

ESPECIES FUNGICAS DE CHILE: INDICE ALFABETICO

(Fungal species of Chile: Alphabetical index)

Waldo Lazo, A.

Departamento de Ciencias Ecológicas, Facultad de
Ciencias, Universidad de Chile, Santiago

Palabras clave: Especies fúngicas, índice, Chile.

Key words: Fungal species, index, Chile

RESUMEN

El presente trabajo, aún incompleto, presenta un listado de especies fúngicas descritas para Chile. Se obtuvo al consultar diversas publicaciones pertinentes, muchas de las cuales se citan en las Referencias. La información micológica del país está muy dispersa a nivel nacional e internacional y no es fácil obtenerla, por lo cual el lector encontrará algunas carencias respecto a autores, especies, sinonimias.

SUMMARY

The present paper though incomplete, includes a listing of fungal species described for Chile. They were found after looking up in specialized literature as it can be seen under References. The mycological information of the country is very much dispersed at national and international levels and it is very difficult to get it, this is why the readers will find that some data regarding authors, species, synonyms are missing.
