Submitted on 6 Jul 2016

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

From group collaboration to large scale social collaboration

GROUPWARE
SOME ISSUES AND EXPERIENCES
C.A. Ellis, S.J. Gibbs, and G.L. Rein

Groupware reflects a change in emphasis from using the computer to solve problems to using the computer to facilitate human interaction. This article describes categories and examples of groupware and discusses some underlying research and development issues. GROVE, a novel group editor, is explained in some detail as a salient groupware example.

C.A. Ellis, S.J. Gibbs, and G.L. Rein

laboration of many specialists, including social scientists and computer scientists. CSCW looks at how

in this larger sense and delineates classes of design issues facing groupware developers. It is divided

Challenges at the time

Office Information Systems and Computer Science

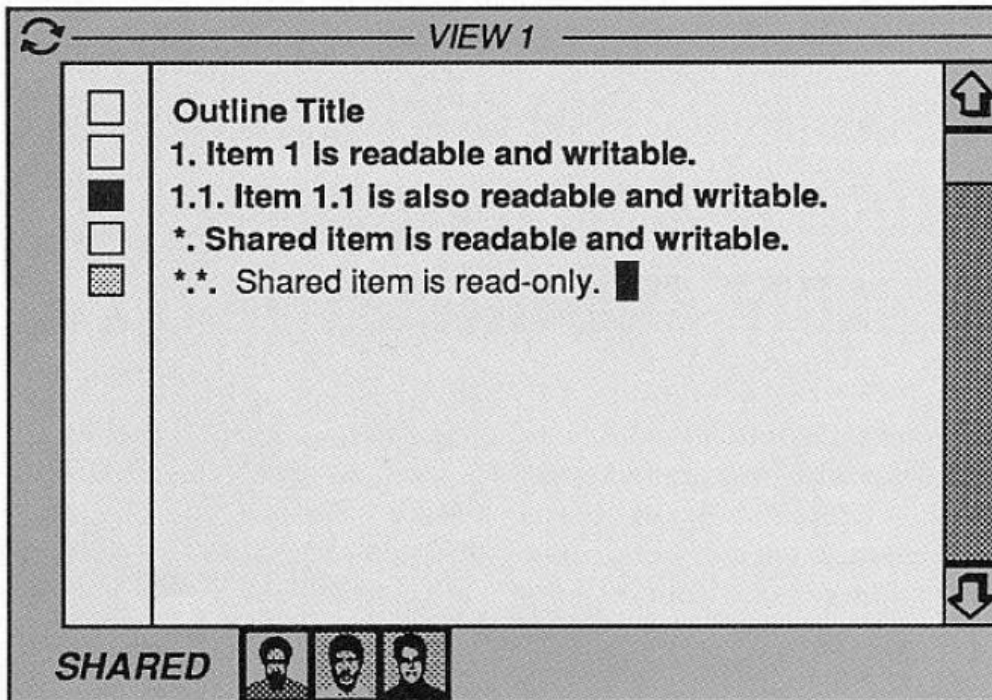

Clarence A. Ellis and Gary J. Nutt

- A programming language that can be **used by a Clerical worker**
- Software engineering – **modeling and validation**
- Operating Systems and database – distribution of data, **consistency and security**
- Measurement and Evaluation
- Communication - teleconferencing
- Other area – psychology, social implications

Collaborative Editor

- GROVE Group Editor

users ask “Isn’t it chaotic to all edit in the same document, even the same paragraph, at the same time?” and “Why would a group ever want to edit in the same line of text at the same time?” Indeed, this editor is at

Design issues (at the time)

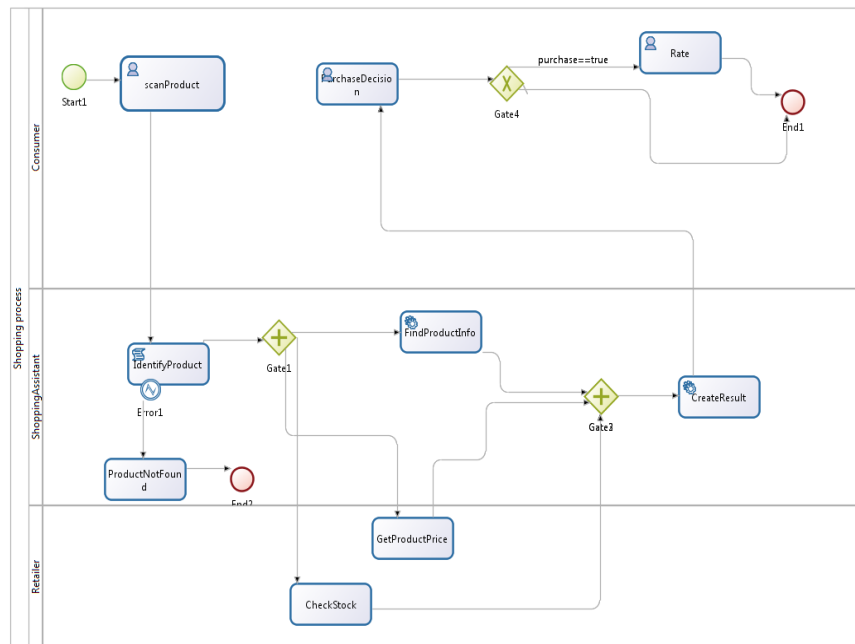

- WYSIWIS (What you see is what I see)
 - Relaxed vs strict
- Group Processes (Organising the collaboration)
- Concurrency Control (Optimist vs Pessimistic)
- Over issues

BPM systems

- Model and automate office processes
- Integrate Information Systems

Collaborative BPM

Social BPM

Support collaboration between people and organisations

More flexible/supports change

Allow more interactions between participant

Support for inter organisational process

BonitaBPM V6 (2015)

The screenshot displays the Bonita Studio interface for editing a BPMN diagram titled "Buy a MINI (3.2)". The main workspace shows a flowchart with the following elements:

- Start1** (Green circle) leads to **Model choice** (Task).
- Model choice** leads to **Color selection** (Task).
- Color selection** leads to **Accessories** (Task).
- Accessories** leads to **Availability check** (Task).
- Availability check** leads to **Availability info** (Task).
- Availability info** leads to a **Decision** diamond with two paths:
 - Mini not available**: Leads back to **Model choice**.
 - Mini available**: Leads to **Payment options** (Task).
- Payment options** leads to **Order** (Task).
- Order** leads to **Recap** (Task).
- Recap** leads to **Order finished** (End circle).
- Availability info** also leads to a **Task** named **Test Drive** (Task).
- Test Drive** leads to a **Decision** diamond with two paths:
 - Ready to order**: Leads to **Payment options**.
 - Not ready to order**: Leads to **Order cancelled** (End circle).

The bottom panel shows the configuration for the "Buy a MINI" process:

- Pool**: Buy a MINI
- Name**: Buy a MINI (Buy_a_MINI)
- UserXP**: (Empty)
- Version**: 3.2
- Description**: Design and order your car

Inter organisational processes

The view-based approach to dynamic inter-organizational workflow cooperation

Issam Chebbi ^a, Schahram Dustdar ^{b,*}, Samir Tata ^a

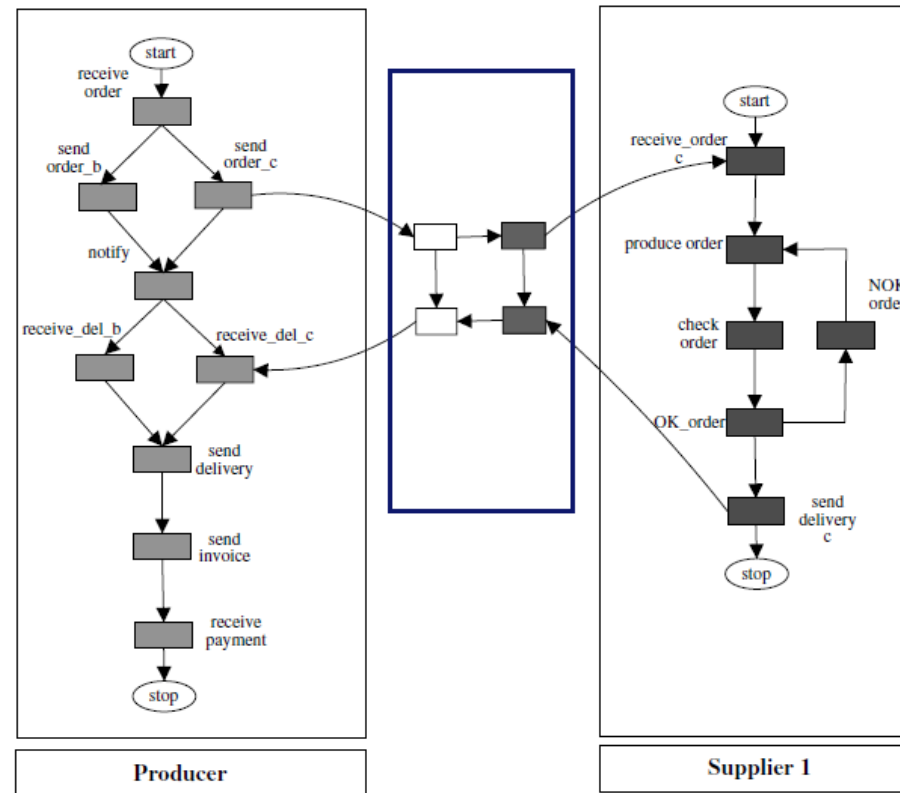

Fig. 4. Public vs. internal processes.

Coordination tool

The screenshot displays a Trello board for the 'AtomicOpenShift Roadmap'. The board is organized into columns representing different stages of completion: 'Epic Backlog', 'Done (3.2)', 'Done (3.1)', 'Done (3.0)', and 'Done (2.x)'. Each card in the 'Done' columns includes a title, a description, and a progress indicator (a green checkmark followed by a fraction, such as 6/6 or 10/10). Some cards also show the number of votes and the profile pictures of team members who have interacted with the card. The 'Epic Backlog' column lists several tasks, including 'Seamless Developer Experience on OpenShift', 'Integrated CI / CD Workflows to Enable DevOps', 'Mobile Services', 'Cluster Scale', 'Container Security', 'Service Catalog', 'Enterprise Image Registry', 'Cluster Automation and Infrastructure Integration', 'Simple Install & Getting Started', 'Signing Images', and 'Scanning Images and Containers'. On the right side of the board, a 'Menu' is visible, showing a grid of member avatars and a list of recent activity, such as 'Dan McPherson moved Improvements for JBoss and Java application development [javav21] from Epic Backlog to Done'.

Où Est-ce que la Loire-Atlantique fait partie de la Bretagne ?
Au même endroit mais de l'autre côté de la route les premières lunettes 3D en carton vieux stylo cassé utilisée comme carabine
Panneau zone 30
Zone 70 (encore)
En arrivant au STOP, à ma droite le panneau de publicité « Auberge de La Coudre » avec le numéro
Je marche, c'est chiant, et je ne suis pas prête d'arriver ! 20 minutes à pied. Ou plus !
Il était une fois la pièce du puzzle qui réussit à réunir la France, petit pays d'Europe. Etrange paradoxe.
Un bar au coin de cette rue, un autre au bout de celle-ci. Une église au bout de cette rue, une autre au bout de celle-ci. Des touristes, des touristes, des touristes, brandissant leurs appareils photos.
J'habite dans une maison d'un quartier d'une petite ville, la ville est une cuvette. Ce pays de vaches !
J'habite une autre maison qui paraît très petite, une maison qui bouge toujours avec moi.
Tous voqués mais finissant comme des « moutons ».
Je suis un élément. Un élément d'une liste très organisée. Et puis si on cherche un peu, on tombe aussi sur des blogs de pâtisseries et de mode.
Une réussite sociale à première vue. Céline Dion.
Un numéro quelconque, numéro 4.
Et si on cherche un peu, il n'y a pas tant de personnes qui sont connues (Edgar Allan Poe, Quentin Tarantino, Roger Federer, Tim Burton).
Puis je descends par la cour du collège pour enfin arriver dans la cour du lycée. C'est alors que j'ai sombré.
Que l'oubli m'a englouti. Je me suis noyée. Je devais avoir 10 ans. Je devais avoir 10 ans. Je devais avoir 10 ans. c'était sans doute en 2006.
Je me souviens avoir eu mon premier ordinateur en CM1 ou en CM2, gros écran et centrale, ordinateur beige mais pas du moment où l'on a du le jeter sûrement pendant ma ferme.
Brusque changement de direction. D753 et tout d'un coup c'est beaucoup plus plat.
Peu important les noms, peu important les personnages, car elle est chacun d'eux.
Peu importe l'auteur, car seul importe son œuvre.
C'est quoi un rêve ?
Rêver c'est important plus important que d'attendre le métro.
Il y a Carnac en Bretagne, avec sa plage et sa nature. Il y a Nairobi au Kenya, avec ses parcs et ses grandes étendues solitaires. Il y a Bombay, en Inde, et sa culture magique. Il y a le Machu Picchu, et ses montagnes splendides. Il y a Palerme en Sicile, et son histoire passionnante.
Bonjour, dégustation de melon. Et pâtisseries. Choses qui ont une grâce raffinée. C'est comme les bigorneaux !!!
Sur place ou à emporter ?
C'est une affaire sérieuse, ça vous suit toute une vie. Mais quel rapport avec les questions précédentes ? Plein de mystères.
STOP !! N'importe quoi. Je vais pas manger ça. C'est pas la saison.

Pour que les pads restent des outils fonctionnels, veuillez copier le plus rapidement possible les comptes rendus sur les pages wiki à cet effet (ici pour vous : <https://wiki.nuitdeboutstrasbourg.tk/dokuwiki/doku.php?id=actions>)

Veillez à ce que la mise en page soit propre et que ce soit corrigé et structuré.
Les pads pourront ainsi être réservés aux discussions plus techniques sur les actions à mener au sein de la branche.
Une fois un point résolu, vous pouvez le copier-coller en bas de page pour qu'il reste disponible en consultation d'archive ou bien l'effacer si ça n'a plus d'importance fonctionnelle. (ne déroutons pas les nouveaux venus avec trop de contenu non structuré.

Veillez également à afficher en dessous de ce message un bref résumé des objectifs principaux de la branche pour que les gens sachent comment interagir avec les autres.

Merci de laisser ce message en haut de page pour le moment

Agenda

- Lundi 18 avril - 8h30 - place Kléber : distribution de café et/ou de petit dej' place Kléber
info : <https://strasbourg.nuitdebout.fr/pad/p/distribCa%C3%A9>
Apporter, thermos, gobelets, thé, eau chaude, sucre, carton, feutres, prospectus ...
- mardi 19 avril - 18h - à république: atelier "voix" suivi ou complété de "techniques de prise de parole"
- "voix" pour ne pas se casser la voix pendant la manifestation du lendemain
- techniques de prise de parole pour parler devant un auditoire, une caméra, un journaliste ...
- mercredi 20 - 14h - Place Kléber : manifestation contre la loi travail à l'initiative des étudiants.
Départ Place Kléber, arrivée place de la Rep.
- jeudi 21 - 17h30 - place Kléber : distribution de café <https://strasbourg.nuitdebout.fr/pad/p/distribCa%C3%A9>
- vendredi 22 - 11h30 - marché à Cronembourg : Tractes et contacte avec les habitants à côté du CNRS
- Samedi 23 après-midi : ateliers : la loi travail - logement - monnaie locale Le Stück
- mercredi 27 midi : intervention devant l'ENA pour dialogues et interview, en preparation

<https://nuitdeboutstrasbourg.tk/dokuwiki/doku.php?id=actions> : Consultations en ligne

Bienvenues sur le pad du groupe Actions !

N'oubliez pas de faire remonter vos comptes rendus les ami-e-s ... surtout de votre groupe ! :

Samedi 16 avril :

Lundi 18 avril 8h30 : distribution de café et/ou de petit dej' place Kléber
pad dédié aux futures distribution de café : <https://strasbourg.nuitdebout.fr/pad/p/distribCa%C3%A9> Concernant ce lien, ou le trouve-t-on mis à part ici ? pas forcément facile d'y accéder pour les personnes voulant se greffer sur l'action en effet.
Besoin de gobelets ?

mardi 19 - 18h à république: atelier "voix" pour ne pas se casser la voix pendant la manifestation du lendemain

More than 70 participants

Who is doing what ?

- Awareness at a large scale

A complex challenge : security and trust

- Who are the people I'm working with
- Collaboration data can be encrypted and not shared on the cloud (being investigated).
- Provides guarantees to the participants

Current Issue

Coordination at a large scale

Haiti Earthquake 2006

- 7.0 Magnitude earthquake – 3.5M people affected – 220.000 death (est.)
- **Hundreds** of responding organisations

Unexpected event at an unexpected scale

- First responder : people
- Overwhelming answer from the international community (hundreds of NGO's)
- First important use of social network
- volunteer based crisis mapping
- <http://www.digital-humanitarians.com/>

Hurricane Katrina 2005

- Category 5 Hurricane
- Caused breaches to flood protections structures
- 80% of the city of New Orleans Submerged (1500 deaths)

Coordination issues

- Very wide area affected
- Several political decisions level
- Coordination issues during the evacuation

The Danube floods

- 2002,2005,2006,...,2014
- Very common event – cross international borders
- Requires a dedicated organisation

Coordination at a large scale

- Combination of human and services activities
- Composition of hundred of services
- Duration, kind of contribution, governance
- Various domains : logistic, crisis management, software development,

Inter organisational issues

“we are exchanging text information real-time through either cell or mobile units or satellite”

[..]

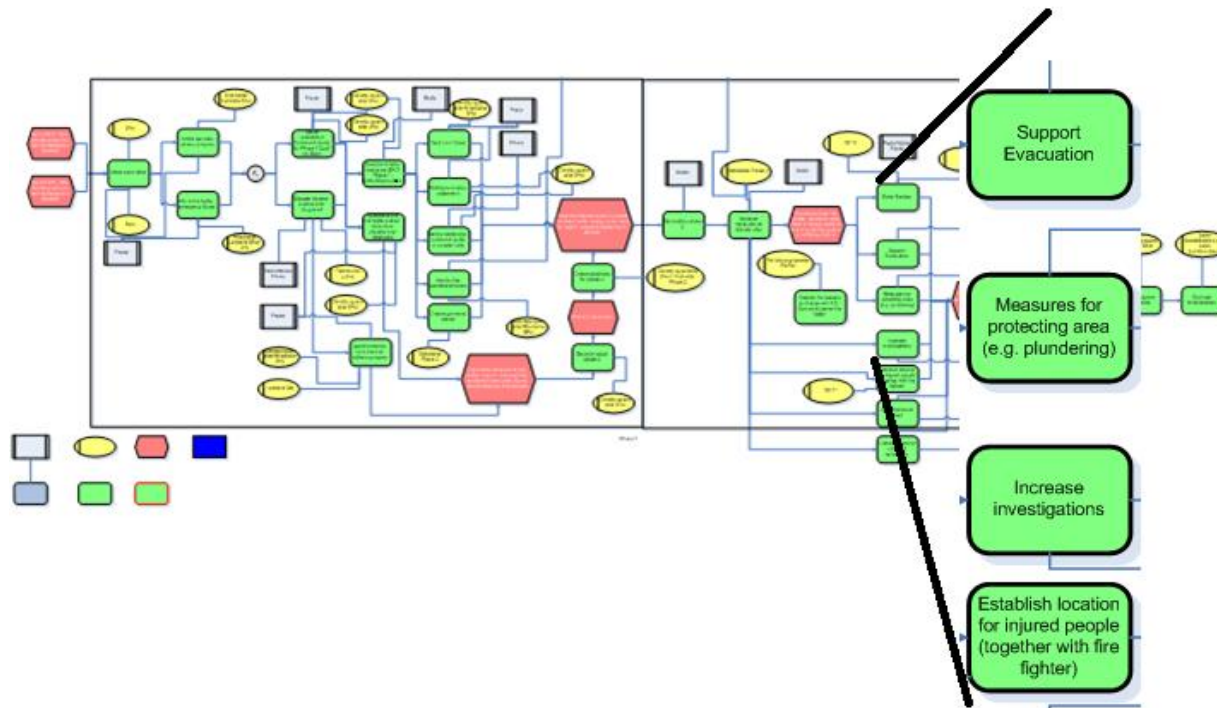

“obvious the more complex a situation gets, for instance where you may have many organizations working collectively in order to accomplish a goal, but at the same time working independently in terms of their own interests, where you get in those in situation like that, you know it get to the point, to be so complex that it would be overwhelming”

Complex BP Modeling

- Outcome of a workshop with Firefighters

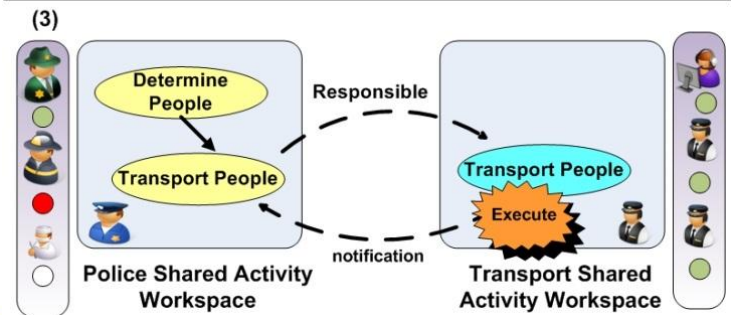

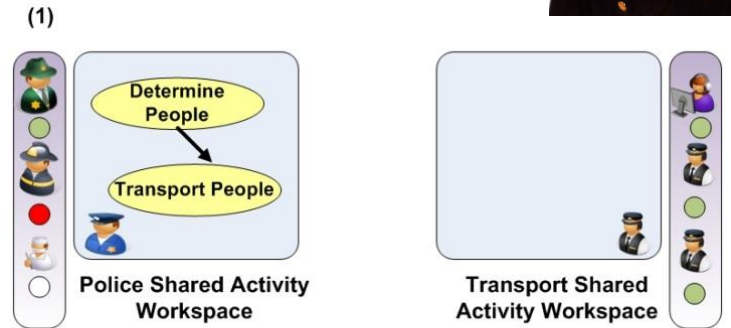

Coordination awareness

- Activity awareness ?
- Coordination **without a central authority**
- Distribution of control
- Privacy

Still an issue today

Crowdsourcing

Coordinating very large scale/long running simple activities

Combining human task and service in a process at a large
scale

Centralised process with very distributed unknown
performers

Haiti Crisis Mapping

4636 project volunteers translated 25,186 SMS messages and numerous e-mail, Web, and social media communications, resulting in 3,596 reports that were actionable and included enough relevant information to be mapped on Ushahidi.³¹

INPUTS

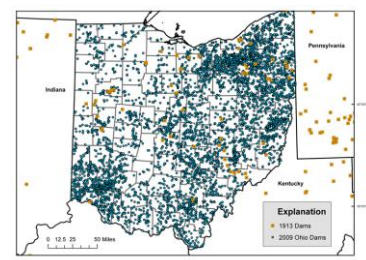

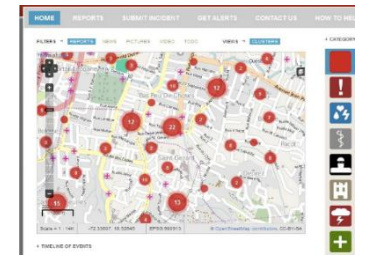

Citizen Sourcing Data

FEMA dedicated app

Dedicated app can receive notification and but used to ask for data

Human/Machine composition example

The Refugee crisis

- A very tricky kind of crisis
- Affect international relationships
- Difficult agreement on the response

Citizen coordination

- International scale
- Citizen create Facebook pages, maps, dedicated tools to coordinate
- But privacy, security, reliability, trust issues

Internet wide service composition

The screenshot displays the Outpost website interface. On the left is a map of Florence, Italy, with numerous blue location pins. The right side features three accommodation listings:

- Appartamento Oltrarno-Pitti: wifi internet**: Apartment, Entire Place, €436 for 4 nights, 2 sleeps, 1 bedroom, 1 bathroom, Centro storico. Includes buttons for Details, Book it, and Add.
- Lorenzo Studio**: House, Entire Place, €1728 per night, 2 sleeps, 3 bedrooms, 2 washrooms, Centro storico. Includes a 'FLIP' button, Book it, and Add buttons.
- Large double room with king-size bed, on the second floor**: Room - Apartment, Private Room, €149 per night, 2 sleeps, 1 bedroom, 1 bathroom, 1 bed, Centro storico. Includes the 'roomorama' logo, Book it, and Add buttons.

Red circles highlight the currency selector (EUR) in the top right, the 'FLIP' button in the second listing, and the 'roomorama' logo in the third listing.

Behind the scene

Conclusion

- Large scale collaboration exists
- Large scale collaboration helps to solve large scale problems
- Only very solution based ad-hoc support

Large scale collaboration issues

- A programming language that can be used by a **Clerical worker**
- Software engineering – **modeling** and **validation**
- Operating Systems and database – **distribution of data, consistency and security**
- Measurement and Evaluation - **prediction**
- Security, **privacy and trust**
- WYSIWweS or What ou see is what we see
- **Community** Processes
- Concurrency Control
- Other area – psychology, social implications
