## LIBRARIAN'S REPORT TO THE TRUSTEES

At the Town Meeting in March 1937, Congressman Charles W. Tobey presented to the Town of Temple a picture of the "Original Oven of the First Glass Manufactory in U. S.," built in Temple, N. H., in 1780. This picture has been hung in the library.

The Library has been very fortunate in receiving many gifts of books and magazines in the year 1937-1938.

Dr. and Mrs. Hill gave "The Fortunes of Capt. Blood" and "Beyond Sings the Woods." Dr. Wm. B. Hill gave Voltaire's "Candide" and other tales.

Mrs. Robert Shaw gave the library four books and Miss Grace Deering presented the library with ten books of fiction.

"Bambi" came to the library as a Christmas gift from Mrs. Hyde of Washington, D. C.

We are receiving regularly the magazines "Life," from Mrs. Gale, "Country Gentleman" from Miss Marion Hill, and the "Missionary Review" from Dr. Wm. B. Hill. The library is subscribing for the "Yankee."

These magazines are very popular and are borrowed from the library the same as books.

We were fortunate in receiving State Aid this year and eighteen new books were given the library. These are nearly all children's books.

Fifty-seven books have been added to the library purchased by the Sub-committee from funds appropriated by the Town.

The library is also borrowing books from the Public Library Commission for use in the schools. The teachers and children are very glad of the use of these books.

On October 11, 1937, Mrs. Pearl Hemmingway resigned as librarian and Mrs. Susie Cutter has been acting librarian.

Respectfully submitted,

SUSIE L. CUTTER

## REPORT OF SCHOOL BOARD

---

For the Fiscal Year Beginning July 1st, 1936, Ending  
June 30th, 1937

To the Citizens of the Town of Temple, N. H.:

The Board of Education respectfully submits its annual report, with that of its Treasurer, Superintendent and Auditors.

We regret that it was necessary to change our Grammar Room teacher in mid-year, as Mr. Frank Bennett left us to accept a position in Connecticut, but feel that we were indeed fortunate in securing the services of Mr. Alfred H. Rousseau, who came to us highly recommended, and who has given us splendid service.

We appreciate our good fortune in keeping Miss Helen Rideout, whose work and success is recognized and greatly appreciated.

The cooperation of the citizens is greatly appreciated.

## REPORT OF SCHOOL SUPERINTENDENT

*To the School Board and Citizens of Temple:*

I respectfully submit my fifteenth annual report as Superintendent of Schools:

### *Supervision*

Without reducing any of the usual routine activities of supervision discussed in previous reports, I am attempting this year to give particular emphasis to Reading. This emphasis is being directed along two lines,—first, with the reading activities of the child's first year in school, in an effort to reduce the number of failures; and second, in grades above the first, to overcome the difficulties some children have in reading, by diagnosing their troubles and providing some degree of remedial instruction.

Recent years have brought many changes in the theory and practice of teaching beginners to read. The results of scientific investigation have given us a clearer understanding of the way children learn. The process of learning to read is made up of five rather clearly defined stages of development. In each of these stages very definite aims have been set up and until the child has attained certain standards of achievement in the first stage, we cannot expect him to go on successfully in the next stage.

We call the first of these five the "Preparatory Stage." Children enter first grade with varying degrees of readiness and the first task of the teacher is to discover the degree of readiness of each child and to provide experiences which will supplement those the children have already had in the home and community, in order to bring about as rapidly as possible certain physical, social, and emotional adjustments, and supply a background of ideas and a freedom in conversation which will enable the children to enter the second stage of reading on as nearly an equal basis as may be possible. However, it is obvious that not all children will be ready for the second and succeeding stages at the same time, and our greatest administrative problem is to so organize the work that each child may be able to progress at his own best rate.

The second stage of development in reading includes the pre-primer period, when the child becomes able to read simple sen-

tence units; the primer period, where he learns to read units of two or more sentences fluently and understandingly; and the first-reader period when he learns to read simple material quite independently, becomes absorbed in getting the meaning, and enjoys reading by himself. This is ordinarily the extent of a child's progress during the first year in school, but there are always some children who have completed these two stages before the end of the first year, and others who need more than one year to accomplish it successfully.

We are attempting this year to send reports of progress to parents in forms that indicate quite minutely to what degree the child has met the standards set up for each period of learning to read, believing that the parent should know as intimately as possible the progress made by his own child.

The work in remedial reading in the upper grades has not yet been so definitely organized as I have just described for the first grade. Progress has been made, however, and all of the teachers are given special study to methods of remedial reading, some of the necessary testing has been done, and some remedial teaching is being done. A more complete report of this work will be given next year.

### *Medical Inspection*

Dr. C. G. Cayward of New Ipswich with Mrs. Susie L. Cutter, School Nurse, examined the pupils in September, and made the following report:

Number examined	28		
10% underweight	4		
Defective vision	2		
Defective teeth	11	Corrections	4
Diseased tonsils	9	Corrections	1
Enlarged glands	4		
Skin disease	1		

### *Statistics*

The statistical table at the end of this report shows that the number of pupils has decreased from forty-one at this time last year to thirty-two at present. The actual enrollment just now, however, is only twenty-seven with probably no more new pupils

to enter next September than are graduating this coming June. It appears that the enrollment next fall will be dangerously near the minimum number of thirty pupils required for approval for a two-room school. If the total enrollment next year should be less than thirty, we may be faced with the problem of changing to a one-room school the following year. We hope this will not happen.

The only other item appearing in the statistics calling for comment is the relatively high proportion of tardiness.

### *Budget*

The only item which causes material change in the estimate of expenditures and of income is that of transportation. Our estimate of \$1,200 last year was based on the expectation of a new transportation route which did not materialize, resulting in a saving of some \$300 and a reduction of state aid allotment of approximately \$165. This year's estimate of \$1,100 is based upon the expectation that the main transportation route will have to be extended some two miles next year.

Minor changes in other items off-set each other, so that the assessment required this year, \$3,800, is \$100 less than last year.

Respectfully submitted,

VERNON S. AMES
