#### **Disclaimer/Complaints regulations**

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

# Contents

1	Introduction .....	9
2	Vegetation succession in eight inland drift sands in relation to geomorphology and nitrogen deposition .....	31
3	Effects of nitrogen deposition on soil and vegetation in primary succession stages in inland drift sands.....	51
4	Nitrogen deposition and soil carbon content affect nitrogen mineralization during primary succession in acid inland drift sand vegetation .....	73
5	Response of inland dune vegetation to increased nitrogen and phosphorus levels .....	93
6	Invasiveness of <i>Campylopus introflexus</i> in inland dunes depends on nitrogen deposition and soil organic matter .....	115
7	Synthesis .....	134
	Summary.....	151
	Samenvatting .....	153
	Dankwoord.....	157
	Curriculum vitae.....	161
	List of publications.....	162
	Affiliation of co-authors .....	165
