ACKNOWLEDGEMENTS

I would like to thank the following people for being there the last four years:

Tom Postmes, who has become very valuable to me, not only as my co-promotor but also as a dear friend. My promotor *Peter Neijens*, for his help and advice: I am grateful for his readiness to get involved in the project and for his insightful comments in the final stage of the process. *Roderick Swaab* deserves lots of credits for his enthusiasm to read and comment on the draft versions of the book chapters. I owe him one. *Sandra Zwier*, for her willingness to meticulously read and correct the manuscript. *Moniek*, for more than I can come up with: Without her, nothing would be the same. *Marjolein, Claes, Jochen, Kim, Angela, Henri, Thom*, and all other *colleagues* that made the last four years so much fun. *Mylene van Haafden* and *Femke Verkade*, for assisting me with conducting two of the experiments. *Alexander Schouten*, for his technical help and assistance in many of the studies. All *friends and family* that made me remember that a Ph.D.-project is not all there is to life. *Juliette Molenaar* and *Daniël Nicolas* for designing the beautiful book cover.

Thank you all!
