# **Genetic and Environmental Determinants of Respiratory Health**

**PhD thesis**

to obtain the degree of PhD at the  
University of Groningen  
on the authority of the  
Rector Magnificus Prof. E. Sterken  
and in accordance with  
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 12 October 2016 at 11.00 hours

by

**Xiang Zeng**

born on 17 March 1986  
in Hubei, China

## CONTENTS

- Chapter 1    General introduction
- Chapter 2    E-waste environmental contamination and harm to public health in China. *Published in Frontiers in Medicine, 2015*
- Chapter 3    Children with health impairments by heavy metals in an e-waste recycling area. Published in Chemosphere, 2016
- Chapter 4    Decreased lung function with alternation of blood parameters linked to e-waste lead and cadmium exposure in preschool children. *Submitted for publication*
- Chapter 5    Genome-wide association study to identify susceptibility loci of respiratory symptoms. Submitted for publication
- Chapter 6    Genome-wide interaction study of gene-by-occupational exposures on respiratory symptoms. Submitted for publication
- Chapter 7    Genome-wide interaction study of SNPs-by-nitrogen dioxide exposure on respiratory symptoms.
- Chapter 8    Summary, discussion and future perspectives
- Chapter 9    Samenvatting  
Dankwoord  
Currivulum Vitae
