..... *The 1952 Analysis* .....

..... IN APPRECIATION

*The staff of the 1952 Analysis wishes to extend its sincere thanks to the following people for their generous assistance in the preparation of the book:*

*Associate Professor B. Russell Koenig of our Jacquard Department for his invaluable help in producing the cover of this edition;*

*Mr. G. F. Scheidermann, Filament Yarns Sales Manager of the Firestone Plastics Company, Inc., for his contribution of materials essential to the production of the cloth for the cover;*

*Mr. Paul Siminuk and Mr. Charles Sprague of our Power Weaving Department for their assistance and advice in the weaving of the cloth;*

*Messrs. Harold D. Dietrich and Edwin D. Friderici, Jr., fellow seniors, who gave generously of their time in designing and weaving of the cloth;*

*Geo. M. Ewing Co., Architects and Engineers, for their permission to use in this edition artwork which they created for the Institute.*

*The combination of generous gifts and services your staff has received this year is sincerely appreciated and has aided immeasurably in making the 1952 Analysis follow in the best traditions of past editions.*

*The Staff of the 1952 Analysis.*

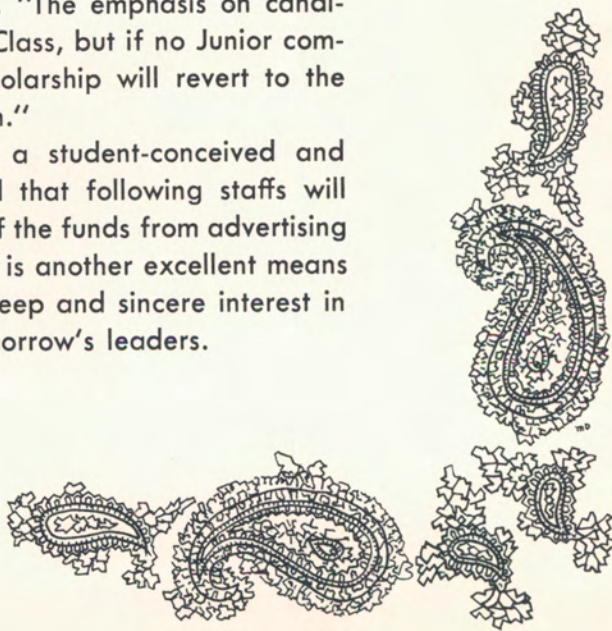

## SCHOLARSHIP FUND

As a result of the successful completion of the 1951 edition of *The Analysis*, the staff offered a Senior Year Scholarship to a deserving student.

The qualifying candidates were asked to submit a written letter to the staff stating their class section and how this scholarship would aid them to graduate. The only stipulation was that the applicant was required to have an over-all "C" average and state his financial position as it affected his completion of school.

Quoting from the original plan, "The emphasis on candidates will be members of the Junior Class, but if no Junior complies with the requirements, the Scholarship will revert to the most deserving Sophomore and so on."

Since the Scholarship Fund is a student-conceived and student-directed activity, it is hoped that following staffs will find it possible, through the medium of the funds from advertising campaigns, to establish the Fund. It is another excellent means for the Textile Industry to show its deep and sincere interest in P. T. I. Today's students will be tomorrow's leaders.

# Foreword .....

We are presently in a period of great upheaval and change which is certain to have an influence on us, as individuals, and on the Textile Industry in general.

Those of us who are graduating this year have seen changes, both evolutionary and revolutionary, and know that there will be more to come.

It will be the job of each of us to consider these changes in the light of how they can better our lives and mankind in general.

The leadership of this crusade, and that is what it is, has fallen to the United States. We can not afford to sit back and "let George do it."

Consider our potentialities. We need not be shackled to tradition, for our very history is a never-ending succession of people who refused to conform.

Part of our job will be to continue to maintain our private colleges and universities. It is necessary if we are to perpetuate our free society, to find ways and means of keeping our colleges, universities, and technological schools progressive, alive, and free.

Alfred P. Sloan, Jr., in his article written for *Collier's*, poses two questions and an excellent answer. "What raised us to our present world economic predominance? And what will continue to keep us on top to insure our security? Nothing more or less than our mastery of science and invention, and our ability to put the productive 'know-how' on the industrial assembly line."

As the future leaders of our industry, our stake in progress is boundless. Innovations such as new fibers, new machines, and new techniques will require more and more specialized training and background. In all this, P. T. I. has kept pace by carefully correlating the new with the old, and the theoretical with the practical. The integration of such subjects as English, Psychology, and History has widened the scope of the educational program.

The very able efforts of our Alumni and the Philadelphia Textile Institute Foundation have indicated that progress will always be forthcoming where humanly possible. At some future date the plans for the new buildings and new facilities will become a reality. In all this, the hand of free enterprise will be seen pointing the way to bigger and better things through technical advance.

## DIRECTOR

### THE DIRECTOR'S MESSAGE

It is significant that in our country graduation exercises are referred to as "commencement." Properly considered, this means that we recognize formal education to be only the beginning of a lifelong task. For a college graduate's formal education has been wasted unless he recognizes his degree as little more than an indication that he has shown a willingness to learn, and unless he continues to expand upon this willingness after receiving the degree.

Although we expect our graduates to attain material success, we should never wish it for anyone at the expense of spiritual growth. The educated man usually achieves a balanced success which makes his life more interesting to himself and more valuable to society. This is the man who is a good citizen, a good workman, a good

parent. It is such a success we desire for each of you as you come to Commencement.

It is such a success for you at which we aim our educational program. Wherever it has assisted you, we should like to know about it. Wherever you find in your experiences something that it seems to you your education should have provided and did not, we should like to learn of it.

If the Philadelphia Textile Institute is to continue to be the source of leaders for the textile industry, we must maintain close ties with our graduates. Keep in touch with P. T. I. Let us learn of your progress or your difficulties. Let us help you when we can.

Our best wishes are with you always.

BERTRAND W. HAYWARD  
*Director*

## DEAN

### THE DEAN'S MESSAGE

School days for many are over at graduation. As the years go on, memories of the days at P. T. I. will become more and more a part of the past.

We of the administration and faculty have enjoyed having you with us and hope we may have been able to present to you fundamental facts that will enable you to rise in your chosen field.

As Alumni you will be part of the greater developments in store for the students of tomorrow. Buildings, equipment and beautiful surroundings are only the stage settings for what a school can offer. What you take with you by contact with the faculty, becomes a library to draw upon when problems present themselves.

The Textile Industry in recent years has

grown, and is growing each day faster than ever before. New problems of handling the new fibers and presenting them to the consumer in attractive fabrics will demand more and more attention as time goes on. To meet this growing demand of our industry will require utilization of all the knowledge possessed by everyone in the industry.

Success lies ahead for those who can correlate their training to fit the job as it arises.

You have had tough schedules and have succeeded in mastering them. Keep on learning, you are just at the beginning of your career upon graduation, much lies ahead.

As the years pass on, it is our wish and hope to see among the driving forces of the Textile Industry, members of the Class of 1952.

RICHARD S. COX  
Dean

# ADMINIS

**ANTHONY HALDIS and JULIUS ZEIGET**  
*Assistant Secretary - Assistant Treasurer*  
*Secretary - Treasurer*

**RONALD FORREST**  
*Executive Director of P. T. I. Foundation*

# TRATION

DONALD B. PARTRIDGE  
*Admissions and Placement Officer*

PERCIVAL THEEL and B. RUSSELL KOENIG  
*Coordinator of Research*  
*Assistant Coordinator of Research*

RICHARD S. COX  
Dean

*"As the poet says, 'Knowledge comes, but wisdom lingers.' Wisdom is dew, which while we know it not, soaks into us, refreshes us and makes us grow. Knowledge is a strong stream of water turned on us through a hose. It disturbs our roots."*

O. Henry "The Higher Pragmatism" 1909

PERCIVAL THEEL  
Coordinator of Research

We, the class of 1952, wish to dedicate this year-book to these five men who for over 25 years have turned their "stream of knowledge" on us during our years at the Institute.

These gentlemen have extended tireless help, understanding, and counseling to students passing through the portals of the Philadelphia Textile Institute. Their part in the evolution of P. T. I. as we know it today, will long be remembered.

# DEDICATION

**FRANK L. GEISE**  
*Professor in Charge of Weave Formation  
and Fabric Analysis and Structure*

**GEORGE G. BYLER**  
*Associate Professor of Chemistry*

**JOHN NAAB**  
*Professor in Charge of Knitting*

## JOHN R. DOUBMAN

Those of us who were privileged to have known Dr. Doubman will long remember this tall, cheerful man and his weekly Marketing classes which were carefully flavored with anecdotes on Marketing and change, to keep the Saturday student interested.

His course in Marketing was well known to the senior classes of the Philadelphia Textile Institute. We shall miss John Russell Doubman for we have lost not only a very interesting and informative instructor, but have also lost a good friend.

*"Yet a little sleep, a little slumber, a little folding of the hands to sleep."*

Proverbs, VI-10, XXIV-33

## *In Memoriam*

*"God's finger touched him and he slept."*

Tennyson, *In Memoriam*, LXXXV

## HAROLD H. HART

Although it may not have been noticed immediately by the students of the Institute, death claimed one of our alumni early last September. Harold Hart was one of those "behind-the-scenes" benefactors who go about their task quietly, deriving satisfaction from doing something for others and observing the fruitful development of selected pursuits.

As a member of the Board of Trustees of P. T. I., he helped organize and develop the affairs of the school. His other activities were Grand Councilor of the Masons of New Hampshire, and Executive Secretary of Phi Psi Fraternity. Everyone connected with this school, and his many friends in industry, greatly grieve his passing.

*"He shall return no more to his house, neither shall his place know him any more."*

Job VII, 10

A. WARD FRANCE  
*Professor in Charge of Wool  
and Worsted Department*

JOHN E. TURCOTTE  
*Professor in Charge of  
Cotton Department*

## WOOL, WORSTED and COTTON

WILLIAM T. CLAY  
*Assistant Professor of  
Wool Yarn Manufacture*

EDWIN J. OWRID  
*Instructor in Raw Materials  
of the Wool Industry*

PAUL SIMINUK  
*Associate Professor in Charge  
of Power Weaving Department*

JOHN NAAB  
*Professor in Charge of Knitting*

# HAND and POWER WEAVING KNITTING

ROBERT F. STAFFORD  
*Assistant Professor of  
Elementary Weaving*

JOHN C. DIEVERS  
*Instructor in Knitting*

## DYEING

**ROBERT W. KENYON**  
*Assistant Professor of  
Dyeing and Printing*

**HARRY H. BIRKBY**  
*Assistant Professor of Dyeing*

WILLIAM H. HUGHES  
*Professor in Charge of Chem-  
istry and Dyeing Department*

GEORGE G. BYLER  
*Associate Professor of Chemistry*

THOMAS R. FOLTZ, Jr.  
*Assistant Professor of Chemistry*

WILLIAM R. WATT  
*Instructor in Chemistry —  
On Leave of Absence*

# CHEMISTRY

KARL H. OBOLD  
*Instructor in Chemistry*

JOHN E. CLINE  
*Instructor in Chemistry*

BERTRAM BLECHMAN  
*Assistant Instructor in Chemistry*

CLASS OF 1952 .....

A few years ago, a large group met to begin a four-year journey together. With few exceptions, there were no friends—just strangers.

The strangers sat down together and charted a course that would lead, with able guidance, to a coronation in four years' time.

A year later, others joined in the march on textile knowledge but they entered as strangers into a group of friends and buddies, staunch and true, who could now lead the march. Spirit like this is contagious, and the new strangers became as the old.

The men, now friends, worked for a common goal. They worked hard, played hard, and together approached the spring of 1952.

And so, the long journey nears its end; the winding road has twisted its way through miles of raisers, sinkers, and beakers of dyes from Pine Street to Henry Avenue, and now to the austere robes of academic procession, the coronation — the crowning of four years' work with academic hoods. Thus, the travelers will part company to begin a new journey, a longer one this time, through the textile world to brighter horizons in the years to come.

## CLASS OF 1953 .....

We have come to the stage in our lives at P. T. I. when we begin to apply the fundamentals that we have learned in our first two years of college training. We can now carry these basic facts into the laboratories and use them as an aid in understanding the problems, techniques and actual production. It is in this phase of our education that we begin to realize how much we have learned—and how much we have yet to learn about the textile field and its associated industries.

Being the first class to complete four years

at the new Textile Institute carries with it an obligation to every class member to demonstrate to the business world that our period of learning has been fruitful. It is our obligation to show that our training has opened our minds to accept and contribute to the progress that will be forthcoming in the textile field.

Thus may we enrich the name of the institution which has provided us with the means to carry out our life's work — Philadelphia Textile Institute.

## CLASS OF 1954

Although we entered the school as meek and humble freshmen, we as sophomores are slowly gaining confidence in our selected field of endeavor — the Textile Industry.

At this point of our schooling we are starting to make lifelong acquaintances. With the world situation the way it is, it is necessary to retain those friendships and encourage them by the incorporation of social activities within the class itself, as we have tried to do this year.

Looking towards the future, with two years of experience "under our belts," figuratively speaking, we can see the various possibilities and

opportunities that will eventually make us active in the industry.

But now let us look at the present. At this point we have another two years to make our mark in the school which will help us gain our individual goals.

Let us hope at the present time that we may be able to complete the rest of our schooling without interruption from any outside sources.

The construction of any further career will depend solely upon the individual, who having the basic foundation for it will have only his experience to guide him.

## CLASS OF 1955

The first years are always the hardest, and many aspiring textile engineers in the class of '55 soon realize that a complete and thorough curriculum awaits them. It isn't long before the new student awakens to how little he knows and how much knowledge can be acquired.

During the period of acclimation to the ways and means of the school, freshmen find time to make lasting friendships with other students from many countries. The international scope of the textile industry is obvious in the freshman class, which includes a considerable number of students from abroad.

In the midst of Fabric Analysis, Weave Formation, Inorganic Chemistry, et cetera, we

learn that there is more to campus life than "pounding the books." The Hallowe'en Square Dance, The Christmas Ball, and the Cotton Carnival introduce us to the social side; while *The Textile Engineer*, *The Analysis*, and the Student Council are evidence of widespread student activity. Other events are also being planned for the freshman class which should contribute to a more enjoyable year for all of us. Interest is prevalent among the freshmen to become an integral part of these activities and increase school spirit.

But after all is said and done, our present energies are primarily directed towards becoming — sophomores.

## CHRISTMAS BALL A HUGE SUCCESS

The Third Annual Christmas Ball, held last Saturday night at the Cedarbrook Country Club, was an event that will long be remembered with fondness by the many couples that attended.

Shortly after the clock struck midnight, the dancing began and continued through the night.

## STUDENT COUNCIL

For the final issue before vacation, we would like to extend our congratulations to the newly elected class officers. While we are on the subject of handing out laurels, we wish to extend our sincere thanks to Abe Yurowitz for the terrific job he did in running the Christmas Ball. Its success, however, was also largely due to the magnificent cooperation of you, the students. With this in mind, let's keep our eyes to the Cotton Carnival next year.

## PHI PSI

The fall social schedule of Alpha Chapter, Phi Psi Fraternity, has been picking up speed rapidly.

The freshman smoker, held on November 1st at the U.L.I.-S.D.A. Club, proved to be an excellent medium for getting to know our fellow students better. The evening's success was due in large part to the efforts of brothers Hennessey, Lynch and Jockers.

The annual Fall Frolic, at the Washington Hotel, on December 1st, was a big success.

## EPSILON PHI PI

Epsilon Phi Pi has now been on the campus of the Philadelphia Textile Institute for two full years. The two years have been busy, eventful ones with much organizational toil involved. Now, finally, we are able to settle down and begin to engage, fully in our activities.

## EPSILON PHI PI

A new organization, just like an infant, always has a hard time getting to its feet. This has been true of Beta Chapter of Epsilon Phi Pi. Needless to say, perhaps, there is no large alumni association at the Philadelphia Textile Institute that is

## Phi Psi Installs Two Associate Members

The brothers of Alpha Chapter held an honorary installation banquet on December 6, at the Alden Park Manor. The affair, honoring two new associate members, was a most successful one.

While the Student Council of P. T. I. is a comparatively new organization, it has made enormous strides towards its goal of self-administration and maintaining student morale.

The Student Council sponsors, among other things, two highly successful dances every year. These affairs usually take place at leading country clubs throughout the area and are gaining stature annually as the highlights of the social season. As a final affair of the season, the Student Council is the sponsor of the Student Awards Banquet. Every year more people attend — and those who have attended attest to the enormous success which this banquet has attained.

In order to make further strides towards an efficient student government, open meetings have been called throughout the year in which student grievances have been brought up. These items have been thought over carefully and presented to the Faculty Administrative Committee pending further action. The Student Council also has endeavored to send representatives to other faculty committees and, in this way, give voice to the student body in formulating policy.

The reason for the high success of the Student Council has been two-fold. First, by the diligence of the members themselves and, more important, by the overwhelming support and cooperation of you, the students.

**P. T. I.  
 SENIOR SOCIETY**

The P. T. I. Senior Society was organized in the fall of 1950 to "recognize and bring public recognition to those who are willing to give a little extra time and effort to make life at P. T. I. more enjoyable."

The members are elected on a point system based on their active participation in extra-curricular activities. A student becomes eligible in his junior year.

The recognition of these men for their outstanding participation in extra-curricular activities which greatly benefit the student body, is

the students' way of saying a simple "thanks." It is due, in a large measure, to the careful planning and zeal of these few that many projects are so successful at our school.

Our organization is not an Honor Society limited to those with high grades; it is open to those who have shown a willingness to give freely of their time for the betterment of the student body.

It is a fact that the best way for a student to fully enjoy and appreciate his college life, is to be an integral part of activities which directly affect him.

# DANCE COMMITTEE

## OFFICERS

Chairman ..... Abraham Yurowitz  
Co-Chairman ..... Robert Lederer  
Faculty Advisors ..... Prof. William Hughes  
Miss Martha Jungerman

Twice a year, once in the Winter, and again in the Spring, P. T. I. students migrate en masse to a suburban country club where the Annual Christmas Ball and Cotton Carnival is held. These affairs are always very successful socially, and are the subjects of discussion for years to come.

This year the Committee, with the assistance of the Analysis staff, deviated from the standard dance program and inaugurated the "Crowning of the Queens." This innovation was favorably received and shows indications of becoming a permanent function at all Christmas Balls.

The Cotton Carnival proved to be an even greater social success. Strawbridge & Clothier presented an appropriate fashion show featuring the latest in cotton for spring and summer wear, and the Guest of Honor was well known to all present.

Although a large amount of work was involved in the preparation and execution of these dances, the committee enjoyed it very much, and the good times had by all the students were reward enough for all our efforts.

# CROWFOOT SOCIETY

## OFFICERS

President .....	Leon Zeldis
Vice-President .....	Harold A. Davis
Secretary .....	Norton C. Levine

Until this year, the Crowfoot Honorary Society, since its formation in 1925, had been content to be an organization only long enough to install new members and give out the membership keys and scrolls. But this year, thanks to the efforts of our president, a start was made to make Crowfoot an active force in the Philadelphia Textile Institute.

Plans were drawn up and approved by Dean Richard S. Cox to have Crowfoot members tutor deficient students in the school. Dean Cox also promised to discuss with the deans of other textile schools a plan which will eventually start Crowfoot societies in these institutions. It is hoped that at some future date Crowfoot will be looked upon by textile schools as Phi Beta Kappa

is in the other universities and colleges. A plan is under advisement, which will make sophomores eligible for admission into the Society at the end of their third semester in the school. This, it is hoped, will give Crowfoot enough members to do the work which will make it an active organization. The most severe handicap has been the small membership. The standards for admission will not be lowered, but students will be eligible for admission at an earlier time. An attempt will also be made to organize an alumni association.

A start has been made, but it is up to the future members of Crowfoot to continue these efforts.

## OFFICERS

Chairman ..... John McLuckie  
Vice-Chairman ..... Joseph W. Lynch  
Secretary ..... Alfred W. Cowan

The student chapter of the American Association of Textile Chemists and Colorists at Philadelphia Textile Institute, is one of the few organizations in this school conducted by the students under the guidance of a national organization.

The parent organization has incorporated in its by-laws provisions for the membership of students enrolled in educational institutions of a specific type. Students pursuing courses of study in the application or manufacture of dyes and chemicals for the textile industry, or in the testing or research fields of the textile industry, are eligible to become members.

At meetings conducted in the school, the student members are given the opportunity of

hearing men whose efforts and time have been directed towards the dyeing and finishing of textiles, as well as men engaged in related fields of textile chemistry and fiber research. These men give us the practical side of what we might expect to encounter when we finish our technical training at school. This form of education is just as important to us as is the theoretical background given in the classrooms and laboratories.

The student members are exceedingly grateful for the foresight of those men who have chosen to include them in an organization of such invaluable aid and they hope for the continuance of their support.

THE EDITOR

## THE ANALYSIS STAFF

Any college yearbook takes a full year of working and planning to bring to fruition. Early in the fall, *The Analysis* staff was putting its committees into operation. Some students applied their experiences from last year's work, while others probably found printer's ink running in their veins and were eager to do their parts.

Then began the long task of getting articles written, gathering names of students and faculty, running advertising and circulation campaigns, and chasing students off to their photographic appointments. None of the staff will soon forget the time spent in working out the dummy and that satisfied feeling when the page proofs were checked and pasted into the book.

Meetings with the students, visits to the printer, trips to the dark room, and the coordinating that is always necessary, made time move speedily. Through all this we kept searching for new ideas and methods of presenting to our student body and the school what we consider a fine book.

Our cover is appropriate to a textile school. While not the first fabric cover, it is an indication of the interest which the Textile Industry has in our work.

College newspapers, regardless of the school, serve a definite purpose in the life of their schools. In addition to their news-bearing qualities, they serve as a unifying force for all the activities of the students of the school.

This is true of *The Textile Engineer*. Since its inception five years ago, *The Textile Engineer* has grown steadily more important in this respect. From the first "You Name It" issue continually through volume five, number ten, *The Textile Engineer* has been an extra-curricular activity for extra-curricular activities.

Five years ago, the newspapers of two P. T. I. fraternities merged to create a newspaper for the school and the student body. The school grew larger and so did the paper; the paper changed hands many times in its short life and, with each change, a new policy began. One policy remained the same through the years, the activities of the P. T. I. student continued to be of paramount importance.

Though the staff may change yearly, the paper itself goes on with only slight variations. The ideas behind each issue may be different but the finished job is the same. Now, as five years ago, a P. T. I. man picks up a copy and knows that in its pages he will find amusement, information, organizational news, and sports. When he later looks at his papers, he finds a part of his school life in his hands. The distilled and purified essence of school life remains in each copy of *The Textile Engineer* long after the news in its pages has ceased to be news.

The Intercollegiate Zionist Federation of America is an organization of college students who believe in strengthening the pillars of the newly created State of Israel — the realization of centuries of Jewish aspirations.

This aim is accomplished by active group participation in programs of cultural, social, and religious activities orientated along the lines of Zionism, and the Judean Heritage.

Although this organization does not claim any political ties with Israel, its members learn to understand and appreciate the cultural and spiritual bridge linking Israel and the American Jewish Community.

The members believe in upholding the principles upon which the oldest democracy was

founded, by cooperation and friendship with the world's newest democracy — Israel.

The P. T. I. Chapter was founded in 1948, by a group of far-sighted individuals during the time in which the Palestine Problem played an important role in World Affairs. At present it ranks as one of the most active chapters. Many of our members had the privilege of visiting Israel during the past summers, and one former P. T. I. student was elected to the National Presidency of I. Z. F. A.

This year we are losing some of our most active members; however, under capable leadership, the organization will continue to serve as well as it has in the past.

# INTERNATIONAL CLUB

## OFFICERS

President .....	Daniel Gortari
Vice-President .....	Kimon Ayanoglu
Secretary .....	Tony Salem
Treasurer .....	Shale Rabinovich

Since there is a large percentage of foreign students attending classes at Philadelphia Textile Institute, the International Club was formed during the fall of 1949. The Club was formed with a two-fold purpose in mind. First, to aid in adapting the foreign students to American college life and its attendant surroundings, and to promote a better understanding of the many varied cultures represented by the students. To aid in maintaining these purposes, a wide program of action was outlined, included in which were many integral parts such as conferences, movies, round-table discussions, and an annual show which has become known as International

Evening.

The English language is the only one used during the meetings of the club. Membership rules state that any student who was born abroad, or who is a citizen of a foreign government may become an active member. However, all of the student body, regardless of their nationality, is welcome to attend and participate in stated meetings and discussions.

Under the capable direction of our officers, a number of events have been presented this year, climaxed by the annual International Evening at which the talents of our foreign students were presented.

# PHOTOGRAPHY CLUB

## OFFICERS

*President* ..... M. Theodore Jockers  
*Vice-President* ..... Samuel Finkelstein  
*Secretary-Treasurer* ..... Jerry Polin

The Photography Club at the Philadelphia Textile Institute has a dual purpose; it is a means of enjoyment and recreation, and also a means of learning where photography might possibly fit into a job in the Textile Industry. One need not know anything about photography in order to join the club; there are many persons in attendance who are more than willing to teach. It is the fond wish of all who are concerned that more men join the Photography Club, as it was established for all to use.

Many of the pictures that appear in this yearbook have been taken by members of the Photography Club, and almost exclusive use has

been made of the facilities that are available. Much of the work that is done for the school, that is, pictures that will accompany articles written by members of the faculty, pictures that are used for publicity and so forth, are taken with the modern Press camera that the school has, and developed and processed by equipment that is contained therein. There is also extensive equipment that may be used in Photomicrography, so please do not hesitate to make use of these facilities; join the Photography Club now.

P.S. Models (live ones) are used also for instructive work at the meetings.

# TEXTILE FELLOWSHIP

## OFFICERS

President ..... Jordan Sherzer  
Vice-President-Secretary ..... Robert L. Morgan  
Treasurer ..... Abraham Yurowitz

Textile Fellowship was founded on the following three aims: to help promote racial and social understanding within the school and Textile Industry; to encourage and exchange ideas between men of the Textile Industry and kindred fields; to encourage a spirit of service to others in the organization and the Textile Industry.

When the constitution of Textile Fellowship was presented to the student body in the fall of 1948 and its doors opened to membership, the response was heartening. It has grown more so in each succeeding year. Textile Fellowship has become known as an organization which accomplishes that which it sets out to do.

Textile Fellowship attempts to bring about a closer relationship between the student and the Textile Industry. In order to accomplish this, an extensive program has been set up. This program consists of field trips, motion pictures, and banquets with eminent speakers from the Textile Industry.

Textile Fellowship can only maintain its success by the influx of new members — members who are interested in becoming a part of the organization, not merely to say that they belong to Textile Fellowship, but to help carry out its aims and activities. As we know, an organization is only as good as the men in it.

## DRAMATICS CLUB

### OFFICERS

Producer ..... Maurice Calby  
 Director ..... Leon Zeldis

The fall of 1951 saw the founding of The Dramatics Club at P. T. I. Based on the premise that it is not necessary to be professional in caliber to present plays, but to entertain both ourselves and the student body of the school, and to introduce outsiders who attend our plays to the Philadelphia Textile Institute.

The group of approximately 40 members is divided into several committees: the Actors, Set Committee, Stage Crew, Make-up, and last but not least, the Business Committee.

Membership in the Club is open to all interested persons. The "stage door" is always wide open. To enter it does not mean that you must be an actor. You might be a set designer, elec-

trician, wardrobe, properties, prompter, and many more.

A number of the members have had previous experience in Philadelphia's "Plays and Players," Experimental Theatres, and radio. They bring with them varied experience which is valuable to any organization.

A number of plays have been read by the Screening Committee, and those best suiting the facilities and scope of talent in the group were selected for presentation. One of these was Cottman and Shaw's "Submerged"

The acceptance of this new organization by the students and faculty gives assurance that with continued support, those who attend and those who participate will find enjoyment.

First row: Robert L. Morgan, Frederick B. Hennessey, Harold D. Dietrich, David A. Manderbach. Second row: William A. Moran, Harlan Edge, Robert D. Fawcett.

Corresponding Secretary .....	Robert D. Fawcett

When men of like interests, ideals, and ambitions, are united in a common cause, much can be done for their personal benefit. Thus in 1903, five such men who were students of the Philadelphia Textile Institute joined together to form Phi Psi Fraternity. With much ambition and the aid of carefully selected brothers, the Chapter has made great strides in the succeeding 49 years. We are now at the point where we have nine active chapters in various textile schools in the United States, and twelve active alumni chapters in different cities. The alumni now numbers 3,500 men, most of whom are outstanding in the Textile Industry.

The basic idea behind the fraternal organization is to further one's education and advancement in the industry, to provide brotherhood and fellowship with men of high character, and to assist by every honorable means the advancement of its brothers, and to enjoy oneself in these pursuits. We who are members of Phi Psi believe we have succeeded in these aims.

This year Alpha Chapter planned for a "Fall Frolic," a Freshman Smoker, a Freshman Dance, an Honorary Installation Banquet, a Founders' Day Banquet, the familiar "Hobo Hop," and our annual Spring Formal. Altogether, it looks like a good time for all and more progress.

Philadelphia Textile Institute and Sigma Phi Tau are synonomous in one respect; each has played an integral part in the development of fine engineers and chemists.

As the senior looks back on his four years at school and his active life in the fraternity, he can see remarkable changes that have occurred during his life here. After his freshman year the campus was moved up to Germantown and the fraternity invested in an old mansion on Tulpehocken Street. Now three years later the school has adapted itself to the new quarters, and the fraternity after many trials and tribulations, is well established in the fraternity house. Many changes have taken place since that first day. The small handful of seniors having realized the

great possibilities that the house held, set about diligently to develop them. They instilled their spirit into the lower classmen and together they have labored long hours to build the dream of a beautiful home.

This year, the fraternity was led by a group of very able officers. They have spearheaded many ventures which led to an ever increasing fraternalism which is a most important part of college activity and spirit.

The phrase, "we've come a long way," is appropriate in every way when you consider the strides of Sigma Phi Tau, and those which are possible with succeeding years. The fraternity will always try to keep pace with the development of Philadelphia Textile Institute.

This year will be a memorable one for all brothers of Alpha Chapter of Delta Kappa Phi. We have had a busy social season, and a highly successful one. The highlight will be when we play host to the National Delta Kappa Phi convention. Plans are being made to make this an unforgettable event.

For many of us, this will be our last year at P. T. I., and our best one. Deep friendships have been made here, and it will be with genuine regret that we leave these friends to fare forth as textile "tycoons."

During the course of our school year, many athletic and social events were presented by the active chapter. Included in this were Freshman

Smokers, intramural sports, and our Annual Spring Dance. Due to the atmosphere of the relatively new surroundings and the caliber of the men pledged to the fraternity, we have received the highest degree of cooperation and participation from members and associates. Many new plans are being formulated for the coming year, conceived to keep in stride with the rapidly advancing trends of the new school.

Whatever we will be doing in the future, we will never forget the good times and comradeship that we found at P. T. I. Nor shall we forget the teachers who have tried to pound a little knowledge into our heads, and whom we all have grown to respect and admire.

The school year now ending can truthfully be said to have been the most successful in the short history of Beta Chapter of Epsilon Phi Pi. Epsilon Phi Pi was founded in 1948 at the Bradford Durfee Technical Institute at Fall River, Massachusetts. The fraternity was established as a professional textile fraternity and chartered under the laws of the Commonwealth of Massachusetts.

The only textile fraternity in the United States, at present, to specifically state in its constitution that membership is open to all textile students without regard to race, color, or creed, Epsilon Phi Pi has made great gains in its chapters on the campuses of several of the textile schools. Epsilon Phi Pi is based on the belief that, if the textile industry can function so suc-

cessfully as a homogeneous group of all races, creeds, and nationalities, so, also, can a fraternal organization of men about to enter the industry.

In 1949, Beta Chapter was established at the Philadelphia Textile Institute and has grown steadily since that time. This year, with organizational problems behind them, the Brothers of Beta Chapter carried out a varied social program climaxed by the first national convention of the fraternity and the organization of the National Alumni Association of Epsilon Phi Pi. The Brothers, active and alumni, look forward to many successful years of service and fraternal life in the textile schools and the textile industry of the country.

Selma Krimins, Miss E. Lillian Wyatt, Miss Martha Jungerman (faculty advisor), Lorraine Edzwald, Jane Peabody, Joan Gelbstein, Margot Bacha.

<i>Secretary</i> .....	Selma Krimins

On October 27, 1943 the first chapter of Kappa Sigma Phi Sorority was organized at the Philadelphia Textile Institute. It was then a local group, but, through the zealous efforts of its members, new chapters were formed at North Carolina State College, School of Textiles; Bradford-Durfee Technical Institute and New Bedford Textile School and it became the Alpha Chapter of the national organization.

The purpose of the sorority as stated in its constitution is "to join in fraternity, women of like interests in the textile profession with a common desire within for the exchange of knowledge and encouragement of fine ideals and sincerity."

Although few girls are attending the Institute, those who do feel that there are many opportunities for women in the field of textiles and they pledge themselves to the task of enlisting the interest of other women in this profession.

The social activities of the sorority this year included a Square Dance in the fall, the first of its kind in the school, enthusiastically received by the students, an induction dinner for new members, a Valentine Dance in February and the Annual Picnic in the Spring. We hope to continue these affairs in the future and wish to thank the fraternities and other members of the student body and the faculty for their support.

1951-52 TEAM  
 First row: R. Lembeck, B. Alpert, R. O'Neill, W. Foster, R. Landry. Second row: B. Goldstein, E. Marcus, F. Zanette, B. Talley, E. Zavaglia.

## VARSIITY BASKETBALL

The basketball season of 1951-52 has drawn to a close, and while we didn't win every game, we made a good showing for a small school where athletics are not stressed. The team showed great fighting spirit and courage, even Temple's Bill Mlkvy had a bad night against us. Scores such as our 66-41 victory over Eastern Baptist in the season's opener, and our last minute loss to Haverford, 60-58, showed that there were great possibilities in the team.

Many students don't realize the time and effort that is put in by both the team and the school. After putting in a full day of classes, the team has to have several hours of practice a number of times each week. They have to give up their weekends to play or practice. A considerable part of the Student Activities Fee is spent on the team's equipment and a place to play.

Enthusiasm for basketball is not what it should be; some students have never been to a game; some have seen a few; and only a small percentage attend all the games, yet the whole program is for the students' entertainment.

This article is not designed to preach school spirit to the students, but something must be wrong when athletes decline to go out for the team, and play intramural sports instead. Perhaps the fault is not entirely with the student, a gym located on the campus might give the athletes a new desire, and athletics in general, a needed "shot-in-the-arm."

The future of basketball can be bright, with the additional support of the team by the students. Next year can be a great one for P. T. I.

1951-52 BASKETBALL SCHEDULE

November 27	..... Eastern Baptist
November 30	..... Fairleigh Dickinson
December 5	..... Temple University
December 12	..... Haverford
December 15	..... Penna. Military College
January 9	..... Phila. College of Pharmacy
January 11	..... Kings (Delaware)

January 19	..... Drexel
February 5	..... Rider
February 8	..... Cooper Union
February 16	..... Rutgers
February 20	..... Ursinus
February 22	..... New Bedford
February 27	..... Aggies
February 29	..... Glassboro

*All Home Games played at St. Joseph's House  
16th & Allegheny Avenue*

# VARSITY BASKETBALL TEAM

**E. MENCHY GOLDBLATT**

Former All-American guard at the University of Pennsylvania, he is now in his third year as Director of Athletics and Coach of Philadelphia Textile Institute Basketball team. Although hampered by lack of time and facilities, Menchy has developed another smooth and well-coached team.

**BURTON (BURT) ALPERT**

Playing his last year at Textile, Burt was hampered with a bad knee, but his basketball achievements at P. T. I. will long be remembered. Burt came to us from Erasmus High School in Brooklyn where he was All-City in his senior year. We expected great things from Burt and we were not disappointed.

**FREDERICK (FRED) BROADHURST**

The former All-State player from Hightstown, New Jersey, playing his third year, was at a disadvantage this year because of injuries. Not having the usual dependable 60-minute man at all times was a great loss to P. T. I. Here's hoping for a better year next time.

### FLOYD (JIGGS) ZANETTE

Here was P. T. I.'s dependable "Big Man" this year. The 6-footer, although not scoring regularly, was a constant rebounder. "Jiggs" developed this hustling brand of basketball while playing at Clifton High School with such valuable players as Hal Corazzi and Don Parsons of Rutgers University.

### ROBERT (BOBBY) O'NEILL

In his second year at P. T. I., the former Bartram High School star proved to be Textile's greatest asset. His consistency in scoring and great defensive work made him one of the most respected in the squad. Although small in stature, he did a big job and should lead the team on to greater heights in the future.

### EDMUND (ED) ZAVAGLIA

Playing his first full year on the Varsity, Ed has developed into a first-rate college ball player. With his sterling defense and good shooting eye, Ed could develop into one of Textile's finest players. The former Clifton, N. J., High School star has proved his worth to the Textile Five.

### RICHARD (DICK) LEMBECK

Dick came to us from James Madison High School in Brooklyn, by way of the USN Submarine Service, where he first acquired a taste for basketball. It was in the Navy that he developed his sparkling and colorful brand of ball. His greatest thrill was in the Bradford-Durfee game where he converted 6 straight foul shots which clinched the textile championship.

1952 TEAM MANAGERS  
— E. Larrat, R. Boell, R. Waite

# INTRAMURAL SPORTS

This year promised to be the beginning of an intensified Intramural Sports Program at P.T.I. Director of Athletics Goldblatt and Professor William Hughes inaugurated this expansion program and with the assistance of the intramural managers Joseph Lynch and George Saba, carried out the program.

The fall sports which included bowling, basketball and, of course, ping-pong and pool, attracted more students than ever before. Strong leagues were organized in bowling and basketball. Any group, club, fraternity, or class was eligible to enter these activities.

The spring sports proved to be even more popular. The usual keen competition in softball was amplified with the addition of more clubs and better facilities. The golf tournament also proved to be a great success.

The Club Room Activities were climaxed with the annual Ping-Pong and Pool Tournaments.

The idea of a small college concentrating on an Intramural Program was proven a success this year by the tremendous participation and following of all intramural activities.

The Annual Golf Tournament, as usual, was a large success. By success we primarily mean a huge turnout of participants. A participant is defined as follows: anyone able to hold a club, execute a back-swing in some way, shape, or form, without forgetting to pivot (pivot meaning to shift the weight of the body, if here is any, from one leg to the other) hence, allowing the opposite foot (which means the other one) to roll on the toe (big one) then, complete the downward swing without whiffing the air or, of course, turving the course (by course, of course, we mean golf course).

Oh yes, the follow through (that is, after the ball has been met . . . head on) was also a pre-requisite to any prospective hacker. To compete each member was compelled to "keep his head down," "shape his wrists," and "throw his head (club head, that is) up the middle," (middle meaning the fairway of the course . . . of course) and thence, magnificent follow through.

All totaled, the tournament consisted of three flights (not aerial formations) each of which consisted of 16 men (students). After a hectic three weeks of elimination and final matches after which the Philadelphia Textile Institute was sued by the Jefferson Country Club, for undue action brought about by its little cherubs, such as hedge-hopping, grave digging, tree dismembering and up-rootals, turf not replaced, cut-up greens, stolen pins, ball-washing mechanisms removed, disappearance of balls from fairways other than those which P. T. I. students were on at the time, the following awards were made at the Student Awards Banquet:

1. *Most Balls Lost* ..... 92—Mills Clark (won by one)
  2. *Highest score* .... 1072—Bill Squires (that's not easy)
  3. *Lowest score* ..... 63—Joseph U. R. A. Schlunk
  4. *Most clubs bent, broken or incapacitated* ..... 8—Felix Gryn
  5. *Returned to P. T. I. with most clubs in his bag* ..... 23—Fred Hennessey  
Note—Also found in Fred's bag were 1 shovel, 2 picks, 1 rake, and 2 axes.
  6. *Effort* ..... Dave Manderbach  
Note—Quit on the 3rd hole of 1st match and challenged his opponent to a "true golf match" at Hagenbucher's any time at all.
  7. *Best slice*
  8. *Best hook* ..... Henry V. Hook'em
- Yes, we've got a great bunch of golfers and if you don't believe it, here's our secret pass word to prove it:

*Rain or Ice,  
Hook or Slice,  
We'll play 18 holes.*

## GOLF

# SOFTBALL

## WINNERS 1950-51 Season

Each spring various organizations throughout the school send their representatives to compete for the school softball championship. Some of the top contenders for the 1950-51 season were Phi Psi Fraternity, Delta Kappa Phi Fraternity, Sigma Phi Tau Fraternity, and the Happy Rocks.

The season gets under way just after the Easter vacation. A schedule is set up by the Intramural managers, for the teams entered, which is usually anywhere from ten to twelve. Games are played at Fairmount Park at convenient times; Saturdays or some week-day evening. All the softball equipment, gloves, balls, bats, bases, etc., are supplied by the school.

Throughout the 1950-51 season, the competition was extremely keen, as it always is, because everyone knew that Phi Psi had two legs on the Intramural Softball Trophy. And the system that is now followed would permit Phi Psi to take permanent possession of the trophy, if it could win again.

In an exciting finish, Delta Kappa Phi emerged victorious and was presented with the trophy at the Student Awards Banquet.

This season has also proved to be one of excellent team play and competition, as usual, and needless to say the "best team won."

### 1950-51 CHAMPIONSHIP TEAM

*First row: D. Handelsman, B. Squires, M. Clark, J. Delaney, J. Hallinen. Second row: D. Thomas, R. Lederer, L. Williams, R. Griffin.*

# BOWLING

Intramural Bowling has become very popular with the students of Philadelphia Textile Institute since its inauguration in 1948. Bowling is conducted purely for recreation, enjoyment and relaxation. The league is composed of all members of the student body who wish to participate in the sport.

Members divide into five-man teams representing fraternities, classes or groups of individuals and they compete for team and individual honors on a round-robin basis.

The season opens soon after the beginning of the fall term and continues for approximately sixteen bowling weeks or until about the middle of the spring semester.

Bowling takes place on a night chosen by the members as being the best suited to everyone. This year the teams met every Monday night at the Germantown Y.M.C.A.

Prizes are awarded for high individual series, high individual game, and the winning team. The awards are trophies donated by the Fred Whitaker Company. Last year's team trophy went to the "Yanks." The team's members were Don Thomas, Mort Zive, John Vinicki, Lou Williams, and George Saba. Individual trophies were awarded to Mort Zive for high individual series, and to Don Thomas for high individual game.

1951 CHAMPIONSHIP TEAM  
D. Thomas, G. Saba, J. Vinicki, L. Williams.

1951-1952 CHAMPIONSHIP TEAM  
Left to right: J. Tocco, R. Olson, F. Hennessey, K. Lobb, C. Fonda.

1950-1951 CHAMPIONSHIP TEAM  
D. McConaughy, R. Morgan, J. Lynch, W.  
Pinkerton, S. Mikulik, J. Wright.

## BASKETBALL

The 1950-51 season at Philadelphia Textile Institute saw the beginning of another intramural sport, basketball. This activity gives the students who enjoy the more strenuous type of sports a chance to get some recreation during the week. A league was set up, and games were played on Thursday nights from 5 to 7 P.M. at the Belfield Recreation Center located at 21st and Chew Streets in Germantown. The games were refereed very well by the varsity basketball players. Some of the teams that participated were Delta Kappa Phi Fraternity, Phi Psi Fraternity, The Tulpehocken Terrors, Pick Pushers, and the Happy Rocks.

The season came to a climax when Phi Psi beat out Delta Kappa Phi in a play-off game for the league honors. At the Student Awards Banquet, last spring, the winning team was presented with a beautiful trophy, donated by the Fred Whitaker Company, and the players each received an engraved gold basketball.

This new intramural sport proved to be a great success, and plans have been made to enlarge this program in the future.

# CLUB ROOM

## YOUR FRIEND AND OURS

"Pack o' Luckies, Jim." "Nickel and five pennies, Jim." "How 'bout a Clark Bar, Jim?" "Hey Jim, the Coke machine is stuck!" . . . This symphony of requests is listened to all day by that all-familiar figure that garnishes our club-room, a person with whom all of us are acquainted, a person to whom we are all indebted (for without the weed, what?). You know him as well as we—Jimmy Dalton. In the midst of the many adversities that life offers to all, Jim still retains that indomitable smile and fighting spirit for which he is so well liked. We tease him, we heckle him, we do our best to drive him crazy, but he

retaliates in kind and more often than not, has the last laugh. It is by no means an easy job to keep a room through which tramp from four to five hundred people a day, and we think that our hats should be off to Jim for the job that he is doing.

As we leave the school forever, Jim, we should like to thank you for the laughs that you gave us; we should like to thank you for that little bit of sunshine that you brought into our everyday lives; we should like to thank you for the thousand and one little things that we never did thank you for. Good luck, lad, and the Lord be willin', we'll see you again before long.

## PING PONG

# ALUMNI MESSAGE

## TO THE GRADUATING CLASS

The Alumni Association takes this page of your yearbook for two reasons:—

First (minor) to help, in a financial way, the publication of your book.

Second (major) to get a message to each of you men and women whom we are proud to invite to join the Association.

True, you become an alumnus automatically.

You become a member of the Association only on application and acceptance. You are all eligible, and, at the publication of this book, many of you are members.

The Association was founded in 1902, and incorporated in 1907, and has been active in support of the school for many years.

Many of the men responsible for the achievement of the new school buildings are members of the Association.

As an alumnus you will assume duties to your family and your country, your interest in your alma mater should not lessen, and you should help the school to carry on its work.

The Alumni Association through its publication of the "Textile Engineer," keeps its members in touch with school news and class news. Too often an alumnus who does not join the Association gets out of touch with his classmates. He hears of the social events after they have happened. He receives only a limited amount of the association mailings.

As a member he receives all the Association mailings including four issues per year of the "Textile Engineer."

The value to you of your Degree or Diploma is influenced by the continued advancement of the Institute.

The Alumni Association is dedicated to the Advancement of the Institute, is a member of the American Alumni Council, having all three classes of membership, and tries to keep the alumni organized for the good of the school.

We welcome you to membership, extend our congratulations to you on graduation, and wish you the success you deserve.

Edwin G. Michie  
President  
Alumni Association  
Phila. Textile Institute

# This book...you can judge by its cover...and its binding!

The front and back cover of this invaluable reference book are woven of Firestone® *Velon* upholstery fabric...the amazing new fabric that's actually woven of plastic yarn. The binding is Firestone *Velon* all plastic Flex upholstery material. For more information about *Velon* write to Firestone Plastics Company, Pottstown, Pa....or any of the sales offices listed below.

## The name Velon upon anything...tells you everything you should know about plastic fabrics

### HERE'S WHAT THE VELON FLEX TAG MEANS TO YOU:

- Won't chip or peel—through years of wear and weather.
- Mildew-resistant, mothproof—can't be harmed by moisture or insects.
- Smarter colors and textures—feels and looks like fine fabrics.
- Takes scuffing and scratching—needs no polish, conditioner or slipcover.

### HERE'S WHAT THE VELON FILAMENT TAG MEANS TO YOU:

- Spills and stains wipe off with soap and water.
- Mildew-proof, mothproof, sun and weather resistant.
- Resists scuffs and scratches, won't peel or crack.
- Breathes for maximum comfort, it's a woven fabric.

Paterson 3, N. J.

**Color fading pays off for him  
... but not for you!**

He's green, he's yellow, he's brown, he's black. He brightens, changes . . . and fades his shades.

Color fading, chameleon-style, is out of man's world. For, remember . . . *no matter how much his color fades today . . . you can bet it'll be back in brightness tomorrow!*

Don't you wish that were the case with the colored products you deal with? Unfortunately, it isn't. Once the bright colors have faded . . . they're dulled out

*forever.*

That's why it's important to guard against color fading by insisting on dyes that are built to last for the life of the product—dyes that are fast to everything the product's exposed to.

Such fastness can be yours when you turn to Du Pont for dyestuffs! Our technical experts will help you find the right dye for the end use—whatever it may be.

E. I. du Pont de Nemours & Co. (Inc.),  
Dyestuffs Division, Wilmington 98, Del.

## pattern for service at the point-of-need

To serve its customers with maximum efficiency, A.A.P. maintains many strategically placed Branch Sales Offices, in addition to its home office in New York City and its 35-acre manufacturing works at Lock Haven, Pennsylvania.

Like the main office in New York City, each branch has its own warehousing facilities and complete application laboratories; thus, dyers, finishers, and printers in all textile centers are assured of convenient sources of supply, as well as prompt and expert assistance whenever special color problems arise.

Behind A.A.P.'s extensive facilities lie almost four decades of constant research and rigid manufacturing control. The benefits of this accumulated experience are yours for the asking. Technicians from our nearest branch will be happy to provide you, at any time, with full information on A.A.P. products and service.

## A Career Is Open

A Career in Textile Testing, Development, and Research is open to members of this Graduating Class of the Philadelphia Textile Institute. The United States Testing Company, Inc. — the largest textile Testing Laboratory in this country — needs sound, capable textile school graduates as fabric technicians, dye chemists, and microscopists.

Not only is a successful career in laboratory fields offered but association with the United States Testing Company, Inc. can be the basis for a great technical career in textile manufacturing and processing, and allied industries.

# Real Action

WITH THESE SPECIALTIES

#### ORATOL L-48

A sulphonated amide, powerful detergent, good foaming, emulsifying and wetting powers; very stable; disperses lime soap deposits.

#### LOMAR PW

Condensation product of a sulphonated naphthalene; excellent dispersing agent for pigments, dyestuffs; also retarding agent.

#### PARNOL #85

Sodium salt of dodecyl benzene sulphonate; 85% active matter; free-flowing white powder; high wetting and detergent powers.

#### AMPROZYME

Amylolytic and proteolytic enzymes; also contains catalase, rennet, lipase, invertase and other enzymes; stable at high temperature.

## FOR TEXTILES

**VATROLITE®**— Use this powerful concentrated reducing agent for brighter vat dyed colors on cotton, linen and rayon . . . for faster, cleaner stripping results on silk, cotton and rayon.

**DISCOLITE®**— A concentrated reducing agent, highly stable at high temperatures, outstanding for discharge and vat color printing. Employed successfully wherever the reducing agent must dry into the fabric and retain its reducing power.

**PAROLITE®**—A dust-free white crystalline reducing agent. Soluble, colorless, excellent for stripping wool, wool rags, shoddy acetate or Nylon fabric.

**NEOZYME®**— Concentrated low temperature desizing enzyme. Removes starch and gelatine. Excellent for eliminating thickeners from printed goods at low temperatures.

**NEOZYME® HT**—Concentrated high temperature desizing enzyme. Removes both starch and gelatine. Suitable for continuous pad-steam method. Remarkable stability at very high temperatures.

**NEOZYME® L & NEOZYME® L Conc.**  
—Liquid desizing enzymes in two degrees of concentration. Remarkable stability at very high temperatures.

**CASTROLITE®**—A highly sulphonated castor oil used as a staple penetrant for dyeing or bleaching in leading textile mills.

**VELVO SOFTENERS #25 & #50**— Economical creamy white paste softeners derived from highly sulphonated tallows. Give softness and body without stiffness or affecting whites.

**VELVORAY®**—A blend of vegetable oils and selected fats for a superior, non-foaming finishing oil. High in combined SO<sub>3</sub> and stability. Excellent for sanforizing, will not smoke off at high temperatures.

**DRYTEX®**—A high-test wax emulsion type water repellent finish having extreme stability both in the barrel and in diluted form as used. Non-foaming.

**DISPERSALL®**—Effective retarder for dyeing vat colors, dispersing and leveling qualities, for dyeing naphthol and vat colors, useful in wool and acetate dyeing. Valuable auxiliary in stripping vat colors, naphthols.

**NEOWET®**—Permits effective wetting at all temperatures—particularly useful with enzymatic desizing agents. No reaction to soft or hard water. Not affected by either acid or alkali chemicals. Non-ionic.

GOODALL BRAND NAMES Are Buying Guides Wherever Fabrics Are Sold...

GOODALL offers many brands which are acknowledged leaders in dealer preference and consumer demand. "Palm Beach" (famous for 40 years), "Springweave" and "Sunfrost" are outstanding names in men's clothing. "Velmo" pile fabrics and "Seamloc" carpeting have won high recognition in the home-furnishings field.

As new and better products are developed they are given brand names that are stressed in advertising to build greater sales. For extra value, these brands are constantly linked with the Goodall Blended-to-Perform Fabrics name... thus increasing consumer recognition and demand for all Goodall Fabrics.

**1847** was the date that Hunter graduated from an idea to an actuality. Now, and for more than a century, Hunter is ready to help other graduates entering the textile industry. Every man in the textile field is interested in but one thing — improving his company so that it, in turn, will improve his own position in life. Improvement in textile preparation and wet finishing can come about only by use

of the most modern production techniques and equipment. You, who are new in our business world, will soon learn that mills everywhere trust Hunter and its guarantee that "Hunter equipment will produce as specified so that you can predetermine your increased production and lowered costs, before an expenditure is made." We are at your service — without obligation.
