**EUROPEAN ACADEMY**  
of Sciences and Arts

Dear colleagues and friends,

We have great pleasure to welcome you to the Advanced Ceramic and Application IX Conference organized by the Serbian Ceramic Society in cooperation with the Institute of Technical Sciences of SASA, Institute of Chemistry Technology and Metallurgy, Institute for Technology of Nuclear and Other Raw Mineral Materials and Institute for Testing of Materials.

It is nice to host you here in Belgrade in person. As you probably know, Serbia launched a vaccination campaign at the beginning of this year, so up to date more than 50 percent of the adult population has been vaccinated. Since there is no one statistic to compare the COVID19 outbreaks and fears for loved ones in different countries, we believe that we all suffer similarly during this pandemic. That is why we appreciate even more your positive attitude and readiness to travel in this uncertain time. We understand that some of you had to cancel your lectures in the last minute due to the travel limitation in your countries, but we hope that you will come next year. We deeply hope that the ACA IX Conference will be worth remembering, that you will respect all COVID-19 safety measures at SASA building, that you will have a nice time here and that ultimately you will return to your home safely. We are very proud that we succeeded in bringing the scientific community together again and fostering the networking and social interactions around an interesting program on emerging advanced ceramic topics. The chosen topics cover contributions from fundamental theoretical research in advanced ceramics, computer-aided design and modeling of new ceramics products, manufacturing of nanoceramic devices, developing of multifunctional ceramic processing routes, etc.

Traditionally, ACA Conferences gather leading researchers, engineers, specialists, professors and PhD students trying to emphasize the key achievements which will enable the widespread use of the advanced ceramics products in the High-Tech industry, renewable energy utilization, environmental efficiency, security, space technology, cultural heritage, etc.

Serbian Ceramic Society was initiated in 1995/1996 and fully registered in 1997 as Yugoslav Ceramic Society, being strongly supported by American Ceramic Society. Since 2009, it has continued as the Serbian Ceramic Society in accordance with Serbian law procedure. Serbian Ceramic Society is almost the only one Ceramic Society in South-East Europe, with members from more than 20 Institutes and Universities, active in 16 sessions. Part of our members are also members of the Serbian Chapter of ACerS since 2019. Their activities in the organization of this conference is highly recognized. To them and all of you thanks for being with us here at ACA IX.

**Prof. Dr Vojislav Mitić**  
*President of the Serbian Ceramic Society*  
*World Academy Ceramics Member*  
*European Academy of Sciences & Arts Member*

**Prof. Dr Olivera Milošević,**  
*President of the General Assembly of the*  
*Serbian Ceramic Society*  
*Academy of Engineering Sciences of Serbia Member*

## Conference Topics

- Basic Ceramic Science & Sintering
- Nano-, Opto- & Bio-ceramics
- Modeling & Simulation
- Glass and Electro Ceramics
- Electrochemistry & Catalysis
- Refractory, Cements & Clays
- Renewable Energy & Composites
- Amorphous & Magnetic Ceramics
- Heritage, Art & Design

### Conference Programme Chairs:

Dr. Lidija Mančić SRB  
Dr. Nina Obradović SRB

### Conference Co-chairs:

Prof. Dr. Vojislav Mitić SRB  
Prof. Dr. Rainer Gadow GER

### Scientific Committee

Academician Zoran Popović SRB  
Academician Zoran Đurić SRB  
Prof. Dr. Vojislav Mitić SRB  
Prof. Dr. Rainer Gadow DEU  
Prof. Dr. Marcel Van de Voorde EEZ  
Prof. Dr. Wei Pan  
Prof. Dr. Reuben Jin-Ru Hwu  
Dr. Richard Todd GBR  
Prof. Dr. Hans Fecht DEU  
Prof. Dr. Olivera Milošević SRB  
Prof. Dr. Vladimir Pavlović SRB  
Dr. Nina Obradović SRB  
Dr. Lidija Mančić SRB  
Prof. Dr. Bojan Marinković BRA  
Dr. Takashi Goto, Japan  
Dr. Steven Tidrow, USA  
Dr. Snežana Pašalić SRB  
Prof. Dr. Zoran Nikolić SRB  
Dr. Nebojša Romčević SRB  
Dr. Zorica Lazarević SRB  
Prof. Dr. Nebojša Mitrović SRB  
Dr. Aleksandra Milutinović–Nikolić SRB  
Dr. Predrag Banković SRB  
Dr. Zorica Mojović SRB

Prof. Dr. Branislav Vlahović USA  
Prof. Dr. Stevo Najman SRB  
Prof. Dr. Vera Pavlović

### Organizing Committee

Prof. Dr. Vojislav Mitić SRB  
Dr. Lidija Mančić SRB  
Dr. Nina Obradović SRB  
Dr. Ivana Dinić SRB  
Dr. Marina Vuković SRB  
Dr. Suzana Filipović SRB  
Dr. Maria Čebela  
Dr. Nataša Jović Jovičević SRB  
Dr. Vesna Paunović SRB  
Dr. Vladimir Blagojević SRB  
Dr. Darko Kosanović SRB  
Dr. Vladimir Dodevski SRB  
Dr. Ivana Radović SRB  
Dr. Jelena Vujančević SRB  
Dr. Jelena Živojinović SRB  
Dr. Adriana Peleš Tadić SRB

Barium zirconium titanate ceramics were prepared using solid state reactions of BaCO<sub>3</sub>, TiO<sub>2</sub> and ZrO<sub>2</sub> at elevated temperatures. The prepared BZT was mechanically activated in the planetary ball mill from 0-120 min to achieve different powder grades from micro- to nano-sized particles. After the powder characterization by XRD and SEM the samples were pressed in disc shape and sintered at 1100 and 1200 °C in the air. The sintered samples were characterized by SEM. After that the silver epoxy electrodes were deposited on sintered disc samples. The disc samples capacitance and resistivity were measured in the low frequency region from 1 Hz to 200 kHz using a low frequency impedance analyzer. Sintering temperatures and powder grades were used as parameters. Finally, specific resistance  $\rho$ , dielectric permittivity ( $\epsilon' + j\epsilon''$ ) and  $\text{tg}\delta$  were obtained from the impedance measurements. The trends in electronic properties were analyzed: the relaxation effect of the space charge (inter-granular electric charges) vs. sintering temperature and ceramic grades. These show that mechanical activation has a significant effect on electrical properties, resulting in generally improved overall performance.

<sup>2</sup>Innovative Centre, Faculty of Chemistry Belgrade, University of Belgrade, Serbia

<sup>3</sup>Photonic Center, Institute of Physics Belgrade, University of Belgrade, Serbia

Monosized Up-Converting NanoParticles (UCNPs) with biocompatible surface and unique optical properties attract a great interest as new cell markers or drug delivery systems. The uppermost UC efficiency of  $\beta$ -NaYF<sub>4</sub>:Yb/Er phase is due to its hexagonal *P63/m* space group
