

Papers on Human Evolution Published in Collegium Antropologicum from 1977–2004

Ivor Janković

Institute for Anthropological Research, Zagreb, Croatia

ABSTRACT

Papers on human evolution published in Collegium Antropologicum in the period from 1977 to 2004 are listed in this review.

Key words: human evolution, Collegium Antropologicum, paper

Introduction

Scholars of various fields too often concentrate on publications in major specialized journals, mostly in English language. Besides obvious reasons such as language barriers, poor distribution and availability of smaller journals, one of the main reasons for this is the lack of awareness of the work published in such publications. Providing a list of topic-oriented articles will enable interested scientists to include some important yet not widely known analyses in their future work. Here, a list of works on human evolution published in Collegium Antropologicum from 1977–2004 is given. Works included concentrate on anthropology, archaeology, and topics related to human evolutionary studies up to the time of final Pleistocene. List is organized in three sections – original scientific papers, review articles and book reviews, and meeting abstracts (listed separately). In each section, references are organized alphabetically by the first author. These files are or soon will be available as PDFs at: www.inantro.hr

POPIS RADOVA VEZANIH UZ EVOLUCIJU ČOVJEKA OBJAVLJENIH U ČASOPISU COLLEGIUM ANTHROPOLOGICUM OD 1977–2004. GODINE

SAŽETAK

Ovaj pregled donosi popis radova vezanih uz proučavanje evolucije čovjeka objavljenih u časopisu Collegium Anthropologicum od 1977. do 2004. godine.
