In the original published article,<sup>1</sup> the concentrations of La and Sr are reversed. The correct concentration should be  $\text{La}_{0.67}\text{Sr}_{0.33}\text{MnO}_3$  (which is in the ferromagnetic phase) rather than  $\text{La}_{0.33}\text{Sr}_{0.67}\text{MnO}_3$  (which is in the antiferromagnetic phase) in the original published version. They were typos of the element concentrations.

This misprint does not change the identification or conclusion presented in the original published paper.
