A quest to optimize the clinical pharmacology of tuberculosis and human immunodeficiency virus drug treatment

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. E. Sterken
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 21 november 2018 om 12.45 uur

door

Alper Daskapan

geboren op 2 juli 1990
 te 's-Gravenhage

Promotores

Prof. dr. T.S. van der Werf

Dr. J.W.C. Alffenaar

Prof. dr. Y. Stienstra

Beoordelingscommissie

Prof. dr. D.M. Burger

Prof. dr. M.A. van Agtmael

Prof. dr. H.W. Frijlink

TABLE OF CONTENTS

Chapter 1	General introduction	7
Chapter 2	A systematic review on the effect of HIV infection on the pharmacokinetics of first-line tuberculosis drugs	17
Chapter 3	Predictors of prolonged TB treatment in a Dutch outpatient setting	47
Chapter 4	Letters to the editor and case-report	63
A	The never ending struggle against development of drug resistance	65
B	The role of therapeutic drug monitoring in individualised drug dosage and exposure measurement in tuberculosis and HIV co-infection	69
C	Raltegravir and rifampicin in patients with HIV and tuberculosis	75
Chapter 5	Development and validation of a bioanalytical method for the simultaneous determination of 14 antiretroviral drugs using liquid chromatography-tandem mass spectrometry	79
Chapter 6	Darunavir population pharmacokinetic model based on HIV outpatient data	99
Chapter 7	Food intake and darunavir plasma concentrations in people living with HIV in an outpatient setting	117
Chapter 8	Risk factors contributing to a low darunavir plasma concentration	129
Chapter 9	General Discussion and Future Perspectives	141
Chapter 10	Summary	153
Chapter 11	Samenvatting	159
	Dankwoord	166
	Curriculum Vitae	172
	Publication List	174
