Ymana, Chelsea D.; Reynolds, Michael R.; Hayward, John J.; and Trant, John F., "Toward the synthesis of an acetal-free Tn antigen anti-cancer vaccine candidate" (2022). *UWill Discover Conference*. 24. https://scholar.uwindsor.ca/uwilldiscover/2022/2022Day3/24

This Event is brought to you for free and open access by the Conferences and Conference Proceedings at Scholarship at UWindsor. It has been accepted for inclusion in UWill Discover Conference by an authorized administrator of Scholarship at UWindsor. For more information, please contact scholarship@uwindsor.ca.

# **Toward the Synthesis** of an Acetal-free Tn **Antigen Anti-Cancer Vaccine Candidate**

University of Windsor

Presented: March 2022

Presenter: Chelsea Ymana

Supervisor: *Dr. John F. Trant* 

#### **A Direction Towards Cancer Treatment**

• Current treatments: Surgery, radiation, and chemotherapy

#### **A Direction Towards Cancer Treatment**

- Current treatments: Surgery, radiation, and chemotherapy
- Cancer vaccines would provide a method of activating the immune system towards cancer cells

#### **A Direction Towards Cancer Treatment**

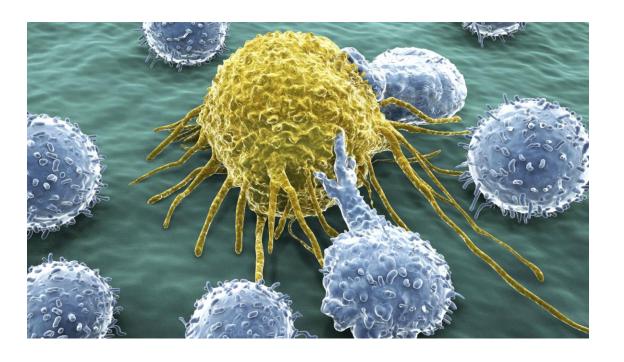

- Current treatments: Surgery, radiation, and chemotherapy
- Cancer vaccines would provide a method of activating the immune system towards cancer cells
- The challenge:
  - Many biomarkers are present on healthy cells
  - Result in autoimmune responses

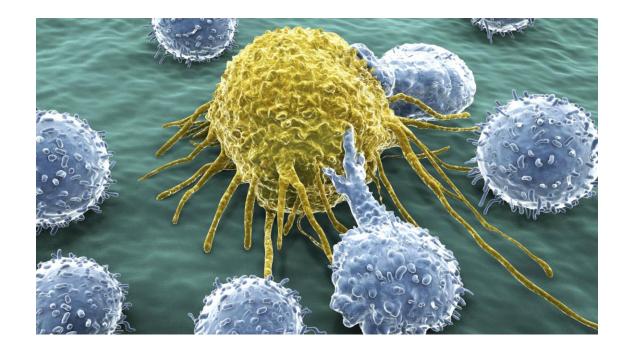

## TACAs – Tumor Associated Carbohydrate Antigens

### TACAs – Tumor Associated Carbohydrate Antigens

- Biomarkers found on cancer cells
- Absent from healthy adult cells
- Possible vaccine target for immunotherapy
- Our specific target: *Tn Antigen*

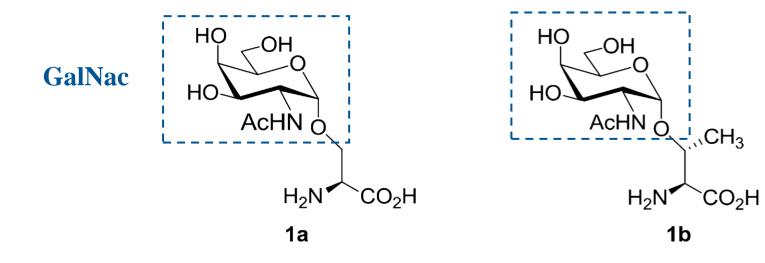

#### **Chemical Structure of the Natural Tn Antigen**

**Serine Derivative** 

**Threonine Derivative** 

#### **Chemical Structure of the Natural Tn Antigen**

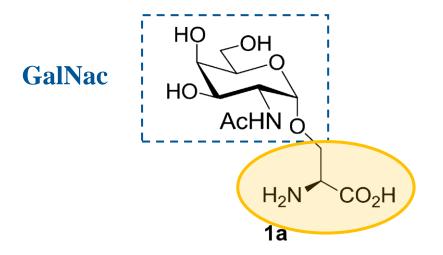

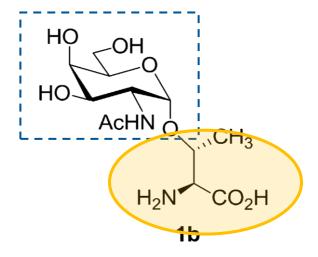

**Serine Derivative** 

**Threonine Derivative** 

#### **Chemical Structure of the Natural Tn Antigen**

**Serine Derivative** 

**Threonine Derivative** 

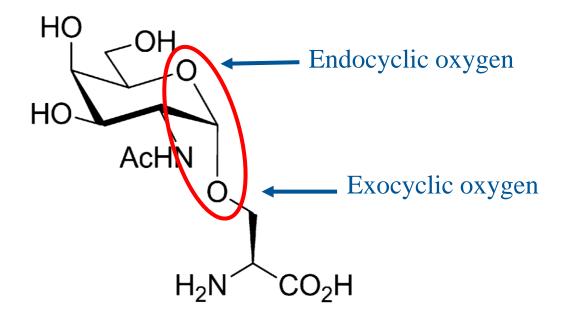

## Challenge of Using the Natural Tn Antigen

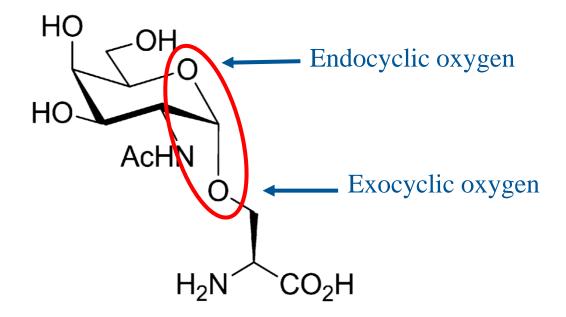

## Challenge of Using the Natural Tn Antigen

### Challenge of Using the Natural Tn Antigen

- Glycosidic bond susceptible to hydrolysis by glycosidases
- Carbohydrates have a short physiological half life
- Monomers not processed by immune system

O-Glycoside Tn antigen

C-glycoside Tn antigen

O-Glycoside Tn antigen

Carbasugar Tn antigen

C-glycoside Tn antigen

O-Glycoside Tn antigen

Carbasugar Tn antigen

C-glycoside Tn antigen

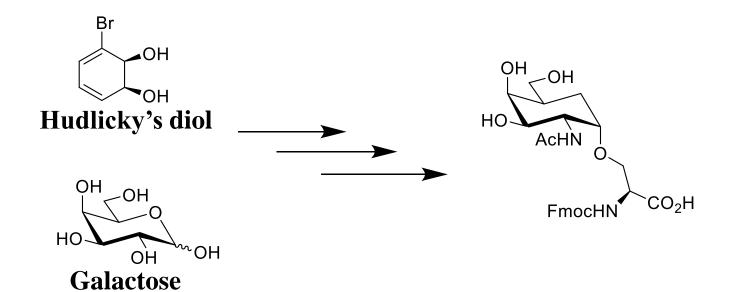

O-Glycoside Tn antigen

Carbasugar Tn antigen

### Bilinear Synthetic Approach

- Two Possible Approaches:
  - 1. De novo synthesis
  - 2. Carbohydrate rearrangement

#### Ring opening attempt 1:

#### Ring opening attempt 1:

#### Ring opening attempt 2:

#### Ring opening attempt 2:

#### Proposed future steps:

DIBAL-H

DCM

$$-78^{\circ}\text{C} -> \text{R.T.}$$

O

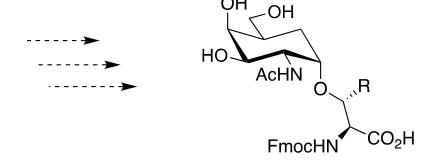

NaBH<sub>4</sub>

O

DCM

 $0^{\circ}\text{C} -> \text{R.T.}$ 

TBDMSCI 
$$Et_3N$$
  $DCM$   $0^{\circ}C \rightarrow R.T.$  OTBS

$$R = H$$
  
 $R = Me$ 

#### Attempt 1 to lactenone:

#### Attempt 2 to lactenone:

$$\begin{array}{c} \text{CuCl, NaBH}_4\\ \text{MeOH} \\ -50^{\circ}\text{C} \rightarrow -20^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{95\%} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{Ph} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \text{O}^{\circ}\text{C} \rightarrow \text{R.T.} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \text{DCM} \\ \end{array} \begin{array}{c} \text{DCM} \\ \end{array} \begin{array}{c} \text{DCM} \\ \text{DCM} \\$$

#### **Future Synthesis**

## Thank you!

Supervisor: Dr. John F. Trant

Mentors: Michael Reynolds and Dr. John J. Hayward
