting
(4). Advanced exploration of painting with an emphasis on building a cohesive body work. Class meets five hours per week. May be repeated up to 16 credits. Prerequisites: ART 360A, and ART 360B, and ART 360C or permission of instructor.
Upon successful completion of this course, the student will be able to:
Create a cohesive body of work that communicates advance concepts Clearly articulate complex ideas regarding advanced concepts in painting
Students will use correct vocabulary to communicate theoretical concepts of painting Examine various contemporary artists
Demonstrate knowledge of issues relating to studio and material safety

ART 465. Advanced
Ceramics (4). Advanced instruction in ceramics with a focus on developing technical expertise and creating a visual voice in the medium through self-directed research in historical, contemporary, and multi-cultural approaches to the medium. Class meets five hours per week. May be repeated up to 16 credits. Prerequisites: ART 365A, and ART 365B, and ART 365C, or permission of instructor. Upon successful completion of this course, the student will be able to:
Create work that demonstrates expertise in a variety of techniques within hand-built, wheel thrown and/or molded work
Demonstrate knowledge of issues relating to studio, tools, and material safety
Demonstrate advanced knowledge of historical and contemporary technical and conceptual approaches to ceramics
Create works that incorporate conceptual content, including strategies of abstraction, narrative and personal expression Analyze the outcomes of specific temperatures and firing techniques on test clay and glaze materials Evaluate results from advanced firing techniques Students will complete work that incorporates a variety of techniques
ART 470. Advertising Graphic Design (4). Concept and design as applied to advertising problems with emphasis on presentation and communication skills with analysis and implementation of marketing strategies. Class meets five hours per week. Acceptance into the BFA graphic design major via portfolio review. May be repeated up to 8 credits. Prerequisite: by permission. Upon successful completion of this course, the student will be able to:

Utilize a set of methodologies
for brainstorming as an individual and creative team Formulate creative briefs for an advertising campaign Design an advertising campaign
Solve design problems as a member of a creative team Apply an integrated theme and concept to a complete advertising campaign system Write headlines and copy
ART 471. Corporate Graphic
Design (4). Concept and design as applied to corporate graphic design problems with emphasis on presentation and communication skills with analysis and implementation of marketing strategies. Class meets five hours per week. Prerequisite: ART 470.
Upon successful completion of this course, the student will be able to:
Prepare a strategic mission statement and core values worksheet
Demonstrate expertise in the use of a branding process that might include identify brand positioning, brand image, brand affiliation, and the brand vision
Formulate creative briefs as part of the branding process Generate and revise thumbnails, roughs, color studies and type studies for the full ideation process of design
Design a professional logo
ART 472. Intermediate
Design and Production (4).
Development of professional practices, creative problem solving techniques, and understanding and establishing relationships with vendors. Class meets five hours per week. Prerequisite: ART 471.
Upon successful completion of this course, the student will be able to:
Use industry standard software to design advanced multi-page projects
Demonstrate expertise in the preparation of complex, multipage designs for offset printing Demonstrate time management skills

Prepare a job proposal and cost estimate

## ART 474. Intermediate

Typography (4). Exploration of advanced type and image relationships, including conceptual, structural and visual elements with an emphasis on history and terminology. Class meets five hours per week. Prerequisites: ART 172 and ART 274. Upon successful completion of this course, the student will be able to:
Use industry standard software to design advanced typographic projects
Design a unique typeface using digital software
Design headlines and body text using advanced letter and line spacing concepts Design signage and wayfinding systems Demonstrate time management skills
Prepare, revise and present a graphic design portfolio
ART 480. Advanced Sculpture (4). Advanced studies in sculpture. Emphasis is on creative self-expression and the development of a selfdirected body of work. Class meets five hours per week. May be repeated up to 16 credits. Prerequisites: ART 380A and ART 380B or by permission.
Upon successful completion of this course, the student will be able to:
Create a cohesive body of selfdirected sculptural work Use the visual strategies of sculpture as a mode of communication and expression Demonstrate knowledge of issues relating to studio, tools, and material safety Utilize advanced vocabulary relevant to sculpture Prepare and present research on contemporary sculptural work as it relates to the student's self-directed project
ART 483. Advanced Graphic Interface Design (4).
Advanced exploration of graphic interface design for web pages and applications
using principles of visual organization and composition. Class meets five hours per week. Prerequisite: ART 383 and permission.
Upon successful completion of this course, the student will be able to:
Evaluate how historical and contemporary design theory informs "experience design" as a field of practice
Apply the processes and methodologies of "experience design" and "interaction design"
Create comprehensive and systematic team design project that addresses local issues or needs
Solve complex, "experience design" problems that address user needs
Create a system of design assets that address print and digital media needs
ART 490. Cooperative
Education (1-12). An
individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student-learning plan, cooperating employer supervision, and faculty coordination. By permission.
May be repeated for credit. Grade will either be S or U .
ART 491. Workshop (1-6). May be repeated for credit. ART 495. Studio Project (2). Preparation of a professional portfolio and presentation of the portfolio or of a body of work for exhibition. Satisfies end-of-year assessment requirements. Must be taken during one of the last two quarters prior to graduation. Prerequisite: by permission. Upon successful completion of this course, the student will be able to:
Demonstrate advanced proficiency in at least one studio area or graphic design Prepare a body of work for exhibition and/or portfolio Write a cohesive statement about their creative work and professional record

Plan career objectives
ART 497. Honors (1-12). Prerequisite: admission to department honors program. ART 498. Special Topics (16).

ART 499. Seminar (1-5). ART 325A. Intermediate Photography: Color (4) Introduction to digital color photography with emphasis on color image capture, editing, printing, and artificial lighting as well as historical and contemporary uses of color. Class meets five hours per week. Prerequisite: ART 225. Upon successful completion of this course, the student will be able to:
Demonstrate technical proficiency using a digital camera to produce color photographs
Employ current photo-editing applications
Apply knowledge of digital visual culture, including conceptual and design elements
Analyze photographic images Demonstrate proficiency utilizing artificial lighting in the creation of photographic images
Write about creative photographic processes in relation to their own work
ART 325B. Intermediate Photography: Analog Processes (4). Continued exploration of film-based darkroom photography, with the introduction of new techniques, processes and applications. Incorporation contemporary practices and concepts. Class meets five hours per week. Prerequisite: ART 225.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in alternative analog processes Apply creative solutions to alternative, analog photographic applications Analyze photographic images
Examine the work of contemporary photographers
working with non-traditional alternative processes Demonstrate proficiency utilizing artificial lighting in the creation of photographic images
Write about creative, nontraditional photographic processes in relation to their own work
ART 325C. Intermediate Photography: Visual Narratives (4). Exploration of the creative and conceptual processes of utilizing the photographic medium to explore visual language. Class meets five hours per week. Prerequisite: ART 225.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in various methods of creating narrative
Apply knowledge of both analog and digital capture skills
Analyze photographic images as they relate to the theme of visual narratives Demonstrate proficiency utilizing artificial lighting in the creation of photographic images
Assemble a print and digital portfolio addressing technical
and conceptual concerns Write about creative photographic processes in relation to their own work
ART 346A. Intermediate Jewelry/Metals: Casting and Link Structures (4). Technical and conceptual aspects of jewelry and metalwork through model-making, casting, moldmaking, and construction of linkages and chains. Emphasis on personal exploration. Class meets five hours per week. Prerequisite: ART 246.
Upon successful completion of this course, the student will be able to:
Demonstrate continued proficiency and advanced application of processes Apply creativity to model making, casting, mold making and linkage structures

Demonstrate knowledge of issues relating to studio, tools and material, safety Plan and present proposals for creative model making, casting, mold making and linkage structures work Indicate knowledge of contemporary conceptual approaches to jewelry/metalsmithing Create works that incorporate conceptual content
ART 346B. Intermediate Jewelry/Metals: Enameling
(4). Technical and conceptual aspects of jewelry and metalwork with focus on enameling (glass on metal). Emphasis on personal exploration. Class meets five hours per week. Prerequisite: ART 246.
Upon successful completion of this course, the student will be able to:
Demonstrate continued proficiency and advanced application of processes Apply creativity to various classical enameling techniques Demonstrate knowledge of issues relating to studio, tools and material, safety Plan and present proposals for creative enameling work Indicate knowledge of contemporary conceptual approaches to jewelry/metalsmithing Create works that incorporate conceptual content
ART 346C. Intermediate Jewelry/Metals: Form and Surface (4). Technical and conceptual aspects of jewelry and metalwork with focus on form development (chasing, dieforming and electroforming) and surface embellishment techniques. Emphasis on personal exploration. Class meets five hours per week. Prerequisite: ART 246.
ART 360A. Intermediate
Painting: Narrative and
Representation (4). Continued exploration of painting techniques with a focus on narrative and representation. Class meets five hours per week. Prerequisite: ART 260.

Upon successful completion of this course, the student will be able to:
Utilize pictorial narrative, sequential narrative and/or implied narrative
Use representational imagery
and specific surfaces to create content
Demonstrate knowledge of issues relating to studio and material safety
Students will use correct vocabulary to communicate theoretical approaches to narrative painting Examine contemporary artists whose work is directly related to representational and narrative art making
ART 360B. Intermediate
Painting: Color (4). Further development of painting techniques with emphasis on color as a conceptual, formal, and organization tool. Class meets five hours per week. Prerequisite: ART 260. Upon successful completion of this course, the student will be able to:
Create a body of work with color as the major organizational design principle. Examine artists who use color as subject matter Students will apply concepts such as: expression, meaning and content to their work Create works of art using alternative painting surfaces Differentiate between color used as symbol, as expression, and as description
ART 360C. Intermediate Painting: Abstraction (4).
Further development of painting techniques with emphasis on abstraction as a conceptual, formal, and organizational tool. Class meets five hours per week. Prerequisite: ART 260.
Upon successful completion of this course, the student will be able to:
Demonstrate basic strategies of abstract painting
Create works utilizing a variety of application techniques

Students will use correct vocabulary to analyze nonobjective art
Demonstrate the ability to abstract form from the natural world
ART 365A. Intermediate Ceramics: Hand-Building
(4). Intermediate instruction in ceramics with a focus on developing hand-building techniques, including more indepth concept development and historic, contemporary, and multi-cultural approaches to the medium. Class meets five hours per week. Prerequisite: ART 265. Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in the process of production, altering and measuring wheel-thrown components
Demonstrate knowledge of issues relating to studio, tools, and material safety Demonstrate intermediate knowledge of historical and contemporary technical and conceptual approaches to complex thrown and altered ceramic forms
Create works that incorporate conceptual content, including strategies of abstraction, narrative and personal expression

## ART 365B. Intermediate

Ceramics: Wheel-Throwing
(4). Intermediate instruction in ceramics with a focus on developing wheel-throwing techniques, including more indepth concept development and historic, contemporary, and multi-cultural approaches to the medium. Class meets five hours per week. Prerequisite: ART 265. Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in the process of production of handbuilt ceramic form Demonstrate knowledge of issues relating to studio, tools, and material safety Demonstrate intermediate knowledge of historical and
contemporary technical and conceptual approaches to complex hand built forms Create works that incorporate conceptual content, including strategies of abstraction, narrative and personal expression
ART 365C. Intermediate Ceramics: Mold-Making (4).
Intermediate instruction in ceramics with a focus on moldmaking and mold materials including plaster, plywood and polystyrene molds, including more in-depth concept development and historic, contemporary, and multicultural approaches to the medium. Class meets five hours per week. Prerequisite: ART 265.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in the process of producing forms with molds
Demonstrate knowledge of issues relating to studio, tools, and material safety Demonstrate intermediate knowledge of historical and contemporary technical and conceptual approaches to complex molded forms Create works that incorporate conceptual content, including strategies of abstraction, narrative and personal expression

## ART 380A. Intermediate

 Sculpture: Object and Form(4). A continuation of the studio experience in sculpture, emphasizing the development of object and form, a higher level of technical competence, continued exploration of materials and conceptual development. Class meets five hours per week. Prerequisite: ART 280.
Upon successful completion of this course, the student will be able to:
Demonstrate proficiency in sculptural processes including assemblage, fabrication and construction Develop content and context using object and form

Demonstrate knowledge of issues relating to studio, tools, and material safety Utilize correct terminology relevant to sculpture Prepare and present research on a contemporary sculptor
ART 380B. Intermediate Sculpture: Installation Art
(4). A continuation of the studio experience of sculpture, emphasizing the development of installation art within a spatial context, higher level of technical competence, continued exploration of materials and conceptual development. Class meets five hours per week. Prerequisite: ART 280
Upon successful completion of this course, the student will be able to:
Develop content and context within the format of installation
Examine how specific sites informs the content and context of installation art Demonstrate knowledge of issues relating to studio, tools, and material safety Utilize correct terminology relevant to installation art Prepare and present research on a contemporary installation artist
ART 496A. Individual Study:
Computer Art (1-6). By permission. May be repeated for credit.
ART 496C. Individual Study:
Ceramics (1-6). By
permission. May be repeated for credit.
ART 496D. Individual Study:
Drawing (1-6). By permission. May be repeated for credit.
ART 496E. Individual Study:
Art Education (1-6). By permission. May be repeated for credit.

## ART 496G. Individual

Study: Graphic Design (1-6).
By permission. May be repeated for credit.
ART 496H. Individual
Study: Art History (1-6). By permission. May be repeated for credit.
ART 496J. Individual Study: Jewelry/Metals (1-6). By
permission. May be repeated for credit.
ART 496P. Individual Study:
Painting (1-6). By permission. May be repeated for credit.
ART 496R. Individual Study:
Printmaking (1-6). By permission. May be repeated.
ART 496S. Individual Study:
Sculpture (1-6). By
permission. May be repeated for credit.
ART 496T. Individual Study:
Photography (1-6). By
permission. May be repeated for credit.
ART 496W. Individual
Study: Wood Design (1-6).
By permission. May be repeated for credit.
ASL 151. American Sign
Language (5). Conversational approach with intensive visual/manual drill. Firm foundation in basic signs and structural principles of the language. Courses must be taken in sequence.
Upon successful completion of this course, the student will be able to:
Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Low level.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Low level.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community. ASL 152. American Sign
Language (5). Conversational approach with intensive visual/manual drill. Firm foundation in basic signs and structural principles of the language. Courses must be taken in sequence. Prerequisite: ASL 151.
Upon successful completion of this course, the student will be able to:

Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Midlevel.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Midlevel.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community.
ASL 153. American Sign
Language (5). Conversational approach with intensive visual/manual drill. Firm foundation in basic signs and structural principles of the language. Courses must be taken in sequence. Prerequisite: ASL 152.
Upon successful completion of this course, the student will be able to:
Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Highlevel.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Novice Highlevel.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community.
ASL 251. Second-year
American Sign Language (5). How signers construct meaning and messages in ASL, grammatical variation, and discourse strategies is covered with special focus on increasing non-manual behavior. Courses must be taken in sequence.

Upon successful completion of this course, the student will be able to:
Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the intermediate Low level.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Intermediate Low level.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community.
ASL 252. Second-year American Sign Language (5). How signers construct meaning and messages in ASL, grammatical variation, and discourse strategies is covered with special focus on increasing non-manual behavior. Courses must be taken in sequence. Prerequisite: ASL 251. Upon successful completion of this course, the student will be able to:
Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the intermediate Low level.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign Languages (ACTFL) guidelines at the Intermediate Low level.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community. ASL 253. Second-year American Sign Language (5). How signers construct meaning and messages in ASL, grammatical variation, and discourse strategies is covered with special focus on
increasing non-manual behavior. Courses must be taken in sequence.
Prerequisite: ASL 252.
Upon successful completion of this course, the student will be able to:
Develop listening and reading skills in target language in accordance with the American Council on Teaching Foreign
Languages (ACTFL)
guidelines at the Novice Mid level.
Develop speaking and writing skills in target language in accordance with the American Council on Teaching Foreign
Languages (ACTFL)
guidelines at the Novice Mid level.
Acquire an overview of historical and cultural features and be able to identify the cultural practices of the American Deaf community.
ASL 298. Special Topics (1-
6). May be repeated if subject is different.
ASL 299. Seminar (1-5). May
be repeated if subject is
different.
ASL 301. American Sign
Language Literature (5).
Introduces aspects of ASL
literature, including poetry,
narrative, humor and folklore.
Students will develop
knowledge of the literary
history of ASL and will
acquire skills in
comprehending and producing
ASL literary texts. By
permission only. Prerequisite: ASL 253.
Upon successful completion of this course, the student will be able to:
Identify the following forms of ASL Literature: Poetry, narrative, humor and folklore. Demonstrate examples of ASL poetry, narrative, humor and folklore.
Demonstrate knowledge of and sensitivity for Deaf Culture and the Place of ASL Literature in the culture.
Identify and describe significant literary events relating to American Sign Language.

ASL 310. Deaf Culture (5).
Overview of the cultural development and linguistic history of the Deaf. Provides a comprehensive study of the deaf-world through analysis of historical events, sociolinguistic factors that affect ASL and current issues. By permission only. Prerequisite: ASL 253. Upon successful completion of this course, the student will be able to:
Identify and explain significant events in the history of Deaf people in America and abroad. Identify and describe the social beliefs, art, language, history, values and shared institutions of Deaf people in America. Demonstrate understanding of and respect for Deaf Culture and its members.
Evaluate events in the history of Deaf people and describe their impact on modern day members of Deaf Culture.
ASL 343. Deaf Education (5). Overview of current practices concerning the use of ASL in the educational setting. Topics explored will include manually coded English systems, bilingual bicultural education, and language acquisition in deaf children. Prerequisite: C+ or higher in ASL 310. By permission only.
Upon successful completion of this course, the student will be able to:
Examine and discuss a variety of common topics likely to be encountered in the target language culture. Use intermediate vocabulary and grammar appropriately, orally and in writing. Analyze and interpret simple texts.
Recognize appropriate use of vocabulary and grammar in oral and written input. Identify cultural practices. Demonstrate appropriate use of past, present and future indicative mood.
ASL 396. Individual Study (1-6). May be repeated if subject is different.

ASL 397. Honors (1-12).
Prerequisite: admission to department honors program.
ASL 398. Special Topics (1-
6). May be repeated if subject is different.
ASL 399. Seminar (1-5). May
be repeated if subject is different.
ASL 496. Individual Study (1-6). May be repeated if subject is different.
ASL 497. Honors (1-12).
Prerequisite: admission to department honors program.
ASL 498. Special Topics (1-
6). May be repeated if subject is different.
ASL 499. Seminar (1-5). May
be repeated if subject is different.
ASP 298. Special Topics (1-
6). May be repeated if subject is different.
ASP 299. Seminar (1-5). May
be repeated if subject is
different.
ASP 305. Accessibility and
User Experience (3). Quality
of life issues of accessibility in
everyday experiences and
environments. Common
conditions (disabilities)
requiring proactive
access. Changes in laws and attitudes about the need for accessibility. Current careers requiring competence in troubleshooting accessibility. Course will be offered every year (Fall, Winter, Spring and Summer).
Upon successful completion of this course, the student will be able to:
Identify assumptions of mobility, perception, cognition, and engagement regarding common life activities (i.e. ableism).
Define disability etiquette. Distinguish between theoretical models of disability, e.g. medical, social, economic, functional, identity, moral, charity, and destiny, and examine the implications of beliefs and attitudes about disability on public and personal perceptions of disability.

Differentiate categories and levels of disability and common barriers associated with them (i.e., eligibility and entitlement).
Define assistive technologies and their uses.
List prominent legal documents and landmark events related to disability and human rights. Identify accessibility competencies required by different careers.
ASP 325. Universal Design
(4). Proactive accessibility
design for high incidence
problems in commercial,
leisure, occupational, and personal living spaces. Assistive technology, adapted architecture, differentiated activity. Standards for safety and equity. ADA compliance. Risk management strategies. Prerequisite: ASP 305. Upon successful completion of this course, the student will be able to:
Analyze scenarios of interaction for their effective inclusion of people with disabilities and limitation. Define principles of universal design.
Identify technological applications useful for designing individual accommodation and universal access.
Explain ADA compliance in terms of safety and liability. Outline risk management strategies.

## ASP 365. Assistive

Technology: Tactile Graphics
(3). Use of both low and high technology methods to translate verbal information into Braille. Includes standards for developing content and designing products. Course will not have an established scheduling pattern.
Upon successful completion of this course, the student will be able to:
Identify what information must be conveyed from print graphic to a tactile graphic.

Recognize the features in print graphics to be omitted in tactile graphics.
Analyze finished tactile graphics for clarity and effectiveness according to standards and guidelines. Compare different production options in terms of cost and benefit.
Produce tactile graphics using a variety of materials, equipment, and software. Outline steps necessary to become certified by National Library Service for the Blind and Physically Handicapped. Compare agencies and enterprises offering services for visual impairment.
ASP 396. Individual Study
(1-6). May be repeated if subject is different.
ASP 397. Honors (1-12).
Prerequisite: admission to department honors program.
ASP 398. Special Topics (1-
6). May be repeated if subject is different.
ASP 399. Seminar (1-5). May be repeated if subject is different.
ASP 435. Accessible
Information Design (5).
Standards for barrier-free
public communication, issues of disclosure and advocacy, laws and civil rights legislation and court decisions, and social justice and social psychology aspects will be addressed for all environments, e.g. work, learning, commerce. Course will be offered every year (Fall, Winter, Spring and Summer). Co- or Prerequisite: ASP 325.
Upon successful completion of this course, the student will be able to:
Identify common barriers to inclusive information in terms of content and medium.
Analyze rhetorical implications of accessible information design.
Define and illustrate guidelines.
Identify and assess technological applications useful for making information accessible.

Interpret policy and law as applied to making advertising and other public communication accessible. Outline stakeholder responsibilities and interactions.
Explain the importance of evacuation, e.g. during a threat of fire, and predict the dangers to self and others resulting from ineffective communication. Explain the importance of communication in emergency circumstances.
ASP 485. Accessibility
Studies Capstone (3).
Experiential-based capstone course. Accessibility competence demonstrated in portfolio and capstone project. Laboratory time will include a variety of service learning, professional visits, and applied practical experience. Strategies for engaging stakeholders in trouble-shooting accommodations. Permission by department. Course will be offered every year. Course will not have an established pattern. Co- or prerequisite: ASP 435. Upon successful completion of this course, the student will be able to:
Identify common barriers to inclusive information in terms of content and medium.
Analyze rhetorical implications of accessible information design.
Define and illustrate guidelines.
Identify and assess technological applications useful for making information accessible.
Interpret policy and law as applied to making advertising and other public communication accessible. Outline stakeholder responsibilities and interactions.

## ASP 490. Accessibility

Studies Internship (1-12).
Field experience in a realworld context for observing, analyzing and investigating principles and issues crucial to developing competence in
understanding efforts to minimize barriers for all people, especially those with specific limitations in their perception or mobility.
Fingerprinting may be required. May be repeated up to 20 credits. Grade will be either S or U. Course will not have an established scheduling pattern. Co- or Prerequisite: ASP 435.
ASP 492. Advanced Practicum in Accessibility Studies (1-15). Field experience in a real-world context for preparing career applications of accessibility competencies. May be repeated to 15 credits. Fingerprinting may be required prior to enrollment. Permission of the department. Course will not ahve an established scheduling pattern. Co- or Prerequisite: ASP 435.
Upon successful completion of this course, the student will be able to:
Investigate real-world scenarios for high-incidence accessibility issues. Observe and analyze realworld scenarios for compliance with accessibility laws and policies.
Discuss solutions to improve accessibility in a realistic context for realistic people with high incidence disabilities.
Synthesize field experience and professional literature to interpret real world phenomena and personal attitudes toward accessibility. Demonstrate appropriate interactions with stakeholders in field, e.g. disability etiquette.
ASP 496. Individual Study
(1-6). May be repeated if subject is different.
ASP 497. Honors (1-12). Prerequisite: admission to department honors program.
ASP 498. Special Topics in Accessibility (1-6).
Investigate principles and issues of accessibility applied to specific practical or creative contexts. May be repeated under different topics up to 20
credits. Course will not have an established scheduling pattern.
ASP 499. Seminar (1-5). May be repeated if subject is different.
AST 102. Introduction to Asian Studies (3). An interdisciplinary introduction to the study of Asia; emphasizing geography, history, culture, and economics. SB-Perspectives on World Cultures (W). Course will be offered every year (Fall, Winter, Spring, and Summer).
Upon successful completion of this course, the student will be able to:
Articulate an understanding of the history, cultures, and societies of Asia.
Analyze important trends in Asia and explain the causes and effects of those trends. Identify contemporary issues impacting Asian society, culture, politics and international affairs. Identify and articulate the various ways in which Asia is studied within the academy.
AST 298. Special Topics (1-
6). May be repeated if subject is different.
AST 299. Seminar (1-5). May be repeated if subject is different.
AST 301. Chinese Literature
in Translation (4). A survey of Chinese literature in translation. AST 301 and CHIN 301 are equivalent courses; students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of Chinese culture and trace the influence and representation of this culture in the literary works.
Characterize the basic features of traditional Chinese literary forms or genres (prose, poetry, and drama).
Identify recurring themes, conflicts and characters in Chinese literary works.
AST 310. Japan Today (3).
Study of culture, social
structure, human relations, and issues and problems in contemporary Japan. Upon successful completion of this course, the student will be able to:
Identify the political, economic, cultural and religious structures of contemporary Japan. Identify the ways in which Japanese society has been influenced by, and maintained distance from, western cultural institutions.
Verbally and expositorally articulate an understanding of political, economic, cultural and religious structures of contemporary and their influences on the wider social milieu.
Develop analytical, reading and writing skills. Identify the changes in and evolution of the various cultural structures in contemporary Japanese society.
AST 340. Ethnography of China (Put on reserve $9 / 16 / 17$ ) (4). This course is designed to explore China from the perspectives of general cultural patterns and ethnicity. ANTH 340 and AST 340 are cross-listed courses; students may not receive credit for both. (Put on reserve 9/16/17. Will go inactive $8 / 24 / 2020$.)
Upon successful completion of this course, the student will be able to:
Tell what ethnic identifications are in China and to state the key ethnic and political problems concerning Tibet, Xinjiang and Inner Mongolia. Describe the steady, multiethnic formation of China throughout history by a complex process of cultural diffusion, population move, and violent action. Provide an underlying geopolitical explanation of the policy of the Chinese government towards the minority peoples in its frontier regions and towards its national security.

Procure concepts and tools for presenting the forms of interethnic relations through what happened and what is going on in multiethnic China. Specify how the Chinese 'autonomous' solutions to the ethnic minorities work and fail. Increase experience in reading and writing about ethnic groups and cultures.
AST 396. Individual Study (1-6).
AST 397. Honors (1-12).
Prerequisite: admission to department honors program.
AST 398. Special Topics (16).

AST 399. Seminar (1-5). May
be repeated if subject is different.
AST 401. Asia/Pacific Studies
Capstone (3). Senior research project of creative expression, to be completed in conjunction with elective course under the supervision of an Asia Pacific Studies teaching faculty member or someone designated by director.
AST 496. Individual Study (1-6). May be repeated if subject is different.
AST 497. Honors (1-12).
Prerequisite: admission to department honors program.
AST 498. Special Topics 1-6.
May be repeated if subject is different.
AST 499. Seminar (1-5). May
be repeated if subject is different.
ATM 251. Style Principles:
Body to Store (3). Theory and practice of merchandise presentation from store windows and displays to merchandising on the body. Application of principles and elements of design and concept development to execution for a variety of mediums. Course will be offered every year (Spring).
Upon successful completion of this course, the student will be able to:
Define and apply the principles and elements of design Identify components of visual displays

Identify advertising components of display Complete balanced aesthetically pleasing visual display
Define components of client styling
Identify sectors within styling industry
Analyze client body shape, size and fit
Identify the creative and
strategic nature of visual merchandising of the store and body
Identify individual style personality so clothing choices are successful
Execute photoshoot using components of styling Use terminology correctly
Practice and improve communication, writing, and presentation skills in relation to working with clients
ATM 270. Digital
Presentation Techniques (4).
Introduction to industry standard software used to visually communicate information. Basic skills acquired include the development of line plan components, presentation techniques, and concept boards.
Upon successful completion of this course, the student will be able to:
Develop knowledge and skills to be skilled users of computer technology used in the industry Develop computer skills to create effective story boards, line sheets, layouts, magazine spreads, brochures, and other product related information Use computer technology to create a variety of projects Identify the creative process and explore the capabilities of computer technology as related to clothing, fashion, and textiles
Discuss elements of professional portfolio Use industry technology to execute professional quality work
ATM 280. Basic Sewing
Techniques (3). Basic clothing construction theory,
techniques, and teaching methods covering basic garment components: collars, sleeves, bodices, pleats, etc. Formerly FCSA 280, students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Demonstrate mastery of sewing techniques as demonstrated in class Analyze and choose appropriate fabric selection for apparel and accessories Understand commercially available patterns and be able to recognize and explain markings on patterns Use sewing machine, sergers and various apparel design tools
ATM 281. Socio-cultural Aspects of Apparel (4). Clothing in relation to individual and group behavior patterns; personal and social meanings attributed to dress; and cultural patterns of technology, aesthetics, ritual, morality, and symbolism. Formerly FCSA 351 and ATM 351, students may not receive credit for both. Course will be offered every year (Fall, Winter, Summer). Upon successful completion of this course, the student will be able to:
Examine the means in which raiment within a cultural context serves to fulfill the physical, environment, social, psychological and personal needs.
Utilize the systems theory perspective in order to understand multiple cultural factors related to dress in society including identity, technology, social organization, aesthetics, gender, religion, ritual, and age.
Analyze and interpret unique experiences of raiment from a cultural perspective.
Research raiment in real-life situations in relationship to social and cultural behavior. Identify the structure of dress communication systems and
theories and the effect on human interaction.
Value the diversity of our appearance by linking the purposes raiment serves for individuals and societies. Apply critical thinking skills and inspire discussion relative to diverse perspectives, the body and raiment.
ATM 285. Buying and Merchandising Math (4). An introduction to the financial management of fashion products; mathematical applications using percentages, mark-ups, profit formulas, pricing principles, tracking inventory, and mathematical formulas used in all levels of apparel operations. Upon successful completion of this course, the student will be able to:
Define and dissect of the basic sales elements in the buying/selling process Calculate, analyze, and measure the performance of operating income Determine and calculate the costs of goods sold when purchasing merchandise Recognize and calculate the net cost
Identify activities that retailers
can use to maximize profits Understand price lining, pricing strategy, and pricing issues
Calculate markup as dollar amounts and percentages for individual items and groups of items
Establish retail prices
Identify the types of markups
and the use of each in making merchandise decisions Calculate initial markups, cumulative markups, and maintained markups, keeping markups balanced for various situations
Recognize and understand both the dollar amounts and percentages of markup needed to evaluate
Know and understand the retail method of inventory
Identify and describe information and procedures
necessary to implement the retail method of inventory Understand and recognize the elements of a six-month merchandise plan Recognize the importance of profit calculations in merchandising decisions Identify components of a profit and loss statement
ATM 289. Northwest Field Experience in Apparel and Textiles (3). An applied study of clothing, textiles, fashion merchandising, and design through regional field visits to meet with fashion professionals within a range of careers. Formerly FCSA 289, students may not receive credit for both. By permission.
Upon successful completion of this course, the student will be able to:
Identify potential professions in the Apparel Field Develop strengths and weaknesses of professional options
Determine professional training that requires individual academic preparation
Examine site locations
ATM 298. Special Topics (16).

ATM 299. Seminar (1-5).
May be repeated if subject is
different.
ATM 301. Introduction to the Fashion Industry (4). Overview of the history, structure, and operation of the fashion industry. Provides knowledge and skills for effective development in understanding the dynamics of the fashion industry. Course
will be offered every year (Winter).
Upon successful completion of this course, the student will be able to:
Evaluate the fashion cycle and its components. Analyze the developmental steps of the fashion industry Identify apparel trends, styles and sizes.
Identify many sectors of the apparel industry.

Understand the roles and responsibilities of designers, manufacturers, and retailers. Analyze sustainability/social responsibility in the apparel industry.
Use fashion terminology appropriately.
Determine the scope of jobs in the fashion industry. Practice and improve communication, writing, and presentation skills to enable students to have a competitive advantage in the fashion industry.
Use industry technology to execute professional quality work.
ATM 353. Apparel Manufacturing (5). Analysis and evaluation of apparel through manufacturing; specification development, seam/stitch classifications, apparel assembly, equipment capabilities and production processes, costing, strategic sourcing, and quality assurance. Consideration of consumer product expectations, sustainability and intended end-use will be evaluated throughout the course. Formerly FCSA 353, students may not receive credit for both. Prerequisites: ATM 280, and ATM 301, and ATM 355 are required. Upon successful completion of this course, the student will be able to:
Describe quality assurance along the supply chain including raw materials and sewn products
Identify stitch and seam classifications
Analyze garment construction details and assembly processes Understand and complete garment and technical specification packages Identify production equipment capabilities and production processes (mass and cottage)
Evaluate costing variables throughout the apparel manufacturing process Understand sourcing process and identify production centers

Identify consumer product expectations
Understand and identify how sustainability is implemented throughout apparel manufacturing
ATM 355. Consumer Textiles
(4). Study of natural and synthetic textiles: generic classification, fiber-forming substances, morphology, fabrication, finishing and dyeing processes, properties, and performances. Ten dollar material fee. Formerly FCSA 355 , students may not receive credit for both.
Upon successful completion of this course, the student will be able to:
Analyze natural and manmade
fibers and their production, properties, use, and care Evaluate how yams and fabrics are produced
Identify the general concepts of textile processing, dyeing, and finishing
Define laws and labeling
requirements pertaining to textiles
Use textile terminology such as
fiber and fabric names
appropriately
Identify fabric structures, yarn types, dyes and finishes Identify the importance of developing a professional knowledge of textiles
ATM 379. ATM Internship
Planning (1). Preparation for required ATM internship; identifying professional goals, skills, opportunities and strategies, complete resumes, the application processes, preparing for interviews, analyzing the student internship, and introductory portfolio preparation. Formerly FCSA 379, students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Identify career opportunities within the design, product development, manufacturing, merchandising, retailing, promotion, or scholarship sectors of the fashion industry

Define the requirements for internship programs in tems of academic needs and assignments, employer expectations and evaluations, time management and organizational skills, etc Complete a professional resume, letter of application, and portfolio-in progress Identify active listening skills and interviewing techniques to include appropriate dress; wellprepared questions and answers; internet, telephone and office protocol; etc Research and identify prospective internship employers
Complete necessary internship forms and identify internship learning objectives
ATM 381. Fashion Show
Production (2). Preparation, production, and evaluation of special fashion related events. Professional learning experiences will include modeling techniques, organization and directing procedures. Formerly FCSA 381, students may not receive credit for both. May be repeated up to 4 credits. Upon successful completion of this course, the student will be able to:
Outline skills and competencies needed in producing a fashion show Formulate strategies used for total involvement and audience attendance
Examine strategies for model selection, merchandise selection, staging and music, budgeting, show preparation, and/or execution Analysis of the fashion show concept and design process Show production, coordination, and how to make successful show
Organize successful event plans, producing assigned aspects of annual spring fashion show
Plan and execute effective and timely schedules and logistics for fashion show

Create accurate fashion show budget and execute show within the proposed budget Analyze completed show with evaluations of successes and areas for improvement Demonstrate team work and communication skills through the production of the fashion show
ATM 388. Advanced Fashion
Design (3). Fundamental concepts of flat pattern and draping design theories and techniques. Design and execution of draped and flat patterned samples and garment structures will be required. Includes translation of garment ideas from conception through production and merchandising.
May be repeated up to 6 credits. Prerequisite: ATM 280 or TH 261 and admission to the apparel, textiles and merchandising major or minor or the apparel design minor or permission of the instructor. Upon successful completion of this course, the student will be able to:
Apply the elements and principles of design in producing apparel
Identify construction terminology and techniques Write garment specifications, draft a pattern, develop prototype sample, and evaluate product
Identify design options for using pattern, fabric, and construction for differing body types
Identify the relationship
between designing and merchandising
Develop critical evaluation skills

## ATM 389. Fashion Trend

Analysis (3). Fashion forecasting; reflecting the acceptance or rejection of trends; analysis of socioeconomic, demographic, media, and fashion influences. Students will have an opportunity to travel to market. Formerly FCSA 389, students may not receive credit for both. Prerequisite: ATM 301.

Upon successful completion of this course, the student will be able to:
Assemble techniques and skills needed to research, report and analyze fashion trends Analyze the economic, cultural and social changes that influence fashion forecasting Summarize fashion and its influence on past, present and future lifestyles
Design a seasonal forecast Demonstrate and expand communication, writing, and presentation skills to enable students to have a competitive advantage in the fashion industry
Perform professional quality work using industry technology
ATM 396. Individual Study (1-6). May be repeated if subject is different.
ATM 397. Honors (1-12).
Prerequisite: admission to department honors program. ATM 398. Special Topics (16).

ATM 399. Seminar (1-5).
May be repeated if subject is different.
ATM 452. History of Fashion
(4). Historical changes in fashion and costume design from Egyptian period through Eastern civilization to present. Social, political, and religious influences on fashions. ATM 452 and TH 452 are crosslisted courses; students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Classify historic periods of costume by garment silhouettes, sleeve design, skirt shape, hat style, accessories and other specific details Distinguish recurring themes and concepts and understand the role of dress from a diverse, global perspective Analyze social, cross-cultural, environmental, geographic, and artistic influences on clothing through time
Recognize fashion legends and their influence as well as newcomers and
nonconformists-past and present
Employ terminology of historic clothing items
Further develop and
demonstrate communication,
writing, and presentation skills
to enable students to have a
competitive advantage in the apparel industry
Apply industry technology to execute professional quality work
ATM 485. International
Retailing (4). Emphasis on international retailing and global trade. Focus on crosscultural differences, work environments, policies, and regulations. ATM 485 and RMT 485 are cross-listed courses; students may not receive credit for both. Formerly FCSA 485, students may not receive credit for both. Prerequisite: RMT 330. Upon successful completion of this course, the student will be able to:
Distinguish key international retailing concepts, terminology, and decisionmaking areas.
Analyze and identify shifts and trends in demographics, information technology, monetary systems and Social/cultural values. Examine legal, political and ethical issues in international retailing.
Evaluate trade policy, the main instruments of trade policy, and their impact on retailers, consumers, and government. Analyze tactical planning in the global retail environment. Evaluate how global retail management decisions affect resources and sustainability. Describe the importance of organizational structures for global retailers and major entry strategies used by companies.

## ATM 487. Fashion

Merchandising Exit
Assessment (1). During the last quarter of their program, students are assessed on program outcomes and portfolios are created for internship and job interviews.

Formerly FCSA 487, students may not receive credit for both. Grade will either be S or U . Upon successful completion of this course, the student will be able to:
Construct a comprehensive portfolio that demonstrates and documents industry competencies Perform exit level oral communication competencies for the fashion industry Demonstrate senior level writing competencies for the apparel industry Create exit level visual display and trend presentation competencies for the fashion industry

## ATM 488. Fashion Line

Development (3). Production of an apparel line from conceptualization to completion. Design concepts will be executed through storyboards, identification of target market, merchandising strategy, and completion of muslin samples. A final project of three original designs will be showcased at the annual fashion show. May be repeated up to 6 credits. Prerequisite: ATM 388 or TH 361 and admissions to the apparel, textiles and merchandising major or minor or the apparel design minor or permission of the instructor.
Upon successful completion of this course, the student will be able to:
Demonstrate the required skill level for a chosen project including fabric selection, pattern, selection, fit and construction techniques Demonstrate research skills by investigating market trends in color, fabric, styling, and sources of inspiration Utilize the elements and principles of color and design to create a unified and harmonious apparel line for a target customer
Create and present a storyboard for apparel line
Create completed spec pack for apparel line

ATM 489. Merchandise Buying and Planning (4). Principles of buying and selling merchandise; analysis of consumer demand, stock inventories and open-to-buy. Formerly FCSA 489, students may not receive credit for both. Prerequisite: ATM 285 and RMT 330.
Upon successful completion of this course, the student will be able to:
Analyze merchandising
management and the duties of
a merchandising manager and
buyer
Outline merchandising
fundamentals and
merchandising strategies
Summarize the basic stock
method and model stock for fashion merchandise and staple merchandise
Outline the necessity for inventory control and inventory control methods Differentiate techniques to plan sales and generate sales forecasts
Recognize the importance and deduce the elements of open-to-buy
Assess elements in a six-month merchandise plan and generate a six-month merchandise plan
Examine the merchandise assortment concept and identify factors affecting assortment planning decisions
Compare and contrast the factors of locating and choosing resources/vendors in domestic and foreign markets Illustrate terms to be negotiated when placing an order and negotiating techniques
Summarize techniques used in placing an order and following up
Compare and contrast the difference between retail-based and cost-based pricing
Analyze and calculate markups, markup percent, retail dollars, cost dollars, mark downs, and discounts with variable factors
ATM 490. Cooperative
Education (1-12). An
individualized, contracted field
experience within the apparel
industry. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. 40 hours required per credit. May be repeated up to 20 credits. Prerequisite: ATM 379.
ATM 491. Workshop (1-6). Formerly FCSA 491, students may not receive credit for both. May be repeated for credit.
ATM 492. Apparel, Textiles and Merchandising Practicum (1-10). Supervised practicum experience for apparel, textiles and merchandising majors. May be repeated up to 15 credits. Course will be offered every year (Spring and Summer). Prerequisite: ATM 379. Upon successful completion of this course, the student will be able to:
Design an individual learning experience in apparel, textiles, and merchandising.
Report on progress toward completion of individual learner outcomes
Evaluate his or her own performance in the individualized learning experience Connect activities in his or her individual learning experience to his or her learner outcomes and demonstrate completion of those outcomes.
ATM 496. Individual Study
(1-6). May be repeated if subject is different.
ATM 497. Honors (1-12).
Prerequisite: admission to department honors program. ATM 498. Special Topics (16).

ATM 499. Seminar (1-5). AVM 296. Individual Study (1-6). By permission. May be repeated for credit.
AVM 298. Special Topics (1-
6). May be repeated for credit.

AVM 299. Seminar (1-5).
May be repeated if subject is different.
AVM 330. Aviation Law (3).
This course provides an introduction to aviation law, the legal system, and the principles of law and how they
may be applied to aspects of air transportation. Students must be junior standing or above to enroll in this class.
Upon successful completion of this course, the student will be able to:
Identify legal rights when interacting with an FAA inspector.
Explain appropriate actions to various aeromedical dilemmas Identify behaviors that generate potential tort liability. Describe the fundamentals of organizing and managing a business in order to avoid the most common legal pitfalls, and list the basic insurance needs for typical general aviation businesses
Describe the use of exculpatory contracts as a risk-management tools.
Identify legal responsibilities of airlines.
Differentiate aviation accidents from aviation incidents and describe required reports. Identify torts or acts of negligence committed be Federal employees that are covered by the Federal Tort Claims Act and government liability in the aviation system. Explain the decision-making process used for buying, selling and leasing aircraft. Identify the role of airports, pilots, and aviation employees in providing airport security. Describe how airports' needs and property owners' needs often clash, the legal protection afforded to each, and steps that airports can take to help protect them from closure.
Describe procedures for unionizing employees, negotiation contracts, and the process of taking disciplinary action against persons employed by the airlines.
AVM 332. Aviation
Legislation (4). History and evolution of aviation governmental regulatory agencies in the US and internationally, including FAA, ICAO, and homeland security. Agency organization and operation, and legislative acts
and treaties related to
enforcement of aviation
standards. Prerequisite: AVM 330.

Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the government's role in air transportation and early history including:
History of the National
Advisory Committee for
Aeronautics
The impact of the outbreak of
World War I and the need for air power
Funding of an innovative postal program which was to serve as the first model for commercial air operations
The Army's role in the Airmail
Act of 1925
Compare the following
including:
Government involvement assists the aviation industry growth through appointment of federal safety regulations.
The Air Commerce Act of
1926 and the Aeronautic
Branch of the government
The role of the Department of
Commerce in aeronautic
legislation
Bureau of Air Commerce and the Air Traffic Control Centers
Civil Aeronautics Act and the
Civil Aeronautics Authority
List and identify the
development of legislation post
World War II and identify
issues in responsibility
including:
The impact of World War II on aviation legislation
International Civil Aviation
Organization sets the
framework for future aviation
diplomacy
Federal government funds
airport programs to promote
airports
NASA
The National Transportation
Safety Board and the United
States Department of
Transportation's role in the
furtherance of aviation
legislation
Passage of the Federal
Aviation Act of 1958

The role of the Federal Aviation Agency
Airline Deregulation Act of 1978 and the elimination of the Civil Aeronautics Board Compare and contrast the issues and problems with the aviation legislation post 9/11/2001 including: The Transportation Security Act
Tile formation of the
Transportation Security
Administration
Government's role in passing
legislation to deter hijacking and terrorism
AVM 333. Air
Transportation (4). The air transportation system including facilities, regulations, and problems encountered in commercial transportation, airline operations, economic, ethical, and social considerations.
Prerequisite: English 101 with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Describe the political, economic, and social changes brought about by the advent and evolution of air transportation. Identify the Federal Legislation which created and governs the air transportation industry. Detail the effects (pros and cons) of the Airline Deregulation Act of 1978 on the industry, its employees, and its customers.
Describe the general functions and tasks of the DOT.
Become familiar with the general functions and tasks of the FAA and NTSB.
Become familiar with post -
deregulation air carrier regulations and requirements Describe the different types of airlines, the certification necessary for those types, and the agreements entered into by carriers.
Describe airline hierarchy.
Discuss the laws pertaining to
International Air
Transportation.

Describe the functions and duties of the various International Air Transportation Organizations. Discuss current and future trends in commercial space transportation Describe the typical management and organizational structure of air carriers.
Demonstrate an understanding of Air Carrier Marketing strategies and the complexities involved in determining ticket prices, forecasting demand, and scheduling crew and equipment.
Demonstrate a basic understanding of the accounting and financial analysis practices used by the Air Transportation industry. Demonstrate a basic understanding of the accounting and financial analysis practices used by the Air Transportation industry. Demonstrate an understanding of industry forecasts and fleet planning.
Demonstrate an understanding of the processes used by the airlines to determine fleet size and type.
Determine advantages and disadvantages of various commercial class aircraft.
Define general aviation.

## AVM 334. Airport

Management (3). Airport operations and management, including analysis of the role of the airport manager in planning, finance, and administration; public relations, social, political, and environmental considerations; operational requirements and facilities maintenance.
Upon successful completion of this course, the student will be able to:
Identify, compare and evaluate various airport types, functions and roles.
Explain the organizational structures and management functions at airports. Identify and summarize the most significant Federal Aviation Regulations. (FARs)
and other guidance related to airport operation or development.
Understand the management of airport operations, including airside facilities, landside facilities, airport maintenance, security and emergency activities
Explain the financial management process involved in airport management and capital improvement programming, including administration of airport improvement grants. Understand the use of planning tools available to the airport manager, including master plans, airport layout plans, aviation system plans, environmental assessments, business plans, land use and noise compatibility planning. Understand environmental and land use issues faced by airports, including federal, state and local regulation. Recognize the role of public input into airport management decision making and policy development.
Discuss the various elements of an airport's legal liability and responsibilities.
AVM 335. Aviation
Management (3).
Management of aviation activities, manpower, facilities, regulations, and flight operations.
Upon successful completion of this course, the student will be able to:
Describe and discuss the nature of aviation business organizations, including management structures and decision- making hierarchy. Identify and describe the profit function and the basics of accounting systems utilized by aviation business organizations, including balance sheets and profit and loss statements.
Identify and describe cost systems involved in aviation business organizations including fixed costs and variable costs.

Explain compare and contrast manpower management issues. Explain compare and contrast aviation related asset-financing techniques.
Identify and explain the legal environment of aviation business organizations including civil and regulatory issues.
Identify and explain the labor relations environment of aviation related business organizations.
Describe, discuss and demonstrate competence in airline load factor, seat-mile cost, block time evaluation and average ticket pricing.

## AVM 338. Airport

Administration and Finance
(4). The role of airport and airline in the aviation industry, including time value of money, risk and return, complex nature of costs (fixed, semi-fixed, variable and marginal). Analysis of financial statements as they apply to the overall financial health and revenue stream of an aviation organization such as an airport or airline. Prerequisite: AVM 334.

Upon successful completion of this course, the student will be able to:
Demonstrate the ability to recognize and identify: The basic theory and foundations of Airport and Airline Finance including methodology and practice. Identify the following including:
The elementary and theoretical foundations that underpin the role of finance in the airline industry such as the time value of money, the notion of risk and return, and the complex nature of costs (fixed, semifixed, variable, and marginal). Compare and contrast issues in ratio analysis including: An in-depth analysis of the role of accounting in airlines which includes the study of ratio analysis is used to further analyze airline financial statements

Analyze more advanced issues in finance as it applies to the aviation industry and aircraft including:
Compare and contrast practical applications of the theoretical ideas presented earlier; these applications include hedging, the buy versus lease decision for aircraft and the question of the valuation of assets (mainly aircraft).
Compare and contrast finance in terms of measurable criteria including:
Calculate airline industry specific metrics, such as cost per available seat mile (CASM) and revenue per revenue passenger mile
(RRPM).
Evaluate and analyze the role of capital and asset management including: Real world application of the financial theories learned as they apply to a case study of an airline company.
AVM 350. Aviation Career Planning and
Professionalism (3). Career planning as applicable to students pursuing careers in the air transportation industry. Prerequisite: junior standing or above.
Upon successful completion of this course, the student will be able to:
Give an integrated view of the aviation job search process.
Summarize the tasks necessary to secure employment in the aviation industry. Present the various career options available in the air transportation industry, including the role worker seniority plays. Summarize the job search process and demonstrate the practical needed experience using skills for a selected aviation career path. Students will demonstrate the role professionalism, motivation, and ethics play in an employment environment in the air transportation industry. Students will demonstrate working knowledge of the role worker union's play with
companies in the aviation industry.
Develop specific job objectives
and write an application letter for a specific aviation job. Prepare job search correspondence to include a resume, which highlights skills and individual strengths for a selected aviation career path. Practice interview skills for selected aviation career paths. Write a thank you letter for an interview.
Identify aviation specific resources available to obtain career information in the aviation industry. Develop oral and written communication skills.
Demonstrate the values and positive attitudes necessary for a successful career in the air transportation industry. Develop a sense of aviation professionalism, ethical standards from integrity, versatility, openness to change, curiosity, imagination, and creativity necessary to demonstrate to a potential employer the character traits of motivation, passion, and dedication.
Students will demonstrate working knowledge of a variety of selected aviation career paths
AVM 396. Individual Study
(1-6). May be repeated if subject is different.
AVM 397. Honors (1-12).
Prerequisite: admission to department honors program.
AVM 398. Special Topics (1-
6). May be repeated if subject is different.
AVM 399. Seminar (1-5).
May be repeated if subject is different.
AVM 417. Aviation Safety
Management (4).
Fundamentals of aviation safety program management.
Prerequisites: AVP 340 or enrolled in aviation management major/minor and junior or senior standing. Upon successful completion of this course, the student will be able to:

Distinguish between the general safety record of scheduled airlines, commuter, air taxi, and general aviation (GA), and between the geographic regions of North \& South America, Europe, Middle East, Asia and Africa. Identify the top three categories and top three causes of worldwide commercial jet fatal accidents.
Identify and explain (or define) key safety terms and concepts such as: occurrence (incident \& accident), hazard, "but for" test, proximate/root cause, blood priority, costbenefit, risk, known precedent, safety net, mulifactorial etiology, lethality index, substitution test, active failures, latent conditions, defenses-in-depth, event cascade, Heinrich's principle and just culture.
Identify and summarize historic aircraft accidents that played a significant role in the development of aviation safety, including, but not limited to, the following aircraft accidents: TWA DC-2, 1935; BOAC de Havilland Comet, 1950s; UAL DC7/TWA L-1049, 1956; EAL L1011, 1972; PSA 727/C-172, 1978; JAL B-747, 1985; DC-9/PA-28, 1986; AAL B757, 1995.

List and explain the insured and uninsured costs of an aircraft accident.
List and explain at least three major reasons for an aviation safety program.
Spell out over 65 common aviation safety-related acronyms and abbreviations used in this course.
List and explain the various methodologies and programs used to identify and control hazards in an aviation organization, including: surveys, safety audits, flight operations quality assurance (FOQA) programs, the aviation safety action program (ASAP), line operations safety audits (LOSA), threat \& error management strategies (TEM),
and, safety management systems (SMS).
Explain the significance of the various models of accident causation and describe the major features of each, including:
social pathology \& accident proneness, domino/causal chain, and ecological and systems models (pilot-aircraftenvironment, SHELL, 5M's, Reason's Swiss cheese model). Explain the major goals of an aviation safety program, including:
accident prevention and preparation, implementing safety standards, controlling hazards and safety education and promotion.
Explain and provide examples of how the "Safety Net" concept applies in an aviation setting, including: auditory \& visual warning systems,
TCAS!ACAS,
EGPWSITAWS,
EMAS\&BRS.
List and explain the major technological advances used to enhance aviation safety including a description of: TAWS/EGPWS, LLWAS, TDWR, ACASITCAS, ASDEX, ADS- B, EMAS, and FDR/CVR.
Describe the role of specific organizations and programs designed to enhance aviation safety including the role of: the FAA, the NTSB, NASA's ASRS program and the FAA'sIASA program. Describe the nature of the following hazards to flight and list best practices to mitigate them: maintenance errors, HAZMAT, wildlife strikes, FOD \& terrorism.
AVM 418. Threat and Error Management in Aviation (3).
Principles of Threat and Error Management (TEM) in aviation operations. Course will be offered every year (Winter, Spring). Co-requisite or Prerequisite: AVP 304. Prerequisite: AVP 340. Upon successful completion of this course, the student will be able to:

Define the major terms used in
the Threat \& Error
Management (TEM)
framework and recall examples of each from a major aircraft accident ( or accidents) discussed in class; to include: threat, error, violation, undesired aircraft state (UAS) and countermeasure. Summarize and explain the nature of the following major threats general aviation pilots and airline flight crew members face: aircraft malfunctions ( engine failure, engine/cabin fire), adverse weather (aircraft icing, LLWS, turbulence, VFR-into-IMC), loss of aircraft control (spatial disorientation, high altitude flight), and collisions (RE, R1, MAC, CFIT).
Distinguish between the six different approaches to explaining human error and describe the major components of James Reason's model of accident causation.
Identify the major defensive countermeasures designed to assist in identifying, avoiding and mitigating threats, errors and undesired aircraft states to include: SOP adherence; flows \& checklist discipline, callouts, \& workload management; distraction management \& sterile cockpit compliance; monitoring \& automation management; crew briefings; stabilized approaches. Identify and describe "best practice" countermeasures to reduce the effects of the following threats: aircraft malfunctions ( engine failure, engine/cabin fire), adverse weather (aircraft icing, LLWS, turbulence, VFR-into-IMC), loss of aircraft control ( spatial disorientation, high altitude flight), and collisions (RE, R1, MAC, CFIT).
AVM 420. Aviation Labor
Relations (4). Overview of aviation industries and development of US labor law and policy, including statutory, regulatory, and case laws in airline and corporate aviation. Principles, practices and
procedures in collective bargaining and dispute resolution; and the changing airline labor relations environment. Prerequisite: AVM 330.
Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the history of aviation between 1900 and 1930s:
The Railway Labor Act of 1926
The role and scope of the economics in with the onset of aviation.
Aviation and the role of pilots during these early years
The role of the post office and private contractors with respect to the development of safety standards for pilots and passengers
The creation of the ALPA
Demonstrate an understanding of the history of direct government regulation of the airline industry 7 between 1938 and 1978
Civil Aeronautics Act of 1938
The problems and issues with government regulation.
Labor relations in the early
years
Government policy and concerns regarding the airline industry
Compare and contrast the paradigm shift that after government deregulation
Airline Deregulation Act of 1978
Dilemmas which included bankruptcy of major airlines ALPA and the Braniff financial downfall
Delta business model
The post deregulation
corporate and the fall of
traditional labor/relations List the reasons and outcomes relating to the Continental Strike
The ALPA during the Reagan
Administration
ALPA and The Lorenzo Wars-
The Bildisco Decision
Compare the various labor relations involving labor strikes
The United strike of 1985

Government and anti-labor movement
The Election of 1986 and
Political mergers
The Eastern Airlines strike
Analyze the various modern issues in labor relations Modern day labor disputes and lawsuits.
International disputes and resolution
Airline safety issues as they relate to labor disputes Negative impacts to pilots and their careers
AVM 422. Legal Ethics in
Aviation (4). Aviation ethical issues relative to the deregulation act of 1978 . Government and industry roles in aviation employee responsibility, diversity, airport ground issues, air traffic control and security, health and the environment, and crew/passenger safety. Prerequisite: AVM 330. Upon successful completion of this course, the student will be able to:
Demonstrate the ability to recognize and analyze, with respect to ethical theories: Dilemmas and decisions that may arise in aviation Capitalism and assessing the merits and limitations of the industry
Theories in choice making such as: consequentialism, deontology or duty based
Decision Making
Seven Step Reasoning Process
Identify the following
including:
Governance of the
international aviation
Pricing and challenges facing
airline managers and
consumers
Outsourcing under systems
integration: long run benefits for Boeing and other aircraft producers
Outsourcing maintenance: A
union perspective
Compare issues in responsibility including:
Whistleblowing in Aviation
Ethic and FAA inspectors
Danger of capture in the FAA

Competing wisely-unity of pilots
Ethics from the perspective of
a flight attendant
ValuJet 592 and corporate
responsibility
Analyze issues involving
diversity as it applies to
aviation including:
Racial discrimination against pilots
Gender and racial barriers in
flight training
Diversity recruiting in aviation
maintenance
Safety, economic favoritism
Age discrimination and the
FAA age 60 rule
Compare and contrast common problems in airports, ATC and security, such as:
Conflicts with the location and operation of airports
Case study of the Chicago
O'Hare
Politics of airport expansion
Air traffic control
TSA and risk management
Identify the ethical issues associated with the health and environment as it pertains to the aviation industry including:
Ethical issues in aviation medicine
Environmental concerns in general aviation: Avgas and Noise Pollution
Greenhouse gas emissions, persistent contrails and commercial aviation Ground-level pollution, invasive species and emergent diseases
AVM 424. Aviation Security
(4). Airport security systems, protection criteria, crime prevention, perimeter security, and access control. Policies and procedures forming security infrastructure required by Department of Homeland Security and the TSA to maintain a secure air transportation system. Prerequisite: AVM 333. Upon successful completion of this course, the student will be able to:
Students will be able to
identify and summarize the
historic terrorist incidents
discussed in class that played a
significant role in the development of security programs as they relate to the various modes of transportation to include, but not limited to: September 11, 2001 (World Trade Center); April 18, 2983 (Beirut,
Lebanon); December 21, 1988
(Lockerbie, Scotland);
February 26, 1983 (World
Trade Center); April 19, 1995
(Oklahoma City); March 11,
2004 (Madrid, Spain)
Students will be able to
identify various terrorist groups and how they played a role in history
Students will be able to summarize the strengths and weaknesses of the various modes of transportation (air, rail, waterways, road, pipeline) as they relate to terrorist activity
Students will describe the history of the formulation of the Department of Homeland Security and how it relates to present day policy and procedure
Students will be able to discuss the history of the formulation of the Transportation Security Administration and its current applications
Students will be able to summarize the security requirements for the different modes of travel described by International Civil Aviation Organizations (ICAO) Security Requirements, Transportation Security Administration (TSA), Department of Homeland Security (DHS), United States Coast Guard

## AVM 426. International

 Aviation Management (4). International aviation management and policy, including cross-cultural challenges, interpersonal relationships in a diverse domestic and foreign environment, and evolving global trends. Managing workforce diversity from a culture-based perspective, including social responsibility, ethics, and environmentalinterdependence. Prerequisite: AVM 335.
Upon successful completion of the course, the student will be able to:
Assess the challenges of aviation related international business as influenced by globalization, regional trade blocks, international organizations, privatization, Information technology, and workforce diversity. Evaluate the impact of political, economic, technological, financial and legal environments to which aviation related international business' are exposed. Evaluate the role of culture as it pertains to aviation related international business. Interpret international aviation policies as they apply to global business and organizations. Demonstrate negotiation and decision-making principles as they apply to aviation related businesses operating in an international environment. Determine the influence of international aviation policies on organizational design. Assess various ways and methods of motivating and managing multicultural workforces.
Evaluate the impact of international aviation policies on regional air transportation. Analyze global market import and export procedures as they are influenced by international aviation policies.

## AVM 430. Airport/Airline

Marketing (4). Basic
economics and marketing principles of airports, airlines, and aviation business within air transport value chain. New principles including inclusive advertising, marketing to the connected traveler online, offline advertising, and social media. Prerequisite: AVM 335. Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the airport enterprise including:

The role and scope of activities in airport marketing strategies The air transport value chain The airports technical core business
Identify the new marketing strategies that modern airports are implementing which includes:
Why the traditional airport is unable $\backslash O$ compete
New business designs that better fir shifting priorities of both current and new end customers
The shift to diversification of 'non-aviation' related activities The marketing driven paradigms for airport enterprises aviation- related business
Compare and contrast the paradigm shift that modern airports must make to stay within a competitive market and includes the following: Basic economics of the airport business with the air transport value chain
Two main strategic business units (SB Us) and (SBC s) of modem airport enterprises the aviation and non-aviation related ones such as Airport Loyalty programs
Achieving sustainable growth for the commercial airport List security issues post $9 / 11$ as they relate to the financial health of the airport including: International ruling bodies who are now putting into practice security measures meant to reduce terrorist threats The September 11, 2001 attacks and how they changed the traditional marketing strategies
How to construct an airport marketing plan Compare the historical marketing trends of airline marketing including: How airlines are engaging the modern consumer as opposed to the traditional years ago New principals including: inclusive advertising, marketing to the connected traveler online and offline advertising ie social media

Crowd-sourcing and location
based campaigns
Analyze the various modern marketing techniques including:
Viral videos around brand name recognition Social loyalty and gamification The use of meme jacking and deep association with the internet culture
The focus is now on real people instead of super models and actors
More personalization of airline staff
Compare and contrast certain methods of new and modern marketing as well as the consumer:
Flash mobs and the viewing potential of millions of people world wide
Onboard events such as themed
flights ie, Angry Birds or Mile-
High Fashion Show
Surprise gifts
No more clutter advertising
WI-FI availability
The Southwest Airline
marketing model
Other airlines marketing models
AVM 434. Airport
Operations (3). Prerequisites: AVM 333 and AVM 334. Upon successful completion of this course, the student will be able to:
Identify, compare and evaluate various airport operational components.
Explain the organizational structures and management functions at airports. Describe the relationships between airport, airline and users.
Identify and summarize the most significant Federal Aviation Regulations (FARs) and other guidance related to airport operation or development. Understand the management of airport operations, including airside facilities, landside facilities, airport maintenance, security and emergency activities.
Describe environmental and land use issues faced by
airports, including federal, state and local regulation Recognize the role of public input into airport management decision making and policy development.
AVM 438. Airport Planning and Design (4).
Methodologies necessary to the planning and design of airports. Prerequisite: AVM 434.

Upon successful completion of this course, the student will be able to:
Describe basic design considerations used in airfield pavement, drainage, and associated facilities. Apply methodologies used in various types of aviation planning including: aviation system plans, airport master plans, environmental studies and land use plans. Demonstrate an understanding of the role and significance of land use planning as related to airport planning and operations.
Apply primary components of airport master plans including inventory, forecasting, facility requirements, demandcapacity, development alternatives analyses, capital improvement programming, and development of airport layout plans (ALP) to real world scenarios Describe the role and significance of federal environmental planning requirements (NEPA) as related airport planning and development.
Identify, compare and evaluate various airport facility components and the principles of airport geometry. Apply FAA design standards commonly used in airport planning. Apply FAR Part 77 - Objects Affecting Navigable Airspace for airspace planning and evaluate aircraft performance requirements in relation to airport planning.
AVM 490. Cooperative
Education (1-12). An individualized, contracted field
experience with business, industry, government, or social service agencies. This contractual arrangement involves a student-learning plan, cooperating employer supervision, and faculty coordination. Prior approval required. May be repeated up to 20 credits. Grade will either be S or U .
AVM 496. Individual Study (1-6). By permission. May be repeated for credit.
AVM 497. Honors (1-12). Prerequisite: admission to department honors program.
AVM 498. Special Topic (1-
6). May be repeated for credit. AVM 499. Seminar (1-5).
May be repeated for credit.
AVP 101. Private Pilot Flight Laboratory I (2). Basic flight maneuvers, solo flight in local area, and introduction of maximum performance takeoff and landing procedures. Course will be offered every year (Fall, Winter, Spring, Summer). Co-requisite: AVP 141.

Upon successful completion of this course, the student will be able to:
Safely start, taxi, take-off, land, and shut-down the aircraft. Recognize hazardous flight attitudes and safely recover Analyze systems failures and choose appropriate course of action to correct or mitigate Demonstrate satisfactory aeronautical knowledge required to conduct safe solo flights within the traffic pattern
AVP 102. Private Pilot Flight
Laboratory II (2). Plan and conduct cross-country flights and perform short-field and soft-field takeoffs and landings. Course will be offered every year (Fall, Winter, Spring, Summer). Upon successful completion of this course, the student will be able to:
Take off and land the training airplane on short and soft fields Recognize hazards involved in operating at night and safely plan night flight operations

Using all available resources, plan and execute cross country flights in the National Airspace System
Plan and execute a diversion to an alternate airport while maintain control of the aircraft in flight
Operate the aircraft by reference to the instruments without outside visual cues
AVP 103. Private Pilot Flight Laboratory III (2). Perform private pilot operation at a standard to obtain the private pilot certificate. Course will be offered every year (Fall, Winter, Spring, Summer). Upon successful completion of this course, the student will be able to:
Using all available resources, plan and execute cross country flights in the National Airspace System
Demonstrate the knowledge, skill, and aeronautical experience necessary to meet the requirements for a private pilot certificate with an airplane category rating and a single-engine land class rating AVP 104. Intermediate Pilot Flight Laboratory (1). Flight operations for recurrent and standardization training for professional pilot degree. May be repeated up to 3 credits. Grade will either be S or U . Upon successful completion of this course, the student will be able to:
This lower division flight lab allows student to apply for financial aid to either finish flight training for a required course of training in the major or pursue recurrent or standardization training. Whatever the type of training, the student must demonstrate flight proficiency in accordance with FAA requirements.
AVP 131. Introduction to Aviation (1). Introduction to basic concepts in aviation and career opportunities within the field of aviation. Course consists of guest speakers from across the aviation industry. Open to both aviation and non-
aviation majors and non-degree seeking students. Course will be offered every year (Fall, Winter, Spring, Summer). Upon successful completion of this course, the student will be able to:
Describe the basic concepts of aviation.
Identify career opportunities available to aviation students
Outlines a wide variety of aviation related careers that are presented through Guest lectures delivered by aviation experts.
Summarize aviation professionalism as it pertains to their field of choice
AVP 141. Principles of Flight
I (4). Basic knowledge of airplanes and systems, aerodynamics, flight safety, airports, aeronautical charts, airspace, radio
communications, air traffic control services, and aviation regulations. Minimum Brequired to continue flight training and to earn graduation certificate. Course will be offered every year (Fall). Corequisite: AVP 221.
Upon successful completion of this course, the student will be able to:
Describe how aerodynamic principles affect basic flight performance of a typical light airplane.
Identify and describe the operation of the major components and systems of a typical light training airplane. Recognize and recall the various U.S. Federal aviation regulations applicable to Private Pilot flight operations. Correctly describe basic VFR weather minimums.
Identify procedures and recognize general airport layout, signs, markings, and visual aids, and interpret basic airport symbols on aeronautical chart excerpts.
Recognize the effects of the human physiological and decision-making limitations on flight safety and identify the strategies needed to counter them in flight.

Identify the correct radio communication procedures and ATC services for VFR airspace in the U.S. National Airspace System.
Describe the basic meteorological processes and weather hazards applicable to the flight environment.
AVP 142. Principles of Flight
II (4). Basic knowledge of airplane performance and loading, preflight planning including weather analysis, visual and radio (VOR/ADF) navigation, flight physiology, and aeronautical decision making. Preflight planning for cross-country flights. A grade of B- is required for an FAA graduation certificate.
Prerequisite: AVP 141. Corequisite: AVP 211.
Upon successful completion of this course, the student will be able to:
Determine various airplane performance parameters and loading values using charts, graphs, and tables provided by the manufacturer in the Pilot Operating Handbook of a typical light training airplane. With the aid of a checklist, plan a typical VFR crosscountry flight, which includes the analysis of aviation weather reports and forecasts provided in graphical and alphanumeric formats, and accurately complete a VFR Navigation Log and Flight Plan form. Describe the principles of pilotage, dead reckoning, and basic radio navigation (including VOR \& ADF). Discuss the basic physiological limitations applicable to private pilot flight operations and identify the appropriate actions to reduce or eliminate their effects.
Discuss and describe aeronautical decision making.
AVP 201. Instrument Pilot
Flight Laboratory I (2).
Altitude control by instrument reference only, use of full and partial panel, and radio navigation. Student must show proof of possession of a Private Pilot Airplane, Single Engine

Land certificate in order to be enrolled. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: AVP 103 or department approval. Upon successful completion of this course, the student will be able to:
Demonstrate proper instrument
flight preflight procedures Demonstrate proficiency in basic full panel attitude instrument flying
Demonstrate recoveries from unusual attitudes utilizing full and partial panel Correctly compute time for standard rate turns to a heading; and approximate compass heading to compensate for dip error Demonstrate power off and power on stalls and recoveries utilizing partial panel Demonstrate VOR and ADF orientation and tracking Compute time, speed, and distance from station
AVP 202. Instrument Pilot Flight Laboratory II (2). IFR approaches and holding patterns. Course will be offered every year (Fall, Winter, Spring, Summer). Upon successful completion of this course, the student will be able to:
Determine proper holding entry and holding techniques for VOR and NDB holding patterns
Interpret position on DME arcs and maintain DME arc to predetermined course intercept Perform a VOR, an NDB, and an ILS approach Perform circling, straight in, and missed approach procedures
Perform a partial panel nonprecision instrument approach procedure
Perform a stage check with stage check pilot.
AVP 203. Instrument Pilot Flight Laboratory III (2).
Perform all IFR maneuvers and procedures to FAA instrument rating practical test standards. Course will be offered every
year (Fall, Winter, Spring, Summer)
Upon successful completion of this course, the student will be able to:
Demonstrate proper preflight planning for an IFR cross country flight, utilizing instrument departure procedures
Perform a VOR, an NDB, and an ILS approach Perform circling, straight in, and missed approach procedures
Respond to simulated radio, instrument, equipment, engine, and systems failures with appropriate emergency response Demonstrate appropriate aeronautical decision making and judgment appropriate for an instrument pilot

## AVP 211. Meteorology for

Pilots (4). Meteorological processes and weather hazards
applicable to the flight environment.
Upon successful completion of this course, the student will be able to:
Calculate upper level temperatures using known lapse rates and surface temperatures, and convert temperatures between Celsius and Fahrenheit using the rough approximation conversion formula.
Identify the characteristics of the "standard atmosphere" including lapse rate, temperature, pressure, and tropopause height; calculate the temperature at any altitude in the standard atmosphere. Recognize the effects of the seasons on the temperature distribution in the atmosphere and identify four major ways energy is transferred in the atmosphere.
Differentiate between the different types of pressure systems, interpret wind speed symbology for a given station plot and predict general wind flow speed and direction by interpreting isobar spacing around highs and lows as
indicated on a surface weather chart.
Calculate the amount and direction of indicated altitude error for any given incorrect altimeter setting, recognize the effects of nonstandard temperature on altimeter indications, and identify the factors that affect density altitude.
Explain what causes wind and identify factors that affect its speed and direction. Distinguish between the characteristics - both speed and direction - of surface winds and geostrophic winds above the friction layer. Determine approximate heading corrections needed to maintain a given track when flying to and from a high or low pressure system and when flying through a frontal zone. Identify the factors that determine the stability of the atmosphere and differentiate between the characteristics of stable and unstable air, to include turbulence, visibility, type of cloud and precipitation. Compare temperature/dew point scenarios to determine water vapor content, capacity and relative humidity.
Recognize the characteristics of the different kinds of fog and the characteristics of low, middle and high strato- and cumulo-type clouds, and use a formula to determine the approximate the base of convective clouds using surface temperature/dew point values.
Recognize the difference between obscurations and layers aloft in METAR observations and list the abbreviations used for the various cloud and precipitation types.
Identify the difference between runway visual range (RVR) and tower, prevailing and runway visibility. Contrast the weather phenomena that occur when a 'typical' cold front or 'typical' warm front passes a location, to include speed, frontal slope
steepness, temperature, stability, pressure and wind change, visibility and cloud type; and recognize the signs of approaching freezing precipitation associated with a frontal system.
Name the various causes of thunderstorms and identify the characteristics of the three stages of their development. Recall the different types of thermally-driven winds and recognize the signs of mountain lee waves.
Define low level wind shear (LLWS), identify the characteristics of the different sources of LLWS, and recognize the effects of decreasing and increasing performance shears on aircraft performance.
Identify the various sources of in-flight turbulence, including thermal, mechanical, frontal, thunderstorm, mountain wave, jet stream and clear air turbulence (CAT); distinguish between the different FAAturbulence intensity definitions.
Name the different types of airframe icing and recognize its effects on aircraft performance. Using materials presented in class, identify hazardous weather conditions and determine methods to avoid them.
AVP 221. Aircraft Systems I

- Reciprocating (4). Light training aircraft engines, propellers and engine systems, flight controls, fuel systems, instrumentation, tires, wheels and brakes. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: AVP 141.
Upon successful completion of this course, the student will be able to:
Develop primary principles of mathematics useful in evaluating physical properties of systems.
Develop primary principles of physics applicable to study of aircraft systems.

Demonstrate a working knowledge of aircraft engine types and construction Discuss, analyze, and synthesize reciprocating engine theory of operation. Discuss, analyze, and synthesize basic engine lubrication and cooling concepts and systems Demonstrate a working knowledge of aircraft propellers and governors, including operation and maintenance
Discuss and analyze principles of electricity, magnetism, electrical and magnetic fields, and electronics. Discuss and analyze aircraft electrical system components Demonstrate a working knowledge of aircraft electrical systems, including operation and troubleshooting Demonstrate working knowledge of aircraft fuel systems, including operations and troubleshooting. Discuss and analyze aircraft flight control systems. Discuss and analyze aircraft instrumentation. Synthesize knowledge and understanding of basic systems for the aircraft used for training.

## AVP 237. Outdoor Survival

for Pilots (1). Basic
introduction to outdoor wilderness survival for flight crew. Course will be offered every year (Fall, Summer). Prerequisite: AVP 142. Upon successful completion of this course, the student will be able to:
Explain the basic principles of aircraft crashworthiness, including the factors in the acronym CREEP.
Describe the aircraft and terrain variables that influence the conduct of an unscheduled forced landing.
Identify and/or explain the fundamental principles of outdoor wilderness survival and facilitating rescue, including: post-crash survival factors, physiological and first aid priorities, shelter from
environment, food and water procurement and facilitating rescue (SAR).
AVP 241. Instrument Flight I
(4). Aircraft instruments, basic attitude instrument flying, navigation, regulations, procedures, and ADM for the instrument pilot. Private Pilot
ASEL required to enroll.
Department permission.
Minimum B- required to continue flight training and to earn graduation certificate. Course will be offered every year (Fall and Summer). Upon successful completion of this course, the student will be able to:
Describe Human Factors associated with instrument
flight, recognize hazards associated with instrument flight, and apply appropriate SRM, ADM, and risk management
Describe aircraft flight instruments and their systems and identify systems failures Analyze and interpret instrument presentations to indicate flight attitude and condition
Interpret navigation instrument readings to determine aircraft position.
Describe the National Airspace
system and determine
instrument services available
from published aviation
sources.
Demonstrate an understanding of the Air Traffic Control
system as it pertains to instrument pilots
Copy and interpret ATC
Clearances
Interpret and apply appropriate
sections of the Federal
Aviation Regulations,
Airport/Facility Directory and
Aeronautical Information
Manual
Exhibit behavior appropriate for an aviation professional.
Comply with minimum FAA
standards for course
completion
AVP 242. Instrument Flight
II (3). Procedures for IFR
departure, enroute and arrival
operations. Preparation for

FAA aeronautical knowledge exam. A minimum grade of $B$ is required for an FAA graduation certificate. Prerequisite: AVP 241. Corequisite: AVP 312.
Upon successful completion of this course, the student will be able to:
Determine the proper holding entry and interpret navigation instruments to determine aircraft position in relation to a holding fix.
Interpret En Route and STAR arrival charts and be able to correctly identify transitions from the en route phase to the approach phase of flight. Interpret arrival procedures Identify the various approach segments of precision and nonprecision approaches; interpret information from the heading section, plan view, and profile view; identify stepdown fixes and visual descent points, and determine take off procedures and minimums, approach category and minimum descent altitudes, and visibility requirements on both NOS and Jeppesen approach charts. Interpret Instrument approach charts including straight in and circling approaches, radar vectors course reversals, timed approaches from a holding fix, side step maneuvers, visual and contact approaches, and missed approach procedures. Interpret textual and graphic information from VOR, NDB, GPS, and RNAV instrument approach charts.
Interpret weather reports and forecasts and determine suitability for planned flight Recognize factors in the IFR Decision Making Process and describe the procedures to be followed in the event of an emergency.
Plan an IFR cross country
flight with approaches at several airports.
Note: SQ homework is mostly scenario based.
AVP 296. Individual Study (1-6). By permission. May be repeated for credit.

AVP 298. Special Topics (1-
6). Course content identified by title in the university class schedule. May be repeated for credit under different titles
AVP 299. Seminar (1-5). May be repeated if subject is different.

## AVP 304. Commercial Pilot

 Flight Laboratory I (2). Plan and conduct VFR crosscountry flights using pilotage, dead reckoning, and radio navigation. Night flight operations. Course will be offered every year (Fall, Winter, Spring, Summer). Coor Prerequisite: AVP 354. Upon successful completion of this course, the student will be able to:Interpret weather briefings to make a safe go/no-go decision Plot and execute VFR cross country flights using all three forms of navigation
Develop awareness of hazards associated with night flying and best practices to reduce risk.
AVP 305. Commercial Pilot Flight Laboratory II (2).
Operation of complex aircraft and basic knowledge of advanced commercial maneuvers. Course will be offered every year (Winter, Spring, Summer).
Upon successful completion of this course, the student will be able to:
Take off and land the training airplane on short and soft fields Power Off and On stall recoveries, demonstrate chandells, lazy eights, eights on pylons, and steep spiral maneuvers
Demonstrate the proper use of complex systems including retractable landing gear, flaps, and a constant speed propeller
AVP 306. Commercial Pilot
Flight Laboratory III (2).
Review of instrument procedures ASEL. Perform flight maneuvers and procedures to FAA commercial pilot ASEL practical test standards. Course will be offered every year (Spring, Summer)

Upon successful completion of this course, the student will be able to:
Review instrument procedures and demonstrate instrument proficiency in a single engine airplane.
Demonstrate consistent
accuracy for all ASEL
commercial maneuvers
AVP 308.
Instrument/Commercial Pilot
Flight Laboratory (1). Flight
operations for recurrent and
standardization training for Instrument/Commercial Pilot transition. May be repeated up to 3 credits. Grade will be S or U. Department permission. Upon successful completion of this course, the student will be able to:
Perform maneuvers and/or tasks to FAA practical test standards or to FAA FAR61 currency standards as appropriate.
AVP 312. Aviation Weather Services (3). Comprehensive analysis of weather service for flight crews, including interpretation of applicable alpha-numeric and graphic weather reports and forecasts. Co-requisite: AVP 241.
Upon successful completion of this course, the student will be able to:
Decipher and interpret aviation weather reports provided in graphical and alphanumeric format by the Federal Aviation Administration (FAA) and the National Weather Service (NWS) at the level required for U.S. Commercial \& Airline Pilot certification.
Decipher and interpret aviation weather forecasts provided in graphical and alphanumeric format by the Federal Aviation Administration (FAA) and the National Weather Service (NWS) at the level required for U.S. Commercial \& Airline Pilot certification.
Identify the various sources from which up-to-the-minute aviation weather information can be obtained for a given flight.

Decipher, interpret and analyze aviation weather reports and forecasts and apply this information to determine the suitability of, and weather conditions for, a simulated cross- country IFR flight in a light airplane
Decipher, interpret and analyze high altitude weather data provided in graphical and alphanumeric format. Thoroughly explain one weather hazard and how it can be effectively managed by flight crew.
AVP 319. Applied
Aerodynamics (3). Theories of flight and flight factors including airfoil shape, drag, velocity, lift and thrust, stability and control. Corequisite: AVP 242.
Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the four forces acting on an airplane in flight. Explain the major theories used to explain lift on an airfoil. Describe the effect of angle of attack and airspeed on the lift and drag characteristics of a wing.
Demonstrate an understanding of the principles of propulsion. Explain the major factors contributing to stability and control.
Summarize the principles basic principles of high speed flight.
AVP 321. Aircraft Systems -
Turboprop (3). Introduction and familiarization of turbine engines and turboprop aircraft systems. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisites: AVP 221 and AVP 354.
Upon successful completion of this course, the student will be able to:
Discuss and analyze aircraft turbine engine design and construction.
Discuss and analyze turbine engine theory of operation. Discuss and analyze turbine engine lubrication and cooling

Discuss and analyze aircraft propellers and governors. Discuss and analyze common turbine electrical systems. Discuss and analyze aircraft hydraulic and pneumatic systems.
Discuss and analyze aircraft fuel systems.
Discuss and analyze aircraft
flight control systems.
Discuss and analyze aircraft instrumentation.
Discuss and analyze advanced avionics and autopilot systems.
AVP 322. Aircraft Systems II
(3). Complex aircraft systems. Prerequisite: AVP 221.
Upon successful completion of this course, the student will be able to:
Expand on their knowledge of principles of mathematics useful in evaluating physical properties of systems. Expand on their knowledge of principles of physics applicable to study of aircraft systems. Demonstrate a working knowledge of various aircraft powerplants, including theory, components and operation Discuss, analyze, and describe complex propeller systems and operation
Discuss, analyze, and describe fuel and fuel injection systems Compare and Contrast differences between normally aspirated, supercharging, and turbo charging
Discuss, analyze, and describe pressurization and high altitude operations
Demonstrate a working knowledge of aircraft electrical systems, including operation and troubleshooting Discuss, analyze, and describe Hydraulic and Pneumatic Systems (deicing/anti-icing) Discuss, analyze, and describe the various types of aircraft structures and flight controls Discuss and have a general knowledge of turbine engine design and operation
AVP 323. Advanced
Navigation (3). Advanced navigation systems, their function, operation and
application. Prerequisite: AVP 354.

Upon successful completion of this course, the student will be able to:
Discuss and analyze GPS and WAAS theory.
Discuss and analyze G1000
system components.
Discuss and analyze G1000
PFD function and operation.
Discuss and analyze G1000
MFD function and operation.
Discuss and analyze
communication radios and
audio panel function and operation.
Discuss and analyze engine indication system.
Discuss and analyze flight planning using the G1000. Discuss and analyze autopilot and flight director function and operation.
Discuss and analyze system failures.
AVP 331. National Airspace
System (3). The national air traffic control system, control procedures, the integration of centers, approach
communications, navigation procedures, radar operations, and facilities.
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of the history and evolution of the national airspace system (NAS)
Be able to describe and graphically depict physical dimensions and aeronautical chart depiction of each class of airspace in the ICAO airspace classification system.
Be able to explain
communications, navigation equipment, weather, and flight
rule requirements pertinent to each class of airspace in the ICAO system.
Be able to describe and understand the Air Traffic Control structure, communications, procedures, and the theory and fundamentals of ATC radar. Explain how an operating Control Tower functions, the various duties assigned to

Control Tower personnel, and how they coordinate their duties to control aircraft. Describe and understand radar separation, oceanic and international Air Traffic Control, the future of ATC, and FAA involvement in ATC functions
AVP 332. Aviation History
(3). Major developments in the history of powered flight. Includes perspectives from civilian, military, international, and air carrier operations. Prerequisite: ENG 101 with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Become familiar with the
aircraft, persons, and events in aviation history.
Demonstrate an understanding of significant events, persons, and aircraft in aviation history, which led to the development of aviation as we know it today.
Describe a historical aviation
event, person, or aircraft. Note: no papers allowed on the Wright Brothers, Amelia Earhart, or Charles Lindberg. Display recognition of the contributions of minorities to the development of aviation.

## AVP 337. Aviation

Physiology and Survival (4).
Physiological aspects of flight crew performance, including effects of high altitude, accelerations, disorientation, and fatigue. Basic introduction to wilderness survival. Prerequisites: AVP 141 and AVP 142.
Upon successful completion of this course, the student will be able to:
Describe the physiological effects of high altitude on pilot performance and identify strategies necessary to avoid or effectively manage them, including:
Hypoxia, trapped \& dissolved gas(DCS)
Cabin environmental factors (vibration, humidity, radiation, ozone)

Summarize the major visual perceptual limitations that affect pilot performance and identify strategies necessary to effectively manage them, including:
Visual identification of aircraft (see\& avoid concepts), visual illusions, visual flight in impoverished conditions (night , reduced visibility, flat light) Explain the non-visual sensory systems which are responsible for giving humans their sense of spatial orientation, identify the various illusions that may manifest themselves when outside visual references are diminished, and identify the strategies necessary to effectively overcome these illusions, including; Vestibular and somatosensory systems, somatogyral illusions, somatogravic illusions Describe how individual health choices may affect pilot performance in flight, including: medication, alcohol \& drugs, diet, exercise and physical fitness Summarize the effects of fatigue on pilot performance and identify alertness management strategies necessary to reduce its effects, including: circadian dysrhythmia, time awake, sleep debt, insomnia, sleep disorders, scheduling, a nd commuting practices.
Provide examples of how physiological limitations have contributed to aircraft accidents and/or incidents, including: hypoxia, visual illusions \& visual flight at night, spatial disorientation, and fatigue . Describe the physiological effects of increased accelerations (+Gz \& - Gz) on pilot performance, including: greyout, blackout, redout, Ginduced loss of consciousness (GLOC).
Identify and explain the fundamental principles of surviving an aircraft accident
and facilitating rescue, including: aircraft crashworthiness \& crash
survival factors, physiological \&first aid priorities, shelter from environment, food \& water procurement and facilitating rescue (SAR)
AVP 340. Human Factors in
Flight (5). Physiological and psychological aspects of flight crew performance. Course will be offered every year (Fall, Spring). Prerequisite: AVP 241.

Upon successful completion of this course, the student will be able to:
Describe the physiological effects of hypoxia, trapped gas and dissolved gas (DCS) on pilot performance and list or identify strategies necessary to avoid or effectively manage them.
Identify or describe the major visual and auditory perceptual limitations that affect pilot performance and the strategies necessary to effectively manage them, including: midair collision avoidance, visual illusions, impoverished visual conditions and communication difficulties. Compare and contrast the limitations of the vestibular and somatosensory systems and identify the somatogyral and somatogravic illusions they create that lead to spatial disorientation (SD). Analyze the effects of noise, poor health choices, fatigue and sleep disruption, and acceleration on pilot performance and identify strategies necessary to reduce their effects. Summarize specific examples of how physiological, perceptual, and cognitive limitations, as well as difficulties with automated systems, have contributed to aircraft accidents and/or incidents. Critique specific examples of how inadequate flight deck design has contributed to errors made by flight crew and describe principles and/or examples of controls and/or displays that are designed to reduce error.

Appraise ways to reduce the effects of distractions and forgetfulness on the flight deck.
Evaluate decision biases, while recall and explain the five hazardous attitudes and their antidotes, and discover their own personal hazardous attitude tendencies.
AVP 348. Air Carrier
Operations (4).
Familiarization and utilization
of Company Operations
Manual excerpts, Operations
Specifications, and Minimum Equipment Lists, and the Code of Federal Regulations (CFR), Hazardous Materials (HMR) part 175, CFR parts 119, 120, 121, and NTSB830 to determine safety of flight and compliance with company policies and procedures and federal regulations. Exposure to multi-crew environment and expectations of professional behavior for flight crews. Prerequisite: AVP 354. Upon successful completion of the course, the student will be able to:
Utilize FAR 119 and 121 to determine required contents of operations specifications for an FAR121 domestic operation Utilize FAR 119 and 121 to determine required management personnel Utilize a sample company manual to aid in pre- flight, inflight, and post-flight planning \& decision making Recognize acceptable and unacceptable flight and duty assignments
List required instruments, radios, and equipment required for specified operations Determine dispatch status for an aircraft with inoperative equipment.
Differentiate and describe information included in dispatch releases and flight releases, and identify personnel responsible for their content. Determine flight and duty time limitations.
Explore personal beliefs regarding FAA, air carrier, and public expectations for
professional behavior of air crews
Identify situations which require contemplation personal ethics to make the best choice
for a course of action
AVP 352. Multiengine
Principles (2). Discussion and study of multiengine aerodynamics, operating procedures, systems, performance, weight, and balance considerations, engineout procedures, single-engine aerodynamics, and instrument flight. Prerequisite: AVP 354. Upon successful completion of this course, the student will be able to:
Describe, discuss, compare, and contrast multi engine and single-engine aerodynamics applicable to a light twinengine airplane.
Describe and discuss multiengine emergency procedures including proper flight control inputs with the loss of an engine.
Describe and discuss multiengine aircraft systems, including the systems of the Seminole.
Calculate weight and balance and aircraft performance for multi engine aircraft and the Seminole.
Describe and discuss normal, abnormal, and emergency procedures appropriate to twin engine aircraft and the Seminole.
Compare and contrast instrument procedures in single engine and multi engine aircraft.
Demonstrate to the instructor that he/she meets the requirements of FAR141 for aeronautical knowledge for a Multiengine Land class rating for IFR conditions.
AVP 354. Commercial Pilot
(4). Operation of advanced systems appropriate to complex airplanes and execution of advanced flight maneuvers. Preparation for FAA written examination. A minimum grade of $\mathrm{B}-$ in CW's FAA course graduation certificate as required by

FAR141. Prerequisites: AVP 103 and AVP 242.
Upon successful completion of the course, the student will be able to:
Work cooperatively with small groups to complete assigned projects
Compute weight and balance calculations including how to adjust loading to bring aircraft into weight and balance limitations
Describe the aerodynamic principles involved in commercial maneuvers and discuss the techniques involved in mastering the maneuvers Recognize potentially hazardous situations and describe prescribed emergency procedures for systems failures, hazardous weather, and human factors Describe the decision making process pertaining to commercial operations Cumulative and Final Assessments
AVP 375. Mountain and Canyon Flying (3). Synthesis of fundamental concepts and practices including navigation in mountainous terrain, aircraft performance and density altitude, canyon flying and airport operations in constricted areas, mountain and canyon meteorology, emergencies, and flight safety. Prerequisite: AVP 103 or permission of the instructor or department.
Upon successful completion of this course, the student will be able to:
Demonstrate the ability to recognize and analyze, with respect to flight planning and in-flight decision making, basic mountain weather patterns and hazards, including: Mountain waves, thunderstorms, Orographic lift, Diurnal effects, upslope and downslope winds, Katabatic winds, venturi effects, and weather hazards.
Discuss various types of navigation in mountain and canyon terrain, including: Flight Planning, Pilotage and
position reporting, maps and Charts, Types of VFR navigation, GPS and radio, Navigation, sun angles, time of day, and hazards.
Identify components of preparing for mountain/canyon flight including preparation of aircraft and pilot, including: Aircraft preflight items, practicing for mountain flight, Turn radius vs airspeed, flying a steep stabilized mountain approach, takeoffs, landings, and go-arounds. Determine pertinent data relevant to density altitude and aircraft performance that will contribute to safety of flight operations, including: Determining Density Altitude (DA), effects of reduction in DA on aircraft power and thrust, Power loading and weight reduction, takeoff, landing, and climb performance, proper mixture leaning techniques, maneuvering and performance. Identify and discuss operations at airstrips and landings areas, including: Checking out the Airstrip, runway gradient effects, wind direction(s) and intensity, gradient vs wind, approach and departure planning.
Discuss application of mountain and canyon flying techniques to hazardous terrain and flight operations including: Enroute operations, descent, approach, and landing; taxi and ground operations, takeoff and climb, and Go-arounds. Demonstrate knowledge of skills, procedures and preparation for emergencies and forced findings in mountainous and canyon terrain, including survival equipment and tactics.
AVP 396. Individual Study (1-6). May be repeated if subject is different.
AVP 397. Honors (1-12).
Prerequisite: admission to department honors program.
AVP 398. Special Topics (1-
6). May be repeated if subject is different.

AVP 399. Seminar (1-5). May
be repeated if subject is
different.
AVP 401. Multiengine Flight Laboratory (2). Operation of multiengine aircraft systems. Perform normal and emergency procedures to FAA practical test standards for Commercial AMEL certificate. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: AVP 352.

Upon successful completion of this course, the student will be able to:
Demonstrate proper
multiengine preflight
procedures
Control multi engine aircraft in straight and level flight, constant altitude change of airspeed, constant airspeed climbs and descents, and turns to heading while in the traffic pattern
Demonstrate flight at critically slow airspeed, power on and power off stalls
Demonstrate steep turns
Demonstrate proper procedures
for emergency descent and
systems and equipment malfunctions
Explain high altitude
operations
Demonstrate proper procedures
for normal, Crosswind, and
Short field takeoffs and
landings
Demonstrate engine out procedures
Demonstrate proper recovery
from simulated loss of directional control (VMC demonstration)
Demonstrate proper holding techniques
Demonstrate proper instrument procedures while operating twin engine and single engine Demonstrate proper procedures for flight planning enroute navigation and DME arcs
AVP 402. Certified Flight Instructor Laboratory (2). Analyze and perform maneuvers from the right seat. Demonstrate proficiency and instructional knowledge to FAA practical test standards.

The student must possess a Commercial Pilot certificate ASEL to enroll. Department permission. Course will be offered every year (Fall, Winter, Spring, Summer). Formerly AVP 301, students may not receive credit for both. Prerequisite: AVP 448. Upon successful completion of this course, the student will be able to:
Analyze and perform all maneuvers required for private and commercial pilot certification, from the right seat of the training airplane Demonstrate proper single pilot resource management procedures and effective aeronautical decision making skills
Recognize and explain the elements of each of the maneuvers and procedures listed in the syllabus and prepare lesson plans in accordance with FAA guidelines Meet the requirements for aeronautical knowledge, skill and experience necessary to meet the requirements of a flight instructor certificate with an airplane category rating and a single-engine class rating
AVP 410. Crew Resource Management (3).
Fundamental concepts of crew resource management (CRM) with practical application of human factors and performance on the modern
flight deck. Course will be offered every year (Fall, Summer). Prerequisite: AVP 340.

Upon successful completion of this course, the student will be able to:
Identify the ways in which psychosocial pressures can negatively influence pilot decision making and summarize several aircraft accident examples that illustrate this.
Define crew resource management (CRM) and explain the major elements of effective CRM.

Explain the five aspects of effective communication and summarize at least two aircraft accidents that were attributed to breakdowns in
communication.
Draw and explain the components of the relationship vs. task grid and discover their own personal assertiveness tendencies.
Illustrate the adverse effects of stress on flight crew performance, list or identify sources of stress, and explain effective strategies used to manage stress.
Summarize the factors that contribute to effective leadership and team performance.
Exhibit, through interaction with other students in a simulated crewed environment, proper pilot decision making and conflict resolution skills associated with fundamental CRM problems.
Evalaute common problems on the flight deck.
AVP 421. Aircraft Systems
III-Turbojet (4). Introduction and familiarization of transport category aircraft systems. Course will be offered every year (Fall, Winter, Spring,
Summer). Prerequisite: AVP 321.

Upon successful completion of this course, the student will be able to:
Discuss and analyze the operation of each of the CRJ-
200 systems presented in class. Explain how the various redundant back- up systems act in response to main- system malfunctions.
Identify required aircraft limitations from memory. Accurately interpret the meaning of various visual/aural caution and warning system indicators.
AVP 444. Multiengine FTD, Baron G58 (2). Introduction to and familiarization of Electronic Flight Instrument Systems (EFIS), Crew Resource Management (CRM) in multi-crew environment, and use of flight director and
autopilot in a simulated flight environment. Prerequisite:
AVP352, admitted to the Flight Officer specialization or department permission. Upon successful completion of this course, the student will be able to:
Demonstrate proper interpretation of multiengine instrumentation and operational limitations. Perform standard instrument departures, enroute, holding, arrival and approach procedures.
Perform simulated emergency and abnormal procedures. Demonstrate effective Crew Resource Management (CRM) procedures.
Demonstrate appropriate ATC normal and lost communication procedures.

## AVP 445. Turboprop FTD,

King Air 200 (2). Introduction and familiarization of turbinepowered aircraft operations in a simulated flight environment, including Crew Resource Management (CRM), Electronic Flight Information Systems (EFIS), Flight Director (FD), and Autopilot (AP) operations. Department permission. Prerequisites: AVP 422 and AVP 444
Upon successful completion of this course, the student will be able to:
Demonstrate proper interpretation of turboprop instrumentation and operational limitations. Perform standard instrument departures, enroute, holding, arrival and approach procedures.
Perform simulated emergency and abnormal procedures. Demonstrate effective Crew Resource Management (CRM) procedures.
Demonstrate appropriate ATC normal and lost communication procedures.
AVP 448. Fundamentals of Flight Instruction (5). A twopart course consisting of fundamentals of instruction and flight instructor airplane subjects. Details the role of the
airplane flight instructor, including privileges and responsibilities, teaching aeronautical decision making, flight safety, and professionalism. Department permission. Prerequisites: AVP 354 and AVP 304.
Upon successful completion of this course, the student will be able to:
Demonstrate the necessary skills to teach primary and advanced students in aerodynamics, basic air work, stall/spin awareness, low altitude air work, cross country flying, night flying, systems and equipment malfunctions, complex aircraft operation and systems, and advanced maneuvers.
Demonstrate the ability to give student endorsements in all phases of flight to include private and commercial pilot, biennial review flights, written and practical FAA tests, and have a thorough knowledge of FAR's.
Demonstrate the necessary organizational and communications skills to teach student pilots in various phases of training to include private and commercial maneuvers. Objectively evaluate their peers on each of the formal presentations and to accurately demonstrate the knowledge necessary to correctly analyze the specific aeronautical subjects.
To correctly analyze a student's deficient areas in aeronautical knowledge and to promptly and effectively teach the student the proper procedure to correct the deficient area.
AVP 458. Advanced Flight Instruction, Instrument (3). Methodology used in teaching instrument flight and acquisition of the Instrument Ground Instructor certificate (IGI). Prerequisite: AVP 448, and Certified Flight Instructor Certificate course stage 1. Upon successful completion of this course, the student will be able to:

Be familiar with standard vacuum and pitot static instruments operations and failures and how to troubleshoot
Be able to teach basic attitude instrument flying techniques, including scanning and instrument interpretation. Be able to teach IFR operations, including holding patterns, approach and departures, and enroute procedures, including ATC clearances and communications. Exhibit IFR level knowledge of Federal aviation regulations, weather and decision making, and emergency planning. Be able to teach IFR charts and procedures, including various ILS, VOR, NOB, and GPS approaches
Demonstrate the necessary skills to teach aircraft flight instruments and their systems, navigation instruments, Departure, Enroute, and Arrival Charts, holding entries and procedures to interpret navigation instruments to determine aircraft position in relation to a holding fix. AVP 469. Turbojet Operations (4). Introduction and familiarization of transport category aircraft operations including; Crew Resource Management (CRM), flows and checklist procedures, aircraft limitations, normal and emergency operational procedures. Prerequisite: AVP 423.

Upon successful completion of this course, the student will be able to:
Demonstrate proper interpretation of turbojet instrumentation and operation of aircraft systems related to the Bombardier CRJ-200. Demonstrate appropriate normal operational procedures, including flows, procedures and checklists.
Identify required aircraft limitations from memory. Identify emergency and abnormal conditions and
perform the proper procedure or checklist.
Describe appropriate inputs using the Collins avionics suite, including FMS, PFD, MFD and EICAS. Demonstrate effective Crew Resource Management (CRM) procedures.

## AVP 470. Professional Pilot

Capstone (1). Drawing from coursework accomplished in flight operations, pilot certification, aviation safety, and aviation career preparation; students will prepare an academic portfolio that reflects their culminating
learning experience and accomplishments in the Professional Pilot degree program. Department permission. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisites: AVP 305, AVM 350, and AVM 418.
Upon successful completion of this course, the student will be able to:
Assemble the required artifacts into a specified format. Reflect on challenges and accomplishments during their program of study
Collaborate with instructor for improvements to finished product.
AVP 489. Turbo FTD, CRJ-
200 (3). Introduction and familiarization of turbojetpowered aircraft operations in simulated flight environment, including Crew Resource Management (CRM), Electronic Flight Instrument Systems (EFIS), Engine Indicating Crew Alerting Systems (EICAS), Flight Director (FD), and automation philosophy/operation. Student may be enrolled in AVP 469 with AVP 489 in the same quarter with department permission. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: AVP 421. Co- or Prerequisite: AVP 469. Upon successful completion of this course, the student will be able to:

Demonstrate proper interpretation of turbojet instrumentation and operational limitations. Perform standard instrument departures, enroute, holding, arrival and approach procedures.
Perform simulated emergency and abnormal procedures.
Demonstrate effective Crew Resource Management (CRM) procedures.
Demonstrate appropriate automation and autopilot procedures.
Demonstrate appropriate ATC normal and lost communication procedures.
AVP 490. Cooperative
Education (1-12). An
individualized contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. By permission. May be repeated for credit. Grade will either be S or U .
AVP 496. Individual Study (1-6). By permission. May be repeated for credit.
AVP 497. Honors (1-12). Prerequisite: admission to department honors program.
AVP 498. Special Topics (1-
6). Course content identified by title in the university class schedule. May be repeated for credit under different subtitle.
AVP 499. Seminar (1-5). May be repeated for credit. AVP 475A. Specialty Flight Laboratory: Single Engine Seaplane (1). Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. May be repeated for a different specialty. Grade will either be $S$ or $U$. Prerequisite:
FAA pilot certificate or equivalent and permission. Upon successful completion of this course, the student will be able to:

Receive instruction and be able to demonstrate at the minimum airplane docking, water taxiing, and water take-offs and landings.
AVP 475B. Specialty Flight
Laboratory: Multiengine
Seaplane (1). Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. May be repeated for a different specialty. Grade will either be S or U . Prerequisite: FAA pilot certificate or equivalent and permission. Upon successful completion of this course, the student will be able to:
Receive instruction and be able to demonstrate at the minimum airplane docking, water taxiing, and water take-offs and landings.

## AVP 475C. Specialty Flight

Laboratory: Helicopters (1).
Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. May be repeated for a different specialty. Grade will either be $S$ or U. Prerequisite:
FAA pilot certificate or equivalent and permission. Upon successful completion of this course, the student will be able to:
Receive instruction in preflight, hovering maneuvers, and take-off and landing procedures, and other maneuvers deemed necessary by the instructor.

## AVP 475D. Specialty Flight

 Laboratory: Mountain Flying (1). Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. Prerequisite: FAA pilot certificate or equivalent and permission. May be repeatedfor a different specialty. Grade will either be S or U .
Upon successful completion of this course, the student will be able to:
Identify components of preparing for mountain/canyon flight including preparation of aircraft and pilot and will identify and discuss operations at airstrips and landings areas.
AVP 475E. Specialty Flight
Laboratory: Aerobatics (1).
Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. May be repeated for a different specialty. Grade will either be S or U . Prerequisite: FAA pilot certificate or equivalent and permission. Upon successful completion of this course, the student will be able to:
Receive instruction in an aerobatic airplane and will perform various aerobatic maneuvers with supervision of a qualified flight instructor.
AVP 475F. Specialty Flight
Laboratory: Other (1).
Receive ground and flight instruction in the listed specialty. Flight hours will vary with each specialty. A minimum of 10 flight hours normally required for credit except as approved by aviation faculty. Hang gliders are specifically omitted. By advisement and permission. May be repeated for a different specialty. Grade will either be S or U. Prerequisite: FAA pilot certificate or equivalent and permission.
Upon successful completion of this course, the student will be able to:
Working with the faculty advisor, the student will describe the focus of study, formulate plan of action to pursue study, document steps taken in course of study, and present findings.
BIOL 101. Fundamentals of Biology (5). Introduction to
scientific inquiry and basic principles of biology at molecular, cellular, organismal, community, and ecosystem levels as applied to humans, society, and the environment. Four hours lecture and one two-hour laboratory per week. May not be counted toward a major or minor in the department of biological sciences. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, Spring, and Summer). Upon successful completion of this course, the student will be able to:
Describe advancements in our understanding of cell biology, genetics and biotechnology and explain practical applications of these areas in medicine. Compare and contrast the scientific process with other systems of thought and explain how the process of science is used to predict natural phenomena.
Generate testable hypothesis, design experiments, collect and analyze data.
Describe the processes and components of Mendelian Inheritance. Analayze and interpret scientific data.

## BIOL 181. General Biology I

(5). Introduction to the scientific method and the principles of ecology, genetics and evolution. Four lecture hours and three laboratory hours per week. Co- or prerequisite: CHEM 181. Upon successful completion of this course, the student will be able to:
Apply the scientific method to investigate biological phenomena
Discriminate among the hierarchical levels of ecological organization and the emergent properties of each level.
Explain ways in which organisms interact with their abiotic and biotic environments.

Describe how meiosis results in genetically diverse offspring.
Illustrate how genetic information can produce different patterns of inheritance and solve basic genetics problems
Explain how evolution results in changes within populations and changes in biological diversity.
Trace the development of evolutionary ideas through time.
Explain how organisms are grouped into kingdoms and domains. Identify
characteristics that define these
groups as well as
representative organisms.
BIOL 182. General Biology
II (5). Introduction to the principles of cellular and molecular biology. Four lecture hours and three laboratory hours per week. Prerequisite: BIOL 181. Co- or prerequisite: CHEM 182.
Upon successful completion of this course, the student will be able to:
Explain and illustrate how all cells store, use, and pass genetic information to progeny cells
Apply laws of thermodynamics and principles of chemi try to explain how all cells acquire and transform energy via cellular processes (respiration, photosynthesis, etc.) Demonstrate proficiency in the use of microscopes, spectrophotometers, and perform standard cell biology measurements Describe the relationship between cell structure (i.e., cellular components and organization) and cell function. Describe cell-cell interactions during development and within mature organisms.
Apply principles of cellular functions to processes of clonal organisms, biotechnology, and cancer
BIOL 183. General Biology
III (5). Introduction to the form and function of multicellular organisms. Four
lecture hours and three laboratory hours per week. Prerequisite: BIOL 182. Co- or prerequisite: CHEM 183. Upon successful completion of this course, the student will be able to:
List, identify, describe or explain major anatomical structures of plants and animals.
Describe physiological processes of plants and animals including reproduction, metabolism, transport, and development.
Compare and contrast animal and plant strategies for regulatory responses to the environment.
Design, conduct, and present a research project in organismal biology.
Integrate biological and
chemical concepts in understanding how organisms function.
Demonstrate proficiency with laboratory techniques commonly utilized in physiology.

## BIOL 200. Plants in the

 Modern World (5). In this course, students will develop a broad knowledge base about plants, their life processes and ways in which humans are dependent on plants and their products. The course includes inquiry-driven laboratory and field observations. May not be counted toward a major or minor in the department of biological sciences. NSPatterns and Connections Natural World (W) (L). Course will be offered every year. Course will not have an established scheduling pattern. Upon successful completion of this course, the student will be able to:Apply concepts of plant biology to current topics of personal and societal relevance.
Analyze current research and engage in critical thinking exercises to develop and defend positions on biological issues.

Collect, analyze, and interpret laboratory and field-collected data to investigate biological questions and visualize cause and effect relationships in plant biology.
Demonstrate an understanding of conceptual models of complex biological systems processes to the importance of plants for the functioning of the biosphere.
Apply mathematical and quantitative skills to solve problems in plant biology. Describe the use of plants and plant products in their daily lives.
Understand how uses of plants as staples in their diet differs in communities across the world. Connect how choices in resource use (for example, food choices, food waste, fertilizer use) can affect others in their community.
Debate issues of personal and public concern, e.g., use of nitrates and genetically modified organisms in farming and organic vs. conventional methods of agriculture. Observe the use of plants in different cultural traditions, e.g., Thanksgiving, Japanese Tea Ceremonies, and Traditional Herbal Medicines and describe the value of these traditions to people in those communities.
Determine the trophic levels of the food items that they consume and calculate the energy related to that consumption. Calculate their ecological footprint and determine how modest changes can reduce their footprint. They will also compare the footprint of the average person in the US with those from other parts of the world.
Investigate methods of production for different food items and distinguish between sustainable and non-sustainable farming practices. Compare and evaluate multiple solutions to the problem of providing food for an increasing human population
with minimum impact on the environment.
Recognize the disparate socioeconomic impact of the "War on Drugs" for various drug plants (marijuana, opium, cocaine, etc.).
The production of plants has often been associated with instances of social injustice. Students will study and discuss the importance of group membership in multiple examples, such as the Irish Potato Famine, the Atlantic Sugar-Slave Triangle, and the use of slaves in modern chocolate production. Compare the availability of fruits and vegetables in communities from different economic levels in the area to determine the level to which "food deserts" occur in local communities.
Analyze the availability of food and plant products to them personally and compare their usage to that for others in the world. Students will also discuss how social, economic and political structures determine human uses of plants for food, fuel and medicine.

## BIOL 201. Human

Physiology (5). An
introduction to the function of human cells, organs, and organ systems as it relates to health and well-being current developments, and society. Not open to students with credit in BIOL 455; may not be counted toward a major or minor in the department of biological sciences. NS-Patterns and Connections Natural World. Course will be offered every year (Fall, Winter, Spring, and Summer).
Upon successful completion of this course, the student will be able to:
Identify and discuss
contemporary breakthroughs or issues in science and medicine and their societal relevance. Analyze and interpret realworld human subject data to evaluate the function of organ systems under both normal and
disease states to diagnose medical conditions.
Describe the function and interaction between human organ systems.
Describe common human diseases/disorders and how access to current medical approaches for treatments affects outcomes.
BIOL 204. The Science and Practice of Growing Plants
(5). An introduction to the scientific principles and realworld practices of growing plants for household, community, and horticultural uses. The course will cover topics ranging from physiology to sustainability and involves independent and communityfocused projects. Course will not have an established scheduling pattern (Spring and Summer).
Upon successful completion of this course, the student will be able to:
Define the key physiological and anatomical aspects of plants that are important for production and how the environment (water, temperature, light, nutrients) affects plant cultivation and growth.
Recognize how humans have used scientific discoveries and technological advancements to alter the environment for optimizing plant yields by matching the major scientific discoveries or technological advancements to the increases in harvests gained. Discuss the personal, social, political, ecological, and/or ethical tradeoffs associated with scientific discoveries and technological advances for growing plants. Apply their knowledge of the trade-offs of technological advancements in growing plants to prepare a set of testable hypotheses on how to improve the cost/benefit ratio. Students will be able to design an appropriate garden experiment and predict the outcomes of the experiment.

Employ the analytical methods required to present the results and calculate the success of their experiments in a written report that is understandable to a general, community-wide audience.
BIOL 205. Microbes and Mankind (5). Microbes are significant in our daily lives. The course covers disease and epidemics, prevention and control of infectious disease, the necessity of microbes in health, and the use of microbes for the benefit of mankind. Course will be offered every year. Course will not have an established scheduling pattern. Upon successful completion of this course, the student will be able to:
Explain how scientific method is employed to understand microbial processes Analyze and explain primary literature and peer review process
Describe different types of pathogens
Describe historical epidemics of humans and in agriculture Identify reliable outlets of scientific information retrieve information regarding current and past epidemics Calculate incidence and prevalence of diseases using morbidity and mortality data Predict the onset of an epidemic by graphing epidemiological data Describe different types of vaccines and how they induce immunity
Identify risks and advantages of vaccination
Identify fallacies and misinformation/misconceptions in science
Explain how antibiotics and antivirals control microbial growth
Describe epidemic control methods
Explain various methods of biological waste treatment Describe microbes' role in biotechnology
Identify limitations and risks of biotechnology

BIOL 213. Introductory
Biostatistics (4). An
introduction to commonly used methods for analyzing biological data. Use of statistical and graphical software will be emphasized. Course will be offered every year (Fall, Winter, Spring, and Summer). Prerequisites:
(MATH 153 or MATH 154 or MATH 172) or (a score of 17 or higher on the Advanced Math Placement Test) or (a score of College Math 65+ or higher in Acuplacer) or (a score of 46 or higher on the Compass College Algebra Test).
Upon successful completion of this course, the student will be able to:
Compile raw biological data to construct graphs, tables and charts using computer software Determine appropriate statistical analyses for a vareity of different types of biological data
Analyze biological data using statistical software.
Interpret results of statistical analyses to address hypotheses Communicate statistical results visually, orally, and in written form.
BIOL 220. Introductory Cell
Biology (5). Concepts,
processes and structures involved in understanding life at the cellular level. Does not count toward biology majors for students who complete BIOL 181, 182, and 183. Prerequisites: CHEM 113 or 183.

Upon successful completion of this course, the student will be able to:
Integrate chemistry principles that determine the structure and organization of biological molecules within a cell.
Apply principles of chemistry and physics to explain how all cells acquire and transform energy via cellular processes. Demonstrate proficiency in microscopic and cell biology techniques.

Describe how cells regulate genetic information to control cell type and behavior. Explain and illustrate examples of cell-cell interactions and the intracellular responses to those interactions.
BIOL 262. Natural History of the Pacific Northwest (5). Classroom, lab and flied exploration of the biological diversity of the Pacific Northwest. Emphasis will be on the natural history of local flora and fauna and their ecological and evolutionary relationships. Mat not be counted toward a major in the department of biological sciences.
Upon successful completion of this course, the student will be able to:
Recognize native species and apply biological concepts to current topics of personal and societal relevance
Recognize major biotic communities of the Pacific NW, and interpret patterns therein to deduce the level of human disturbance to native ecosystems. Make observations and collect data in a field notebook, and then analyze those data to address hypotheses through the scientific method. Use dichotomous keys, field guides, and other methods to identify organisms in nature and to infer patterns of biological diversity and evaluate ecosystem health. Identify common organisms in native ecosystems of our region and infer ecosystem health from the presence or absence of those organisms.
BIOL 295. Research (1-6).
Laboratory research experience. May be repeated up to 15 credits.
Upon successful completion of this course, the student will be able to:
Design research project in biological sciences Perform experiments Collect and analyze data for research projects

Present research is written or oral form
BIOL 298. Special Topics (16).

BIOL 299. Seminar (1-5).
May be repeated if subject is different.
BIOL 300. Introduction to
Evolution (5). An introduction to the Darwinian theory of evolution. Exploration of the mechanisms of evolutionary change, speciation, and macroevolutionary patterns of the evolution of life on Earth including humans. May not be counted toward a major or minor in the department of biological sciences. NSPatterns and Connections Natural World. Course will not have an established scheduling pattern. Prerequisite: sophomore standing or above. May not be counted toward a major in the department of biological sciences.
Upon successful completion of this course, the student will be able to:
Apply the principals of evolutionary theory to examples from current research with community and societal implications.
Utilize real-world
observational or experimental
data to evaluate, analyze, and
interpret evolutionary theory.
Use evolutionary models to
formulate and test questions
about real-world data in evolutionary biology.
Identify the consequences of evolutionary forces (e.g. natural selection, genetic drift, non-random mating, migration, and mutation) on populations.
Analyze how evolutionary forces, speciation processes, and geologic and environmental events influence macroevolutionary patterns.
Explore the controversy concerning evolutionary thought in the context of your personal community and worldview.
BIOL 302. Sustainability and Environmental Change (5).
Basic concepts of ecology with emphasis on ecosystems and
populations and how human activities and attitudes relate to these basic concepts. May not be counted toward a major or a minor in the department of biological sciences. NSApplications Natural Science. Upon successful completion of this course, the student will be able to:
Apply ecological concepts to current topics of personal and societal relevance Analyze current research to develop and defend positions on environmental issues Collect, analyze, and interpret data to investigate ecological and environmental questions.
BIOL 305. Human Anatomy and Physiology for Health-
Related Majors I (5). The first quarter of a two-quarter study of the structure and function of the human body. Four hours of lecture and two hours
laboratory per week. Cannot be used within a Biology major. Prerequisites: EXSC 351 and EXSC 351LAB; or BIOL 220. Upon successful completion of this course, the student will be able to:
NOTE: This course is one of a two quarter sequence. Each course covers a different set of human organ systems, with similar learner outcomes. Identify and analyze detailed anatomical structures associated with the major human organ systems. Describe the detailed functioning (physiology) of all major organ system of the body.
Integrate the study of anatomy and physiology to gain a fuller understanding of human form and function.
Relate physical structure to biological function across all levels of organization. Frame the current science of form and function in the context of its history and its relationship to human development and health.
Demonstrate the dissection and laboratory skills necessary for the examination and study of
the major human organ systems.
Contribute productively to peer teams.
BIOL 306. Human Anatomy and Physiology for HealthRelated Majors II (5). The second quarter of a two-quarter study of the structure and function of the human body. Fours hours lecture and two hours laboratory per week. Cannot be used within a Biology major. Co- or prerequisite: BIOL 305. Upon successful completion of this course, the student will be able to:
NOTE: This course is one of a two quarter sequence. Each course covers a different set of human organ systems, with similar learner outcomes. Identify and analyze detailed anatomical structures associated with the major human organ systems. Describe the detailed functioning (physiology) of all major organ system of the body.
Integrate the study of anatomy and physiology to gain a fuller understanding of human form and function.
Relate physical structure to biological function across all levels of organization.
Frame the current science of form and function in the context of its history and its relationship to human development and health. Demonstrate the dissection and laboratory skills necessary for the examination and study of the major human organ systems. Contribute productively to peer teams.
BIOL 321. Genetics (5). A lecture and laboratory course in the basic principles of heredity
of plants and animals. Four hours lecture and two hours laboratory per week. Prerequisites: BIOL 183 or BIOL 220 and either BIOL 213 or CHEM 332 and CHEM 332LAB.

Upon successful completion of this course, the student will be able to:
Develop problem solving skills and ability to identify and clarify a problem, gather and evaluate information, consider alternatives, and improve problem solving effectiveness. Think critically about the scientific, ethical, and economic ramifications of genetic information and the role of genetics in modern society
Compare and contrast structure and function of DNA, genes, and chromosomes.
Analyze and evaluate data for Mendelian patterns of inheritance, heredity, and genetic extensions. Apply knowledge of cellular processes including cell cycle, mitosis, and meiosis to genetics.
Infer relationships between genotype and phenotype based on conceptual and mechanistic details of DNA replication, gene regulation, and gene expression
Use concepts of DNA
technology and analyze and evaluate its scientific and ethical application to science and society.
Determine how DNA mutation and repair and associated mechanisms are involved in loss of genetic control and disease.
Construct a scientific argument and defend an advocacy position.
Reflect on problem solving effectiveness and revise thinking process.
BIOL 322. Introductory
Microbiology (5). Introductory biology of microorganisms and viruses with applications to medicine, food science, industry, and agriculture. Intended for nutrition and allied health students. Three hours lecture and four hours laboratory per week. Biology majors are encouraged to take BIOL 323. May be counted toward a degree in the biology department in lieu of BIOL

323 , but cannot be counted toward a degree in the biology department if BIOL 323 is successfully completed. Prerequisites: BIOL 182 or BIOL 220.
Upon successful completion of this course, the student will be able to:
Microbial cell biology
Microbial cellular structure and function
Microbial growth and reproduction
Cellular energy production and metabolism
Structure and reproduction of infectious particles (viruses and prions)
Interactions and impact of microorganisms and humans
Microbial-human relationships Microbial pathogenicity mechanisms
Infectious agent transmission Antibiotics, antivirals, antibiotic resistance
Vaccines
Food Microbiology-production and control
Laboratory Skills
Use a bright field light
microscope to view and interpret slides, including
Correctly setting up and
focusing the microscope
Proper handling, cleaning, and
storage of the microscope
Correct use of all lenses
Recording microscopic observations
Properly prepare slides for microbiological examination, including
Preparing smears from solid
and liquid cultures
Performing Gram stains
Use appropriate
microbiological media and test systems, including
Isolating colonies and/or plaques
Maintaining pure cultures
Estimate the number of microbes in a sample using serial dilution techniques, including
Correctly choosing and using pipettes and pipetting devices Correctly spreading diluted samples for counting

Estimating appropriate dilutions
Extrapolating plate counts to
obtain the correct CFU or PFU
in the starting sample
Interpersonal and citizenry skills, including Working effectively in teams or groups so that the task, results and analysis are shared Effectively managing time and tasks allowing concurrent and/or overlapping tasks to be done simultaneously, by individuals and within a group
Integrating knowledge and making informed judgments about microbiology in everyday life
Employ proper microbiological lab safety protocols and aseptic technique
BIOL 323. Microbiology (5). Principles of microbiological practice, including isolation, cultivation, identification, physiology, evolution, and ecology. Two hours lecture and six hours laboratory per week.
Does not count toward any biology major if student has successfully completed BIOL 322. Prerequisites: BIOL 213 and either BIOL 183 or BIOL 220.

Upon successful completion of this course, the student will be able to: Microbiological
Knowledge
Microbial cell biology
Microbial cellular structure and function
Microbial growth and reproduction
Cellular energy production and metabolism
Structure and reproduction of infectious particles (viruses and prions)
Microbial genetics, evolution
and diversity
Inheritance of genetic
information
Information flow within a cell Exchange and acquisition of genetic information
Causes, consequences and uses of mutations
Evolution of microbial genetic and physiological diversity Microbial ecology

Interactions and impact of microorganisms and humans Microbial-human relationships Microbial pathogenicity mechanisms
Disease transmission
Antibiotics and chemotherapy
Genetic engineering
Biotechnology
Laboratory Skills
Use a bright field light
microscope to view and
interpret slides, including
Correctly setting up and
focusing the microscope
Proper handling, cleaning, and
storage of the microscope
Correct use of all lenses
Recording microscopic observations
Properly prepare slides for microbiological examination, including
Cleaning and disposing of slides
Preparing smears from solid and liquid cultures
Performing wet mount and/or
hanging drop preparations
Performing Gram stains
Properly use aseptic techniques
for the transfer and handling of
microorganisms and
instruments, including
Sterilizing and maintaining
sterility of transfer instruments
Performing aseptic transfer
Obtaining microbial samples
Use appropriate
microbiological media and test
systems, including
Isolating colonies and/or
plaques
Maintaining pure cultures
Using biochemical test media
Accurately recording
macroscopic observations
Estimate the number of
microbes in a sample using
serial dilution techniques, including
Correctly choosing and using
pipettes and pipetting devices
Correctly spreading diluted
samples for counting
Estimating appropriate
dilutions
Extrapolating plate counts to
obtain the correct CFU or PFU
in the starting sample

Use standard microbiology laboratory equipment correctly, including
Using the standard metric system for weights, lengths, diameters, and volumes
Lighting and adjusting a
laboratory burner
Using an incubator
Interpersonal and citizenry
skills, including
Working effectively in teams or groups so that the task, results and analysis are shared Effectively managing time and tasks allowing concurrent and/or overlapping tasks to be done simultaneously, by individuals and within a group
Integrating knowledge and making informed judgments
about microbiology in everyday life
Employ proper microbiological
lab safety protocols and aseptic technique
BIOL 341. Plant Taxonomy
(5). Classification of vascular plants, using local flora. Two hours lecture and six hours laboratory per week; the course includes field trips and individual field work.
Prerequisites: BIOL 182, BIOL
183 or BIOL 200.

## BIOL 343. Plant Anatomy

(5). A treatment of the fundamental facts and aspects of vascular plant anatomy. Plant tissues with special reference to their development, organization, and biological significance. Three hours lecture and four hours laboratory per week. Prerequisites: BIOL 182 or BIOL 183.
Upon successful completion of this course, the student will be able to:
Identify major cell and tissue types from vascular plants as visible using light microscopy. Describe functions of major cell and tissue types for vascular plants
Describe meristematic growth in plants
Differentiate between patterns of meristematic growth that occur in plants and growth patterns animals.

Identify plant meristmatic tissues in plants and describe tissues that develop from cells in those meristems. Characterize plant cell and tissue types and growth patterns in a vascular plant body
Use basic cell sectioning and
staining techniques to observe plant anatomical structures
BIOL 344. Dendrology (4). A
study of trees, their habits of growth, the characteristic forest areas of North America. Two hours lecture and four hours laboratory per week. A field course. Prerequisite: BIOL 183.

Upon successful completion of this course, the student will be able to:
Describe and quantify specific morphological features of woody plants.
Identify woody plant species by using taxonomic keys. Apply knowledge of tree anatomy and development to compare species' responses to the environment.
Measure species distribution and abundance in forests of the Pacific Northwest.
Evaluate and discuss scientific investigations of climate change and effects on local forest ecosystems.

## BIOL 351. General

Entomology (5). Insect biology, taxonomy, structure, and relationships to man. Two hours lecture and six hours laboratory or field work per week. Prerequisite: BIOL 183 or permission.
Upon successful completion of this course, the student will be able to:
Describe the anatomy, physiology, and ecology of insects.
Identify major families (and higher-level taxa) within the insects, either by sight or using a key.
Prepare a collection of properly mounted and identified insects. Present a short lecture on one particular group of insects, sharing this taxon's identifying
features and characteristics with the class.
BIOL 352. Parasitology (5).
Biological relations of animal parasite and host; structure, classification, and methods of diagnosis of parasitic protozoa, worms, and arthropods. Two hours lecture and six hours laboratory per week. Prerequisite: BIOL 183. Upon successful completion of this course, the student will be able to:
Demonstrate a broad understanding of the central facts and the experimental basis of Parasitology Demonstrate practical skills in parasitological techniques and identification.
Present information clearly in both written and oral form.
Use a computer to carry out data analysis and to prepare documents, including graphs, diagrams and presentations.
BIOL 353. Integrative
Anatomy (6). Vertebrate and human anatomy and embryology in an evolutionary context. Three hours lecture and six hours laboratory per week. Prerequisite: BIOL 183 or EXSC 350 and EXSC 350LAB.
Upon successful completion of this course, the student will be able to:
Integrate the study of anatomy, embryology, and evolution to gain a fuller understanding of vertebrate form and function. Identify and analyze detailed anatomical structures associated with the major vertebrate organ systems. Relate physical structure to biological function across all levels of organization.
Frame the current science of biology in the context of its history and its relationship to other disciplines.
Demonstrate the dissection skills necessary for the examination and study of the major vertebrate organ systems.
Contribute productively to peer teams.

BIOL 354. Developmental Biology (5). Embryonic development with an emphasis on the molecular mechanisms involved in fertilization, pattern formation, and cell differentiation. Three hours lecture and four hours laboratory per week. Prerequisites: CHEM 361 and BIOL 183.
Upon successful completion of this course, the student will be able to:
Describe the basic concepts of developmental biology including fertilization, pattern formation, cell differentiation and organogenesis
Compare and contrast stages of development in vertebrate and non-vertebrate organisms including the molecular signaling events involved. Design and perform experiments to examine the effect of environmental contaminants on early embryo development including data collection and analysis. Apply basic developmental concepts and interpret data presented in primary literature articles.
BIOL 355. Human Anatomy and Physiology I (5). The first quarter of a two-quarter study of the structure and function of the human body. Students should not take BIOL 355 unless they intend to take BIOL 356. Three hours lecture and four hours laboratory per week. A student cannot use BIOL 355/356 and BIOL 455 in the major. A student cannot receive credit for both BIOL 355 and BIOL 305. Prerequisites: BIOL 183. Upon successful completion of this course, the student will be able to:
NOTE: This course is one of a two quarter sequence. Each course covers a different set of human organ systems, with similar learner outcomes. Identify and analyze detailed anatomical structures associated with the major human organ systems (or a suitable mammalian surrogate
such as cats, etc. will be used to dissect /identify these structures.
Describe the detailed
functioning (physiology) of all
major organ system of the body.
Integrate the study of anatomy
and physiology to gain a fuller understanding of human form and function.
Demonstrate the dissection and laboratory skills necessary for the examination and study of the major human organ systems.
Relate physical structure to biological function across all levels of organization (from cellular to organismal levels).
BIOL 356. Human Anatomy and Physiology II (5). The second quarter of the two quarter study of the structure and function of the human body. Three hours lecture and four hours laboratory per week. A student cannot use BIOL 355/356 and BIOL 455 in the major. A student cannot receive credit for both BIOL 356 and BIOL 306. Co- or prerequisite: BIOL 355 .
Upon successful completion of this course, the student will be able to:
NOTE: This course is one of a two quarter sequence. Each course covers a different set of human organ systems, with similar learner outcomes. Identify and analyze detailed anatomical structures associated with the major human organ systems (or a suitable mammalian surrogate such as cats, etc. will be used to dissect /identify these structures.
Describe the detailed functioning (physiology) of all major organ system of the body.
Integrate the study of anatomy and physiology to gain a fuller understanding of human form and function.
Demonstrate the dissection and laboratory skills necessary for the examination and study of the major human organ systems.

Relate physical structure to biological function across all levels of organization (from cellular to organismal levels).
BIOL 360. General Ecology
(5). Interrelationships of organisms with their environment. Three hours lecture and four hours laboratory/field work/discussion per week. A weekend field trip may be required. Prerequisites: BIOL 183, and BIOL 213, and MATH 153 or a higher math course.
Upon successful completion of this course, the student will be able to:
Explain basic ecological connections between organisms, populations, communities and ecosystems Explain how physical environmental factors affect organisms and how organisms can affect the environment Describe the ecological relationships among of all life on earth and hypothesize on how human activities can affect these relationships Demonstrate knowledge on the basic structure and function of various ecosystems
Design an ecological study employing basic field data collection techniques Demonstrate proper use of instruments and equipment commonly used in ecological studies
Collect, analyze, and interpret ecological data

## BIOL 362. Biomes of the

Pacific Northwest (4). One-
week field trip to explore the
various biomes of Washington.
Emphasis on writing field
notes, observing and
identifying organisms and communities. Prerequisite: BIOL 181.
Upon successful completion of this course, the student will be able to:
Describe and compare the various biomes of the Pacific Northwest
Identify which biomes occur in Washington

Take field notes in correct format and with appropriate information
Use field guides or dichotomous keys to identify organisms
Identify connections among organisms inhabiting the
biomes visited
Describe physical and biological factors that result in the specific character of each biome visited
BIOL 371. Paleobiology (4).
Using fossils in the geologic record to explore evolution and extinction, ancient ecology and environments, and the geographical distribution of plants and animals. BIOL 371 and GEOL 371 are cross-listed courses; students may not receive credit for both. Prerequisite: BIOL 181 or GEOL 101 or GEOL 103 or GEOL 106 or GEOL 107 or GEOL 108.
Upon successful completion of this course, the student will be able to:
Identify, measure and describe common fossils and their morphology from examples Identify and differentiate methods of preservation of organisms in the rock record and distinguish biases of preservation.
Demonstrate how evolutionary processes, adaptation, and extinction relate to the history of life, diversity, and changing environments on Earth over geologic time.
Identify fossil content and rock type to interpret depositional environments and ecosystems. Interpret and construct paleogeographic maps and use them to hypothesize and assess the distribution of fossil and modern organisms
Relate paleobiological data to
(1) major events and trends in the evolutionary history of plants and animals and (2) major global events and trends (tectonic, paleogeographic, paleoclimate)
Evaluate the adequacy of the fossil record for tackling a particular question, and assess
the quality of hypotheses based on (limited) fossil data
Demonstrate an understanding of the relationship between processes and the timescales over which they operate Accurately apply and differentiate concepts of correlation and causality when interpreting data Use mathematical concepts and tools to analyze, evaluate, and present numerical data Practice effective oral, written, and graphic communication techniques
BIOL 377. Regional Natural History (2). Classroom study of the natural history of a selected region as preparation for a one- to two-week field trip. Emphasis will be on developing background skills to undertake a field exploration over the quarter (winter, spring, summer) break. Subtitles will identify the selected geological region (e.g. Baja California Natural History). BIOL 377 and GEOL 377 are cross-listed courses, students may not receive credit for both. By permission. May be repeated for credit under a different subtitle (region).
BIOL 396. Individual Study (1-6). May be repeated if subject is different.
BIOL 397. Honors (1-12). Prerequisite: admission to department honors program.
BIOL 398. Special Topics (16).

BIOL 399. Seminar (1-5).
May be repeated if subject is different.
BIOL 405. Current Topics in
Biology (2-5). An in-depth analysis of a specific topic within the field of biological science. Current literature and research will be reviewed, analyzed, and discussed. May be repeated up to 10 credits. Prerequisite: BIOL 213. Upon successful completion of this course, the student will be able to:
Read and comprehend scientific literature on a variety of topics in contemporary biological research.

Demonstrate an ability to synthesize ideas on a variety of topics in contemporary biological research. Identify and explain current research methods on a variety of topics in contemporary biological research.
BIOL 413. Advanced
Biostatistics (5). Visualization and analysis of complex biological data-sets. Computer laboratory exercises will utilize $R$, a free and powerful software environment for statistical computing and graphics. BIOL 413 and BIOL 513 are layered courses; students may not receive credit for both. Three hours lecture and two hours laboratory per week. Prerequisites: BIOL 213 or permission of instructor. Upon successful completion of this course, the student will be able to:
Design valid, efficient, and statistically powerful experiments (413/513) Visualize complex data sets and identify patterns of biological importance (413/513)
Explain the underlying assumptions of common statistical tests and evaluate the potential consequences of violating these assumptions (413/513)
Select and validate appropriate methods for the analysis of complex biological data sets (413/513)
Analyze complex biological data sets, interpret the output, draw valid conclusions, and communicate findings
(413/513)
BIOL 420. Environmental
Microbiology (5). Ecology of microorganisms in marine, fresh-water and soil environments. Three hours
lecture and four hours laboratory per week. Prerequisites: BIOL 323 and CHEM 362.
BIOL 421. General Virology
(5). Interrelationship between animal, plant, and bacterial viruses and their hosts, with emphasis on the animal
viruses. Five hours lecture per week. Prerequisites: BIOL 430 or BIOL 321 or CHEM 432.
Upon successful completion of this course, the student will be able to:
Critically analyze primary
literature pertaining to viruses and their interaction with host organisms and individual host cells
Diagram replication strategies for the major classes of viruses Discuss various methods for culturing viruses
Explain different strategies for viral gene expression, infection patterns and pathogenesis Explain the differences between different classes of viruses, and identify viruses associated with biocontrol and other beneficial technologies Discuss various methods used to study viral gene expression, infection patterns and pathogenesis
Identify reliable sources of information about epidemics, emerging viruses, and vaccination programs Describe prevention and treatment strategies associated with various viral infections
BIOL 422. Immunology (5). Nature of the immune response, disease preventing and producing mechanisms and laboratory applications. Five hours lecture per week. Prerequisites: BIOL 183 or BIOL 220 and CHEM 361.
BIOL 423. Techniques in Immunology and Virology
(5). A practical course in dealing with the routine techniques used in diagnostic and experimental immunology and virology. Three hours lecture and four hours laboratory per week.
Prerequisite: BIOL 421 or BIOL 422.
Upon successful completion of this course, the student will be able to:
Develop problem solving skills and ability to identify and clarify a problem, gather and evaluate information, consider alternatives, and improve problem solving effectiveness.

Demonstrate the ability to properly keep a laboratory notebook.
Analyze and evaluate data from immunological or virology assays. Apply knowledge of immunological processes including in setting up research projects.
Develop scientific ideas and
support it using available data.
Reflect on problem solving
effectiveness and revise
thinking process.

## BIOL 425. Molecular

Biotechnology (5). The
practice and theory of techniques used in molecular biology. Two hours lecture and six hours laboratory per week.
Prerequisite: BIOL 321.
BIOL 426. Medical
Microbiology (3). An
introduction to medical microbiology emphasizing the biology of pathogenic bacteria, their relation to infectious diseases and the isolation and identification of specific disease agents. Three lectures per week. Prerequisite: BIOL 323.
BIOL 427. Biotechnology for
Teachers (5). This course will help pre-service teachers develop the necessary skills to construct and perform biological experiments using contemporary biotechnology in the context of educational theory and application. May be repeated for credit.
Prerequisite: BIOL 321.
Upon successful completion of this course, the student will be able to:
Contemplate modern molecular biotechnology theory
Differentiate the importance of
different macromolecules to cellular life and development and how this knowledge can be used in biotechnology
Relate molecular
biotechnology to everyday life
Discuss moral, ethical, and
economic aspects of controversial biotechnology issues
Perform basic biotechnology laboratory exercises

BIOL 428. Nutrigenomics
(5). The interrelationships of genetic variation, nutrition, and diet-related diseases. Topics to be covered include techniques used in the field, disease susceptibility alleles, diet and gene expression, personalized diets, and case studies. BIOL 428 and BIOL 528 is a layered course; students may not receive credit for both. Course will not have an established scheduling pattern.
Prerequisite: BIOL 321 or CHEM 432 or instructor permission.
Upon successful completion of this course, the student will be able to:
Recommend a diet given genomic data
Identify SNPs that respond to diet
Calculate a risk profile for an individual given data
Critique scientific literature in nutrigenomics
Give and explain examples of variation in alleles, gene regulation, and epigenetic tags that relate to diet.
BIOL 430. Cell Biology (5). Analysis of cell organization and the processes governing cell function and behavior. Four hours lecture and three hours laboratory per week. Prerequisites: CHEM 361, CHEM 361LAB, and BIOL 182.
Upon successful completion of this course, the student will be able to:
Integrate principles of chemistry to explain the structure and organization of biochemicals/macromolecules within a cell
Apply principles of chemistry and physics to explain how energy transfer and utilization maintain life and vital cellular processes.
Demonstrate proficiency in microscopic and cell biology techniques.
Describe how cells regulate genetic information to control cell type and behavior

Explain and illustrate how cells respond and communicate with their environment
BIOL 431. The Cell Biology
of Cancer (3). The study of the biology of cancer with an emphasis on dysregulation of cellular pathways responsible for cancer development and the effectiveness of current therapuetic drugs on treatment. Three hours lecture per week. Prerequisite: BIOL 430 or CHEM 431.
Upon successful completion of this course, the student will be able to:
Identify the cellular pathways and proteins responsible for cancer development. Describe the role of genetic instability in the evolution of cancer cells.
Evaluate the biology of therapeutic drugs and their effectiveness in the treatment of cancer.
Apply cell biology concepts and interpret data presented in primary literature articles in cancer biology.
BIOL 435. Cell Analysis by Flow Cytometry (4). Acquire flow cytometry skills (fluorochrome selection, sample preparation, data acquisition, data analysis, data interpretation). Design and conduct research projects requiring in-depth analysis of physical and chemical characteristics of cells acquired by flow cytometry. Discuss flow cytometry applications in various scientific fields. BIOL 435 and BIOL 535 are layered courses; students may not receive credit for both. Prerequisites: BIOL 321 and CHEM 361.
Upon successful completion of this course, the student will be able to:
Identify the appropriate fluorochrome (s) and describe the steps involved in sample preparation and analysis by flow cytometry. Identify and apply the appropriate cell analysis methods to analyze previously acquired flow cytometry data.

Interpret basic flow cytometry data and report results of cell analysis by flow cytometry Design research projects requiring flow cytometry among research tools, acquire, discuss and report data including those acquired by flow cytometry.

## BIOL 441. Plant Physiology

(5). A critical study of the physiological processes of plants including water relations, photosynthesis, mineral assimilation, and responses to the environment. Prerequisites: BIOL 183 and BIOL 213 and CHEM 361. Upon successful completion of this course, the student will be able to:
Students will be able to describe plant water relations and transport processes and predict movement of water in a biological system Students will be able to explain how light energy is converted, stored and transported as chemical energy through photosynthetic CO 2 assimilation processes for a variety of plant species. Students will be able to describe how plants respond to environmental and internal signals and compare and contrast these responses to those of animals Students will be able to describe cellular growth and fundamental biochemical processes for plant cells Students will be able to describe how plants assimilate minerals and identify the significance of these processes to other organisms including humans
Students will be able to carry out an investigative experiment in plant physiology, compile and analyze their data and communicate their results through a scientific paper
BIOL 443. Mycology (5). The biology, morphology, and economic importance of the major groups of fungi including the slime molds. Three hours lecture and four
hours laboratory per week. Prerequisite: BIOL 183.
Upon successful completion of this course, the student will be able to:
Utilize appropriate techniques for the isolation and laboratory culture of fungi including all appropriate safety measures. Design, carry out, and analyze and evaluate data from a research project on the biology, growth, or genetics of the fungi (or fungus like protists). Utilize appropriate terminology to describe the morphology, anatomy, and ecology of major fungal and pseudofungal groups.
Identify members of the major groups of fungi and pseudofungi and describe their characteristics and ecological importance.
Contrast the traditional classification system with the modern phylogenetic outline of the fungi and pseudofungi.
Evaluate factors which influence the growth, metabolism, and ecology of the fungi and pseudofungi.
Describe the economic importance of various fungi and pseudofungi.
BIOL 444. Algae and
Bryophytes (5). Study of the occurrence, evolution, physiology, and ecology of fresh-water and marine algae and non-vascular plants with emphasis on those in the Pacific Northwest.
Prerequisite: BIOL 183.
Upon successful completion of this course, the student will be able to:
Describe evolutionary relationships among groups of algae and bryophytes Correctly identify groups of algae and bryophytes from field-collected samples Describe biochemical and metabolic processes for groups of algae and bryophytes Predict the occurrence of algal and bryophyte groups and species in the field
Predict consequences of
disturbance of algal or
bryophyte populations within a natural ecosystem
Describe characteristics for, illustrate using diagrams and sketches, and describe
ecological roles for algae and bryophytes
Describe the ecological and economic value of algae and bryophytes in our world
BIOL 445. Field Mycology
(5). Stresses taxonomy, morphology, and ecology of mushrooms and related forms with emphasis on Northwest flora. Offered fall quarter only. Prerequisite: BIOL 183. Upon successful completion of this course, the student will be able to:
Utilize appropriate techinques for the field collection, preservation, and herbarium deposition of macrofungi. Utilize taxonomic resources to identify fungi representing the major groups of macrofungi. Utilize appropriate terminology to describe the morphology, anatomy, and ecology of macrofungi.
Design, carry out, analyze and evlauate a research project on the biodiversity or ecology of the macrofungi.
Identify the major groups of macrofungi and describe their characteristics and ecological importance.
Contrast the traditional
classification system with the modern phylogenetic outline of the macrofungi.
BIOL 450. Ichthyology (4). An introduction to the biology, taxonomy, and distribution of modern fishes with special reference to the Pacific Northwest. Three hours lecture and two hours laboratory or field work per week Prerequisites: BIOL 183 and BIOL 213.
BIOL 451. Herpetology (4).
An introduction to biology, taxonomy, and distribution of modern amphibians and reptiles with special reference to the Pacific Northwest. Two hours lecture and four hours laboratory or field studies per week. Prerequisite: BIOL 183.

BIOL 452. Ornithology (4)
Study of birds with special emphasis on anatomic and behavioral adaptations. Three hours lecture and two hours laboratory or field study per week. Prerequisite: BIOL 183. Upon successful completion of this course, the student will be able to:
Students will be able to make accurate, organized observations of behavior, morphology, distribution, abundance, and habitat associations of avian fauna in the field.
Students will be able to identify local avifauna. Using museum skins, students will be able identify species and evolutionary relationships. Students will also be able to describe relationships between form and function, and articulate the role of museum collections in avian biology. Students will be able to discuss and critique peer-review papers in avian ecology, evolution and behavior.
BIOL 453. Mammalogy (5).
Evolution, taxonomy, and ecology of mammals with laboratory emphasis on Pacific Northwest mammals. Three hours lecture and four hours laboratory per week.
Prerequisite: BIOL 183.
BIOL 454. Histology (3). An introduction to the basic tissues of vertebrates, including humans. Three hours of lecture per week. Prerequisites: BIOL 353 or BIOL 356 or EXSC 351 and EXSC 351LAB.
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of the four basic tissue types found in the vertebrate (including human) body.
Identify detailed histological structures associated with the major vertebrate organ systems. Relate physical structure to biological function across all levels of organization.
BIOL 455. Integrative Animal Physiology (5). The
comparative study of animal physiology, with a broad approach crossing organizational levels. Three hours lecture and four hours laboratory per week. A student cannot use BIOL 355/356 and BIOL 455 in the major. Prerequisites: BIOL 183 and BIOL 213.
Upon successful completion of this course, the student will be able to:
Propose, execute, and present a scientific experiment in the field of physiology. Perform scientific techniques in the field of physiology. Critically analyze published scientific work.
Describe physiological functioning of various systems in animals.
BIOL 457. Fundamentals of Neuroscience (5). The study of integrated neuroscience from the molecular to the systems
level. Included is examination of neural plasticity in the developing and adult brain as well as dysfunctions associated with disease states.
Prerequisites: BIOL 183 and either CHEM 431 or BIOL 430.

Upon successful completion of this course, the student will be able to:
Apply principles of cell biology to explain the structure and function, and cellular components of synaptic transmission.
Explain how sensory -information is processed and integrated into behavioral responses.
Explain normal cellular events in synaptic plasticity that lead to learning and memory. And relate how those events are altered in neurodegenerative diseases.
Relate developmental events of axon growth and synapse formation to the pattern of adult connections among various systems.
Develop skills in reading primary literature in the field of neuroscience

BIOL 459. Winter Biology
(4). A field and laboratory course exploring the ecology and physiology of organisms in winter. Activities will include laboratory work, field trips, and an overnight camping trip. Prerequisites: BIOL 183 and BIOL 213.
Upon successful completion of this course, the student will be able to:
Describe why winters are cold, and how snow forms and changes once on the ground. Build and comfortably use snow shelters.
Describe basic concepts of how cold affects plants and animals. Formulate a scientific question related to winter biology, and answer the question through creation of their own experiment.
BIOL 461. Community
Ecology (3). Principles of the structure and function of ecological communities. Three hours lecture/discussion per week. Prerequisite: BIOL 360. Upon successful completion of this course, the student will be able to:
Evaluate general patterns and processes of community structure and dynamics, including indicators of diversity, connectance, equilibrium, and succession Identify direct and indirect interactions among the species in a community
Compare and evaluate study design, methods, and data analysis techniques for community ecology research Apply principles of community ecology toward solutions to ecological problems such as declining biodiversity, establishment of exotics, biological control
BIOL 462. Wildlife and
Fisheries Ecology (5).
Ecological principles of wildlife and fish populations and communities as they relate to management theory and practice in the Pacific Northwest. Three hours lecture/discussion and four hours laboratory/field work per
week. Weekend field trips may be required. Prerequisite:
BIOL 360.
BIOL 463. Limnology (5).
Chemical, physical, and biological characteristics of inland waters. Three hours lecture and four hours laboratory per week. Prerequisite: BIOL 360. Upon successful completion of this course, the student will be able to: Describe the structure and function of freshwater aquatic systems Explain the ecological interactions among aquatic organisms Analyze and interpret physical, chemical and biological data collected from lakes and rivers Conduct a basic assessment of the physical structure and ecological status of rivers and lakes using a variety of standard sampling equipment and procedures
Collect and identify samples of aquatic organisms common to inland waters of the Pacific Northwest
Evaluate technical reports and manuscripts related to aquatic ecology
BIOL 464. Terrestrial Plant
Ecology (5). The ecological relationships of plant species and plant communities. Three hours lecture and either four hours laboratory. Weekend field trips may be required. Prerequisite: BIOL 360 . Upon successful completion of this course, the student will be able to:
Describe plant physiological ecology concepts and methods Utilize plant population growth and reproduction models. Describe community and landscape ecology concepts and methods.
Choose correct methods to measure attributes of plant communities
Apply correct statistical tests to ecological data Apply simple multivariate methods of analysis to large vegetation data sets
Be able to search for, cite, and interpret relevant primary
literature on plant ecology topics
Utilize spreadsheet software to perform complex calculations on large data sets
Be able to present research results to a group of biology student peers
BIOL 465. Biology of Animal
Behavior (4). Three lectures
and two hours of laboratory a
week. Prerequisites: BIOL 213 or PSY 362.
BIOL 466. Conservation
Biology (5). An introduction to the theory and practice of conservation biology, with emphasis on case studies. Two hours lecture, one hour discussion, and four hours lab or field study per week. Weekend field trips may be required. BIOL 466 and BIOL 566 are equivalent courses; students may not receive credit for both. Prerequisite:
BIOL 360.
BIOL 467. Biological Field
Techniques (5). Intensive, field-based experience in techniques used by field biologists to sample organisms and their environments, and analyze data collected in the field.
Upon successful completion of this course, the student will be able to:
Describe various methods for
sampling (collecting and
quantifying numbers of)
aquatic and terrestrial
organisms
Choose an appropriate
sampling technique to answer a
biological question
Perform several different
biological sampling methods in
terrestrial and aquatic
environments
Analyze and interpret data
from field sampling
Discuss sources of error and
bias in various sampling methods
Demonstrate a professional, inquiring attitude toward learning, applying, and evaluating field techniques
BIOL 470. Mechanisms of
Evolution (5). Darwinian
evolution and the modern
synthesis. Prerequisite: BIOL 321.

Upon successful completion of this course, the student will be able to:
Explain evolutionary theory in terms of the mechanisms of evolution and describe evolutionary influence across all levels of biological organization.
Quantify changes in the genetic composition of populations that result from evolution. Compare different mechanisms of speciation and various ways that biologists define species. Explain how macroevolutionary changes occur across evolutionary time. Apply evolutionary principles, hypotheses, and investigative methods to test a wide range of biological phenomena.
Analyze, interpret, and evaluate current evolutionary research.
BIOL 490. Cooperative
Education (1-12). An
individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. By permission.
May be repeated for credit.
Grade will either be S or U ,
BIOL 491. Workshop (1-6).
May be repeated for credit.
BIOL 492. Laboratory
Experience in Teaching
Biological Sciences (2).
Experience in planning, managing, and teaching in a laboratory setting. May be repeated for credit.

## BIOL 493. Biological Field <br> Practicum (Put on reserve

9/16/16) (1-15). Individual or group off-campus experience in the field study of biological phenomena. May be repeated for credit. (Put on reserve 9/16/16. Last taught in 2012. Will go inactive $8 / 24 / 19$.)
BIOL 495. Research (1-6). Laboratory research experience. May be repeated up to 6 credits.

Upon successful completion of this course, the student will be able to:
Design research project in
biological sciences
Perform experiments Collect and analyze data for research projects
Present research is written or oral form
BIOL 496. Individual Study (1-6).
BIOL 497. Honors Thesis (1-
5). Either this course or BIOL 499S, Senior Seminar, is required in all baccalaureate programs of the biology department. Prerequisite: admission to Departmental Honors Program.
BIOL 498. Special Topics (16).

BIOL 499. Seminar (1-5). BIOL 377LAB. Regional Natural History (3). Special fees required. One- to twoweek field trip to explore biological and physical patterns and processes in selected regions of North America. Emphasis will be on recording field observations, keeping a field journal, field study techniques, and performing investigations chosen and developed by student participants. Subtitles will identify the region studied. BIOL 377LAB and GEOL 377LAB are cross-listed courses, students may not receive credit for both. May be repeated for credit.
BIOL 426LAB. Medical Microbiology Laboratory (2). Prerequisite: BIOL 323. Coprerequisite: BIOL 426.

## BIOL 431LAB. The Cell

 Biology of Cancer Lab (2). This course will allow students to perform advanced laboratory techniques in biochemistry, cell and molecular biology related to the study and diagnosing of cancer. Co- or prerequisite: BIOL 431.Upon successful completion of this course, the student will be able to:
Use quantitate reasoning to analyze and interpret data

Perform and evaluate experiments using molecular and cell techniques.
Design and perform research projects relating to cancer biology.
Analyze large data sets.
BIOL 461LAB. Community
Ecology Laboratory (2).
Laboratory and field study of the structure and function of ecological communities. Four hours of laboratory/field work per week. Weekend field trips may be required. Co- or prerequisite: BIOL 461 Upon successful completion of this course, the student will be able to:
Design and implement an experiment or observational study of community ecology, using appropriate scientific methodology.
Use a variety of data summary and analysis techniques to analyze data sets in community ecology.
Recognize and compare
different types of communities in nature, and the difficulties in defining community
boundaries
BIOL 499S. Senior Seminar
(1). Biological sciences: reading, writing, and speaking. Either this course or BIOL 497, Honors Thesis, is required in all baccalaureate programs of the biology department. Prerequisite: senior standing.
BME 146. Basic Accounting
(5). Basic introductory course to accounting concepts. May not be taken for college credit if any other college accounting course or courses have been completed. May be audited. Formerly BSED 146, students may not receive credit for both.
BME 296. Individual Study
(1-6). Formerly BSED 296 students may not receive credit for both.
BME 298. Special Topics (16). Formerly BSED 298, students may not receive credit for both.
BME 299. Seminar (1-5).
Formerly BSED 299, students
may not receive credit for both.

BME 316. Educational Technology for Business and Marketing (3). Students will explore a variety of concepts and resources related to the appropriate and effective integration of technology/media in school settings. Formerly BSED 316, students may not receive credit for both. Course will not have an established scheduling pattern. Prerequisites: CS 101 or IT 101 and full admission to the Teacher Certification Program.
Upon successful completion of this course, the student will be able to:
Utilize web and multi-media applications.
Identify and access resources for resolving technology issues in the classroom and personal workspace.
Apply programming languages.
Articulate how business functions relate to data and information, input, storage, manipulation, and presentation. Select and apply information systems across the curriculum. Analyze, design, and develop information systems using appropriate tools.
Identify the technical elements of e-commerce.
BME 346. Basic Accounting for Business and Marketing Education (5). For business and marketing education majors to become proficient in secondary level accounting course subject matter. Prerequisite: CTE 310 and conditional admission to the Teacher Certification Program. Upon successful completion of this course, the student will be able to:
Complete the various steps of the accounting cycle and explain the purpose of each step.
Determine the value of assets, liabilities, and owner's equity according to generally accepted accounting principles explaining when and why they are used.

Prepare, interpret, and analyze financial statements using manual and computerized systems for service, merchandising, and manufacturing businesses. Demonstrate leadership and teamwork abilities within a group setting.
Demonstrate acceptable methods for teaching accounting.
Develop the ability to monitor student progress.
Demonstrate the ability to maintain accurate student records.

## BME 347. Marketing

 Curriculum for Secondary Education (4). This course prepares Business and Marketing Education majors for the curricular materials they will teach in secondary marketing education programs.Prerequisite: admission to the business and marketing education major.
Upon successful completion of this course, the student will be able to:
Construct learning materials related to secondary level marketing education courses.
Construct frameworks for secondary level marketing education courses.
Justify the inclusion of a
Career and Technical
Education Student
Organization as part of a secondary marketing education program.
Outline the sequence and content of a typical secondary level marketing education program.

## BME 396. Individual Study

(1-6). May be repeated if subject is different.
BME 397. Honors (1-12).
Prerequisite: admission to department honors program.
BME 398. Special Topics (1-
6). May be repeated if subject is different.
BME 399. Seminar (1-5).
May be repeated if subject is different.
BME 445. Technology for Business and Marketing
Education (4). Skill
development in current technologies being applied in secondary business and marketing programs. Course will not have an established scheduling pattern. Upon successful completion of this course, the student will be able to:
Examine educational applications that are currently being used to administer secondary business and marketing education. (Examples may include Google Classroom, collaborative applications, communication applications, and online gradebooks.)
Identify appropriate uses of educational applications for administering secondary business and marketing education programs. Design administrative educational applications that can be used professionally. Prepare to accomplish industry certifications for administrative educational applications. (Example: Google Certified Educator Levels 1 \& 2) Examine software and online applications that are currently being taught in secondary business and marketing education curricula. (Examples may include Google Docs and Adobe Creative Cloud.) Demonstrate proficient skills in software and online applications that are currently being applied in secondary business and marketing education technology curricula. Prepare curricular materials that are appropriate for use in a secondary business and marketing education technology course.
BME 450. Curriculum Development for Business and Marketing Education
(4). Curriculum development for business and marketing education. Develop and design curricula based on business and industry standards and accepted current pedagogical and learning standards. Prerequisite: full admission to
the major and the Teacher Certification Program. Upon successful completion of this course, the student will be able to:
Develop curriculum based on business/industry standards as approved by local advisory committee
Design and implement program scope, sequence and assessment which enables students to develop marketable job skills
Demonstrate ability to write unit and lesson plans incorporating a variety of instructional strategies, and all aspects of career and technical program approval
Revise curriculum based on
occupational changes Promote development of students' self-awareness and aptitudes, confidence and character and how these relate to leadership and career pathways
Develop student initiative and teamwork skills
Encourage students to explore nontraditional career roles Identify the impact of diversity and equity issues on student learning
Design or adapt curriculum, technologies, and instructional strategies which address the diverse needs of students including special populations Collaborate with business and labor partners to infuse workplace standards and practice's into curriculum Publicize to students the program content and benefits Connect school experiences to workplace
Develop awareness of professional dispositions and employability skills outlined in SCANS
Identify and describe topics, course content, scope and sequence for business administration courses within a pathway
Demonstrate knowledge of or experience with related business and marketing organizations and industry certification

Utilize career resources to develop an information base that includes global occupational opportunities Demonstrate ability to apply knowledge gained from individual assessment to a comprehensive set of goals and an individual career plan Relate the importance of lifelong learning to career success
Design and implement program rationale, scope, sequence and assessment which enables students to develop marketable competencies Develop student initiative, teamwork skills, and projectbased learning . Identify stages of student career development including, but not limited to postsecondary opportunities and a 13th year plan
Accept and encourage students in nontraditional career roles Provide opportunities for students to productively integrate career and academic disciplines
Adjust curriculum to information received from students and employer evaluations
Access and use appropriate state agreements and contracts for work-based learning Adhere to on-site visitation training and employee evaluation criteria and requirements
BME 451. Methods and Materials for Teaching Information Technology (3).
Methods and materials for teaching Information Technology curricula. Course will not have an established scheduling pattern. Prerequisite: full admission to the major (Business and Marketing Education) and the Teacher Certification Program. Upon successful completion of this course, the student will be able to:
Align CTE student learning activities to state learning goals and the EALRS and GLES

Implement instructional strategies which focus students' achievements of benchmarks in related essential academic learning requirements (EALRs), grade level expectations (GLEs) and achievement of Goals $3 \& 4$ Align career-technical learning assessment with the state learning goals and the essential academic learning requirements (EALRs) and GLEs
Use instructional strategies and resources that incorporate current technology of business/industry Use instructional strategies that develop students' skills for making career decisions Use instructional strategies that develop student employability skills
Use instructional strategies that develop students' lifelong learning and goal setting related to entry, transition, and continuation in the educational process and in the workplace Develop effective assessment methods which may involve student, family, employer, and community
Use variety of assessment methods including portfolios and business/industry standard assessment tools to measure student learning and development Model positive business/industry-appropriate workplace practices Demonstrate business/industry appropriate technology skills
Publicize program content and benefits to family and community
Determine and implement effective and safe layout of classroom and/or lab facilities that provide learning opportunities for all Identify and apply strategies (including individualized instruction) needed to instruct special populations; special needs, disabled, gifted, ethnic, and culturally diverse learners Demonstrate ability to assess personal strengths and weaknesses as they relate to
career exploration and development
Relate work ethic, workplace relations, workplace diversity and workplace communication skills to career development and employability skills Demonstrate ability to foster teamwork and project-based learning
Recognize methods and opportunities for integrating school-based enterprise and/or simulations across the business administration curriculum Demonstrate ability to implement school-based enterprise and/or simulations Encourage teamwork and project-based learning Develop strategies to make an effective transition from school-to-work Foster student awareness of self and aptitudes, and development of confidence and character and how these relate to leadership and career pathways
Provide activities to connect
school experiences to
workplace and reinforce
school-based learning
Discuss with class and individual students results and comments on employer evaluations
Work with employers to assess and improve student workbased learning experiences Foster appropriate communication between workbased learning stakeholders Prepare students to deal with equity and diversity
Appropriately place students in work based learning according to career interest and aptitude Secure training stations for work experience Assist state approved student leadership organization members or other state approved student leadership organization members in developing and financing a yearly program of activities
BME 452. Methods and Materials for Teaching Basic Business and Marketing (3).
Methods and materials for teaching basic business
curricula. Course will not have an established scheduling pattern. Prerequisite: full admission to the major (Business and Marketing Education) and the Teacher Certification Program. Upon successful completion of this course, the student will be able to:
Align CTE student learning activities to state learning goals and the EALRS and GLES Implement instructional strategies which focus students' achievements of benchmarks in related essential academic learning requirements
(EALRs), grade level expectations (GLEs) and achievement of Goals 3 \& 4
Align career-technical learning assessment with the state learning goals and the essential academic learning requirements (EALRs) and

## GLEs

Demonstrate ability to write unit and lesson plans incorporating a variety of instructional strategies, and all aspects of career and technical program approval
Use instructional strategies and resources that incorporate current technology of business/industry
Use instructional strategies that develop students' skills for making career decisions Use instructional strategies that develop student employability skills
Use instructional strategies that develop students' lifelong
learning and goal setting related to entry, transition, and continuation in the educational process and in the workplace Develop effective assessment methods which may involve student, family, employer, and community
Use variety of assessment methods including portfolios and business/industry standard assessment tools to measure student learning and development Model positive business/industry-appropriate workplace practices

Demonstrate business/industry appropriate technology skills Identify and apply strategies (including individualized instruction) needed to instruct special populations; special needs, disabled, gifted, ethnic, and culturally diverse learners Demonstrate ability to assess personal strengths and weaknesses as they relate to career exploration and development
Relate work ethic, workplace relations, workplace diversity and workplace communication skills to career development and employability skills Demonstrate ability to foster teamwork and project-based learning
Recognize methods and opportunities for integrating school-based enterprise and/or simulations across the business administration curriculum Demonstrate ability to implement school-based enterprise and/or simulations Encourage teamwork and project-based learning
Develop strategies to make an effective transition from
school-to-work
Foster student awareness of self and aptitudes, and development of confidence and character and how these relate to leadership and career pathways
Provide activities to connect school experiences to workplace and reinforce school-based learning Discuss with class and individual students results and comments on employer evaluations
Foster appropriate communication between workbased learning stakeholders Prepare students to deal with equity and diversity
Appropriately place students in work based learning according to career interest and aptitude Secure training stations for work experience Assist state approved student leadership organization members or other state approved student leadership
organization members in developing and financing a yearly program of activities Demonstrate basic business management concepts and principles
Explain how activities such as gross domestic product, unemployment, and inflation affect business management decisions
BME 492. Practicum (5-15).
Grade will either be S or U .
Formerly BSED 492, students may not receive credit for both.
Prerequisite: permission of department chair.
BME 496. Individual Study
(1-6). May be repeated if subject is different.
BME 497. Honors (1-12).
Prerequisite: admission to department honors program.
BME 498. Special Topics (1-
6). May be repeated if subject is different.
BME 499. Seminar (1-5). May be repeated if subject is different.

## BME 493A. Undergraduate

## Research Practicum (1-3).

Conduct research under direct supervision of a professor with specific learning agreement required. Department requirements must be met. ADMG, IT, and RMT 493A are equivalent courses; students may not receive credit for more than one. May be repeated for credit. Grade will either be S or U . Formerly BSED 493A, students may not receive credit for both.
BUS 102. Business Computer
Skills (4). This course will develop practical computer skills needed to evaluate and help solve business problems. Students will learn how to use software commonly used in businesses to access, organize and analyze information and present it professionally in presentations and reports.
Basic Skills 6 - Computer Fundamentals.
Upon successful completion of this course, the student will be able to:
Use appropriate search tools to extract information and data
from commonly used online business databases. (e,g, Compustat)
Create spreadsheets to organize and analyze data to support business decisions. Use appropriate software to develop effective charts and tables to communicate business data and business processes. Develop professional looking business reports and presentations, incorporating graphics and charts.
BUS 110. Professional Development 1 (1). This course is designed to assist students with transition into College of Business and guide them through their major exploration and career planning processes. Admittance to a business major. Prerequisite: UNIV 101. Upon successful completion of this course, the student will be able to:
Research career interests, industry profiles, and explore suitable educational and career paths.
Initiate professional network and relationship building Demonstrate professional etiquette.
BUS 198. Special Topics (1-
6). May be repeated for credit. Upon successful completion of this course, the student will be able to:
Identify and understand the pre-admission requirements into the College of Business majors.
Identify and understand the graduation requirements of the College of Business through catalog and Faculty presentations.
Understand the many nonclassroom opportunities for growth and leadership present with the College of Business. Recognize the many nonclassroom opportunities and resources present with CWU.

## BUS 221. Introductory

 Business Statistics (5). Introduction to inferential business statistics. Using probability distributions and information from samples forbusiness decisions
Prerequisite: ECON 130 or MATH 130 or higher with a minimum grade of C - or higher.
BUS 241. Legal Environment of Business (5). An
introduction to legal reasoning, ethics in business, the law of contracts, torts, agency, sales, bailments, and personal property. Course will be offered every year (Fall, Winter, Spring, Summer). Prerequisite: sophomore standing or above. Upon successful completion of this course, the student will be able to:
Identify various sources of legal rules, statutes, consitutions and common law, describing the political, social and cultural influences that affect the institutions that develop and interpret them in the legal system.
Apply a model of ethical reasoning to derive logical decision making to ethical questions in the context of hypothethical business problems.
Define the role of the three branches of government, understand the federal and state court system and develop knowledge of the US Constitution. Recognize types of property interests, acceptable and unacceptable employment practices under federal and state law, identify torts, crimes and when contracts are valid, voidable and void under both common law and the Uniform Commercial code.
BUS 298. Special Topics (16).

BUS 299. Seminar (1-5). May
be repeated if subject is different.
BUS 301. Contemporary
Approaches to Personal and
Professional Development
(3). Address lifetime career development and the tools and resources to plan and manage transitions. Includes selfassessment, company and industry research, self branding
and promotion, networking, interviewing and the hiring process. Course will be offered every year (Fall, Winter and Spring).
Upon successful completion of this course, the student will be able to:
Discuss the various competencies in a typical business ecosystem and how your future role may relate. Demonstrate capability to research and discuss current business issues and events. Create and maintain your professional portfolio and other elements of your professional presence.
Demonstrate an ability to give/receive feedback to peers in a productive and professional manner. Written and verbal.
Prepare a future facing professional development plan.
BUS 310. Professional
Development 2 (1). This course is designed to assist students with transition into the professional business environment and provide them with the skills to implement effective career search strategies. May be repeated once. Grade will be S or U . Prerequisites: UNIV 101 and BUS 110 or MGT 200 or BUS 301.

Upon successful completion of this course, the student will be able to:
Develop and implement career search (e.g., internship, first professional job) plans. Demonstrate successful networking and interviewing skills.
Acquire industry knowledge and experience.
Integrate and apply professional development knowledge and skills to personal career plan.
BUS 311. Business Epistemology (3). This course introduces the value of evidence-based research in business theory and practice in making successful choices in an uncertain and complex world. Course will be offered
every year (Fall, Winter, Spring, Summer). Prerequisites: BUS 221, ECON
201, MGT 380, AND MKT 360.

Upon successful completion of this course, the student will be able to:
Explain the benefits of evidence-based research in business
Describe the importance of theory in business research Summarize the steps in datadriven decision making Practice using data to solve common business problems Articulate an understanding of data implications in a system Using data, analyze a common problem in business

## BUS 374. Personal

Investments (5). Introduction to investment goals, strategies, and securities, including certificates of deposit, money market instruments, stocks, bonds, and mutual funds. Additional topics introduced are risk analysis, taxes, and portfolio basics. Does not count for credit in the finance specialization.
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of all aspects of personal investing, including investment goals, strategies and securities, risk analysis and portfolio management. Demonstrate written communication skills. Demonstrate the ability to solve problems in personal investing using financial calculators and spreadsheets. Demonstrate awareness of ethical issues in personal investing.
BUS 389. Sustainable Business (5). This course considers the role that business plays in bringing about an environmentally, socially, and economically sustainable future. Topics include how to build sustainability into a business and whether sustainable companies can be profitable. Course will be
offered every year (Winter and Summer).
Upon successful completion of this course, the student will be able to:
Understand the concepts of sustainability and sustainable development from various perspectives, be able to identify related institutions at various levels of organization and in various sectors, and be able to relate sustainability to other concepts such as resilience and planetary boundaries.
Explain different theories and perspectives on the roles and relationships of business, government, and civil society in bringing about a more sustainable world.
Understand the basic principles of industrial ecology, and employ life cycle analysis to calculate the social and environmental impacts of business activities. Identify the ways in which businesses positively and negatively impact the communities and societies in which they operate - socially, environmentally, and economically. Taking the perspective of business leaders, develop plans for integrating sustainability into their strategies, product marketing decisions, organizational structures, and internal activity systems. Identify the key stakeholders to sustainability issues, establish and manage relationships with these stakeholders, and negotiate and mediate the often conflicting demands and perspectives of diverse stakeholders.
BUS 396. Individual Study (1-6).
BUS 397. Honors (1-12).
Prerequisite: admission to department honors program.
BUS 398. Special Topics (16).

BUS 399. Seminar (1-5). May
be repeated if subject is different.
BUS 401. Business Boot
Camp (1). Supervised field
experience seminar. Onlocation industry engagement. Education, training, and business skills application in industry setting. May be repeated up to 5 credits. Grade will either be S or U .
Prerequisite: instructor permission.
Upon successful completion of this course, the student will be able to:
Apply business skills in industry setting.
Establish a professional network within the industry. Demonstrate professionalism in a field setting.
BUS 441. Advanced Business
Law (5). The law of negotiable instruments, suretyship, business structures including partnerships and corporations, trusts and estates, bankruptcy and government regulations of business. BUS 441 and BUS 541 are layered courses; students may not receive credit for both. Prerequisite:
BUS 241 and admission to the
College of Business major
AND completion of the
College of Business
Foundation courses (ACCT
251 and ACCT 252 and BUS
221 and BUS 241 and MATH
153 or MATH 154 or MATH
170 or MATH 172 or MATH
173 and ECON 201) with a
minimum C- grade in each
course and a minimum
collegiate GPA of 2.25 .
Formerly BUS 341, students
may not receive credit for both. Upon successful completion of this course, the student will be able to:
Demonstrate the ability to critically analyze new reports of current legal proceedings and issues related to material covered in the course. Demonstrate the ability to analyze the meaning of selected judicial cases including the management implications of legal rules drawn from those cases. Demonstrate knowledge and understanding of contemporary legal issues relating to international business
negotiable instruments, debtorcreditor relationships and business organizations.

## BUS 489. AACSB

Assessment (2). This end of program course provides the venue for students to document their learning accomplishments and their readiness for their professional careers. Course will be offered every year (Fall, Winter, Spring). Prerequisites: Admission to a College of Business Major
AND Completion of the
College of Business Foundation Courses (ACCT 251 and ACCT 252 and BUS
221 and BUS 241 and ECON
130 or MATH 130 and ECON
201 and MATH 153 or higher)
with a grade of C - of higher AND completion of College of Business Core Courses (ECON 202 and FIN 370 and SCM 310
and MIS 386 and MKT 362
and MGT 382 and COM 301
and ENG 311) with a
minimum grade of a C - in each course and a minimum
collegiate GPA of 2.25 AND
senior standing AND
completed application for graduation; (OR admission to a College of Business Graduate
Program). Co-requisite: MGT 489.

Upon successful completion of this course, the student will be able to:
Articulate knowledge of the key functional areas of business
Analyze business data
Apply problem solving skills
to a business situation
Evaluate the undergraduate
business educational
experience
Utilize professional development skills
BUS 490. Cooperative
Education (1-12). An individualized, contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. By permission.

May be repeated for credit. Grade will either be S or U . Prerequisite: 2.8 overall GPA.

## BUS 492. Applied

Leadership (2-5). Leadership practicum and mentorship expereince. Mentor, supervise and guide MGT 200 student groups through habit formation and professional skills acquisition. By permission of instructor. May be repeated up to 10 credits. Course will be offered every year (Fall, Winter, and Spring). Upon successful completion of this course, the student will be able to:
Design a developmental program for mentees that applies learning and mentorship theories. Measure mentee progress and program effectiveness Plan the mentoring of students enrolled in MGT 200 by applying leadership and mentorship theories. Formulate feedback techniques based on learning and mentorship theories Define effective performance and how it relates to task and context.
Create performance
benchmarks for MGT 200
student development.
BUS 495. Directed Research
(1-5). May be repeated for up to 15 credits. Grade will either be S or U . Prerequisite: permission of instructor.
BUS 496. Individual Study (1-6).
BUS 497. Honors (1-12).
Prerequisite: admission to department honors program.
BUS 498. Special Topics (16).

BUS 499. Seminar (1-5).
CHEM 101. Chemistry and
Planet Earth (5). Introduction to chemical principles and applications for non-scientists, with a focus on the interaction of human beings with the natural environment, 4 hours lecture and 2 hours lab weekly. NS-Applications Natural Science (L). Course will be offered every year (Fall, Spring, Summer).

Upon successful completion of this course, the student will be able to:
Recognize chemical vs physical changes, and describe matter in terms of atoms and molecules.
Predict formula and describe type of bonding for simple chemical compounds.
Identify relationships between experimental observations as expressed in tabular or graphic format and make hypotheses concerning cause and effect. Solve basic chemistry problems, using mathematical formulas, scientific notation, SI units, and balanced chemical equations.
Identify several types of chemical processes, including oxidation and reduction, dissolution of electrolytes, and acid-base reactions.
Describe the chemical make-up of earth's atmosphere; describe anthropogenic pollutants in our atmosphere, their source(s), and their effect on the natural environment, human society and individuals
Describe chemistry of energy production from fossil fuels, and discuss potential benefits and risks associated with several forms of energy production.
Discuss and analyze benefits vs risks/costs for either specific examples of recycling or use of specific fertilizers, insecticides and herbicides in food production.
Explain methods for water purification including distillation, reverse osmosis, and sedimentation-filtrationchlorination.
Make, record, and report experimental observations. Draw conclusions from data. Present and discuss data within a team of peers.
CHEM 106. Chemistry
Inquiry (5). Inquiry-based investigations into chemistry to help students develop understanding of fundamental concepts and the process of scientific investigation. This course is designed for
prospective elementary teachers but is open to all students. Course will not have an established scheduling pattern.
Upon successful completion of this course, the student will be able to:
Apply appropriate scientific investigative techniques to address questions about relevant chemistry concepts. Collect, analyze, and interpret quantitative and qualitative data to address questions about relevant chemistry concepts. Apply chemistry concepts and processes to personal and societal issues.
Articulate how their own ideas and understanding change and develop, and how the structure of the learning environment and curriculum facilitates these changes.
Find and utilize a variety of resources to learn and communicate about chemistry concepts and processes.

## CHEM 110. Introduction to

 Scientific Problem Solving Used in Modern Chemistry(1). Intended for students who have limited or no experience with scientific problem solving as it relates to modern chemistry. Students who have not taken high school chemistry or physics are strongly encouraged to take this course. A scientific calculator is required for this course. Course will be offered every year (Fall, Winter, Spring, Summer).
Upon successful completion of this course, the student will be able to:
Correctly arrange scientific equations in their scientific calculators and be able to obtain the correct answer to a given problem. Graphical analysis: Define the independent and dependent variable given graphical data of scientific measurements.
Identify direct and inverse relationships represented in graphical data of scientific measurements.

Interpret relations between two physical quantities based on graphical data of scientific measurements. Units of Measurement Recognize different measurement units and how to convert from one unit to another.
Identify physical quantities with combined units such as density or velocity.
Using quantities with combined units to convert from one unit to another.
Recognizing the limits of precision in scientific measurements and the use of significant figures to describe experimental precision. Students will correctly translate decimal notation to scientific notation.
Recognizing differences in the order of magnitude of numbers that are written in scientific notation.
CHEM 111. Introduction to
Chemistry (4). Chemical principles of the compositions, structure, properties, and changes of matter. Designed for students in certain health science programs. Four lectures weekly. Combined with CHEM 111LAB satisfies Physical and Natural World, Ways of Knowing pathway. NS-Fund Disc Phys and Biological Sciences. Course will be offered every year (Fall, Winter, Spring). Upon successful completion of this course, the student will be able to:
Apply chemistry concepts to real-world issues. Interpret quantitative and qualitative data to address questions about relevant chemistry topics.
Apply mathematical methods to the solution of common chemistry problems, including the use of scientific notation, significant figures and the quantitative use of balance chemical equations.
Read graphical data, including common x,y plots with axes properly labeled. Students will be able to extract qualitative
information about the relationship between quantities and quantitative information from the slope of $\mathrm{x}, \mathrm{y}$ plots. Understand the difference between accuracy and precision, and the difference between random and systematic error. Describe the terms in an algebraic expression and qualitatively describe the relationships between various terms. Students will be able to use an algebraic expression to solve quantitatively for various terms, given appropriate numerical information.

## CHEM 112. Introduction to

 Organic Chemistry (4). Structure, properties, nomenclature and reactions of carbon compounds. Course will be offered every year (Winter and Spring). Prerequisites: CHEM 111 or CHEM 183 with a grade of Cor higher.Upon successful completion of this course, the student will be able to:
Describe fundamental properties of carbon, its compounds, and various functional groups.
Identify alkanes, alkenes and alkynes. Write correct names and structures and identify reaction products. Identify aromatic compounds. Write correct names and structures and identify reaction products.
Identify alcohols, ethers and thiols. Write correct names and structures and identify reaction products.
Identify molecules that exist as stereoisomers. Predict the number of isomers and their properties.
Identify nitrogen-containing organic compounds. Write correct names and structures and identify reaction products. Identify aldehydes and ketones. Write correct names and structures and identify reaction products.
Identify carboxylic acids and their derivatives. Write correct
names and structures and identify reaction products.
CHEM 113. Introduction to Biochemistry (4). Structure, properties, and metabolism of biomolecules. Course will be offered every year (Spring). Prerequisite: CHEM 112 with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Identify the structure, properties, and names of common carbohydrates. Identify the structure, properties, and names of common lipids.
Identify the structure, properties, and names of common amino acids and proteins.
Describe the properties, structures and functions of enzymes.
Identify the structures, properties, names, and functions of nucleotides, RNA, and DNA.
Describe the fundamental characteristics of metabolism, anabolism, and catabolism. Identify the major pathways of carbohydrate, lipid, and amino acid metabolism. Describe the regulation, cell location, and energy changes associated with these pathways.
CHEM 181. General
Chemistry I (4). This course introduces chemistry concepts such as atoms and molecules, stoichiometry, solution chemistry, thermochemistry, electronic structure of the atom and periodicity, and chemical bonding. NS-Fund Disc Phys and Biological Sciences. Course will be offered every year (Fall, Winter and Spring). Prerequisites: strongly recommend high school chemistry and recommend qualification for MATH 153. Upon successful completion of this course, the student will be able to:
Demonstrate a working knowledge of chemical concepts such as atoms and molecules, stoichiometry, solution chemistry,
thermochemistry, electronic structure of the atom and periodicity, and chemical bonding.
Calculate extensive and intensive properties through basic algebra.
Display a working knowledge
of IUPAC nomenclature
Demonstrate a working
knowledge of chemical
concepts for personal health
and safety, the health and safety of others, and impacts on the local environment
Apply chemistry concepts to real-world issues. Interpret quantitative and qualitative data to address questions about relevant chemistry topics.
Apply mathematical methods to the solution of common chemistry problems, including the use of scientific notation, significant figures and the quantitative use of balance chemical equations.
Read graphical data, including common $\mathrm{x}, \mathrm{y}$ plots with axes properly labeled. Students will be able to extract qualitative information about the relationship between quantities and quantitative information from the slope of $x, y$ plots. Understand the difference between accuracy and precision, and the difference between random and systematic error. Describe the terms in an algebraic expression and qualitatively describe the relationships between various terms. Students will be able to use an algebraic expression to solve quantitatively for various terms, given appropriate numerical information.

## CHEM 182. General

Chemistry II (4). Builds upon concepts from CHEM 181.
Introduces molecular geometry and bonding theories, gas laws, solution properties and chemical kinetics. Students planning on taking CHEM 183 are advised that they must be qualified for MATH 154 before enrolling in CHEM 183. Course will be offered every
year (Winter and Spring).
Prerequisite: CHEM 181 with a
grade of C- or higher.
Upon successful completion of this course, the student will be able to:
Demonstrate a working
knowledge of chemical
concepts such as molecular geometry and bonding theories, gas laws, intermolecular
forces, solution properties, and chemical kinetics.
Calculate extensive and intensive properties through basic algebra. Display a working knowledge of IUPAC nomenclature. Follow mathematical derivations of chemical kinetics that assist in understanding complex chemical interactions.
Demonstrate a working knowledge of chemical concepts, for personal health and safety, the health and safety of others, and impacts on the local environment.
CHEM 183. General Chemistry III (4). Builds upon chemical concepts from CHEM 181 and CHEM 182. Introduces chemical equilibria, acid-base chemistry, solubility, entropy, free energy, and electrochemistry. Course will be offered every year (Fall and Spring). Prerequisite: CHEM 182 with a C- or higher, and MATH 153 with a grade of C or higher, or qualification for MATH 154 on COMPASS test.
Upon successful completion of this course, the student will be able to:
Demonstrate a working knowledge of chemical concepts such as chemical equilibria, acid-base chemistry, solubility, entropy, free energy, and electrochemistry. Calculate extensive and intensive properties through basic algebra. Display a working knowledge of IUPAC nomenclature.
Follow mathematical derivations of dynamic chemical equilibrium that
assist in understanding complex chemical interactions. Demonstrate a working knowledge of chemical concepts for personal health and safety, the health and safety of others, and impacts on the local environment. CHEM 295. Research (1-6).
By permission. May be repeated for credit. Course will be offered every year (Fall, Winter, and Spring).
CHEM 296. Individual Study (1-6).
CHEM 298. Special Topics (1-6).
CHEM 299. Seminar (1-5).
May be repeated if subject is different.
CHEM 332. Quantitative
Analysis (3). Principles of quantitative analytical chemistry, including statistical treatment of data, complex equilibria, activity, and volumetric, gravimetric, and instrumental analysis. Course will be offered every year (Fall). Prerequisites: CHEM 183 and either CHEM 183LAB or CHEM 193LAB with a grade of C - or higher in each. Co-requisite: CHEM 332LAB. Upon successful completion of this course, the student will be able to:
Compute analytical figures of merit.
Choose appropriate statistical tools.
Compute equilibrium concentrations of complex mixtures of species in aqueous solutions (e.g., precipitation, polyprotic acid-base, etc.) Compute activities. Theoretically reproduce and illustrate titration curves. Choose a buffer and describe how to prepare it.
CHEM 345. Environmental
Chemistry (5). Introduction to aquatic, atmospheric, and soil chemistry. Chemical analysis of environmental samples collected on class field trips. Three lectures and six laboratory hours per week. Course will be offered on even numbered years (Spring).

Prerequisite: CHEM 183 with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Apply basic chemical concepts, such as equilibrium, oxidationreduction reactions, kinetics, solubility, and acid-base chemistry to complex environmental processes Collaborate with class mates in researching a topic of interest and presenting it. Derive aqueous concentration of species in different ambient environments from a $\mathrm{pE}-\mathrm{pH}$ diagram.
Collect field samples of waters, air, and soils.
Perform various chemical analyses of liquid, solid and gaseous environmental samples.
Interpret results obtained from analyses.
Coordinate lab work with partners.
Perform modeling of speciation of metals in the environment.

## CHEM 350. Inorganic

Chemistry (3). Atomic structure, properties, and chemical bonding. Includes a discussion of molecular orbital theory, symmetry, group theory, and bonding in solids. Course will be offered every year (Winter). Prerequisites: CHEM 183 and either PHYS
113 or PHYS 123 or PHYS 183 with a grade of C- or higher in each.
Upon successful completion of this course, the student will be able to:
Describe the periodic properties of the elements using the periodic table. Describe the properties of the atomic orbitals that are derived from quantum mechanics, be able to sketch atomic orbitals. Describe the essential principals of molecular orbital theory, sketch and interpret molecular orbital diagrams for diatomic molecules, interpret molecular orbital diagrams for polyatomic molecules.

Describe the different types of solids and identify the primary bonding mechanisms of each. Identify the basic symmetry elements and the point group of molecules.
Know the expected geometries of coordination compounds and name simple coordination compounds.
CHEM 361. Organic
Chemistry I (3). An
introduction to organic chemistry for students majoring in the sciences or preparing for health related careers. Organic structures, nomenclature, spectroscopy, and chemistry of alkanes, alkenes, and alkynes. Course will be offered every year (Fall and Winter). Co- or prerequisite: CHEM 183 with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Recognize applications of organic chemistry in our everyday lives
Apply the IUPAC
nomenclature system for alkanes, alkenes, alkynes, and halo alkanes.
Draw and interpret structures for organic compounds. Predict trends in physical properties for a series of related organic compounds. Predict three dimensional conformations for organic molecules.
Use infrared spectroscopy and nuclear magnetic resonance spectroscopy in the identification of organic structures.
Draw a mechanism for a typical electrophilic addition reaction to an alkene and show the structures of intermediate carbocation's.
Identify typical reagents used for basic synthetic reactions of alkenes and alkynes.

## CHEM 362. Organic

Chemistry II (3). Part two of the organic chemistry series. Stereochemistry, nucleophilic substitution and elimination, chemistry of alcohols, ethers, and an introduction to the
chemistry of the carbonyl group. Course will be offered every year (Winter and Spring). Prerequisite: CHEM 361 with a grade of Cor higher.
CHEM 363. Organic Chemistry III (3). Part three of the organic chemistry series. Carbonyl alpha-substitutions and condensations and the chemistry of carboxylic acid derivatives, benzene, amines, and carbohydrates. Course will be offered every year (Spring). Prerequisites: CHEM 362 and CHEM 361LAB with a grade of C - or higher.
Upon successful completion of this course, the student will be able to:
Recognize applications of organic chemistry in our everyday lives.
Apply the IUPAC nomenclature system for carboxylic acid derivatives, aromatic compounds, and amines.
Draw and interpret structures
for organic compounds. Predict trends in physical properties for a series of related organic compounds. Predict the aromatic character of organic molecules.
Use mass spectrometry and ultraviolet spectroscopy in the identification of organic structures.
Draw a mechanism for typical nucleophilic acyl substitution and carbonyl alpha-substitution and condensation reactions showing the structures of all intermediates.
Identify typical reagents used for basic synthetic reactions of carboxylic acid derivatives, aromatic compounds, amines, and carbohydrates
CHEM 381. Physical

## Chemistry

(Thermodynamics) (5).
Thermodynamics and chemical equilibrium. Phase diagrams. Electrochemistry. Course will be offered every year (Fall). Prerequisites: (CHEM 183 and either CHEM 183LAB or CHEM 193LAB),
(MATH 272), and (either

PHYS 113 or PHYS 123 or PHYS 183) with a grade of Cor higher in each. Upon successful completion of this course, the student will be able to:
Use equations of state to solve problems in thermodynamics and deepen their insight into the physical world. Use the concepts of internal energy, entropy, the Gibbs energy and the Helmholtz energy to solve problems in thermodynamics and deepen their insight into the physical world.
Use partial derivatives as applied to thermodynamics. Interpret and use phase diagrams to solve problems in chemistry and deepen their insight into the physical world. Use concepts of phase equilibrium and chemical potential to solve problems in chemistry and deepen their insight into the physical world.
CHEM 382. Physical Chemistry (Quantum
Chemistry) (3). Introduction to quantum mechanics as applied to chemical systems. The electronic structure of atoms and molecules. Course will be offered every year (Winter). Prerequisite:
CHEM 381 with a grade of Cor higher.
Upon successful completion of this course, the student will be able to:
Use probability distribution functions to determine average values and event probabilities Solve the Schrodinger equation for a series of quantum mechanical systems including the particle-in-a-box, tunneling, the harmonic oscillator, and the rigid rotor. Use the quantum mechanical solutions for the hydrogen atom to determine physical quantities such as average distances of electrons from nuclei and orbital energies Incorporate the concepts of electron shielding, exchange symmetry, the Pauli Exclusion principle, Hund's rule, and spin-orbit coupling into their
understanding of many electron atoms.

## CHEM 383. Physical

 Chemistry (Quantum, Statistical Mechanics) III (4). Electronic structures of atoms and molecules. Introduction to statistical thermodynamics. Course will be offered every year (Spring). Prerequisite: CHEM 382 with a grade of Cor higher.Upon successful completion of this course, the student will be able to:
Use the quantum mechanical solutions for the hydrogen atom to determine physical quantities such as average distances of electrons from nuclei and orbital energies. Incorporate the concepts of electron shielding, exchange symmetry, the Pauli Exclusion principle, Hund's rule, and spin-orbit coupling into their understanding of many electron atoms. Use the variational method to determine the energies and wave functions for molecular systems.
Use the Boltzmann distribution to determine how a large ensemble of particles is distributed among the energy states available for electronic, translational, rotational, and vibrational modes of motion. Derive the expressions of thermodynamic functions including internal energy, enthalpy, Gibbs energy, Helmholtz energy, entropy, and heat capacity.
CHEM 395. Research (1-6).
By permission. May be repeated for credit.
CHEM 396. Individual Study
(1-6). May be repeated if subject is different.
CHEM 397. Honors (1-12).
Prerequisite: admission to department honors program. CHEM 398. Special Topics (1-6). May be repeated if subject is different.
CHEM 399. Seminar (1-5). May be repeated if subject is different.
CHEM 431. Biochemistry I
(3). Chemical structure,
physical properties, nomenclature and function of proteins, carbohydrates, lipids, nucleic acids, and biological membranes. Protein function includes membrane transporters and enzyme kinetics, inhibition, and regulation. Course will be offered every year (Fall). Prerequisite: CHEM 362 with a grade of C- or higher.
Upon successful completion of this course, the student will be able to:
Correctly use biochemical vocabulary
Draw structural formulae and name selected molecules within all four classes of biologically important molecules: proteins, lipids, carbohydrates and nucleic acids.
Describe in text or with structural formulae the chemical structure of macromolecules made from amino acids, nucleotides, or carbohydrates.
Describe the chemical and physical forces that collectively maintain the structure of macromolecules and the biological membrane. Describe the relationship between the physiochemical properties of molecules and their biological function. Explain the chemical basis of selected biochemical laboratory techniques and interpret data resulting from those techniques.
Calculate kinetic constants of enzymes and protein transporters using the Michaelis-Menton equation or tabulated data.

## CHEM 432. Biochemistry II

(3). Metabolism of carbohydrates, lipids, amino acids, and nucleotides, including metabolic regulation and thermodynamics. Course will be offered every year (Winter). Prerequisite: CHEM 431 with a grade of C - or higher.
Upon successful completion of this course, the student will be able to:

Correctly use biochemical vocabulary.
Describe the free energy changes that occur in intermediary metabolism Describe reaction pathways of intermediary metabolism by naming and writing structural formulae of intermediates, naming enzymes, and naming cofactors in glycolysis, the tricarboxylic acid cycle, and beta-oxidation of fatty acids. Summarize intermediary metabolic pathways by naming select intermediates, enzymes, and cofactors in cholesterol synthesis, glycogen metabolism, amino acid metabolism, and nucleotide metabolism.
Describe the cellular structural requirements and chemical steps that form an electrochemical gradient in mitochondria and how the gradient contributes to ATP synthesis (electron transport and oxidative phosphorylation). Describe the role of allostery, covalent modification, and hormones in the regulation of select metabolic pathways. Describe the chemical components and processes involved in signal transduction. CHEM 433. Biochemistry III (3). In depth coverage of the central dogma of biochemistry, including DNA replication and repair and transcriptional and translational aspects of genetic regulation, with emphasis on common biochemical techniques and data analysis. Course will be offered every year (Spring). Prerequisite: CHEM 431 with a grade of Cor higher.
Upon successful completion of this course, the student will be able to:
Correctly use biochemical vocabulary.
Describe in text or with drawings the basis for biochemical experimental techniques
Critically analyze data from biochemical experiments.

Describe in text or with drawings mechanisms of transcriptional and translational regulation.
Analyze protein and nucleic acid sequences using common online tools.
CHEM 452. Instrumental Analysis Lecture (3). Theory and functional aspects of modern analytical instrumentation. Emphasis is on components of instruments, limitations of measurements, and applicability of techniques to specific analytical problems. Course will be offered every year (Winter). Prerequisites: CHEM 332 and CHEM 332LAB with a grade of C - or higher. Co-requisite: CHEM 452LAB.
Upon successful completion of this course, the student will be able to:
Describe the theoretical basis for each technique. Give examples of specific instruments of every analytical technique
Draw and label schematics of each instrument including components.
Demonstrate ability to select the best analytical technique to apply to a specific chemical problem.
CHEM 473. Transition Metal
Chemistry (3). A survey of the structure, spectroscopy, and characterization of transition metal compounds, and the electronic structures of transition metals and lanthanides. Course will be offered on on odd numbered years (Spring). Prerequisites: CHEM 350 and 382 with a grade of C - or higher in each. Upon successful completion of this course, the student will be able to:
Name inorganic compounds Interpret magnetic susceptibility data
Interpret UV/Vis absorption spectra
Apply ligand field and crystal field theories to predict the electronic structure of transition metal complexes

Apply ligand field and crystal field theories to predict the geometry of transition metal complexes
Interpret Tanabe-Sugano diagrams: Use molecular orbital theory to describe the electronic structure of transition metal complexes Use term symbols to identify electronic transitions in lanthanide ions.
CHEM 488. Colloquium (1).
Students prepare a poster presentation on a current topic in chemistry. May be from a research experience or from a review of the chemistry literature. Course will be offered every year (Fall, Winter and Spring). Prerequisite: senior standing. Upon successful completion of this course, the student will be able to:
Search the peer-reviewed academic literature in chemistry. Critically review journal articles on topics in chemistry. Prepare a well-organized and informative poster presentation on a current topic in chemistry. Defend and explain arguments made during the presentation. Critically review/assess the work of a peer.
CHEM 490. Cooperative Education (1-12). An individualized contracted field experience with business, industry, government, or social service agencies. This contractual arrangement involves a student learning plan, cooperating employer supervision, and faculty coordination. May be repeated for credit. Grade will either be S or U. Course will not have an established scheduling pattern. Prerequisite: prior approval.
CHEM 491. Workshop (1-6). May be repeated for credit.
CHEM 492. Laboratory
Experience in Teaching
Chemistry (2). Integrates both chemistry and education in order to guide teaching assistants into hands-on, inquiry-based approaches to learning in the laboratory
environment. May be repeated for credit. Grade will be either S or U . Additional time to be assigned. Course will be offered every year (Fall, Winter and Spring). Upon successful completion of this course, the student will be able to:
Demonstrate effective teaching methods in an authentic teaching environment. Perform safe and appropriate laboratory techniques and model this to their laboratory students.
Demonstrate an understanding of chemical safety and how to educate themselves on ordering and proper storage of chemicals.
Develop a personal teaching philosophy.
Integrate chemistry and education in a manner that is consistent with the most current and appropriate practices in both fields. Reflect upon their teaching practices and align them with accepted teaching practices in the learning laboratory.
CHEM 495. Senior Research (1-6). By permission. May be repeated for credit.
CHEM 496. Individual Study (1-6).
CHEM 497. Honors (1-12).
Prerequisite: admission to department honors program. CHEM 498. Special Topics (1-6).
CHEM 499. Seminar (1-5).
CHEM 111LAB.
Introductory Chemistry
Laboratory (1). Introduction to basic chemistry techniques. Two hours laboratory weekly. Combined with CHEM 111 lecture satisfies Physical and Natural World, Ways of Knowing. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter, Spring and Summer). Co- or prerequisite: CHEM 111.
Upon successful completion of this course, the student will be able to:
Apply chemistry concepts to real-world issues.

Interpret quantitative and qualitative data to address questions about relevant chemistry topics.
Apply mathematical methods to the solution of common chemistry problems, including the use of scientific notation, significant figures and the quantitative use of balance chemical equations.
Read graphical data, including common x,y plots with axes properly labeled. Students will be able to extract qualitative information about the relationship between quantities and quantitative information from the slope of $x, y$ plots. Understand the difference between accuracy and precision, and the difference between random and systematic error.
Describe the terms in an algebraic expression and qualitatively describe the relationships between various terms. Students will be able to use an algebraic expression to solve quantitatively for various terms, given appropriate numerical information.

## CHEM 112LAB.

Introduction to Organic Chemistry Laboratory (1). Basic techniques in organic chemistry. Two hours of laboratory weekly. Course will be offered every year (Winter and Spring). Prerequisites: CHEM 111LAB or CHEM 183LAB or CHEM 193LAB with a grade of C - or higher. Pre- or Corequisite: CHEM 112.

Upon successful completion of this course, the student will be able to:
Know principles of laboratory
safety and demonstrate safe techniques
Demonstrate ability to use common organic lab techniques such as recrystallization, extraction, and determination of melting point.
Carry out laboratory synthesis and identification of the product by melting point or by chemical reactivity.

Perform separation techniques such as distillation and thinlayer chromatography. Use laboratory data to calculate actual product yield, and calculate results from titration experiments.
CHEM 113LAB.
Introduction to Biochemistry
Laboratory (1). Supports
CHEM 113 lecture. Two hours
of laboratory weekly. Course
will be offered every year (Spring). Co- or prerequisite: CHEM 113. Prerequisite: CHEM 112LAB with a grade of C- or higher. Upon successful completion of this course, the student will be able to:
Know principles of laboratory safety and demonstrate safe techniques.
Perform common chemical tests of carbohydrates, lipids, amino acids, and proteins Demonstrate ability to use common biochemical techniques such as spectrophotometry and titration Use spreadsheets to analyze data for standard curves and to calculate concentrations of unknown solutions. Perform various qualitative tests to identify common biochemical substances and their properties
CHEM 181LAB. General Chemistry Laboratory I (1). This laboratory supports hands-on, inquiry-based approaches to exploring topics presented in CHEM 181. Three hours of laboratory weekly. NS-Fund Disc Phys and Biological Sciences (L). Course will be offered every year (Fall, Winter and Spring).
Co- or prerequisite:
CHEM 181.
Upon successful completion of this course, the student will be able to:
Demonstrate a working knowledge of chemical concepts such as atoms and molecules, stoichiometry, solution chemistry, thermochemistry, electronic structure of the atom and
periodicity, and chemical bonding.
Collect and analyze data, such as calculating extensive and intensive properties of chemicals, in a laboratory setting.
Demonstrate Proper
Laboratory Procedure (PLP),
such as performing safe
laboratory procedures, handling of chemicals and scientific apparatus, disposing of hazardous waste, and storing chemicals appropriately.
Demonstrate a working
knowledge of chemical concepts for personal health and safety, the health and safety of others, and impacts on the local environment.
CHEM 182LAB. General Chemistry Laboratory II (1). Integrates concepts learned in CHEM 181 and supports hands-on, inquiry-based approaches to topics presented in CHEM 182. Three hours of laboratory weekly. Course will be offered every year (Winter and Spring). Co- or
prerequisite: CHEM 182.
Prerequisite: CHEM 181LAB
with a grade of C - or higher.
Upon successful completion of this course, the student will be able to:
Demonstrate a working knowledge of chemical concepts, for personal health and safety, the health and safety of others, and impacts on the local environment. Collect and analyze data, such as calculating extensive and intensive properties of chemicals, in a laboratory setting.Demonstrate Proper Laboratory Procedure (PLP), such as performing safe laboratory procedures, handling of chemicals and scientific apparatus, disposing of hazardous waste, and storing chemicals appropriately. Demonstrate Proper Laboratory Procedure (PLP), such as performing safe laboratory procedures, handling of chemicals and scientific apparatus, disposing
of hazardous waste, and storing chemicals appropriately. Demonstrate a working knowledge of chemical concepts for personal health and safety, the health and safety of others, and impacts on the local environment.
CHEM 183LAB. General Chemistry Laboratory III
(1). Integrates concepts introduced in CHEM 181 and CHEM 182 and supports hands-on, inquiry-based approaches to topics in CHEM 183. Three hours of laboratory weekly. Course will be offered every year (Fall and Spring). Co- or prerequisite: CHEM
183. Prerequisite:

CHEM 182LAB with a grade of C - or higher.
Upon successful completion of this course, the student will be able to:
Demonstrate a working knowledge of chemical concepts such as chemical equilibria, acid-base chemistry, solubility, entropy, free energy and electrochemistry.
Collect and analyze data, such as calculating extensive and intensive properties of chemicals, in a laboratory setting.
Demonstrate Proper Laboratory Procedure (PLP), such as performing safe laboratory procedures, handling of chemicals and scientific apparatus, disposing of hazardous waste, and storing chemicals appropriately. Demonstrate a working knowledge of chemical concepts for personal health and safety, the health and safety of others, and impacts on the local environment.
CHEM 193LAB. General Chemistry III Honors Laboratory (1). As a more advanced version of CHEM 183LAB, this course integrates concepts introduced in CHEM 181 and CHEM 182 and utilizes hands-on, inquirybased approaches to investigate topics in CHEM 183. Students will work closely with one or more faculty on research-type
projects. Course will be offered every year (Spring).
Prerequisites: CHEM 182LAB
with a grade of $B$ or higher and permission of instructor. Corequisite: CHEM 183
Upon successful completion of this course, the student will be able to:
Demonstrate expertise in using laboratory equipment and associated techniques to make accurate and precise measurements
Collaborate with other students to develop an experimental approach to solving a problem or answering a posed question. Collect, analyze, and interpret experimental data to obtain meaningful results. Maintain an accurate and usable record of laboratory work, and prepare written lab reports that satisfactorily represent the work accomplished and describe its significance in the context of specified objectives.
CHEM 332LAB. Quantitative Analysis Laboratory (2).
Accompanying laboratory to quantitative chemistry including statistical treatment of data and volumetric, gravimetric, and instrumental analysis. Six hours of laboratory weekly. Course will be offered every year (Fall). Prerequisites: CHEM 183 and either CHEM 183LAB or CHEM 193LAB with a grade of C- or higher in each. Corequisite: CHEM 332.
Upon successful completion of this course, the student will be able to:
Compute analytical figures of merit.
Evaluate significance of results obtained.
Demonstrate effective use of tools of the trade in analytical chemistry.
Follow and organize laboratory procedures meticulously.
Apply knowledge acquired in lecture part.
Report results in a meaningful and clear fashion.

CHEM 361LAB. Organic Chemistry Laboratory I (2).
An introduction to organic chemistry laboratory techniques including melting point determination, recrystallization, extraction, distillation, chromatography, and IR and NMR spectroscopy. Six hours of laboratory weekly. Course will be offered every year (Fall and Winter). Co- or prerequisite: CHEM 361.
Upon successful completion of this course, the student will be able to:
Run IR spectra of liquids and solids. Gain experience interpreting IR and NMR spectra.
Determine identity and purity of organic solids through melting point determination. Purify organic compounds through recrystallization, extraction, distillation. Practice working with a team of other scientists in a laboratory setting. Practice making hypotheses, collecting and evaluating data. Practice technical report writing.
Practice finding information in the chemical literature, and extracting specific information from the primary chemical literature.

## CHEM 363LAB. Organic

 Chemistry Laboratory II (2) Application of basic laboratory techniques learned in CHEM 361LAB to more advanced functional grouptransformations. Six hours of laboratory weekly. Course will be offered every year (Spring) Co- or prerequisite: CHEM 363. Prerequisite: CHEM 361LAB with a grade of C- or higher. Upon successful completion of this course, the student will be able to:
Use basic laboratory
techniques for isolation and purification of organic compounds, including extraction, recrystallization, distillation, and chromatography.

Select and use a variety of chemistry laboratory and computational techniques that are appropriate in achieving the desired functional group transformations.
Draw and interpret structures for organic compounds. Draw mechanisms for all the reactions studied, including the structures of all intermediates.
Use infrared spectroscopy, gas chromatography, mass spectrometry, and nuclear magnetic resonance spectroscopy in the identification of organic structures.
Formulate and test hypotheses, trouble-shoot laboratory procedures, and draw conclusions from obtained data and observations.
CHEM 382LAB. Integrated Physical/Inorganic
Laboratory I (2). Synthesis of inorganic compounds and their characterizations using physical chemistry methods, with additional experiments in thermodynamics, quantum mechanics, and kinetics. Six hours of laboratory weekly. Course will be offered every year (Winter). Co- or prerequisite: CHEM 382. Upon successful completion of this course, the student will be able to:
Name inorganic compounds Obtain and interpret data used to characterize inorganic compounds, including UV/Vis absorption spectra, infrared spectra, and nuclear magnetic resonance data.
Perform basic inorganic synthesis.
Describe the physical principles that constitute the foundations of thermodynamics. Exhibit proficiency with data collection and data manipulation techniques applied to physical phenomena. Exhibit proficiency in the presentation of experimental results in a written format.
CHEM 383LAB. Integrated
Physical/Inorganic
Laboratory II (1). Synthesis
of inorganic compounds and their characterization using physical chemistry methods, with additional experiments in thermodynamics, quantum mechanics, and kinetics. Three hours of laboratory weekly. Course will be offered every year (Spring). Co- or prerequisite: CHEM 383. Prerequisite: CHEM 382LAB with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Synthesize inorganic compounds, including air sensitive materials.
Analyze inorganic compounds using traditional characterization techniques, and be able to interpret the results of the analysis. Apply modeling techniques to describe the kinetics of complexation reactions. Apply modern computational methods to the characterization of chemical compounds and reactions.

## CHEM 431LAB.

Biochemistry Laboratory (2).
Quantitative and qualitative biochemical techniques applied to proteins and nucleic acids. Six hours of laboratory weekly. Course will be offered every year (Fall and Winter). Co- or prerequisite: CHEM 431. Prerequisite: CHEM 361LAB with a grade of C - or higher. Upon successful completion of this course, the student will be able to:
Set-up and operate biochemical instrumentation
Record data in a laboratory notebook
Calculate data and organize results in tabular or graphical format
Interpret results from UVvisible, electrophoretic, and other biochemical experiments Write laboratory reports with correct nomenclature, vocabulary, and data presentation
Design experiments to characterize kinetic parameters of an enzyme

CHEM 433LAB.
Biochemistry Lab II (2).
Molecular cloning of a gene into a plasmid vector, followed by expression and purification of the encoded protein using modern chromatography techniques. Downstream analysis and experimentation is then conducted on the purified protein. Six hours of laboratory weekly. Course will be offered every year (Spring).
Prerequisite: CHEM 431LAB. Co-or prerequisite: CHEM 433.

Upon successful completion of this course, the student will be able to:
Clone a gene either by the polymerase chain reaction or by cut and paste with restriction endonucleases. Express and purify a protein by column chromatography.
Design experiments to characterize a protein. Calculate data and organize results in tabular or graphical format.
CHEM 452LAB.
Instrumental Analysis
Laboratory (2).
Accompanying laboratory to Instrumental Analysis Lecture providing hands-on experience with a number of instrumental methods used in modern chemical research, analysis, and process control. Six hours of laboratory weekly. Course will be offered every year (Winter). Co- or prerequisite: CHEM 452 with a grade of Cor higher.
Upon successful completion of this course, the student will be able to:
Follow detailed procedures for the use of new instruments and reporting.
Interpret experimental data within the limitations of the instrumental technique used. Draw and label schematics of each instrument used, including components. Cooperate and communicate with another member of the group.
CHIN 151. First-year
Chinese (5). Courses must be
taken in sequence
Conversational approach with intensive oral-aural drill. A firm foundation in basic structural principles of the language is necessary.
CHIN 152. First-year
Chinese (5). Courses must be taken in sequence. Conversational approach with intensive oral-aural drill. A firm foundation in basic structural principles of the language is necessary. Prerequisite: CHIN 151.
CHIN 153. First-year
Chinese (5). Courses must be taken in sequence. Conversational approach with intensive oral-aural drill. A firm foundation in basic structural principles of the language is necessary. Prerequisite: CHIN 152.
CHIN 251. Second-year Chinese (5). Graduated readings in modern Chinese writings with discussion conducted in Chinese. Courses must be taken in sequence.

## CHIN 252. Second-year

Chinese (5). Graduated readings in modern Chinese writings with discussion conducted in Chinese. Courses must be taken in sequence. Prerequisite: CHIN 251.
CHIN 253. Second-year Chinese (5). Graduated readings in modern Chinese writings with discussion conducted in Chinese. Courses must be taken in sequence. Prerequisite: CHIN 252.
CHIN 298. Special Topics (16).

CHIN 299. Seminar (1-5).
May be repeated if subject is different.
CHIN 301. Chinese
Literature in Translation (4).
A survey of Chinese literature in translation. CHIN 301 and
AST 301 are equivalent courses; students may not receive credit for both. Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of Chinese culture and trace the influence and
representation of this culture in the literary works.
Characterize the basic features of traditional Chinese literary forms or genres (prose, poetry, and drama).
Identify recurring themes, conflicts and characters in Chinese literary works.
CHIN 396. Individual Study
(1-6). May be repeated if subject is different.
CHIN 397. Honors (1-12).
Prerequisite: admission to department honors program.
CHIN 398. Special Topics (16).

CHIN 399. Seminar (1-6).
May be repeated if subject is different.
CHIN 461. Chinese Cinema
(4). An examination of the history, aesthetic achievements, major directors
and themes, and cultural explorations of Chinese cinema. Includes films from mainland China, Taiwan, and Hong Kong. Prerequisite: FILM 250.
CHIN 496. Individual Study (1-6).
CHIN 497. Honors (1-12).
Prerequisite: admission to
department honors program.
CHIN 498. Special Topics (16).

CHIN 499. Seminar (1-5).
May be repeated if subject is different.
CMGT 101. Construction and the Built Environment
(3). Introduction to constructon and the built environment focusing on construction history, categories, materials and parties involved. Career opportunities and professional ethics in the construction industry are also discussed. Course will be offered every year (Winter and Spring). Upon successful completion of this course, the student will be able to:
Demonstrate an understanding of the historical context of the built environment and construction categories. Apply basic construction terminology, parties and
industry structure involved in the construction discipline. Identify trends and career opportunities in the construction industry. Demonstrate an understanding of professional ethics found in the construction industry.
CMGT 201. Computer Applications in Construction
(3). Introduction to the use of innovative technologies, computer-based management and construction principles to manage construction projects. Two hours of lecture and two hours of lab per week.
Permission by instructor.
Course will be offered every year (Fall). Prerequisite: CMGT 101.
Upon successful completion of this course, the student will be able to:
Create effective electronic documents through the application of computers for the planning and management of construction projects. Use technology based equipment on a simulated construction project to plan and manage construction projects.
Use building information modeling (BIM) applications for planning and managing construction projects.
Demonstrate knowledge of Procore, HCSS, CMiC, SAGE and other cloud based construction software to effectively manage the construction process, documents in the office and jobsite.
CMGT 245. Light
Commercial Construction
(5). Construction of building foundations, commercial carpentry, and enclosing of wood frame structures. Students participate in construction of a building. Prerequisite: CMGT 265. Upon successful completion of this course, the student will be able to:
Demonstrate the ability to lay out a simple building and get the corners square within $1 / 4$ " (measuring diagonals).

Demonstrate the ability to construct footing and foundation wall forms and place concrete.
Demonstrate the ability to frame a simple wood frame building.
Demonstrate the ability to install siding roofing, doors and windows.
Estimate the required quantities of construction materials for a simple building within 5\%

## CMGT 265. Construction

Documents (3). Introduction to construction documents used for planning and management of construction processes. Extensive work with reading, interpreting and analyzing of construction plans, technical specifications, conditions, agreements, proposal documents and other related documents. Permission by instructor. Prerequisites: CMGT 201 and ETSC 161. Course will be offered every year (Fall and Winter). Upon successful completion of this course, the student will be able to:
Introduce construction contract documents to plan and manage construction processes. Understand the nomenclature, purpose, organization, and context of contract documents and how they control construction processes. Introduce and use electronic construction documents to plan and manage construction processes.
CMGT 267. Plane Surveying
(3). General surveying theory and practice pertaining to distance, elevation, and angle measurement. Includes traverse calculations and an emphasis on construction applications. Prerequisites: MATH 154 and CMGT 265. Co-requisites: CMGT 267LAB or CMGT 267LABHC.
Upon successful completion of this course, the student will be able to:
Properly account for surveying errors and error propagation and demonstrate an
understanding of distance and angle and direction measurement and units. Explain the components of surveying instruments and demonstrate a working knowledge and ability to properly care for these instruments.
Complete a 1500 foot level loop within fourth order accuracy. Complete a five sided closed traverse and corresponding calculations to third order accuracy. Perform calculations for traverse closure and area. Perform specific applications of surveying techniques and calculations pertaining to grade staking, earthwork volume calculations and building layout.
Demonstrate the ability to perform a stadia survey and create a site map, including topography.
Demonstrate the ability to accurately and neatly record field work.
CMGT 298. Special Topics (1-6). May be repeated if subject is different.
CMGT 299. Seminar (1-5). May be repeated if subject is different.
CMGT 320. Electrical
Systems (3). Design and specification of building electrical systems including circuit principles, power distribution, and low voltage controls. Two hours of lecture and two hours of lab per week.
By permission of instructor. Course will be offered every year (Winter). Prerequisites: CMGT 265.
Upon successful completion of this course, the student will be able to:
Obtain a fundamental understanding of electricity as applied to construction. Students will understand basic circuitry, electrical design considerations and electrical construction terminology. Draw and analyze simple electrical circuits, calculate voltage, resistance and amperages across various
parallel and or series circuits through the application of Ohm's law.
Quantitatively and qualitatively be able to describe the 3-phase power, electrical equipment, protective devices and power factor as applied to residential, commercial and heavy/civil projects.
Express themselves on the technical subject related to electrical construction.
CMGT 343. Construction
Estimating I (4). Quantity surveying and bid preparation for general construction. Use of cost handbooks, specifications, and bid documents. Three hours of lecture and one hour of practice. Permission by instructor. Course will be offered every year (Fall). Prerequisite: CMGT 265. Upon successful completion of this course, the student will be able to:
Define project activities (tasks) and work breakdown structure (WBS) for a residential and commercial building by considering equipment, subcontracts, material requirements and event sequencing.
Define sequential logic on a network diagram, including start to start, finish to start, start to finish and finish to finish logic, with lag and lead times identified. Manually perform a forward and backward pass on both an activity on node and activity on arrow network, identify the critical path, early and late starts and finishes and float times for each activity. Demonstrate an understanding of network scheduling as it relates to contract provisions, delay claims and dispute resolution for a project. Demonstrate a working knowledge of resource considerations, including resource histograms, allocation resource leveling, cash flow and earned value for a project. Properly utilize a variety of specialized scheduling
techniques, including PERT, linear scheduling and short interval scheduling. Accurately and quickly perform each of the items identified above on Microsoft Project 98 scheduling software, including proper use of reports and graphics.

## CMGT 344. Construction

 Estimating II (4). An advanced course to build on estimating skills, determine resources, cost requirements and bid preparation for general construction. Three hours lecture and two hours lab. Permission by instructor. Course will be offered every year (Winter). Prerequisite: CMGT 343 and CMGT 346. Upon successful completion of this course, the student will be able to:Able to identify the resource requirements required (materials, labor, equipment, time and money) to build construction projects. Able to reference safety items, understand how safety concerns is addressed at the job site, and how it must be planned for during an estimate. Understand how to determine and develop costs associated with the required resources to build construction projects. Demonstrate the ability to work in teams and estimate an entire commercial project.
CMGT 345. Heavy Civil Estimating II (4). Advanced estimating techniques, resource selection, cost requirements and bid preparation for heavy civil and highway construction. Three hours lecture and two hours lab. Permission by instructor. Course will be offered every year (Winter). Prerequisites: CMGT 343 and CMGT 347.
Upon successful completion of this course, the student will be able to:
Understand resource requirements required (materials, labor, equipment, cost, and schedule) to build heavy civil projects.

Identify and reference safety items, understand how safety concerns are addressed at the job site, and how they must be planned for during the estimate.
Develop a basic understanding on general heavy civil and highway construction techniques, means, and methods.
Work in teams and estimate and present to a bid review panel an entire heavy civil project.
Obtain general knowledge in a version of heavy civil estimating software package.
Have general knowledge of ethical standards and issues related to heavy civil estimating.
CMGT 346. Construction Methods and Materials (4).
Materials commonly used and the various methods employed in construction. Introduction to materials testing.
Prerequisite: CMGT 265.
CMGT 347. Heavy Civil Methods and Materials (4). Materials commonly used and the various methods employed with an emphasis on heavy, civil, marine, and highway construction.
Prerequisite: CMGT 265.
Upon successful completion of this course, the student will be able to:
Apply the basics of asphalt paving materials and equipment and the basic engineering properties of soil, including moisture content, densities and compaction to a construction site.
Apply the basics of concrete materials and equipment used in heavy civil, marine and highway construction to a construction site. Identify typical building construction materials used including their properties, advantages, disadvantages and installation.
Accurately research a selected topic and write a five to seven page research paper on this topic, including a bibliography.

Efficiently research, prepare and deliver a 20 minute oral presentation on an assigned topic, including proper use of visual aids, to a group of peers.
CMGT 396. Individual Study
(1-6). May be repeated if subject is different.
CMGT 397. Honors (1-12).
Prerequisite: admission to department honors program.
CMGT 398. Special Topics
(1-6). May be repeated if subject is different.
CMGT 399. Seminar (1-5).
May be repeated if subject is different.
CMGT 440. Temporary
Structures (4). An
introduction to the materials, methods, and techniques associated with temporary construction facilities such as false work, scaffolding, formwork, and cofferdams.
Prerequisites: IET 312 and
either CMGT 346, or CMGT 347.

Upon successful completion of this course, the student will be able to:
Demonstrate an ability to design vertical and horizontal formwork and shoring. Identify different types of scaffolding. They will be able to develop a project scaffolding layout including a safety plan. Demonstrate an ability to calculate the various forces required to construct cofferdams and earth retaining structures.
Define site dewatering methods.
Identify the various materials and techniques available to construct temporary structures.
CMGT 441. Wood and Steel
Construction (4). A
comprehensive study of the materials, design, and erection of wood and steel structures.
Prerequisites: IET 312 and
CMGT 346.
CMGT 442. Building Mechanical Systems (3). An introduction to building service systems. Study the interfaces and specifications of mechanical and plumbing systems in building
construction. Topics include plumbing, fire suppression, storm drainage, heat gain/loss, heating and cooling systems. Permission by instructor. Course will be offered every year (Winter). Prerequisite: CMGT 265.
Upon successful completion of this course, the student will be able to:
Properly identify items and terms related to building mechanical systems, including HVAC components, plumbing systems and site drainage systems. (ACCE SLO 8, 10, 20 DA)
Demonstrate an understanding of the principles of heat loss and gain in a building and properly calculate these values. Demonstrate an understanding of design criteria for modern HVAC systems and an ability to create a schematic of an HVAC and refrigeration system. (ACCE SLO 8, 10, 20 DA)
Demonstrate an understanding of a building supply system and a building drainage system. (ACCE SLO 20, DA) Demonstrate an understanding of the mechanical contracting industry and how this industry interacts with others on a construction project. (ACCE SLO 12, I) Demonstrate the ability to work on mechanical systems projects as a team player. Develop a basic understanding of the code requirements for mechanical systems.
CMGT 443. Heavy Civil
Utilities (3). An introduction to the materials, equipment, methods, and safety requirements for the construction of underground and above ground utilities including water, sewer, natural gas, and electrical systems. Prerequisites: CMGT 346 or CMGT 347.
Upon successful completion of this course, the student will be able to:
Identify the items and terminology of utility systems
and the techniques required to construct them. Identify the major materials used in constructing underground utilities. Be able to select the required equipment to install these materials.
Identify appropriate safety measures during the construction of underground utilities.
Demonstrate the basics of trenchless construction techniques.
Identify the major components of water/sewer treatment and central utility plants. Analyze a set of utility construction plans and provide a plan on type of equipment to be used, tasks and crew sizes required.
Demonstrate a basic understanding of the code requirements for underground utilities.

## CMGT 444. Codes,

Contracts, and Specifications
(4). Construction contracts and liability, bonding, arbitration, specifications, and building codes administration. Prerequisites: BUS 241, ENG 102, and CMGT 346 or CMGT 347.

CMGT 445. Heavy Civil
Contract Law (4).
Construction contracts, liability, bonding, arbitration, and heavy civil highway specifications. Prerequisites:
BUS 241, ENG 102, and CMGT 346 or CMGT 347. Upon successful completion of this course, the student will be able to:
Apply critical thinking and express a contract position based on principles of construction contract law, both orally and in writing. Distinguish between different types of contracting vehicles and payment types and understand the advantages and disadvantages of the various options.
Understand the importance of maintaining extensive
documentation.

Understand, work with and apply some of the most important construction contract clauses of, "changes", "differing site conditions", matters of time, construction safety, and environment compliance.
Understand magnitude, duties, and responsibilities associated with the changes and differing site condition clauses. Able to apply safety and environmental clauses effectively.
Distinguish what constitutes a
claim, how to quantify it in
terms of time and money by applying tools of cost accounting and cost engineering.
Distinguish between ethical and non-ethical behavior as applied to construction situations.
Determine the need for Bid, Payment, and Performance bonds. Know the reasons behind and responsibilities for liens, the Miller act and use of sureties.
Obtain a basic working knowledge of how to use the
WSDOT standard construction specifications.
CMGT 447. Construction
Planning, Scheduling, and
Control (4). Project scheduling and evaluation using network scheduling techniques, including critical path scheduling. Includes short interval scheduling and cash flow forecasting. Three hours of lecture and one hour of practice. Permission by instructor. Course will be offered every year (Spring). Prerequisite: CMGT 344 or CMGT 345.
Upon successful completion of this course, the student will be able to:
Define project activities \&
work breakdown structure
(WBS) for a commercial building or heavy civil project by considering equipment, subcontracts, material requirements and event sequencing.
Define sequential logic on a network diagram, including
finish to start, start to start, and finish to finish logic, with lag and lead times identified. Manually perform forward and backward passes on activity on node diagrams, identify critical path, early/late starts/finishes, and total \& free float for activities.
Demonstrate an understanding of network scheduling as it relates to contract provisions, delay claims and dispute resolution for a project.
Demonstrate a working knowledge of resource considerations, including resource histograms and resource leveling, cash flow and earned value for a project. Properly utilize project cost reports and predictive models including earned value management.
Accurately and quickly perform several of the items identified above on Primavera P6 scheduling software, including proper use of reports and graphics.
CMGT 450. Soils and
Foundations (4). An introduction to soil mechanics and analysis and design of both shallow and deep foundations.
Three hours lecture and two hours of lab. Permission by instructor. Course will be offered every year (Fall). Prerequisites: ETSC 312 and either CMGT 346 or CMGT 347.

Upon successful completion of this course, the student will be able to:
Identify and describe sources of soils, how these soils are deposited and their physical engineering properties as they relate to the Unified Classification System. Properly calculate engineering properties of soils, including water flow through soil using Darcy's equation, moisture content, densities and void ratio, based on information obtained from reading a soil boring log.
Demonstrate an understanding of soil compaction and the
relationship of soil density to moisture content. Properly calculate stress distribution in soils beneath both a point and distributed foundation load using influence coefficients, the Boussinesq Equation and chart and a Newmark chart. Properly calculate consolidation and settlement of a foundation over a clay stratum, as a function of time, using an "e $\log \mathrm{p}$ curve". Demonstrate an understanding of soil strength due to cohesion and internal friction, the tests used to determine this strength and how this relates to the ability of the soils to support a variety of structures.
Properly analyze and design both shallow and deep foundations, including spread footings, piling and piers. Also, properly determine at rest, active and passive lateral soil stress on earth retaining structures.

## CMGT 452. LEED in

## Sustainable Construction (4).

The process using LEED as a measurement for sustainable construction. The course covers benefits and mechanisms of green building, cost analyses, and professional problem solving. CMGT 452 and ETSC 552 are equivalent courses; students may not receive credit for both. Course will be offered every year (Spring). Prerequisite: CMGT 265.

Upon successful completion of this course, the student will be able to:
Identify and apply LEED terminology. Identify and apply the LEED rating system criteria. Identify and discuss prerequisites, credits and points for each credit category. Evaluate a project to calculate the total LEED points possible and identify the most probable certification level for the project.
CMGT 455. Principles of Construction Management
(4). Fundamental tools of
construction management.
Topics include contract management, scheduling, cost estimating, cost control, conflict management, negotiating, team building, quality control, safety, and a capstone project. Prerequisites: CMGT 447 and either CMGT 444 or CMGT 445.
Upon successful completion of this course, the student will be able to:
Able to systematically plan, organize, manage, control, and document construction job site activities.
Able to develop the following type of documentation: RFI's, shop drawings, cost control, jobsite layout plan, meeting minutes, safety plans, quality plan, change orders, and. payment schedule.
Demonstrate an understanding of the jargon and rational behind project management. Demonstrate the ability to review an actual project and identify good and bad project management techniques.
CMGT 456. Principles of Heavy Civil Construction Management (4).
Fundamental tools of heavy civil highway construction management. Topics include contract management, scheduling, cost estimating, cost control, conflict management, negotiating, team building, quality control, safety, and a capstone project. Prerequisites: CMGT 447 and CMGT 344 or CMGT 345. Upon successful completion of this course, the student will be able to:
Systematically plan, organize, manage, control, and document heavy civil construction job site activities.
Develop the following types of documentation: RFI' s, shop drawings, cost control, jobsite layout plan, meeting minutes, traffic plans, safety plans, quality plan, change orders, and payment schedule. Use project management terminology and rationale
behind project management.

Review an actual project and identify good and bad project management techniques. Review and critic new technologies that are applicable to the construction industry.

## CMGT 460. Concrete

 Construction (4).Manufacturing and testing of concrete, field practices, and formwork. Two hours lecture and two hours laboratory per week. Prerequisites: IET 312, CMGT 346 or CMGT 347, and CMGT 440 or CMGT 441.
Upon successful completion of this course, the student will be able to:
Describe the components of portland cement concrete, including the five types of portland cement and their chemical components, their proportions and their purpose. Demonstrate an understanding of liquid and mineral admixtures, their function, advantages and disadvantages. Explain in detail how concrete is batched, mixed, transported, properly placed, consolidated and cured and the problems that can develop if proper procedures are not followed. Accurately design a concrete mix for a particular application using the volume method, including proper moisture adjustments for aggregates. Accurately calculate anticipated shrinkage crack spacing in an Un-reinforced concrete slab on grade and accurately calculate the required reinforcing steel to prevent such cracking. Accurately calculate lateral pressures of concrete priced in column and wall forms and design these forms. Demonstrate the ability to physically perform a laboratory slump test, complete a laboratory report on a slump test and properly prepare a concrete compression test cylinder. Also cap a test cylinder and properly conduct a compression test of the concrete cylinder.
CMGT 461. Pavement Design and Construction (4).

An introduction to flexible and rigid pavement design and construction including pavement types, materials, construction methods, and maintenance concerns. Prerequisites: IET 312, and either CMGT 346 or CMGT 347.

Upon successful completion of this course, the student will be able to:
Describe different pavement types and be able to explain the circumstances for which they are best suited.
Apply pavement design basics to an actual construction situation.
Identify the physical properties of pavement materials and how they impact performance and construction.
Identify pavement construction techniques for various pavement types.
Examine and analyze highway pavement maintenance and rehabilitation techniques.
CMGT 481. Construction Management Capstone (4). Students work in teams to prepare a cost estimate, schedule, site mobilization plan, and safety plan and present to an industry representative for a negotiated construction project. Three hours lecture and two hours of lab. Permission by instructor. Course will be offered every year (Spring). Prerequisites: CMGT 346 or CMGT 347 and CMGT 455 or CMGT 456. Upon successful completion of this course, the student will be able to:
Plan, schedule, and estimate an appropriately sized commercial building or heavy civil project using a complete set of construction contract documents.
Prepare and present, using a team format, a construction project proposal to a panel of industry experts. The presentation will summarize the construction estimate, planned work schedule, construction sequence, safety plan, risk management
analysis, and site mobilization plan for the project.
Develop the ability to define team responsibilities and execute a work plan in a team environment.

## CMGT 485. Construction

Accounting, Finance, and
Contemporary Topics (4).
The process using LEED as a measurement for sustainable construction. The course covers benefits and mechanisms of green building, cost analyses, and professional problem solving. CMGT 452 and ETSC 552 are equivalent courses; students may not receive credit for both. Course will be offered every year (Spring). Prerequisite: CMGT 265.

Upon successful completion of this course, the student will be able to:
Identify and apply LEED terminology.
Identify and apply the LEED rating system criteria. Identify and discuss prerequisites, credits and points for each credit category. Evaluate a project to calculate the total LEED points possible and identify the most probable certification level for the project.
CMGT 488. Professional Certification (1). A
comprehensive review of professional construction management principles and technical skills in preparation for a national certification examination. Grade will either be $S$ or $U$. Prerequisites: CMGT 444 or CMGT 445. Upon successful completion of this course, the student will be able to:
Properly identify working drawing symbols and techniques and common construction materials and their usage.
Demonstrate how to properly set up a set of differential and profile leveling notes, how to make surveying taping corrections and how to properly make bearing calculations for a traverse.

Demonstrate a working knowledge of the principles of statics and strength of materials, including construction of free body diagrams, shear and moment diagrams and the calculation of shear and normal stresses. Complete a quantity takeoff and pricing for materials, equipment and labor for a commercial project, including evaluation of subcontractor bids.
Demonstrate an understanding
of the construction legal contract system and the relevant documents, including AIA A201 and the common on-site documents utilized to manage a construction project. Identify and describe basic electrical and mechanical systems and components. Create a network schedule and properly analyze this schedule, including the critical path and float times.

## CMGT 495. Construction

 Management Competition Preparation (1). Students work in teams to prepare for construction management competition. Teams develop cost, schedule, site layout, and safety plans for a major construction project. Students will compete in the Associated Schools of Construction competition in Reno, Nevada. May be repeated for credit. Grade will either be S or U . Prerequisite: CMGT 344. Upon successful completion of this course, the student will be able to:Identify an effective team structure. Prepare for a construction management competition.
Apply critical thinking and express a construction contract proposal based on the principles of construction estimating, scheduling, planning and project management.
CMGT 496. Individual Study
(1-6). May be repeated if subject is different.

CMGT 497. Honors (1-12).
Prerequisite: admission to department honors program.
CMGT 498. Special Topics (1-6). May be repeated if subject is different.
CMGT 499. Seminar (1-5).
CMGT 267LAB. Plane Surveying Field Session (1).
One surveying field session weekly. Co- or prerequisite: CMGT 267.
Upon successful completion of this course, the student will be able to:
Explain the components of surveying instruments and demonstrate a working knowledge and ability to properly care for these instruments.
Complete a 1500 -foot level loop within fourth order accuracy.
Complete a five sided closed traverse and corresponding calculations to third order accuracy.
Perform specific applications of surveying techniques pertaining to grade staking, earthwork volumes and building layout. Demonstrate the ability to perform a stadia survey and create a site map, including topography.
Demonstrate the ability to accurately and neatly record fieldwork.
CMGT 267LABHC. Heavy
Civil Highway Field Session
(1). One surveying field
session weekly. Co- or prerequisite: CMGT 267. Upon successful completion of this course, the student will be able to:
Complete a 1500 foot level loop within fourth order accuracy.
Complete a five sided closed traverse and corresponding calculations to third order accuracy.
Perform calculations for traverse closure and area. Perform specific application of surveying techniques and calculations pertaining to grade staking and earthwork volume calculations.

Create a horizontal curve and spiral curve including the laying out of slope and grade stakes.
Demonstrate the ability to accurately and neatly record field data.
CMGT 343LAB.
Construction Estimating I
Laboratory (1). One
estimating computer laboratory
session weekly. Prerequisite:
CMGT 343.
Upon successful completion of this course, the student will be able to:
Develop and utilize
spreadsheets for quantity
takeoff.
Develop and utilize
spreadsheets for construction
labor estimates.
Accurately develop and utilize spreadsheets to prepare a parametric estimate. Create and utilize an estimating spreadsheet to compile and summarize the estimate for a small building project.
CMGT 344LAB.
Construction Estimating II
Laboratory (1). One
estimating computer laboratory
session weekly. Prerequisite:
CMGT 344.
CMGT 345LAB. Heavy Civil
Estimating II Laboratory (1).
One weekly estimating
laboratory session. Co- or
prerequisite: CMGT 345.
Upon successful completion of this course, the student will be able to:
Identify the resource requirements required (materials, labor, equipment, time and money) to build heavy civil projects.
Identify and reference safety items, understand how safety concerns are addressed at the job site, and how it must be planned for during an estimate. Develop basic general heavy they impact the finished project.
Work in teams and estimate an entire heavy civil project. Obtain proficiency in Heavy Bid, a version of heavy civil Estimating Software.

## CMGT 495A. Construction Management Competition Preparation - Fall (2).

Students work in teams to prepare for the Associated Schools of Construction (ASC) competition. Teams develop cost, schedule, site layout, and safety plans for a major construction project. Students will compete in the ASC competition in Reno, Nevada. One hour lecture and two hours lab per week. Permission by instructor. Course will be offered every year (Fall). Prerequisite: CMGT 344 or CMGT 345.
Upon successful completion of this course, the student will be able to:
Plan, schedule and estimate a small commercial project given a set of construction drawings and contract documents. Prepare and present a group presentation to a panel of industry experts. The presentation shall summarize the construction estimate, schedule, construction sequence and costs of the project.
Define team responsibilities and work in a team environment. Summarize, record and evaluate information pertaining to a competition and present it in a format that will be useful for teams in the upcoming years.
CMGT 495B. Construction
Management Competition
Preparation - Winter (2).
Students work in teams to
prepare for the Associated
Schools of Construction (ASC) competition. Teams develop cost, schedule, site layout, and safety plans for a major construction project. Students will compete in the ASC competition in Reno, Nevada. One hour lecture and two hours lab per week. Permission by instructor. Course will be offered every year (Winter). Prerequisite: CMGT 495A. Upon successful completion of this course, the student will be able to:

Plan, schedule and estimate a small commercial project given a set of construction drawings and contract documents. Prepare and present a group presentation to a panel of industry experts. The presentation shall summarize the construction estimate, schedule, construction sequence and costs of the project.
Develop the ability to define team responsibilities and work in a team environment. Demonstrate the ability to summarize, record and evaluate information pertaining to a competition and present it in a format that will be useful for teams in the upcoming years.
COM 201. Introduction to Mass Communication (5).
This course critically reviews media from historical, societal, cultural and political viewpoints. It examines the impact of mass media on consumers as individuals and on society, and also improves media literacy.
Upon successful completion of this course, the student will be able to:
Define and Describe the history of Mass Communication. Distinguish the functions, theories, and practices of mass communication in a global society.
Compare and contrast the ways in which culture and mass communication interact and affect each other, both wit in American culture and on a global level.
Analyze the diversity of mass communication in all its forms, and practice media consumption habits that are necessary for the communication professions. Evaluate the role of the First Amendment in mass communication.
Recognize and explain the models of mass communication and their connection to the models of human communication.

COM 202. The First Amendment: Rights and Responsibilities (5). This class explores the First Amendment freedoms as the foundation of a free, tolerant and democratic society. The communicative rights and responsibilities of citizens in a democracy governed by such an amendment are also examined. SB-Perspectives on Cultures and Experiences of U.S. Course will be offered every year (Fall, Winter, Spring, Summer).
Upon successful completion of this course, the student will be able to:
Identify and describe the historic arc of how the First Amendment freedoms developed in the United States, beginning in the 1600 s. Identify, describe and discuss the guarantees of the First Amendment, as well as the exceptions for what it does not cover.
Identify, describe, discuss and apply landmark First Amendment cases to current and potential controversies. Identify, explain and discuss various approaches to how the courts balance First Amendment rights against other personal rights and/or societal interests. Identify and explain how First Amendment rights are central to creating a diverse and tolerant society, and how the freedoms have been used to advance the civil rights of previously marginalized groups, creating a more diverse and tolerant society. Demonstrate an understanding of the ethical and responsible use of First Amendment freedoms and how to apply them to personal and contemporary issues. COM 204. Radio Studies (2). Fundamental survey of the Radio Broadcast industry. Emphasis on understanding cultural history, corporate hierarchy, industry standards, economic conditions and types of audiences. Course will be
offered every year (in Fall). Prerequisites: COM 201 and COM 202 and FILM 215 or instructor permission. Upon successful completion of this course, the student will be able to:
Diagram Radio industry structure and job functions. Analyze implications of historical and ongoing changes in the radio industry. Recognize key terms and important people pertinent to the Radio Industry. Critically analyze the role of radio in contemporary society.
COM 205. Radio Production
Skills (4). A combined lecture and skills development course that teaches students
comprehensive skills in radio production. Course will be offered every year (in Winter).
Prerequisites: COM 201 and COM 202 and FILM 215 or instructor permission. Corequisite: COM 304.
Upon successful completion of this course, the student will be able to:
Critically analyze various pieces of Radio production. Demonstrate ability to create a Radio Station's audio image. Utilize learned software skills to create original radio production projects. Demonstrate ability to conduct interviews for different types of radio features.
COM 207. Introduction to Human Communication (5). Introductory course designed to allow students to develop effective communication skills across a variety of human communication contexts including public speaking, interpersonal relationships, and professional settings.
Upon successful completion of this course, the student will be able to:
Define and describe the
process of human
communication.
Demonstrate skills in public speaking.
Develop knowledge and skills related to group
communication and group problem solving.
Describe and interpret communication skills in interpersonal communication contexts.
Distinguish and apply communication conflict management skills. Name and describe the multiple areas of study in the field of Human Communication and analyze the connection between Human and Mass Communication.

## COM 208. Introduction to

 Public Relations Writing (4)Integrated approach to media
writing emphasizing public relations writing styles. Upon successful completion of this course, the student will be able to:
Prioritize and organize information and develop news judgement.
Write clearly and cleanly, using appropriate professional competencies in grammar, spelling, punctuation and style. Structure a news story in three basic formats: prints, broadcast and public relations. Explain the demands of accuracy and completeness. Write quickly to meet deadlines.
COM 222. Media Literacy in the Digital Age (5). This course enables students to be discerning, perceptive, ethical and responsible consumers and creators of the mass media that pervade their lives in the digital age - whether that be news, entertainment, advertising or social media. Course will be offered every year (Fall, Winter, Spring, Summer)
Upon successful completion of this course, the student will be able to:
Explain the role that mass media play in shaping societal and cultural norms
Explain how the digital universe has upended traditional theoretical models of mass media creation, profitability, consumption and influence.

Explain the role that mass media play in impacting individual health and wellbeing by influencing our thoughts, attitudes and actions.
Explain how individuals receive and interpret mass media differently, based on their cultural background, their prior knowledge and experience, their values and beliefs.
Distinguish "fake news" based on rumor, opinion, assertion and lies from legitimate news based on objective, verifiable evidence.
Evaluate a news source's reliability and credibility, using digital tools.
Identify the techniques that advertisers and influencers whether corporations, political parties or activist groups - use to motivate people to take action (e.g. flattery, repetition, fear, humor.)
Identify the techniques that the makers of TV, films and games employ to entertain and inform their viewers and users (e.g. narrative structure, character representation.)
COM 226. Introduction to Writing and Reporting for Digital Journalism (5).
Students will receive an introduction to writing and reporting of journalistic stories for print and online media. Upon successful completion of this course, the student will be able to:
Demonstrate understanding of the variety of ways newsrooms structure their coverage and deploy their staff.
Create a blog, and demonstrate understanding of the principles of writing for blogs and how to integrate visual and interactive elements into their posts. Produce effective leads, nut graphs, story structure. Find story ideas, interview sources, use observation, collect appropriate documents. Demonstrate understanding of the qualities and values of news-what makes something "newsy" and what factors will
determine its "play" in a media outlet.

## COM 251. Small Group

Dynamics (4). Analysis and practice of communication principles affecting effectiveness of small group discussion. Includes theory and practice of leadership and problem solving in small groups. Prerequisite COM 207.
Upon successful completion of this course, the student will be able to:
Describe the primary divisions of group communication theory to include stages of group growth and development, leadership, problem solving, functional roles, and communication norms
Increase skill in the evaluation of group process. Increase ability to apply leadership theory and concepts. Increase knowledge and ability to solve problems in groups. Increase ability to develop effective working relationships with other group members. Distinguish between content and process variables in group communication.
COM 253. Interpersonal Communication (4).
Investigation of theory, research, and practice of the role of communication in effective interpersonal relationships. Prerequisite: COM 207.
Upon successful completion of this course, the student will be able to:
Explain how verbal and nonverbal processes work and intercultural and interactions. Demonstrate a practical use of interpersonal communication theories through classroom activities and assignments. Identify the impact of cultural diversity in interpersonal relationships.
Apply writing skills in the development of a written project on an interpersonal communication variable. Identify the variables in the development of relationships
related to a significant other, friendship, and work-related relationship
Analyze and evaluate their own interpersonal communication behavior and skills and selfassessment
COM 255. Emerging Leaders (Put on reserve 9/16/15.) (2).
Course is designed to develop student leaders on campus through leadership training, leadership experiences, self analysis, and familiarization with leadership opportunities at CWU. Put on reserve 9/16/15. Will go inactive $8 / 24 / 18$. Upon successful completion of this course, the student will be able to:
Identify the different styles of leadership, their strengths and weaknesses, and be able to apply them to their own leadership style.
Demonstrate the importance of group development and communication in leadership functions.
Incorporate different leadership strategies to reach and motivate diverse groups.
Develop and budget, seek funding, and monitor expenditures in conducting a project.
Conduct an assessment of a project, collect feedback and integrate feedback into future plans.
Communicate effectively with different audiences through the media and other publicity efforts.
COM 270. Introduction to Public Relations (4). The basic concepts of public relations; the tools and media used in communicating with the variety of publics.
COM 280. Advertising
Fundamentals (4). An introductory course that introduces the principles of advertising, including; ethics, social issues, professional practice, and the application of advertising principles to problems of business, nonprofit, and political issues. Prerequisite: COM 201.

Upon successful completion of this course, the student will be able to:
Identify the current forms of advertising in use in the United States and internationally. Identify the major advantages and disadvantages of each form of advertising. Critique and evaluate the processes involved developing advertising and integrated marketing campaigns. Identify and explain creative approaches to advertising Show an understanding of basic concepts of research for communication, including demographics, psychographics, surveys, focus groups and other instruments.
Demonstrate an understanding of the messages given by advertising.
Develop and apply your oral and written communication skills.
COM 290. Cooperative Field
Experience (1-6). Internship
designed to explore career opportunities in the major. Open to all students. May be repeated for credit. Grade will either S or U .
COM 296. Individual Study (1-6).
COM 298. Special Topics (16).

COM 299. Seminar (1-5).
May be repeated if subject is different.
COM 300. Media Research
(5). Development, understanding and application of media research theories, methodologies and techniques. Prerequisite: admission to either the communication studies, public relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Identify/explain and/or demonstrate knowledge of the theoretical and methodological skills necessary for producing rigorous research on traditional and emerging media. Identify/explain and/or demonstrate knowledge of traditional and new media
research tools and to develop a critical approach to the use and misuse of these methods and/or technologies.
Develop hands on experience and understanding of the current cultural changes in media production and consumption.
Understand and explain the difference between qualitative and quantitative research methodologies.
Develop professional audience research methodologies applicable to traditional and new media.
COM 301. Public Speaking for Business and
Organizations (2). The course develops student knowledge and basic oral communication skills with an emphasis on presentation skills focusing on organization, delivery, and forms of support as applied in different professional contexts. Upon successful completion of this course, the student will be able to:
Demonstrate the knowledge and skill necessary to effectively organize a public presentation.
Demonstrate the knowledge and skill necessary to deliver at least two different types of public presentations. Describe the typical public speaking contexts and opportunities found in most American businesses. Develop increased skill in analyzing the public speaking of others.
Develop applicable support materials for an individual or group presentation. Effectively respond to questions that follow a public presentation.
COM 302. Intercultural Communication (4). The objective of this course is to give the participants the skills and understanding necessary to improve communication with peoples of other nations and cultures. SB-Perspectives on World Cultures (W).
Prerequisite: sophomore standing or above.

COM 303. Online and Social Media Strategies (5). Students will learn how to create online websites and use social media to develop their "brand" online. They will use that "brand" to engage with appropriate audiences and create visibility for their work, skills or clients. Course will be offered every year (Fall, Winter, Spring, Summer).
Upon successful completion of this course, the student will be able to:
Create and design a functional website using a popular free and open-source platform, picking a domain name and layout appropriate to the student's chosen "brand" identity.
Populate the website with content appropriate to the site's brand identity (blog posts, examples of professional work, infographics, slideshows of photographs, audio clips, short video productions, etc.) using appropriate plugins and widgets.
Identify the strengths, weaknesses and suitability of the most popular social media sites and how to leverage those platforms to enhance their site's brand identity. Use social-media management tools.
Use web analytics applications and the analytics tools provided by their chosen social media outlets in order to assess their website and social media accounts' performance. Explain the importance of credibility and accuracy in building a brand and developing a loyal audience. Identify and describe the societal issues raised by online and social media, such as privacy, defamation, cyberbullying and online identity.

## COM 304. Radio

Programming Application
(5). A rotational laboratory
focusing on the individual methods, principals, and best practices of Radio
Broadcasting. Students will
learn and execute real-life Radio Broadcast programs of various formats on KCWUFM, taking on a rotation of responsibilities. May be repeated up to 15 credits. Course will be offered every year (Fall, Winter and Spring). Prerequisites: COM 201 and COM 202 and FILM 215 or instructor permission. Upon successful completion of this course, the student will be able to:
Prepare and produce a Radio program.
Demonstrate the operation of basic Radio studio equipment.
Practice and perfect their on-air delivery and voice skills in order to produce a deliverable. Successfully complete the certification process for the MusicMaster Radio
Programmers course.
COM 305. Advertising
Copywriting (4). Students will learn to write for the advertising industry, including a study of effective advertising copy, and the methods of creating project proposals and project assessments.
Prerequisite: COM 280.
Upon successful completion of this course, the student will be able to:
Formulate creative and practical solutions to wordbased communications problems in advertising. Demonstrate the ability to formulate and format advertising proposals, research documents in advertising, and other business correspondence. Identify and qualify the needs of a client in the advertising field.
Create advertising copy that meets the needs of a client. Show the ability to create copy that meets the needs of several different media formats, including television, print, and the Internet.
Demonstrate a facility with proper English and grammar in business writing.
COM 308. Public Affairs
Reporting and Writing (5).
Students will learn more
advanced methods of writing and reporting of journalistic stories for print and online media, with a focus on how to cover public affairs news beats. Course will be offered every year (Fall). Prerequisites: COM 226, and admission to the communication department majors.
Upon successful completion of this course, the student will be able to:
Identify key sources on their public affairs "beat" who can be regularly interviewed to reveal stories important to their news outlet's audience.
Locate and recognize where all the different important public affairs beats conduct their business and their key players and issues
Recognize the difference between records and documents available to the public and those that aren't and how to request and use them for stories.
Recognize the difference between what/when/how government councils/commissions/committ ees can legally discuss government business in private versus what and when and how they must do so with public notice and in the public eye. Write public affairs stories that include backgrounding, interviews, documents, data and observation that are relevant to their audience. Write stories about government agency meetings that are accurate and relevant to local readers
Use social media to help cover public affairs beat and to disseminate stories and engage with their audience.
COM 309. Writing Broadcast Advertising (4). Principles and techniques used in writing effective radio and television commercials, public service announcements, and promotional copy. A writing intensive course. Prerequisite: admission to either the communication studies, public
relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Understand and be able to apply the basic mechanics of good copywriting style for both radio and television commercials.
Learn how to organize a broadcast commercials and/or public service announcements targeting consumer behaviors and motivations.
Understand and be able to apply the various broadcast commercial formats in writing spot copy.
Learn how promotional broadcast copy contributes to a broadcast campaign. Students will also be introduced. to writing corporate media script writing and VNRs.
COM 310. Writing and Reporting for Broadcast Journalism (5). Writing, news gathering, and reporting for the electronic media. Includes on-the-scene coverage and interviewing. Prerequisite: admission to either the communication studies, public relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Identify the guidelines and rules of broadcast news copy writing.
Demonstrate guidelines for conducting broadcast interviews.
Demonstrate guidelines for conducting on the scene news stories.
Demonstrate the requirements of coverage of speeches and meetings
Identify news values used in reporting events.
Identify the beats of a typical community.

## COM 312. Introduction to

Non-Profit Leadership (4).
This course introduces key elements in nonprofit organization leadership, and makes brief reviews of various nonprofit management topics,
such as strategic missions, board development, leadership roles, fundraising, staffing, performance evaluation and accountability, nonprofit marketing and legal issues. Prerequisite: admission to the nonprofit major, minor or certificate, public relations major, comm. major or permission of instructor. Upon successful completion of this course, the student will be able to:
Identify the major aspects of non-profit leadership, including board development, strategic planning, staff management, performance and evaluation, fundraising, nod legal issues
Demonstrate an understanding of the basic principles and practices of non-profit leadership and enhance the development of the leadership competencies nece 11 sary to effectively lead in nonprofit organizations
Use analytical thinking and writing to present and communicate the ideas of nonprofit management and leadership
COM 315. Studies in
Communication (1).
Specialized topics in communication providing depth of knowledge, expand theoretical exposure, and/or practical communication skills. By permission. May be repeated for credit under a different sub-topic. Grade will either be S or U .
Upon successful completion of this course, the student will be able to:
Identify and describe special topic communication concepts and/or theories.
Demonstrate how special topic in communication relates to real-life scenarios. Incorporate special topic in communication into their own research project.
COM 321. Visual Storytelling
(5). The methods used to communicate journalistic stories effectively and ethically using still photography and
video. Course will be offered every year (Spring).
Prerequisite: admission to the digital journalism major or instructor permission.
Upon successful completion of this course, the student will be able to:
Employ basic techniques of visual composition such as rule of thirds, framing, perspective, balance and contrast. Modify the settings of a camera (or other device used to take photographs) to obtain the effects produced by shutter speed, aperture, lighting, color and lens choice in visual imagery.
Identify and differentiate between general news, spot news, feature news, portraits and sports images and apply strategies for capturing effective storytelling imagery in each category.
Write captions that identify the people, places and/or objects in the image and put them in perspective for the viewer. Plan, propose and create a photo news story.
Create news interviews and videos.
Evaluate the impact and ethical considerations of image
manipulation.
COM 322. Introduction to
Studio Production (4). A
combined lecture and skills
development course that introduces students to the production elements of a television show with emphasis on the function and operation of studio lighting, audio, and cameras. Prerequisites: film or braodcast journalism major status. Co-requisite: COM 322LAB.
Upon successful completion of this course, the student will be able to:
Describe the personnel functions in studio production. Describe equipment functions and safety features of a studio.
Construct a pre-production
plan for a studio program.
Direct a studio production.

Perform as a crew member in all other areas of studio production.
COM 328. Scriptwriting for Interactive Entertainment (Put on reserve 9/16/15) (4).
An introduction to the basic format, story and style elements for interactive entertainment (multiplot narratives, games, simulations, etc.). Students examine the relationship between interactive design, user navigation and storytelling. Put on reserve $9 / 16 / 15$. Will go inactive $8 / 24 / 18$. Prerequisites: COM 267, and admission to the communication or film major.
Upon successful completion of this course, the student will be able to:
Identify/explain the historical and philosophical framework of interactive writing practices in the larger context of storytelling. Identify/explain and demonstrate a knowledge of the aesthetic and rhetoric of the computer, multimedia, gaming and interactivite storytelling. Identify/explain and demonstrate a basic skills-set in multidimensional interactive writing, development of design schemes for the final media experience of the intended audience, have a sound understanding of project management, game development, interactive design.
Identify/explain and demonstrate a basic skills-set in the conceptualization, visualization and production processes for interactive writing through a range of new media writing; from Web copy to procedural writing, information architecture to game and interaction design.
COM 333. Communication
Ethics (4). The study of ethical issues in communication. Prerequisite: COM 202 and admission to major.
Upon successful completion of this course, the student will be able to:

Identify ethical issues involving media communications.
Understand various approaches used to solve or resolve issues involving media communications Understanding how to apply a model of moral reasoning (e.g. the "SAD" process used to solve or resolve ethical issues). Knowledge of various codes of ethics as they apply to specific professions within the
communication field.
Knowledge of the historical, historical, political, and societal context for the issues
they must resolve with analysis.
COM 340. Public Communication: Theory and
Practice (4). Survey of rhetorical theory and practice from ancient to modern times. Emphasis on rhetorical application to public speaking settings. Prerequisite: students must be admitted to communication studies, public relations, film or journalism major in order to register for this course.
Upon successful completion of this course, the student will be able to:
Identify/explain and demonstrate understanding of
how the spoken word can influence people
To increase the student's ability
to effectively create and deliver a public speech.
To enhance students' ability to identify principles of public discourse and how it shapes and is shaped by events-both historical and contemporary, as well as influences from other societies/cultures
To learn the processes whereby speaking becomes a communicative act where the speaker and the audience mutually create meaning. Identify/explain and demonstrate the goal of rhetorical training- a good person speaking well about significant topics to positive effect.

COM 341. Introduction to Field Production (4). A combined lecture and skills development course that introduces students to the principles and techniques of location production and visual storytelling for narrative and documentary film.
Prerequisites: film or broadcast
journalism major status or
instructor. Co-requisite: COM 341LAB.
Upon successful completion of this course, the student will be able to:
Demonstrate knowledge of fundamental processes of telling a visual story using single camera production methods.
Employ appropriate image composition, audio recording, and operational functions of both camera and audio equipment.
Employ lighting techniques
and safety procedures.
Complete pre-production
planning for a single camera production.
Employ video editing software from ingest of media through final project delivery.
Explain production crew roles and professional set etiquette.
COM 342. Broadcast News
Producing (4). Principles and techniques used in producing newscasts for broadcast news, with emphasis on television news. Prerequisite: Com 310 and admission to the digital journalism major.
Upon successful completion of this course, the student will be able to:
Operate producing software that parallels software used in newsrooms
Identify the guidelines and rules of broadcast news producing
Develop flow and continuity within a newscast to attract and retain viewers
Write effective news teases Use live shots, as-if-lives and studio hits to improve pacing and to place emphasis on stories

Time a show and make adjustments if the show is "heavy" or "light." Structure and restructure stories to produce different newscasts with different formats and goals. Field produce a story to better communicate the message of the story using tools such as stand- ups, interviews, as-iflives, and other producing tools.
COM 345. Business and Professional Speaking (4).
Oral communication in career and professional settings with focus on public presentations, briefings, and persuasion.
COM 347. Copy Editing (4). Students will learn the editing process, how to edit for mechanics and content, including Associated Press style, as well as how to write headlines and cutlines. Prerequisites: admission to the major (i.e. com studies, public relations, film, journalism, English writing specialization), or professional writing certificate program or permission of the instructor. Upon successful completion of this course, the student will be able to:
Edit stories for ethical and legal considerations.
Work with reporters to help them improve their work in all phases, from generating story ideas, to providing reporting guidance arid writing clean, accurate and compelling copy. Understand the editing process and the various types of editors in media organizations - copy editors, content editors, section editors, design editors, wire editors, supervisory editors, managing editors and editors-in-chief.
Learn to write headlines and cut lines according to the conventions of the profession. Learn the ethical and legal issues involved in the selection of photos and other visual elements that accompany stories.
Understand the importance of design and layout, and how to
spot opportunities to incorporate graphics and other "entry points" into story packages.
COM 348. Publication
Design (4). Publication design, the theories of graphics, headlines, and text. Management of the design process. Prerequisite: admission to either the English writing specialization, communication studies, public relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Demonstrate comprehension of the principles of good publication design. Demonstrate ability to apply principles of page design for daily, weekly or monthly publications.
Learn how to manage the sometimes-warring aspects of publication design: the physical vs. the intellectual, the form vs. the content, the design vs. the journalism, the productmaking vs. the story-telling.
COM 350. Persuasion and
Culture (4). Role of
persuasion in society, elements of human motivation, techniques, and appeals of the persuader. Prerequisite: admission to either the communication studies, public relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Develop ability to critically analyze persuasive messages Increase skill in the development of oral persuasive messages.
Understand and apply various ethical criteria to persuasive strategies and campaigns. Increase knowledge and ability analyze persuasive appeals found in advertisements. Develop ability to analyze the persuasive actics of public speakers through study of cultural themes, evidence, emotion, and credibility.

COM 351. Visual
Anthropology (4). Provides methodological, theoretical, and practical background to produce and evaluate imagery in films and video; guidelines and practice of image presentation/manipulation in anthropological and social contexts. COM 351 and ANTH 351 are cross-listed courses; students may not receive credit for both. Prerequisites:
ANTH 130 or ART 225 or
COM 321 or COM 330.
COM 362. Conflict and Communication (4).
Communication and decisionmaking strategies for conflict resolution. Negotiating agreement and mediating differences in interpersonal and organizational settings. Prerequisite: admission to either the communication studies, public relations, film, or journalism major.
Upon successful completion of this course, the student will be able to:
Identify causes of human conflict and the common ways they are expressed Identify steps in the process of conflict resolution through negotiation and formal mediation
Demonstrate skill in negotiation and mediation
COM 365. Organizational
Communication (4). Function,
forms, and patterns of communication in organizations. Effects of organizational structures and dynamics on communication. Methods of evaluating communication policies and practices as an aid to organizational management. By permission. Prerequisite: admission to either the communication studies, public relations, or journalism major or permission of instructor.
Upon successful completion of this course, the student will be able to:
Define corporate culture, leadership, teamwork, diversity, and ethics, and
discuss how they impact organizational communication. Explain the complex role communication plays in developing and maintaining an organization's culture.
Be able to explain bow specific communication behaviors may be used to manage opposition to change in organizational contexts.
Be able to discuss the nature of conflict in organizational context and how to apply message strategies to manage
such a conflict and bolster working relationships. Compare and contrast major theories of organizational communication.

## COM 367. Narrative

Screenwriting (On reserve as
of $9 / 16 / 15$ ) (4). Writing screenplays in combination with the study of models and techniques. COM 367 and ENG 367 are cross-listed courses; students may not receive for both. Put on reserve $9 / 16 / 15$. Will go inactive $8 / 24 / 18$. Prerequisites: either COM 201 or FILM 250. Upon successful completion of this course, the student will be able to:
Identify the pardigmatic structure and features of a screenplay.
Demonstrate their understanding of appropriate film terminology.
Develop a screenplay from story concept and premise. Identify and adapt the Writer's Guild screenplay format.
Develop and build characters in a screenplay.
Write individual scenes according to five basic principles including backstory, arena, character spines, story arc, plot development. Write and revise a completed screenplay
COM 369. Mass Media and
Society (4). Relationship of the
mass media to social
institutions; including philosophy, responsibilities, regulations, and criticism. Variable topic, may be repeated for up to 8 credits
under a different title. COM 369 and SOC 369 are crosslisted courses; students may not receive credit for both. May be repeated for credit. COM 370. Advanced Public Relations Writing (4).
