# Machine learning for identifying patterns in human gait

Classification of age and clinical groups

YUHAN ZHOU

The studies described in chapters 2, 3 and 4 were conducted at the Department of Human Movement Sciences, University Medical Center Groningen, Groningen, the Netherlands. The study described in chapter 5 was conducted at the Department of Human Movement Sciences, University Medical Center Groningen, Groningen, the Netherlands and the Translational and Clinical Research Institute, Faculty of Medical Sciences, Newcastle University, Newcastle Upon Tyne, United Kingdom.

This study was financially supported by the Keep Control program, which received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No. 721577.

PhD training was facilitated by Research Institute School of Health Research (SHARE), part of the Graduate School of Medical Science Groningen.

The printing of this thesis was financially supported by the University of Groningen, University Medical Center Groningen and Research Institute SHARE.

# Machine learning for identifying patterns in human gait

Classification of age and clinical groups

**PhD thesis**

to obtain the degree of PhD at the  
 University of Groningen  
 on the authority of the  
 Rector Magnificus Prof. C. Wijmenga  
 and in accordance with  
 the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 17 March 2021 at 12.45 hours

by

**Yuhan Zhou**

born on 18 January 1990  
 in Jiangsu, China

**Supervisors**

Prof. C.J.C. Lamoth  
Prof. T. Hortobágyi

**Assessment Committee**

Prof. A. Daffertshofer  
Prof. N.M. Maurits  
Prof. E. Otten

## TABLE OF CONTENTS

<b>Chapter 1</b>	<b>General introduction</b>	<b>7</b>
<b>Chapter 2</b>	<b>The detection of age groups by dynamic gait outcomes using machine learning approaches</b> <i>Zhou, Y., Romijnders, R., Hansen, C., van Campen, J., Maetzler, W., Hortobágyi, T., Lamothe, C.J.C. (2020). Scientific reports, 10(1), 1-12.</i>	<b>21</b>
<b>Chapter 3</b>	<b>Artificial neural network accurately classified cognitively impaired and intact geriatric patients using a combination of gait and clinical characteristics</b> <i>Zhou, Y., van Campen, J., Hortobágyi, T., Lamothe, C.J.C., submitted for publication</i>	<b>45</b>
<b>Chapter 4</b>	<b>Classification of neurological patients to identify fallers based on spatial-temporal gait characteristics measured by a wearable device</b> <i>Zhou, Y., Zia Ur Rehman, R., Hansen, C., Maetzler, W., Del Din, S., Rochester, L., Hortobágyi, T. Lamothe, C.J.C. Sensors, 2020; 20(15):4098.</i>	<b>65</b>
<b>Chapter 5</b>	<b>Gait analysis with wearables can accurately classify fallers from non-fallers: a step toward better management of neurological disorders</b> <i>Zia Ur Rehman, R., Zhou, Y., Del Din, S., Alcock, L., Hansen, C., Guan, Y., Hortobágyi, T., Maetzler, W., Rochester, L., Lamothe, C.J.C. Sensors. 2020; 20(23):6992. (equal first authors)</i>	<b>87</b>
<b>Chapter 6</b>	<b>General discussion</b>	<b>113</b>
<b>Appendix A</b>	<b>Summary</b>	<b>128</b>
	<b>Samenvatting</b>	<b>131</b>
	<b>概要</b>	<b>134</b>
	<b>Acknowledgements</b>	<b>136</b>
	<b>About the author</b>	<b>139</b>
	<b>Scientific outputs</b>	<b>140</b>
