Biography of the author

Adam Kawałek was born on 3may 1984 in Oborniki Wielkopolskie in Poland. He received his bachelor degree in biotechnology at the University of Wrocław (Poland) where he also continued and obtained his master's degree in molecular biology. In August 2008 he joined Plant Transformation and Cell Engineering lab in Plant Breeding and Acclimatization Institute in Radzików (Poland). As a research assistant he investigated the molecular basis of plant – fungus interactions. In August 2010 he started his PhD in Molecular Cell Biology group at the University of Groningen (the Netherlands). His research emphasized on yeast ageing and the role of peroxisomal homeostasis in this process.
