#### About WageIndicator Foundation - www.wageindicator.org

The WageIndicator concept is owned by the independent, non-profit WageIndicator Foundation, established in 2003. Its Supervisory Board is chaired by the University of Amsterdam/Amsterdam Institute of Advanced labor Studies, the Dutch Confederation of Trade Unions (FNV) and Monster career site. The Foundation aims for transparency of the labor market by sharing and comparing wage data and labor conditions information. The Foundation operates national websites in some 85 countries. The websites have a so called 3 pillar structure: for wages, for labor law and minimum wages, and for vacancies and education related information. In more than 20 countries the national WageIndicator websites are supported with offline actions like face-to-face surveys, fact finding debates and media campaigns. The Foundation operates globally through a network of associated, yet independent regional and national partner organizations like universities, media houses, trade unions and employers organizations, and self-employed specialists for legal, internet, media issues, with whom the Foundation engages in long lasting relationships. WageIndicator Foundation has offices in Amsterdam (HQ), Ahmedabad, Bratislava, Buenos Aires, Cape Town, Dar es Salaam, Maputo and Minsk.

Address: WageIndicator Foundation, Postbox 94025, 1090 GA Amsterdam, The Netherlands, office@wageindicator.org

#### 1 Introduction

In a globalised world comparative and up-to-date data on wages and wage setting institutions is needed to understand the global economy in relation to national labour markets and industrial relations systems. Collective bargaining is considered an important instrument in wage-setting processes. However, this assumption is not underpinned with rich empirical data, because very little is known about what exactly is agreed in these collective bargaining agreements. Social partners or governmental institutions in some countries maintain databases with collective agreement texts, but few of them code the text according to a predefined set of characteristics. One reason may be that such databases require prolonged efforts to collect, read and code collective agreements. Even if databases are maintained on a country basis, across countries these agreements will be coded differently and on different levels of detail; thus, cross-country comparisons are not possible. This lack of data is an obstacle to the exploration of the range of issues negotiated in collective agreements, as well as their impact on individual labour market outcomes. It challenges the need for a global collective agreement database.

The worldwide web has opened up new possibilities for global data collection. The WageIndicator Foundation with its websites on work and wages in 85 countries and millions of web visitors, its network of correspondents, and its central web-based technology has developed as an innovative method for collecting, annotating, coding and publishing bargaining agreements texts. In the second half of 2012, it became clear that collecting, annotating, coding and publishing of collective agreements was feasible, both from a technological perspective as well as from an organisational point of view. Paulien Osse, director of WageIndicator Foundation, explored her global network to see if social partners were willing to share their collective agreements. And they were so. Kea Tijdens, research coordinator of the University of Amsterdam/AIAS and scientific director of WageIndicator, designed a coding scheme and made a systems design for the WageIndicator programmers. This system, called COBRA, was ready by mid-2013. Daniela Ceccon took on the role of Collective Agreements Database coordinator, jointly with the team of Ernest Ngeh Tingum and Arcade Ndoricimpa from the University of Dar es Salaam, Tanzania, and Nadia Pralitasari from the Indonesian team. By December 2013 they started to upload, annotate and code the collective agreements that meanwhile had been collected through the WageIndicator network. By April 2014, already more than 200 agreements from 18 countries were entered into the database from Africa and Latin American countries and from Indonesia. By September 2015, more than 450 agreements in 25 countries have been archived, coded and published in their national language. Regularly, the WageIndicator Collective Bargaining team reports about news concerning the new Database. The team also provides overviews of topics in the agreements.<sup>2</sup> Persons interested in receiving the news updates can subscribe by emailing Daniela Ceccon <danielaceccon@wageindicator.org>.

The Collective Agreements Database primarily aims to enrich the content of the WageIndicator websites, but it also provides a unique opportunity to closely examine the variation in agreements within and across countries. This manual and codebook introduces the COBRA system (Section 2). It then shows the content of the webpages related to the Database (Section 3), and details how the Collective Agreements are coded (Section 4). The Appendix includes the full codebook of the database.

## 2 Introducing the COBRA system

#### 2.1 Aims of COBRA

COBRA is the web-based system for the WageIndicator Collective Agreements database. COBRA facilitates three steps:

- uploading of texts of Collective Agreements
- annotating and coding of these texts
- publishing of the texts, its annotations and its codes on the WageIndicator website.

COBRA generates web pages with full text, coded text, and annotated texts. The content of these pages are detailed in Section 3. COBRA also generates a monthly download of the coded content of the Collective Agreements Database. The content of this database is detailed in Section 4.

#### 2.2 Scope of COBRA

COBRA allows to upload:

- Collective Bargaining Agreements for companies
- Collective Bargaining Agreements for industries
- Transnational Collective Bargaining Agreements
- Framework Agreements

COBRA does not facilitate the uploading of:

- Proposal letters for Bargaining negotiations
- Agendas of collective bargaining committees
- Pamphlets and the like

#### 2.3 Countries and languages in COBRA

COBRA is designed such that agreements from any country and any language can be uploaded, whereby the following rules apply:

- The full texts of the agreements are uploaded and published in their original language, and these texts are not translated. The languages used thus far are English, French, Spanish, Portuguese, Swahili (Tanzania), Bahasa (Indonesia), Khmer (Cambodia), and Malagasy (Madagascar).
- The COBRA dashboard is in English, and so is the coding scheme. For the time being, the dashboard, the coding scheme and this manual will be available only in English.

## 2.4 Collecting, uploading, annotating and coding Agreements

For Collective Agreements to be brought online in the database these complex documents have to go through a number of steps. First they are collected. Social partners hand over their Collective Agreements to the WageIndicator, and these can be in any format, be it in Word or PDF format, but also in JPEG format or even as a printed booklet. The team can handle Word and PDF formats, they can copy booklets into a PDF file. JPEG files need to be retyped. In case of a Word file, the text is copied to Notepad and saved for uploading in COBRA. In case of a PDF file, the document is converted to text format using optical character recognition software. Once the Agreement is in a text format, it can be read as a HTML file, using Amaya software. Using this software, the headings H1, H2, H3 can be assigned to the document. In most agreements, an overall heading will be defined as H1; chapters will be defined as H2; and an article will be defined as H3. In a third step the text will be uploaded in the COBRA-program, where the text can be annotated. The annotation section in the COBRA coders platform has a total of 11 topics, containing over 80 questions to be answered as well as their corresponding clauses to be selected. Figure 1 shows the dashboard of the platform and the 11 topics, as well as a screenshot of the coding scheme. The latter are to be discussed in Section 4. The COBRA coders platform is password protected. The director of WageIndicator Foundation assigns passwords.

#### 3.4 Pages per Collective Agreement

Each Collective Agreement is published on a separate web page. Such a page consists of four parts, notably a table of clauses, the full text, the coded clauses and the annotated clauses. Easy navigation facilitates searching the topics of interest.

COLLECTIVE AGREEMENT BETWEEN DRY FOOD PROCESSING LTD AND THE NATIONAL UNION OF TEAMSTERS AND GENERAL WORKERS (NUTEG) OF GHANA FEDERATION OF LABOUR (GFL)

1st January 2014

PREAMBLE:

#### ARTICLE 1: PURPOSE AND INTENTION

It is the intention and purpose of the parties to this Agreement to promote orderly and peaceful Labour/Management relations, to have full understanding of both the Company and the Union, and to set forth herein their agreement on salaries, wages, hours of work and other conditions and terms of employment. In consideration of their mutual desire in promoting the efficient conduct of business and growth of a stable Union, and in providing for the orderly settlement of disputes between them.

To this end, the Company recognizes the Union as the sole and exclusive collective bargaining representative for its employees as defined in Article 2 of this agreement, in all matters pertaining to salaries/wages, hours of work, and rules and conditions of employment.

This Collective Agreement compliments all existing Rules and Regulations. Where the Collective Agreement is silent, the Standing Negotiation Committee shall be summoned to determine the matter.

#### ARTICLE 2: SCOPE AND COVERAGE

This agreement shall apply to all permanent employees who opt to be members of the Union.

#### ARTICLE 3: DEFINITION

In this Agreement unless the context otherwise requires:

(a) The "Company" means the Dry Food Processing Ltd

(b) "Employee(s)" means all permanent male and female worker(s) who are members of the Union.

(c) "Union" shall mean the National Union of Teamsters and General Workers (NUTEG) of GFL

Figure 7 The coded content of a Collective Agreement (screenshot of partial web page)

Collective Agreement between Dry Food Processing Ltd and the National Union of TEAMSTERS and General Workers of Ghana Federation of Labour

Start date: → 2014-01-01
End date: → 2015-12-31
Ratified by: → Other
Ratified on: → 2014-01-01
Concluded by:
Name industry: → Manufacturing
Public/private industry: → In the private sector
Name company: → Dry Food Processing Co Ltd
Extension to other companies in the industry applies: → No
Names trade unions: → National Union of Teamsters and General
Workers (NUTEG of GFL)

#### SOCIAL SECURITY AND PENSIONS

Employer contributes to pension fund for employees:  $\rightarrow$  No Employer contributes to disability fund for employees:  $\rightarrow$  No Employer contributes to unemployment fund for employees:  $\rightarrow$  No

#### TRAINING

<u>Training programmes: → Yes</u>

Apprenticeships: → No

<u>Employer contributes to training fund for employees: → Yes</u>

#### SICKNESS AND DISABILITY

Maximum for sickness pay: → 100 %

Maximum days for paid sickness leave: → 150 days

Pay in case of disability due to work accident: → Yes

Figure 8 The annotated text of a Collective Agreement, when selected Training programmes: Yes in Figure 7

#### ARTICLE 11: TRAINING AND DEVELOPMENT

Section 1: Training Within Industry

Parties to this Agreement acknowledge the importance of a sound training scheme as one of the means by which efficiency can be increased and therefore recommend that the fullest opportunity be taken of in-service and external training schemes designed to improve the skills of employees.

Pursuant to this, all employees shall be encouraged to take approved courses sponsored by the company or on the job training which would benefit such employees by improving their efficiency and thereby their suitability for promotion or advancement in their jobs.

Section 2: Training Course and Examination

For purpose of this Agreement, the company undertakes to train and retrain employees to enhance promotion prospects in accordance to its policies.

#### 3.5 Comparing Collective Agreements

Within a topic, Collective Agreements can be compared across countries and across industries. Comparisons can be made for approximately 80 topics. As Figure 9 shows, in September 2015 comparisons could be made for 27 countries and for 21 industries. Figure 10 shows the output after selecting the topic 'Does the agreement have clauses on social security and pensions?'.

## 4 Coding the collective agreements

#### 4.1 Introduction

As shown in section 2.5, the collective agreements are coded according to nine topics. In addition the meta-data of the agreements and its coverage is coded. For the coding, a coding scheme with a list of questions and answers has been developed. This section details the features related to the coding scheme. The full coding scheme is included in the Appendix.

To facilitate the coding process, COBRA has several auxiliary databases, called vocab's in COBRA. For example, the database of employers' organisations provides the coders for every newly entered agreement with the choice to pick from the list of employer's organisations or to add a new name if the signatories from employers' side have to be registered. Maintaining such a database is efficient, because the names in question do not need to be retyped for every new agreement, and because it prevents that the same organisation is registered twice with slightly different names. The main databases are:

- List of companies/ plants / multinationals
- List of trade unions
- · List of employers' organisations
- List of professional associations
- List of bank holidays
- List of regions (geographical characteristics)
- List of industries, coded according to the industry classification NACE v2.0.

#### 4.2 Meta information about the Collective Agreements

This subtopic identifies the name and the operative and expiration dates. It identifies whether the agreement is a single company, multi-employer, framework or transnational agreement. The database details the signatories of the agreement: employers or their associations, trade unions, and if relevant professional associations. It also has questions about the ratification process of the Agreement, if relevant, and the extension of the Agreement to employers who did not conclude the agreement, if relevant.

#### 4.3 Information about coverage

The database includes the following information concerning the coverage of the agreement:

- Coverage according to geographical characteristics, to job types, and to industries; this can apply to either inclusion or exclusion of specific groups in the agreement
- Number of employees covered, where possible broken down by gender; this information is
  hardly included in the texts of the agreements, and therefore the team usually ask the social
  partners for this information; sometimes the social partners are unable to provide this
  information

#### 4.4 Topic 1: Job titles

This section aims to identify if the agreement refers to one or more job categories, such as skilled, semi-skilled or unskilled categories, or to specific jobs, such as foremen, domestic workers, drivers, sewers, drivers, and alike. This identification results in a database of so-called 'job types', which are used for the coding of wage scales or to other clauses in the agreement. The coding scheme also asks whether the Agreement includes job descriptions as well as a reference to a job classification system.

#### 4.5 Topic 2: Wages

The coding scheme has an extensive set of questions aiming to identify how wages are regulated in the collective agreement. It includes questions about wage-setting processes, about the Statutory Minimum Wages, about pay scales, and alike. This section also asks whether extra payments apply to overtime hours, to working outside office hours, and alike.

# 4.6 Topic 3: Working Hours, Schedules, Paid Leaves And Paid Holidays

With this topic many features of working hours and related issues are coded. The questions related to schedules, paid and unpaid leave clauses, and the number of paid holidays.

#### 4.7 Topic 4: Employment Contracts

The coding scheme has questions about the presence of clauses on individual employment contracts and job security, as well as questions about trial periods and severance pay.

#### 4.8 Topic 5: Work And Family Arrangements

The coding scheme has questions about the presence of clauses on work and family arrangements, specifically about the presence of paid maternity leave, and if so for how many weeks, whether pay is maximized to a percentage of basic wage, and if there are clauses on job security for women wishing to return to work after maternity leave. It contains questions about clauses on the care for dependent relatives and clauses on employer-provided childcare facilities.

#### 4.9 Topic 6: Health And Safety And Medical Assistance

The coding scheme has several questions about the presence of health and safety policies at the workplace, HIV-related policies and health and safety training. It asks about health or medical assistance, health insurance of the employees, and whether relatives are also covered by these arrangements.

#### 4.10 Topic 7: Sickness And Disability

The coding scheme asks questions about sickness and disability clauses in the agreement. It asks about pay during periods of sickness, whether this pay is maximized to a percentage of basic wage, whether the days of paid sick leave per year are maximized, and whether some categories of employees are excluded. It contains also questions about pay in case of disability due to work accidents or working conditions.

#### 4.11 Topic 8: Social Security And Pensions

The coding scheme asks questions about the presence of clauses on social security and pensions. If so, does the employer pay contributions to a pension fund for its employees, does the employer pay contributions to the disability fund for its employees, and does the employer pay contributions to the unemployment fund for its employees?

#### 4.12 Topic 9: Training

The coding scheme has questions about clauses on training and apprenticeships, and asks whether the employer pays contributions to a training fund from which its employees can benefit.
