‘Going the Extra Miles’:

# Providing Itinerant Library Support to Graduate Distance Learners

Ryan Gaylor, MLIS

[rgaylor@usa.edu](mailto:rgaylor@usa.edu)

Distance Learning Librarian

University of St. Augustine for Health Sciences

# Presenter

## Ryan Gaylor, MLIS

- ▶ Distance Learning Librarian, University of St. Augustine for Health Sciences
- ▶ 12 years of experience (6 years as an academic librarian) working in public and academic libraries
- ▶ Research interests: online education, educational technology, embedded librarianship

# Objectives

Learn strategies for developing partnerships with online faculty and techniques for overcoming the barriers of buy-in and the reluctance to collaborate

Recognize how on-campus events can be a great opportunity to showcase library resources, fill gaps in library knowledge, and enhance engagement among distance learners

Understand the impact of “itinerant library support” and how it has contributed to faculty collaboration and student success

# Post-Professional Programs @ USAHS

- One of two librarians designated to the University's Post-Professional Programs
- Masters and Doctoral programs
- 100 % Online
- Working professionals, mid-career

# Introduction to Interprofessional Studies (IPE 7000)

- ▶ Provides students with a foundation for success in a post-professional program
- ▶ Emphasis on interprofessional communication and collaboration
- ▶ Ethical decision making
- ▶ Use of scientific evidence, professional writing, including the prevention of inadvertent plagiarism, and resources available to students to support their learning

# IPE 7000 On-Campus Immersion

- ▶ Face-to-face meeting
- ▶ 1 per trimester
- ▶ Hosted on one of USAHS's campuses
- ▶ 3 full-days of meeting

# On-Campus Immersion

# Timeline

Fall  
2017

- On-campus immersion with IPE 7000 students (FLUSA)
- 30-45-minute presentation, followed by questions

Spring  
2018

- Same format (FLUSA)
- Began partnership with lead instructor
- Adapting library instruction to course

Summer  
2018

- Same Format (SMUSA)
- Provided in-person library support along with specialized instruction
- Showcased the library's value to IPE 7000's faculty

Fall 2018-  
Present

- Completely embedded in IPE 7000
- Defined role and purpose
- Revised library instruction, aimed programming, consultations

# The Flight Plan: Fall 2018

- Inclusion into the course orientation
- Post-professional-appropriate live webinars & trainings
- Virtual library space
- Library support & programming @ immersion
- Assist faculty w/ students struggling to make transition to distance education

# Departure

**Introduction to the USA Library: Post-professional edition**

Posted on: Wednesday, September 9, 2020 8:43:20 PM EDT

Next week, I will be hosting TWO library webinars for IPE 7000 & 7050.

[Tuesday, September 15, 2020 @9pm ET/8pm CT/6pm PT](#)

[Saturday, September 19, 2020 @7pm ET/6pm CT/4pm PT](#)

Topics covered:

- Library Resources
- Online Services
- Citation Managers (Brief intro)
- Webinars (Upcoming & Archived)
- Searching the USA Library
- Full-Text Finding Tools
- Interlibrary Loan

Both sessions will be recorded and posted in Blackboard.

Have a great weekend!

Dyan

## FOR HEALTH SCIENCES

A randomized controlled trial of the effectiveness of soft silicone multi-layered foam dressings in the prevention of sacral and heel pressure ulcers in trauma and critically ill patients: the border trial

Advisor: Dr. Amy Herrington

### PURPOSE:

To determine the effectiveness of multi-layered soft silicone foam dressings in preventing sacral and heel pressure ulcer development in trauma/critically ill ICU patients by applying the dressings on admission to the ED.

### PATIENT DESCRIPTION:

- Inclusion criteria
- ED and ICU admission for critical illness and/or major trauma
  - Over 18 years of age
- Exclusion criteria
- Suspected or actual spinal injury precluding the patient being turned
  - Pre-existing sacral or heel pressure ulcer
  - Trauma to sacrum and/or heels

### METHODS:

Patients who met the study inclusion criteria were randomly allocated to either the control group (n = 221) that received usual pressure ulcer prevention strategies or the trial group (n = 219) that received usual care plus they had a Mepilex® Border Sacrum dressing applied to their sacrum and Mepilex® Heel dressing applied to each heel in the ED. These dressings are constructed of multiple layers (Mepilex® Border Sacrum has five layers and Mepilex® Heel has three layers). However, in all cases only one dressing was used at each anatomical site at any one time.

### RESULTS:

There were 440 patients in this study and major physical and demographics characteristics were comparable when they were admitted to the ED.

Table shown presents the data on the incidents of pressure ulcer develop, incidence rate per group and cite for the pressure ulcer. The table shows that the risk reduction rate was 10% for those that needed to be treated.

### INTERVENTION

Pressure ulcer development by group			
	Intervention (n=161)	Control (n=152)	P
<b>Cases</b>			
Developed PU	5	20	0.001
Incidence (%)	3:1	13:1	
<b>Anatomical site</b>			
Developed PU	7	27	0.002
Sacral PU	2	8	0.05
Heel PU	5	19	0.002

Figure 1. Mepilex foam dressing

### DISCUSSION:

The need to reduce or prevent hospital acquired pressure ulcer injury in our critically ill patients is an ongoing problem. Numerous studies have been performed over the years and yet we have not completely eradicated skin injuries. Clinical staff have used numerous treatments to reduce these injuries such as repositioning, skin care products and pressure redistribution devices. These treatments have proven to reduce skin injuries but more needs to be done. This study had two groups of patients the control group and the intervention group. What our study proved is that use the extra interventions, in this case the skin dressings for the sacral and heel areas, proved to significantly reduce skin injuries.

Our results reveal that the 440 patients enrolled in the study were comparable in terms of their demography, physiology and illness profiles. Our study population was younger than that reported by Cubit et al. (28) in their ED pressure ulcer study and we believe that this was because of our ED being a Trauma Centre and therefore having a State-wide patient referral area, the consequence is that we take a potentially broader and younger population group.

### CONCLUSION:

Our findings have demonstrated a statistical and clinically significant benefit for the application of multi-layered soft silicone foam dressings for the prevention of sacral and heel pressure ulcers. When used in combination with thorough risk assessment and evidence-based pressure ulcer prevention strategies, the intervention resulted in a 10% reduction in pressure ulcer incidence. This reduction represents preventing one patient developing a pressure ulcer for every ten patients treated with the dressings. The clinical applications of our results are that we can now delay or potentially eliminate hospital acquired pressure ulcers in critically ill patients by adding the use of multi-layered soft silicone foam dressings to our preventative strategies as soon as the patient is admitted to the ED. As a consequence of the findings of this study, our hospital has now mandated the use of these dressings for all patients who are at high risk of pressure ulceration.

## Post-Immersion Survey Data

\*no data collected for Fall 2017

# Post-Immersion Survey Responses & Testimonials

*“Invaluable when it comes to support, demeanor, encouragement and helped me tremendously throughout this course.”*

*“We felt special that he would take the time to come and spend with us at the residency”*

*“It was so helpful to have the librarian there to help with the technology. He is awesome”*

*“Very patient in spending extra time in going over additional citation managers with some of us after day 2.”*

*“Very helpful and listened to us, they were great. I would like to see more immersion offerings for more classes.”*

*“Wonderful job, really stepped up to provide a great experience when the situation changed”*

*Mr. Gaylor spoke at several immersions...his extra support has helped decrease my stress level, and he has been a great help to me as I complete my dissertation*

*- Sarah Werth-Diehl, OTD Candidate*

*Ryan’s presence in this course and what he offers to our students addresses knowledge deficits, helps build confidence and sets the stage and standard for graduate work and writing.”*

*– Dr. Amy Herrington, Assistant Professor, Course Leader IPE 7000*

# Exploration

## More Supplemental Video Tutorials

- ▶ Asynchronous videos on orientation topics or special topics
- ▶ Better than sitting through an entire presentation
- ▶ Easy for quick reference

## Self-Check Learning Objects

- ▶ Interactive learning modules
- ▶ Customized for IPE 7000 learners
- ▶ Hosted in LMS or course library guide

## More interactive activities @ immersions/residencies

- Pre-Immersion survey
- Experiment w/ gamifying library instruction ('escape the library', scavenger hunt, etc.)
- Move away from 'traditional' methods of library instruction

## Active involvement in course revision

- ▶ Currently undergoing revision w/ course leader
- ▶ Assisting CL w/ acquiring resources to enhancement learning
- ▶ Teaming with scholarly communications librarian to add a library related assignment to replace existing one

## Impact of COVID-19

- Duplicating the on-campus library support experience virtually
- Making online instruction more dynamic
- The future of 'Itinerant Library Support'

A collection of small Eiffel Tower souvenirs, likely made of metal or plastic, arranged in a row. Each tower has a different inscription: 'FRANCE', 'PARIS', 'PARIS', 'FRANCE', 'PARIS', 'PARIS', and 'FRANCE'. The background is a blurred crowd of people, suggesting a busy market or fair. The entire image has a blue tint, and a white arrow points from the left towards the text.

# Souvenirs

- ▶ Faculty Buy-in
- ▶ Action NOT Reaction
- ▶ Volunteer for EVERYTHING
- ▶ Word of mouth
- ▶ Let setbacks drive you
