# Contents

<b>Introduction</b>	9
<b>Chapter 1 Medical aid in the field</b>	19
Médecins sans Frontières: emergency aid plus. <b>Veeken H</b> and Meijman B. Nederlands Tijdschrift voor Geneeskunde 1996; 30: 1565-8.	21
Médecins sans Frontières: aid in deed and word. <b>Veeken H</b> and Jansen J. Nederlands Tijdschrift voor Geneeskunde 1996; 34: 1732-5.	26
Drugs for "neglected diseases": a bitter pill. <b>Hans Veeken</b> and Bernard Pécoul. Tropical Medicine and International Health 2000; 5: 309-11.	30
<b>Chapter 2 The diagnosis and treatment of visceral leishmaniasis under <i>field</i> conditions</b>	35
Manual for the diagnosis and treatment of visceral leishmaniasis (kala-azar) under field conditions. <b>Hans Veeken</b> , Médecins sans Frontières; Amsterdam, January 1999.	
<b>Chapter 3 Evaluation of a rK39 dipstick test for the diagnosis of visceral leishmaniasis in the field</b>	55
Evaluation of a rK39 dipstick test for the diagnosis of visceral leishmaniasis in the Sudan. <b>Hans Veeken</b> , Koert Ritmeijer, Jill Seaman and Rob Davidson. Submitted.	
<b>Chapter 4 Randomised prospective trials in the field, to evaluate the efficacy and toxicity of generic sodium stibogluconate (SSG) for the treatment of visceral leishmaniasis</b>	63
A randomised comparison of branded sodium stibogluconate and generic sodium stibogluconate for the treatment of visceral leishmaniasis under field conditions in Sudan. <b>Hans Veeken</b> , Koert Ritmeijer, Jill Seaman, Robert Davidson. Tropical Medicine and International Health 2000; 5: 312-7.	64

Ethiopian kala-azar: generic sodium stibogluconate and Pentostam® are equivalent; HIV co-infected patients have a poor outcome. Koert Ritmeijer, <b>Hans Veeken</b> , Gustavo Leal, Yoseph Melaku, Ripka Amsalu, Jill Seaman, Robert Davidson. Transactions of the Royal Society of Tropical Medicine and Hygiene, in press.	74
<b>Chapter 5 A retrospective analysis of a cohort patients, treated for visceral leishmaniasis, in an area with a high prevalence of HIV in Ethiopia</b>	85
A retrospective analysis of the results of treatment and risk factors for mortality of a cohort patients treated for visceral leishmaniasis, in an area with a high prevalence of HIV, Ethiopia. <b>Hans Veeken</b>	
<b>Chapter 6 Evaluation of the cost-effectiveness of a meningitis support programme</b>	95
Priority during a meningitis epidemic: vaccination or treatment? <b>Hans Veeken</b> , Koert Ritmeijer, Benson Hausman. Bulletin of the World Health Organization 1998; 76: 135-41.	
<b>Chapter 7 Discussion</b>	107

*It is late afternoon and the two brothers are being registered at the kala-azar clinic in Duar, southern Sudan. They are febrile and severely marasmic - just skin and bones, with the huge spleen and dull eyes so common in kala-azar patients.*

*They are unable to say who their subchief is and in frustration the staff asks for their mother. Finally a man tells them the boys were found that morning on a path leading to the clinic, sitting beside a mosquito net that covered their dead mother. Her other children and husband had died already that year, so in desperation she had set out to the new clinic in Duar, to see if there was help...*
