Dr. Maurice Mars  
Journal Manager  
Journal of the International Society for Telemedicine and eHealth

**Manuscript:** “Satisfaction with in-home speech telerehabilitation in post-stroke aphasia: an exploratory analysis”

Dear Dr. Mars,

Please find attached our manuscript entitled “Satisfaction with in-home speech telerehabilitation in post-stroke aphasia: an exploratory analysis” that we submit for publication in the *Journal of the International Society for Telemedicine and eHealth*.

In this paper, multiple facets of satisfaction of post-stroke patients with aphasia who had experienced speech teletherapy are presented. These satisfaction data were obtained from a pre-post- feasibility and efficacy study, which the main efficacy outcome results are published elsewhere (*Telemed J E Health* 2017;23(8):630-639). We are confident that our results, which are directly linked to the use of communication technology for health, will be of great interest to the readership of the *Journal of the International Society for Telemedicine and eHealth*.

We attest that our study conforms to the ethical standards of CIUSSS de l'Estrie-CHUS. The manuscript is not under review elsewhere for publication. The other authors have no conflicts of interest to report.

I hope that the material is suitable for publication in your journal, and urge you to please contact us if you require any further information.

Cordially yours,

Michel Tousignant, PhD, PT.  
Research Center on Aging, CIUSSS de l'Estrie - CHUS
