

Table 1. College financial accounting examination results of two groups of students

Timing	Examination results		<i>t</i>	<i>P</i>
	Research group	Control group		
Before teaching	63.4±10.9	62.5±11.3	0.304	0.653
After Teaching	86.7±11.7	73.1±10.9	6.420	0.013
<i>t</i>	6.371	4.421	-	-
<i>P</i>	0.006	0.029	-	-

Conclusions: In the enterprise, financial accounting is an indispensable post, and the working ability of relevant staff is related to the profit limit of the enterprise. Therefore, the teaching of financial accounting is very important. The traditional teaching mode of the financial accounting course in colleges and universities is relatively backward, there are many defects, and the teaching quality is not ideal. Based on educational psychology, the research analyzes the psychology of students majoring in financial accounting, then puts forward strategies, innovates and reforms the traditional teaching mode of financial accounting course, and constructs the intelligent teaching mode of the financial accounting course in colleges and universities in combination with multimedia technology and Internet technology. The results show that after teaching, the scores of colleges financial accounting examination of the students in the research group have been significantly improved ($P < 0.05$). And it was significantly higher than that of the control group ($P < 0.05$). Therefore, the innovation and reform of the teaching mode of financial accounting based on educational psychology can improve students' learning interest and enthusiasm, and improve students' financial accounting scores, so as to output more high-quality accounting talents for the society and the market and make a contribution to the development of China's social economy.

EFFECT OF NATIONAL SPORTS ON ALLEVIATING PATIENTS WITH BEHAVIORAL DISORDERS

Xudong Fan

School of Sports and Health, Guangdong Polytechnic of Science and Technology, Zhuhai 519090, China

Background: In society, there is a special vulnerable group, namely patients with behavioral disorders. Behavior disorder is a kind of disease that occurs in a variety of psychological process disorders and leads to obvious abnormal behavior of individuals. According to the behavior of patients, the researchers divided behavioral disorders into two types: psychomotor inhibition and psychomotor excitement. Among them, psychomotor excitement is also known as behavioral excitement. The main feature of this type of behavior disorder is that the amount of behavior and movement of patients increase significantly. Psychomotor excitement can also be divided into two situations, one of which is coordinated excitement, that is, the patient's behavior and action and thoughts and feelings are coordinated and matched with each other. This type of psychomotor excitement is common in emotional excitement, mild mania, etc. The other is uncoordinated excitement, which is manifested in the uncoordinated behavior and action of patients with psychology and thought, which is common in schizophrenia. The main characteristic of behavioral disorder of psychomotor inhibition is that the patient's movement and behavior are greatly reduced, which affects the normal life, study and work. Therefore, finding an appropriate method to alleviate behavior disorders is of great significance to improve the quality of life of patients and the construction of a harmonious society.

Behavioral psychology is a subject that studies the relationship between human behavior and psychological activities. Behavioral psychology holds that human behavior is an active and conscious behavior under the guidance of consciousness, human consciousness is composed of intention and cognition, which is the result of the interaction of these two factors. Therefore, based on behavioral psychology, this study analyzes the behavior, will and mental activity law of patients with behavioral disorders, and puts forward the use of national sports to alleviate the degree of behavioral disorders. National health is not only one of the important indicators of a country's comprehensive strength, but also an important symbol of the development and progress of social and economic level. National sports are an important way and means to achieve national health. It can enhance the physique of the whole country and improve people's happiness. Through national sports, it can alleviate the negative emotions such as anxiety and depression of patients with behavior disorders, improve the physical quality of patients, and then alleviate the degree of behavior disorders. It is of great significance to improve the quality of life of patients and the construction of a

harmonious society.

Objective: Behavioral disorders have a significant impact on patients' life, study and work, reduce patients' quality of life and affect the harmonious development of society. Therefore, based on behavioral psychology, the study proposes to use national sports to alleviate the behavior disorder of patients, hoping to alleviate the degree of behavior disorder of patients, improve the quality of life of patients and promote the construction of a harmonious society.

Research objects and methods: 80 patients with behavioral disorders admitted from July 2020 to June 2021 were selected as the research objects in the psychiatric department of a third-class hospital. SF-36 scale was used to evaluate the quality of life of patients. Nosie-30 scale was used to evaluate the degree of behavior disorder. The Ability of Daily Living (ADL) was evaluated by the Ability of Daily Living scale (ADL).

Study design: The patients were randomly divided into study group and control group with 40 people in each group. The patients in the control group were treated with routine behavior disorder treatment. On the basis of the control group, the patients in the study group were intervened in combination with national sports. After 3 months, SF-36, nosie-30 and ADL scores of the two groups were compared.

Methods: The relevant data were processed and analyzed by software SPSS17.0.

Results: After 3 months of treatment, the nosie-30 score of patients in the study group was significantly higher than that in the control group ($P < 0.05$), as shown in Table 1.

Table 1. Nosie-30 score of two groups

Timing	Nosie-30 scores		<i>t</i>	<i>P</i>
	Research group	Control group		
Before treatment	157.9±17.9	157.7±18.5	0.604	0.554
After treatment	199.3±15.2	180.6±10.8	6.420	0.023
<i>t</i>	6.371	3.421	-	-
<i>P</i>	0.000	0.039	-	-

Conclusions: In society, there is a special vulnerable group, namely patients with behavior disorders. Behavioral disorders have a significant impact on patients' life, study and work, reduce patients' quality of life and affect the harmonious development of society. Therefore, finding an appropriate method to alleviate behavior disorders is of great significance to improve the quality of life of patients and the construction of a harmonious society. Based on behavioral psychology, this study proposes to use national sports to alleviate patients' behavioral disorders. The results showed that the nosie-30 score of the study group was significantly higher than that of the control group after 3 months of treatment ($P < 0.05$). Therefore, through national sports, it can effectively alleviate the degree of behavioral barriers of patients, improve the quality of life of patients, and promote the construction of a harmonious society.

JUDGMENT METHOD OF MENTAL ILLNESS OF ENTERPRISE LEADERS IN UNFAIR COMPETITION FROM THE PERSPECTIVE OF LAW

Zeli Jiang^{1,2}

¹*School of Political Science and Law, Yichun University, Yichun 336000, China*

²*Beijing Jingsh Law Firm Shenzhen Office, Shenzhen 518026, China*

Background: Since the reform and opening up, China's market economy has developed continuously, and the number of listed companies is increasing day by day. At the same time, the market competition is becoming more and more fierce. In the increasingly fierce market competition, some companies violate the principle of good faith in industrial and commercial activities, disrupt the order of market competition and damage the legitimate rights and interests of other companies or consumers, such as counterfeiting the above statement, commercial bribery, false publicity, illegal acquisition of trade secrets of other enterprises, improper reward and sale Defamation of goodwill and unfair competition on the Internet. In order to prevent these acts, China has formulated the anti-unfair competition law to punish enterprises and enterprise leaders who violate the anti-unfair competition law. In order to avoid criminal responsibility, some leaders of unfair competition enterprises will falsely claim that they have mental disorders. When unfair competition enterprise leaders use this excuse to successfully evade criminal responsibility, it will cause other unfair competition enterprise leaders to follow suit, reduce the credibility of China's law, and
