Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

Contents

Chapter 1	
General introduction and outline of the thesis	1
Chapter 2	
Comparison of sustained antithrombotic effects of inhibitors of thrombin and factor Xa in experimental thrombosis	9
Chapter 3	
Successful attenuation of venous thrombus growth in rabbits after the administration of a novel oral thrombin inhibitor	29
Chapter 4	
A novel direct specific thrombin inhibitor (S 18326) attenuates thrombus growth and enhances thrombolysis in a rabbit venous thrombosis model	51
Chapter 5	
A novel low molecular weight inhibitor of PAI-1 (XR5118) promotes endogenous Fibrinolysis and reduces post-thrombolysis thrombus growth in rabbits	69
Chapter 6	
Apolipoprotein(a) attenuates endogenous fibrinolysis <i>in vivo</i> in a rabbit jugular vein thrombosis model in vivo	87
Chapter 7	
Enhancement of rabbit jugular vein thrombolysis by neutralization of factor XI: in vivo evidence for a role of factor XI as an anti-fibrinolytic factor	99
Chapter 8	
Fibrinogen-coated albumin microcapsules reduce bleeding in severely thrombocytopenic rabbits	115
Chapter 9	
The ability of recombinant factor VIIa to generate thrombin during inhibition of the tissue factor/factor VIIa complex in human subjects	129

Chapter 10	
Activation of coagulation by administration of recombinant factor VIIa elicits an Interleukin (IL)-6 and IL-8 release in healthy human subjects	145
Chapter 11	
Recombinant activated Factor VII: the universal haemostatic agent?	159
Chapter 12	
Reduction of perioperative blood loss and transfusion requirement in patients undergoing transabdominal retropubic prostatectomy by administration of recombinant activated factor VII	181
Chapter 13	
Successful treatment with recombinant factor VIIa of therapy-resistant severe bleeding in a patient with acquired von Willebrand disease	199
