

# Table 1.

|                          | Tumor cells |
|--------------------------|-------------|
| Vimentin                 | (+)         |
| Alpha-1-antichymotrypsin | (+)         |
| Alpha-1-antitrypsin      | (+)         |
| CD10                     | (+)         |
| CD56                     | (+)         |
| Progesterone receptor    | (+)         |
| Estrogen receptor        | (-)         |
| Beta-catenin             | (+)         |
| Chromogranin-A           | (-)         |
| CEA                      | (-)         |
| CA19-9                   | (-)         |
| Insulin                  | (-)         |
| Gulcagon                 | (-)         |
