# Contents

1. Introduction	1
2. Transfer of heavy metals in the food chain earthworm Black-tailed Godwit: comparison of a polluted and a reference site in The Netherlands	11
3. Timing of breeding and reproductive output in two Black-tailed Godwit populations in The Netherlands	25
4. The ongoing decline of the breeding population of Black-tailed Godwits in The Netherlands is not explained by changes in adult survival	47
5. Diagnosing declining grassland wader populations using simple matrix models	67
6. How survival and reproduction in meadow-breeding waders contribute to Europe-wide population changes: review and meta-analysis	89
7. General discussion	121
Summary	147
Samenvatting	153
Acknowledgements/Dankwoord	159
Authors' addresses	167
