# **Telomeres, workload and life-history in great tits**

Els Atema

The research in this thesis was carried out at the Behavioural and Physiological Ecology Group at the Groningen Institute for Evolutionary Life Sciences of the University of Groningen, The Netherlands and at the Department of Animal Ecology at the Netherlands Institute of Ecology, The Netherlands.

The research was supported by an open competition grant from the NWO Aard- en Levenswetenschappen (no. 821.01.003) awarded to S. Verhulst and A.J. van Noordwijk.

The printing of this thesis was funded by the Netherlands Institute of Ecology and the University of Groningen.

Lay-out: Els Atema

Cover design: Elsje A. de Ruijter

Prof. dr. C. Both

Prof. dr. M. Naguib

## Table of contents

CHAPTER 1	Introduction and synthesis	3
<b>PART I</b>	<b><i>Quantifying telomere length</i></b>	
CHAPTER 2	GAPDH as a control gene to estimate genome copy number in great tits, with cross-amplification in blue tits	26
CHAPTER 3	Ultra-long telomeres mask attrition of short telomeres in great tits	40
<b>PART II</b>	<b><i>Genes, workload and life-history</i></b>	
CHAPTER 4	Heritability of telomere length in the zebra finch	68
CHAPTER 5	Costs of long-term carrying of extra mass in a songbird	93
CHAPTER 6	Telomeres, telomere dynamics and great tit life-histories	124
