## EXECUTIVE SUMMARY

This document lists 1132 references directly relevant to reef fisheries in general and reef fisheries on the Great Barrier Reef in particular. It was prepared for the Great Barrier Reef Marine Park Authority as part of a review of data on fishes of commercial and recreational fishing interest on the Great Barrier Reef. The companion volume (Volume 1, Williams and Russ, 1993) provides a review of the data specifically relating to the Great Barrier Reef and includes its own reference section which is partially, but not completely, a subset of the references provided here. The references here date to 1991. Primary sources of references are as follows:

1) Literature searches on computer databases:

Biosis (Biological Abstracts)  
Aquatic Science Fisheries Abstracts  
CSIRO Australis (including the GBRMPA REEF database)  
ICLARM database

2) Reference citations of major works:

Hundloe (1985)  
Munro (1983)  
Munro & Williams (1985)  
NOAA Tech. Mem. NMFS-SEFC-80  
Polovina (1987)

3) Personal communication with authors

An addendum includes references cited in Volume 1 but not included in the above sources.

A subject index lists references under subject headings, with Great Barrier reef studies highlighted.

The bibliographic information in this volume is stored on the Paperbase system and is held on diskette and other storage facilities at the Great Barrier Reef Marine Park Authority, PO Box 1379, Townsville, Queensland, 4810, Australia.
