Disclaimer/Complaints regulations

If you believe that digital publication of certain material infringes any of your rights or (privacy) interests, please let the Library know, stating your reasons. In case of a legitimate complaint, the Library will make the material inaccessible and/or remove it from the website. Please Ask the Library: <https://uba.uva.nl/en/contact>, or a letter to: Library of the University of Amsterdam, Secretariat, Singel 425, 1012 WP Amsterdam, The Netherlands. You will be contacted as soon as possible.

CONTENTS

	page
Chapter 1	Introduction: Structure and function of the HIV-1 leader RNA 9
Chapter 2	Two alternating structures of the HIV-1 leader RNA 39
Chapter 3	Mutations in the TAR hairpin affect the equilibrium between alternative conformations of the HIV-1 Leader RNA 57
Chapter 4	Multiple secondary structure rearrangements during HIV-1 RNA dimerization 67
Chapter 5	An HIV-1 infected individual with low viral load harbors a virus that exhibits and <i>in vitro</i> RNA dimerization defect 77
Chapter 6	The dimer initiation site hairpin mediates dimerization of the human immunodeficiency virus, type 2 RNA genome 95
Chapter 7	Regulated HIV-2 RNA dimerization by means of alternative RNA conformations 105
Chapter 8	Requirements for RNA heterodimerization of the human immunodeficiency virus type 1 (HIV-1) and HIV-2 genomes 117
Chapter 9	The apical loop of the HIV-1 TAR RNA hairpin is stabilized by a cross-loop base pair 129
Chapter 10	Evidence for a base triple in the free HIV-1 TAR RNA 141
Chapter 11	On the importance of the primer activation signal for initiation of tRNA(lys3)-primed reverse transcription of the HIV-1 RNA genome 173
Chapter 12	Summary and discussion 185
Samenvatting	195
Appendices	201
Acknowledgements	213
List of publications	214
Curriculum Vitae	216
