Linking It All Together

Q&A / Discussion

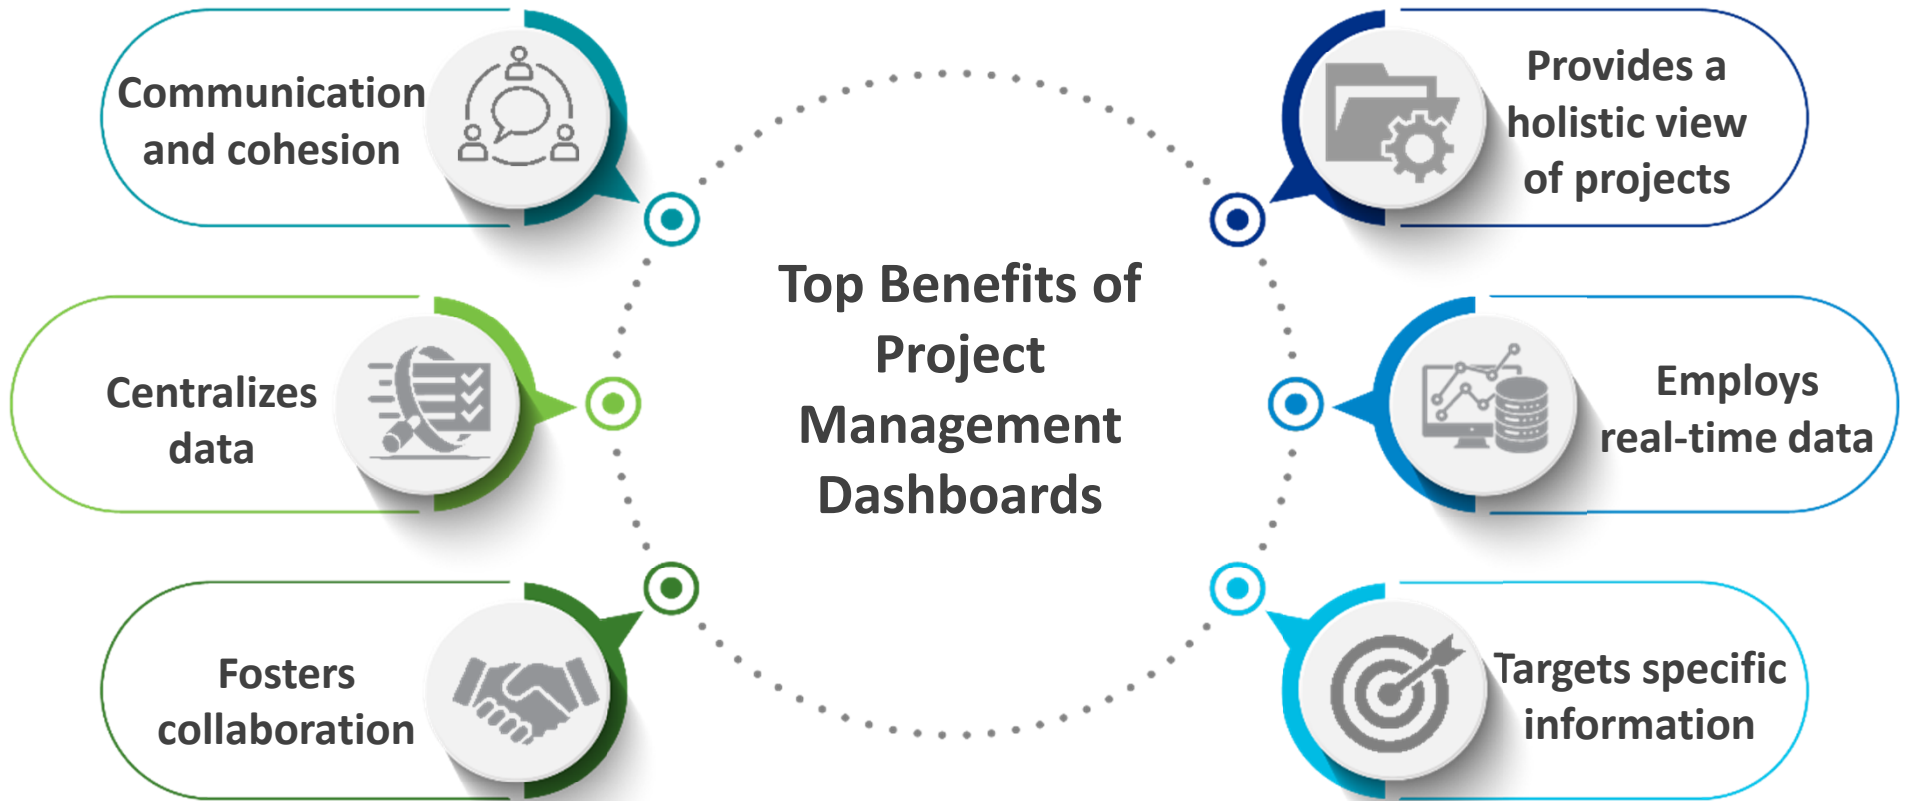

What Is a Data Management Dashboard?

- Real-time project updates
- 24/7 information
- Schedules
- Budgets
- Online mapping
- Document retention
- Visualize trends

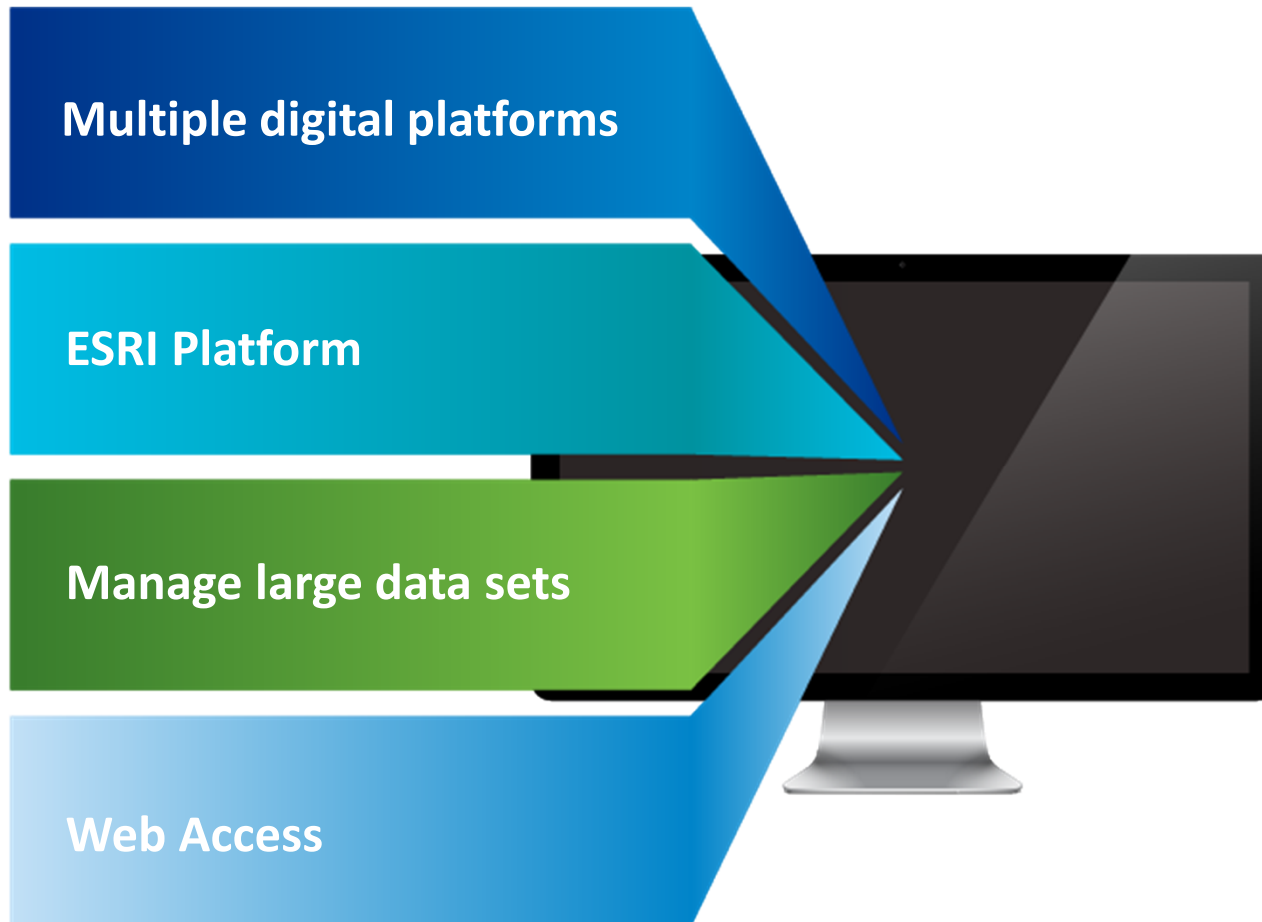

A digital platform that presents a large amount of data as an interactive visualization tool on a single screen.

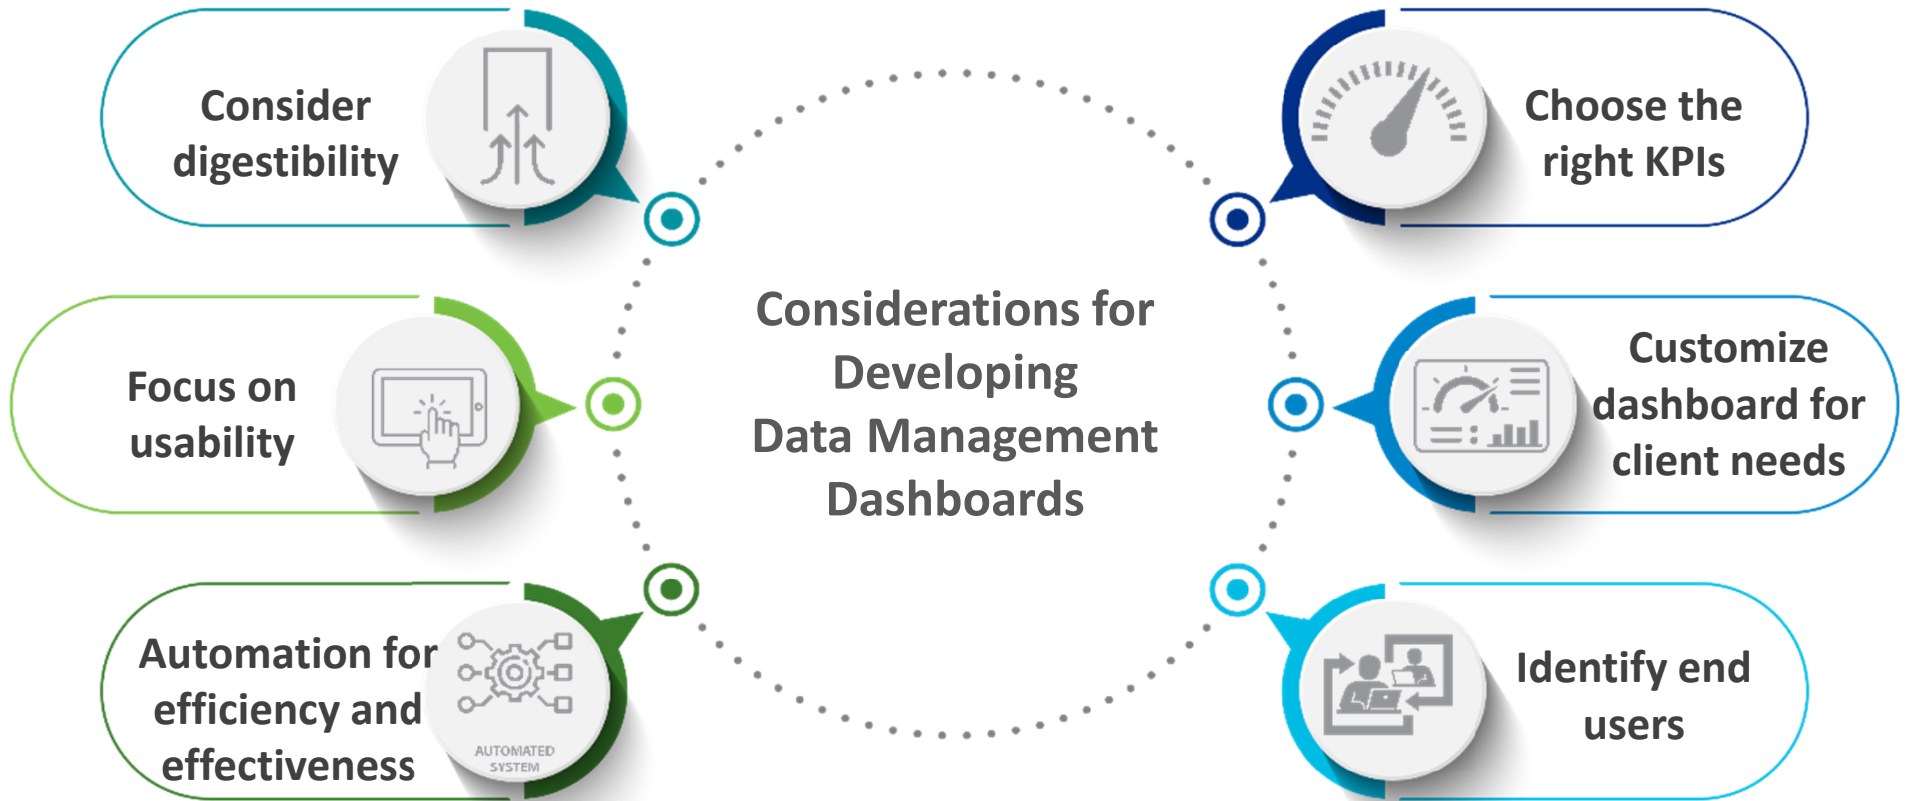

Benefits of Project Management Dashboards

Technical Benefits of Data Management Dashboards

Considerations for Developing Dashboards

Case Studies – Dashboard Examples

Transportation Planning & Programming, TxDOT

Mark Clark Expressway Supplemental EIS, SCDOT

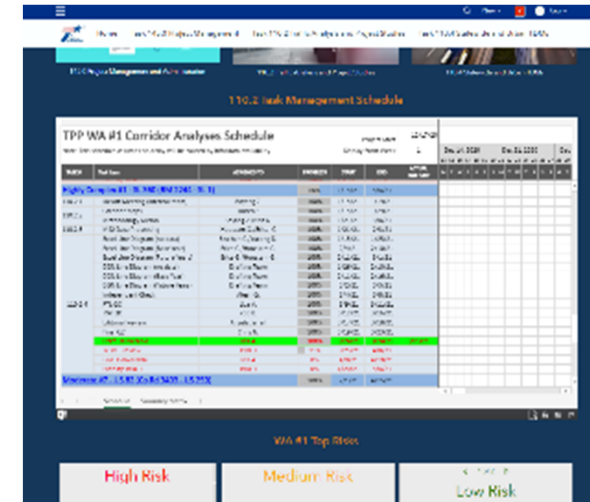

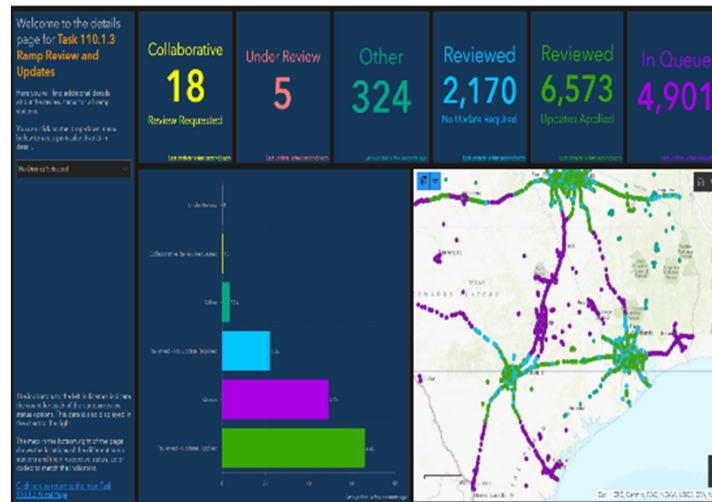

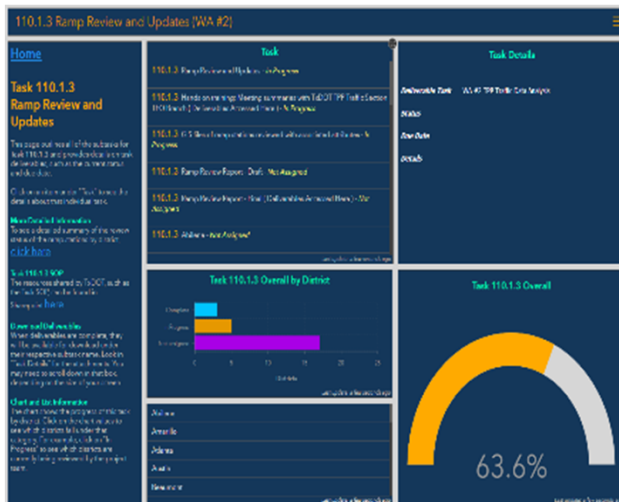

Bridge Scour Assessment and Management System, SCDOT

I 95 Section BSR PennDOT

Texas DOT Transportation Planning & Programming

- Available online 24/7
- Up-to-date schedules, milestones, progress reports and deliverables
- Visual display of data

- Online mapping tools
- Project data repository and analysis

Contract No. 50-91DP5002

WA #1 Corridor Projections and Modeling

Studies of existing and projected corridor traffic volumes as well as detailed traffic analysis for highway projects proposed by TxDOT Districts. Data collection, alternative analysis, TDM development, SAM upgrades, and simulations requested by the State.

WA #2 TPP Traffic Data Analysis

Support for TxDOT traffic analysis data needs related to the collection, monitoring, analysis, review, and updates for the STARS II MS2 system. Resources for implementing forward-thinking recommendations and industry benchmarks related to high-volume corridor AADT.

PUBLIC HEARING

View the Virtual Public Hearing Room

ALL Public Hearing materials available online here.

[View Virtual Public Hearing Room](#)

The purpose of the community meetings and Public Hearing was to:

- Present the Recommended Preferred Alternative
- Present the Supplemental Environmental Impact Statement (SEIS)
 - The SEIS is available to view on the [project website](#) or in hard copy at the public hearing events, South Carolina Department of Transportation (SCDOT) Headquarters, SCDOT District 6 Office, Cynthia Graham Hurd/St Andrews Regional Library, West Ashley Library, John's Island Regional Library, and James Island Library

Full Name	Comments
	You must not exclude left turns from 278 on to Squire Pope. Left tu critical to all residences and businesses on the North end of Hilton . With tolls gone from the Cross Island expressway traffic will move smoothly since people doing lane changes to avoid paying tolls will happen and with a longer left turn lane there will be no backup. If y signal for Squire Pope drivers to turn left on to 278 the intersection any way.
	Yes, hi, this is Gerhard Gartner calling. I live at 138 high bluff road that's the hilton-head plantation on hilton island. Zip code 29926. My number is 843-540-1638. Just as a comment I broadly support the i improve the roadways coming in and out of Hilton head island in te I've been here ten years now and in the ten years I have seen the tra utterly impossible to navigate, particularly in the morning and rush back off the island in the early or late afternoon and anything that c mitigate this traffic snarl is very, very much supported by myself. I are a number of alternatives, or a number of, of, of ways of accomp and, and, and the best way obviously will be selected at some point road, but all the naysayers that say that we don't need this are living because clearly we do. We have to have access to the island ingress...

SCDOT Bridge Scour Data Management Dashboard

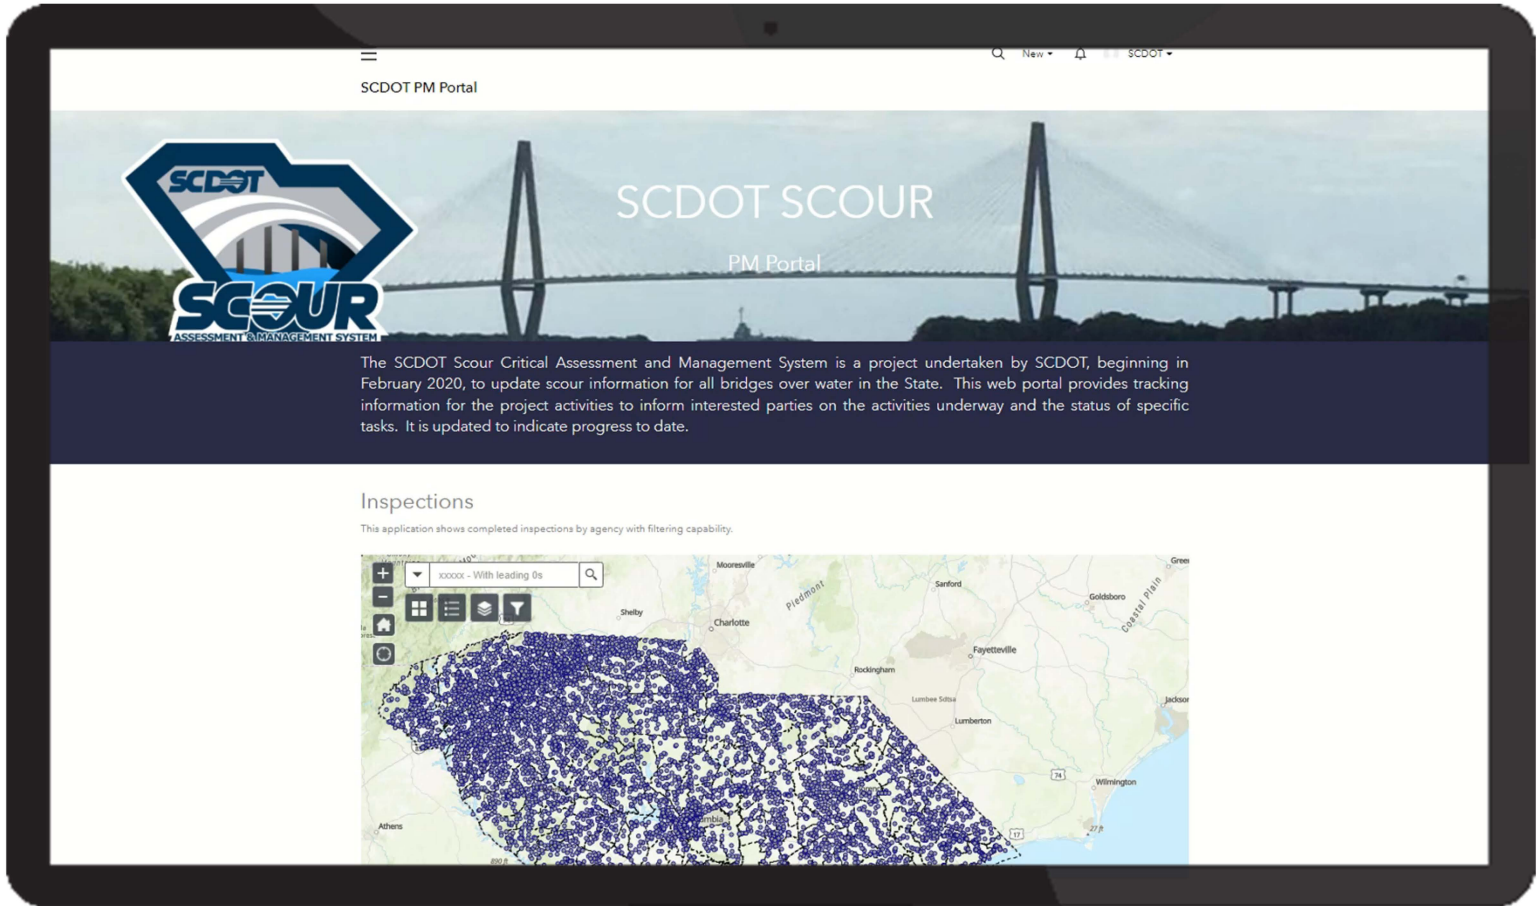

- Subconsultant tracking
- Document repository
- Project progression
- Data query
