Hand Hygiene in the Prevention of Healthcare Associated Infections

Clean hands save lives -- Hand washing is regarded as the most efficient way of controlling healthcare associated infections, a major problem that causes thousands of deaths each

year. Hand washing is easy to do and is one of the most effective ways to prevent the spread of many types of disease. If you would like copies of any of these articles, or if you would like further information on this or any topic, please contact any Library team member.

"US hospital trial of handwashing monitor." *Lamp*, 66(4):11, 2009 May.
