### **1. Introduction**

This is a report on the phytoplankton chlorophyll *a* concentration on the cruise of the icebreaker *Shirase* during the 47th Japanese Antarctic Research Expedition (JARE) in the 2005-2006 austral summer. Chlorophyll *a* concentration of phytoplankton was measured in two series: (1) spatial variation of chlorophyll *a* in the surface water along the cruise track, and (2) vertical profile of chlorophyll *a* in the Indian Ocean sector of the Southern Ocean.

### **2. Materials and methods**

Surface seawater was sampled routinely four times a day by pumping up through the hull in cruising and with a plastic bucket in stoppage. Subsurface water was collected with a Van-Dorn bottle. Seawater samples of 100-500 ml were filtered onto a glass fiber filter (Whatman, GF/F). The filter was immediately soaked in *N*, *N*-dimethylformamide (Suzuki and Ishimaru, 1990), and pigments were extracted. The concentrations of chlorophyll *a* and pheopigments were determined fluorometrically (Parsons *et al.*, 1984) with a fluorometer (Turner Design, 10-AU). The fluorometer was calibrated against a chlorophyll *a* standard (Sigma Chemical Co.) using a spectrophotometer and the value of specific absorption coefficient obtained by Porra *et al.* (1989).

### 3. Data

A map of the sampling stations during JARE-47 cruise is illustrated in Fig. 1. Chlorophyll *a* and pheopigment concentrations in sea surface and subsurface water are shown in Tables 1 and 2, respectively. The data in this report are available on digital media (see section 5).

### 4. Scientists on board

Sampling and analysis were mainly carried out by M. Honda, M. Ichinomiya and K. Saito.

### 5. Data policy

Before using the data for publication or presentation, please request permission in writing. Inquiries should be addressed to:

Mitsuo Fukuchi, Professor  
National Institute of Polar Research  
9-10, Kaga 1-chome, Itabashi-ku, Tokyo 173-8515, Japan  
Phone: +81-3-3962-4722  
Facsimile: +81-3-3962-4759  
E-mail: fukuchi@nipp.ac.jp

Requests for digital data should also be placed with Prof. Fukuchi.

### Acknowledgments

We thank to all the members of the JARE-47 for their support and help. We also wish to thank officers and crew members of the icebreaker *Shirase*.

Sydney, Australia

Table 2. Vertical profile of chlorophyll *a* and pheopigment concentrations during JARE-47.  
 ND<sup>1</sup> indicates water samplings were cancelled due to rough weather condition or trouble of water sampler. ND<sup>2</sup> indicates losses of data due to mistake of analytical operation.
