## **Chemo-Enzymatic Routes to Enantiopure Haloalcohols and Epoxides**

**Robert M. Haak**

The work described in this thesis has been carried out at the Stratingh Institute for Chemistry, University of Groningen, the Netherlands.

**university of  
 groningen**

The research described in this thesis was part of the program Integration of Biosynthesis and Organic Synthesis (IBOS), with financial support from the Netherlands Organization for Scientific Research (NWO), the Ministry of Economic Affairs, Royal DSM N.V. and N.V. Organon.

Cover design by Robert M. Haak and Thomas C. Pijper, photograph taken by Alex Nikada.

## Table of contents

<b>Preface</b> .....	<b>9</b>
<b>Chapter 1: General introduction</b> .....	<b>13</b>
1.1 Process intensification .....	14
1.2 Stereochemistry and enantiomers .....	14
1.3 Catalysis .....	17
1.3.1 Enzyme catalysis .....	19
1.3.2 Cascade catalysis.....	20
1.4 Kinetic resolution.....	21
1.4.1 Dynamic kinetic resolution .....	23
1.5 Enantioselective synthesis of epoxides.....	26
1.6 Combination of bio- and chemocatalysis.....	28
1.7 Notes and references .....	31
<b>Chapter 2: Epoxidation of olefins in a centrifugal contact separator</b> .....	<b>39</b>
2.1 Importance of process intensification – the CCS.....	40
2.1.1 Existing biphasic epoxidation reactions .....	42
2.2 Exploring epoxidation reactions for use in a CCS .....	44
2.2.1 Manganese-catalyzed epoxidation reactions .....	44
2.2.2 MTO-catalyzed epoxidation of pinenes .....	46
2.3 Biphasic iron-catalyzed epoxidation of olefins.....	46
2.4 Epoxidation of olefins catalyzed by Fe/phen and Fe/bipy complexes .....	50
2.5 Tungsten-catalyzed epoxidation of cyclooctene in the CCS.....	57
2.6 Conclusions and outlook.....	60
2.7 Experimental section.....	62
2.7.1 General remarks.....	62
2.7.2 Biphasic manganese-catalyzed epoxidation of styrene .....	62
2.7.3 Biphasic MTO-catalyzed epoxidation of pinene.....	63
2.7.4 Iron-catalyzed epoxidation of olefins in a two-phase system.....	63
2.7.5 Epoxidation of olefins catalyzed by Fe/phen and Fe/bipy complexes .....	64
2.7.6 NaZnPOM-catalyzed epoxidation of cyclooctene.....	65
2.8 Notes and references .....	67

*Table of contents*

<b>Chapter 3: Enantiopure chloroalcohols via enzymatic kinetic resolution</b> .....	<b>71</b>
3.1 Introduction to haloalcohol dehalogenases .....	72
3.2 Diene monoepoxides, chloroalcohols, and their synthesis .....	73
3.3 Enzymatic nucleophilic ring opening of vinyloxiranes .....	75
3.4 Enzymatic ring closure of chloroalcohols to epoxides .....	77
3.4.1 Kinetic resolution of <b>3.1 – 3.7</b> on analytical scale .....	77
3.4.2 Kinetic resolution on preparative scale.....	81
3.5 Hydrolysis of epoxides during enzymatic kinetic resolution.....	83
3.5.1 The role of hydrolysis in HheC-catalyzed enzymatic kinetic resolution.....	84
3.5.2 Trapping of epoxide to prevent hydrolysis .....	86
3.6 Limitations of this methodology .....	87
3.7 Conclusions .....	89
3.8 Experimental section.....	90
3.8.1 General remarks.....	90
3.8.2 Synthesis of substrates <b>3.1 – 3.7</b> .....	90
3.8.3 Production and purification of the enzyme.....	96
3.8.4 General procedure for enzymatic kinetic resolution on analytical scale .....	97
3.8.5 General procedure for enzymatic kinetic resolution on preparative scale.....	97
3.8.6 Determination of absolute configuration.....	98
3.9 Notes and references .....	99
<b>Chapter 4: A new approach to the dynamic kinetic resolution of haloalcohols</b> .....	<b>103</b>
4.1 Introduction to dynamic kinetic resolution .....	104
4.2 Results and discussion.....	109
4.2.1 Substrates.....	109
4.2.2 Enzymes.....	110
4.2.3 Racemization catalysts.....	114
4.2.4 Dynamic kinetic resolution experiments.....	117
4.3 Conclusions and outlook.....	129
4.4 Experimental section.....	130
4.4.1 General remarks.....	130
4.4.2 Synthesis of haloalcohols <b>4.3</b> .....	130
4.4.3 Synthesis of racemic products <b>4.4</b> .....	137
4.4.4 Production and overexpression of enzymes <b>E1 – E5</b> .....	140
4.4.5 Kinetic resolution of <b>4.31</b> using <b>E1 – E5</b> .....	141
4.4.6 Synthesis of catalysts <b>4.8a – 4.8c</b> .....	141
4.4.7 General procedure for the dynamic kinetic resolution of compounds <b>4.3</b> .....	142
4.4.8 Dynamic kinetic resolution of <b>4.3</b> on preparative scale .....	143
4.5 Notes and references .....	143

<b>Chapter 5: Synthetic applications of enantiopure chloroalcohols .....</b>	<b>147</b>
5.1 Introduction .....	148
5.2 Achmatowicz rearrangement of 2-chloro-1-(furan-2-yl)ethanol .....	148
5.3 Ireland-Claisen rearrangement of ( <i>E</i> )-1-chloro-4-phenylbut-3-en-2-yl propionate .....	150
5.4 Johnson orthoester rearrangement of ( <i>E</i> )-1-chloro-4-phenylbut-3-en-2-ol .....	154
5.5 Suggestions for further research .....	157
5.6 Conclusions .....	158
5.7 Experimental section.....	158
5.7.1 General remarks.....	158
5.7.2 Achmatowicz rearrangement .....	159
5.7.3 Ireland-Claisen rearrangement .....	160
5.7.4 Johnson orthoester rearrangement.....	162
5.7.5 Further research .....	163
5.8 Notes and references .....	164
<b>Chapter 6 Enantiopure alcohols as amplifiers of 2D chirality.....</b>	<b>167</b>
6.1 Introduction .....	168
6.2 Synthesis of chiral solvents.....	171
6.3 Control of enantioselective 2D self-assembly using chiral solvents.....	172
6.4 Conclusions and outlook.....	176
6.5 Experimental part.....	177
6.5.1 General remarks.....	177
6.5.2 Synthesis of chiral solvents.....	178
6.5.3 Scanning tunneling microscopy (STM).....	179
6.6 Notes and references .....	179
<b>Samenvatting .....</b>	<b>183</b>
<b>Dankwoord .....</b>	<b>193</b>
