Correction to: Atten Percept Psychophys <https://doi.org/10.3758/s13414-017-1408-4>

In the original article, the number of HMMs and LMMs who took part in the first study was reported to have been 13 and 10, respectively (p. 2624). These sample sizes were erroneously switched, meaning that the study included 10 HMMs and 13 LMMs. The correction does not change the description of the general data pattern or the scientific conclusions of the paper in any way. The authors are thankful to Anthony Wagner for pointing this out, and they apologize for the error.

The online version of the original article can be found at <https://doi.org/10.3758/s13414-017-1408-4>.
