Technical Debt Reading List. Results from a Systematic mapping study

ABSTRACT

This document presents the complete list of references that have been short listed during the systematic review process carried out during the months of April-September 2012.

The objective of the systematic review was to identify current research trends in technical debt and to explore the relationship between technical debt measures and agile software development.

This documents includes 352 references that are categorized according to their relevance to technical debt research.

Technical Debt Reading List.

Results from a Systematic mapping study

TECHNICAL DEBT READING LIST: RESULTS FROM A SYSTEMATIC MAPPING STUDY

This document is intended as a reading list for technical debt research. It details the 352 articles that have been reviewed during the a systematic review performed by Alberto Villar from April 2012 until July 2012.

This report is the second intermediate result of an ongoing literature mapping project. After each iteration new knowledge has been developed.

This iteration was commissions in order to explore the software metrics and factors that could affect a projects' technical debt..

Results of this systematic review have been sent to publication outlet and are being considered.

The references are organized according to a classification criteria driven by their application on the subject of Technical debt.

The following exclusion criteria were defined:

- The topic did not relate to software development (D_NET)
- The article is not accessible with the authors subscription level (NA)
- The article was filtered by authors after reading the abstract (D_PA)
- The article was filtered by author after reading the full paper (D_PL).
- Filtered because the registry did not represent a full paper (D_ITOC).
- Repeated papers were also filtered (REP).

The following table summarizes the filtering process.

Keywords

Keywords have been enhanced from last iteration to encompass de full software development lifecycle:

- “technical debt”;
- “design debt”;
- “analysis debt”,
- “requirements debt”,
- “testing debt”,
- “configuration management debt”,
- “process debt”,
- “architecture debt”,
- ”architectural debt”,
- “people debt”,
- “documentation debt”,
- “code quality debt”.

Search Engines

The search was carried out during the month of August 2013 in ACM; Springer; IEEE; SciVerse; and Citeseerx.

Summary of results

Table 1 Summary of references related to technical Debt research

D_NET	NA	D_PA	D_PL	D_ITOC	REP	Total
0	27	2	0	9	20	58

Technical Debt Reading List. Results from a Systematic mapping study

4	8	0	0	0	1	13
2	3	1	5	12	1	24
0	7	0	0	8	1	16
36	3	5	3	2	4	53
42	48	8	8	31	27	164

Factors affecting technical debt

The following table presents the factors that have been identified in the literature. Factors have been classified according to their relevance to the different stages of a software development lifecycle/

Table 2 Factors affecting technical debt in software process

Factores	code	Life cycle	Factores (N_AD - N_TD_A)	N_T D_I	N_T D_C	N_N om	Total
deterioro de la arquitectura	F_DA	AYD	4	0	0	0	4
deterioro del código /diseño	F_DC	AYD, Impl	3	0	1	0	4
Falta de transparencia hacia otros stakeholders	F_FTR	TODO	1	0	0	0	1
short-term versus long-term goals (nivel código y diseño)	F_ST_C	AYD, Impl	1	2	3	0	6
short-term versus long-term goals (nivel arquitectura)	F_ST_A	AYD, Impl	0	0	0	0	0
short-term versus long-term goals (nivel general)	F_ST_G	TODO	2	3	1	1	7
cambios rápidos en tecnologías	F_CRT	TODO	2	0	0	0	2
nuevos requerimientos en entornos legados	F_NRL	Requerimientos	1	0	0	0	1
requerimientos mal definidos y/o cambiantes	F_REQ	Requerimientos	0	3	1	0	4
cambios en el equipo	F_CEQ	TODO	1	0	0	0	1
falta de tiempo / budget	F_FTT	TODO	1	1	2	0	4
falta de fondos para realizar los cambios necesarios	F_FFOT	TODO	1	0	0	0	1
falta de conocimiento/experiencia	F_FEX	TODO	1	1	1	2	5
mal control de versionado	F_SCM	SCM	1	1	1	0	3
poco esfuerzo y poca motivación	F_PEM	TODO	0	1	1	0	2
insuficiente testing	F_ITE	TEST	0	2	4	2	8
excesivo testing manual	F_T	TEST	0	1	2	0	3

Technical Debt Reading List. Results from a Systematic mapping study

	EM							
mala integración y manejo de releases	F_R EL	SCM	0	1	0	0	1	
compromiso en una dimensión en detrimento de otra	F_DI M	TODO	0	1	0	0	1	
Like-to-like migration	F_LL M	TODO	0	1	0	0	1	
bajo refactoring y rediseño	F_B RD	AYD, Impl	0	0	5	0	5	
pobre codificación en etapa de desarrollo	F_C PD	AYD, Impl	0	1	3	0	4	
gerenciameinto de proyectos caótico	F_G PC	TODO	0	1	1	0	2	
time to market	F_T TM	TODO	0	0	4	1	5
